**RE: Weekly Progress Report (Week 6: June 13-17, 2022)
EJ Victory Building – 59 Lester Avenue, Johnson City, Broome County, New York
NYSDEC Site Number: C704060**

Dear Mr. Bollasina:

On behalf of EJ Victory Building, LLC, NEU-VELLE, LLC (NEU-VELLE) has prepared this Weekly Progress Update to summarize the work performed from June 13-17, 2022 at the EJ Victory Building project located at 59 Lester Avenue in the Village of Johnson City, New York (New York State Department of Environmental Conservation [NYSDEC] Brownfield Cleanup Program [BCP] Site #C704060).

SCOPE OF WORK

The following activities were conducted during the reporting period.

GENERAL PROTOCOLS

Whenever potentially-contaminated soil was being handled (excavated, staged, backfilled, etc.), NEU-VELLE observed the activities, noted any staining, odors, or sheens, screened soils for volatile vapors with a photo-ionization detector (PID), and conducted air monitoring for volatile vapors and particulates at locations upwind and downwind of the Work Area in accordance with the project's Community Air Monitoring Program (CAMP). Real-time air monitoring results were reported using telemetry technology coupled with instrument-supported (Environet) software. Real-time alerts were programmed to notify NEU-VELLE personnel (via text message) when action levels were exceeded.

WORK ZONE #1 – HELEN DRIVE (SOUTHERN) EXCAVATIONS

The activities in Work Zone #1 (Helen Drive) consisted of:

- Installation of water line laterals in the vicinity of Avenue B.
- Installation of storm sewer lines in the vicinity of Avenue B.

WORK ZONE #2 – AVENUE C (NORTHERN) EXCAVATIONS

The activities in Work Zone #2 (Avenue C) consisted of:

- Installation of storm sewer lines in the western portion of the site.
- Removal, breaking apart, and disposal of a large solid concrete block.
- Repair of a broken sanitary sewer line.

STAGED CONTAMINATED SOILS

The piles of gasoline-contaminated soils and railroad bedding remain (covered with polyethylene sheeting). The Site Contractor (Pritchard Property Development) is currently coordinating hauling services with their insurance company.

OBSERVATIONS

The following observations were noted during the reporting period:

- A small volume of gasoline-contaminated soil was encountered directly below the asphalt near the western end of the building (associated with Spill #22-01296). This soil was removed and staged in the existing contaminated soil pile.
- Wind strength and direction was variable. NEU-VELLE attempted to accurately place the upwind and downwind air monitoring stations, and frequently re-assessed the prevailing wind direction. However, the presence of the large subject building was conducive to swirling winds, and winds sometimes blew in the opposite direction for short periods of time.
- Construction activities unrelated to remediation (movement of large motorized lifts, forklifts, bobcats, etc., dumping of materials within dumpsters, etc.) created visible dust for short periods of time. This dust primarily consisted of fine powder created by the heavy equipment pulverizing stone on the asphalt roadways, and was exacerbated by sunny conditions, winds, and low humidity. Areas within the remediation work zone were wetted by use of a garden hose, as needed.
- No work occurred in Zone #1 on June 14 although the CAMP equipment was running/recording. No work occurred in Zone #2 on June 16 and 17.
- CAMP air monitoring alert notifications were limited to the following:

Work Zone #1

- No alerts were activated during the reporting period.

Work Zone #2

- Upon startup on June 13, the Stop Work level for particulates was exceeded. The elevated concentrations resolved the following minute with no mitigation required.
- On June 13, the Zone #1 PIDs were recording erroneous values due to high humidity/condensation. Zero calibrations were performed on each PID. The downwind PID began recording accurate values shortly after, but the upwind PID errors didn't fully resolve, so this PID was never connected to the Netronix modem. No exceedances of Action or Stop Work levels were recorded by the downwind PID.
- On June 16, the Zone #1 Upwind PIDs was recording but not communicating with the Netronix modem. The communication issues were not noticed until the end of the day.
 - Since the handheld/roaming PID used in the affected zones did not register any detectable VOC concentrations for ambient air, and no exceedances of VOC action levels have been noted so far during the project, this issue is not of significant consequence
 - Note that at the end of the project, all recorded data from the CAMP monitoring equipment (even if it wasn't communicating with the Netronix modem) will be downloaded directly from each unit and included within the Final Engineering Report.

UPCOMING WORK

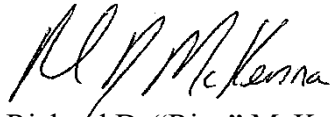

No work activities that disturb soils within the boundaries of the BCP Area are planned for the next week. Work will be limited to installation of water lines along Avenue A, and construction associated with the renovation of the subject building (unrelated to remediation). Thus, no oversight or CAMP monitoring will be required. However, if the plan changes, no excavation work will be allowed unless NEU-VELLE can be on-site to perform oversight and CAMP monitoring.
