Analysis Report: Fuel Identification

Client: DAY
Analysis: 310.13
Matrix: Soil
Extraction Date: 05/31/2005

Lab ID	Client ID	Result	Analysis Date:
D0618-06B	MW-07	see below	06/06/2005
D0618-07B	PW-3	see below	06/06/2005
D0618-08B	MW-7	see below	06/06/2005

Fuel Identification:

Sample D0618-06B contains resolved and unresolved peaks in the retention time range for low boiling-point petroleum product such as kerosene or jet fuel.

Sample D0618-07B contains TPH consisting of primarily a single large peak. This indicates a single chemical component, rather than a petroleum product, which is a complex mixture of a large number of chemical components. This extract could be analyzed by GC/MS to identify this large peak.

Sample D0618-08B does not contain sufficient hydrocarbons to identify a petroleum product.

Analytical Report Cover Page

For Lab Project # 06-2003

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil or solid samples have been reported on a dry weight basis, unless qualified "reported as received".

This page is part of a multipage document. This document may not be reproduced except in its entirety, without the prior consent of Paradigm Environmental Services, Inc.

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.
"E" = Result has been estimated, calibration limit exceeded.
"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.
"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.
"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

This report contains a total of 3 pages.

For Lab Project # AW-2392

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil or solid samples have been reported on a dry weight basis, unless qualified "reported as received".

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.
"E" = Result has been estimated, calibration limit exceeded.
"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.
"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.
"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

JAN 1 0 2007

For Lab Project # 06-3925

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil or solid samples have been reported on a dry weight basis, unless qualified "reported as received".

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.
"E" = Result has been estimated, calibration limit exceeded.
"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.
"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.
"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

This report contains a total of 4 pages.

Analytical Report Cover Page

For Lab Project # 07-0890

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil or solid samples have been reported on a dry weight basis, unless qualified "reported as received".

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.
"E" = Result has been estimated, calibration limit exceeded.
"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.
"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.
"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

This report contains a total of 6 pages.

Analytical Report Cover Page

Day Environmental

For Lab Project # 08-2610
Issued August 1, 2008
This report contains a total of 7 pages

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil or solid samples have been reported on a dry weight basis, unless qualified "reported as received".

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

NYSDOH ELAP does not certify for all parameters. Paradigm Environmental Services or the indicated subcontracted laboratory does hold certification for all analytes where certification is offered by ELAP unless otherwise specified.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.
"E" = Result has been estimated, calibration limit exceeded.
"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.
"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.
"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

Analytical Report Cover Page

Day Environmental

For Lab Project # 08-2609
Issued August 1, 2008
This report contains a total of 9 pages

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil or solid samples have been reported on a dry weight basis, unless qualified "reported as received".

Each page of this document is part of a multipage report. This document may not be reproduced except in its entirety, without the prior consent of Paradigm Environmental Services, Inc.

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

NYSDOH ELAP does not certify for all parameters. Paradigm Environmental Services or the indicated subcontracted laboratory does hold certification for all analytes where certification is offered by ELAP unless otherwise specified.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.
"E" = Result has been estimated, calibration limit exceeded.
"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.
"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.
"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

Day Environmental

For Lab Project # 10-0295
Issued February 1, 2010
This report contains a total of 6 pages

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil/sludge samples have been reported on a dry weight basis, unless qualified "reported as received". Other solids are reported as received.

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

NYSDOH ELAP does not certify for all parameters. Paradigm Environmental Services or the indicated subcontracted laboratory does hold certification for all analytes where certification is offered by ELAP unless otherwise specified.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.
"E" = Result has been estimated, calibration limit exceeded.
"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.
"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.
"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

BR-02FR

BR-02R

BR-03R

11/12/2009 THRU 11/18/2009

ROCK DISCONTINUITY CLASSIFICATION LEGEND

The orientation, degree of opening and weathering of prominent discontinuities encountered in the rock core are described by the following designations. Generally, discontinuities that are considered to be minor (e.g., closed and/or fresh) are not identified. Similarly, discontinuities within fracture zones are not identified and the rock core is described as "fractured and weathered rock".

Orientation

H = Horizontal 0 °

LA = Low Angle (less than 45 °)

HA = High Angle (greater than 45 °)

Degree of Opening

C = Closed; core pieces fit together tightly with less than 1/16 inch opening.

SO = Slightly Open; 1/16 inch to 1/8 inch opening.

O = Open; greater than 1/8 inch opening.

Weathering

F = Fresh; joints generally unweathered, but may show slight staining.

S = Slight; joints stained and may contain trace amounts of clay filling.

