EXECUTIVE SUMMARY

Brydges Engineering in Environment and Energy (BE3) completed a Phase I Environmental Site Assessment (ESA) for thirteen separate parcels including: 530-550, 600 Glenwood Avenue; 98, 102, and 104 Robin Street; 19, 20, 21, 22, and 30 kestrel Street; 294 and 295 Santee Street; and 55 Plover Street located in the City of Rochester, Monroe County, New York (refer to attached figures in **Appendix A** which shows the parcel locations). The Phase I was completed for Edgemere Development in support of due diligence property acquisition.

The properties are located about one mile west of the Genesee River. The elevation ranges from 540 to 520 feet above sea level sloping southeast. The general middle of the parcels is located at latitude 43º 10' 35.79" N; Longitude 77º 38' 42.15" W. The immediate area around the thirteen properties is mainly residential.

The Phase I Environmental Site Assessment was completed to E 1527-21 (ASTM Standard). This meets the Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) rule requirements. This Phase I ESA meets the EPA AAI rule requirements and the updated aspects of the newly revised 2021 ASTM ESA have been included in this Phase I ESA. The goal of the process established by the ASTM Standard is to identify, to the extent feasible pursuant to the ASTM process recognized environmental conditions relating to the property. The standard defines **Recognized Environmental Conditions (RECs)** as the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A **Historical Recognized Environmental Condition (HREC)** is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to controls. A **Controlled Recognized Environmental Condition (CREC)** is defined as a recognized environmental condition affecting the subject property that has been addresses to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls. The standard also identifies **De Minimis Conditions**, which generally do not present a threat to human health or the environment and would not be the subject of an enforcement action (i.e., not RECs or CRECs). The Non-Scope Considerations portion of the standard defines **Business Environmental Risks (BERs)** as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate.

In addition, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions - ASTM E 2600-10 - was also followed regarding Tier 1 vapor intrusion screening. Tier 1 is an initial screening which primarily includes a database review within certain search radii of the subject property to identify sites where the conditions are such that vapor intrusion may likely be an issue of concern in connection with the property.

A brief description of the properties follows - please refer to Photographs in **Appendix K.**

600 Glenwood Avenue – The 600 Glenwood Avenue Property is approximately 1.88 acres and is located Northwest of the intersection of Glenwood Avenue and Robin Street. It is also directly Northwest of the 530-550 Glenwood Avenue apartments. The property consists of five residential apartment buildings.

530-550 Glenwood Avenue -The 530-550 Glenwood Avenue property is approximately 1.11-acres and is located at the southwest end of the 600 Glenwood properties. The property is located north of the 104 Robin Street property. The property abuts Robin Street and is currently occupied by three residential single story apartment buildings.

98 Robin Street -The 98 Robin Street property is approximately 0.13-acres. The property is located west of the 295 Santee Street property and north of 30 Kestrel Street property. The property is currently occupied by sections of two different apartment buildings separated by a grass area in the middle.

102 Robin Street -The 102 Robin Street property is approximately 0.14-acres. The property is located west of the 295 Santee Street property and north of the 98 Robin Street property. The property is currently a grass covered area with a small section of an apartment building running along the west side of the parcel.

104 Robin Street -The 104 Robin Street property is approximately 0.13-acres. The property is located west of the 295 Santee Street property and north of the 102 Robin Street property. The property is currently occupied by apartment building eight (units 20-48).

19 Kestrel Street -The 19 Kestrel Street property is approximately 0.13-acres. The property is located west of the 295 Santee Street property and south of the 21 Kestrel Street property. The property is currently and historically was a vacant grass covered lot.

20 Kestrel Street -The 20 Kestrel Street property is approximately 0.14-acres. The property is located west of the 19 Kestrel Street across Kestrel Street and south of the 22 Kestrel Street property. The property is currently and historically was a vacant grass covered lot.

21 Kestrel Street -The 21 Kestrel Street property is approximately 0.13-acres. The property is located north of 19 Kestrel Street and west of the 295 Santee Street property. The property is currently and historically was a vacant grass covered lot.

22 Kestrel Street -The 22 Kestrel Street property is approximately 0.13-acres. The property is located north of 20 Kestrel Street and south of the 30 Kestrel Street property. The property is currently and historically was a vacant grass covered lot.

30 Kestrel Street -The 30 Kestrel Street property is approximately 0.68-acres. The property is bordered to the east by 295 Santee Street; to the north by 198 Robin Street and to the south by 22 Kestrel Street. The property is currently occupied by four different residential apartment buildings.

294 Santee Street -The 294 Santee Street property is approximately 0.14-acres. The property is bordered to the 55 Plover Street and to the north by 295 Santee Street. The property is currently a vacant grass covered lot that formerly contained a tool house which was linked to the silver reclaiming and chemical packaging facility that was located on the 55 Plover Street parcel (1950 Sanborn maps).

295 Santee Street -The 295 Santee Street property is approximately 4.1-acres. The property is bordered to the east by 55 Plover Street; to the south by 294 Santee Street and to the west by 30 Kestrel Street. The property is currently occupied by four apartment buildings, sections of two other apartment buildings, and a community center known as Glenwood Gardens.

55 Plover Street -The 55 Plover Street property is approximately 0.56-acres. The property is bordered to the west by the 294 and 295 Santee Street properties. The property is currently a vacant grass covered lot with a shed that was inaccessible on the northern side of property. Sanborn maps and street directories from 1950 indicate there was a silver reclaiming and chemical packaging facility known as the Howard & Bowen Company located on the property.

Phase I ESA tasks included questionnaires/interviews, government FOIL, reconnaissance of the property and general area, and environmental databases research. A review of readily available government agency records was conducted. The typical ASTM search radius was altered for this Phase I ESA to accommodate the enlarged nature of the area. This was done by extending the area by using points near the farthest out properties to ensure proper coverage.

A review of governmental records of properties within the expanded ASTM radius indicated a total of Ninety-two (92) database records were found in the radius completed for the area. These include: two (2) SEMS-ARCHIVE sites; three (3) CORRACTS sites; three (3) RCRA-SQG sites; three (3) RCRA-VSQG sites; two (2) NY SHWS sites; eleven (11) NY LTANKS sites; seven (7) NY UST sites; seven (7) NY AST sites; one (1) NY CBS sites, one (1) NY CBS AST sites, one (1) US BROWNFIELDS sites; one (1) NY BROWNFIELDS site, one (1) NY DEL SHWS; one (1) NY PFAS sites; nineteen (19) NY spills sites; eleven (11) RCRA NonGen / NLR sites; one (1) NY HSWDS sites; thirteen (13) NY MANIFEST sites; one (1) PA MANIFEST sites; one (1) NY VAPOR REOPENED sites; one (1) EDR MGP sites; three (3) EDR Hist Auto sites, and one (1) EDR Hist Cleaner sites.

This Phase I ESA assessed the need for a vapor intrusion assessment (VIA) of the properties regarding chemicals of concern (COC) that may migrate as vapors into existing or planned structures on a property. A vapor intrusion screen was performed using EDR's vapor intrusion database report and ASTM radius report as well as a review of the historical documentation. A report was generated for the areas described above (refer to Appendix E). The potential for vapor intrusion exists on the 55 Plover Street property as it was identified as a silver reclaiming and chemical packaging facility in the 1951 Sanborn maps. Also, some other nearby property uses for cleaners and hazardous chemical storage may result in vapor issues.

Findings Summary (note, these will be repeated in the conclusion section of this report)

This Phase I ESA was completed for thirteen separate adjacent/nearby parcels for **Edgemere Development** in support of due diligence property acquisition. BE3 did not find any records or make any observations indicating significant use or storage of petroleum or hazardous waste on the subject properties either currently or in the past other than 55 Plover Street which was a silver reclaiming and chemical packaging company.

The target properties are at risk in terms of environmental impairment based on its past use, adjacent property use, and the physical setting. Nearby properties within the ASTM radius have been linked to historical dry-cleaning shops, spills, LTANKS, and hazardous chemicals. Most are not believed to be impacting the subject properties because of distance or migration pathway gradient.

Specific database findings nearby to the property are as follows:

- Rochester Housing Authority located at 41 Kestrel Street- located within the subject properties' outer boundaries. Spill #1403209
- Fernandez Residence located at 11 Kestrel Street – South of the property boundary (160 feet off site) Spill #0310129
- Alfano Property located at 637 Glenwood Avenue – West of the property boundary (300 feet offsite) Spill #0270002
- Emerson Chemical Spill located at 484 Emerson Street- South of properties (329 feet off site). Spill #8521514
- Resident of 15 Robin Street located at 15 Robin Street- Southwest of properties (352 feet off site).

Spill #0306057
- United Laundry Services at 515 Dewey Avenue (Historic Dry Cleaner) - Southeast of properties (654 feet off site).
- Dupont Warehouse located at Lexington and Wren – Northwest of properties (903 feet off site). LTANKS spill # 7580211
- Genie Manufacturing located at 56 Plover Street – Southeast of properties (73 feet off site). Use of hazardous chemicals which created hazardous waste.
- Anderson Equipment Company at 120 Norman Street – West of the properties (1400 feet off site). L TANKS Spill #8708654
- TNT Red Star Express located at 75 Norman Street -West of the properties (1420 feet off site). Spill # 9870365

It is unknown whether any impacts to the subsurface environment exist from these off-site sources and none of these properties have any records indicating release. Most are either downgradient or side gradient to the property reducing the likelihood of impacts to the subject property.

A lien search was completed for twelve of the thirteen subject properties. No environmental liens were identified for the properties. There is no indication based on historical records that any of these parcels are related to environmental cleanup or would indicate environmental liens.

Data Gaps

The ASTM standard requires that significant data gaps that affect the ability of the environmental professional to identify RECs be identified and that the sources of information that were consulted to address the data gaps be identified. Environmental lien searches were conducted for 12 of the 13 properties. The 600 Glenwood property did not have an environmental lien search ordered, this is inherently a data gap. 40 Year title searches were limited to online research due to the County Recorder's Office being closed for the foreseeable future for covid-19 protocols. BE3 personnel did not interview personnel from any adjacent properties. BE3 personnel only had access to apartments that were vacant. BE3 personnel were unable to access the shed located on the 55 Plover Street parcel. All FOIL information has not been returned as of this writing however much of the environmental record was reviewed in the government data search. No other significant data gaps are identified for this Phase I ESA.

Conclusions/ Recommendations

BE3 has completed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E1527 for the identified set of properties located in the City of Rochester, Monroe County, New York. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 and data gaps are identified above in this section. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the properties except for the following:

- The 55 Plover Street property formerly known as the Howard & Bowen Company was identified as a silver reclaiming and chemical packaging facility in the 1950 Sanborn Maps. Silver Reclamation is the process by which silver is extracted from waste in order to reuse it since it's a hazardous yes valuable resource. Although it is unknown exactly what chemicals were on site this site still constitutes as a REC.
- A nearby adjacent property located at 56 Plover Street was formerly known as Genie Manufacturing. This company used chemicals such as 1,1,1-Trichloroethane, Carbon Tetrachloride, and Chlorinated Fluorocarbons as a degreasing agent. Chronic exposure to these

chemicals has been linked to abnormalities in the liver, kidneys, and heart. This constitutes as a REC.

- A nearby historic dry cleaner located at 515 Dewey Avenue may have released chemicals to the environment resulting in a plume and possibly vapor intrusion issues. Since there is no history of any reported release or spills from this historic location there is no defined REC.
- Anderson Equipment Company located on 120 Norman Street had a history of LTANK spills due to tank failures containing diesel fuel. However, due to the history of clean-up actions resulting in non-detect levels of contaminants downgradient and the far proximity to the subject properties, this does not constitute as a REC.
- TNT Red Star Express who was sold to 3813 Broadway Inc is located at 75 Norman Street and has a past record of LTANK spills. Past remedial actions removed contamination of benzene, VOCs, and SVOC's to low to non-detect levels in downgradient wells. Due to this and the distance from the subject properties, there is no defined REC.

1.0 INTRODUCTION

1.1 PURPOSE

Brydges Engineering in Environment and Energy (BE3) completed a Phase I Environmental Site Assessment (ESA) for twelve separate parcels including: 530-550 Glenwood Avenue; 98, 102, and 104 Robin Street; 19, 20, 21, 22, and 30 kestrel Street; 294 and 295 Santee Street; and 55 Plover Street located in the City of Rochester, Monroe County, New York (refer to attached figures in Appendix A which shows the parcel locations). The Phase I was completed for **Edgemere Development** in support of due diligence property acquisition.

The properties are located about one mile west of the Genesee River. The elevation ranges from 540 to 520 feet above sea level sloping southeast. The general middle of the parcels is located at latitude 43º 10' 35.79" N; Longitude 77º 38' 42.15" W. The immediate area around the thirteen properties is mainly residential.

The ASTM standard practice defines a customary process for conducting an ESA on a parcel of commercial land with respect to CERCLA contaminants and petroleum products. Accordingly, the goal of the process is to identify recognized environmental conditions relating to the property through all appropriate inquiries into the current conditions and previous ownership and activities at the property and adjacent properties. The standard defines specific environmental conditions as follows:

Recognized Environmental Conditions (RECs) are defined in the ASTM Standard as the presence of hazardous substances or petroleum products in, on, or at the subject property; (1) due to any release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Historical Recognized Environmental Condition (HREC) is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to controls.(e.g., activity use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

Controlled Recognized Environmental Condition (CREC) is defined as a recognized environmental condition affecting the subject property that has been addresses to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.(e.g., activity and use limitations or other property use limitations).

The standard also identifies a **De Minimis Condition** as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs or CRECs.

The non-scope considerations portion of the standard also defines a **Business Environmental Risk** (**BER)** as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate.

1.2 PROPERTY LOCATION AND LEGAL DESCRIPTION

	ADDRESS	SBL	ACRES	OWNER
1	**530-550 Glenwood Avenue**	**105.33-1-2**	**1.11**	**Rochester Housing Authority**
2	**98 Robin Street**	**105.33-1-44**	**0.13**	**Rochester Housing Authority**
3	**102 Robin Street**	**105.33-1-45**	**0.14**	**Rochester Housing Authority**
4	**104 Robin Street**	**105.33-1-46**	**0.13**	**Rochester Housing Authority**
5	**19 Kestrel Street**	**105.33-1-29**	**0.13**	**City of Rochester**
6	**20 Kestrel Street**	**105.33-1-41**	**0.14**	**City of Rochester**
7	**21 Kestrel Street**	**105.33-1-28**	**0.13**	**City of Rochester**
8	**22 Kestrel Street**	**105.33-1-42**	**0.13**	**City of Rochester**
9	**30 Kestrel Street**	**105.33-1-43**	**0.68**	**Rochester Housing Authority**
10	**294 Santee Street**	**105.33-1-16**	**0.14**	**Rochester Housing Authority**
11	**295 Santee Street**	**105.33-1-5**	**4.1**	**Rochester Housing Authority**
12	**55 Plover Street**	**105.33-1-6**	**0.56**	**In The City Off The Grid LLC**
13	**600 Glenwood Avenue**	**105.24-2-18**	**1.88**	**Rochester Housing Authority**

Refer to Section 4.3 for a more detailed parcel description and **Appendix I** for further assessment information on the parcels. See **Appendix A** for location.

1.3 SCOPE OF SERVICES

The scope of services for this ESA was performed in accordance with American Society for Testing and Materials (ASTM) Standard E-1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" that incorporates the EPA All Appropriate Inquiries (AAI) rule and allows the user to qualify for landowner liability protections (LLPs). Specifically, the Phase I ESA included the following for the target property and adjacent properties, as applicable:

- research of the current land-use within 0.5 mile of the site (see Section 3.0)
- identification of known environmental problems within 1 mile of the site (see Section 3.0)
- a property reconnaissance that included visual observations of site and surrounding area
- research conducted at municipal offices
- acquisition and review of aerial photographs and historic maps and information
- acquisition and review of available local, state and city records and documents
- completion of a vapor encroachment screen

1.4 SIGNIFICANT ASSUMPTIONS

The following items were assumed during the completion of this Phase I ESA:

- Information obtained from third parties is essentially complete and correct, or stipulated otherwise within the report;
- This report relates to assessment of environmental conditions on or affecting the subject parcel or parcels;
- As applicable to a property transaction, an inquiry into the ownership and previous uses of the property will qualify an individual for one of the threshold criteria for satisfying the LLPs (assuming compliance with the other CERCLA elements of defense); in addition, an inquiry should not be construed as not 'all appropriate' because it did not identify a REC associated with the property.

1.5 LIMITING CONDITIONS, DEVIATIONS AND EXCEPTIONS

1.5.1 Limiting Conditions

This report is based on information from field reconnaissance and visual observations of the subject property or parcel and the properties immediately surrounding; as well as interpretation of the available information and documentation reviewed and provided in the appendix. The property and this site assessment are limited to the footprint of the subject parcels. This report is intended for the sole use of the Edgemere Development. The scope of services performed in this assessment may not be appropriate to satisfy the needs of other entities associated with the target property, and any re-use of this document or the findings, conclusions, or recommendations presented, is at the sole risk of the user.

The conclusions set forth in this report are based upon and limited by the government data and other available information. As such and within the scope of the project, the accuracy of all data supplied by government entities and third parties could not always be verified. Therefore, we are not responsible for any conclusion contained in this report that is based on, in whole or in part, upon inaccurate data obtained from third parties.

It should be noted that all surface environmental assessments are inherently limited in the sense that conclusions are drawn, and recommendations developed from information obtained from limited research and site evaluation at a specific time. The passage of time may result in unknown site changes that have not been evaluated, and therefore a change in environmental circumstances at this site and surrounding properties or beneath the surface that may be present but undetectable during this Phase I ESA.

1.5.2 Deviations

As stated in the ASTM standard 1527-21 all appropriate inquiry does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information. One of the purposes for completing the Phase I ESA in accordance with the standard is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing ESAs and the reduction of uncertainty about unknown conditions resulting from additional information.

Professional legal or title insurance services are not provided by completing this document, and no guarantee explicit or implied has been made that the property assessment represents a comprehensive delineation of past site ownership or tenancy, land title or lien records. The work performed in conjunction with this assessment and the data developed are intended as a description of available information at the dates and locations given.

Formal interviews of all state/local governments, occupants, owners, operators, adjacent landowners were not conducted, and all adjacent structures or vacant properties were not observed/surveyed during the site reconnaissance as there were locations of inaccessibility. Based on the extent of the other information covered in this ESA, it is believed that the noted deviations do not impair the user's LLPs.

1.5.3 Exceptions

The only exceptions beyond the standard Phase I ESA scope that were assessed in this report include information provided on radon, mold, asbestos containing materials, lead based paint, and handling/disposal of PCB containing equipment. Additional considerations beyond the scope of this ASTM practice may be addressed in other documents, such as cultural and historic resources. The quality and quantity of material covered meets or exceeds the practice except where otherwise noted.

1.6 USER RELIANCE

This report is intended for the sole use of Edgemere Development, who can use for reference and rely upon the information, findings, and conclusions contained in this report. Only at the user's request will this report be granted to other parties for reliance.

2.0 USER PROVIDED INFORMATION

If applicable and available to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user must provide information for use in this report. Failure to provide available information could result in a determination that all appropriate inquiry is not complete. The user is defined as the party seeking to use PRACTICE E 1527 to complete an ESA of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

BE3 obtained information from Edgemere Development as well as various departments within the city. BE3 believes the information obtained during the Phase I ESA together with all the other information assessed for this report qualifies the user for LLPs.

User provided information is shown in **Appendices B and C.**

2.1 TITLE RECORDS

40 year chain of title records were completed for all thirteen properties. In person research was restricted due to Covid-19 protocols. However, research was completed to 1981 and deeds were only found for five of the thirteen parcels. A lien Search was completed for the subject properties through the third-party EDR. No environmental liens were identified on the parcel.

Refer to **Appendix I** for copies of the 40 year chain of title information.

2.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien search was obtained for twelve of the thirteen properties. The City of Rochester and Rochester Housing Authority was questioned regarding any Liens, AULs such as engineering controls, land use restrictions or institutional controls that are in place at the properties and/or have been filed or recorded in a registry under federal, tribal, state, or local law. No information was provided to BE3 concerning environmental liens or activity and use limitations for the subject property.

2.3 SPECIALIZED KNOWLEDGE

No additional specialized knowledge was indicated. The property user was questioned regarding any knowledge or experience of any environmental lien or AULs encumbering the property or in connection with the property or nearby properties. No environmental liens or activity and use limitations were reported for the subject property. No other information was provided to BE3 which would suggest environmental liens or AUL.

2.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The Rochester Housing Authority was questioned regarding any knowledge of any commonly known or

reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the property. No additional information was provided to BE3 concerning any recognized environmental conditions.

2.5 OTHER USER INFORMATION

This Phase I ESA is being performed for due diligence purposes and to obtain a certain degree of liability protection regarding business environmental risk as contractor for future site development. The user has provided some records and information pertaining to the property.

3.0 RECORDS REVIEW

A summary of the ASTM record search is provided below and in **Appendix D** - Refer to page 4-7 of the radius reports.

3.1 STANDARD REGULATORY/TRIBAL ENVIRONMENTAL RECORDS

A review of governmental records of properties within the expanded ASTM radius indicated a total of Ninety-two (92) database records were found in the radius completed for the area. These include: two (2) SEMS-ARCHIVE sites; three (3) CORRACTS sites; three (3) RCRA-SQG sites; three (3) RCRA-VSQG sites; two (2) NY SHWS sites; eleven (11) NY LTANKS sites; seven (7) NY UST sites; seven (7) NY AST sites; one (1) NY CBS sites, one (1) NY CBS AST sites, one (1) US BROWNFIELDS sites; one (1) NY BROWNFIELDS site, one (1) NY DEL SHWS; one (1) NY PFAS sites; nineteen (19) NY spills sites; eleven (11) RCRA NonGen / NLR sites; one (1) NY HSWDS sites; thirteen (13) NY MANIFEST sites; one (1) PA MANIFEST sites; one (1) NY VAPOR REOPENED sites; one (1) EDR MGP sites; three (3) EDR Hist Auto sites, and one (1) EDR Hist Cleaner sites.

3.2 ADDITIONAL ENVIRONMENTAL RECORDS

3.2.1 City Offices

The City of Rochester offices were contacted through the FOIL process for this ESA as follows:

- City of Rochester Fire Prevention Office: This office maintains information on USTs and fire code violations.
- City of Rochester Assessors Office: Real property and assessment information was obtained online.
- City of Rochester Building Department: This office maintains building and general files for this property.

Records from the City of Rochester Fire Prevention Office and Building Department pertaining to AST/USTs are reviewed in Section 4.3.3. City of Rochester Department of Permits and Inspections Services was contacted via the FOIL process. The information received did not produce any information relevant to environmental conditions on site. Refer to **Appendix E** for copies of the building permits, Fire Department records, and FOIL information obtained.

3.2.2 County Offices

County and City GIS was reviewed to obtain some information concerning parcels. County Assessment information was reviewed at the following web page: https://maps.cityofrochester.gov/propinfo/
Information obtained is presented in Section 1.2 and included in **Appendix I.**

3.2.3 New York State Department of Environmental Conservation

NYSDEC records were requested through their FOIL system. No records were obtained as of this writing; however, government and historical database records were obtained from a property due diligence service, which would contain the information available through FOIL. This information is provided in various sections in this report.

3.2.4 Previous Environmental Studies/Historical Data

BE3 was not provided with and did not find any specific environmental reports or data on the properties beyond the historical information described in other sections of this report.

3.3 PHYSICAL SETTING SOURCES

Current and historical topographic maps that show the area of the target property were reviewed and are presented in **Appendix F**. These maps and the additional physical setting sources from the Radius Map Report provide details of geologic, hydrogeologic, hydrologic, and topographic characteristics of the target property and surrounding area to assess the impact of potential RECs relating to the target property.

3.3.1 Topography and Drainage

Property surface features and drainage were determined through a combination of site reconnaissance, previous environmental reports and a review of both aerial photographs and topographic maps.

The properties are generally flat and gently sloping southeast. Surface and shallow groundwater flow most likely has been impacted over time by the various developments and fills as well as foundations, street beds, and utility lines. Surface water is directed to City streets and low spots in properties. In general groundwater most likely flows east towards the Genesee River.

3.3.2 Site Geology and Hydrogeology

Topography. Surface topography may be indicative of the direction of the surficial groundwater flow. The target parcel sits about 1 mile west of the Genesee River, and 6 miles south of Lake Ontario. Topography of the sites is mostly flat, in which the elevation of the site does not fluctuate more than 20 feet.

Geology. The soils map of the City of Rochester identifies this area as Urban Land (Ud). The term urban soil refers to soils in areas of high population density in the largely built environment. These soils can be significantly changed human-transported materials, human-altered materials, or minimally altered or intact “native” soils. Soils in urban areas exhibit a wide variety of conditions and properties and may have impervious surfaces, such as buildings and pavement.

3.3.3 Hydrology and Waterbodies

Various agencies are involved with wetlands and surface water bodies at the federal and State levels, such as FEMA, NYSDEC, and US Fish and Wildlife. In general, vegetation and saturated soil are observed as critical items for sensitive areas, including the presence of hydric soils that are defined as soils saturated or flooded at least one week during the growing season that develop anaerobic conditions. For the target property, no surface water bodies, or wetland areas are located within the property area. The nearest waterbody is the Genesee River 1 mile east of the subject properties. Topography also suggests runoff generally flows towards the southeast and to adjacent streets and low spots on the property.

3.4 HISTORICAL USE INFORMATION

Several sources were used to develop a historical use profile for the property discussed in this report, and included:

- Aerial photographs
- Fire insurance or Sanborn maps
- Recorded land title records
- USGS topographical maps
- Local street directories
- Building department records and
- Land/zoning use records
- Other sources from the NYSDEC or additional city departments

3.4.1 General Current Characteristics

Six of the thirteen properties are currently vacant grass lots. Historically 19, 20, 21, and 22 Kestrel Street have always been vacant while 55 Plover Street and 294 Santee Street had buildings on them in historic Sanborn maps starting in 1911. The other six properties are home to Glenwood apartment buildings which were built in 1971 according to historic aerial images. Before 1971 these properties appear to have been vacant grass lots.

3.4.2 Target Property Use Summary

The properties are residential with the exception of 19, 20, 21, 22 Kestrel Street and 194 Santee Street which are now vacant grass lots. 55 Plover Street has a small inaccessible shed located on the northern side of the property. Historically, 55 Plover had a silver reclaiming and chemical packaging facility on it and 194 Santee had a tool house which was corelated to the silver reclaiming and chemical packaging facility located at the adjacent 55 Plover Street property.

3.4.3 Adjacent Property Use

Adjoining properties appear to all have been residential or vacant grass lots.

