625 Broadway, 12th Floor
Albany, NY 12204

**RE: Weekly Progress Report (Week 12: July 25-29, 2022)
EJ Victory Building – 59 Lester Avenue, Johnson City, Broome County, New York
NYSDEC Site Number: C704060**

Dear Mr. Bollasina:

On behalf of EJ Victory Building, LLC, NEU-VELLE, LLC (NEU-VELLE) has prepared this Weekly Progress Update to summarize the work performed from July 25-29, 2022 at the EJ Victory Building project located at 59 Lester Avenue in the Village of Johnson City, New York (New York State Department of Environmental Conservation [NYSDEC] Brownfield Cleanup Program [BCP] Site #C704060).

SCOPE OF WORK

GENERAL PROTOCOLS

Whenever potentially-contaminated soil was being handled (excavated, staged, backfilled, etc.), NEU-VELLE observed the activities, noted any staining, odors, or sheens, screened soils for volatile vapors with a photo-ionization detector (PID), and conducted air monitoring for volatile vapors and particulates at locations upwind and downwind of the Work Area in accordance with the project's Community Air Monitoring Program (CAMP). Real-time air monitoring results were reported using telemetry technology coupled with instrument-supported (EnviroNet) software. Real-time alerts were programmed to notify NEU-VELLE personnel (via text message) when action levels were exceeded.

WORK ZONE #1 – HELEN DRIVE EXCAVATIONS

The activities that occurred along Helen Drive and Avenue B (on the south side of the Site) consisted of excavations associated with the installation of water and sewer lines.

WORK ZONE #2 – AVENUE C EXCAVATIONS

Excavations associated with the installation of storm sewer lines occurred between the Annex Building (attached to the north side of the building) and the previously-installed sewer lines along Avenue C. These activities were limited to Thursday July 28 and Friday July 29.

OFFSITE ACTIVITIES

Excavations and backfilling for various utilities occurred on Avenue A. Since this area is offsite, no CAMP monitoring was required during these off-site activities.

OBSERVATIONS

The following observations were noted during the reporting period:

- Wind strength and direction was variable. NEU-VELLE attempted to accurately place the upwind and downwind air monitoring stations, and frequently re-assessed the prevailing wind direction. However, the presence of the large subject building was conducive to swirling winds, and winds sometimes blew in the opposite direction for short periods of time.
- Construction activities unrelated to remediation (movement of large motorized lifts, forklifts, bobcats, etc., dumping of materials within dumpsters, etc.) created visible dust for short periods of time. This dust primarily consisted of fine powder created by the heavy equipment pulverizing stone on the asphalt roadways, and was exacerbated by sunny conditions, winds, and low humidity. Areas within the remediation work zone were wetted by use of a garden hose, as needed.
- No CAMP air monitoring alerts were triggered during the reporting period, except for the following:
 - On Thursday (July 28) afternoon, the “Action” level for particulates was exceeded for approximately 15 minutes due to construction vehicle traffic.
- A new PID was ordered to replace the malfunctioning Work Zone #2 downwind PID. However, due to shipping issues this PID was not received. Work Zone #2 was only active on Thursday and Friday (July 28-29). In order to monitor air quality at the Work Zone #2 downwind location, the “roaming” PID for Work Zone #2 was placed in the monitoring station and manually checked throughout the day.

UPCOMING WORK

It is anticipated that sewer and water line installation will continue along Helen Drive.

CLOSING

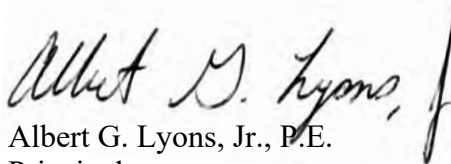

If you have any questions or comments pertaining to this report, please call me at (315) 345-1649 or e-mail me at rmckenna@neu-velle.com.

Sincerely,

NEU-VELLE, LLC

Richard D. “Rico” McKenna
Senior Project Manager

Albert G. Lyons, Jr., P.E.
Principal

Notes:

- Yellow Highlight Exceedance of Action Level (0.100 mg/m³ Particulates; 5 ppm VOCs)
- Red Highlight Exceedance of Stop Work Level (0.150 mg/m³ Particulates; 25 ppm VOCs)
- * Work Zone #2 "Roaming" PID was used in monitoring station and readings were manually recorded
