Re: Off-Site Area – Northern Athletic Field (NAF) West Soil Investigation Revised Work Plan
Former Sperry Remington Site – North Portion (#c808022)
Elmira, Chemung County, NY

Dear Mr. Krueger:

The New York State Department of Environmental Conservation (NYSDEC), in consultation with New York State Department of Health (NYSDOH), has completed its review of the "Off-Site Area – North Atlantic Fields (NAF) West Soil Investigation Revised Work Plan" – North Portion - Former Sperry Remington Site – #c808022", dated August 9, 2021 and **Approve as Modified below**:

1. Health and Safety: Ground cover restoration shall be completed the same day as sampling and include topsoil with seeding, mulch and/or asphalt as consistent with original cover.

2. Health and Safety: Special requirements CAMP will be implemented, with at least one CAMP location between the sample location and the building, if the building on the northern portion of 120 O'Gorman is occupied. A figure with the proposed CAMP location shall be provided to the NYSDOH and NYSDEC prior to implementation of this investigation.

3. Table 1: All sample locations requested to delineate DRO detections (including proposed soil boring locations B3546, B3547 and B3548) shall include both VOC and SVOC sample analysis at all intervals.

4. Figure 2A: Soil Sampling conducted on-Site in July 2021 (primarily B4021, B4022, and B4023, collected 0-0.17 ft bgs) are not shown on Figure 2A. Update the figure to clearly illustrate the sample locations.

5. Figures 2A-2E: The Figures contain inconsistent parameter result icons. The Figures shall be updated to present the parameter data results consistent with the legend depicted on Figure 2C including Parameter icons and sizing for TPH, VOCs, SVOCs, Metals, and PCBs.

Within 15 days of this letter, please elect in writing to accept the Department modified work plan or take other action in accordance with the consent order.

Please contact me at (585) 226-5480 if you have any questions regarding this letter.

Sincerely,

Timothy Schneider, P.E.

Subject: **Off-Site Area- Northern Athletic Field (NAF) West Soil Investigation Revised Work Plan**
Former Sperry Remington Site – North Portion (#c808022)
777 South Main Street, City of Elmira, Chemung County, NY

Dear Mr. Schneider:

On behalf of Unisys Corporation (Unisys), Geosyntec Consultants, Inc. and its New York engineering affiliate, B & B Engineers & Geologists of New York, P.C. (collectively, Geosyntec) are submitting this Work Plan to be conducted at the Former Sperry Remington Site – North Portion (NYSDEC #c808022 or the Site) in Elmira, New York.

The Site is located adjacent to Elmira High School (EHS), 777 South Main Street in Elmira, New York (**Figure 1**). Site compounds of potential concern (COPCs) include metals, polychlorinated biphenyls (PCBs), semivolatile organic compounds (SVOCs), volatile organic compounds (VOCs) and petroleum hydrocarbon compounds typically composed of diesel range organics (DRO). This Work Plan describes soil data collection activities to provide data regarding the nature and extent of COPCs relative to soil cleanup objectives (SCOs) in an off-site area adjoining the western side of the Northern Athletic Fields (NAF) at the Site. This area is called the NAF West Off-Site Area (NAF West). A work plan including sampling in both the NAF and NAF West was originally submitted on 30 December 2020, and the plan has been revised to reflect NYSDEC comments provided in a 13 January 2021 letter. The proposed investigation work plan also addresses comments provided in an 11 January 2021 comment letter on the *Detailed RI Table 1 – Conceptual Site Model – Former Sperry Remington North – Off-Site Area NAF West* that was submitted to NYSDEC on 6 November 2020. Soil investigation within the NAF was completed in January 2021 in accordance with the revised soil plan. This investigation included soil boring locations adjacent to the NAF West area. These data have been included in this work plan and were used to develop the scope for off-site soil investigation.

This work plan has been revised to address comments provided by NYSDEC in a letter dated 15 June 2021, and includes additional soil investigation activities. Unisys provided a response to comment numbers IV.6 (g through i), IV.7 and IV.8 (NYSDEC's 15 June 2021 letter) via email on 29 June 2021. The 29 June 2021 response included a revised soil sampling plan and figures for soil borings located to

the south of O'Gorman Street. The 29 June 2021 response was conditionally approved by NYSDEC in an email dated 1 July 2021, and the data collected on the same day. A copy of the revised sampling plan and figures submitted on 29 June 2021 are included in **Attachment A** of this work plan for completeness.

NAF West Area Description

Figure 1 illustrates the area of off-Site residential properties located on O'Gorman Street and Main Street South in NAF West and adjoining the west side of the on-Site NAF. Soil investigation was performed within the NAF in August-September 2019, July 2020, January 2021 and July 2021 at locations illustrated on **Figures 2A-2E**. Sampling was completed on residential properties located at 116 and 118 O'Gorman Street in NAF West in July and September 2020 at locations illustrated on **Figures 2A-2C**. Exceedances of SCOs found in these investigations require further delineation as described in this Work Plan.

