Anthony Bollasina, P.G.  
Assistant Geologist - Bureau D, Section D  
New York State Department of Environmental Conservation  
625 Broadway, 12<sup>th</sup> Floor  
Albany, NY 12204

**RE: Weekly Progress Report (Week 21: September 26 - 30, 2022)  
EJ Victory Building – 59 Lester Avenue, Johnson City, Broome County, New York  
NYSDEC Site Number: C704060**

Dear Mr. Bollasina:

On behalf of EJ Victory Building, LLC, NEU-VELLE, LLC (NEU-VELLE) has prepared this Weekly Progress Update to summarize the work performed from September 26 - 30, 2022 at the EJ Victory Building project located at 59 Lester Avenue in the Village of Johnson City, New York (New York State Department of Environmental Conservation [NYSDEC] Brownfield Cleanup Program [BCP] Site #C704060).

### **SCOPE OF WORK**

No excavation/remediation work occurred in the morning of September 26 or at any time on Tuesday September 27, Thursday September 29, or Friday September 30.

### **GENERAL PROTOCOLS**

Whenever potentially-contaminated soil was being handled (excavated, staged, backfilled, etc.), NEU-VELLE observed the activities, noted any staining, odors, or sheens, screened soils for volatile vapors with a photo-ionization detector (PID), and conducted air monitoring for volatile vapors and particulates at locations upwind and downwind of the Work Area(s) in accordance with the project's Community Air Monitoring Program (CAMP). The locations of the monitoring stations are presented on the daily CAMP Monitoring Logs provided in Appendix C. Real-time air monitoring results were reported using telemetry technology coupled with instrument-supported (EnviroNet) software. Real-time alerts were programmed to notify NEU-VELLE personnel (via text message) when action levels were exceeded.

### **WORK ZONE #1 – HELEN DRIVE**

The activities that occurred along Helen Drive (on the south side of the Site) during the reporting period consisted of limited excavations associated with electric conduit, paving of Helen Drive, and locating existing monitoring wells.

### **WORK ZONE #2 – AVENUE C**

The activities that occurred along Avenue C (on the north side of the Site) during the reporting period consisted of limited excavations associated with storm drainage lines.

## **OBSERVATIONS**

The following observations were noted during the reporting period:

- Wind strength and direction was variable. NEU-VELLE attempted to accurately place the upwind and downwind air monitoring stations, and frequently re-assessed the prevailing wind direction. However, the presence of the large subject building was conducive to swirling winds, and winds sometimes blew in the opposite direction for short periods of time.
- Construction activities unrelated to remediation (movement of large motorized lifts, forklifts, bobcats, etc., dumping of materials within dumpsters, etc.) created visible dust for short periods of time. This dust primarily consisted of fine powder created by the heavy equipment pulverizing stone on the asphalt roadways, and was exacerbated by sunny conditions, winds, and low humidity. Areas within the remediation work zone were wetted by use of a garden hose, as needed.
- No CAMP air monitoring alerts were triggered during the reporting period.

## **UPCOMING WORK**

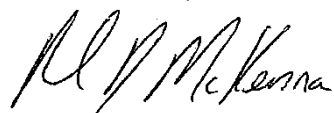

It is anticipated that the following activities will occur next week: placement of parking lot and sidewalk subbase, parking lot paving, limited excavations for drainage lines and electrical conduit, and possibly the decommissioning of groundwater monitoring wells.

## **CLOSING**

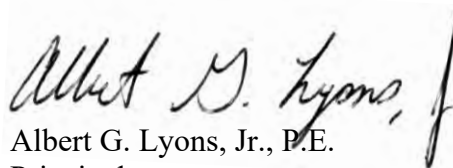

If you have any questions or comments pertaining to this report, please call me at (315) 345-1649 or e-mail me at [rmckenna@neu-velle.com](mailto:rmckenna@neu-velle.com).

Sincerely,

NEU-VELLE, LLC

Richard D. "Rico" McKenna  
Senior Project Manager

Albert G. Lyons, Jr., P.E.
