The Company shall (a) conduct and complete all investigations, studies, sampling, and testing, and all remedial, removal, and other actions necessary to clean up and remove all Hazardous Materials, on, from or affecting the Facility (i) in accordance with all applicable federal, state, and local laws, ordinances, rules, regulations, and policies, (ii) to the satisfaction of the Agency and (iii) in accordance with the orders and directives of all federal, state, and local governmental authorities; and (b) defend, indemnify, and hold harmless the Agency, its employees, agents, officers, and members, from and against any claims, demands, penalties, fines, liabilities, settlements, damages, costs, or expenses of whatever kind or nature, known or unknown, contingent or otherwise, arising out of, or in any way related to (i) the presence, disposal, release or threatened release of any Hazardous Materials which are on, from or affecting the soil, water, vegetation, buildings, personal property, persons, animals or otherwise, (ii) any bodily injury, personal injury (including wrongful death) or property damage (real or personal) arising out of or related to such Hazardous Materials, (iii) any lawsuit brought or threatened, settlement reached, or governmental order relating to such Hazardous Materials, and/or (iv) any violation of laws, orders, regulations, requirements, or demands of government authorities, or any policies or requirements of the Agency, which are based upon or in any way related to such Hazardous Materials, including, without limitation, attorney and consultant fees, investigation and laboratory fees, court costs, and litigation expenses. For purposes of this Section, "Hazardous Materials" includes, without limitation, any flammable explosives, radioactive materials, hazardous materials, hazardous wastes, hazardous or toxic substances, or related materials defined in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. Sections 9601, et seq.), the Superfund Amendments and Reauthorization Act of 1986 (Pub.L. No. 99-499, 100 stat. 1613 (1986)), the Hazardous materials Transportation Act, as amended (49 U.S.C. Sections 1801, et seq.), and in the regulations adopted and publications promulgated pursuant thereto, or any other federal, state or local environmental law, ordinance, rule or regulation. The provisions of this Section shall be in addition to any and all other obligations and liabilities the Company may have to the Agency at common law, and shall survive the transactions contemplated herein.

-10-

(c) Notwithstanding the provisions of subsections (a) and (b) hereof, the Company may in good faith contest the validity or the applicability of any requirement of the nature referred to in such subsections (a) and (b) by appropriate legal proceedings conducted in good faith and with due diligence. In such event, the Company may fail to comply with the requirement or requirements so contested during the period of such contest and any appeal therefrom, unless the Agency shall notify the Company that by failure to comply with such requirement or requirements, the Facility or any part thereof may be subject to loss, penalty or forfeiture, in which event the Company shall promptly take such action with respect thereto or provide such security as shall be satisfactory to Agency.

(d) Notwithstanding the provisions of this Section 6.6, if, because of a breach or violation of the provisions of subsections (a) or (b) hereof (without giving effect to subsection (c) hereof), the Agency or any of its members, officers, agents, or employees, shall be threatened with a fine or imprisonment, then, upon notice from the Agency, the Company shall immediately provide legal protection and/or pay amounts necessary in the opinion of the Agency and its members, officers, agents and employees sufficient, to the extent permitted by applicable law, to remove the threat of such fine or imprisonment.

(e) Notwithstanding any provision of this Section, the Agency retains the right to defend itself in any action or actions which are based upon or in any way related to such Hazardous Materials. In any such defense of itself, the Agency shall select its own counsel, and any and all costs of such defense, including, without limitation, attorney and consultant fees, investigation and laboratory fees, court costs and litigation expenses, shall be paid by the Company.

Section 6.7 Depreciation Deductions and Investment Tax Credit. The parties agree that, as between them, the Company shall be entitled to all depreciation deductions with respect to any depreciable property comprising a part of the Facility and to any investment credit with respect to any part of the Facility.

(a) Nothing contained in this Lease shall prevent the consolidation of the Agency with, or merger of the Agency into, or transfer of title to the entire Facility to any other public benefit corporation or political subdivision which has the legal authority to own and lease the Facility, provided that upon such consolidation, merger or transfer, the due and punctual performance and observance of all the agreements and conditions of this Lease to be kept and performed by the Agency shall be expressly assumed in writing by the public benefit corporation or political subdivision resulting from such consolidation or surviving such merger or to which the Facility shall be transferred.

(b) Within thirty (30) days after the consummation of any such consolidation, merger or transfer of title, the Agency shall give notice thereof in reasonable detail to the Company.

(iii) take any other action at law or in equity which may appear necessary or desirable to collect the payments then due or thereafter to become due hereunder and under the PILOT Agreement, to secure possession of the Facility, and to enforce the obligations, agreements or covenants of the Company under this Lease and under the PILOT Agreement.

PROJECT DESCRIPTION/SCHEDULE

**Seneca Market I, LLC
Seneca Harbor Hotel, Watkins Glen, New York
Brownfield Cleanup Program Application**

Project Description and Schedule

Background

Seneca Market I, LLC and Seneca Market II, LLC (hereafter referred to jointly as Seneca Market) own 0.29 and 0.2-acre parcels, respectively within the block bounded by Franklin, First, Decatur Streets, and the Finger Lakes Railway right-of-way in the Village of Watkins Glen, Schuyler County, New York (see Figures 1 and 2). Seneca Market has an option on a 1.76-acre parcel and 0.13-acre parcel within this same block. The approximately 0.29-acre parcel, located along North Franklin Street, contains the Seneca Market building, a multipurpose shopping and office building located along the northern side of the property. The approximately 0.20-acre parcel contains the former Glen Vintage Auto Museum (presently unoccupied). The western portion of the 1.76-acre parcel contains a large block building that was formerly used as a bus garage and is currently leased to Seneca Hardwoods, a manufacturer of custom flooring. A building foundation, reputedly a remnant of a former Welch's Grape facility, also remains on the 1.76-acre parcel.