Historical aerial photos indicate that NAF West was outside and west of the Site and the footprint of historical site buildings and industrial land use, and that land use within NAF West was historically residential. **Attachment B** contains figures showing 1955 and 1968 aerial photos of the NAF and NAF West, the location of historical site buildings and AOCs. While no historical buildings were located adjacent to the Site property boundary, several dry well fields (AOC 3A) and one area of metals in shallow soil (AOC 10A, near boring B42) were identified on the NAF relatively near the Site property boundary. Current land use is for athletic fields (on-site) and residential (off-site).

Based on the RI investigation activities completed within the NAF, the uppermost stratigraphic unit is comprised of reworked native soils and fill material at depths between approximately zero (0) to six (6) feet bgs (thickness varies). The fill component is composed primarily of medium- to- fine sand with silt and medium- to fine gravel, and, in places, includes some red brick, concrete fragments, and wood debris. Concentrations of COPCs exceeding SCOs have been reported in the upper two feet bgs along the property line, and further delineation of these compounds is the focus of this work plan.

The fill material is underlain by native clayey and silty clay soils to the uppermost water bearing zone, which consists of gray-brown fine sand and sub-rounded- to- rounded, coarse- to- fine gravel. The water table was encountered between approximately 16 and 17 feet bgs in soil borings located along the western NAF boundary.

Investigation Plan

Detailed maps of proposed soil sampling locations are provided by depth interval on **Figures 2A – 2E**. These maps illustrate locations of SCO exceedances for the given depth interval. **Table 1** provides a sampling and analysis plan for soil, including a description of the rationale for the respective soil sampling locations. A proposed schedule for implementation of Work Plan tasks and deliverables is provided in **Table 2**. This schedule includes site access, field work, laboratory analysis and data reporting.

Provided in **Attachment C** are **Tables 1A-2E** showing historical soil analytical data for samples collected in the NAF West and at locations adjacent to the NAF property boundary compared with residential SCOs. Also provided are **Tables 3A-4E** showing historical soil analytical data for samples collected across the NAF with a comparison to restricted residential SCOs. These tables and **Figures 2A through 2E** present data from soil sampling completed along the NAF western property boundary through July 2021. The January and July 2021 sampling events provide the data for samples collected along the NAF property

fence line in common with the O'Gorman Street properties and highlight where COPCs are above SCOs in soil. As such, these data were used to evaluate where additional nature and extent evaluation is required in the NAF West Off-Site Area. Laboratory analytical reports from the January and July 2021 soil investigation activities are provided in **Attachment D**.

As shown by the data, surface and shallow subsurface soil in the NAF West has been reported to contain concentrations of SVOCs, PCBs, Metals, and/or DRO at the property fence line. These COPC concentrations require delineation on off-site properties located on 116, 118 and 120 O'Gorman Street and 721 and 727 South Main Street. SVOCs were also reported in shallow subsurface soil at two off-site locations between the NAF property line and the driveway of 116 O'Gorman Street. Additional soil investigation is proposed to further delineate the nature and extent of these COPCs on 116 O'Gorman Street as described below.

PROPOSED SCOPE OF WORK

The proposed soil sampling locations are depicted for soil intervals 0-0.17 feet bgs through 4-6 feet bgs on **Figures 2A to 2E**. The sampling plan includes one soil on-site boring location within the NAF (B3496A) near the property boundary and sixteen (16) off-site soil boring locations in NAF West. Soil samples are planned to further define the nature and extent of COPCs in soil horizontally and vertically in areas where previous testing indicated COPCs above residential SCOs.

The proposed soil investigation is described by sampling location in **Table 1,** which describes the analytical plan for each sample (i.e., analytes for each sample, by sample depth) and provides the rationale for the soil sample location (i.e., the SCO exceedances requiring further nature and extent characterization). Additional soil sampling will be conducted to delineate nature and extent based on results of the proposed sampling (i.e., step-out/step-down sampling), if necessary.

Sampling and analysis methodology will follow the September 2018 Quality Assurance Project Plan/Field Sampling Plan (QAPP/FSP) for the Site. Soil samples will be collected using direct-push technology (DPT) or a hand auger where necessary. Non-dedicated field equipment will be decontaminated between sample locations by washing it with an Alconox™/distilled water solution followed by rinsing with distilled water.

Soil samples will be screened in the field for VOCs using a photoionization detector (PID), and for visual and/or olfactory evidence of impact. If PID readings greater than 10 parts per million (ppm) above background are detected in headspace readings or if visual and/or olfactory evidence of an impact are observed in a soil sample, analysis of VOCs and SVOCs will be performed in addition to the analyses indicated in **Table 1**. A subset (25 percent) of the delineation soil samples will be analyzed for a full suite of analytes: PCBs, metals, VOCs, SVOCs and emerging contaminants (1,4-dioxane and per- and poly-fluoro alkyl substances [PFAS]).

The nature and extent of COPCs will be delineated by comparison to residential SCOs defined under 6 NYCRR Part 375. As per NYSDEC request, the nature and extent of DRO reported in soil above 1,000 mg/kg will be delineated (DRO does not have a published SCO).

Following field data collection, soil boring logs, including field observations (visual and olfactory indications of COPCs) and PID screening results will be compiled for each soil boring location.

QUALITY ASSURANCE

Sample handling, including sample custody and sample control, will be conducted in accordance with the QAPP/FSP. Quality control samples, including field duplicates, matrix spike/matrix spike duplicates, and equipment blanks, will be collected and analyzed at the frequency specified in the QAPP/FSP.

