

(Fact Sheet Begins Next)

## Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

**You must sign up for the DER email listserv:**

[www.dec.ny.gov/chemical/61092.html](http://www.dec.ny.gov/chemical/61092.html)

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

### Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

**If “paperless” is not an option for you**, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

# FACT SHEET

## Brownfield Cleanup Program

Hawkeye Trade Center &  
Residences  
1405 Saint Paul Street  
Rochester, NY 14650

October 2018

**SITE No. C828203**  
**NYSDEC REGION 8**

### Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate the Hawkeye Trade Center and Residences site ("site") located at 1405 Saint Paul Street, Rochester, Monroe County. Please see the map for the site location. Documents related to the cleanup of this site can be found at the location(s) identified to the left under "Where to Find Information."

**Draft Investigation Work Plan:** The draft investigation work plan, called a "Remedial Investigation Work Plan," was submitted to NYSDEC under New York's Brownfield Cleanup Program. The investigation will be performed by WBS Capital Inc. ("applicant(s)") with oversight by NYSDEC and the New York State Department of Health (NYSDOH).

**How to Comment:** NYSDEC is accepting written comments about the draft investigation work plan for 30 days, from **October 3 through November 2**. The proposed plan is available for public review at the location(s) identified at left under "Where to Find Information." Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

**Highlights of the Proposed Site Investigation:** The investigation will define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected.

Previous investigations have detected volatile and semi-volatile organic compounds (VOCs and SVOCs) in groundwater at the site and VOCs in sub-slab and indoor air within the building.

Key components of the investigation work include:

- Installing and sampling soil borings to identify possible on-site sources of contamination; and,
- Installing and sampling ground water wells to monitor impacts from areas of concern.

In addition to the above items, an Interim Remedial Measure (IRM), which includes installing a sub-slab depressurization system (similar to a radon mitigation system), will be performed to prevent suspect air contaminants from entering into the building. An IRM is an action taken prior to completion of a remedial investigation or remedy selection to

ensure that a release or potential release does not threaten the health and safety of humans and/or the environment

**Next Steps:** NYSDEC will consider public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to the NYSDEC that summarizes the results. NYSDEC and NYSDOH will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a cleanup plan, called a "Remedial Work Plan" will be developed and a Decision Document will be proposed. The cleanup plan will include an evaluation of the proposed site remedy, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

**Site Description:** The site is 1.82-acres and is bordered on the east by Saint Paul St., on the south by Avenue E, and on the north and west by former Eastman Kodak Company buildings. It is currently unoccupied and developed with an 80,000 square foot building and paved areas. The site was historically used as a gasoline filling station, railway machine and repair shop, and an industrial facility to manufacture optical lenses and equipment.

**Brownfield Cleanup Program Overview:** New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations. For more information about the BCP, visit:

<http://www.dec.ny.gov/chemical/8450.html>

#### **Receive Site Fact Sheets by Email**

Have site information such as this fact sheet sent right to your email inbox. NYSDEC invites you to sign up with one or more contaminated sites county email listservs at:

[www.dec.ny.gov/chemical/61092.html](http://www.dec.ny.gov/chemical/61092.html)

It's quick, it's free, and it will help keep you better informed. As a listserv member, you will periodically receive site-related information/ announcements for all contaminated sites in the county(ies) you select.

Note: Please disregard if you already have signed up and received this fact sheet electronically.
