Anthony Bollasina, P.G.
Assistant Geologist - Bureau D, Section D
New York State Department of Environmental Conservation
625 Broadway, 12th Floor
Albany, NY 12204

RE: Weekly Progress Report (Week 8: June 27 - July 1, 2022)
EJ Victory Building – 59 Lester Avenue, Johnson City, Broome County, New York
NYSDEC Site Number: C704060

Dear Mr. Bollasina:

On behalf of EJ Victory Building, LLC, NEU-VELLE, LLC (NEU-VELLE) has prepared this Weekly Progress Update to summarize the work performed from June 27 to July 1, 2022 at the EJ Victory Building project located at 59 Lester Avenue in the Village of Johnson City, New York (New York State Department of Environmental Conservation [NYSDEC] Brownfield Cleanup Program [BCP] Site #C704060).

SCOPE OF WORK

The following activities were conducted during the reporting period.

GENERAL PROTOCOLS

Whenever potentially-contaminated soil was being handled (excavated, staged, backfilled, etc.), NEU-VELLE observed the activities, noted any staining, odors, or sheens, screened soils for volatile vapors with a photo-ionization detector (PID), and conducted air monitoring for volatile vapors and particulates at locations upwind and downwind of the Work Area in accordance with the project's Community Air Monitoring Program (CAMP). Real-time air monitoring results were reported using telemetry technology coupled with instrument-supported (Environet) software. Real-time alerts were programmed to notify NEU-VELLE personnel (via text message) when action levels were exceeded.

WORK ZONES #1 and #2 – WEST END EXCAVATIONS

All work for the week occurred in the western portion of the Site. The activities consisted of:

- Asphalt removal
- Removal of the soil ramp that (formerly) provided vehicular access to the second floor of the building
- Installation of new sewer line and connection to Village system
- Existing sewer line repair

An asbestos-insulated pipe was encountered on July 1, and work was stopped.

STAGED CONTAMINATED SOILS

The Waste Transporter Permit was received from Pritchard Property Development, Inc. (excavation contractor and hauler). Waste Profile forms were submitted to the Broome County Landfill. The piles of gasoline-contaminated soils and railroad bedding remain (covered with polyethylene sheeting), awaiting landfill approval for disposal.

OBSERVATIONS

The following observations were noted during the reporting period:

- Wind strength and direction was variable. NEU-VELLE attempted to accurately place the upwind and downwind air monitoring stations, and frequently re-assessed the prevailing wind direction. However, the presence of the large subject building was conducive to swirling winds, and winds sometimes blew in the opposite direction for short periods of time.
- Construction activities unrelated to remediation (movement of large motorized lifts, forklifts, bobcats, etc., dumping of materials within dumpsters, etc.) created visible dust for short periods of time. This dust primarily consisted of fine powder created by the heavy equipment pulverizing stone on the asphalt roadways, and was exacerbated by sunny conditions, winds, and low humidity. Areas within the remediation work zone were wetted by use of a garden hose, as needed.
- CAMP air monitoring alert notifications were limited to the following:
 - Early in the morning of June 29, the Action level for particulates was exceeded. The elevated concentrations were due to nearby scrap metal loading operations associated with building construction (not remediation). The issue quickly resolved after the loading was completed.
- On July 1, the Zone #1 Downwind DustTrak was recording but not communicating with the Nextronix modem. The communication issue was not noticed until the lunch hour (loose USB cable).
 - Since the handheld/roaming PID used in the affected zones did not register any detectable VOC concentrations for ambient air, and no exceedances of VOC action levels have been noted so far during the project, this issue is not of significant consequence
 - Note that at the end of the project, all recorded data from the CAMP monitoring equipment (even if it wasn't communicating with the Netronix modem) will be downloaded directly from each unit and included within the Final Engineering Report.

UPCOMING WORK

No work activities that disturb soils within the boundaries of the BCP Area are planned for the next week. Work will be limited to installation of water lines along Avenue A, construction associated with the renovation of the subject building (unrelated to remediation), and abatement of the asbestos-insulated pipe. Thus, no oversight or CAMP monitoring will be required (asbestos air monitoring will be conducted as required by NYS DOL Code Rule 56). However, if the plan changes, no excavation work will be allowed unless NEU-VELLE can be on-site to perform oversight and CAMP monitoring.

CLOSING

If you have any questions or comments pertaining to this report, please call me at (315) 345-1649 or e-mail me at rmckenna@neu-velle.com.

Sincerely,

NEU-VELLE, LLC

Richard D. "Rico" McKenna
Senior Project Manager

Albert G. Lyons, Jr., P.E.
Principal