HEALTH AND SAFETY

A Site-specific Health and Safety Plan (HASP) was presented in the September 2018 RI Work Plan. During soil sampling activities, air monitoring will be performed in accordance with the Community Air Monitoring Plan (CAMP) provided within the RI Work Plan. To protect against risks associated with the COVID-19 virus, field activities will be performed under a Project COVID-19 Response Plan (Geosyntec, April 2020, updated on 28 May 2020), which was approved in a letter from NYSDEC dated 21 April 2020.

As per NYSDEC's comment 8 in its 15 June 2021 letter, Special Requirements CAMP will be employed for ground intrusive activities within 20 feet of an occupied structure or receptor. Based on the proposed soil boring locations, dust monitoring will be required on 116 O'Gorman Street. The remaining soil investigation locations will occur at a distance greater than 20 feet from an occupied structure. The dust monitors will be deployed between the soil boring locations and the house on the 116 O'Gorman property, with a bias toward exposure pathways (e.g., windows, HVAC air intakes). Background dust conditions will be recorded using background instrumentation deployed for the IRM#5 limit of disturbance (LOD) that is upwind of the proposed NAF West investigation areas. The proposed dust monitoring locations are shown on **Figures 2A-2E**.

Dust barriers will be placed between the soil boring locations at the nearest occupied structure (irrespective of distance to the structure) during intrusive activities. Investigation derived wastes and/or soils generated from the borings from outside the IRM#5 LOD will be appropriately managed, containerized or transferred to the materials storage area (MSA) upon completion of the boring. Appropriate tarps/poly sheeting will be used to prevent potentially impacted soil from contacting the surrounding surface soil in the investigation area. Ground cover (grass, mulch, asphalt) will be restored as best as possible to pre-investigation conditions before moving to the next boring location.

IDM MANAGEMENT

Solid investigation-derived material (IDM) that will be generated may include disposable personal protection equipment (PPE) and soil cuttings. Liquid IDM generated in the course of the investigation will consist of water and detergent used for decontamination of field equipment. Soil and liquid IDM will be staged with materials scheduled for off-site disposal as part of the IRM activities occurring concurrently with the planned investigation. Solid IDM (e.g., soil cuttings, geoprobe liners) will be placed with IRM soil stockpiled for off-site disposal. Decontamination of field equipment will be performed at a decontamination pad constructed for IRM activities. The liquid IDM from the soil investigation will be managed along with IDM from the IRM.

Laboratory analytical data for the samples will be used to characterize the soil and liquid IDM. For waste disposal purposes, soils with a total PCB concentration of fifty (50) milligrams per kilogram (mg/kg) or

greater will be handled as PCB remediation waste as defined in 40 CFR §761.3 (TSCA) and as hazardous waste containing PCBs as defined in 6 NYCRR Part 371.4 (e). This soil will be shipped for off-Site disposal at an appropriate treatment, storage and/or disposal facility. Each shipment will have the required manifest, labeling and placarding in accordance with federal and state laws and regulations. Soils with a total PCB concentration less than fifty (50) mg/kg will be managed as nonhazardous waste and transported off-Site for disposal at an appropriate disposal facility.

SCHEDULE AND DELIVERABLES

Unisys plans to implement the activities described in this plan in accordance with the schedule provided in **Table 2**. Deliverables include soil analytical laboratory reports, tables and maps of the extent of COPCs in soil.

CLOSING

Geosyntec appreciates the opportunity to submit this work plan to the NYSDEC, NYSDOH and ECSD. If you have any questions, please contact Mr. Kevin Krueger of Unisys at (651) 212-7273.

TABLES

TABLE 1
Soil Sampling and Analysis Plan
Former Sperry Remington - North Portion NAF West
Elmira, Chemung County, New York