The 0.13-acre parcel contains a structure deemed the "former dry cleaning building." This is a two-story brick building that includes two (2) unoccupied single-story brick sheds to the east. A VFW building is located immediately south of the former dry cleaning building, but is outside of the 0.13-acre property limits. The former dry cleaning building is presently occupied by a real estate firm.

The parcels have a history of use that dates back to the 1860s. The Seneca Market building has formerly been used as a foundry; a flour and grist mill; and most recently retail shops on the first floor and professional office space on the second and third floors. A marble works building was formerly present just south of Seneca Market until it was destroyed in 1970. The former Auto Museum was previously used for miscellaneous storage, in particular auto parts. The dry cleaning building has mainly been used for retail businesses, a machine shop, and for dry cleaning operations.

Environmental Investigations and Remedial Efforts

Chlorinated Organic-Impacted Area

A 1991 Environmental Assessment of the Site revealed that groundwater under a portion of the property (i.e., 20 Franklin Street at the corner of North Franklin and First) was contaminated with chlorinated organic compounds associated with the former dry cleaning operations. NYSDEC subsequently listed an approximate 0.3-acre portion of the property as a Class 2 inactive hazardous waste

site (i.e., "the North Franklin Street Site" - NYSDEC Registry No. 8-49-002). The inactive hazardous waste site encompasses the 0.13-acre parcel, including the former dry cleaner building, and a portion of the 0.20-acre parcel. A Remedial Investigation/Feasibility Study (RI/FS) performed and completed in 1993 by URS Consultants under a Standby Contract with the NYSDEC delineated the extent of soil and groundwater contamination on and adjacent to the Franklin Street site. URS subsequently designed remediation systems to treat soil and groundwater, pursuant to a Record of Decision (ROD) signed in 1994. The remedial measures included a soil vapor extraction (SVE) system to treat shallow VOC-impacted soil, and a groundwater pump and treat system to extract and treat groundwater adjacent to the former dry cleaner building. The systems were placed into operation in Fall of 1996. Confirmatory soil samples collected during remediation indicated that SVE had effectively cleaned up the soil near the extraction wells, underneath the former auto museum, and to the rear of the former dry cleaning building. However, in the process of collecting the confirmatory soil samples, it was discovered that the soil contaminant concentrations in the immediate vicinity of the dry cleaning building were much higher and extended deeper into clay than previously thought. SVE did not clean up this area of highly contaminated soil to cleanup objectives despite subsequent modifications to and extended operation of the SVE system. Operation of the SVE system was suspended in March 1998 and operation of the groundwater treatment system was suspended at the end of April 1998, pending the results of further investigations.

In 1998/1999, URS performed additional soil investigations and cleanup technology feasibility studies to evaluate deeper soil contamination. It was concluded that chlorinated organic compounds remained on-site in a small area directly adjacent to and outside the former dry cleaning building, as well as beneath the dry cleaner building at depths greater than 16 feet. A chemical oxidation pilot study conducted from March through May 2000 significantly reduced the mass of chlorinated contaminants in Site soils. Despite the reduction, localized areas of residual chlorinated organic contamination remain in soils and groundwater adjacent to and beneath the former dry cleaner building. In March 2004, an active venting system was installed within the former dry cleaner building to control the potential indoor migration of vapors from the residual contamination. In addition, deed restrictions were placed on the inactive hazardous waste site to prevent usage of groundwater and contact with residual soil contamination.

Other Areas

A Phase I Environmental Site Assessment (ESA) was performed in November 1991 for the parcels on the eastern portion of the subject property. The ESA identified several potential environmental conditions including possible underground storage tanks, drums, an inoperable piston arrangement for a hydraulic lift, and oil spills near the corner of First and Decatur Streets. Petroleum hydrocarbons, lower levels of chlorinated hydrocarbons, and several elevated inorganic compounds related to the above described conditions were detected in the

soil and groundwater during the RI/FS. Two areas on the larger parcel that contained soil heavily contaminated with benzene, toluene, ethylbenzene, and xylene (BTEX) were excavated and bioremediated off-site in the late 1990s. As such, residual BTEX contamination in soil and groundwater may exist proximate to these historic source areas. In addition, the RI identified BTEX contamination in soil/fill and groundwater beneath the former bus garage near the former dry cleaner building. While SVE and/or insitu oxidation treatment of the chlorinated organic impacted soils may have partially addressed the BTEX impacted soils, there is likely residual BTEX contamination in soil/fill beneath the former bus garage.

Intended Future Use of Site

Seneca Market plans to redevelop the approximately 2.38-acre site as a hotel complex (see Figure 3). An additional 0.19-acre parcel along the railroad and 0.21-acre property south of First Street will also be incorporated in the plan to provide space for a hotel veranda and ancillary parking, respectively. With the exception of the Seneca Market building, all buildings and foundations within this entire 2.77-acre site will be demolished to facilitate redevelopment efforts. Areas within the site that are not incorporated into the hotel or related structures will be covered by asphalt parking areas, driveway and landscaping.

Schedule

A proposed Project Schedule is attached.

References

The Brownfield Cleanup Program (BCP) Application requests that any existing investigation documents be enclosed with the BCP Application. The investigation and remedial work performed to-date on the site has been led by the NYSDEC. Consequently, the NYSDEC already maintains copies of these documents on file. However, for illustration purposes Attachment 3 presents the planned hotel redevelopment relative to areas of soil and groundwater contamination as determined during previous investigations.
