Anthony Bollasina, P.G.
Assistant Geologist - Bureau D, Section D
New York State Department of Environmental Conservation
625 Broadway, 12th Floor
Albany, NY 12204

**RE: Weekly Progress Report (Week 20: September 19 - 23, 2022)
EJ Victory Building – 59 Lester Avenue, Johnson City, Broome County, New York
NYSDEC Site Number: C704060**

Dear Mr. Bollasina:

On behalf of EJ Victory Building, LLC, NEU-VELLE, LLC (NEU-VELLE) has prepared this Weekly Progress Update to summarize the work performed from September 19 - 23, 2022 at the EJ Victory Building project located at 59 Lester Avenue in the Village of Johnson City, New York (New York State Department of Environmental Conservation [NYSDEC] Brownfield Cleanup Program [BCP] Site #C704060).

SCOPE OF WORK

No excavation/remediation work occurred in the afternoon of Thursday September 22 or at any time on Friday September 23.

GENERAL PROTOCOLS

Whenever potentially-contaminated soil was being handled (excavated, staged, backfilled, etc.), NEU-VELLE observed the activities, noted any staining, odors, or sheens, screened soils for volatile vapors with a photo-ionization detector (PID), and conducted air monitoring for volatile vapors and particulates at locations upwind and downwind of the Work Area(s) in accordance with the project's Community Air Monitoring Program (CAMP). The locations of the monitoring stations are presented on the daily CAMP Monitoring Logs provided in Appendix C. Real-time air monitoring results were reported using telemetry technology coupled with instrument-supported (EnviroNet) software. Real-time alerts were programmed to notify NEU-VELLE personnel (via text message) when action levels were exceeded.

WORK ZONE #1 – HELEN DRIVE

The activities that occurred along Helen Drive (on the south side of the Site) consisted of the removal of existing asphalt, removal of trees, and limited excavations associated with curbs, water valves, electric conduit, light pole foundations, stair footers, and drain lines.

WORK ZONE #2 – AVENUE C

No remediation / excavation activities occurred along Avenue C (on the north side of the Site) during the reporting period.

OBSERVATIONS

The following observations were noted during the reporting period:

- Wind strength and direction was variable. NEU-VELLE attempted to accurately place the upwind and downwind air monitoring stations, and frequently re-assessed the prevailing wind direction. However, the presence of the large subject building was conducive to swirling winds, and winds sometimes blew in the opposite direction for short periods of time.
- Construction activities unrelated to remediation (movement of large motorized lifts, forklifts, bobcats, etc., dumping of materials within dumpsters, etc.) created visible dust for short periods of time. This dust primarily consisted of fine powder created by the heavy equipment pulverizing stone on the asphalt roadways, and was exacerbated by sunny conditions, winds, and low humidity. Areas within the remediation work zone were wetted by use of a garden hose, as needed.
- No CAMP air monitoring alerts were triggered during the reporting period.
- On the early morning of September 20, the Work Zone #1 Upwind PID was recording but not communicating with the Nextronix modem. The communication issue was noticed and resolved an hour later.
 - Since the downwind PID in the Work Zone did not register any detectable VOC concentrations for ambient air during this time, this issue is of no consequence
 - Note that at the end of the project, all recorded data from the CAMP monitoring equipment (even if it wasn't communicating with the Netronix modem) will be downloaded directly from each unit and included within the Final Engineering Report.

UPCOMING WORK

It is anticipated that the following activities will occur next week: placement of roadway subbase, roadway paving (Helen Drive, Avenue A, and Avenue B), parking lot preparation, limited excavations for drainage lines and electrical conduit, and possibly the decommissioning of groundwater monitoring wells.

CLOSING

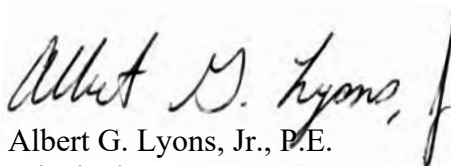

If you have any questions or comments pertaining to this report, please call me at (315) 345-1649 or e-mail me at rmckenna@neu-velle.com.

Sincerely,

NEU-VELLE, LLC

Richard D. "Rico" McKenna
Senior Project Manager

Albert G. Lyons, Jr., P.E.
Principal