M = Moderate; joints discolored and weathered, often with clay filling.

V = Severe; joints weathered and worn with fractured rock evident.

DATA USABILITY SUMMARY REPORT
ANDERSON CLEANERS – JAMESTOWN, NY

COLUMBIA ANALYTICAL SERVICES
SAMPLE DELIVERY GROUP (SDG)
Trench-1 (2.0)

MITKEM CORPORATION
SAMPLE DELIVERY GROUPS (SDGs)
D0410, D0523, D0529, D0603, D0618

Deliverables

The above referenced data packages for the samples collected at the Anderson Cleaners Site contain all required deliverables consistent with the requirements of the EPA Region II guidelines. The sample specific analyses performed included Volatile Organic Compounds (VOC), Semivolatile Organic Compounds (SVOC), Pesticides/Polychlorinated Biphenyl Compounds (P/PCB), Total Petroleum Hydrocarbons (TPH), Metals, and Cyanide. Analyses were performed by EPA SOW OLM04.2 for organics, EPA SOW ILM04.1 for inorganics and EPA Method 310.13 for TPH.

The data have been validated according to the protocols and quality control (QC) requirements of the analytical Statement of Work (SOW) or method, the USEPA Region II Standard Operating Procedure (SOP HW-6, Revision 12, March 2001) for CLP Organics Data Review and Preliminary Review, US EPA Region II SOP (HW-2, Revision 11, January 1992) for the Evaluation of Metals Data for the Contract Laboratory Program, and NYSDEC DER-10 Technical Guidance for Site Investigation and Remediation - Appendix 2B Guidance for the Development of Data Usability Summary Reports. The TPH data was evaluated using the reviewer's professional judgment.

The validation report pertains to the samples indicated in each individual section:

Chains-of-Custody

The Chains-of-Custody (COCs) were reviewed for completeness and accuracy. There were no discrepancies observed with the samples presented on the COC, and all tests specified on the COC were performed for the designated samples.

Organics

The following items/criteria were reviewed for this report:

- SDG Narrative and deliverables compliance
- Holding times and sample preservation
- Organic analysis data sheets (Form I)
- System Monitoring Compound (SMC) recovery summary forms
- Matrix Spike/Matrix Spike Duplicate (MS/MSD) recovery summary forms
- Laboratory Control Sample/Laboratory Control Sample Duplicate (LCS/LCSD) recovery summary forms

- Positive results reported for method blanks
- Gas Chromatography (GC)/Mass Spectroscopy (MS) tuning summary forms
- Initial and continuing calibration summary forms
- Internal standard area and retention time summary forms
- P/PCB cleanup check summary forms
- GC column percent difference summary forms

The items listed above were technically and contractually in compliance with the exceptions discussed in the text below. The data have been validated according to the procedures outlined above and qualified accordingly. This report presents QC outliers that resulted in qualification of data only unless otherwise indicated.

Please note that any results qualified "U" due to blank contamination may be then qualified (J) due to another action. Therefore, the results may be qualified (UJ) due to the culmination of the blank contaminations and actions from other exceedences of QC criteria.

- The sample presented in the following table was reanalyzed at a dilution due to elevated concentrations of target analytes. The original result for vinyl chloride exceeded the calibration range in the undiluted analysis and was qualified (E) by the laboratory, but was non-detect in the diluted analysis. The result from the undiluted analysis will be reported, is considered estimated, and is qualified "J".

- The following table presents blanks with contaminants and the samples associated with the blanks that had results qualified as a consequence of the blank contamination. Detected sample concentrations of methylene chloride, 2-butanone, toluene or acetone (common laboratory contaminants) less than ten times (10x) the highest associated blank (after taking sample dilution levels, percent moisture and sample volume into account) are negated and qualified with a "U". For all other compounds, an action level of five times (5x) the highest associated blank concentration is used.

The following items/criteria were reviewed for this report:

- Case narrative and deliverable requirements
- Holding times and sample preservation
- Inorganic analysis data sheets (Form I)
- Initial and continuing calibration verifications
- CRDL sample recoveries
- Lab blank data
- ICP interference check sample recoveries
- Matrix spike/matrix spike duplicate recoveries
- Laboratory duplicate sample precision
- Laboratory Control Sample (LCS) results
- Serial Dilution results

The items listed above were technically and contractually in compliance with the exceptions discussed in the text below. The data have been validated according to the procedures outlined above and qualified accordingly. This report presents all QC outliers that resulted in qualification of data only unless otherwise indicated.

Please note that any results qualified "U" due to blank contamination may be then qualified (J) due to another action. Therefore, the results may be qualified (UJ) due to the culmination of the blank contaminations and actions from other exceedences of QC criteria.