3.4.4 Aerial Photographs

Aerial Photographs for the following years were obtained from EDR, Bing and Google Maps

1938 Aerial Photograph
1951 Aerial Photograph
1958 Aerial Photograph
1966 Aerial Photograph
1969 Aerial Photograph
1971 Aerial Photograph
1980 Aerial Photograph
1985 Aerial Photograph
1994 Aerial Photograph
2006 Aerial Photograph
2009 Aerial Photograph
2013 Aerial Photograph

2017 Aerial Photograph

A review of street directories, Sanborn maps and historical aerial photographs suggest that the properties were all residential except for a silver reclaiming and chemical packaging company located on the 55 Plover Street parcel. Additional discussion on specific observations is described under Section 3.4.2.4 below.

The aerial photographs are contained in **Appendix G**.

3.4.5 Sanborn Maps

Historical Sanborn maps and topographic maps of the area covering the properties were obtained through Environmental Data Resources, Inc. (EDR), an environmental risk management firm. Historical Sanborn maps for this property and adjacent properties were available for the following years: 1892, 1911, 1950, and 1971.

1892 Sanborn Maps

The Sanborn maps obtained by EDR for 1892 only cover the northwestern and southeastern extremes of the subject properties. From the provided maps, the properties are shown as vacant lots.

1911 Sanborn Maps

The properties are all shown as vacant lots except for two buildings (shed and workshop) located on the 55 Plover Street property. Areas surrounding the thirteen subject properties appear to be all residential.

1950 Sanborn Maps

The properties are all shown as vacant lots except for two buildings (shed and workshop) located on the 55 Plover Street property and one building (tool house) located at 294 Santee Street. Areas surrounding the thirteen subject properties appear to be all residential.

1971 Sanborn Maps

The properties are all shown as vacant lots except for one residual building left where the silver reclaiming and chemical packaging facility was at on the 55 Plover Street property. Areas surrounding the thirteen subject properties appear to be all residential.

Sanborn Maps are in **Appendix H**.

3.4.6 Property Title, and Lien Information

Current/Recent Title and tax assessor information was reviewed online at the County and City web site. An environmental lien search was completed for all thirteen subject properties.

3.4.7 USGS Topographical Maps

BE3 obtained a series of historic topographic maps of the general area from EDR including ones from 2019, 2016, 2013, 1994, 1978, 1971, 1969, 1935, 1931, 1920, 1912, 1898, and 1895. These maps do not offer any additional information concerning the properties.

3.4.8 Local Street Directories & Historical Use

Historic Street directories for the subject properties and adjacent properties were reviewed for the years 2017, 2014, 2009, 2008, 2004, 2000, 1999, 1994, 1992, 1985, 1982, 1975, 1970, 1965, 1960, 1955, 1950, 1945, 1940, 1935, 1930, 1926 and the information is provided in the summary of each parcel (see also **Appendix J)**.
A copy of street directories compiled by EDR is presented in Appendix F.
3.4.9 Building Department and Land/Zoning Records

Information from the City of Rochester Permits and Fire Prevention Bureau Building Department were not reviewed as city hall did not allow access. FOIL information has not been retuned as of writing this.

4.0 SITE RECONNAISSANCE

4.1 OBJECTIVES, OBSERVATIONS, AND METHODOLOGY

A site reconnaissance was conducted to inspect physical features and make general observations regarding the subject properties and vicinity with respect to the likelihood of identifying REC's. The following tasks were completed:

- visual inspection of the properties and surrounding property was conducted to identify potential environmental impacts existing on the property or from adjacent areas;
- various property features were photographed as the accessible portions of the site were systematically walked to obtain as close to 100% coverage as possible;
- visual surface observations were made to identify any evidence of spills, such as stained soil/concrete or vegetative stress;

The results of the reconnaissance are summarized below to provide a representation of property uses and conditions at the time of the site visit. Any limitations that existed during the reconnaissance such as physical obstructions were documented. A photographic record of the site visit is included in **Appendix K**.

4.2 GENERAL SITE SETTING

The properties are located about one mile west of the Genesee River located in the City of Rochester. Six of the twelve properties area vacant grass covered lots while the rest are occupied by apartment buildings. The area surrounding the properties is and historically has been residential. The subject properties are described below.

4.3 SUMMARY OF EXTERIOR AND INTERIOR OBSERVATIONS

A brief description of the properties follows - please refer to Photographs in Appendix K. A summary of observations and current conditions are summarized below. Note, there was subsidence noted across the properties. The following is a summary of each property:

600 Glenwood Avenue – The 600 Glenwood Avenue Property is approximately 1.88 acres and is located Northwest of the intersection of Glenwood Avenue and Robin Street. It is also directly Northwest of the 530-550 Glenwood Avenue apartments. The property consists of five residential apartment buildings.

530-550 Glenwood Avenue -The 530-550 Glenwood Avenue property is approximately 1.11-acres and is located at the northwest end of the twelve properties. The property is located north of the 104 Robin Street

property. The property abuts Robin Street and is currently occupied by three residential single story apartment buildings.

98 Robin Street -The 98 Robin Street property is approximately 0.13-acres. The property is located west of the 295 Santee Street property and north of 30 Kestrel Street property. The property is currently occupied by sections of two different apartment buildings separated by a grass area in the middle.

102 Robin Street -The 102 Robin Street property is approximately 0.14-acres. The property is located west of the 295 Santee Street property and north of the 98 Robin Street property. The property is currently a grass covered area with a small section of an apartment building running along the west side of the parcel.

104 Robin Street -The 104 Robin Street property is approximately 0.13-acres. The property is located west of the 295 Santee Street property and north of the 102 Robin Street property. The property is currently occupied by apartment building eight (units 20-48).

19 Kestrel Street -The 19 Kestrel Street property is approximately 0.13-acres. The property is located west of the 295 Santee Street property and south of the 21 Kestrel Street property. The property is currently and historically was a vacant grass covered lot.

20 Kestrel Street -The 20 Kestrel Street property is approximately 0.14-acres. The property is located west of the 19 Kestrel Street across Kestrel Street and south of the 22 Kestrel Street property. The property is currently and historically was a vacant grass covered lot.

21 Kestrel Street -The 21 Kestrel Street property is approximately 0.13-acres. The property is located north of 19 Kestrel Street and west of the 295 Santee Street property. The property is currently and historically was a vacant grass covered lot.

22 Kestrel Street -The 22 Kestrel Street property is approximately 0.13-acres. The property is located north of 20 Kestrel Street and south of the 30 Kestrel Street property. The property is currently and historically was a vacant grass covered lot.

30 Kestrel Street -The 30 Kestrel Street property is approximately 0.68-acres. The property is bordered to the east by 295 Santee Street; to the north by 198 Robin Street and to the south by 22 Kestrel Street. The property is currently occupied by four different residential apartment buildings.

294 Santee Street -The 294 Santee Street property is approximately 0.14-acres. The property is bordered to the 55 Plover Street and to the north by 295 Santee Street. The property is currently a vacant grass covered lot that formerly contained a tool house which was linked to the silver reclaiming and chemical packaging facility that was located on the 55 Plover Street parcel (1950 Sanborn maps).

295 Santee Street -The 295 Santee Street property is approximately 4.1-acres. The property is bordered to the east by 55 Plover Street; to the south by 294 Santee Street and to the west by 30 Kestrel Street. The property is currently occupied by four apartment buildings, sections of two other apartment buildings, and a community center known as Glenwood Gardens.

55 Plover Street -The 55 Plover Street property is approximately 0.56-acres. The property is bordered to the west by the 294 and 295 Santee Street properties. The property is currently a vacant grass covered lot with a shed that was inaccessible on the northern side of property. Sanborn maps and street directories from 1950 indicate there was a silver reclaiming and chemical packaging facility known as the Howard & Bowen Company located on the property.

4.3.1 Treatment, Storage, or Disposal Facilities (TSDF)

The properties are not associated with a TSDF and no areas characteristic of the same were observed other than on 55 Plover Street parcel.

4.3.2 Hazardous Waste/Substances/Drums/Containers

No hazardous waste or substances were observed. See photos in **Appendix K**.

4.3.3 Aboveground/Underground Chemical/Petroleum Storage Tanks (AST/UST)

No evidence of AST/USTs were found during the Site Reconnaissance. There are no records of USTs as described in 4.3 above**.**

4.3.4 PCB Containing Equipment

BE3 personnel did not see any transformers or PCB containing equipment on the property.

4.3.5 Stains, Spills, Stressed Vegetation

No stains/spills were noted.

4.3.6 Landfills/Dumping Activities/Solid Waste/Wastewater

There is no history or suggestion that any of the properties have been significantly filled, however, there may be C&D debris from the previous demolition of the former structures.

4.3.7 Pits, Sumps, and Wells

No Pits, sumps or wells were observed in the areas walked during the site visit and there is not history or records of these associated with the properties.

4.3.8 Ponds and Lagoons

No ponds or lagoons are associated with the properties.

4.3.9 Coastal Areas

The properties are not associated with a coastal area.

4.3.10 Odors and Vapor Intrusion Assessment

Odor was not noted on the properties. A vapor encroachment screen is addressed below.

4.3.11 Potable Water Supply

Potable water supply would be from the City of Rochester.

4.3.12 Sewage Disposal System

Sewage is assumed to run to municipal combined sewer system.

4.3.13 Heating/Cooling

112 of the 124 apartments are heated by a boiler system. The other 12 are heated by electric heat.

4.4 VAPOR ENCROACHMENT SCREEN

Vapor intrusion is an indoor air quality issue that develops when volatile chemicals from impacted soil or groundwater evaporate into the air of overlying buildings. This is very similar to the process through which naturally occurring radon gas seeps into structures and buildings. Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions - ASTM E 2600-10 is the guideline used to assess the need for a vapor intrusion assessment (VIA) of a property. The goal of a VIA is to identify whether a vapor intrusion condition (VIC) exists or is likely to exist on the property (i.e., presence or likely presence of a COC in indoor air from the vapor of a contaminated soil or groundwater at a concentration that presents or may present an unacceptable health risk to occupants). This should not include de minimis conditions that are trace concentrations or do not normally represent an unacceptable risk and that generally would not be subject of enforcement actions.

A Vapor intrusion screen was performed using EDR's ASTM radius report as well as a review of the historical documentation. The potential for vapor intrusion exists on the 55 Plover Street property as it was identified as a silver reclaiming and chemical packaging facility in the 1951 Sanborn maps. Also, some other nearby property uses for cleaners and hazardous chemical storage may result in vapor issues. While there are potential vapor encroachment concerns originating from some of these sources it is not known if any environmental impacts originated from these sources. Not all dry-cleaning operations stored dry cleaning solvents on the property and not all of them had operations that created releases.

5.0 INTERVIEWS CONDUCTED

5.1 OWNER

Many discussions were conducted regarding the property with the Edgemere Development. The City of Rochester and Rochester Housing Authority completed a detailed questionnaire (refer to **Appendix C)**.

5.2 SITE MANAGER

Rochester Housing Authority

5.3 OCCUPANTS

Apartment buildings located on properties are occupied by tenants. Six of the thirteen parcels are vacant grass-covered lots.

5.4 LOCAL GOVERNMENT OFFICIALS

Information was obtained from the city, state and county representatives as summarized in Section 3.2. Some information was obtained through the council. Additional information will be amended to this report as appropriate and as further obtained from City and County personnel.

5.5 OTHERS/ADJACENT PROPERTY OWNERS

Owners and owner's representatives of adjacent properties were not contacted. Adjacent properties were residential. Due to the nature of the types of adjacent properties and the past and current use of the property as well as the property size, no adjacent property individuals or other individuals were interviewed.

6.0 FINDINGS, OPINIONS, AND CONCLUSIONS

This Phase I ESA was completed for thirteen separate parcels including: : 530-550, 600 Glenwood Avenue; 98, 102, and 104 Robin Street; 19, 20, 21, 22, and 30 kestrel Street; 294 and 295 Santee Street; and 55 Plover Street located in the City of Rochester, Monroe County, New York (refer to attached figures in Appendix A which shows the parcel locations). The Phase I was completed for **Edgemere Development** in support of due diligence property acquisition.

The target properties are at risk in terms of environmental impairment based on its past use, adjacent property use, and the physical setting. Nearby properties within the ASTM radius have been linked to historical dry-cleaning shops, spills, LTANKS, and hazardous chemicals. Most are not believed to be impacting the subject properties because of distance or migration pathway gradient.

Specific database findings nearby to the property are as follows:

- Rochester Housing Authority located at 41 Kestrel Street- located within the subject properties' outer boundaries. Spill #1403209
- Fernandez Residence located at 11 Kestrel Street – South of the property boundary (160 feet off site) Spill #0310129
- Alfano Property located at 637 Glenwood Avenue – West of the property boundary (300 feet offsite) Spill #0270002
- Emerson Chemical Spill located at 484 Emerson Street- South of properties (329 feet off site). Spill #8521514
- Resident of 15 Robin Street located at 15 Robin Street- Southwest of properties (352 feet off site). Spill #0306057
- United Laundry Services at 515 Dewey Avenue (Historic Dry Cleaner) - Southeast of properties (654 feet off site).
- Dupont Warehouse located at Lexington and Wren – Northwest of properties (903 feet off site). LTANKS spill # 7580211
- Genie Manufacturing located at 56 Plover Street – Southeast of properties (73 feet off site). Use of hazardous chemicals which created hazardous waste.
- Anderson Equipment Company at 120 Norman Street – West of the properties (1400 feet off site). L TANKS Spill #8708654
- TNT Red Star Express located at 75 Norman Street -West of the properties (1420 feet off site). Spill # 9870365

It is unknown whether any impacts to the subsurface environment exist from these off-site sources and none of these properties have any records indicating release. Most are either downgradient or side gradient to the property reducing the likelihood of impacts to the subject property.

A lien search was completed for all thirteen subject properties. No environmental liens were identified for the properties. There is no indication based on historical records that any of these parcels are related to environmental cleanup or would indicate environmental liens.

Data Gaps

The ASTM standard requires that significant data gaps that affect the ability of the environmental professional to identify RECs be identified and that the sources of information that were consulted to address the data gaps be identified. Environmental lien searches were conducted for 12 of the 13 properties. The 600 Glenwood property did not have an environmental lien search ordered, this is inherently a data gap. 40 Year title searches were limited to online research due to the County Recorder's Office being closed for the foreseeable future for covid-19 protocols. BE3 personnel did not interview personnel from any adjacent properties. BE3 personnel only had access to apartments that were vacant. BE3 personnel were unable to access the shed located on the 55 Plover Street parcel. All FOIL information has not been returned as of this writing however much of the environmental record was reviewed in the government data search. No other significant data gaps are identified for this Phase I ESA.

Conclusions/ Recommendations – note, these are repeated form the executive summary section of the report

BE3 has completed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E1527 for the identified set of properties located in the City of Rochester, Monroe County, New York. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 and data gaps are identified above in this section. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the properties except for the following:

- The 55 Plover Street property formerly known as the Howard & Bowen Company was identified as a silver reclaiming and chemical packaging facility in the 1950 Sanborn Maps. Silver Reclamation is the process by which silver is extracted from waste in order to reuse it since it's a hazardous yet valuable resource. Although it is unknown exactly what chemicals were on site this site still constitutes as a REC.
- A nearby adjacent property located at 56 Plover Street was formerly known as Genie Manufacturing. This company used chemicals such as 1,1,1-Trichloroethane, Carbon Tetrachloride, and Chlorinated Fluorocarbons as a degreasing agent. Chronic exposure to these chemicals has been linked to abnormalities in the liver, kidneys, and heart. This constitutes as a REC.
- A nearby historic dry cleaner located at 515 Dewey Avenue may have released chemicals to the environment resulting in a plume and possibly vapor intrusion issues. Since there is no history of any reported release or spills from this historic location there is no defined REC.
- Anderson Equipment Company located on 120 Norman Street had a history of LTANK spills due to tank failures containing diesel fuel. However, due to the history of clean-up actions resulting in non-detect levels of contaminants downgradient and the far proximity to the subject properties, this does not constitute as a REC.
- TNT Red Star Express who was sold to 3813 Broadway Inc is located at 75 Norman Street and has a past record of LTANK spills. Past remedial actions removed contamination of benzene, VOCs, and SVOC's to low/non-detect levels in downgradient wells. Due to this and the distance from the subject properties, there is no defined REC.

7.0 NON-SCOPE SERVICES

7.1 Radon

Radon is a naturally occurring radioactive gas that is a daughter product within the uranium-238 decay chain and has been associated with increased risk of developing lung cancer. It is colorless, odorless, and tasteless and can be found in high concentrations in soils and rock in the subsurface. Radon can migrate through small fractures into structures through floors and walls, drains, sump pipes and pores. The

concentrations that occur within structures are dependent upon source quantity, radioactive decay, and ventilation.

Surveys across the US indicate that as many as 21 percent of homes may exceed the maximum radon level suggested by the U.S. Environmental Protection Agency (EPA). Exposure levels can be quite variable depending on the amount of time spent in the home and the percentage of that time spent in the high-radon areas. Outdoor concentrations of radon gas tend to be minimal. Radon exposure is typically measured in picocuries per liter (pCi/L). The EPA and NYSDOH strongly recommend that property owners take remedial action if the levels recorded are higher than 4 pCi/L.

The subject properties are located within the City of Rochester, Monroe County, New York. As of December 2020, The New York State Health Department reports that a total 1988 homes have been screened for radon in the City of Rochester. The average radon level in the City of Rochester is reported as 0.63 pCi/L. 1,983 of the homes screened were less than 4 pCi/L, 5 had levels from 4 to 20 pCi/l, and 0 had levels greater than 20 pCi/L. (source: www.health.state.ny.us/nysdoh/radon/towns.htm)

7.2 Mold

Mold can germinate and colonize when a food source (drywall, wood, insulation, paper, etc.) is present accompanied by ideal temperatures and moisture content. Structural leaks often lead to accelerated mold growth, and the odor commonly associated with mold is from Microbial Volatile Organic Compounds (mVOCs). Some mold produces various mycotoxins that are considered toxic and may have negative health effects on humans.

BE3 personnel did not see any visible mold in or on apartments that were accessed.

7.3 Asbestos Containing Material/Lead-Based Paint

Asbestos is a naturally occurring material fiber that was once widely used in building materials and products for its thermal insulating properties and fire resistance. EPA defines asbestos- containing material (ACM) as material that contains more than 1% asbestos.

Lead is a soft, bluish metallic element that has been used in a variety of products. According to EPA, paint manufacturers frequently used lead as a primary ingredient in many oil-based interior and exterior house paints through the 1940s and generally decreased its use in the 1950s and 1960s as latex paints became more wide-spread. The federal Department of Housing and Urban Development (HUD) estimated that 75% of the houses built in the United States before 1978 contain some lead-based paint. Lead from paint, chips, and dust can pose health hazards if not properly managed.

The apartment buildings were built in 1971. Since they were built prior to 1978 they may contain lead based paint. Five of the twelve properties are vacant grass covered lots. An Asbestos Lead Paint and PCB Caulk Survey report was conducted on 596 Glenwood unit (See Appendix C).

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in 312.10 of 40CFR312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the target property. I have developed and performed all appropriate inquires in conformance with the standards and practices set forth in 40 CFR 312.

Peter J. Gorton, MPH; CHCM **Date:**

In accordance with the ASTM Standard, A Phase I Environmental Assessment must be performed by an environmental professional meeting certain minimal requirements. BE3 credentials far exceed these minimum credentials. Resumes for individual that developed this Phase I Environmental Assessment are provided in **Appendix M**.

PHASE I ESA SITE BACKGROUND QUESTIONNAIRE

User Information:

Name:
Linda Stango

Title/Relation to Property:
Employee of the owner – Rochester Housing Authority

Address:
675 West Main Street

Rochester, New York 14611

Phone Number:
585.953.0888

Signature:

Please answer the following questions the best you can; write NA if the question is not applicable.

PROPERTY SPECIFICATIONS

Total Square Feet: The area of the buildings including apartments, community building and laundry spaces is approximately 80,910 sq. ft. Number of Units: 124

Legal Description:

General Description:

The property is a garden sytle complex of thirteen buildings on about 4.5 acres with 124 one-bedroom units which range in size from 575 sq. ft to 625 sq. ft. (depending on the layout and whether the porch is conditioned space.

Nearest intersection:
There are several intersections along this property, Merlin St., Glenwood Ave., Robin St., Kestrel St., and Santee St.

Approximate age of onsite buildings: The apartment buildings were constructed in 1971 (40 yrs. old). The community building was built in shortly thereafter (the drawings are dated March 1971). The DOFA date is 1973.

Does site have over 50 acres of undeveloped land: Yes No Unknown

Does site have over 1 acre of naturally vegetated land: Yes No Unknown

Identify any environmental proceedings involving the property such as any pending, threatened, or past litigation, administrative proceedings relative to hazardous or petroleum substances, or any notices of violations from a government entity regarding environmental substances.

_____

Provide a property survey and building layout diagrams. *Do you have these already? If not I can send.*

BACKGROUND & USE

Is the property currently used or has it previously been used as an industrial or manufacturing operation, gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard, landfill, or waste treatment, storage, disposal, processing or recycling facility?

The property is adjacent to the old Erie Canal and subsequently the abandoned subway bed. Subsurface investigation was undertaken in 2014. Yes No Unknown

Are any adjacent properties currently or have previously been used as an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard, landfill, or waste treatment, storage, disposal, processing or recycling facility?
Yes No Unknown

Are there any surface water bodies on the site (ponds, ditches, rivers, etc.?)
Yes No Unknown

If yes, is there an oil sheen or any discoloration to the surface water?
Yes No Unknown

Are there currently or have there been previously any damaged or discarded automotive or industrial batteries, pesticides, paints or other chemicals in individual containers greater than five gallons in volume or fifty gallons in aggregate, stored or used at the property?
Yes No Unknown

Are there currently or have there been previously any industrial drums or chemicals located on the property? Yes No Unknown

Are there currently or have there been previously any pits, ponds or lagoons on the property connected with waste water, waste treatment or waste disposal? Yes No Unknown

Has fill material been brought to the site, as may or may not be indicated by unusual mounds, depressions or sink holes? Yes No Unknown

If yes is there any evidence that the fill was anything but clean soil (i.e., trash, construction debris, etc.)? Yes No Unknown

Have any demolition debris, hazardous substances, petroleum products, unidentified waste materials, automotive or industrial batteries, tires, trash or refuse been dumped, buried or burned on the property? Yes No Unknown

Has the facility or the property ever generated, treated, stored, transported or disposed of hazardous waste or hazardous substances other than on an incidental basis? Yes No Unknown

If yes, what type of materials and what quantities?

Has any such hazardous waste or hazardous substance resulted in the occurrence of cleanup costs, liabilities or responsibilities? Yes No Unknown

Are there currently or have there been previously any underground storage tanks (USTs) on the property? Yes No Unknown

If yes, provide permits, closure reports and regulatory agency correspondence; and answer the following questions:

Is the tank still present? Yes No Unknown

Did the current tank replace a pre-existing tank? Yes No Unknown

Was contamination found when tank was closed/removed? Yes No Unknown

Was the tank installed prior to 1988? Yes No Unknown

Has a leak detection system been installed? Yes No Unknown

Has the tank ever been leak tested? Yes No Unknown

Did the tank(s) ever fail the leak test? Yes No Unknown

Has there ever been a reported or unreported release or spill (including failed leak tests from the tank? Yes No Unknown

Are there currently or have there been previously any above ground storage tanks (ASTs) on the property? Yes No Unknown

Has there ever been a reported or unreported release or spill from the AST?
Yes No Unknown

If yes, provide details.

Are there currently or previously to the best of your knowledge been any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property? Yes No Unknown

Are there currently or have there been previously any flooring, drains or walls located within the facility that are or have been stained by substances (or, in the case of drains, used for) other than water or are emanating foul odors? Yes No Unknown

Is there currently or has there been previously any stained soil or distressed vegetation on the property? Yes No Unknown

Is or has the property been served by a private water well? Yes No Unknown

If yes, is groundwater under the property used as a source of drinking water?
Yes No Unknown

Has the water from the well ever been tested? Yes No Unknown

If yes, provide details and submit diagrams/drawings.

N/A

Has the well water been identified as contaminated by any governmental agency or private entity?
Yes No Unknown

Are there any groundwater monitoring wells on the property? Yes No Unknown

If yes, provide details and submit diagrams/drawings.

Does the property discharge waste water on or adjacent to the property or into a municipal sanitary sewer system? Yes No Unknown

Are there any active, dormant or abandoned oil or natural gas wells on the property?
Yes No Unknown

Are there any oil, natural gas, water or sewer pipelines on the property that are not maintained by state or local utilities? Yes No Unknown

Are there any septic systems, dry wells or leach fields on the property? Yes No Unknown

If yes, submit diagrams/drawings.
Have hazardous substances or petroleum products ever been discharged to these systems?
Yes No Unknown

Are the systems properly permitted? Yes No Unknown

Are the systems operating property? Yes No Unknown

Has any monitoring or testing of the systems indicated that contaminants have been found to exceed standards or guidelines? Yes No Unknown

Is there a transformer, capacitor or any hydraulic equipment on the property or related facilities?
Yes No Unknown

Do records indicate the presence of PCBs related to same? Yes No Unknown

Has an environmental or compliance assessment, audit or survey ever been performed on the property or related facilities or structures? Yes No Unknown
If yes, did the environmental assessment indicate the presence of any potential environmental contamination or non-compliance with environmental law? Yes No Unknown
Was the contamination cleaned up or non-compliance corrected?
Yes No Unknown

Are there wetlands on the property? Yes No Unknown

Is the property or related facilities or intended use or development of the property the subject of state, federal or local environmental quality review act determinations or approvals (e.g., NEPA/SEQRA)?
Yes No Unknown

If yes, provide details.
Federal funds will be used to redevelop the property and a NEPA review will be required. The City will most likely require a SEQRA review.

Is the property or related facilities or intended use of the property dependent upon obtaining or maintaining environmental permits or approvals from governmental entities?
Yes No Unknown
If yes, if the permit or approval is not obtained, could this have a materially adverse effect on the intended use of the property or borrower's operations? Yes No Unknown

Is the property or related facilities or intended use of the property dependent upon continued use of any particular chemical substance? Yes No Unknown
If yes, is that chemical substance the subject of any actual or proposed phase-out or ban?
Yes No Unknown
Would the phase-out or ban have a materially adverse effect on the intended use of the property or borrower's operations? Yes No Unknown

Is the property or related facilities or intended use the subject of future expenditures for environmental or pollution control equipment or facilities during the term of the requested loan?
Yes No Unknown

If yes, what type of equipment will be required and what is the estimated aggregate cost of such expenditures?

If the requested loan is a construction loan, please provided details (on separate sheet) of each permit or approval related to the construction; involved governmental agencies; schedule; anticipated review and approval process; and any known opposition to the constructed or intended future use of the property.