Primary Sample Locations	Rationale	Shallow 1 0 to 0.17 ft bgs	Shallow 2 0.17 to 1 ft bgs	Shallow 3 1 to 2 ft bgs	Sub 1 2 to 4 ft bgs	Sub 2 4 to 6 ft bgs
Off-Site Area NAF West						
	The rationale for the following borings is to evaluate the nature and extent of an area of COPC-impacted soil identified during grid-based sampling of the NAF.					
SSHS-B3496A	This on-Site sample location is to be sampled at 4-6 ft bgs to vertically delineate metals at B3496.					M
SSHS-B3482A	This off-Site location is to be sampled at 2 to 4 ft bgs to vertically delineate SVOCs reported in surface and shallow subsurface soil.				S	Hold (S)
SSHS-B3483A	This off-Site location is to be sampled at 2 to 4 ft bgs to vertically delineate SVOCs reported in surface and shallow subsurface soil.				S	Hold (S)
SSHS-B3543	This off-Site location is to delineate an area of SVOC-impacted soil identified in B3482 to the west.	P,S,V,M,EC	P,S,V,M,EC	P,S,V,M,EC	P,S,V,M,EC	Hold (P,S,V,M,EC)
SSHS-B3544	This off-Site location is to delineate an area of SVOC-impacted soil identified in B3483 to the west.	S	S	S	S	Hold (S)
SSHS-B3545	This off-Site location is to delineate an area of SVOC-impacted soil identified in B3481 to the southwest.	S	S	S	S	Hold (S)
SSHS-B3546	This off-Site location is to delineate an area of DRO and SVOC-impacted soil identified in B3498 and B3499 to the south.	S	S, T	S, T	S, T	Hold (S,T)
SSHS-B3547	This off-Site location is to delineate an area of DRO and SVOC-impacted soil identified in B3497, B3498 and B3499 to the west.	P,S,V,M,EC,T	P,S,V,M,EC,T	P,S,V,M,EC,T	P,S,V,M,EC,T	Hold (P, S, V, M, T, EC)
SSHS-B3548	This off-Site location is to to delineate an area of metals, DRO and SVOC-impacted soil identified in B3224 and B3496 to the west.	P,S,V,M,EC,T	P,S,V,M,EC,T	P,S,V,M,EC,T	P,S,V,M,EC,T	Hold (P, S, V, M, T, EC)
SSHS-B4028	This off-Site location is to delineate an area of SVOC-impacted soil identified in B3497 to the north.	S	S	S	S	Hold (S)
SSHS-B4029	This off-Site location is to delineate an area of SVOC-impacted soil identified in B3499 to the south.	S	S	S	S	Hold (S)
SSHS-B4030	This off-Site location is to delineate an area of VOC, SVOC, metals, PCBs, and emerging CPOC-impacted soil identified in B3481 to the northwest.	P,S,V,M,EC	P,S,V,M,EC	P,S,V,M,EC	P,S,V,M,EC	Hold (P,S,V,M,EC)
SSHS-B4031	This off-Site location is to delineate an area of VOC, SVOC, metals, PCBs, and emerging CPOC-impacted soil identified in B3481 to the northeast.	P,S,V,M,EC	P,S,V,M,EC	P,S,V,M,EC	P,S,V,M,EC	Hold (P,S,V,M,EC)
SSHS-B4032	This off-Site location is to delineate an area of SVOC-impacted soil identified in B3261 to the northwest.	S	S	S	S	Hold (S)
SSHS-B4033	This off-Site location is to delineate an area of VOC, SVOC, metals, PCBs, and emerging CPOC-impacted soil identified in B3261 to the southeast.	P,S,V,M,EC	P,S,V,M,EC	P,S,V,M,EC	P,S,V,M,EC	Hold (P,S,V,M,EC)

Notes:

Interval previously sampled

ft bgs - feet below ground surface, defined as base of vegetation (turf areas) and base of sub-base fill (non-turf areas)

M - Metals by SW-846 6010/7471

V - VOC analysis by SW-846 8260

EC - Emerging contaminants (PFAS analysis by EPA Method 537.1 and 1,4-Dioxane by SW-846 8270)

Collection of VOC and SVOC samples will be based on field indications: PID reading > 10 ppm, olfactory evidence, or staining.

P - PCB analysis by SW-846 8082

S - SVOC analysis by SW-846 8270

T - TPH-DRO analysis by SW-846 8015

Hold - Sample will be held for lab analysis pending shallower sample results

TABLE 2 - SCHEDULE
SOIL INVESTIGATION ACTIVITIES
Former Sperry Remington – North Portion NAF West #c808022
Elmira, New York

Task Name	Duration	Start	Finish	Notes
Work Plan approval (NAF West)	*0 days*	*8/6/2021*	*8/20/2021*	Submittal 8/6/21
Soil Sampling and Laboratory Analysis				
Off-Site (NAF West) access to six residential properties	4 wks	8/20/2021	9/17/2021	Based on existing DEC-approved letter; in person contact as needed
Procurement, markout, utility clearance, drilling equipment mobilization	2 wks	9/17/2021	10/2/2021	Markout & field mobilization
Off-Site (NAF West) soil sampling[1] (one on-site boring and fourteen off-site borings)	3 days	10/2/2021	10/4/2021	Pending access, coincide with other soil sampling
Off-Site (NAF West) soil sample laboratory analysis	2 wks	10/5/2021	10/19/2021	Anticipates 10 day turnaround time
Data Analysis and Reporting				
Soil COPC maps - NAF West	3 wks	10/19/2021	11/9/2021	Updated maps, 2 weeks to prepare, 1 week client review
Data validation - NAF West (soil)	4 wks	10/19/2021	11/16/2021	Data usability report
Draft resident letters to NYSDEC (with validated off-site [NAF West] soil data)	2 weeks	11/16/2021	11/30/2021	With map and table of off-site results

Hi Ron,

Hope you are having a pleasant day. The submitted request to complete borings located within the NAF, as detailed as response to comment numbers IV.6 (g through i), IV.7 and IV.8 within the NYSDEC comment letter dated June 15, 2021 **has been reviewed and Approved as Modified:**

IV. NAF West Proposed Soil Investigation Sampling

Comment No. IV.6

g. Collect a sample south of B3483 on the south side of O'Gorman Street at 0-0.17 ft, 0.17-1 ft, 1-2 ft, 2-4 ft, and 4-6 ft (contingent) for SVOCs, VOCs.
   - Sample B4019 is approved for the proposed location and sample intervals
   - Table 1 requires modification to indicate that Sample B4019 shall be analyzed for SVOCs and VOCs

h. Collect a sample along the northeast corner of 119 O'Gorman Street property line to delineate the 0-6 ft interval (0-2ft, 2-4 ft, and 4-6 ft) and provide additional data in this area to inform off-site area CPOC concentrations/exceedances prior to IRM excavations within the adjacent NAF area. Note that the 4-6 ft interval would be required for this location.
   - Sample B4018 is approved for the proposed location, sampling intervals, and Full Suite analysis.
   - Table 1 requires modification to indicate that the 4-6 feet sample will be submitted for proposed analysis, this interval must not be submitted as "HOLD" status.

