1.0 INTRODUCTION

Benchmark Environmental Engineering and Science, PLLC (Benchmark) has prepared this Periodic Review Report (PRR) to summarize the post-remedial status of New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP) Site No.s C915199E and C915199F, located at 2303 Hamburg Turnpike in the City of Lackawanna, Erie County, New York.

This PRR has been prepared for the Subject BCP Sites in accordance with NYSDEC DER-10 *Technical Guidance for Site Investigation and Remediation* (Ref 1). Institutional and Engineering Control (IC/EC) Certification Forms have been completed for the Sites and are included in Appendix A.

This PRR and the associated certifications have been completed on behalf of the BCP Site operator, Steel Sun, LLC, to document post-remedial activities covered by the Site Management Plan (Ref. 2). The post remedial period covered by this PRR is: March 15, 2018- March 15, 2020.

1.1 Site Background

In March of 2007 Tecumseh Redevelopment Inc. (Tecumseh) entered into a Brownfield Cleanup Agreement (BCA) with the New York State Department of Environmental Conservation (NYSDEC) to investigate and remediate an approximate 150-acre property located in Lackawanna, New York. The property, deemed the “Phase III Business Park Site” is located in the County of Erie, New York and encompasses tax parcel numbers 141.15-1-1, 141.15-1-2, and part of tax parcel number 141.11-1-50 per Erie County Tax Map records. The Phase III Business Park Site is bounded by Gateway Metroport Ship Canal and property owned by Gateway Trade Center to the north; the South Buffalo Railroad Company to the south; Phase II Business Park Site and the South Return Water Trench (SRWT) to the east; and other Tecumseh property to the west (see Figures 1 and 2). The 150-acre Phase III Business Park was originally deemed Brownfield Cleanup Program (BCP) Site No. C915199, but was subsequently subdivided into ten smaller parcels to facilitate remediation and redevelopment (see Figure 2). On August 20, 2012, the original BCA for Site C915199 was amended to cover the smaller Site III-1, with separate BCAs

issued and executed for the remaining nine BCP Sites (i.e., Sites III-2 through III-10, having BCP Site Nos. C915199b through C915199j).

In July 2014 Steel Sun, LLC arranged to lease from Tecumseh Sub-parcels III-5 (Site No. C915199e) and III-6 (Site No.C915199f), encompassing 22.6 acres of property, for construction and operation of a commercial-scale solar electricity generation system. Sub-parcels III-5 and III-6 were subsequently remediated to Track 4 restricted (commercial) use with site specific soil cleanup objectives (SCOs) consistent with the approved Remedial Action Work Plan. The final remedial measures implemented by Steel Sun included placement of acceptable cover material in areas not otherwise covered by asphalt roadway, pavement, etc.

1.2 Remedial History

1.2.1 Phase III Business Park

The approximate 150-acre Phase III Business Park was formerly part of the Bethlehem Steel Corporation (BSC) Lackawanna Works and housed several facilities used in BSC's steel manufacturing processes. Specific processes and steel making facilities performed on or proximate to the subject BCP Sites included:

- Open Hearth Furnaces
- Basic Oxygen Furnace
- Mold Warming and Preparation
- Electrical Substations
- Wastewater Treatment

Remedial Investigation (RI) activities on the Phase III Business Park were initiated in August 2008, with additional activities undertaken in late 2009 through early 2010. Some supplemental investigation work was also completed in April 2012.

The RI identified several Constituents of Concern (COCs) that were generally present across widespread areas of the Phase III Business Park Site, primarily in site soils and to a lesser extent in groundwater. These included polycyclic aromatic hydrocarbons (PAHs), arsenic,

lead, and mercury. Isolated areas of petroleum impact were also encountered. The Remedial Investigation/Alternatives Analysis (RI/AA) Report (Ref. 3) recommended remediation of “hotspot” slag/fill (characterized by more pronounced levels of COCs) and isolated groundwater/saturated soil impacts (affecting only select sites in the Phase III Business Park), with cover placement recommended as the final remedial measure under a Track 4 Cleanup approach. Additional requirements included development and adherence to a Site Management Plan (SMP) and filing of an Environmental Easement to restrict use of the Phase III Business Park property to commercial and industrial applications and to place other limitations on post-redevelopment activities.