Has the soil on the property ever been tested? Yes No Unknown

If yes, have any contaminants been identified which exceed standards or guidelines levels?
Yes No Unknown

Besides soil and groundwater, has there been any sampling and analysis of air or other environmental media at the property?
Yes No Unknown

If yes, did any of the results indicate a release or threat of a release of a hazardous substance?
Yes No Unknown
If yes, did any of the results indicate contamination in any environmental media which exceed any standard or guidelines? Yes No Unknown

BUILDING CONDITIONS

Asbestos-Containing Materials

Is there any evidence of insulation or fire retardant materials such as pipe wrap and wall/pipe spray within the buildings on the property? Yes No Unknown

Are there any residential structures onsite that were built prior to 1978?
Yes No Unknown

Were any Asbestos-Containing Materials (ACMs) observed on the property?
Yes No Unknown

Are any of the building materials friable? Yes No Unknown

Was an asbestos survey ever conducted? Yes No Unknown
If yes, provide details.
An asbestos, Lead Paint and PCB Caulk Survey was completed in September 2020.

Lead Paint

Is any visible evidence of paint peeling, cracking, or flaking noticed?	Yes	No	Unknown
Is there any evidence of lead paint containers being stored onsite?	Yes	No	Unknown
Is lead-based paint present at the structure?	Yes	No	Unknown

Polychlorinated Biphenyls (PCBs)

Are any transformers, electrical devices, fluorescent ballasts, or equipment stored or observed on the property labeled as containing PCBs?	Yes	No	Unknown
Is there any evidence of PCB contamination or leaks observed?	Yes	No	Unknown
Do the structures have fluorescent light fixtures?	Yes	No	Unknown

Other Hazardous Substances

Do You Know the Type Of Insulation?	Yes	No	Unknown
If yes, provide details.			

Does the structure contain urea formaldehyde insulation?	Yes	No	Unknown
If yes, has the insulation been installed for less than ten years?	Yes	No	Unknown
Is there any evidence that radiological materials such as found in laboratories, medical equipment, or industrial operations may be used on the property?	Yes	No	Unknown
Is there any evidence that pesticides (including insecticides, fungicides, and rodenticides) have been manufactured or used on the property?	Yes	No	Unknown
Are you aware of elevated levels of radon present in the site vicinity?	Yes	No	Unknown
Is there reason to suspect radon to be a problem at the site?	Yes	No	Unknown

Radon

Has radon screening been conducted at the site? Yes No Unknown
If yes, provide details.

Has a radon reduction system been installed? Yes No Unknown
If yes, provide details.

Does the local health department have any information on radon onsite? Yes No Unknown

ADJACENT P ROPERTIES

Do any of the sites adjacent to the subject site exhibit any of the potential issues identified in the hazards checklist above.
If yes, provide details.

The surrounding properties are primarily residential, there are a few vacant lots towards the southern end of the property. The west side is the abandoned subway bed, which has be filled.

SPECIAL RESOURCES

Is there any reason to believe that there are or may be any archaeological resources on the property that have not been destroyed by human activity? Yes No Unknown

Has the property recently been developed, excavated, mined, graded or otherwise disturbed by human activity over all or nearly all of this area? Yes No Unknown

Is this property covered or nearly covered by buildings or pavement that are less than 50 years old? Yes No Unknown

Is this property located in a region known to contain significant fossil collections or remnants of organisms of a past geologic age? Yes No Unknown

Is there any evidence that the property has a designated natural landmark, buildings that are more than 50 years old, or buildings that are less than 50 years old but may be considered historically architecturally, archaeologically, or culturally significant? Yes No Unknown

Could this property be considered a place where a significant event or pattern of events occurred such as a battlefield or prehistoric settlement? Yes No Unknown

Could this property be considered part of a Historic District (over 50 years old)? Yes No Unknown

Are there any coastal areas, rivers, streams, springs, lakes, ponds, swamps, marshes, or other waterbodies on or immediately adjacent to the property? Yes No Unknown

If yes, is there any reason to believe that the waterbodies are protected under federal, state, or local law? Yes No Unknown

Is the area located within 1,000 feet of a shoreline that is developed with industrial, commercial, or high-density residential uses which have eliminated or significantly degraded any existing coastal or beach resources? Yes No Unknown

Does the property contain natural features which could be used for public recreational purposes? Yes No Unknown

Has any study been done on the property to assess wetlands, the presence of threatened and endangered species or critical and unique habitat? Yes No Unknown

SWBR Architects and Engineers
Eastman Place
387 East Main Street
Rochester, NY 14604-2107

Attention: Tim Zigarowicz, AIA

Reference: Glenwood Commons - Settlement Assessment
318 to 334 Santee Street, Rochester, New York
Geotechnical Evaluation, 3827.0

Dear Tim:

This letter report outlines our findings and conclusions relative to the Glenwood Commons settlement within Units No. 318 to 334. This study consisted of reviewing the available plans of the existing structure, defining the conditions around/under the building, and developing recommendations to remediate the issues. SWBR Architects and Engineers commissioned this work. This report is intended for their use in developing plans to address the settlement issues.

We understand that the floor inside No. 322 Santee Street has experienced settlement. The floor has settled at least 1-inch; cracking has developed in some of the exterior walls. We understand that dry wall has been installed to cover cracking in the brick walls that separate the units. Some other units on the western end (from Unit 318 to Unit 334) are also experiencing settlement.

Glenwood Commons lies at the north end of Santee Street in Rochester, New York. Units 318 to 334 were built as part of the Phase 2 development in the early 1970's. The existing building plans show that the exterior foundations were designed to bear at a four foot depth on a two foot wide

spread footing. The exterior footing was designed to bear on native soil, bedrock, or gravel compacted to 95 percent. The interior bearing wall was designed on a 'haunched' floor slab; no notes required adjusting the bearing elevation of the interior slab to ensure adequate support for the interior load bearing wall. The water, sewer, and gas services run along the south edge of the building; the electric, telephone, and storm sewers run along the north side. We understand that RHA has had issues with the water main leaking/breaking in front of Unit 330, where some of the worst settlement is occurring.

To assess the settlement issues, we performed four test borings around the building perimeter and two cores/floor subgrade probes inside the building. We retained Nothnagle Drilling to perform the exterior test borings. They provided an ATV mounted drill-rig on February 28, 2014 for the work. Soil samples were recovered in three of the borings; the fourth was augured to refusal on the bedrock surface. The borings range from 13.6 to 17.5 feet below grade. No auger spoils were generated; the holes were backfilled using a dry concrete mix. A *Boring Location Plan* and the boring logs are attached to this report.

To assess conditions inside the building, we retained Target Drilling to assist in coring the floor slab at two locations inside of Unit 322 and recovering floor subgrade samples. The sub-floor exploration work was performed on March 4, 2014. One four-inch diameter hole was cut in the slab in the center of the living room. Two, 8-inch diameter cores were cut, side by side, near the exterior wall within the bedroom. The sub-soil was sampled by hand excavating with post-hole equipment and by driving a 2-inch diameter split-spoon sampler using a 35-pound hammer by hand. The sub-soils were sampled to a depth of 5.5 and 15.5 feet. The core locations have been plotted on the *Boring Location Plan*. The core logs are attached.

We encountered topsoil over interbedded soil/ash-laden fill, glacial till, then bedrock. The near-surface fill material consists of two to four feet of sand fill with trace silt and trace gravel. The deeper fills consists of interbedded earth and white to black, wood-ash fill containing lesser amounts of brick and concrete. The earth layers are typically silty sand to sandy silt. The fill extends about eleven feet below the surface. The underlying native soil is a loose to compact sandy silt with gravel.

The drillers encountered auger refusal, likely on the bedrock surface, 13 to 17 feet below the surface. Geologic mapping shows bedrock as the Rochester Formation. This formation consists of black shale, with thin layers of dolomite in the upper part of the formation.

The drillers noted groundwater during the sampling and on completion of the drilling work. They noted wet or saturated soil samples recovered below the depth of four feet. Water had collected in the augers during the drilling operations to a level 6.1 feet below the surface. The groundwater levels will fluctuate with seasonal and climatic changes.

The existing floor slab consists of 3¼ to 4½ inches of concrete, containing wire mesh ¼ to ½ inches from the bottom of the concrete. The concrete dropped about ¼ to ½ inch after coring, indicating that a similar size void exists under the slab. The concrete is underlain by 39 to 48 inches of sand fill, similar to the material found outside the building. Loose to firm ash fills were noted below the sand.

At the exterior foundation wall, we probed back to expose the insulation foam placed along the inside of the exterior wall. We followed the foundation wall down to a depth of 36 inches below the bottom of the floor molding (original slab elevation). No spread footing was encountered under the foundation wall; we suspect this may be an unformed, trench-poured foundation.

It is our opinion that the in-place ash-laden fill is the cause of the settlement being experienced. This ash-layer has consolidated under the in-place soil and building weight over the 40 year life of the structure. Due to the nature of the deposit, we believe this material will continue to consolidate as the unburnt portion of the fill decomposes. Based on the amount of settlement that we observed, we believe that as much as 1-inch of settlement in 10 years should be expected.

We offer the two options for repairing these units: live with the continuing settlement and associated repairs or stabilize the structure by underpinning the walls and installing a structural floor slab.

Specifically, we offer the following thoughts:

Repair the Unit without addressing the Cause of the Settlement

Re-level the existing floor slab, casting a leveling course over the in-place slab. Up to four inches of new concrete could be required in areas with the worse amount of settlement. Placing this leveling course will result in adding new weight/load on the in-place fill material; the new load will lead to more consolidation of the ash and long term settlement. A light-weight concrete could be used to minimize this new load. Based on the current loading, we believe that as much as ½ inch settlement (1½ -inches in 10 years total) should be expected. This will result in more cracking developing in the interior and exterior walls and more floor settlement developing that will need to be addressed.

Underpin the Load Bearing Walls/Structural Floor Slabs

To stabilize the Units, the load bearing walls would need to be underpinned to bedrock. To this end, we recommend installing helical piles around the perimeter of the Units to support the in-place foundation wall. Brackets would be installed on the piles that slide under the foundation to support the walls. The existing 16-inch wide wall may require strengthening/re-enforcing in order to span between the helical piles.

We believe that a 6-inch helix mounted on a 2⅝-inch shaft would yield a 20 kip allowable pile. Higher capacity piles could be achievable using a larger helix and/or shaft. These piles would need to penetrate 13 to 17 feet below the surface, terminating at 8,000 foot-pounds of torque or 'spin-out' on the bedrock surface. Since these pile configurations tend to be proprietary, we recommend that the geotechnical engineer review the submitted pile configurations and installation procedures prior to starting the work. At least one load test should be performed at the beginning of the pile installation to confirm that the allowable capacity submitted can be achieved. All subsequent piles should be observed by the engineer to document the pile installation records.

To stabilize the floor slab, additional helical piles would need to be installed within the building. Part of the wall would need to be removed to allow access for a bob-cat size piece of equipment. Piles could be installed after the existing slab-on-grade has been removed or through holes cored in the existing slab. Where the existing slab will be salvaged and supported, floor jacking brackets can be used to slide under the existing slab.

Sub-floor utilities (storm, sanitary, water, gas, etc.) may also bear on the in-place fill material. Once the slab is supported these utilities will pull away from the slab as the fill continues to consolidate. If the slab is supported, we recommend hanging the sub-floor utilities from the structurally support slab to keep these lines from breaking under the structure.

This concludes our evaluation. Forward a copy of the near final plans and specifications for our review and comment. It has been a pleasure working with you on this project and we look forward to hearing from you again as the project proceeds toward construction.

Very truly yours,

FOUNDATION DESIGN, P.C.

Jeffrey D. Netzband, P.E.
Vice President
Enc.

Important Information about Your

Geotechnical Engineering Report

Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.

While you cannot eliminate all such risks, you can manage them. The following information is provided to help.

Geotechnical Services Are Performed for Specific Purposes, Persons, and Projects

Geotechnical engineers structure their services to meet the specific needs of their clients. A geotechnical engineering study conducted for a civil engineer may not fulfill the needs of a construction contractor or even another civil engineer. Because each geotechnical engineering study is unique, each geotechnical engineering report is unique, prepared *solely* for the client. No one except you should rely on your geotechnical engineering report without first conferring with the geotechnical engineer who prepared it. *And no one — not even you* — should apply the report for any purpose or project except the one originally contemplated.

Read the Full Report

Serious problems have occurred because those relying on a geotechnical engineering report did not read it all. Do not rely on an executive summary. Do not read selected elements only.

A Geotechnical Engineering Report Is Based on A Unique Set of Project-Specific Factors

Geotechnical engineers consider a number of unique, project-specific factors when establishing the scope of a study. Typical factors include: the client's goals, objectives, and risk management preferences; the general nature of the structure involved, its size, and configuration; the location of the structure on the site; and other planned or existing site improvements, such as access roads, parking lots, and underground utilities. Unless the geotechnical engineer who conducted the study specifically indicates otherwise, do not rely on a geotechnical engineering report that was:

- not prepared for you,
- not prepared for your project,
- not prepared for the specific site explored, or
- completed before important project changes were made.

Typical changes that can erode the reliability of an existing geotechnical engineering report include those that affect:

- the function of the proposed structure, as when it's changed from a parking garage to an office building, or from a light industrial plant to a refrigerated warehouse,
- elevation, configuration, location, orientation, or weight of the proposed structure,
- composition of the design team, or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project changes—even minor ones—and request an assessment of their impact. *Geotechnical engineers cannot accept responsibility or liability for problems that occur because their reports do not consider developments of which they were not informed.*

Subsurface Conditions Can Change

A geotechnical engineering report is based on conditions that existed at the time the study was performed. *Do not rely on a geotechnical engineering report* whose adequacy may have been affected by: the passage of time; by man-made events, such as construction on or adjacent to the site; or by natural events, such as floods, earthquakes, or groundwater fluctuations. *Always* contact the geotechnical engineer before applying the report to determine if it is still reliable. A minor amount of additional testing or analysis could prevent major problems.

Most Geotechnical Findings Are Professional Opinions

Site exploration identifies subsurface conditions only at those points where subsurface tests are conducted or samples are taken. Geotechnical engineers review field and laboratory data and then apply their professional judgment to render an opinion about subsurface conditions throughout the site. Actual subsurface conditions may differ—sometimes significantly—from those indicated in your report. Retaining the geotechnical engineer who developed your report to provide construction observation is the most effective method of managing the risks associated with unanticipated conditions.

A Report's Recommendations Are *Not* Final

Do not overrely on the construction recommendations included in your report. *Those recommendations are not final,* because geotechnical engineers develop them principally from judgment and opinion. Geotechnical engineers can finalize their recommendations only by observing actual

subsurface conditions revealed during construction. *The geotechnical engineer who developed your report cannot assume responsibility or liability for the report's recommendations if that engineer does not perform construction observation.*

A Geotechnical Engineering Report Is Subject to Misinterpretation

Other design team members' misinterpretation of geotechnical engineering reports has resulted in costly problems. Lower that risk by having your geotechnical engineer confer with appropriate members of the design team after submitting the report. Also retain your geotechnical engineer to review pertinent elements of the design team's plans and specifications. Contractors can also misinterpret a geotechnical engineering report. Reduce that risk by having your geotechnical engineer participate in prebid and preconstruction conferences, and by providing construction observation.

Do Not Redraw the Engineer's Logs

Geotechnical engineers prepare final boring and testing logs based upon their interpretation of field logs and laboratory data. To prevent errors or omissions, the logs included in a geotechnical engineering report should *never* be redrawn for inclusion in architectural or other design drawings. Only photographic or electronic reproduction is acceptable, *but recognize that separating logs from the report can elevate risk.*

Give Contractors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can make contractors liable for unanticipated subsurface conditions by limiting what they provide for bid preparation. To help prevent costly problems, give contractors the complete geotechnical engineering report, *but* preface it with a clearly written letter of transmittal. In that letter, advise contractors that the report was not prepared for purposes of bid development and that the report's accuracy is limited; encourage them to confer with the geotechnical engineer who prepared the report (a modest fee may be required) and/or to conduct additional study to obtain the specific types of information they need or prefer. A prebid conference can also be valuable. *Be sure contractors have sufficient time* to perform additional study. Only then might you be in a position to give contractors the best information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions.

Read Responsibility Provisions Closely

Some clients, design professionals, and contractors do not recognize that geotechnical engineering is far less exact than other engineering disciplines. This lack of understanding has created unrealistic expectations that have led to disappointments, claims, and disputes. To help reduce the risk of such outcomes, geotechnical engineers commonly include a variety of explanatory provisions in their reports. Sometimes labeled "limitations" many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

Geoenvironmental Concerns Are Not Covered

The equipment, techniques, and personnel used to perform a *geoenvironmental* study differ significantly from those used to perform a *geotechnical* study. For that reason, a geotechnical engineering report does not usually relate any geoenvironmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated environmental problems have led to numerous project failures.* If you have not yet obtained your own geoenvironmental information, ask your geotechnical consultant for risk management guidance. *Do not rely on an environmental report prepared for someone else.*

Obtain Professional Assistance To Deal with Mold

Diverse strategies can be applied during building design, construction, operation, and maintenance to prevent significant amounts of mold from growing on indoor surfaces. To be effective, all such strategies should be devised for the *express purpose* of mold prevention, integrated into a comprehensive plan, and executed with diligent oversight by a professional mold prevention consultant. Because just a small amount of water or moisture can lead to the development of severe mold infestations, a number of mold prevention strategies focus on keeping building surfaces dry. While groundwater, water infiltration, and similar issues may have been addressed as part of the geotechnical engineering study whose findings are conveyed in this report, the geotechnical engineer in charge of this project is not a mold prevention consultant; ***none of the services performed in connection with the geotechnical engineer's study were designed or conducted for the purpose of mold prevention. Proper implementation of the recommendations conveyed in this report will not of itself be sufficient to prevent mold from growing in or on the structure involved.***

Rely, on Your ASFE-Member Geotechncial Engineer for Additional Assistance

Membership in ASFE/The Best People on Earth exposes geotechnical engineers to a wide array of risk management techniques that can be of genuine benefit for everyone involved with a construction project. Confer with your ASFE-member geotechnical engineer for more information.

1.0 INTRODUCTION AND PROJECT OVERVIEW

Lu Engineers was retained by Rochester Housing Authority to provide an asbestos, lead paint and PCB caulk survey of the building located at 596 Glenwood Avenue, in Rochester, New York. This survey was performed in anticipation of upcoming renovations to the building.

The asbestos, lead paint and PCB caulk survey was conducted on August 21, 2020 and September 4, 2020. The intent of this survey was to determine the presence and quantity of asbestos containing materials, lead paint and PCB containing caulk. The asbestos survey was conducted in accordance with New York State Department of Labor (NYSDOL) Industrial Code Rule (ICR) 56 by certified inspectors from Lu Engineers. A copy of Lu Engineers' license and inspectors' certifications can be found in Attachment A.

1.1 Records Review

Record drawings of the building or previous surveys were not available for review prior to conducting the asbestos survey.

2.0 SITE INSPECTION

2.1 Asbestos

One of the purposes of the visual inspection was to identify homogeneous areas of suspect asbestos containing materials that exist throughout the area of inspection, as defined in the scope of work. The Asbestos Hazard Emergency Response Act (AHERA) regulations define a homogeneous area as, "… an area of surfacing material, thermal insulation material, or miscellaneous material that is uniform in color and texture." Furthermore, homogeneous areas should consist of the same age and application.

The inspectors identified homogeneous areas that were present within the building. The suspect asbestos materials were given a homogeneous identification number based on color and texture of the material. A list of homogeneous area numbers of the materials encountered is included with the Asbestos Result Table in Section 3.1. Each room was given an identification (ID) number. The room ID number correlates with the ID number found on the Field Data Sheet in Attachment B. The Field Data Sheet details the specific homogenous materials identified within each room/space.

Occupational Safety and Health Administration (OSHA) and 40 CFR 763 Subpart E – Asbestos Hazard Emergency Response Act (AHERA) bulk sampling protocols were followed.

- Three (3) samples of a homogenous surfacing material in quantities of 1,000 Square Feet (SF) or less were collected.

- Five (5) samples of a homogenous surfacing material in quantities greater than 1,000 SF but less than 5,000 SF were collected.
- Seven (7) samples of a homogenous surfacing material in quantities greater than 5,000 SF were collected.
- Three (3) samples of Thermal System Insulation (TSI) material were collected.
- Two (2) samples of each miscellaneous material were collected.

The suspect asbestos containing materials were extracted using various hand tools, containerized and labeled with unique sample identification numbers. Samples were submitted to the laboratory using standard chain of custody protocols.

Paradigm Environmental Services was the New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program (ELAP) approved laboratory used for analysis. A copy of Paradigm's credentials is located in Attachment A.

Friable samples were analyzed using NYS ELAP Method 198.1, Polarized Light Microscopy (PLM). Non-friable organically bound (NOB) samples were analyzed using NYS ELAP Method 198.6 (PLM) and, if found to be negative, NYS ELAP Method 198.4, Transmission Electron Microscopy (TEM). All Samples were analyzed via stop positive protocols meaning that once a positive sample of a series was found, the other samples were not analyzed.

Fifty-seven (57) bulk samples were collected from the building as part of this project.

The sample identification number indicated on the Bulk Sample Location Plan corresponds to the homogeneous ID numbers which are also located on the laboratory analytical report and the chain of custody forms. The Bulk Sample Location Plan, laboratory analytical report and the chain of custody forms are included in Attachment C.

2.2 PCB Caulks

Eight (8) suspect PCB caulks were sampled during Lu Engineer's site investigation. The sample locations are indicated on the Sample Location Plans included in Attachment C. The sample number indicated on the plans corresponds to the sample numbers on the laboratory analytical report and the chain of custody which are included in Attachment C.

The samples were submitted to Paradigm Environmental Services, Inc, an NYSDOH certified laboratory. Bulk PCB samples were analyzed using EPA Method 8082. Paradigm's laboratory credentials are included in Attachment A.

2.3 Lead Paint

Lu Engineers conducted a lead-based paint inspection for this project on September 4, 2020. A total of two (2) bulk lead paint samples were collected from several painted surfaces. The sample locations are indicated on the Sample Location Plans included in Attachment C. The sample number indicated on the plans corresponds to the sample numbers on the laboratory analytical report and the chain of custody which are included in Attachment C.

The samples were submitted to Paradigm Environmental Services, Inc., an ELAP-certified laboratory. A copy of Paradigms laboratory credentials is included in Attachment A. Results of Lu Engineer's visual assessment are included in Section 3.3.

3.0 ANALYTICAL RESULTS

3.1 Asbestos Results

As defined by the New York State Department of Labor (NYSDOL) 12 NYCRR 56, a sample is considered to be asbestos containing if it contains greater than 1% asbestos by weight based on laboratory analysis.

A list of Homogeneous Areas (HA) identified for the building area surveyed is included below. The **bold** and ***italicized*** HA description indicates that the material is positive, based on the sample results.

Homogeneous Area No. (HA)	Description	Condition	Friability	Asbestos Content
1	Grey Drywall – Newer	Good	F	NAD
2	White Joint Compound – Newer	Good	F	NAD
3	Tan Tape – Newer	Good	NF	NAD
4	Brown Paneling	Fair	NF	NAD
5	Tan Paneling Adhesive	Fair	NF	NAD
6	Tan 12" x 12" Floor Tile	Good	NF	NAD
7	Tan Floor Tile Mastic	Good	NF	Trace Chrysotile <1.0%
8	Dark Brown Cove Base	Fair	NF	NAD
9	White Cove Base Adhesive	Fair	NF	NAD
10	White Caulk on Kitchen Countertop	Good	NF	NAD
11	Grey Drywall – Original	Good	F	NAD
12	***Tan Joint Compound – Original***	***Good***	***F***	***Chrysotile 3.5%***
13	Tan Tape – Original	Good	NF	NAD
14	White Interior Caulk	Good	NF	NAD

Homogeneous Area No. (HA)	Description	Condition	Friability	Asbestos Content
15	***Tan Textured Ceiling***	***Good***	***F***	***Chrysotile 3.3%***
16	Tan Sink Undercoating	Good	NF	NAD
17	***Tan Caulk between Sliding Door and Brick***	***Good***	***NF***	***Chrysotile 4.2%***
18	***Grey Caulk between Sliding door and Brick***	***Good***	***NF***	***Chrysotile 4.6%***
19	Brown Caulk on Sliding Door Trim	Good	NF	NAD
20	Red Caulk on Porch Window between Brick and Trim	Good	NF	NAD
21	White Exterior Caulk on Porch Window between Trim and Siding	Good	NF	NAD
22	Tan Ceramic Floor Tile	Good	NF	NAD
23	Tan Grout	Good	NF	NAD
24	***Brown Ceramic Floor Adhesive***	***Good***	***NF***	***Chrysotile 1.5%***
25	White Ceramic Wall Tile	Good	NF	NAD
26	White Grout	Good	NF	NAD
27	Tan Ceramic Wall Adhesive	Good	NF	NAD
28	Tan Exterior Caulk between Window and Siding	Good	NF	NAD

NAD – No Asbestos Detected
F – Friable; NF – Non-Friable

3.2 PCB Caulk Results

EPA defines PCB bulk waste, “as waste derived from manufactured products containing PCBs in a non-liquid state, at any concentration where the concentration at the time of designation for disposal was > 50 ppm PCBs”. Solid wastes containing 50 ppm by weight or greater are listed hazardous wastes in New York State (6 NYCRR Part 371.4(C)).

The following table summarizes the PCB sampling results:

Sample No.	Description	PCB Content (ppm)	Asbestos Containing
PCB-10	White Caulk on Kitchen Countertop	<5.00	No
PCB-14	White Interior Caulk	<3.94	No
PCB-17	Tan Caulk between Sliding Door and Brick	<5.68	Yes
PCB-18	Grey Caulk between Sliding door and Brick	<4.90	Yes
PCB-19	Brown Caulk on Sliding Door Trim	<4.76	No
PCB-20	Red Caulk on Porch Window between Brick and Trim	<3.40	No

Sample No.	Description	PCB Content (ppm)	Asbestos Containing
PCB-21	White Exterior Caulk on Porch Window between Trim and Siding	<3.07	No
PCB-28	Tan Exterior Caulk between Window and Siding	<4.27	No

A ***bold and italicized*** Sample number indicates that the building material has a PCB concentration that is equal to or greater than 50 ppm based on analytical results.

3.3 Lead Paint Results

According to the United States Environmental Protection Agency (EPA), paint is considered lead-based if the concentration is equal to or greater than 0.5% by weight.

According to the Occupational Safety and Health Administration (OSHA), lead means metallic lead, all inorganic lead compounds and organic soaps with any concentrations of lead. Therefore, all samples collected are considered lead containing per OSHA standards.

Lu Engineers collected a total of two (2) bulk lead paint samples from various locations of the building. The samples were submitted to Paradigm Environmental Services, Inc., an ELAP-certified laboratory. A list of the areas sampled for this survey is included below. The **bold** and ***italicized*** description indicates that the material is positive for lead per EPA standards, based on the sample results.

Sample No.	Description	Lead Conc. (% by Wt.)
LP-1	Black Paint	0.0290
LP-2	White Paint	0.00439

4.0 ASBESTOS MATERIALS AND APPROXIMATE QUANTITIES

Asbestos exists throughout the inspected areas. Based on the analytical results, the following table identifies the Homogeneous Areas that contain asbestos along with the material description and approximate quantity.