i. Collect a sample along the southeast 119 O'Gorman Street property line at 0-0.17 ft, 0.17-1 ft, 1-2 ft, 2-4 ft, and 4-6 ft (contingent) for SVOCs and metals to delineate B3643/ B3073/A.
   - Sample B4017 is approved for the proposed location and sample intervals
   - Table 1 requires modification to indicate that Sample B4017 shall be analyzed for SVOCs and Metals

Comment No. IV.7

Additional characterization was requested to evaluate the potential for exposures in the 0-0.17 ft interval on the south side of 119 and 120 O' Gorman Street. This characterization is required to evaluate the exposure pathways and potential for impacts in the off-site area. Provide additional full suite sampling of the 0-2" interval.

- Samples B4020 through B4024 are approved for the proposed locations, sampling intervals and Full Suite analysis

Comment No. IV.8

Health and Safety: Provide a summary of the required Special Requirements CAMP for all ground intrusive activities within 20 feet of an occupied structure or receptor. A figure with the proposed particulate monitor locations should be provided to the NYSDOH and NYSDEC prior to implementation of this investigation.

- Although it has been noted that none of the proposed soil sampling locations will be located within 20 feet of an occupied structure, IRM #5 CAMP monitoring must be operational during this ground intrusive work.
- A figure depicting appropriate dust monitoring locations in accordance with the CAMP is generated and implemented for the soil borings outside of the current IRM#5 LOD. The CAMP figure must be provided and approved by the Agencies prior to the commencement of work.
- The CAMP location(s) should be biased towards any exposure pathways (i.e residential buildings, open windows, air intakes).
- Investigation derived wastes / soils generated from the borings from outside the IRM#5 LOD are appropriately managed, containerized or transferred to the MSA upon completion of the boring. Appropriate tarps/poly should be used to prevent impacted soil or groundwater from impacting surface soils in the delineation areas.
- If any bare soils resulting from activities outside of the IRM#5 LOD will require actions to restore cover before moving to the next boring location (i.e grass/mulch).

Additionally, adjacent property owners will be notified in advance of this work.

Best,

Tim

Timothy A. Schneider P.E.

Notes:

EQL - Estimated Quantitation Limit

PCBs - Polychlorinated Biphenyls

mg/kg - milligrams per kilogram

U - non detect at the value indicated

J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

p - The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported

Analyte concentrations detected above Residential Soil Cleanup Objectives are presented in light grey.

Analyte concentrations detected above New York State Hazardous Waste Criteria are presented in dark grey.

Notes:

EQL - Estimated Quantitation Limit

mg/kg - milligrams per kilogram

F1 - MS and/or MSD Recovery is outside acceptance limits.

N - The identification is based on presumptive evidence.

J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

J- - The analyte was positively identified; however, the associated numerical value is likely to be lower than the concentration of the analyte in the sample due to negative bias of associated QC or calibration data or attributable to matrix interference

U - non detect at the value indicated

+ - LCS and/or LCSD is outside acceptance limits, high biased

Analyte concentrations detected above Residential Soil Cleanup Objectives are presented in light gray.

Table 1C
Soil SVOCs and TPH, Surface and Shallow Subsurface Soil, NAF-West

Former Sperry Remington - North Portion
Elmira, New York

Notes:

EQL - Estimated Quantitation Limit

VOCs - Volatile Organic Compounds

mg/kg - milligrams per kilogram

J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value

U - non detect at the value indicated

Analyte concentrations detected above Residential Soil Cleanup Objectives are presented in light gray.

Table 1D
Soil VOCs, Surface and Shallow Subsurface Soil, NAF-West

Former Sperry Remington - North Portion
Elmira, New York

				VOCs																		
				1,2,3-trichlorobenzene	1,2,4-trichlorobenzene	1,2-dichlorobenzene	1,3-dichlorobenzene	Chlorobenzene	1,2-dibromoethane	Bromomethane	Dichlorodifluoromethane	Trichlorofluoromethane	Isopropylbenzene	Styrene	2-hexanone (MBK)	4-Methyl-2-pentanone	Acetone	Carbon disulfide	Cyclohexane	Methyl Ethyl Ketone	Methyl-tert-butyl ether	1,4-dichlorobenzene
				mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg

Notes:
EQL - Estimated Quantitation Limit
VOCs - Volatile Organic Compounds
mg/kg - milligrams per kilogram
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value
U - non detect at the value indicated
Analyte concentrations detected above Residential Soil Cleanup Objectives are presented in light gray.

Notes:

EQL - Estimated Quantitation Limit

PFAS - Per- and polyfluoroalkyl substances

µg/kg - micrograms per kilogram

J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

U - non detect at the value indicated

J+ - The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or calibration data or attributable to matrix interference.