- The following table present analytes that failed 90-110% recovery in the initial calibration (IC) or continuing calibration (CC) standard(s) and/or failed 80-120% recovery in the CRDL (contract required detection limit) standard.

STD ID	Analyte	Recovery	Affected Sample(s)	Qualifier

- All initial calibration blanks (ICB), continuing calibration blanks (CCB), and method blanks were non-detect for target analytes or the analyte concentration was less than the CRDL.

- The following table presents field blanks with contaminants and the sample(s) associated with the blank that had results qualified as a consequence of the blank contamination. An action level of 10 times (10x) the associated blank contamination (after taking sample dilution levels, percent solids, and sample volume into account) are negated and qualified with a "U".

Section 2 - Shipping & Packaging Information

2.1) Shipping Volume & Frequency 200-300 tons

☒ One Time Only ☐ Year ☐ Quarter ☐ Month

2.2) DOT Shipping Name RQ Hazardous waste, solid, n.o.s., (F001,D039,D043) 9 NA3077 III

2.3) Is this waste surcharge exempt? ☐ Yes ☐ No
If yes, please attach a surcharge exemption form, found in Section 2 of the EQ Resource Guide.

2.4) Packaging (check all that apply)
☐ Bulk Solid (Yd³< 2000 lbs/yd³)
☒ Bulk Solid (Ton >2000 lbs/yd³)
☐ Bulk Liquids (Gallon)
☐ Totes, Size _____
☐ Cubic Yard Boxes/Bags
☐ Drums
☐ Other (palletized, 5 gal. Pail, etc.) _____

Quoted bulk disposal charges for solid materials will be billed by the cubic yard, if the waste density is less than 2,000lbs./cubic yard. If waste density is greater than 2,000 lbs./cubic yard, then bulk disposal charges will be billed by the ton, regardless of the approved container.

Section 3 - Physical Characteristics

3. 1) Color black 3.2) Odor none

3.3) Does this waste contain any "Potentially Odorous Constituents" as defined in the EQ Resource Guide? (Section 3) ☐ Yes ☒ No

3.4) Physical State at 70 F:	☒ Solid	☐ Dust/Powder	☐ Liquid	☐ Sludge	
3.5) What is the pH of this waste?	☐ <2	☐ 2.1-49	☒ 5-10	☐ 10.1-12.4	☐ ≥12.5
3.6) What is the flash point of this waste?	☐ <90 F	☐ 90-140 F	☐ 140-199 F	☒ >200 F	
3.7) Does this waste contain? (check all that apply)		☒ None	☐ Free Liquids	☐ Oily Residue	☐ Metal Fines
☐ Biodegradable Sorbants	☐ Amines	☐ Ammonia	☐ Dioxins	☐ Furans	☐ Biohazard
☐ Shock Sensitive Waste	☐ Reactive Waste	☐ Radioactive Waste	☐ Explosives	☐ Pyrophoric Waste	☐ Isocyanates
☐ Asbestos - non-friable	☐ Asbestos - friable				

Section 4 - Waste Composition and Generating Process

4. 1) Describe the physical composition of the waste (i.e., soil, water, PPE, debris, key chemical compounds, etc.)

soil/stones	to 90-99 %	vinyl chloride	to trace %
misc. PPE/Debris	to 1-10 %	perchloroethylene	to trace %

Total: 100%

4.2) Provide a *detailed* description of the process generating this waste (attach flow diagram if available).

Section 7 - Non-Hazardous Wastes

For a complete list of non-hazardous waste codes, please refer to Section 7 of the EQ Resource Guide

Please list applicable waste code: _____

7. 1) Is this a Michigan non-hazardous liquid industrial waste? ☐ Yes ☒ No
7.2) Is this a Universal waste? ☐ Yes ☒ No
7.3) Is this a Recyclable Commodity? (e.g.: computer monitors, free mercury, etc.) ☐ Yes ☒ No
7.4) Is this waste a recoverable petroleum product? ☐ Yes* ☒ No
7.5) Is this waste used oil as defined by 40 CFR Part 279? ☐ Yes* ☒ No

If you answered 'yes' to questions 7.4 or 7.5 please attach the Waste Characterization Report Addendum found in Section 7 of the EQ Resource Guide.