1.2.2 Sites III-5 & III-6

In accordance with the May 2008 RI/AA Work Plan, 86 test pits were completed across the Phase III Business Park including approximately 27 test pits on Sites III-5 and III-6. The investigation identified evidence of potentially significant soil/fill impacts associated with Test Pit BP3-TP-42 within Sub-parcel III-6. At this location, which was subsequently deemed “Hotspot A,” a photoionization detector (PID) reading of 400 ppm was measured and suspected red paint was observed at 0.5- 1.5 feet below ground surface (fbgs). A soil sample was collected and submitted for laboratory analysis. An elevated estimated concentration of lead (4,550 mg/kg) was detected within the sample, consistent with the observed red paint. The test pit was expanded with similar observations recorded across an isolated area having dimensions of approximately 10 feet x 10 feet x 2.5 feet deep. These results are summarized in the RI/AA Report.

1.2.3 IRM Activities: August – December 2013

Based on the findings of the RI/AA Report, an interim remedial measure (IRM) in the form of soil/fill excavation and offsite disposal was undertaken to address Hotspot A in 2013. TurnKey Environmental Restoration, LLC (TurnKey) implemented IRM work on Site III-6 on behalf of Tecumseh Redevelopment, Inc. The work was performed on a design-build basis in accordance with an NYSDEC-approved IRM Work Plan (Ref. 4). Hotspot excavation activities were performed in August 2013, with offsite disposal of the impacted

slag/fill performed in December 2013. The IRM activities, fully described in the January 2014 Construction Completion Report for the Phase III Business Park (Ref. 5), included:

- Excavating approximately 9.3 cubic yards of lead-impacted slag/fill surrounding Hotspot A (i.e., Remedial Investigation Test pit BPA3-TP-42 on Sub-Parcel III-6 -see Figure 3), with offsite disposal of these materials at the Chautauqua County Landfill (CCLF) in Ellery, NY.
- Collecting post-excavation documentation samples from the lead-impacted hotspot excavation area. One representative sidewall sample was collected from each of the four sides of each excavation area and one bottom sample was collected from the base of each excavation area. The samples were submitted to a New York State Department of Health (NYSDOH)-ELAP certified laboratory for analysis of lead in accordance with USEPA SW-846 Method 6010. The samples were compared to the site-specific action level (SSAL) of 3,900 parts per million. All detections fell below the SSAL and no further excavation work was completed at Hotspot A. Based on the shallow nature of the excavation no backfill work was performed.

1.2.4 IRM Activities: September 2014

During subgrade work on other Phase III Business Park property in 2013 an abandoned 30" diameter pipeline was encountered. The line, which contained a heel of materials exhibiting visual and olfactory evidence of impact, was identified through review of historical drawings to be part of a network of aboveground and subsurface piping used to convey coke oven gas for heating applications in the former steel manufacturing and support buildings. A 14" diameter branch off the 30" gas line, which extended west into Sub-parcel III-5, was identified on the drawings as well (see Figure 3).

Due to the presence of the impacted heel within the piping (believed to be residual scale and sediment resulting from gas condensate), the NYSDEC determined that the line represented a potential source area requiring remediation. Tecumseh subsequently prepared an Interim Remedial Work Plan (Ref 6) to address the piping on the Brownfield areas of its Lackawanna property. The 14" branch extending into Site III-5 was remediated by Turnkey on behalf of Tecumseh on September 4-5, 2014. The work involved exposing the pipe along its length followed by excavating and removing the cast iron piping in sections. Overlying clean overburden material was staged adjacent to the excavation. Minor quantities

of scale/sediment within the piping were removed and stockpiled on poly sheeting. An estimated 3.76 tons of non-hazardous slag/fill and piping residuals were disposed at the CCLF. The cleaned piping was staged on poly sheeting in Business Park III for offsite transport and recycling.

The excavation for the 14-inch diameter piping was backfilled with the overlying clean overburden material and supplemented with imported BUD-approved (BUD #555-9-15) slag from a commercial stockpile operated by Iron City Recovery.

1.3 Corrective Measures

A PRR for the annual reporting period, March 15, 2018 to March 15, 2019, was not issued. In consultation with the NYSDEC, this PRR is being issued for the combined reporting periods of March 15, 2018 to March 15, 2019 and March 15, 2019 to March 15, 2020. The NYSDEC approved submission of a combined PRR on February 12, 2020, but will require all future PRRs be submitted within stipulated deadlines. Sites III-5 and III-6 are in full compliance with all engineering and other institutional control requirements. No further corrective measures are recommended at this time.

1.4 Compliance

At the time of the Site inspection (February 24, 2020), the Site was fully compliant with the NYSDEC- approved SMP (Ref 2).

1.5 Recommendations

Modification of the annual certification reporting requirement for Sites III-5 and III-6 from annual to triennial (every three years) is requested based upon to the presence of an active solar farm on these Sites and infrequent physical activity that would affect the cover integrity. Based on observations recorded during the annual inspection and IC/EC certification, no other modifications are recommended at this time.