Homogeneous Area No. (HA)	Description	Approximate Quantity
12	Tan Joint Compound	1,189 SF
15	Tan Textured Ceiling	544 SF
17	Tan Caulk	30 LF
18	Grey Caulk	30 LF
24	Brown Adhesive (Under Ceramic Tile Floor)	33 SF

SF = Square Feet LF = Linear Feet

5.0 LIMITATIONS OF THE INVESTIGATION

This report has been prepared for the exclusive use of the client. This report relies on information supplied by the building owner, employees, tenants and other sources of information. Lu Engineers has prepared this report in accordance with generally accepted practices within the industry.

This report identifies and assesses the location, quantity, and condition of materials that were accessible and visible at the time of sampling. The condition of the suspect materials is based on the actual inspection date. The quantities indicated in the report are based on the visual inspection and are only estimates of the material present. Additional quantities may exist above ceilings, behind walls or in areas of the building beyond the scope of the survey.

This survey is not intended to be an abatement design. Per NYCRR 56, an abatement design must be completed by a certified Project Designer.

This survey is intended to be a pre-renovation survey and has looked at areas expected to be impacted by removal of flooring, cabinets, fixtures and windows. The client anticipates that more work will eventually occur, such as removing walls.

6.0 RECOMMENDATIONS

6.1 Asbestos Containing Materials

Asbestos containing materials have been identified as part of this assessment as shown in Section 4.0. The locations of asbestos containing materials and a summary of quantities are included in Attachment D. A mercury containing thermostat was identified attached to asbestos containing walls which should be properly disposed of as hazardous waste.

In accordance with 12 NYCRR 56, no renovation or demolition work shall be commenced by any owner or agent prior to completion of asbestos abatement performed by a licensed asbestos abatement contractor. NYSDOL regulations require that the asbestos containing material that will be disturbed by the renovation or demolition be removed prior to any disturbance of the material.

If suspect asbestos containing materials not identified in this asbestos survey report are discovered during the demolition and/or renovation process; it is required that the presence, location and quantity of newly discovered material, be conveyed within twenty-four (24) hours of discovery to the building owner or their representative. All activities must cease in the area where the presumed asbestos containing material or suspect miscellaneous ACM is found, until a licensed asbestos contractor appropriately assesses and manages the discovered materials.

6.2 PCB Caulk

Caulks containing 50 parts per million (ppm) by weight (on a dry weight basis for other than liquid wastes) or greater of PCBs may be listed as hazardous waste in accordance with New York State Department of Conservation regulations (6 NYCRR Part 371). PCB wastes are also regulated by EPA in the 40 CFR Part 761 regulations.

There were no PCB containing caulks identified as part of this survey.

6.3 Lead Paint

According to the United States Environmental Protection Agency (USEPA), paint is considered lead based if the concentration is equal to or greater than 0.5% by weight. The Occupational Safety and Health Administration (OSHA) Regulation in 29 CFR 1926.62 considers any amount of lead in paint to be of concern. The regulation states that the employer shall assure that no employee is exposed to lead concentrations greater than fifty micrograms per cubic meter (50 mg/m^3) of air averaged over an eight hour period.

There was no lead paint identified as part of this survey.

Duly Authorized Representative – Susan Hilton:

This license has been issued in accordance with applicable provisions of Article 30 of the Labor Law of New York State and of the New York State Codes, Rules and Regulations (12 NYCRR Part 56). It is subject to suspension or revocation for a (1) serious violation of state, federal or local laws with regard to the conduct of an asbestos project, or (2) demonstrated lack of responsibility in the conduct of any job involving asbestos or asbestos material.

This license is valid only for the contractor named above and this license or a photocopy must be prominently displayed at the asbestos project worksite. This license verifies that all persons employed by the licensee on an asbestos project in New York State have been issued an Asbestos Certificate, appropriate for the type of work they perform, by the New York State Department of Labor.

WADSWORTH CENTER

Expires 12:01 AM April 01, 2021
Issued April 01, 2020

CERTIFICATE OF APPROVAL FOR LABORATORY SERVICE

Issued in accordance with and pursuant to section 502 Public Health Law of New York State

MR. STEVE DEVITO
PARADIGM ENVIRONMENTAL SERVICES INC
179 LAKE AVENUE
ROCHESTER, NY 14608

NY Lab Id No: 10958

is hereby APPROVED as an Environmental Laboratory for the category
ENVIRONMENTAL ANALYSES SOLID AND HAZARDOUS WASTE
All approved subcategories and/or analytes are listed below:

Miscellaneous

Asbestos in Friable Material	Item 198.1 of Manual
	EPA 600/M4/82/020
Asbestos in Non-Friable Material-PLM	Item 198.6 of Manual (NOB by PLM)
Asbestos in Non-Friable Material-TEM	Item 198.4 of Manual
Lead in Dust Wipes	EPA 6010C
Lead in Paint	EPA 6010C

Sample Preparation Methods

EPA 3050B

Serial No.: 61258

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. Continued accreditation depends on successful ongoing participation in the Program. Consumers are urged to call (518) 485-5570 to verify the laboratory's accreditation status.

CERTIFICATE OF APPROVAL FOR LABORATORY SERVICE

Issued in accordance with and pursuant to section 502 Public Health Law of New York State

MR. STEVE DEVITO
PARADIGM ENVIRONMENTAL SERVICES INC
179 LAKE AVENUE
ROCHESTER, NY 14608

NY Lab Id No: 10958

is hereby APPROVED as an Environmental Laboratory in conformance with the National Environmental Laboratory Accreditation Conference Standards (2003) for the category ENVIRONMENTAL ANALYSES SOLID AND HAZARDOUS WASTE
All approved analytes are listed below:

Nitrosoamines	
N-Nitrosodiphenylamine	EPA 8270D
Petroleum Hydrocarbons	
Diesel Range Organics	EPA 8015D
Phthalate Esters	
Benzyl butyl phthalate	EPA 8270D
Bis(2-ethylhexyl) phthalate	EPA 8270D
Diethyl phthalate	EPA 8270D
Dimethyl phthalate	EPA 8270D
Di-n-butyl phthalate	EPA 8270D
Di-n-octyl phthalate	EPA 8270D
Polychlorinated Biphenyls	
Aroclor 1016 (PCB-1016)	EPA 8082A
Aroclor 1016 (PCB-1016) in Oil	EPA 8082A
Aroclor 1221 (PCB-1221)	EPA 8082A
Aroclor 1221 (PCB-1221) in Oil	EPA 8082A
Aroclor 1232 (PCB-1232)	EPA 8082A
Aroclor 1232 (PCB-1232) in Oil	EPA 8082A
Aroclor 1242 (PCB-1242)	EPA 8082A
Aroclor 1242 (PCB-1242) in Oil	EPA 8082A
Aroclor 1248 (PCB-1248)	EPA 8082A
Aroclor 1248 (PCB-1248) in Oil	EPA 8082A
Aroclor 1254 (PCB-1254)	EPA 8082A
Aroclor 1254 (PCB-1254) in Oil	EPA 8082A
Aroclor 1260 (PCB-1260)	EPA 8082A
Polychlorinated Biphenyls	
Aroclor 1260 (PCB-1260) in Oil	EPA 8082A
Aroclor 1262 (PCB-1262)	EPA 8082A
Aroclor 1262 (PCB-1262) in Oil	EPA 8082A
Aroclor 1268 (PCB-1268)	EPA 8082A
Aroclor 1268 (PCB-1268) in Oil	EPA 8082A
Polynuclear Aromatic Hydrocarbons	
Acenaphthene	EPA 8270D
Acenaphthylene	EPA 8270D
Anthracene	EPA 8270D
Benzo(a)anthracene	EPA 8270D
Benzo(a)pyrene	EPA 8270D
Benzo(b)fluoranthene	EPA 8270D
Benzo(g,h,i)perylene	EPA 8270D
Benzo(k)fluoranthene	EPA 8270D
Chrysene	EPA 8270D
Dibenzo(a,h)anthracene	EPA 8270D
Fluoranthene	EPA 8270D
Fluorene	EPA 8270D
Indeno(1,2,3-cd)pyrene	EPA 8270D
Naphthalene	EPA 8270D
Phenanthrene	EPA 8270D
Pyrene	EPA 8270D
Priority Pollutant Phenols	
2,3,4,6 Tetrachlorophenol	EPA 8270D
2,4,5-Trichlorophenol	EPA 8270D

Serial No.: 61257

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. 5-B	59411	Living Room Wall West	Tan Paneling Adhesive	Inconclusive No Asbestos Detected	0%	√	None Detected	<1.0%	None Detected	100%

KEY TO NOB COLUMN SYMBOLS
No Symbol in the NOB column denotes sample analyzed by ELAP Method 198.1 (PLM).
√ NOB (non-friable organically bound)denotes material analyzed by ELAP Method 198.6 (PLM) and 198.4 (TEM) as noted.
V̂ denotes material analyzed by ELAP Method 198.6 (PLM) per NYSDOH. This Method does not remove vermiculite and may underestimate the level of asbestos present in a sample containing greater than 10% vermiculite.
 # denotes friable material analyzed by ELAP Method 198.6 (PLM) and 198.4 (TEM) as noted.
X denotes sample prepped only by ELAP Method 198.6.
**** Polarized-light microscopy is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials.**
Quantitative transmission electron microscopy is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos containing.

PLM Bulk Asbestos Analysis by New York State Department of Health, ELAP Method 198.1 ,198.4 and 198.6 ("Polarized Light Microscopy and Transmission Electron Microscopy Methods for Identifying and Quantitating Asbestos in Bulk Samples and in Non-Friable Organically Bound Bulk Samples.")or EPA 600/M4-82-020 per 40 CFR 763 (NVLAP Lab Code 200530-0),

KEY TO NOB COLUMN SYMBOLS
No Symbol in the NOB column denotes sample analyzed by ELAP Method 198.1 (PLM).
V NOB (non-friable organically bound)denotes material analyzed by ELAP Method 198.6 (PLM) and 198.4 (TEM) as noted.
V̄ denotes material analyzed by ELAP Method 198.6 (PLM) per NYSDOH. This Method does not remove vermiculite and may underestimate the level of asbestos present in a sample containing greater than 10% vermiculite.
 # denotes friable material analyzed by ELAP Method 198.6 (PLM) and 198.4 (TEM) as noted.
X denotes sample prepped only by ELAP Method 198.6.
**** Polarized-light microscopy is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials.**
Quantitative transmission electron microscopy is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos containing.

PLM Bulk Asbestos Analysis by New York State Department of Health, ELAP Method 198.1 ,198.4 and 198.6 ("Polarized Light Microscopy and Transmission Electron Microscopy Methods for Identifying and Quantitating Asbestos in Bulk Samples and in Non-Friable Organically Bound Bulk Samples.")or EPA 600/M4-82-020 per 40 CFR 763 (NVLAP Lab Code 200530-0),

Analytical Report For

Lu Engineers, Inc.

For Lab Project ID

203960

Referencing

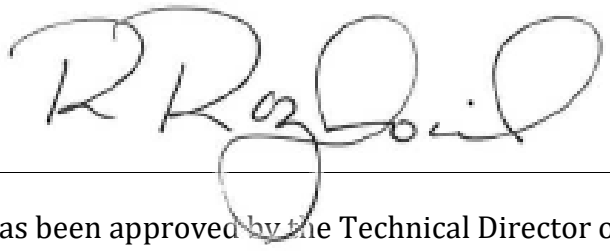
40609-41, RHA-Glenwood Apartment

Prepared

Friday, August 28, 2020

Any noncompliant QC parameters or other notes impacting data interpretation are flagged or documented on the final report or are noted below:

Reduced sample size used for PCB analysis due to limited sample volume. Kindly refer to Chain of Custody Supplement for the affected sample(s).



Certifies that this report has been approved by the Technical Director or Designee

179 Lake Avenue • Rochester, NY 14608 • (585) 647-2530 • Fax (585) 647-3311 • ELAP ID# 10958

This report is part of a multipage document and should only be evaluated in its entirety. The Chain of Custody provides additional sample information, including compliance with the sample condition requirements upon receipt.

Analytical Report Appendix

The reported results relate only to the samples as they have been received by the laboratory.

Each page of this document is part of a multipage report. This document may not be reproduced except in its entirety, without the prior consent of Paradigm Environmental Services, Inc.

All soil/sludge samples have been reported on a dry weight basis, unless qualified “reported as received”. Other solids are reported as received.

Low level Volatiles blank reports for soil/solid matrix are based on a nominal 5 gram weight. Sample results and reporting limits are based on actual weight, which may be more or less than 5 grams.

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

NYSDOH ELAP does not certify for all parameters. Paradigm Environmental Services or the indicated subcontracted laboratory does hold certification for all analytes where certification is offered by ELAP unless otherwise specified. Aliquots separated for certain tests, such as TCLP, are indicated on the Chain of Custody and final reports with an “A” suffix.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of analyte-specific, frequently used data flags and their meaning:

“<” = Analyzed for but not detected at or above the quantitation limit.
“E” = Result has been estimated, calibration limit exceeded.
“Z” = See case narrative.
“D” = Sample, Laboratory Control Sample, or Matrix Spike Duplicate results above Relative Percent Difference limit.
“M” = Matrix spike recoveries outside QC limits. Matrix bias indicated.
“B” = Method blank contained trace levels of analyte. Refer to included method blank report.
“J” = Result estimated between the quantitation limit and half the quantitation limit.
"L" = Laboratory Control Sample recovery outside accepted QC limits.
“P” = Concentration differs by more than 40% between the primary and secondary analytical columns.
"NC" = Not calculable. Applicable to RPD if sample or duplicate result is non-detect or estimated (see primary report for data flags). Applicable to MS if sample is greater or equal to ten times the spike added. Applicable to sample surrogates or MS if sample dilution is 10x or higher.
"" = Indicates any recoveries outside associated acceptance windows. Surrogate outliers in samples are presumed matrix effects. LCS demonstrates method compliance unless otherwise noted.*
"(1)" = Indicates data from primary column used for QC calculation.
"A" = denotes a parameter for which ELAP does not offer approval as part of their laboratory certification program.
"F" = denotes a parameter for which Paradigm does not carry certification, the results for which should therefore only be used where ELAP certification is not required, such as personal exposure assessment.

GENERAL TERMS AND CONDITIONS
LABORATORY SERVICES

These Terms and Conditions embody the whole agreement of the parties in the absence of a signed and executed contract between the Laboratory (LAB) and Client. They shall supersede all previous communications, representations, or agreements, either verbal or written, between the parties. The LAB specifically rejects all additional, inconsistent, or conflicting terms, whether printed or otherwise set forth in any purchase order or other communication from the Client to the LAB. The invalidity or unenforceability in whole or in part of any provision, tern or condition hereof shall not affect in any way the validity or enforceability of the remainder of the Terms and Conditions. No waiver by LAB of any provision, term, or condition hereof or of any breach by or obligation of the Client hereunder shall constitute a waiver of such provision, term, or condition on any other occasion or a waiver of any other breach by or obligation of the Client. This agreement shall be administered and interpreted under the laws of the state which services are procured.

Warranty. Recognizing that the nature of many samples is unknown and that some may contain potentially hazardous components, LAB warrants only that it will perform testing services, obtain findings, and prepare reports in accordance with generally accepted analytical laboratory principles and practices at the time of performance of services. LAB makes no other warranty, express or implied.

Scope and Compensation. LAB agrees to perform the services described in the chain of custody to which these terms and conditions are attached. Unless the parties agree in writing to the contrary, the duties of LAB shall not be construed to exceed the services specifically described. LAB wi use LAB default method for all tests unless specified otherwise on the Work Order.
Payment terms are net 30 days from the date of invoice. All overdue payments are subject to an interest charge of one and one-half percent (1-1/2%) per month or a portion thereof. Client shall also be responsible for costs of collection, including payment of reasonable attorney fees if such expense is incurred. The prices, unless stated, do not include any sale, use or other taxes. Such taxes will be added to invoice prices when required.

Prices. Compensation for services performed will be based on the current Lab Analytical Fee Schedule or on quotations agreed to in writing by the parties. Turnaround time based charges are determined from the time of resolution of all work order questions. Testimony, court appearances or data compilation for legal action will be charged separately. Evaluation and reporting of initial screening runs may incur additional fees.

Limitations of Liability. In the event of any error, omission, or other professional negligence, the sole and exclusive responsibility of LAB shall be to re-perform the deficient work at its own expense and LAB shall have no other liability whatsoever. All claims shall be deemed waived unless made in writing and received by LAB within ninety (90) days following completion of services.
LAB shall have no liability, obligation, or responsibility of any kind for losses, costs, expenses, or other damages (including but not limited to any special, direct, incidental or consequential damages) with respect to LAB's services or results.
All results provided by LAB are strictly for the use of its clients and LAB is in no way responsible for the use of such results by clients or third parties. All reports should be considered in their entirety, and LAB is not responsible for the separation, detachment, or other use of any portion of these reports. Client may not assign the lab report without the written consent of the LAB.
Client covenants and agrees, at its/his/her sole expense, to indemnify, protect, defend, and save harmless the LAB from and against any and all damages, losses, liabilities, obligations, penalties, claims, litigation, demands, defenses, judgments, suits, actions, proceedings, costs, disbursements and/or expenses (including, without limitation attorneys' and experts' fees and disbursements) of any kind whatsoever which may at any time be imposed upon, incurred by or asserted or awarded against client relating to, resulting from or arising out of (a) the breach of this agreement by this client, (b) the negligence of the client in handling, delivering or disclosing any hazardous substance, (c) the violation of the Client of any applicable law, (d) non-compliance by the Client with any environmental permit or (e) a material misrepresentation in disclosing the materials to be tested.

Hazard Disclosure. Client represents and warrants that any sample delivered to LAB will be preceded or accompanied by complete written disclosure of the presence of any hazardous substances known or suspected by Client. Client further warrants that any sample containing any hazardous substance that is to be delivered to LAB will be packaged, labeled, transported, and delivered properly and in accordance with applicable laws.

Sample Handling. Prior to LAB's acceptance of any sample (or after any revocation of acceptance), the entire risk of loss or of damage to such sample remains with Client. Samples are accepted when receipt is acknowledged on chain of custody documentation. In no event will LAB have any responsibility for the action or inaction of any carrier shipping or delivering any sample to or from LAB premises.
Client authorizes LAB to proceed with the analysis of samples as received by the laboratory, recognizing that any samples not in compliance with all current DOH-ELAP-NELAP requirements for containers, preservation or holding time will be noted as such on th final report.
Disposal of hazardous waste samples is the responsibility of the Client. If the Client does not wish such samples returned, LAB may add storage and disposal fees to the final invoice. Maximum storage time for samples is 30 days after completion of analysis unless modified by applicable state or federal laws. Client will be required to give the LAB written instructions concerning disposal of these samples.
LAB reserves the absolute right, exercisable at any time, to refuse to receive delivery of, refuse to accept, or revoke acceptance of any sample, which, in the sole judgment of LAB (a) is of unsuitable volume, (b) may be or become unsuitable for or may pose a risk in handling, transport, or processing for any health, safety, environmental or other reason whether or not due to the presence in the sample of any hazardous substance, and whether or not such presence has been disclosed to LAB by Client or (c) if the condition or sample date make the sample unsuitable for analysis.

Legal Responsibility. LAB is solely responsible for performance of this contract, and no affiliated company, director, officer, employee, or agent shall have any legal responsibility hereunder, whether in contract or tort including negligence.

Assignment. LAB may assign its performance obligations under this contract to other parties, as it deems necessary. LAB shall disclose to Client any assignee (subcontractor) by ELAP ID # on the submitted final report.

Force Majeure. LAB shall have no responsibility or liability to the Client for any failure or delay in performance by LAB, which results in whole or in part from any cause or circumstance beyond the reasonable control of LAB. Such causes and circumstances shall include, but not limited to, acts of God, acts or orders of any government authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, difficulties or delays in transportation, mail or delivery services, inability to obtain sufficient services or supplies from LAB's usual suppliers, or any other cause beyond LAB's reasonable control.

Law. This contract shall be continued under the laws of the State of New York without regard to its conflicts of laws provision.

Analytical Report For

Lu Engineers, Inc.

For Lab Project ID

204212

Referencing

40609-41, RHA Glenwood Ave Apartment

Prepared

Thursday, September 10, 2020

Any noncompliant QC parameters or other notes impacting data interpretation are flagged or documented on the final report or are noted below:

Reduced sample size used for Lead analysis due to limited sample volume. Kindly refer to Chain of Custody Supplement for the affected sample(s).

Certifies that this report has been approved by the Technical Director or Designee

This report is part of a multipage document and should only be evaluated in its entirety. The Chain of Custody provides additional sample information, including compliance with the sample condition requirements upon receipt.

GENERAL TERMS AND CONDITIONS
LABORATORY SERVICES

These Terms and Conditions embody the whole agreement of the parties in the absence of a signed and executed contract between the Laboratory (LAB) and Client. They shall supersede all previous communications, representations, or agreements, either verbal or written, between the parties. The LAB specifically rejects all additional, inconsistent, or conflicting terms, whether printed or otherwise set forth in any purchase order or other communication from the Client to the LAB. The invalidity or unenforceability in whole or in part of any provision, tern or condition hereof shall not affect in any way the validity or enforceability of the remainder of the Terms and Conditions. No waiver by LAB of any provision, term, or condition hereof or of any breach by or obligation of the Client hereunder shall constitute a waiver of such provision, term, or condition on any other occasion or a waiver of any other breach by or obligation of the Client. This agreement shall be administered and interpreted under the laws of the state which services are procured.

Warranty. Recognizing that the nature of many samples is unknown and that some may contain potentially hazardous components, LAB warrants only that it will perform testing services, obtain findings, and prepare reports in accordance with generally accepted analytical laboratory principles and practices at the time of performance of services. LAB makes no other warranty, express or implied.

Scope and Compensation. LAB agrees to perform the services described in the chain of custody to which these terms and conditions are attached. Unless the parties agree in writing to the contrary, the duties of LAB shall not be construed to exceed the services specifically described. LAB wi use LAB default method for all tests unless specified otherwise on the Work Order.
Payment terms are net 30 days from the date of invoice. All overdue payments are subject to an interest charge of one and one-half percent (1-1/2%) per month or a portion thereof. Client shall also be responsible for costs of collection, including payment of reasonable attorney fees if such expense is incurred. The prices, unless stated, do not include any sale, use or other taxes. Such taxes will be added to invoice prices when required.

Prices. Compensation for services performed will be based on the current Lab Analytical Fee Schedule or on quotations agreed to in writing by the parties. Turnaround time based charges are determined from the time of resolution of all work order questions. Testimony, court appearances or data compilation for legal action will be charged separately. Evaluation and reporting of initial screening runs may incur additional fees.

Limitations of Liability. In the event of any error, omission, or other professional negligence, the sole and exclusive responsibility of LAB shall be to re-perform the deficient work at its own expense and LAB shall have no other liability whatsoever. All claims shall be deemed waived unless made in writing and received by LAB within ninety (90) days following completion of services.
LAB shall have no liability, obligation, or responsibility of any kind for losses, costs, expenses, or other damages (including but not limited to any special, direct, incidental or consequential damages) with respect to LAB's services or results.
All results provided by LAB are strictly for the use of its clients and LAB is in no way responsible for the use of such results by clients or third parties. All reports should be considered in their entirety, and LAB is not responsible for the separation, detachment, or other use of any portion of these reports. Client may not assign the lab report without the written consent of the LAB.
Client covenants and agrees, at its/his/her sole expense, to indemnify, protect, defend, and save harmless the LAB from and against any and all damages, losses, liabilities, obligations, penalties, claims, litigation, demands, defenses, judgments, suits, actions, proceedings, costs, disbursements and/or expenses (including, without limitation attorneys' and experts' fees and disbursements) of any kind whatsoever which may at any time be imposed upon, incurred by or asserted or awarded against client relating to, resulting from or arising out of (a) the breach of this agreement by this client, (b) the negligence of the client in handling, delivering or disclosing any hazardous substance, (c) the violation of the Client of any applicable law, (d) non-compliance by the Client with any environmental permit or (e) a material misrepresentation in disclosing the materials to be tested.

Hazard Disclosure. Client represents and warrants that any sample delivered to LAB will be preceded or accompanied by complete written disclosure of the presence of any hazardous substances known or suspected by Client. Client further warrants that any sample containing any hazardous substance that is to be delivered to LAB will be packaged, labeled, transported, and delivered properly and in accordance with applicable laws.

Sample Handling. Prior to LAB's acceptance of any sample (or after any revocation of acceptance), the entire risk of loss or of damage to such sample remains with Client. Samples are accepted when receipt is acknowledged on chain of custody documentation. In no event will LAB have any responsibility for the action or inaction of any carrier shipping or delivering any sample to or from LAB premises.
Client authorizes LAB to proceed with the analysis of samples as received by the laboratory, recognizing that any samples not in compliance with all current DOH-ELAP-NELAP requirements for containers, preservation or holding time will be noted as such on th final report.
Disposal of hazardous waste samples is the responsibility of the Client. If the Client does not wish such samples returned, LAB may add storage and disposal fees to the final invoice. Maximum storage time for samples is 30 days after completion of analysis unless modified by applicable state or federal laws. Client will be required to give the LAB written instructions concerning disposal of these samples.
LAB reserves the absolute right, exercisable at any time, to refuse to receive delivery of, refuse to accept, or revoke acceptance of any sample, which, in the sole judgment of LAB (a) is of unsuitable volume, (b) may be or become unsuitable for or may pose a risk in handling, transport, or processing for any health, safety, environmental or other reason whether or not due to the presence in the sample of any hazardous substance, and whether or not such presence has been disclosed to LAB by Client or (c) if the condition or sample date make the sample unsuitable for analysis.

Legal Responsibility. LAB is solely responsible for performance of this contract, and no affiliated company, director, officer, employee, or agent shall have any legal responsibility hereunder, whether in contract or tort including negligence.

Assignment. LAB may assign its performance obligations under this contract to other parties, as it deems necessary. LAB shall disclose to Client any assignee (subcontractor) by ELAP ID # on the submitted final report.

Force Majeure. LAB shall have no responsibility or liability to the Client for any failure or delay in performance by LAB, which results in whole or in part from any cause or circumstance beyond the reasonable control of LAB. Such causes and circumstances shall include, but not limited to, acts of God, acts or orders of any government authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, difficulties or delays in transportation, mail or delivery services, inability to obtain sufficient services or supplies from LAB's usual suppliers, or any other cause beyond LAB's reasonable control.