Section 8 - TSCA Information

8. 1) What is the concentration of PCBs in the waste? ☒ None ☐ 0-5 ppm ☐ 6-49 ppm ☐ 50-499 ppm ☐ 500+ ppm
8.2) Does the waste contain PCB contamination from a source with a concentration ≥ 50 ppm? ☐ Yes ☒ No
If you answered "no" to 8.1 and 8.21 please skip to Section 9.
8.3) Has this waste been processed into a non-liquid form? ☐ Yes ☐ No
If yes, what was the concentration of PCBs prior to processing? ☐ N/A ☐ 0-499 ppm ☐ 500+ ppm
8.4) Is the non-liquid PCB waste in the form of *soil*, rags, debris, or other contaminated media? ☐ Yes ☐ No
8.5) Are you a PCB capacitor manufacturer or a PCB equipment manufacturer? ☐ Yes ☐ No
8.6) Has the PCB Article (e.g., transformer, hydraulic machine, PCB-contaminated electrical equipment) been drained/flushed of all PCBs and decontaminated in accordance with 40 CFR 761.60(b)? ☐ N/A ☐ Yes ☐ No

Section 12 - Certification

I certify that all information (including attachments) is complete and factual and is an accurate representation of the known and suspected hazards, pertaining to the waste described herein. I authorize EQ's Resource Team to add supplemental information to the waste approval file, provided I am contacted and give verbal permission. I authorize EQ's Resource Team to obtain a sample from any waste shipment for purposes of verification and confirmation. I agree that, if EQ approves the waste described herein, all such wastes that are transported, delivered, or tendered to EQ by Generator or on Generator's behalf shall be subject to, and Generator shall be bound by, the attached Standard Terms and Conditions.

Instructions

Column 1 - Identify all U.S. EPA hazardous waste codes that apply to this waste shipment.
Column 2- Choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
Column 3- Enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49 (c) - soil, or 268.45 - debris.
Column 4- Enter the letter of the appropriate paragraph from pages 1-2 of this form.
Column 5- For F001 - F005, F039, D001 - D043, Debris and Contaminated Soil: please enter the Reference Number(s) for any constituents in your waste stream subject to treatment The Reference Number(s) can be found in the EQ Resource Guide, LDR/UHC Constituent Table.

5. THIS CONTAMINATED SOIL (DOES) / DOES NOT (CIRCLE ONE) CONTAIN LISTED HAZARDOUS WASTE AND (DOES) / DOES NOT (CIRCLE ONE) EXHIBIT A CHARACTERISTIC OF HAZARDOUS WASTE AND (IS SUBJECT TO) / COMPLIES WITH (CIRCLE ONE) THE SOIL TREATMENT STANDARDS AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations. If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR; if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

Appendix 3C Fish and Wildlife Resources Impact Analysis Decision Key	If YES Go to:	If NO Go to:
1. Is the site or area of concern a discharge or spill event?	13	2
2. Is the site or area of concern a point source of contamination to the groundwater which will be prevented from discharging to surface water? Soil contamination is not widespread, or if widespread, is confined under buildings and paved areas.	13	3
3. Is the site and all adjacent property a developed area with buildings, paved surfaces and little or no vegetation?	4	9
4. Does the site contain habitat of an endangered, threatened or special concern species?	Section 3.10.1	5
5. Has the contamination gone off-site?	6	14
6. Is there any discharge or erosion of contamination to surface water or the potential for discharge or erosion of contamination?	7	14
7. Are the site contaminants PCBs, pesticides or other persistent, bioaccumulable substances?	Section 3.10.1	8
8. Does contamination exist at concentrations that could exceed ecological impact SCGs or be toxic to aquatic life if discharged to surface water?	Section 3.10.1	14
9. Does the site or any adjacent or downgradient property contain any of the following resources? i. Any endangered, threatened or special concern species or rare plants or their habitat ii. Any DEC designated significant habitats or rare NYS Ecological Communities iii. Tidal or freshwater wetlands iv. Stream, creek or river v. Pond, lake, lagoon vi. Drainage ditch or channel vii. Other surface water feature viii. Other marine or freshwater habitat ix. Forest x. Grassland or grassy field xi. Parkland or woodland xii. Shrubby area xiii. Urban wildlife habitat xiv. Other terrestrial habitat	11	10
10. Is the lack of resources due to the contamination?	3.10.1	14
11. Is the contamination a localized source which has not migrated and will not migrate from the source to impact any on-site or off-site resources?	14	12
12. Does the site have widespread surface soil contamination that is not confined under and around buildings or paved areas?	Section 3.10.1	12
13. Does the contamination at the site or area of concern have the potential to migrate to, erode into or otherwise impact any on-site or off-site habitat of endangered, threatened or special concern species or other fish and wildlife resource? (See #9 for list of potential resources. Contact DEC for information regarding endangered species.)	Section 3.10.1	14
14. No Fish and Wildlife Resources Impact Analysis needed.
