Anthony Bollasina, P.G.  
Assistant Geologist - Bureau D, Section D  
New York State Department of Environmental Conservation  
625 Broadway, 12<sup>th</sup> Floor  
Albany, NY 12204

**RE: Weekly Progress Report (Week 19: September 12 - 16, 2022)  
EJ Victory Building – 59 Lester Avenue, Johnson City, Broome County, New York  
NYSDEC Site Number: C704060**

Dear Mr. Bollasina:

On behalf of EJ Victory Building, LLC, NEU-VELLE, LLC (NEU-VELLE) has prepared this Weekly Progress Update to summarize the work performed from September 12 - 16, 2022 at the EJ Victory Building project located at 59 Lester Avenue in the Village of Johnson City, New York (New York State Department of Environmental Conservation [NYSDEC] Brownfield Cleanup Program [BCP] Site #C704060).

### **SCOPE OF WORK**

No excavation/remediation work occurred on Friday September 16.

### **GENERAL PROTOCOLS**

Whenever potentially-contaminated soil was being handled (excavated, staged, backfilled, etc.), NEU-VELLE observed the activities, noted any staining, odors, or sheens, screened soils for volatile vapors with a photo-ionization detector (PID), and conducted air monitoring for volatile vapors and particulates at locations upwind and downwind of the Work Area(s) in accordance with the project's Community Air Monitoring Program (CAMP). The locations of the monitoring stations are presented on the daily CAMP Monitoring Logs provided in Appendix C. Real-time air monitoring results were reported using telemetry technology coupled with instrument-supported (EnviroNet) software. Real-time alerts were programmed to notify NEU-VELLE personnel (via text message) when action levels were exceeded.

### **WORK ZONE #1 – HELEN DRIVE EXCAVATIONS**

The activities that occurred along Helen Drive (on the south side of the Site) consisted of the removal of existing asphalt, limited excavations associated with the installation of sewer lines and removal / installation of curbs, grading / leveling for upcoming parking lot and roadway construction, placement of demarcation barrier along Helen Drive and future landscaped areas, and placement of roadway subbase on top of the demarcation barrier.

### **WORK ZONE #2 – AVENUE C EXCAVATIONS**

No remediation / excavation activities occurred along Avenue C (on the north side of the Site) during the reporting period.

## **OBSERVATIONS**

The following observations were noted during the reporting period:

- Wind strength and direction was variable. NEU-VELLE attempted to accurately place the upwind and downwind air monitoring stations, and frequently re-assessed the prevailing wind direction. However, the presence of the large subject building was conducive to swirling winds, and winds sometimes blew in the opposite direction for short periods of time.
- Construction activities unrelated to remediation (movement of large motorized lifts, forklifts, bobcats, etc., dumping of materials within dumpsters, etc.) created visible dust for short periods of time. This dust primarily consisted of fine powder created by the heavy equipment pulverizing stone on the asphalt roadways, and was exacerbated by sunny conditions, winds, and low humidity. Areas within the remediation work zone were wetted by use of a garden hose, as needed.
- The Work Zone #1 monitoring equipment did not properly charge over the weekend, so the Work Zone #2 monitoring equipment was used in Work Zone #1 on Monday September 12. The monitoring data (Appendix D) for this day is listed under Work Zone #2.
- No CAMP air monitoring alerts were triggered during the reporting period, except the following. None of the alerts were associated with remediation activities.
  - On the morning of Monday September 12, the “Stop Work” alert was triggered. This alert appeared to be erroneous. The “roaming/hand-held” PID was held next to the monitoring station and it was verified that no VOCs were actually present. The malfunctioning PID was recalibrated, and it appeared to respond correctly. The PID was then reconnected to the modem and subsequent data was recorded normally.

## **UPCOMING WORK**

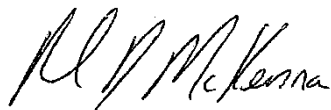

It is anticipated that the following activities will occur next week: limited excavations associated with the removal / installation of curbs, grading / leveling for upcoming parking lot and roadway construction, placement of demarcation barrier along Helen Drive and future landscaped areas, and placement of roadway subbase on top of the demarcation barrier.

## **CLOSING**

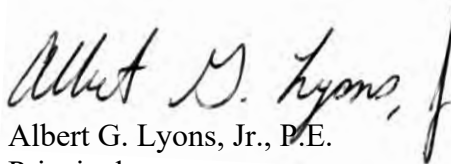

If you have any questions or comments pertaining to this report, please call me at (315) 345-1649 or e-mail me at [rmckenna@neu-velle.com](mailto:rmckenna@neu-velle.com).

Sincerely,

NEU-VELLE, LLC

Richard D. “Rico” McKenna  
Senior Project Manager

Albert G. Lyons, Jr., P.E.  
Principal