Law. This contract shall be continued under the laws of the State of New York without regard to its conflicts of laws provision.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/26/2022 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

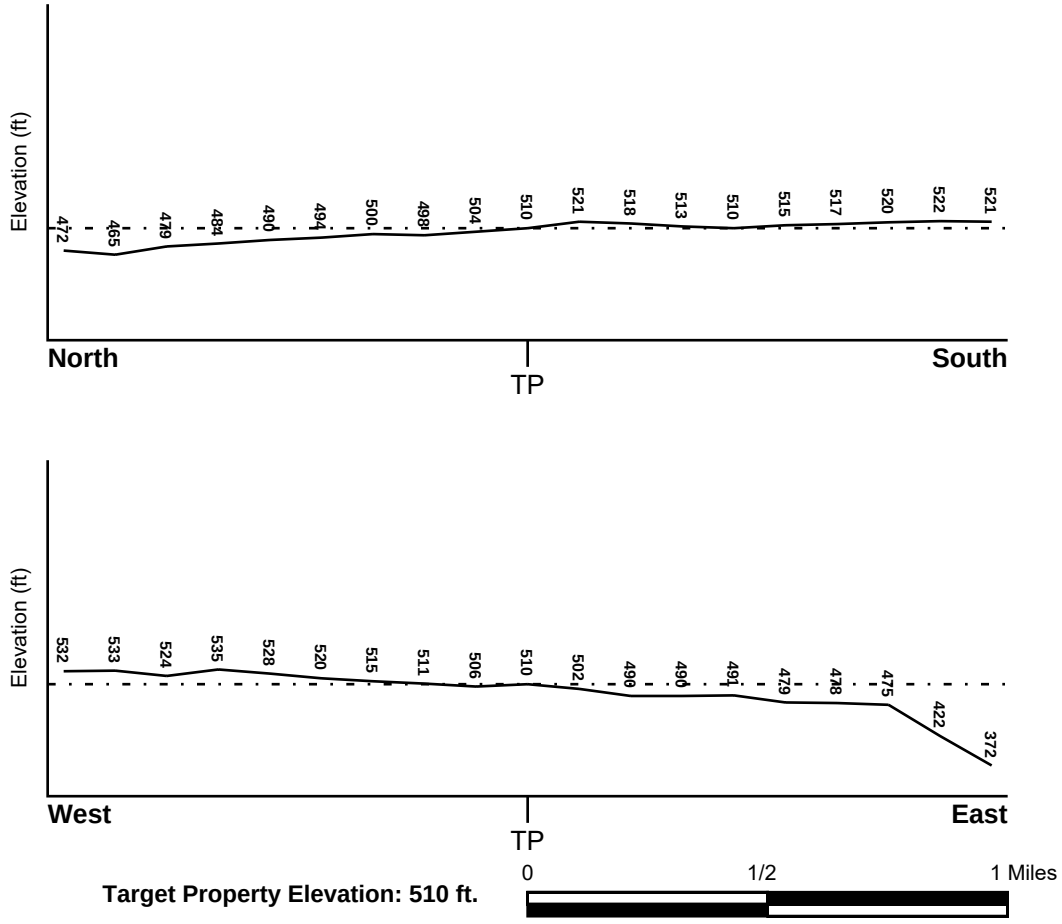
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
3	1/2 - 1 Mile West	NNE
1G	1/2 - 1 Mile West	NNE

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

TARGET PROPERTY FINDINGS

TARGET PROPERTY DETAIL

600 Glenwood Avenue
Rochester, NY 14613

600 GLENWOOD AVE

Date:	**2/23/2022**
Permit Type:	
Description:	**WATER MAIN REPAIR. 590 GLENWOO D AVE.**
Permit Description:	**PLUMBING**
Work Class:	Plumbing
Proposed Use:	
Permit Number:	1220564
Status:	
Valuation:	$5,000.00
Contractor Company:	
Contractor Name:	STEPHEN P. CASSIDY

Date:	**2/10/2022**
Permit Type:	
Description:	**COMMERCIAL RENOVATIONS ON TH E 1ST FLOOR- 1000 SQ FT. AKA 596 GLENWOOD AVE. THIS PERMIT DOES NOT LEGAI ZE USE OR OCCUPANCY.**
Permit Description:	**ELECTRICAL**
Work Class:	Electrical
Proposed Use:	
Permit Number:	1214773 E
Status:	
Valuation:	$6,000.00
Contractor Company:	
Contractor Name:	W ALTER C. GERULA

TARGET PROPERTY FINDINGS

Date:	**10/25/2021**
Permit Type:	
Description:	**INTERIOR AND EXTERIOR RENOVATIONS TO EXI STING MULTI FAMILY COMPLEX (596 GLEN- WOOD AVE).**
Permit Description:	
Work Class:	Change Use - Decrease in Units (Residential)
Proposed Use:	
Permit Number:	1214773
Status:	
Valuation:	$119,481.00
Contractor Company:	
Contractor Name:	FLEETWOO D ACCESSIB

Date:	**4/8/2021**
Permit Type:	
Description:	**FIXTURE REPLACEMENT AKA 596 GL ENWOOD AVE.**
Permit Description:	**PLUMBING**
Work Class:	Plumbing
Proposed Use:	
Permit Number:	1211425
Status:	
Valuation:	$6,300.00
Contractor Company:	
Contractor Name:	STEPHEN P. CASSIDY

Date:	**5/11/2012**
Permit Type:	
Description:	**ELECTRICAL: WIRING FOR A/C; HEAT PUMP AND INSTALL GFI OUTLET - 100 SQ.FT.**
Permit Description:	**ELECTRICAL**
Work Class:	ELECTRICAL PERMIT
Proposed Use:	
Permit Number:	1122202
Status:	
Valuation:	$1,900.00
Contractor Company:	
Contractor Name:	MATTHEW COCCIA

TARGET PROPERTY FINDINGS

Date:	**1/19/2011**
Permit Type:	
Description:	**PLUMBING: WATER SERVICE REPAIR - BLDG. 1 - GLENWOOD GARDENS**
Permit Description:	**PLUMBING**
Work Class:	PLUMBING
Proposed Use:	
Permit Number:	1110336
Status:	
Valuation:	$2,400.00
Contractor Company:	
Contractor Name:	STEPHEN P. CASSIDY

Date:	**5/31/2005**
Permit Type:	
Description:	**PLUMBING-REPAIR WATER LINE**
Permit Description:	**PLUMBING**
Work Class:	
Proposed Use:	PLUMBING
Permit Number:	1053859
Status:	
Valuation:	$1,000.00

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by BE3 were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by BE3 were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

MONROE COUNTY CLERK'S OFFICE

RECORDED

THIS INDENTURE made September 29, 1998

Between COUNTY OF MONROE, a New York municipal corporation, with its principal offices at 39 West Main Street, Rochester, New York 14614,

party of the first part, and

CITY OF ROCHESTER, a New York municipal corporation, with its principal offices at 30 Church Street, Rochester, New York 14614,

party of the second part,

Box 178 RMB

Witnesseth that the party of the first part, in consideration of One and 00/100==========Dollars **($1.00)**

lawful money of the United States,
paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second party forever,

ALL THAT TRACT AND PARCEL OF LAND, situate in the City of Rochester, County of Monroe and State of New York, being premises described on the assessment rolls of the City of Rochester and bearing Tax Account No. and street address as set forth on Schedule A attached hereto, such parcels having been previously assessed to the parties set forth on Schedule A attached hereto.

This conveyance is made and accepted subject to all covenants, easements and restrictions of record, if any, and now in effect.

Tax Account No.: (See attached Schedule A)

Property Address: (See attached Schedule A)

Being and intending to describe the same premises conveyed to the County of Monroe pursuant to In Rem Tax Foreclosure Action No. 127 by deed intended to be recorded immediately prior hereto.

Together *with the appurtenances and all the estate and rights of the party of the first part in and to said premises,*

To have and to hold *the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.*

And *the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.*

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

In Witness Whereof, *the party of the first part has duly executed this deed the day and year first above written.*

EDR Chain of Title

The EDR Chain of Title Report tracks a line of successive owners from the present back to 1981 of a particular parcel of property, linked together by recorded transactions which pass title. Available nationwide, this report provides a summary of a property's ownership history and is a valuable source for determining the prior uses of a property.

A network of professional abstractors following established procedures, uses client supplied address information to locate:

• Historical Chain of Title research

NOTICE:

DUE TO COVID-19 CONTAINMENT PROTOCOL, THE COUNTY RECORDER OFFICE IS CLOSED FOR THE FORESEEABLE FUTURE. OWNERSHIP HISTORY, TO THE EXTENT DATA AND DOCUMENTS WERE AVAILABLE ONLINE, WAS REVIEWED AND DOCUMENTED IN THE REPORT BACK TO 1981. RESEARCH OF HARDCOPY, ORIGINAL DEEDS, AND OTHER DOCUMENTS BACK TO 1940 ARE NOT AVAILABLE NOR REASONABLY ASCERTAINABLE AT THIS TIME.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

TAX FORECLOSURE DEED

Made this 16th day of November, 1993, between LOUIS N. KASH, as Corporation Counsel of the City of Rochester, with offices at 400A City Hall, Rochester, New York 14614, party of the first part, and CITY OF ROCHESTER, with offices at 30 Church Street, Rochester, New York 14614, party of the second part,

W I T N E S S E T H:

WHEREAS, an action entitled "In the Matter of the Foreclosure of Tax Liens Pursuant to Title 4 of Part E of Article IX of the Charter of the City of Rochester - List of Delinquent Taxes as of July 1, 1992", Index No. 12864/92, was duly brought in Supreme Court, Monroe County, by the Corporation Counsel for the foreclosure of certain tax liens, by the due filing of a List of Delinquent Taxes in the office of the Monroe County Clerk on November 20, 1992, and due publication of public notice of foreclosure on November 20, 1992 and other subsequent dates, and due mailing thereof to owners and lienors of all property affected, and

WHEREAS, at a term of the said court held at the Hall of Justice, in the City of Rochester, New York, on September 28, 1993, a Judgment was duly rendered, wherein it was adjudged, among other things, that the parcels listed on Schedule F to said Judgment be sold at public auction pursuant to Section 9-143 of the City Charter, and that the party of the first part, as Corporation Counsel of the City of Rochester, execute and deliver a deed for each parcel, conveying to the purchaser at the auction title to the parcel, and

WHEREAS, the said Judgment was duly entered in the Monroe County Clerk's Office on September 29, 1993, and

WHEREAS, a public auction was duly conducted by the City Treasurer on November 16, 1993, pursuant to the above-referenced Judgment, and the party of the second part submitted the highest responsible bid on the parcel or parcels of property listed below, and has duly paid the amount of such bid to the City Treasurer,

NOW, THEREFORE, the party of the first part, by virtue of and in pursuance of the aforesaid Judgment and the provisions of the Charter of the City of Rochester, does hereby grant and convey unto the party of the second part, its successors and assigns, a full and complete title in and to:

All that Tract or Parcel of Land, situate in the City of Rochester, County of Monroe, and State of New York, more particularly described as:

TAX ACCOUNT NO.	ADDRESS	FORMER OWNER'S NAME
SEE ATTACHED LIST		

free and clear of all liens and encumbrances which existed at the time of the above-referenced public auction,

TO HAVE AND TO HOLD, all and singular, the premises above mentioned and described and hereby conveyed unto the party of the second part, its successors and assigns forever.

IN WITNESS WHEREOF, the party of the first part has hereunto set his hand the date and year first above written.

LOUIS N. KASH
Corporation Counsel

STATE OF NEW YORK
COUNTY OF MONROE SS:
CITY OF ROCHESTER

On the 16th day of November, 1993, before me, the subscriber, personally appeared LOUIS N. KASH, Corporation Counsel of the City of Rochester, to me known to be the person described in, and who executed, the within Instrument and he acknowledged to me that he executed the same.

WARRANTY DEED

THIS INDENTURE, made the 22 day of October, 2002,

BETWEEN

NATHANIEL DEVELOPMENT CORP., with offices at 3955 Dewey Ave., Rochester, New York

party of the first part

and **ROCHESTER HOUSING AUTHORITY**, with offices at 675 W. Main St., Rochester, New York

party of the second part,

WITNESSETH, that the party of the first part, in consideration of One and 00/100 Dollar ($1.00), and other good and valuable consideration, lawful money of the United States, paid by the party of the second part, does hereby grant and release unto the party of the second part, its heirs, successors and assigns forever,

50x60 ESS

ALL THAT TRACT OR PARCEL OF LAND, situate in the City of Rochester, County of Monroe, and State of New York, known and designated as Lot No. 35 of the Kondolf and Brayer Tract on file in Monroe County Clerk's Office, it being a subdivision of the northwest part of the H. N. Curtis Farm so called, in said city as mapped by Horace Jones, Surveyor, August 1871, and filed in Liber 3 of Maps, page 25. Said Lot No. 35 is situate on the east side of Santee Street (formerly Seventh Street) and is 41 feet wide front and rear and 144 feet deep.

RECORDED
2002 OCT 22 PM 3:33
MONROE COUNTY CLERK

SUBJECT TO any and all other easements, covenants and restrictions, if any, affecting the said premises.

BEING AND INTENDING to convey the same premises conveyed to the grantors herein by Warranty Deed dated July 17, 1986 and recorded in the Monroe County Clerks office on July 18, 1986 in Liber 6936 at page 335.

Tax Acct. No.: 105.330-01-016
Property Address: 294 Santee St., Rochester, NY 14613
Tax billing address : 675 W. Main St., Rochester, NY 14611

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises,

TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, her heirs, successors and assigns forever.

AND, said party of the first part covenants as follows:

FIRST, that the party of the second part shall quietly enjoy the said premises;

SECOND, that said party of the first part will forever WARRANT the title to said premises.

THIRD, that, in Compliance with Section 13 of the Lien Law, the grantor will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

IN WITNESS WHEREOF, the parties of the first part have hereunto set their hands and seals as of the day and year first above written.

IN THE PRESENCE OF:

NATHANIEL DEVELOPMENT CORP.

By: _____ (L.S.)
FRANK ANDOLINO President

State of New York)
County of Monroe) ss.:

On this 22 day of October, 2002, before me, the undersigned, personally appeared Frank Andolino, personally known to me or proved to me on the basis of satisfactory evidence to be the individual whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his capacity as President of the **NATHANIEL DEVELOPMENT CORP.**, and that by his signature on the instrument, the individual, or the person upon behalf of which the individual acted, executed the instrument.

RECORDED
2014 MAR -4 AM 11:51
MONROE COUNTY CLERK

THIS INDENTURE, made the day of

BETWEEN Tommy Development LLC
2269 Lyell Avenue Suite 201
Rochester, NY 14606 party of the first part, and

In the City Off the Grid, LLC
164 Asbury Street
Rochester, NY 14620 party of the second part:

WITNESSETH, that the party of the first part, in consideration of

dollars, paid by the party of the second part does hereby remise, release and quitclaim unto the party of the second part, the heirs or successors and assigns of the party of the second part, forever,

ALL THAT TRACT OF PARCEL OF LAND, SITUATE IN THE CITY OF ROCHESTER, COUNTY OF MONROE AND STATE OF NEW YORK, IDENTIFIED ON THE CITY OF ROCHESTER ASSESSMENT ROLLS AS, SBL NO. 105.33-1-06, 55 PLOVER STREET 14613, FORMER OWNER TOMMY DEVELOPMENT LLC FREE & CLEAR OF ALL LIENS & ENCUMBRANCES THAT EXISTED AT THE TIME EXCEPT BACK REAL ESTATE TAXES AT THE TIME.

that tract or parcel of land situate in the City of Rochester, Monroe County, New York, described as follows:

Beginning at the southeast corner of Lot No. 32, as laid down and designated on map of Kondolf and Brayer Tract which map is filed in Liber 3 of Maps at page 25 in the Monroe County Clerk's Office; thence (1) south 89° 49' 10" west 144.00 feet to a point; thence (2) north 00° 22' 59" east 216.77 feet to a point; thence (3) south 55° 28' 40" east 173.97 feet to a point; thence (4) south 00° 22' 59" west 117.72 feet to the point or place of beginning, all as shown on a survey map made by Gary L. Dutton, L.L.S. dated September 18, 1985, a copy of which is attached hereto and made a part hereof.

Also all the right, title and interest which the party of the first part may have in and to that portion of Plover Street which extends in front of the above-described premises.

Being a part of the same premises deeded to the party of the first part by Deed dated January 27, 1967 and recorded on March 9, 1967 in the Monroe County Clerk's Office in Liber 3800 of Deeds at page 158.

PROPERTY ADDRESS: 55 PLOVER ST ROCHESTER, NY 14613
TAX ADDRESS: ~~SAME~~ 164 ASBURY STREET ROCHESTER, NY 14620

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises.
TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns forever. The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires. This deed is subject to the trust provisions of Section 13 of the Lien Law.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

MONROE COUNTY CLERK'S OFFICE

RECORDED

THIS INDENTURE made September 29, 1998

Between COUNTY OF MONROE, a New York municipal corporation, with its principal offices at 39 West Main Street, Rochester, New York 14614,

party of the first part, and

CITY OF ROCHESTER, a New York municipal corporation, with its principal offices at 30 Church Street, Rochester, New York 14614,

party of the second part,

Box 178 RMB

Witnesseth that the party of the first part, in consideration of One and 00/100==========Dollars **($1.00)**

lawful money of the United States,
paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second party forever,

ALL THAT TRACT AND PARCEL OF LAND, situate in the City of Rochester, County of Monroe and State of New York, being premises described on the assessment rolls of the City of Rochester and bearing Tax Account No. and street address as set forth on Schedule A attached hereto, such parcels having been previously assessed to the parties set forth on Schedule A attached hereto.

This conveyance is made and accepted subject to all covenants, easements and restrictions of record, if any, and now in effect.

Tax Account No.: (See attached Schedule A)

Property Address: (See attached Schedule A)

Being and intending to describe the same premises conveyed to the County of Monroe pursuant to In Rem Tax Foreclosure Action No. 127 by deed intended to be recorded immediately prior hereto.

Together *with the appurtenances and all the estate and rights of the party of the first part in and to said premises,*

To have and to hold *the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.*

And *the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.*

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

In Witness Whereof, *the party of the first part has duly executed this deed the day and year first above written.*

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

MONROE COUNTY CLERK'S OFFICE

RECORDED

THIS INDENTURE made September 29, 1998

Between COUNTY OF MONROE, a New York municipal corporation, with its principal offices at 39 West Main Street, Rochester, New York 14614,

party of the first part, and

CITY OF ROCHESTER, a New York municipal corporation, with its principal offices at 30 Church Street, Rochester, New York 14614,

party of the second part,

Box 178 RMB

Witnesseth that the party of the first part, in consideration of One and 00/100==========Dollars **($1.00)**

lawful money of the United States,
paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second party forever,

ALL THAT TRACT AND PARCEL OF LAND, situate in the City of Rochester, County of Monroe and State of New York, being premises described on the assessment rolls of the City of Rochester and bearing Tax Account No. and street address as set forth on Schedule A attached hereto, such parcels having been previously assessed to the parties set forth on Schedule A attached hereto.

This conveyance is made and accepted subject to all covenants, easements and restrictions of record, if any, and now in effect.

Tax Account No.: (See attached Schedule A)

Property Address: (See attached Schedule A)

Being and intending to describe the same premises conveyed to the County of Monroe pursuant to In Rem Tax Foreclosure Action No. 127 by deed intended to be recorded immediately prior hereto.

Together *with the appurtenances and all the estate and rights of the party of the first part in and to said premises,*

To have and to hold *the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.*

And *the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.*

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

In Witness Whereof, *the party of the first part has duly executed this deed the day and year first above written.*

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

TAX FORECLOSURE DEED

Made this 16th day of November, 1993, between LOUIS N. KASH, as Corporation Counsel of the City of Rochester, with offices at 400A City Hall, Rochester, New York 14614, party of the first part, and CITY OF ROCHESTER, with offices at 30 Church Street, Rochester, New York 14614, party of the second part,

W I T N E S S E T H:

WHEREAS, an action entitled "In the Matter of the Foreclosure of Tax Liens Pursuant to Title 4 of Part E of Article IX of the Charter of the City of Rochester - List of Delinquent Taxes as of July 1, 1992", Index No. 12864/92, was duly brought in Supreme Court, Monroe County, by the Corporation Counsel for the foreclosure of certain tax liens, by the due filing of a List of Delinquent Taxes in the office of the Monroe County Clerk on November 20, 1992, and due publication of public notice of foreclosure on November 20, 1992 and other subsequent dates, and due mailing thereof to owners and lienors of all property affected, and

WHEREAS, at a term of the said court held at the Hall of Justice, in the City of Rochester, New York, on September 28, 1993, a Judgment was duly rendered, wherein it was adjudged, among other things, that the parcels listed on Schedule F to said Judgment be sold at public auction pursuant to Section 9-143 of the City Charter, and that the party of the first part, as Corporation Counsel of the City of Rochester, execute and deliver a deed for each parcel, conveying to the purchaser at the auction title to the parcel, and

WHEREAS, the said Judgment was duly entered in the Monroe County Clerk's Office on September 29, 1993, and

WHEREAS, a public auction was duly conducted by the City Treasurer on November 16, 1993, pursuant to the above-referenced Judgment, and the party of the second part submitted the highest responsible bid on the parcel or parcels of property listed below, and has duly paid the amount of such bid to the City Treasurer,

NOW, THEREFORE, the party of the first part, by virtue of and in pursuance of the aforesaid Judgment and the provisions of the Charter of the City of Rochester, does hereby grant and convey unto the party of the second part, its successors and assigns, a full and complete title in and to:

All that Tract or Parcel of Land, situate in the City of Rochester, County of Monroe, and State of New York, more particularly described as:

TAX ACCOUNT NO.	ADDRESS	FORMER OWNER'S NAME
SEE ATTACHED LIST		

free and clear of all liens and encumbrances which existed at the time of the above-referenced public auction,

TO HAVE AND TO HOLD, all and singular, the premises above mentioned and described and hereby conveyed unto the party of the second part, its successors and assigns forever.

IN WITNESS WHEREOF, the party of the first part has hereunto set his hand the date and year first above written.

LOUIS N. KASH
Corporation Counsel

STATE OF NEW YORK
COUNTY OF MONROE SS:
CITY OF ROCHESTER

On the 16th day of November, 1993, before me, the subscriber, personally appeared LOUIS N. KASH, Corporation Counsel of the City of Rochester, to me known to be the person described in, and who executed, the within Instrument and he acknowledged to me that he executed the same.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

WARRANTY DEED

THIS INDENTURE, made the 22 day of October, 2002,

BETWEEN

NATHANIEL DEVELOPMENT CORP., with offices at 3955 Dewey Ave., Rochester, New York

party of the first part

and **ROCHESTER HOUSING AUTHORITY**, with offices at 675 W. Main St., Rochester, New York

party of the second part,

WITNESSETH, that the party of the first part, in consideration of One and 00/100 Dollar ($1.00), and other good and valuable consideration, lawful money of the United States, paid by the party of the second part, does hereby grant and release unto the party of the second part, its heirs, successors and assigns forever,

50x60 ESS

ALL THAT TRACT OR PARCEL OF LAND, situate in the City of Rochester, County of Monroe, and State of New York, known and designated as Lot No. 35 of the Kondolf and Brayer Tract on file in Monroe County Clerk's Office, it being a subdivision of the northwest part of the H. N. Curtis Farm so called, in said city as mapped by Horace Jones, Surveyor, August 1871, and filed in Liber 3 of Maps, page 25. Said Lot No. 35 is situate on the east side of Santee Street (formerly Seventh Street) and is 41 feet wide front and rear and 144 feet deep.

RECORDED
2002 OCT 22 PM 3:33
MONROE COUNTY CLERK

SUBJECT TO any and all other easements, covenants and restrictions, if any, affecting the said premises.

BEING AND INTENDING to convey the same premises conveyed to the grantors herein by Warranty Deed dated July 17, 1986 and recorded in the Monroe County Clerks office on July 18, 1986 in Liber 6936 at page 335.

Tax Acct. No.: 105.330-01-016
Property Address: 294 Santee St., Rochester, NY 14613
Tax billing address : 675 W. Main St., Rochester, NY 14611

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises,

TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, her heirs, successors and assigns forever.

AND, said party of the first part covenants as follows:

FIRST, that the party of the second part shall quietly enjoy the said premises;

SECOND, that said party of the first part will forever WARRANT the title to said premises.

THIRD, that, in Compliance with Section 13 of the Lien Law, the grantor will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

IN WITNESS WHEREOF, the parties of the first part have hereunto set their hands and seals as of the day and year first above written.

IN THE PRESENCE OF:

NATHANIEL DEVELOPMENT CORP.

By: _____ (L.S.)
FRANK ANDOLINO President

RECORDED
2014 MAR -4 AM 11:51
MONROE COUNTY CLERK

THIS INDENTURE, made the day of

BETWEEN Tommy Development LLC
2269 Lyell Avenue Suite 201
Rochester, NY 14606 party of the first part, and

In the City Off the Grid, LLC
164 Asbury Street
Rochester, NY 14620 party of the second part:

WITNESSETH, that the party of the first part, in consideration of

dollars, paid by the party of the second part does hereby remise, release and quitclaim unto the party of the second part, the heirs or successors and assigns of the party of the second part, forever,

ALL THAT TRACT OF PARCEL OF LAND, SITUATE IN THE CITY OF ROCHESTER, COUNTY OF MONROE AND STATE OF NEW YORK, IDENTIFIED ON THE CITY OF ROCHESTER ASSESSMENT ROLLS AS, SBL NO. 105.33-1-06, 55 PLOVER STREET 14613, FORMER OWNER TOMMY DEVELOPMENT LLC FREE & CLEAR OF ALL LIENS & ENCUMBRANCES THAT EXISTED AT THE TIME EXCEPT BACK REAL ESTATE TAXES AT THE TIME.

that tract or parcel of land situate in the City of Rochester, Monroe County, New York, described as follows:

Beginning at the southeast corner of Lot No. 32, as laid down and designated on map of Kondolf and Brayer Tract which map is filed in Liber 3 of Maps at page 25 in the Monroe County Clerk's Office; thence (1) south 89° 49' 10" west 144.00 feet to a point; thence (2) north 00° 22' 59" east 216.77 feet to a point; thence (3) south 55° 28' 40" east 173.97 feet to a point; thence (4) south 00° 22' 59" west 117.72 feet to the point or place of beginning, all as shown on a survey map made by Gary L. Dutton, L.L.S. dated September 18, 1985, a copy of which is attached hereto and made a part hereof.

Also all the right, title and interest which the party of the first part may have in and to that portion of Plover Street which extends in front of the above-described premises.

Being a part of the same premises deeded to the party of the first part by Deed dated January 27, 1967 and recorded on March 9, 1967 in the Monroe County Clerk's Office in Liber 3800 of Deeds at page 158.

PROPERTY ADDRESS: 55 PLOVER ST ROCHESTER, NY 14613
TAX ADDRESS: ~~SAME~~ 164 ASBURY STREET ROCHESTER, NY 14620

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises.
TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns forever. The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires. This deed is subject to the trust provisions of Section 13 of the Lien Law.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

IN PRESENCE OF:

X Thomas R. Plantone L. S.
For Tommy Development L. S.

