May 2009 Progress Report
Index # B8-0735-07-01
Site #C828142

Dear Mr. Caffoe:

Pursuant to the Brownfield Site Cleanup Agreement for the 666 Driving Park Site in Rochester, New York, this progress report has been prepared to summarize project activities performed during May 2009. DuPont received agency comments on the draft Remedial Investigation Report dated April 22nd. Response to the comments was provided to the Agency on May 27th, 2009.

The second round of groundwater and additional metals delineation soil sampling was completed during the week of May 18th. Groundwater sample analysis was completed using the modified parameter list as described in the May 27th response to comments letter. Metals delineation sampling was completed in Area 2 and Area 7. Analytical results from this sampling event will be provided with the revised Remedial Investigation Report.

Weekly site inspections began on June 2, 2008. Site inspections, as requested by NYSDEC, will be completed throughout and following the RI to assess the integrity of the site fence and make repairs as needed. The May 2009 Site Inspection report was not available prior to the due date for this monthly progress report. It will be provided with the June 2009 Progress Report.

If you have any questions regarding this schedule please contact me at (716) 278-5496.

Regards,
DuPont Corporate Remediation Group

Paul Mazierski
Project Director
