## Calculation of Semi Volatile Organic Compounds

Aqueous Concentration Formula:  $Amt * DF * 1000 * (1/V_o) * V_f$

Where:

DF = Dilution Factor

$V_o$  = Volume of Sample (mL)

$V_f$  = Extraction Lab Final Volume (mL)

Soil Concentration Formula:  $Amt * DF * 1000 * (1/W_t) * V_f * (100/TS)$

Where:

DF = Dilution Factor

$W_t$  = Weight of Sample (g)

$V_f$  = Extraction Lab Final Volume (mL)

TS = Total Solids

The Department has reviewed the request dated 12/26/2019 to import 600 tons of Crusher Run #2 and 500 tons of #1 & #2 Blend of fill material from The Dolomite Group Penfield Plant, 1150 Penfield Road, Rochester, N.Y. 14625. Based on the information provided, the request is hereby approved.

The proposed fill material meets the requirements for material other than soil (i.e., gravel, rock, stone, recycled concrete or recycled brick) as specified in section 5.4(e)5 of DER-10. Therefore, this material may be placed above the demarcation layer and will be a component of the site's final cover system.

Charlotte,

Please find a request to import application for CR2 to be used as parking lot subbase and 1&2 stone to be used as utility backfill. The material is to be obtained from Dolomite's Penfield facility. Gradation data is included in the application.

Thanks,  
Jen

The Department has reviewed the request dated 12/26/2019 to import 600 tons of Crusher Run #2 and 500 tons of #1 & #2 Blend of fill material from The Dolomite Group Penfield Plant, 1150 Penfield Road, Rochester, N.Y. 14625. Based on the information provided, the request is hereby approved.

The proposed fill material meets the requirements for material other than soil (i.e., gravel, rock, stone, recycled concrete or recycled brick) as specified in section 5.4(e)5 of DER-10. Therefore, this material may be placed above the demarcation layer and will be a component of the site's final cover system.

Charlotte,

Please find a request to import application for CR2 to be used as parking lot subbase and 1&2 stone to be used as utility backfill. The material is to be obtained from Dolomite's Penfield facility. Gradation data is included in the application.

Thanks,  
Jen

Hi Charlotte,

I just spoke with the contractor importing the recycled concrete from Dolomite. The Penfield Dolomite facility does not have any recycled concrete today but the Gates Dolomite facility does, so the contractor will be getting the recycled concrete from that facility. The Gates Dolomite facility registration number is 28W01.

Sorry for any confusion,  
Jen

Hi Charlotte,

One of the contractors at the Wollensack BCP Site would like to bring in some recycled concrete to use for erosion control. The material will be brought in from a NYSDEC registered C&D processing facility (see attached form). Please let me know if you need any additional information to approve this request.

Also, I left you a voicemail this afternoon to catch up on project status, ask some questions about backfilling the former AST vault, etc. Is there a time that works for you tomorrow to discuss? I will be at a conference for a few hours in the morning but should be available from 11am-6pm tomorrow to chat on the phone.

Thanks,  
Jen

Jen:

The Department has reviewed the request dated 12/11/2019 and submitted 12/18/2019 to import 400-500 cubic yards of fill material from Dolomite's Penfield Quarry - 746 Whalen Road, Penfield, New York . Based on the information provided, the request is hereby approved. The proposed fill material meets the requirements for material other than soil (i.e., gravel, rock, stone, recycled concrete or recycled brick) as specified in section 5.4(e)5 of DER-10. Therefore, this material may be placed as backfill material at the Site as part of the tank excavation activities. Please note that Crusher Run #2, Crusher Run #1, #1 Stone, #2 Stone, and #1 & #2 Blend meet the requirements as specified in DER-10 Section 5.4(e)5.

Best Regards,  
Charlotte

Hi Charlotte,

Please find attached the request to import application for the CR2 to be utilized as backfill for the tank pit at 872 Hudson Avenue. We are still planning to do the tank pull tomorrow. I apologize for the late notice in getting this request to you- we were waiting on the quarry for the gradation data. Fortunately, the material meets the DER-10 5.4 exemption.

Thanks,  
Jen