State of New York, County of Monroe ss.: ACKNOWLEDGMENT RPL309-a (Do not use outside New York State)

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1926 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by EDR. The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

DEC Memo:	"8/28/14: FILE REVIEW. SPILL REASSIGNED TO P MILLER FOR FOLLOWUP. ACCORDING TO TIM WALSH, SUSPECT IMPACTED FILL IS PRESENT AT THE SITE, POSSIBLY IMPACTED WITH SOLVENTS OR METALS. WALSH TO FIND RAVI ENGINEERING REPORT AND SAVE TO eDOCS. A MEETING ON THIS SPILL SITE IS SCHEDULED FOR 9/10/14 INCLUDING P MILLER OF SPILLS AND BART PUTZIG OF REMEDIATION UNIT. 8/28/14: EMAIL AND 'ENVIRONMENTAL SCREENING RESULTS' REPORT FROM RAVI ENGINEERING DATED 6/10/14 SAVED TO eDOCS. 09/10/2014: PM ATTENDS MEETING AT GLENWOOD GARDENS WITH BART PUTZIG - HWR, JOHN FRASER AND SCOTT HALLECK - MCHD, JIM MACKECKNIE - RAVI ENGINEERING (PROJECT MANAGER), LYNN STANGO - ROCHESTER HOUSING AUTHORITY AND OTHER REPRESENTAIVES OF GLENWOOD GARDENS TO DISCUSS CONTAMINATION ISSUES. APARTMENTS AT GLENWOOD GARDENS BUILT IN EARLY 1970'S ARE SETTLING AND THE HOUSING AUTHORITY IS ATTEMPTING TO DETERMINE WHAT CAN BE DONE TO REPAIR THE STRUCTURES. DURING THE GEOTECHNICAL WORK CONTAMINATION WAS ENCOUNTERED OVER MUCH OF THE SITE THAT APPEARS TO BE ASH. THE ASH WAS FOUND TO CONTAIN VARIOUS CONCENTRATION OF METALS AND SEMI VOLATILE COMPOUNDS. 12/11/15: PM/DD FILE REVIEW - NO ADDITIONAL INFORMATION FOUND. DD CONTACTS JIM MACKECKNIE AT RAVI ENGINEERING (585-223-3660) - STATED LOW LEVELS OF NON-PETROLEUM COMPOUNDS IN SOILS ACROSS THE SITE. RAVI TRIED TO GET GUIDANCE ON MONROE COUNTY HEALTH DEPT AS WELL AS NYSDOH REGARDING DEVELOPING A SOIL MANAGEMENT PLAN (AND HAVENT HEARD BACK TO DATE). NO REMEDIAL WORK WAS DONE AND HE DID NOT THINK ANY SOIL HAD BEEN DISTURBED/TAKEN OFFSITE. THEY WOULD LIKE TO DEVELOP A SOILS MANAGEMENT PLAN THAT COULD BE DISTRIBUTED AND FOLLOWED SHOULD SOILS BE DISTURBED IN THE FUTURE, BUT WANTED GUIDANCE FIRST. AT THIS POINT THERE IS NO INVOLVEMENT FROM DEC'S HAZARDOUS WASTE/REMEDIATION UNIT BASED ON SOIL LEVELS ENCOUNTERED IN THE PAST. RAVI TO SEND DEC SPILLS AN EMAIL SUMMARIZING CURRENT STATUS AND INCLUDE COPIES OF EMAILS/INFO SENT TO MONROE COUNTY HEALTH DEPT. 1/17/20: SPILL REASSIGNED TO GY. THE PLAN IS TO CALL JIM MACKECKNIE OF RAVI TO SEE IF THERE ARE ANY

ROCHESTER HOUSING AUTHORITY, 41 KESTREL STREET, ROCHESTER, NY 14613 (Continued)

UPDATES, AND THEN TOUCH BASE WITH MCHD AND NYSDOH REGARDING ANY ACTIONS THEY HAVE TAKEN SINCE 12/11/15. 2/4/20: EMAIL SENT TO MACKECKNIE TO SEE IF THERE ARE ANY UPDATES ON THIS SITE. EMAIL RECEIVED FROM MACKECKNIE THAT STATES IN PART: We gave recommendations to the Rochester Housing Authority in 2015, but nothing was completed on our part as we did not receive authorization to proceed. EMAIL SENT TO LINDA STANGO OF THE ROCHESTER HOUSING AUTHORITY (UNKNOWN IF SHE STILL WORKS THERE; ASSUMED TO BE THE LYNN STANGO REFERENCED IN THE 9/10/14 ENTRY ABOVE), THE EMAIL STATES IN PART: My former supervisor retired and I was assigned the above-referenced spill, which is Glenwood Gardens. I saw your name in our database notes, so I am reaching out to you. Do you know if anything was ever done to address the settlement issues discovered in 2014, and if that involved removing any of the contamination/ash material from the site? Also, Ravi Engineering was going to prepare a Soil Management Plan in the event that contaminated soil/ash was discovered in the future, but it sounds like that was not done. Do you know if that was prepared by another company? 2/7/20: EMAIL RECEIVED FROM LINDA STANGO THAT STATES IN PART: Good Afternoon. I am the person that you want to speak with. TO the best of my knowledge we have not removed any of the soil from the site nor has anything been done to mitigate the issue. I am not sure if we have a plan prepared, I was thinking that we would do one before we did any work. 2/19/20: GY SEARCHES THE REMEDIATION DATABASE, THE SITE IS NOT LISTED. EMAIL SENT TO JOHN FRAZER OF MCHD TO SEE IF THEY HAVE HAD ANY ADDITONAL INVOLVEMENT. 3/4/20: NO RESPONSE FROM FRAZER, GY SEES HIM AT A MEETING AND HE REPORTS HE HAS NO ADDITIONAL KNOWLEDGE OF THE SITE. 3/5/20: BASED ON THE AMOUNT OF TIME ELAPSED AND THE APPARENT LACK OF ACTIVITY OR ACTION AT THE SITE, THIS SPILL IS BEING CLOSED. IF CONTAMINATED MATERIALS ARE ENCOUNTERED DURING ANY FUTURE ACTIVITIES AT THE SITE, THE SPILL MAY BE REOPENED (OR A NEW SPILL REPORT GENERATED, OR OTHER APPROPRIATE REGULATORY NOTIFICATIONS MADE [TO NYSDEC HAZ WASTE REMEDIATION FOR EXAMPLE]) AND ADDITIONAL INVESTIGATORY OR REMEDIAL WORK MAY BE REQUIRED. "

Remarks: "CALLER STATES THAT SOIL SAMPLES TAKEN FROM SITE SHOWING SEMI-VOLITILES AND METALS. TO FORWARD REPORT TO DEPARTMENT."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The Click here to access additional FINDS: detail in the EDR Site Report. database contains http://www.edrnet.com/srf2/FinalSiteReport.aspx?ID=2U2SUp1ASw8bpu5aA21EwA2Ybo2lua9caz4i226UE22zU41LSC78pe1aAzAlwf3Fb34Xu23da13z2q2JU52SSi1PpZ8LA22Twp3qbb9ZuT2kao9e2q54EX0WAR3OYAtbox2lUB22SJ1opV2mAd1iwF11bK1CuG6aaY6w2s5fEHAKAK5aYU2doI1 additional records for this site. Please contact your EDR Account Executive for more information.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TW 12/21/98: TW TELEPHONE CONVERSATION WITH DEB MURPHY OF ENVIRONMENTAL PRODUCTS AND SERVICES. UNABLE TO DIG OUT OF CONTAMINATION. TW ADVISED MURPHY THAT EXTENT OF CONTAMINATION NEEDS TO BE DETERMINED, AND REMEDIAL ACTION PROPOSED BASED ON INVESTIGATION RESULTS. {{DEC lead transferred from T Walsh to DDake in February 2005; name of spill/RP changed from USS to USF}} 2/2/05: DD FILE REVIEW. WORK PLAN FOR SSI WORK IN FILE FROM EPS, NO FOLLOWUP ON WHETHER WORK WAS COMPLETED. CONTACTED AMY MINSTER AT NYETECH (FORMERLY EPS) - BILLING FILE WAS REVIEWED, NO REPORT FOUND; UST EXCAVATION AND INSTALL; NOT SURE IF 2 WELLS INSTALLED?. FAXED VOC/SVOC SOIL ANALYTICAL TO DEC. NO LOCAL NUMBER FOUND IN PHONE BOOK. 2/8/05: DD SPOKE WITH JIM CROZIER AT CORP OFFICE - 616-395-5160. DD UPDATING FILE/DATABASE FOR TWALSH - NEED UPDATED INFO REGARDING PROPOSED SSI WORK. SAID FACILITY CEASED OPERATIONS, BUT THEY STILL OWN. ONE UST STILL ON-SITE. USF REDSTAR, C/O USF HOLLAND; 750 EAST 40TH ST; HOLLAND, MI 49423. HE'LL LOOK FOR INFO. 2/11/05: DD CONTACTED BY VIN MARESCO OF GES - THEY ARE DOING A SSI FOR PROPERTY OWNER AS PART OF PENDING PROPERTY TRANSACTION. HE IS ALSO NOT SURE IF 1998 SSI WORK WAS DONE - THEY FOILED DEC RECORDS IN THE PAST. PER VIN, GES WON'T CALL IN NEW SPILL IF PETROLEUM CONTAMINATION FOUND IN FORMER UST AREA DURING UPCOMING INVESTIGATION. 2/14/05: DD/PM ON-SITE. MET BRIEFLY WITH PATRICIA KOWALSKI FROM GES. PARRATT WOLFF

TNT RED STAR EXPRESS, 75 NORMAN ST, ROCHESTER, NY 14613 (Continued)

DRILL RIG ON-SITE. WORKING ON 3rd BORING. NO CONTAMINATION FOUND YET. GES SET ONE MICROWELL BUT DOESN'T THINK WILL BE MUCH IF ANY GROUNDWATER PRESENT. GES WORKING FOR BLYMYER ENGINEERING (CONTRACTED BY USF). 3/29/05: DD RECEIVES COPY OF GES' PHASE II ENVIRONMENTAL SITE ASSESSMENT REPORT DATED 3/28/05 (FOR SSI WORK PERFORMED IN FEBRUARY 2005). REPORT INCLUDES SUMMARY OF DATA FROM ADVANCEMENT/INSTALLATION OF 10 SOIL BORINGS AND 5 TEMPORARY GROUNDWATER MICROWELLS. SOILS CONSISTED OF FILL MATERIAL WITH UNDERLYING NATIVE SILT AND CLAY. BEDROCK ENCOUNTERED AT APPROXIMATELY 10.5-FEET BGS. ALL VOCs WERE BELOW TAGM LEVELS IN SOIL SAMPLES. A FEW SVOCs WERE REPORTED ABOVE TAGM LEVELS IN SOIL SAMPLES. MODERATE LEVELS OF VOCs AND SVOCs WERE REPORTED IN MONITORING WELL B-5 (COMPOUNDS ABOVE GROUNDWATER STANDARDS). GW FLOW WAS DETERMINED TO BE TOWARD THE NORTH. THE GES REPORT RECOMMENDED THE INSTALLATION OF THREE PERMANENT GROUNDWATER MONITORING WELLS AND FOLLOWUP QUARTERLY GW SAMPLING FOR ONE YEAR. 4/4/05: DEC SENDS LETTER TO MICHAEL LEWIS OF BLYMYER ENGINEERS (ALAMEDA CA) APPROVING INSTALLATION OF THREE WELLS/GW MONITORING AND SAMPLING FOR ONE YEAR. 8/30/05: DD SENDS EMAIL TO PATRICIA KOWALSKI OF GES TO INQUIRE ABOUT STATUS OF PROJECT/DRILLING. EMAIL RETURNED TO DEC ON 9/2/05 STATING THAT GES IS NO LONGER WORKING ON THE PROPERTY. 9/9/05: DD RECEIVES RETURN PHONE MESSAGE FROM MIKE LEWIS AT BLYMYER ENGINEERS (800-753-3773) - THE PROPERTY WAS LIKELY SOLD, AND HE BELIEVES THE NEW OWNER IS ASSUMING RESPONSIBILITY FOR THE RESIDUAL PETROLEUM CONTAMINATION/LIABILITY/CLEANUP/MONITORING. SUGGESTED DEC CONTACT BOB WEAVER (USF HOLLAND) AT 616-395-5091. 9/14/05: DD CONTACTED BOB WEAVER. THE USF RED STAR COMPANY WAS SOLD, BUT IS STILL RESPONSIBLE FOR THE SITE. A NEW (DIFFERENT) OWNER OF THIS PARTICULAR PROPERTY WAS TO ASSUME COST/LIABILITY FOR GW MONITORING, BUT THE SALE RECENTLY FELL THROUGH. THERE IS A NEW PROSPECTIVE BUYER, AND THE PROPERTY SALE MAY BE PENDING IN NEAR FUTURE. THE NEW OWNER WILL CONTACT DEC TO DISCUSS REQUIREMENTS FOR GROUNDWATER MONITORING. 10/17/05: DEC RECEIVES LETTER FROM BOB WEAVER AT USF RED STAR: THE PROPERTY WAS RECENTLY SOLD TO '3813 BROADWAY, INC.' WHOM UNDER TERMS OF THE SALE HAS ASSUMED RED STAR'S ENVIRONMENTAL OBLIGATION. NEW CONTACT IS MICHAEL KING: 716-651-9383 (CHEEKTOWAGA, NY). DD TELECON WITH MICHAEL KING: HIS BROTHER JOE KING IS GOING TO LINE UP AN ENVIRONMENTAL

TNT RED STAR EXPRESS, 75 NORMAN ST, ROCHESTER, NY 14613 (Continued)

CONTRACTOR. DD REQUESTED WELLS BE INSTALLED PRIOR TO WINTER. 2/1/06: DD CONTACTED KING'S EXPRESS AT 716-651-9383 AND LEFT MESSAGE WITH MIKE KING TO HAVE HIM OR HIS BROTHER CONTACT DEC (HAVE NOT HEARD FROM THEM SINCE OCT. 2005 REGARDING INSTALLING GW MWs). 2/13/06: DD TELECON WITH JOE KING/CURRENT PROPERTY OWNER. REVIEWED PROJECT HISTORY AND DEC REQUIREMENTS: NEED TO INSTALL THREE GW MONITORING WELLS AND SAMPLE (FOR VOCs AND SVOCs INITIALLY) FOR AT LEAST TWO QUARTERS. DEC WILL PROVIDE LIST OF LOCAL ENV. CONTRACTORS WHOM KING CAN SOLICIT COST QUOTATIONS FOR DRILLING/SAMPLING/QUARTERLY REPORTING. DD SENT SHORT LETTER TO KING DISCUSSING SAMPLING/REPORTING REQUIREMENTS. 3/28/06: DD TELECON WITH JOE KING (716) 923-5664, WHO STATED HE NEVER RECEIVED DEC'S 2/13/06 LETTER OR CONTRACTOR. DD TO SEND OUT LETTER/LIST AGAIN. KING WILL SOLICIT DRILLING CONTRACTORS/PRICING AND GET THE WORK SCHEDULED. 5/3/06: COPY OF GES' PHASE II SITE ASSESSMENT REPORT FROM MARCH 2005, DEC'S 2/13/06 LETTER TO JOE KING, AND SPILL SHEET SENT TO JOE ALBERT AT MONROE COUNTY HEALTH DEPARTMENT FOR REVIEW AND COMMENT. 7/24/06: DD TELECON WITH JOE KING - DEC WAS NEVER CONTACTED - HE THOUGHT EMPIRE GEOSERVICES WAS CONTRACTED AND HAS ALREADY INSTALLED THE WELLS AND SAMPLED. A REPORT SHOULD BE FORWARDED TO THE DEC SOON. 8/22/06: DD WITH JOE KING (716-923-5664) - EMPIRE ALREADY INSTALLED THE WELLS, BUT DEC HAS STILL NOT RECEIVED ANY REPORTS. DD TO EMAIL CHUCK GUZZETTA AT EMPIRE AND KING TO FOLLOWUP ALSO WITH EMPIRE. 9/2/06: EMAIL RECEIVED FROM GUZZETTA THAT INVESTIGATION REPORT IS BEING FAXED (BUT FAX WAS NEVER RECEIVED). 9/5/06: DEC RECEIVES VIA FAX EMPIRE'S REPORT SUMMARIZING INSTALLATION OF THREE 2-INCH DIA. GROUNDWATER MONITORING WELLS AND INITIAL GW SAMPLING EVENT. NO SOIL HEADSPACE PID READINGS INCLUDED IN REPORT. WELLS WERE GAUGED AND SAMPLED IN MAY 2006 - GW FLOW IS TO THE NORTHWEST (WELL EGS-1 IS HYDRAULICALLY DOWNGRADIENT OF THE FORMER UST/DISPENSER/SPILL AREA). LOW TO NON-DETECTABLE LEVELS OF VOCs AND SVOCs IN WELLS EGS-2 AND EGS-3. MAXIMUM BENZENE CONCENTRATION OF 16.3 UG/L IN EGS-3. MAXIMUM TOTAL VOC CONCENTRATION OF 384 UG/L IN EGS-3. ALL COMPOUNDS NON-DETECT IN DOWN-GRADIENT WELL EGS-1. WELLS WILL BE GAUGED/SAMPLED QUARTERLY. 9/14/06: DD TELECON WITH JOE KING - EMPIRE SAMPLED WELLS AGAIN IN AUGUST. DD WILL EMAIL EMPIRE AND HAVE THEM ALSO FORWARD UPCOMING QUARTERLY GW MONITORING REPORT TO DEC AND TO MCHD. KING STATED THAT THE EASTERN PORTION OF THE BUILDING IS

TNT RED STAR EXPRESS, 75 NORMAN ST, ROCHESTER, NY 14613 (Continued)

CURRENTLY USED FOR STORAGE/MECHANICS SHOP AND ISN'T OFFICE SPACE. A ROADWAY AND ANOTHER TRUCKING COMPANY IS LOCATED TO THE NORTH OF THE PROPERTY. 10/3/06: DEC RECEIVES FAX FROM EMPIRE GEO - A WELL LABELED MW-A (WHICH APPEARS TO BE IN THE FORMER UST PIT) WAS SAMPLED FOR VOCs AND SVOCs - ALL COMPOUNDS NON-DETECT. DD SENDS EMPIRE EMAIL INQUIRING WHAT THIS WELL IS FOR, AND WHY IT WAS SAMPLED. 10/13/06: DD/PM TELECON WITH JOE ALBERT OF MONROE COUNTY HEALTH DEPARTMENT TO DISCUSS MCHD CONCERNS WITH THE PROPERTY. REVIEWED GES SUBSURFACE INVESTIGATION DATA AND RECENT GW MONITORING DATA. BASED ON AVAILABLE DATA, NO FURTHER ACTIONS REQUIRED BY SPILLS UNIT FOR THIS SPILL AT THIS TIME - SPILL FILE CLOSED. 10/16/06: NO FURTHER ACTION LETTER SENT TO JOE KING. 03/02/09 PAPER FILE REMOVED PER FILE RETENTION POLICY."

Remarks: "WHILE ENVIRONMENTAL PRODUCTS & SERVICES WAS REMOVING A 4,000 GALLON UNDERGROUND DIESEL TANK, CONTAMINATED SOIL WAS ENCONUNTERED. EP&S WILL DIG OUT OF CONTAMINATION AND SAMPLE THE EXCAVATION. FAXED TO MCHD ON 12/07/98 AT 1303 HRS."

DD TO EMAIL CHUCK GUZZETTA AT EMPIRE AND KING TO FOLLOWUP ALSO WITH EMPIRE. 9/2/06: EMAIL RECEIVED FROM GUZZETTA THAT INVESTIGATION REPORT IS BEING FAXED (BUT FAX WAS NEVER RECEIVED). 9/5/06: DEC RECEIVES VIA FAX EMPIRE'S REPORT SUMMARIZING INSTALLATION OF THREE 2-INCH DIA. GROUNDWATER MONITORING WELLS AND INITIAL GW SAMPLING EVENT. NO SOIL HEADSPACE PID READINGS INCLUDED IN REPORT. WELLS WERE GAUGED AND SAMPLED IN MAY 2006 - GW FLOW IS TO THE NORTHWEST (WELL EGS-1 IS HYDRAULICALLY DOWNGRADIENT OF THE FORMER UST/DISPENSER/SPILL AREA). LOW TO NON-DETECTABLE LEVELS OF VOCs AND SVOCs IN WELLS EGS-2 AND EGS-3. MAXIMUM BENZENE CONCENTRATION OF 16.3 UG/L IN EGS-3. MAXIMUM TOTAL VOC CONCENTRATION OF 384 UG/L IN EGS-3. ALL COMPOUNDS NON-DETECT IN DOWN-GRADIENT WELL EGS-1. WELLS WILL BE GAUGED/SAMPLED QUARTERLY. 9/14/06: DD TELECON WITH JOE KING - EMPIRE SAMPLED WELLS AGAIN IN AUGUST. DD WILL EMAIL EMPIRE AND HAVE THEM ALSO FORWARD UPCOMING QUARTERLY GW MONITORING REPORT TO DEC AND TO

TNT RED STAR EXPRESS, 75 NORMAN ST, ROCHESTER, NY 14613 (Continued)

MCHD. KING STATED THAT THE EASTERN PORTION OF THE BUILDING IS CURRENTLY USED FOR STORAGE/MECHANICS SHOP AND ISN'T OFFICE SPACE. A ROADWAY AND ANOTHER TRUCKING COMPANY IS LOCATED TO THE NORTH OF THE PROPERTY. 10/3/06: DEC RECEIVES FAX FROM EMPIRE GEO - A WELL LABELED MW-A (WHICH APPEARS TO BE IN THE FORMER UST PIT) WAS SAMPLED FOR VOCs AND SVOCs - ALL COMPOUNDS NON-DETECT. DD SENDS EMPIRE EMAIL INQUIRING WHAT THIS WELL IS FOR, AND WHY IT WAS SAMPLED. 10/13/06: DD/PM TELECON WITH JOE ALBERT OF MONROE COUNTY HEALTH DEPARTMENT TO DISCUSS MCHD CONCERNS WITH THE PROPERTY. REVIEWED GES SUBSURFACE INVESTIGATION DATA AND RECENT GW MONITORING DATA. BASED ON AVAILABLE DATA, NO FURTHER ACTIONS REQUIRED BY SPILLS UNIT FOR THIS SPILL AT THIS TIME - SPILL FILE CLOSED. 10/16/06: NO FURTHER ACTION LETTER SENT TO JOE KING. 03/02/09 PAPER FILE REMOVED PER FILE RETENTION POLICY."

Remarks: "WHILE ENVIRONMENTAL PRODUCTS & SERVICES WAS REMOVING A 4,000 GALLON UNDERGROUND DIESEL TANK, CONTAMINATED SOIL WAS ENCONUNTERED. EP&S WILL DIG OUT OF CONTAMINATION AND SAMPLE THE EXCAVATION. FAXED TO MCHD ON 12/07/98 AT 1303 HRS."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Appendix M

Environmental Professional Qualifications

Overview

Mr. Brydges has worked in the environmental engineering discipline for over 20 years performing health physics applications; radioactive and hazardous materials remediation; stormwater, erosion, and sediment control design; decontamination and decommissioning (D&D) operations design; contaminated site closure engineering; NYSDEC brownfield cleanup design and remediation, landfill and cover permitting, design, and construction; waste transportation, storage, and disposal; contaminated media sampling design; and groundwater, soils, and facility remediation design using State Brownfield Cleanup Program (BCP) and Federal Resource Conservation and Recovery Act (RCRA), National Environmental Policy Act (NEPA), and Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) regulations under various U.S. Department of Energy (DOE), U.S. Nuclear Regulatory Commission (NRC), U.S. Environmental Protection Agency (EPA), U.S. Air Force Civil Engineering Center (AFCEC), New York State Department of Environmental Conservation (NYSDEC), New York State Department of Health (NYSDOH), and U.S. Army Corps of Engineers (USACE) programmatic guidance.

Areas of Expertise

Environmental Remediation
Radioactive, Solid, and Hazardous Waste Management
Health Physics
Stormwater, Erosion and Sediment Control Design and Installation
Business Development and Marketing
Facility Decontamination and Decommissioning (D&D)

Years of Experience

BE3: 5+ years
LATA: 3 years
URS: 11 Years
Other Firms: 3 Years

Project-Specific Experience

Project Manager/Professional Engineer, Solar Liberty, Many Sites, New York, Project Lump Sum, $80k, 5-2015 – present: As PM/PE, authored and managed several deliverables for a solar installation client on many sites throughout New York State. Project plans include Phase I ESAs, civil/ALTA surveys, SEQRA forms, SHPO CRI reports, SWPPPs, wetland delineation/surveys, endangered/threatened species surveys, and geotechnical reports that involved wind uplift, differential settlement, and slope stability calculations. Most of these services are performed in-house and all services are managed in-house. Subcontractors are utilized to complete civil surveys and geotechnical borings, while labor reach-back services are utilized for the cultural resource investigations. For the approximately 12 sites performed to date, some require all services and others just require a few of the services. Typically, the civil survey and SWPPPs are performed for all sites; whereas Phase I ESA/SEQRA/SHPO are sometimes performed by the owner or municipality. These activities ultimately allow Solar Liberty to arrange for array development with a racking system and set of solar panels.

Project Manager/ Professional Engineer/Health Physicist, JGMS, SUNY Buffalo Cyclotron, New York, Time and Materials NTE, $50k, 8-2016 – present: As PM/PE/HP, performed site walk to verify design drawings of cyclotron vaults and reviewed the quantity take-offs to ensure contractor was provided an accurate and user-friendly request for proposal. Primary tasks were to communicate with the primary contractor during review of Decommissioning Plan, edit the UB D&D RFQ, obtain feedback from UB regarding RFQ, and review and edit bid documents and contract documents for the procurement. A significant portion of the work was generating a new selective demolition specification and editing the existing general conditions specification. Approximately 10 drawings were generated and submitted to UB for review to include with specifications for general conditions and selective demolition. As lead engineer, helped the primary HP contractor and UB through the contractor site walk prior to bid.

Professional Engineer, Guiseppe Holdings, River Road, Tonawanda New York, Time and Materials, $100k, 2016: As PE, assisted the client through the NYS Brownfield Cleanup Program for a xylene impacted site that included soil excavation, clean fill sampling and importing, administration of air monitoring devices for dust and volatile organic compounds, logging dust and VOC results periodically for QA purposes, and documenting site activities including waste T&D, contamination excavation and stockpiling, backfilling operations, excavation shoring and bracing, health and safety administration, etc. In general, the site remediation included the excavation of soil to uncover a lens of impacted material 6 to 8 feet below grade surface (bgs) where eventually approximately 9000 tons of impacted soil was removed from this area and sent to the landfill. Test pits were utilized to locate the extent of contamination during the remedial process, and a barrier wall was installed to delineate contamination that existed along the United Refinery (neighbor) property line.

