March 2009 Progress Report
Index # B8-0735-07-01
Site #C828142

Dear Mr. Caffoe:

Pursuant to the Brownfield Site Cleanup Agreement for the 666 Driving Park Site, this progress report has been prepared to summarize project activities performed during February 2009. Activities completed for the Remedial Investigation (RI) included submittal of the Draft RI report to the Agencies on February 20th.

As indicated in the Draft RI Report, the second round of groundwater sampling will be completed by the end of May 2009. The sampling is scheduled for the week of May 4th. Per my January 30th correspondence, DuPont proposes a modified parameter list for the second round of groundwater sampling. Additional metals delineation soil sampling in Area 2 will also be completed during mobilization for the groundwater sampling.

Weekly site inspections began on June 2, 2008. Site inspections, as requested by NYSDEC, will be completed throughout and following the RI to assess the integrity of the site fence and make repairs as needed. Site inspection reports from inspections completed between June and November 2008 were provided with the Draft RI Report. The remaining inspection reports were not available at the time of this submittal but will be provided with the April progress report.

If you have any questions regarding this schedule please contact me at (716) 278-5496.

Regards,
DuPont Corporate Remediation Group

Paul Mazierski
Project Director