I - Value is EMPC (estimated maximum possible concentration)

Analyte concentrations detected above Residential Guidance Values are presented in light gray.

Notes:

EQL - Estimated Quantitation Limit

PCBs - Polychlorinated Biphenyls

mg/kg - milligrams per kilogram

J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

U - non detect at the value indicated

Analyte concentrations detected above Residential Soil Cleanup Objectives are presented in light gray.

Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in dark gray.

Analyte concentrations detected above New York State Hazardous Waste Criteria are presented in black.

Table 2B
Soil Metals, Subsurface Soil, NAF-West

Former Sperry Remington - North Portion
Elmira, New York

Notes:

EQL - Estimated Quantitation Limit

mg/kg - milligrams per kilogram

J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

U - non detect at the value indicated

J+ - The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or calibration data or attributable to matrix interference.

J- - The analyte was positively identified; however, the associated numerical value is likely to be lower than the concentration of the analyte in the sample due to negative bias of associated QC or calibration data or attributable to matrix interference

Analyte concentrations detected above Protection of Groundwater Objectives are presented in light gray.

Analyte concentrations detected above Residential Soil Cleanup Objectives are presented in dark gray.

Table 2C
Soil SVOCs and TPH, Subsurface Soil, NAF-West

Former Sperry Remington - North Portion
Elmira, New York

Notes:
EQL - Estimated Quantitation Limit
SVOCs - Semivolatile Organic Compounds
mg/kg - milligrams per kilogram
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light gray.
Analyte concentrations detected above Residential Soil Cleanup Objectives (or Nuisance Screening Criteria for diesel range and oil range organics) are presented in dark gray.

Table 2C
Soil SVOCs and TPH, Subsurface Soil, NAF-West

Former Sperry Remington - North Portion
Elmira, New York

Notes:
EQL - Estimated Quantitation Limit
SVOCs - Semivolatile Organic Compounds
mg/kg - milligrams per kilogram
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light gray.
Analyte concentrations detected above Residential Soil Cleanup Objectives (or Nuisance Screening Criteria for diesel range and oil range organics) are presented in dark gray.

Table 2D
Soil VOCs, Subsurface, NAF-West

Former Sperry Remington - North Portion
Elmira, New York

				VOCs																														
				N-Nitrosodimethylamine	Benzene	Ethylbenzene	Toluene	Xylene (m & p)	Xylene (m)	Xylene (o)	Xylene Total	1,1,1-trichloroethane	1,1,2,2-tetrachloroethane	1,1,2-trichloroethane	1,1-dichloroethane	1,1-dichloroethene	1,2-dibromo-3-chloropropane	1,2-dichloroethane	1,2-Dichloroethene	1,2-dichloropropane	Bromochloromethane	Bromodichloromethane	Bromoform	Carbon tetrachloride	Chlorodibromomethane	Chloroethane	Chloroform	Chloromethane	cis-1,2-dichloroethene	cis-1,3-dichloropropene	Dichloromethane	Tetrachloroethene	trans-1,2-dichloroethene	trans-1,3-dichloropropene	Trichloroethene

Notes:
EQL - Estimated Quantitation Limit
VOCs - Volotile Organic Compounds
mg/kg - milligrams per kilogram
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value
U - non detect at the value indicated
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light gray.
Analyte concentrations detected above Residential Soil Cleanup Objectives are presented in dark gray.

Table 2D
Soil VOCs, Subsurface, NAF-West

Former Sperry Remington - North Portion
Elmira, New York

				VOCs																		
				Vinyl chloride	1,2,3-trichlorobenzene	1,2,4-trichlorobenzene	1,2-dichlorobenzene	1,3-dichlorobenzene	Chlorobenzene	1,2-dibromoethane	Bromomethane	Dichlorodifluoromethane	Trichlorofluoromethane	Isopropylbenzene	Styrene	2-hexanone (MBK)	4-Methyl-2-pentanone	Acetone	Carbon disulfide	Cyclohexane	Methyl Ethyl Ketone	Methyl-tert-butyl ether	1,4-dichlorobenzene
				mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg

Notes:
EQL - Estimated Quantitation Limit
VOCs - Volotile Organic Compounds
mg/kg - milligrams per kilogram
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value
U - non detect at the value indicated
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light gray.
Analyte concentrations detected above Residential Soil Cleanup Objectives are presented in dark gray.

Notes:
EQL - Estimated Quantitation Limit
PFAS - Per- and polyfluoroalkyl substances
mg/kg - milligrams per kilogram
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated
J+ - The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or calibration data or attributable to matrix interference.
I - Value is EMPC (estimated maximum possible concentration)
Analyte concentrations detected above Protection of Groundwater Guidance Values are presented in light gray.
Analyte concentrations detected above Residential Guidance Values are presented in dark gray.