Project Manager/Professional Engineer, TRM Architects, Many Sites, New York, Lump Sum, 6/2015 – 8/2016: As PE/PM, performed stormwater design calculations and reporting for various developments as required by NYSDEC and municipality guidance to obtain permits. The project at 500 Franklin Street was a standard TR-55 stormwater design for 2 year pre and 25 year post development conditions that generated WQv, peak discharge, retention, pipe sizing, and design drawing markups. The project in East Aurora was a dry well design that also utilized TR-55 to calculate WQv with the ultimate goal of designing a dry well with adequate sump, surface area, pipe sizing, and ensuring the well layout detail fit the existing system. The project at 760 Seneca Street was identical to that at Franklin Street with the addition of subsurface retention design that included R-tanks and an erosion and sediment control plan.

Professional Engineer/Health Physicist, LATA, USACE Linde Project Tonawanda, New York, Fixed Unit Rate, 5/2015 – 3/2016: As field engineer and HP technical, monitored and surveyed a groundwater well decommissioning project at the former Linde Site in Tonawanda, New York. The project scope of work involved the decommissioning and removal of 9 GW wells on-site that were not anticipated to be radiologically impacted. BE3's scope of work was to ensure that project personnel and the environment was not unnecessarily exposed to FUSRAP radioactive material that once existed at this location. A driller, waste T&D, and asphalt paving subcontractors were also present to support the project. Due to the nature of some of the wells, a few were not constructed as anticipated and therefore abandoned in place. All areas were restored and all waste material (both liquid and solid) was surveyed and sampled for proper disposal.

Project Manager/Professional Engineer, NYS Parks Department, Niagara Falls, New York, Lump Sum, 8/2015 - 1/2016: As PE/PM, authored a Records Search Report for the NYS Parks Department for the Port Day Pond area near the intersection of Buffalo Avenue and John B Daly Boulevard. The report was generated as a result of a Consent Order from the NYSDEC to the Parks Department regarding contamination suspected within the area being developed for the Robert Moses Parkway. In addition to specification of the Consent Order, the Records Search Report was generated in compliance with the Standard Clauses of the NYS Superfund Administrative Orders. The report was eventually utilized by NYS Parks to develop an RI/FS work plan and Phase II investigation.

Project Manager/Health Physicist, Clark/Patterson/Lee, Niagara Falls, New York, Lump Sum, 11/2015 – 1/2016: A gamma walkover survey was performed prior to a sewer improvement project within the Town of Niagara near Lockport and Hyde Park Blvd Road. The field effort was completed in a single day with an experienced radiation technician, gamma scintillation system, and GPS equipment. During the project equipment was source checked, data was plotted on a color coordinated figure, and a letter report of findings was generated to summarize the radiological characteristics of the neighborhood.

Project Manager/Health Physicist, Environmental Dimensions Inc, USACE Buffalo Seaway Tonawanda, New York, Fixed Unit Rate, $70k, 5/2015 – 12/2015: Managed 4 radiation technicians as a subcontractor on a project involving the subsurface removal of FUSRAP radioactive waste from the former Seaway Landfill in Tonawanda, New York. The EDI HP representative that was on-site managed the day-to-day duties of the technicians that performed equipment calibrations, soil sampling, perimeter air sampling and analyses, gamma walkover surveys, final status surveys, equipment surveys, surveys for waste T&D activities, and surveys for site

restoration activities. LATA was the prime contractor to the Buffalo District and supplied the PM/Superintendent as well as the labor, equipment and material for the remediation activity. EDI was the HP subcontractor and BE3 supplied the HP labor. Three separate areas required remediation of impacted FUSRAP soil; however, only 1 area was completed. This area contained 3 times the quantity of soil anticipated for the project, and the waste material from the other 2 areas was buried deeper than anticipated; therefore, the project was halted early.

Project Manager/Professional Engineer/Health Physicist, Ravi Engineering, 6th Street Niagara Falls, New York, Fixed Unit Rate, $30k, 4/2015 – 12/2015: Managed and self performed a small NORM waste remediation project for Ravi Engineering, who was supporting a development by Housing Visions. The one acre plot of land had localized hot spots of radioactive material buried in the subsurface. As PM/PE, the field mobilization of the equipment, operator, waste subcontractor, and transportation subcontractor was coordinated, and as HP technician, directed remediation of the NORM waste in the field. All excavated material was stockpiled on poly, segregated, surveyed, and eventually loaded into dump trailers for out of State disposal. The waste disposal contractor was utilized for in-situ gamma spectroscopy of each trailer prior to off-site transportation. A final completion report was generated to document all field activities.

Professional Engineer, Groove Roofing Services, Buffalo, New York, Lump Sum, 4/2015 – 7/2015: As PE, completed 2 Phase I environmental site assessments (ESAs) for a property located in Buffalo and another located in Rochester, New York. Standard Phase I ESA protocol per the ASTM Standard was adhered to throughout the project that included a site visit, gathering property information from the local municipality, gathering electronic data on the property for environmental due diligence, and generating a final report.

Project Manager/Health Physicist, Damon Morey and Vesuvius, Hamburg, New York, Time and Materials NTE, $40k, 1/2015 – 6/2015: As PM /HP for Phase I, (1) examined lab results and made site visits to an old demolition facility to confirm "classification" of 2 waste piles that was transmitted in a formal professional interpretation memo; (2) confirmed appropriate disposal method with recommendations on T&D utilizing properly licensed entities; and (3) generated a final Summary of Findings Report that included cost estimates for the T&D of the waste. As PM/HP for Phase II, self performed the loading, packaging, transportation and disposal of the radioactive material from Hamburg NY to Grandview Idaho. This involved radiation control support, waste manifest generation, coordination of field crew and T&D activities, and closeout documentation for the approximately 40 tons of radioactive material.

Professional Engineer/Health Physicist, JGMS Inc., Rochester, New York, Fixed Unit Rate, $150k, 8/2014 – 6/2015: Assisted in the remediation of a few hospital rooms as the Strong Facility in Rochester, NY. Radiological surveys were performed to detect alpha and beta contamination in walls and floors as a result of plutonium 241 and radium 226 impacts as a result of the isotopic use on patients during the Manhattan Project era. A number of rooms were sampled and surveyed for fixed and removable contamination, and a few rooms were subsequently remediated via scabbling the concrete floors and concrete block walls. All areas were poly protected and secured prior to workers entering in Level B PPE. Constant ambient air monitoring for alpha and beta contamination was utilized in addition to alpha/beta scintillation systems, alpha/beta GM probes, alpha/beta sample counters, and dose rate meters. Once remediation was complete, the dust collection devices, poly sheeting, PPE, and scabbled waste was packaged and sent off-site for LLW disposal.

Project Manager/Professional Engineer/Health Physicist, TM Montante Development, Niagara Falls, New York, Fixed Price-Lump Sum, 7/2014 – 6/2015: Performed the Phase I and Phase II site assessments for a 3 acre facility scheduled for entrance into the NYS Brownfield Cleanup Program (BCP). Activities included performing numerous subsurface boring over a two day period in and outside of the building using a drill rig. Other instruments included use of a PID for volatile organics and a gamma scintillation system for gamma radiation. Ultimately, samples were collected and SVOCs, metals and radionuclides were detected assisting the property to get into the BCP. Formal reports were generated for the Phase I and Phase II activities; the Phase I activities occurred prior to the field activities and included research of the history of the environmental aspects of the property.

Project Manager/Professional Engineer/Health Physicist, The LiRo Group, Niagara Falls, New York, Fixed Price-Lump Sum, $1M, 6/2014 – 6/2015: Managed the quality assurance services for LiRo and New York State Parks for the NORM waste remediation of a 5.5 acre park in Niagara Falls, NY. A new Parks Police Station was being constructed on an area impacted with approximately 800 tons of NORM waste in excess of 50 pCi/g U-238 decay chain isotopes. BE3 represented NYS Parks and the LiRo Group to ensure that the site contractor and its radiation controls subcontractor performed their remedial activities in accordance with the Work Plans (also drafted by BE3). A BE3 radiation technician and PE/HP supervised the excavation, surveying, waste handling, packaging and transportation and disposal. The field instrumentation utilized in the field included air monitoring, gamma scintillation devices, alpha/beta GM friskers, dose meters, and sample counters. BE3 was also responsible for communications between the NYSDEC, LiRo, and the NYS Parks; in addition to completing the project Completion Report documenting the activities.

Project Manager/Professional Engineer/Health Physicist, Housing Visions Construction and Walnut Avenue Housing, LLC, Niagara Falls, New York, Time and Materials (NTE), $100K, 10/2014 – 1/2015: As PE, developed work plans required for the radioactive material remediation that included a Site Operations Plan, Waste Management Plan and Health/Radiation Safety Plan. Plans were submitted to the NYSDOH, NYSDEC, Walnut Avenue Housing, and City of Niagara Falls for review. As PM, supervised and administered project activities including project setup, billing and invoicing, personnel management, coordination of field activities, interface with regulatory authorities, daily QA notes, project status updates, contract clarifications, cost tracking, and vendor management. As HP and with assistance from the Superintendent, performed sampling and sample shipment for NORM waste disposal, delineation of excavation, guided removal of impacted material and segregation of clean overburden, and supervised rad controls. As PM/HP, supervised multiple mobilizations and demobilizations that occurred due to inclement weather, supervised waste loading into certified and lined dump trailers and material packaging per USDOT regulations, and administered shipping paperwork and manifest documentation. As HP/PE and with assistance from RCT, performed radiation and radiological contamination control checks, waste characterization and profiling, weekly site visits, and security of waste and excavation with engineering controls. As PE/PM, documented daily QC reports, radiation surveys, equipment release surveys, waste shipping documentation, pictures, a summary of project activities, and waste disposal paperwork in a Final Completion Report.

Professional Engineer, Town of Porter, New York, Time and Materials 11/2014: Providing professional engineering services for the Town of Porter, reviewed and documented applicable zoning law requirements as related to Waste Management's submittal for landfill expansion that included a DEIS, an Engineering Report, a Permit Modification Report, and various NYS required applications and regulatory responses. Applicable Town requirements included those stipulated within M-3, General District, building permit, review procedures, site plan review, special use permit, and variance sections of the Zoning Law. The Host Community Agreement between the Town and WM as it applies to the Subtitle C landfill expansion submittal was also reviewed and included limitations on operations, Town benefits, and miscellaneous covenants/enforcement agreements. The final deliverable included a list of some of the potentially significant omissions from WM's application per the Town's requirements and zoning laws.

Project Manager/Health Physicist, Ravi Engineering, Niagara Falls, New York, Time and Materials, 10/2014: As field health physicist, performed a gamma walkover survey with global positioning system (GPS) in conjunction with a boring investigation and additional radiation survey support. No radiation technician was utilized, therefore, field work involved use of a gamma scintillation system over a 4 work day period. As project manager, generated daily field notes, GWS GPS map, and summary of findings report to provide the client sufficient details for decisions on future remediation and development of the site. Other field activities included collection of field sample and laboratory analyses. The scope of work was expanded to include providing an excavator with operator for two days to perform more test pitting with radiation survey support and gamma scintillation system. Documentation including daily field notes was also generated for these activities.

Professional Engineer, JGMS Inc., Albuquerque, New Mexico, Fixed Unit Rate, 8/2014 – 9/2014: Supported the efforts of other professional engineers tasked to compile 5 design packages for the Air Force at

Kirkland Air Force Base in Albuquerque NM. The design support was required for 4 projects that were subsequently placed out for proposal/bid to existing Air Force contractors. All projects were design/build and consisted of (1) bridge replacement and stormwater controls (2) 300,000 gallon steel tank construction, (3) 1600 foot below ground surface potable water well installation, and (4) two facility renovations. The design/build packages consisted of front end specifications, drawings, SOWs, cost estimates, risk analyses, permit requirements, and Air Force Facility forms and documentation. Although most of the effort was "soft" design since they were being bid out for design and build, significant design calculations were required for the bridge replacement, potable water well replacement, and 300,000 gallon tank construction.

Project Manager/Professional Engineer/Health Physicist, URS Corporation – Niacet, Niagara Falls, New York, Fixed Unit Rate, 1/2012 – 8/2014, $300k: Managed radiation control services to support URS and its subcontractors during the remediation of visible mercury (Hg) in the subsurface. Project scope covered the excavation of approximately 10,000 tons of visibly impacted material down to approximately 6 feet bgs. This material was staged on-site in stockpiles or directly loaded for off-site disposal to Stablex in Canada. Bedrock was often encountered and the visible Hg was vacuumed from the surface for complete remediation. Radioactive materials were discovered at a few locations throughout the project through the use of qualified RCTs; some of this material was approved for continued disposal at Stablex, but most of the material was characterized and shipped to an out of State radioactive material disposal facility. Radiation controls included gamma scintillation systems and alpha/beta/gamma GM systems for surveying material during excavation and equipment for release, respectively. Full controls were utilized as required to survey and delineate NORM, excavate and stockpile Hg-impacted NORM, and package/transport/dispose of waste material. Daily reports, surveys, dose assessments, work plan addenda, radiation health and safety support, worker radiation safety training, and sample analyses were continually generated throughout the currently 2 year remediation project.

Project Manager/Professional Engineer/Health Physicist, Greenpac Mill/Frontier Chemical, Niagara Falls, New York, Fixed Price, 4/2014: Proposed, managed and performed a gamma walkover survey on a vacant plot of Superfund Site land that encompassed approximately 9 acres. In hopes of acquiring the adjacent property, Greenpac wanted to quantify the remaining NORM waste that was known to have been buried in the subsurface subsequent to the recent Superfund remediation for VOCs. A three day field investigation was performed utilizing an RCT with a GPS and gamma scintillation system to confirm the presence of NORM. No boring investigation or sampling program was performed; however, four areas of significance were located on the property exhibiting gamma radiation readings up to 10 times background through the existing backfill and asphalt. It is anticipated that future radioactive material remediation design will be required for future purchase or development of this site.

Professional Engineer/Health Physicist/Project Manager, Panamerican Environmental/River Road and Gooding Street Projects, Tonawanda and Lockport, New York, Fixed Price, 1/2014 - 2/2014: Managed and performed two site assessments on two different properties involving potential NORM waste contamination at an old iron works facility and hard-goods manufacturing facility. Activities included Geoprobe borings accompanied with material sampling and radiological surveys. At the old iron works facility in Tonawanda, slag is ubiquitous throughout the project, and some areas possess radioactivity exceeding 20 times gamma background radiation. Gamma scintillation detection equipment was utilized with a 3-man crew that included a driller, PM, and RCT. Nothing of significance was encountered at the Gooding Street site in Lockport beyond the neighboring property containing a parking lot exhibiting up to 3 times background radiation through backfill and a few inches of snow. Summary of Findings Reports were generated to document all of the activities performed and information gathered during the investigations.

Professional Engineer/Health Physicist/Expert Investigation, Slater Law Firm PLLC/Greenpac Mill Project, Niagara Falls, New York, Fixed Price, 2/2014 - 4/2014: As a professional environmental engineer, health physicist and former contractor for the Greenpac Mill Remediation, I performed a quantitative and qualitative assessment of the NORM encountered and eventually removed and disposed from the Greenpac Mill Project. The original project was approximately $7M and involved the removal of approximately 20,000 tons of NORM from the future mill site. This expert investigation involved historical review of the Niagara Falls

metallurgical industry and the production of NORM waste as a result of metals processing (e.g., phosphorous, vanadium, etc.). It also involved the sampling and analyses of material removed from the Greenpac Site for a radiological, metallurgical, and geological profile that was utilized to interpret from where the original waste material was generated. This data was valuable to the attorney and his client in the pursuit of reimbursement funds owed to Greenpac as a result of this material being buried many years ago. As of 6/2014, no court decision has been reached.

Project Manager/Professional Engineer/Health Physicist, Ravi Engineering/Parks Police Project, Niagara Falls, New York, Fixed Price, 9/2013 to 2/2014, $50k: Proposed, managed and performed a three phase site investigation for a NYS Parks Police Station that required radiation surveys, test pitting, and sampling. The approximately 2 acre site along the Niagara Gorge possessed slag like material in the subsurface as confirmed by a previous geotechnical investigation. The three phase field effort revealed the presence of approximately 450 tons of radioactive slag-like material in various areas of the project design footprint. Utilizing an RCT, radiation detection equipment, a GPS, and an excavator, the field crew confirmed that a significant quantity of building debris and radioactivity in excess of 5 times federal cleanup standards exists on the property. As follow up to the investigation, work plans were developed for the remediation design including a Site Operations Plan, Waste Management Plan and Radiation Safety Plan. These plans were reviewed by the client, NYSDOH, the construction manager, and NYSDEC for use during hot spot remediation.

Project Manager/Professional Engineer/ Health Physicist, Panamerican Environmental/Military Road, Niagara Falls New York, Fixed Price, 11/2013: Proposed, managed and performed a site assessment of a vacant tire store for a Phase 1 investigation. Activities included over a dozen Geoprobe borings accompanied with material sampling and radiological surveys. Slag-like material with radioactivity exceeding 20 times gamma background radiation was encountered from an approximately 3000 SF area. Gamma scintillation detection equipment was utilized with the 4-man crew (including an RCT) and a summary report of findings was generated.

Project Manager/Professional Engineer/Health Physicist, Ravi Engineering/Walnut Avenue, Niagara Falls, New York, Fixed Price, 11/2013: Proposed, managed and performed a gamma walkover survey for a housing development project that encompassed approximately 3 acres over 6 separate properties. With concerns of subsurface radioactive material throughout Niagara Falls, the client requested that a two day field investigation be performed to confirm or disprove the presence of NORM with the future design limits of the property. The three to four-man crew, including a qualified RCT, performed a GPS gamma walkover with intermittent sampling and boring penetrations using radiation and exposure instrumentation. Only a single property was shown to possess NORM in excess of 10 times federal cleanup standards. It is anticipated that future design and remediation will be performed at this site.

Project Manager/Professional Engineer/ Health Physicist, Panamerican Environmental/ Cornerstone, Niagara Falls New York, Fixed Price, 10/2013: Proposed, managed and performed a gamma walkover survey of an approximately 10 acre residential property that was once the site of an old rail yard. Significant subsurface weathered ballast was present and thought by the City of Niagara Falls to be impacted by radioactive material. The four day field effort involved a two man RCT crew utilizing a gamma scintillation device, GPS, and a dose monitor. A final summary of findings report was generated for the area that was not found to be impacted at levels that are dangerous to human health and the environment.

Project Manager/Professional Engineer/ Health Physicist, Hebeler Corporation, Tonawanda New York, Fixed Price, 9/2013: Proposed, managed and performed a site assessment for a steel company involving the radiological surveying of process waste that was rejected by a local steel recycler. The assessment involved a two stage effort utilizing a gamma scintillation detector and exposure monitor for the initial survey of the waste bins and the aluminum oxide process; and the second mobilization involved an RCT with radiation instrumentation to package and release the waste bin future use. Background gamma radiation and various dose and activity measurements were obtained in excess of 5 times background and two field reports were generated. It is anticipated that radioactive waste transportation and disposal will be required.

Project Manager/Professional Engineer/ Health Physicist, Globe Metallurgical, Niagara Falls New York, Fixed Price, 7/2013: Proposed, managed and performed a gamma walkover survey of a railroad spur covering approximately 2 acres on a NYS Brownfield Site. This was performed after concerns arose regarding slag like material in the subsurface that may possess radioactivity within the railroad project design limits at the metallurgical facility. A two-man RCT crew completed the field work utilizing gamma scintillation detector and exposure monitor. Efforts included obtaining background gamma radiation, observing dose and activity measurements in excess of 10 times background on the surface and generating a field report. It is anticipated that additional work plan development for remediation design and subsequent remediation will be required.

Project Manager/Professional Engineer/Health Physicist, Amendola Property Management, Niagara Falls New York, Fixed Price, 5/2013: Proposed, managed and performed a gamma walkover survey of an approximately 2 acre vacant commercial property consisting of asphalt parking area, grassy open area, and single story commercial building. This was performed due to potential concerns with radioactive materials buried in the subsurface and monitored over the past 35 years. A two-man RCT crew completed the field work utilizing gamma scintillation detector and exposure monitor. Efforts included obtaining background gamma radiation, observing dose and activity measurements in excess of 100 times background, collecting field samples and generating a field report.

Project Manager/Health Physicist, Niacet Corporation, Niagara Falls, New York, Firm Fixed Price and Fixed Unit Rate, 1/2012 – 1/2013, $230k: Managed and performed gamma walkover surveys (GWS) and radioactive materials remediation for a food chemical production plant in Niagara Falls, NY. The GWS's performed in accordance with MARSSIM protocol supported the decision to remediate subsurface radioactive materials. Comprehensive surveys were performed where elevated gamma radiation readings were detected, followed by excavation and offsite disposal of the radioactive material. Field activities included walking the site with a radiation technician and gamma scintillation detector, delineating elevated gamma readings in the field, mobilizing field crew and equipment, excavating and managing 150 tons of impacted materials, packaging Class 7 radioactive material for shipment via rail, restoring the site to grade with asphalt, producing a daily report of field activities, and producing a final closure report.

Project Manager, Waste Control Specialists, Andrews, Texas, Time and Materials, 8/2011 – 12/2012, $400k: Administrated and performed operational support to WCS for their Low Level Radioactive Waste Disposal Facility, which is the only commercial low level waste disposal facility in the US in more than 30 years to have the ability to receive Class A, B, and C low level waste. Support activities include procedure development for waste tank farm operations and critical lift planning, landfill cell model construction, processing and management of native sand and caliche, heavy equipment and operational support material procurement, and operational readiness associated with license compliance. LATA continues to support WCS through the Grand Opening of both the Compact Waste Cell (November 2011) and Federal Waste Cell (May 2013).

Project Manager, USEPA Region II, Black River PCB Site, Carthage, New York, Time and Materials, 6/2011 – 1/2013 $450k: Managed the development of a Work Plan, Cost Estimate, and Basis of Estimate for an EPA Region II RAC project involving the CERCLA documentation process for the Black River PCB Site near Carthage, NY that was placed on the NPL on 10/2010. The zone of contamination within the River is approximately 0.5 miles long as a result of known PCB discharges from the 1950s and subsequent PCB detections by NYSDEC in 1997. The project consists of the following activities to be completed over a 24 month period: project planning and negotiations, community relations, data evaluation, RI Report, remedial alternatives screening and evaluation, FS Report, and EPA support during the process.

Project Manager, Waste Management, Model City, New York, Time and Materials, 3/2011 – Present, $300k: Produced a Remedial Action Plan (RAP) and presentation to the New York State Department of Environmental Conservation (NYSDEC) for the remediation of Facultative Pond 8 at the Model City Facility. Due to the nature of the FUSRAP contamination and previous investigations, a RAP was required prior to the

remediation of Fac Pond 8 to analyze the existing contamination, calculate a DCGL, and propose a remedy. As Program Manager and Health Physicist of the remediation and waste disposal of approximately 150 tons of FUSRAP waste, the project was completed cost effectively using a superintendent, project manager, CHP, field radiation technicians, operators, laborers, and an on-site laboratory manager. Fac Pond 8 needed to be consistently dewatered and treated on-site, while 1.5 ton supersacks were filled and staged for disposal. MARSSIM surveys were completed to prepare the site for excavation activities and release the site after excavation and confirmatory sampling. The HP and laboratory subcontractors worked effectively to quickly analyze samples on-site and release areas as they were completed.

Proposal Manager, Waste Control Specialists Beryllium Program, Firm Fixed Price, 10/2012, $59k: Administered proposal efforts for LATA to establish a Be Program for WCS. Program creation was separated into three phases. Initial costs were only for completion of Phase 1, which included the development of a program plan consisting of the following: requirements needed for a safe, compliant, and efficient Be Program; essential components of the Program such as training, personnel monitoring, hazard analyses, recordkeeping, and emergency response; and initial recommendations for plans or procedures modification. Subsequent Phases 2 and 3 consisted of program integration into current Facility operations, and Program administration and maintenance.

Program Manager; USACE Baltimore District; Multiple Award Radiation Services (MARS) Contract; Performance Based, Cost Reimbursable, and Firm Fixed Price ID/IQ; 1/2008 – 1/2013; $29.5 million: Manager over various task orders involving radiological and environmental remediation services in support of USACE Baltimore District and its customers located within North Atlantic Region. Sites of interest include those impacted by radioactive material or hazardous contamination requiring characterization or remediation of commingled or incidental munitions and explosives or hazardous materials.

- Colonie FUSRAP – TO Proposal Manager – 10/2010 - $200k: managed TO proposal for the Colonie FUSRAP Site that included the sampling and analysis of dust and soils in the vicinity of the old facility to characterize the radioactivity known to be present. T&D of IDW and associated work plans for the field effort were also included in the scope of work.
- Fort Greely, Alaska – TO Proposal Manager – 2/2011 - $1.2 million: managed TO proposal for the Fort Greely deactivated nuclear power plan. Scope of work included work plans, field investigations of impacted buildings and exterior land, and radiological characterization with intrusive sampling and subsequent analyses.

Program Manager; USACE Buffalo District; Multiple Award Remediation Contract (MARC); Performance Based, Cost Reimbursable, and Firm Fixed Price ID/IQ; 3/2007 – 1/2013; $300 million: Manager over various task orders involving the execution of remedial activities of hazardous toxic and radioactive waste (HTRW) projects nationwide with a focus on radiological remediation services within the Great Lakes and Ohio River Division. Projects include formally utilized sites remedial action program (FUSRAP) sites contaminated with residual radioactive materials as a result of Manhattan Engineer District (MED) or Atomic Energy Commission (AEC) activities.

- ❖ Former LOOW WWTP – Firm Fixed Price, September 2010 – September 2011, $450k: structure demolition and soil remediation project involving work plan development, site mobilization, soil/debris excavation and structural demolition, radioactive/PCB waste T&D, media sampling and analysis, site restoration, and project completion report.
- ❖ Harshaw IDW – TO Proposal Manager - 9/2012 - $150k: managed TO proposal for the management, transportation, and disposal of chemically and radiologically impacted drums, sludge, and groundwater. The waste was generated from FUSRAP investigations at the Harshaw site for groundwater and soil. Activities included in this proposal included USACE coordination, IDW preparation, packaging and repackaging of IDW, heavy equipment for loading and handling, waste T&D, and decontamination processes.

Proposal Manager, US AFCEE WERC 09 PBC, Southwest Bases, Arizona and Nevada, Firm Fixed Price, 3/2012, $24 million: Administered proposal efforts for LATA as a subcontractor to Kemron for five sites at Nellis Air Force Base in Nevada and Davis Monthan Air Force Base in Arizona. All five sites were considered

waste burial sites and had been impacted by radioactive materials or suspected to have been impacted in the past. Like all WERC 09 efforts, this was a performance based remediation opportunity where we proposed to closeout 3 of the five sites through excavation and offsite disposal techniques. Other aspects of the bid included development of a MARSSIM scoping survey and Decommissioning Plan, waste characterization activities, and completion of a MARSSIM FSS to achieve unrestricted site closure.