Notes:
EQL - Estimated Quantitation Limit
PCBs - Polychlorinated Biphenyls
mg/kg - milligrams per kilogram
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in light grey
Analyte concentrations detected above New York State Hazardous Waste Criteria are presented in dark grey

Notes:
EQL - Estimated Quantitation Limit
mg/kg - milligrams per kilogram
B - Compound detected in method blank
F1 - MS and/or MSD Recovery is outside acceptance limits.
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
J- - The analyte was positively identified; however, the associated numerical value is likely to be lower than the concentration of the analyte in the sample due to negative bias of associated QC or calibration data or attributable to matrix interference
J+ - The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or calibration data or attributable to matrix interference.
N - The identification is based on presumptive evidence.
U - non detect at the value indicated
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in light grey

Notes:
EQL - Estimated Quantitation Limit
SVOCs - Semivolatile Organic Compounds
mg/kg - milligrams per kilogram
* - ISTD response or retention time outside acceptable limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
J- - The analyte was positively identified; however, the associated numerical value is likely to be lower than the concentration of the analyte in the sample due to negative bias of associated QC or calibration data or attributable to matrix interference
U - non detect at the value indicated
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives (or Nusiance Criteria for diesel range and oil range organics) are presented in light grey

Table 3C
Soil SVOCs and TPH, Surface and Shallow Subsurface Soil, NAF

Former Sperry Remington - North Portion
Elmira, New York

Notes:
EQL - Estimated Quantitation Limit
SVOCs - Semivolatile Organic Compounds
mg/kg - milligrams per kilogram
* - ISTD response or retention time outside acceptable limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
J- - The analyte was positively identified; however, the associated numerical value is likely to be lower than the concentration of the analyte in the sample due to negative bias of associated QC or calibration data or attributable to matrix interference
U - non detect at the value indicated
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives (or Nusiance Criteria for diesel range and oil range organics) are presented in light grey

Notes:
EQL - Estimated Quantitation Limit
VOCs - Volatile Organic Compounds
mg/kg - milligrams per kilogram
* - ISTD response or retention time outside acceptable limits
*+ - LCS and/or LCSD is outside acceptance limits, high biased
*1 - LCS/LCSD RPD exceeds control limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated

Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in light grey

Table 3D
Soil VOCs, Surface and Shallow Subsurface Soil, NAF

Former Sperry Remington - North Portion
Elmira, New York

Notes:
EQL - Estimated Quantitation Limit
VOCs - Volatile Organic Compounds
mg/kg - milligrams per kilogram
* - ISTD response or retention time outside acceptable limits
*+ - LCS and/or LCSD is outside acceptance limits, high biased
*1 - LCS/LCSD RPD exceeds control limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated

Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in light grey

Notes:

EQL - Estimated Quantitation Limit

PFAS - Per- and Polyfluoroalkyl Substances

µg/kg - micrograms per kilogram

B - Compound detected in method blank

F1 - MS and/or MSD Recovery is outside acceptance limits.

I - Value is EMPC (estimated maximum possible concentration)

J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

J+ - The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or calibration data or attributable to matrix interference.

U - non detect at the value indicated

Analyte concentrations detected above Residential Guidance Values are presented in light grey

Notes:
EQL - Estimated Quantitation Limit
PCBs - Polychlorinated Biphenyls
mg/kg - milligrams per kilogram
*3 - ISTD response or retention time oustide acceptable limits
F1 - MS and/or MSD Recovery is outside acceptance limits.
F2 - MS/MSD RPD exceeds control limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated
UJ The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.

Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in light grey

Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in dark grey

Analyte concentrations detected above New York State Hazardous Waste Criteria are presented in black

Table 4B
Soil Metals, Subsurface Soil, NAF

Former Sperry Remington - North Portion
Elmira, New York

Notes:
EQL - Estimated Quantitation Limit
mg/kg - milligrams per kilogram
^+ - Continuing Calibration Verification (CCV) is outside acceptance limits, high biased
B - Compound detected in method blank
F1 - MS and/or MSD Recovery is outside acceptance limits.
F2 - MS/MSD RPD exceeds control limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
J- - The analyte was positively identified; however, the associated numerical value is likely to be lower than the concentration of the analyte in the sample due to negative bias of associated QC or calibration data or attributable to matrix interference
J+ - The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or calibration data or attributable to matrix interference.
U - non detect at the value indicated
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light grey
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in dark grey

Notes:
EQL - Estimated Quantitation Limit
SVOCs - Semivolatile Organic Compounds
mg/kg - milligrams per kilogram
*+ - LCS and/or LCSD is outside acceptance limits, high biased
F1 - MS and/or MSD Recovery is outside acceptance limits.
F2 - MS/MSD RPD exceeds control limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
J+ - The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or calibration data or attributable to matrix interference.
U - non detect at the value indicated
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light grey
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives (or Nuisance Screening Criteria for diesel range and oil range organics) are presented in dark grey

Notes:
EQL - Estimated Quantitation Limit
VOCs - Volatile Organic Compounds
mg/kg - milligrams per kilogram
* - ISTD response or retention time outside acceptable limits
*- - LCS and/or LCSD is outside acceptance limits, low biased
*+ - LCS and/or LCSD is outside acceptance limits, high biased
*1 - LCS/LCSD RPD exceeds control limits
*3 - ISTD response or retention time oustide acceptable limits
E - Exceeds instrument calibration range.
F2 - MS/MSD RPD exceeds control limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated
H - Sample was received and analyzed past holding time.
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light grey
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in dark grey

Table 4D
Soil VOCs, Subsurface Soil, NAF

Former Sperry Remington - North Portion
Elmira, New York

				VOCs																				
				Chloroethane	Chloroform	Chloromethane	cis-1,2-dichloroethene	cis-1,3-dichloropropene	Dichloromethane	Tetrachloroethene	trans-1,2-dichloroethene	trans-1,3-dichloropropene	Trichloroethene	Vinyl chloride	1,2,3-trichlorobenzene	1,2,4-trichlorobenzene	1,2-dichlorobenzene	1,3-dichlorobenzene	Chlorobenzene	1,2-dibromoethane	Bromomethane	Dichlorodifluoromethane	Trichlorofluoromethane	Isopropylbenzene	Styrene
				mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg

Notes:
EQL - Estimated Quantitation Limit
VOCs - Volatile Organic Compounds
mg/kg - milligrams per kilogram
* - ISTD response or retention time outside acceptable limits
*- - LCS and/or LCSD is outside acceptance limits, low biased
*+ - LCS and/or LCSD is outside acceptance limits, high biased
*1 - LCS/LCSD RPD exceeds control limits
*3 - ISTD response or retention time oustide acceptable limits
E - Exceeds instrument calibration range.
F2 - MS/MSD RPD exceeds control limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated
H - Sample was received and analyzed past holding time.
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light grey
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in dark grey

Table 4D
Soil VOCs, Subsurface Soil, NAF

Former Sperry Remington - North Portion
Elmira, New York

				VOCs							
				2-hexanone (MBK)	4-Methyl-2-pentanone	Acetone	Carbon disulfide	Cyclohexane	Methyl Ethyl Ketone	Methyl-tert-butyl ether	1,4-dichlorobenzene
				mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg	mg/kg

Notes:
EQL - Estimated Quantitation Limit
VOCs - Volatile Organic Compounds
mg/kg - milligrams per kilogram
* - ISTD response or retention time outside acceptable limits
*- - LCS and/or LCSD is outside acceptance limits, low biased
*+ - LCS and/or LCSD is outside acceptance limits, high biased
*1 - LCS/LCSD RPD exceeds control limits
*3 - ISTD response or retention time oustide acceptable limits
E - Exceeds instrument calibration range.
F2 - MS/MSD RPD exceeds control limits
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U - non detect at the value indicated
H - Sample was received and analyzed past holding time.
Analyte concentrations detected above Protection of Groundwater Soil Cleanup Objectives are presented in light grey
Analyte concentrations detected above Restricted Residential Soil Cleanup Objectives are presented in dark grey

Table 4E
Soil PFAS, Subsurface Soil, NAF

Former Sperry Remington - North Portion
Elmira, New York

Notes:
EQL - Estimated Quantitation Limit
PFAS - Per- and Polyfluoroalkyl Substances
µg/kg - micrograms per kilogram
F1 - MS and/or MSD Recovery is outside acceptance limits.
I - Value is EMPC (estimated maximum possible concentration)
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
J+ - The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or calibration data or attributable to matrix interference.
U - non detect at the value indicated
UJ The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
Analyte concentrations detected above Protection of Groundwater Guidance Values are presented in light gray.
Analyte concentrations detected above Residential Guidance Values are presented in dark gray.

Narrative

Job Narrative
180-115927-1

Receipt
The samples were received on 1/14/2021 8:45 AM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 4 coolers at receipt time were 2.4º C, 3.6º C, 4.2º C and 4.4º C.

GC/MS Semi VOA
Method 8270D: The following sample was diluted due to the nature of the sample matrix (sample extract was too viscous to be analyzed at any less of a dilution): SSHS-B3508-SUB-0.17-2 (180-115927-11). Elevated reporting limits (RLs) are provided.

Method 8270D: The matrix spike/matrix spike duplicate (MS/MSD) of sample SSHS-B3509-SUB-0.17-2 (180-115927-9) had several recoveries below the control limits. The RPDs between the spikes and the recoveries of the laboratory control sample (LCS) were within the control limits.

Method 8270D: The continuing calibration verification (CCV) analyzed in batch 180-343858 was above criteria for the following analytes: 4-Nitrophenol, 2,3,4,6-Tetrachlorophenol, Caprolactam, N-Nitrosodi-n-propylamine, and Pentachlorophenol. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
Method 6010C: The continuing calibration verification (CCV) associated with batch 180-344289 (CCV 180-344289/76) recovered above the control limit for selenium. As the samples (Method Blank and Laboratory control Sample) associated with this CCV did not have selenium detected (MB) and the LCS recovery was within the control limits, the results were reported.

Method 6010C: The low level continuing calibration verification (CCVL) associated with batch 180-344289 recovered above the control limit for antimony. As the samples associated with this CCV had selenium detected below the reporting limit, the results were reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Definitions/Glossary

Client: Geosyntec Consultants, Inc. Job ID: 180-115927-1
Project/Site: Former Sperry Remington-IRM6 PDI

Qualifiers

GC/MS Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
^+	Continuing Calibration Verification (CCV) is outside acceptance limits, high biased.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: Geosyntec Consultants, Inc. Job ID: 180-115927-1
Project/Site: Former Sperry Remington-IRM6 PDI

Laboratory: Eurofins TestAmerica, Pittsburgh

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New York	NELAP	11182	04-01-21

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
2540G		Solid	Percent Moisture
2540G		Solid	Percent Solids