Proposal Manager, US AFCEE WERC 09 PBC, New England Bases, New York and Massachusetts, Firm Fixed Price, 3/2012, $10 million: Administered proposal efforts for LATA as a subcontractor to Tidewater for 13 sites at Niagara Falls Air Reserve Station in Niagara Falls, NY. The sites consisted of old landfills, waste staging areas, firing ranges, and leaking underground storage tanks (LUSTs), and had been impacted by the release of hazardous materials or petroleum products in the past. This was a performance based remediation opportunity where we proposed to closeout 7 of the 13 sites through excavation, GW injection, and pump and treat technologies. Other aspects of the bid included EPA five year reviews, waste characterization activities, optimal exit strategy development, and adherence to NYSDEC site-wide monitoring permit guidance.

Project Manager, Bison Laboratories, Buffalo, New York, Cost plus Fixed Fee, 11/2011 – 8/2013, $50k: Supervised and help perform the investigation, characterization, transportation and disposal of approximately 60 hazardous and non-hazardous waste drums from a past laboratory warehouse in Buffalo, NY. Field activities included an initial site visit to perform reconnaissance of the dilapidated drums, a second field effort to review MSDS' and quantify the type and number of drums to be disposed, and lastly a third mobilization to label/placard and manifest the drums for transportation. LATA provided a field technician with expertise in hazardous materials to assist our waste T&D subcontractor in profiling the wastes and repackaging those drums not fit to transport. Wastes handled ranged from non-regulated material to corrosive inorganics to flammable organics to toxic liquids. Continued interface with NYSDEC was required to ensure waste reporting for State GM Form was accurate.

Proposal Manager, Niagara Falls Air Reserve Station, Niagara Falls, New York, Firm Fixed Price IDIQ, 11/2011, $5 million: Managed LATA's proposal efforts as subcontractor to RJR Engineers for a potential opportunity to provide AE services to support the NFARS. The SF330 format was submitted to administer, coordinate, and technically support facility sustainability, restoration, and modernization (SRM) and environmental studies and restoration programs of interest to the 914 Airlift Wing at Niagara Falls Air Reserve Station, Niagara Falls, NY. The work includes all efforts necessary to manage and execute Title I, Title II, and other A-E services for traditional A-E Services for design and construction oversight supporting SRM and Environmental Studies and Restoration programs.

Program Manager, Greenpac Mill LLC, Niagara Falls, New York, Fixed Unit Rate, 9/2011 – 3/2012, $5.3 million: Managed contract negotiations, work plan development, mobilization and demobilization, subsurface excavation of radioactive slag, off-site laboratory analyses, NYSDEC correspondence for cleanup guidance, development of a NYSDOH radioactive materials license, worker radiation safety training, and waste T&D. Radioactive slag materials were discovered in the subsurface at a Greenpac Mill during the construction of a new $440 million facility for paper recycling. The slag material was previously deposited at the site at an unknown time in the past and used for subsurface foundation support. LATA managed the radiation control subcontractor, operators and laborers, and waste T&D subcontractors to remove approximately 20,000 tons of radioactive slag from the subsurface. The field work was effectively completed within a 3 month schedule despite logistical issues with our waste T&D subcontractor and their transporters.

Proposal Member, Advanced Medical Systems, Inc., Cleveland, Ohio, Time and Materials, 8/2011, $80k: Assisted in the generation of a LATA lead proposal for the review and revision of a Facility Decommissioning Plan. AMS' London Road Facility manufactured sealed radioactive sources for medical imaging equipment under an NRC license, and the scope of work was to (1) communicate the decommissioning process with AMS, its attorneys and the Ohio EPA Bureau of Radiation Protection, (2) review, evaluate, and revise the existing DP, and (3) provide support to AMS for regulatory negotiations.

Proposal Member, Department of Energy – WVDP Phase I Decommissioning Facility Disposition, Performance Based Cost Plus Award Fee, 10/2010 – 6/2011, $420 million: Assisted team in estimating and technically proposing the D&D of the above grade structures at the WVDP. Opportunity included a seven year contract with an annual funding profile of approximately $60 million. Major milestone activities proposed included HLW canister relocation, management and T&D of existing site legacy waste, D&D of MPPB and Vitrification Facility, and D&D of the balance of the superstructures on site.

Proposal Manager; USACE Omaha District; B-47 Plane Crash Site; Firm Fixed Price; 8/2010; $150k: Environmental remediation services for a non time critical removal action of uranium and lead contaminated soil as a result of a 1958 B-47 plane crash in Abilene, TX. The effort was associated with SDVOSB set aside IDIQ MATOC for the Omaha district and included visual site inspections, records review, removal of up to 15 cy of contaminated soil, site restoration, FSS sampling, temporary storage at Dyess AFB, and final waste T&D to Clive, Utah.

Project Manager, Waste Management, Model City, New York, Time and Materials 1/2010 – 6/2010, $50,000: While in close communications with the WM Model City facility and the NYSDEC, mixed waste materials from the RCRA facility were characterized, packaged, and shipped for disposal at Energy Solutions' Clive Facility. The drummed materials consisted of PCB waste in addition to radioactive byproduct-like material left over from the Lake Ontario Ordnance Works (LOOW) site. The project involved gathering historical data on the materials, surveying and weighing the materials, packaging the materials into 55-gallon drums, manifesting the materials on NRC and EPA forms, negotiations of disposal costs with Energy Solutions, and arranging shipment.

Proposal Manager, Department of Energy – WVDP Environmental Characterization Services, Cost Plus Fixed Fee, 1/2010 – 2/2010, $25 million: This opportunity involved site wide characterization services for radioactive materials at the WVDP. A cost and technical proposal was issued that diagnosed a hypothetical radiological investigation of a waste staging area involving on site laboratory support, MARSSIM investigation, establishment of cleanup goals, final status surveys, and waste management/disposal activities.

Radiation Safety Officer, City of Niagara Falls, Time and Materials, 11/2009 – 4/2011, $8 million: Managed all aspects of radiation protection for a road reconstruction project for the City of Niagara Falls. Funds for the project were allotted via a stimulus package through the USDOT and were set aside to specifically address the removal of radioactive slag buried beneath Route 104. RSO responsibilities included development of a NYSDOH radioactive materials license, generation of a radiation protection program, radiation safety training, bioassay and TLD program, air monitoring, radioactive materials source separation during road construction, set up and take down of CRZ and waste staging areas, administrating a radiation detection equipment program for source and background checking, and overall control of field paperwork.

Proposal Manager, Waste Control Specialists – LLRW Facilities, Firm Fixed Price, 11/2009 – 3/2010, $70 million: Generated cost and technical proposals for the construction of a LLRW facility in Andrews, Texas. The proposal presented the approach and to creating a facility equipped with two waste processing buildings, ten 500k above ground storage tanks, three 1 million-plus disposal cells, infrastructure roads and surface water controls, security buildings and fencing, and 6 other support buildings. The facility was designed to receive and dispose of commercial radioactive waste with the Texas Compact in addition to federal radioactive wastes.

Project Manager, Waste Control Specialists, Andrews, Texas, Time and Materials NTE, 8/2009 – 12/2009, $1.1 million: Produced a Plan of Action (POA) and subsequent Operational Readiness Review (ORR) for Byproduct Facility operations. Tasks consisted of formulating Department of Energy approach to operational readiness including pre-start items, core requirements, ORR prerequisites, review of License Application and applicable procedures, and performing thorough review of personnel, equipment, policies, training, etc. Once the ORR was approved by management, disposal operations of 3776 canisters of radioactive byproduct waste from Fernald were conducted. This included a 15 man crew using water trucks, loaders, fork trucks, sand slingers, and motor-grader to place the 10 ton waste canisters in the cell ahead of schedule and under budget.

Project Manager, American Rock Salt Company, Mt Morris, New York, Time and Materials, 3/2009 – 6/2010, $200,000: Managed all environmental activities for one of the largest rock salt producer in the northeastern United States. With over 20 storage/processing/mining facilities in Pennsylvania and New York, ARSC needed continual oversight of their permits, storm water control plans, spill control plans, and facility designs. Constant communications with PADEP and NYSDEC was important to success on this project as notices of intent, site characterization reports, final reports, retention basin design drawings, and sampling and analysis plans were generated.

Proposal Manager, New York State Energy Research and Development Authority – WVDP SDA Environmental Monitoring Services, Cost Plus Incentive Fee, 3/2010, $300,000: Produced a cost and technical proposal for an opportunity to replace the incumbent (E&E) at the WVDP SDA. The proposal addressed comprehensive environmental monitoring of the NYSERDA owned and operated disposal area. The tasks included TLD administration and management, groundwater and surface water sampling and analysis, and random soils/sediment sampling accompanied with radiation protection activities.

Project Engineer, Town of Tonawanda Landfill, Tonawanda, New York, Time and Materials, 3/2009 – 6/2010, $200,000: Designed and supported operational and closure activities for a 60 acre landfill that is being closed on Consent Order from the State of New York. The landfill was once a construction and demolition debris landfill, but received various other wastes including radioactive materials over the long life of this facility. With less than 1 year capacity remaining until closure, non-hazardous petroleum contaminated wastes are continually disposed at the site and used as BUD material for final closure. Many project documents were generated in support of facility closure including closure design drawings for stormwater control and cover, NYSDEC Multi-sector SWPPP, spill prevention plans, manifesting, and supplemental bioremediation facility permit application.

Field Engineer, Waste Control Specialists, Andrews, Texas, Cost Plus Fee, 06/2008 – 03/2009, $30 million: Lead field engineer for a design-build landfill project in West Texas. Project consisted of performing design and construction activities to expand a waste disposal facility allowing it to receive radioactive Byproduct Waste and Low Level Radioactive Waste. As lead field engineer, was the liaison between office design team and construction manager to ensure landfill and railroad designs were effectively employed into the field. Activities included SWPPP management (document and field), daily communications with client on construction and design issues, review design drawings/CQC plans/specifications, generate contract change control documents, facilitate weekly construction meetings, etc.

Proposal Member, AE IDC for the Execution of the HTRW/Environmental Mission of the USACE Northwestern Division, Kansas City, Missouri, Firm Fixed Price or Cost Reimbursement Task Order, 3/2008, $120 million: Lead proposal writer representing the Buffalo Office to support Kansas City and Seattle offices focusing on EPA Region 2 remedial work. The proposal was released by the KC District to acquire 5 firms capable of performing remedial work on a variety of HTRW/environmental sites complying with federal, state, and local regulations and focusing on Superfund Projects within EPA Region 2.

Design Engineer, Closure Engineering Design, West Valley, New York, West Valley Nuclear Services, Cost Plus Fee, 1998/2008, $7M/year: Produced cost estimate calculations for closure of the WVDP. Estimates addressed Removal, In-Place, and Preferred alternatives for the entire site. From these calculations, technical reports were developed that detail the design approach for remediating all Waste Management Areas within the WVDP. Ultimately, the engineering and cost estimates are used to create or support the Environmental Impact Statement for Site Closure.

Assisted in the production of Closure Engineering Reports CERs that were prepared as data inputs to the Environmental Impact Statement (EIS), and intended to describe engineered approaches and alternatives for closing the WNYNSC. These alternatives are conceptual designs that could be applied to the West Valley facilities, and they contain remedial technologies that set the foundation for evaluating and identifying key closure engineering parameters.

Assisted in the production of the Draft Environmental Impact Statement (DEIS) for the decommissioning or long term stewardship of the WNYNSC that provided information to regulatory authorities (DOE, EPA, NRC, NYSDEC, and NYSERDA) so they could best determine the manner in which the site could be decontaminated and decommissioned.

Assisted in the feasibility study, design and cost estimate of the remediation of a radioactive groundwater plume. Management technologies included groundwater control with barrier walls, dewatering with pumping systems and trenches, wastewater treatment, large-scale excavation, PRBs, and solid waste handling.

Assisted in the design of an approximately 10-ft thick cover equipped with slurry walls, a French drain, and reactive barriers. The design was created to assist in the closure of radiologically and chemically contaminated buildings, surrounding soils, and process equipment. The concept of the cap was generated using the HELP Model, infiltration equations, groundwater transport models, material property evaluations, degradation assumptions, stability calculations, etc.

Assessed the site-wide, ventilation system safety requirements for a decommissioned nuclear fuel reprocessing facility to evaluate whether the activities mandated by site policies were being performed. The assessment involved the evaluation of current standard operating procedures and documented safety requirement activities.

Co-authored a data gap analysis plan for the collection of data gaps intended to provide the necessary information to support the decommissioning of contaminated facilities and subsequent characterization of waste.

Designed a 40,000-ft^2 container management facility for the drying, processing, characterization, and packaging of radioactive and mixed waste. The building was designed to accept remote handled waste and store the characterized waste until a licensed facility was available for disposal.

Designed a cover system for a disposal area containing NRC-licensed waste. The system involved the re-grade of existing topography, design of a 10-ft thick long-term cover, and design of detention ponds and other surface water routing controls using various computer programs such as Pond-2 and QTR-55.

Authored a Waste Generator's Guidance Manual, which was developed to help a waste generator through the waste management process.

Authored a Low-Level Radioactive Waste Classification Program Plan, which was used as a guidance to classify waste based on direct and indirect measurements of radionuclides.

Designed a sampling methodology for 41 mercury-contaminated, mixed waste containers to develop scaling factors for waste classification and offsite disposal.

Compiled material (e.g., process equipment, structural steel and concrete, roofing, HVAC and electrical equipment, etc.) inventories for contaminated facilities at a nuclear fuel reprocessing facility using as-built drawings. Using the material inventories, the amount of waste generated and costs of labor, equipment, and materials corresponding to the D&D and closure of contaminated facilities were estimated.

Analyzed and assessed laboratory data containing radionuclide activities, contamination values, and dose rates from various waste materials in order to classify and dispose of the waste in accordance with NRC waste classification values in 10 CFR 61.55 and disposal facility waste acceptance criteria.

Authored the Data Quality Objectives and Sampling and Analysis Plan for the following projects:

- Decontamination and disposal of radiologically contaminated soil and concrete debris associated with radioactivity release in the vicinity of above ground storage tank pad.

- RCRA hazardous characterization and NRC radiological classification of waste generated from the D&D of a nuclear-fuel-pool cooling tower. Chemical characterization was done in accordance with 40 CFR 261 and 262, and NRC waste classification was done in accordance with 10 CFR 61.55.

- NRC classification of waste generated from the shutdown of high-level radioactive waste (HLW) vitrification operations and the corresponding D&D of HLW storage tanks.

- Classification, management, and disposal of expended material from a decommissioned HLW vitrification facility.

Proposal Member, Moody Air Force Base Performance Based Remediation Task Order, Georgia, Department of the Air Force, Cost Plus Incentive Fee, 9/2007, $10 million: Acted as a lead member on a team that authored a proposal describing our technical/management approach, regulatory experience, approach risks, and price for cleaning up 12 SWMUs contaminated with various chemical constituents. The objectives of the technical and cost proposal were to describe the necessary activities and costs to achieve one of the following site goals: No Further Action site closure, production of a risk based closure plan/exit strategy, or reduction of site life cycle costs.

Proposal Member, SPRU Land Areas, Niskayuna, New York, DOE, Cost Plus Incentive Fee, 6/2007, $35 million: As part of a team including CAPE, TPMC, and ECOR; helped produce a technical, management, and cost proposal for the environmental restoration services of approximately 15 acres of radiologically contaminated soil and groundwater. The objective of the proposal was to detail our approach for cleaning up the contaminated areas in accordance with specified criteria, transporting and disposing of wastes in a permitted facility, generating final closure reports for the site, and restoring the area to existing conditions for unrestricted release.

Proposal Manager, Buffalo District Environmental Services, Buffalo, New York, USACE, Task Order Not to Exceed, 5/2007, $7.5 million: Led a team consisting of URS and Chesapeake Nuclear Services personnel that authored a proposal for an IDIQ Small Business Set Aside contract involving environmental support efforts within the Great Lakes and Ohio River Division boundaries. The proposal detailed the technical requirements needed to furnish studies, materials, labor, investigations, equipment, permits, etc that could be necessary for environmental support at hazardous waste sites with emphasis on radioactive waste and site closure.

Proposal Member, St Louis District HTRW, St Louis, Missouri, USACE, Task Order Not to Exceed, 4/2007, $4 million: As part of a proposal team led by the 8a small business LATA and EDI, prepared a task order proposal that included information on capabilities, past performance, and price/cost for HTRW removal/remedial activities managed by the St Louis District. The proposal included detailed descriptions of the team's field engineering, remedial work, and management services expertise and experience with federal HTRW programs primarily involving low-level radioactive material removal.

Proposal Member, Moab Project Site, Moab, Utah, Department of Energy, Cost Plus Award Fee, 1/2007, $102 million: As part of a large proposal team consisting of many people from WGI, SEC, and URS, helped to contribute to the production of the task order and cost proposal for the remediation of a portion of the Moab Project Site to the standards set forth in 40CFR192, while placing the materials in an NRC-approved disposal cell near Crescent Junction, Utah. Some of the major task order objectives that were detailed in the proposal include completion of a Final RAP, excavation and management of residual radioactive material, shipment of the excavated material, and management of the material at the disposal site.

Proposal Member, Mound Operable Unit 1 (OU-1) Project, Miamisburg, Ohio, Department of Energy, Cost Plus Fixed Fee, 8/2006, $29 million: As part of a proposal team including CAPE, TPMC, ECOR, Morphic, and WGI, assisted in writing and producing a technical and cost proposal to provide remediation and disposal of sanitary, hazardous, and low-level radioactive soils from the OU-1 Project Area at the DOE Mound Site. The 25 page proposal documented work activities such as sampling and analyses, contaminated materials

removal, site closure to acceptable industrial reuse standards, and compliance with CERCLA.

Engineer, Stormwater Pollution Prevention Plan, Greeneville, Tennessee, John Deere Power Products, Fixed Price, 9/2006, $15K: Performed the surface water hydrology modeling and detention pond analyses for a 20-acre site using TR-55 and Pond-2 computer programs. The modeling and design procedures were necessary to complete the Plan and receive approval for a permit to expand a 14-acre truck parking area. Activities included watershed delineation, soils and terrain investigation, runoff determination, and surface water/erosion control structure design.

Engineer/Consultant, Feasibility Study, Parks Township, Pennsylvania, U.S. Army Corps of Engineers, Cost Plus Fee, 2004-2006, $500K: Co-authored a feasibility study report for a 44-acre, NRC-licensed disposal area in Pennsylvania. The site consisted of a number of shallow, unlined trenches within which radioactive wastes were disposed of throughout the 1960s. The site is to be cleaned up under the Formerly Utilized Site Remedial Action Program, with USACE guidance, and in accordance with the CERCLA process.

Engineer/Consultant, CERCLA Documents, Middlesex, New Jersey, U.S. Army Corps of Engineers, Time and Materials, 2002-2005, $5M: Co-authored several documents for a remedial action involving contaminated soils and groundwater at a facility formerly used to sample, store, test, and transfer uranium, thorium, and beryllium contained ores. The purpose of the Superfund process was to define the nature and extent of contamination, identify and discuss potential applicable or relevant and appropriate requirements, identify and screen remedial technologies, develop remedial action alternatives, and recommend an appropriate cleanup process.

Consultant/Citizen, Advisory Board, Lewiston, New York, U.S. Army Corps of Engineers/Town of Lewiston, 2003-Present: Involved with the Lake Ontario Ordnance Works (LOOW) Restoration Advisory Board, which is made up of a panel of community advocates, environmental professionals, and government agencies to promote the satisfactory remediation of the LOOW site that has been contaminated over many years from various chemical and radiological activities. The Board is made up of many committees that work together to ensure the greatest protection of human health and the environment within the Niagara County community.

Support Engineer, Landfill Design, Clive, Utah, Envirocare of Utah, Fixed Price, 10/2002, $20K: Performed the preliminary design and cost estimate of a mixed waste landfill equipped with a 6-ft multilayer cover and double liner leachate collection system. The landfill was constructed to contain excavated soils and sediments from dewatered ponds, storage areas, and facility D&D waste contaminated with various metals and radionuclides.

Support Engineer, Remedial/Cover Design, Niagara Falls, New York, Dupont, Cost Plus Fee, 2001-2002, $100K: Supported the design of a groundwater remediation and hazardous waste cover system installed to clean up and prevent further migration of hazardous contamination caused from solid waste dumping. The design involved the installation of a trench system and a RCRA cover.

Consultant, Landfill Closure, New York, New York, CSX Real Property, Time and Materials, 5/2002, $10K: Performed an independent design and cost estimate review of a 10.5-acre cover that was constructed over an abandoned solid waste dump. The design included a groundwater collection system, post closure maintenance, and various closure activities including clearing and grubbing, grading and earthwork, geotextile installation, storm water controls, and gas venting system construction.

Consultant/Engineer, Phase 1 Environmental Site Assessment, Multiple Locations, Cardinal Health, Fixed Price, 12/2001, $10K: Performed Phase 1 environmental site assessments (ESAs) for a radiopharmaceutical company to evaluate potential environmental concerns that may be associated with the subject sites and the neighboring properties. The ESAs involved site reconnaissance and creation of reports in accordance with ASTM standards.

Consultant/Engineer, Design Review, Utah, Western Zirconium and Envirocare of Utah, Fixed

Price, 7/2001, $20K: Acted as expert reviewer for the closure design of portions of a decommissioned nuclear fuel reprocessing facility and the design of new disposal cells for a radioactive Class A waste disposal area at a licensed radioactive waste disposal facility.

Design/Field Engineer, Waste Characterization and Shipping, Billerica, Massachusetts, Dupont, Fixed Price, 7/2001, $10K: Designed and performed a sampling project for the characterization of mixed waste contained in 55-gal drums. The project included writing a health and safety plan, estimating the cost of the sampling activities, designing a sampling procedure, performing the drum sampling, and packaging the samples for shipment to the authorized laboratory.

Support Engineer, Superfund Soils and Facility Remedial Design, Glen Cove, New York, Li Tungsten/U.S. Environmental Protection Agency, Fixed Price, 2001, $500K: Assisted in the creation of a remedial design package intended to clean up an abandoned metal processing facility. The design involved large-scale excavation and characterization, packaging, and disposal of naturally occurring radioactive material. The deliverable included project specifications, cost estimations of all design activities, drawings of the remediation method and site conditions, and a bid package.

Design Engineer, Aboveground Storage Tank Containment Design Specifications, Spartanburg, South Carolina, Milliken, Time and Materials, 6/2001, $10K: Designed and authored specifications for a retention basin equipped with a geomembrane and sump for the secondary containment of process acids in an above ground storage tank.

Design/Support/Field Engineer, Soils and Facility Remedial Design, Long Island, New York, Brookhaven National Laboratory/U.S. Department of Energy, Fixed Price, 1999-2000, $500K: Prepared and designed the remedial action for four "areas of concern" containing radiologically contaminated soils and debris at a national laboratory. The action involved large-scale excavation, contamination controls, site restoration, and waste handling, stockpiling, separation, classification, and disposal.

Engineer/Field Engineer, Hazardous Waste Removal Design, Lewiston, New York, Town of Lewiston/U.S. Army Corps of Engineers, Fixed Price, 2000, $200K: Designed a demolition/remediation plan for an abandoned TNT pipeline made of vitrified clay and once used for processing ordnance.

Consultant/Engineer, Waste Brokering, Tri State Area, Lawley Service Insurance, Cost Plus Fee, 1996, $10K: Created and managed a database containing information on solid waste disposal and transfer facilities in the Tri-State area in order to mediate activities and set up contracts for waste transportation and disposal and landfill/facility insurance.

Support Consultant, Landfill Support/Permitting, Rotterdam Landfill, Time and Materials, 1996, $100K: Produced and restructured permits, engineering reports, policy plans, Environmental Impact Statement and other documentation for newly constructed and recently expanded solid waste facilities.

Support Engineer, Landfill Design, Seneca Falls, New York, Seneca Meadows, Cost Plus Fee, 1996, $50K: Designed solid waste landfill cells in accordance with the existing topography, state and federal regulations and guidelines, planimeter calculations, HELP model simulations, foundation analyses, liner technologies, etc.

Field Engineer/Manager, Landfill Cap, Ovid, New York, Superior Disposal, Time and Materials, 1996, $100K: Designed, coordinated, and managed the construction of an interceptor drainage trench, clay wall barrier, landfill gas emission system, and geomembrane cap for an abandoned construction and demolition landfill. The closure construction activities were performed using heavy machinery, excavation crews, survey equipment, design specifications, etc.

Support Consultant/Engineer, Underground Storage Tank Removal, Youngstown, New York,

Yellow Goose Service Station, Fixed Price, 1995, $40K: Designed the remediation and closure of two underground storage tanks and the associated contaminated soils at an abandoned gas station.

Field Engineer, Indoor Air Sampling, Buffalo, New York, Channel 7 News, Fixed Price, 1995, $10K: Sampled indoor HVAC systems to determine indoor air quality through identification of hazardous fungal and bacterial cultures.

Education

2005: MBA, Marketing, Management, and Negotiations, SUNY at Buffalo
1998: MS, Environmental Engineering and Science, Clemson University
1995: BS, Environmental Engineering Sciences, University of Florida

Registration/Certification/Specialized Training

2016: 40-hour Hazardous Waste Operations and Emergency Response (HAZWOPER) refresher
2015: NYSDEC Erosion and Sediment Control
2015: NCEES Record Completed
2014: 10-hour OSHA Construction Industry
2014: 30-hour OSHA Construction Industry
2013: FEMA Training Certification
2013: NYSDOH Asbestos Project Designer Certification
2013: NYSDOT Transportation Enhancement Program and Federal Aid Highway Reimbursement Program
2012: Arsenic - Health and Remediation Applications
2012: Hazardous Materials Management
2011: Building Demolition and Environmental Remediation Planning and Execution
2011: USACE Great Lakes and Ohio River Division Construction Roundtable
2010: Construction Quality Management (CQM) for Contractors – USACE - 5 year period
2010: AHA Heartsaver First Aid Program Certification
2009: New York State Stormwater Management Certification
2009: Construction Administration for Design Professionals
2002: Professional Engineer, New York, 079402
2001: Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM)
1998: 40-hour HAZWOPER – initial/original course
1995: Engineer In Training, Florida

Publications and Presentations

"Radioactive Materials in Niagara County," presented to the Monroe County Environmental Law Committee in November 2013 to help explain the issue of radioactive materials in the subsurface throughout many areas within WNY primarily centered in Niagara Falls.

"Radioactive Materials in Niagara County," presented to the Buffalo Environmental Law Committee in April 18, 2013 to address the growing issue of radioactive materials in the subsurface throughout many areas within WNY primarily centered in Niagara Falls as a result of historical metallurgical processes.

"Long-Term Performance Evaluation for a Multi-Layer Closure Cap," presented at the 2001 International Containment & Remediation Technology Conference, Orlando, Florida and published in ASCE's Practice Periodical of Hazardous, Toxic and Radioactive Waste Management, 2004.

"Landfill Leachate Characterization and Lagoon Treatment", presented at Clemson University in 1998 to the Graduate School of Environmental Systems Engineering in partial fulfillment of the requirements for the degree of Master of Science.