2.0 SITE OVERVIEW

Final remedial activities undertaken on Sites III-5 and III-6 are described below. All of the remediated properties within the Phase III Business Park are subject to a comprehensive, site-wide SMP which identifies requirements for monitoring and maintenance of engineering and institutional controls and procedures for post-remedial excavation and related activities. Specific requirements affecting individual Sites within Phase III Business Park are included as appendices to the comprehensive plan. The SMP is updated as additional Sites within the Phase III Business Park are remediated.

2.1 Final Remedial Measures

Final (post-IRM) remedial activities on Sites III-5 and III-6 were performed by Steel Sun, LLC with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). Benchmark performed the remedial work on a design-build basis with assistance from Zoladz Construction Company, Inc., the designated remedial subcontractor, in accordance with an NYSDEC-approved Remedial Action Work Plan (Ref. 7). The final remedial measures incorporated the following activities:

- Railroad ties (approx. six loads) were removed from the Site by the subcontractor and transported to Iron City Recovery, LLC for disposal.
- All areas of the Site not covered by existing competent asphalt were covered with approximately 73,249 tons of imported beneficial use determination (BUD)-approved slag over a demarcation layer. Imported slag was placed to a minimum compacted thickness of 1 foot (see Figure 4).
- An addendum to the previously-approved Business Park III SMP was prepared to summarize the remedial measures on Sites III-5 and III-6 and describe site-specific monitoring and maintenance requirements for those parcels. (An Environmental Easement restricting end use of the Site and enforcing adherence to the SMP was filed in November 2013).

The remedial program was successful in achieving the remedial objectives for the Site. The Final Engineering Report (FER) was approved in December 2014 (Ref 8). A

**TECUMSEH PHASE III BUSINESS PARK
SITES III-5 & III-6
PERIODIC REVIEW REPORT**

Certificate of Completion (COC) was issued for Site III-5 and III-6 by the NYSDEC in December 2014.

3.0 REMEDY PERFORMANCE

A post-remedial site inspection involving a walk-over of the Sites covered by this PRR was performed on February 24, 2020 to visually observe and document the use of the Site for commercial/industrial use, confirm absence of site groundwater use, inspect the cover system integrity, and verify conformance with other requirements under the SMP. The site inspection completed during this reporting period indicates that the controls are in-place and functioning as intended in accordance with the SMP.

The completed IC/EC Certification forms and site photographs are included in Appendix A and B, respectively.

4.0 SITE MANAGEMENT PLAN

A site-wide SMP was prepared for the Phase III Business Park and approved by the Department in December 2013. Parcel-specific SMP requirements for Sites III-5 and III-6 were added by Addenda in November 2014 and are presented in SMP appendices H5 and H6. Key components of the SMP are described below.

4.1 Engineering and Institutional Control (IC/EC) Plan

Since remaining contaminated soil/fill and groundwater exists beneath the Phase III Business Park, Engineering Controls and Institutional Controls (EC/ICs) are required to protect human health and the environment. The Engineering and Institutional Control Plan describes the procedures for the implementation and management of all EC/ICs on the Sites within the Phase III Business Park.

4.1.1 Institutional Controls

The following institutional controls apply to all Sites within the Phase III Business Park:

- The use and development of the property is restricted to commercial and industrial uses as defined by Part 375-1.8(g), although land use is subject to local zoning laws;
- Groundwater cannot be used as a source of potable or process water, without necessary water quality treatment as determined by the New York State Department of Health (NYSDOH) or County DOH;
- All Sites must comply with the Department approved Site Management Plan; and
- The remedial party or site owner must complete and submit to the Department a periodic certification of institutional and engineering controls in accordance with Part 375-1.8(h)(3.)

4.1.2 Engineering Controls

Engineering controls covering Sites within the Phase III Business Park include:

- Cover System – The cover system, including building foundations, concrete sidewalks, concrete or asphalt driveways, parking areas, railroad tracks, and landscaped vegetated areas must be maintained in compliance with the SMP.
- Vapor Barrier (specific to Sites with buildings) - A poly vapor barrier must be installed and remain in-place beneath new building concrete floor slabs.

At the time of the site inspection, the Sites covered by this PRR were fully compliant with all engineering and institutional control requirements.

4.2 Excavation Work Plan

An Excavation Work Plan (EWP) was included in the approved-SMP for the Phase III Business Park. The Excavation Work Plan provides guidelines for the management of soil and fill material during any future intrusive actives. Any intrusive work that will penetrate the cover or cap, or encounter or disturb the remaining contamination, including any modifications or repairs to the existing cover system, must be performed in compliance with the EWP and must also be conducted in accordance with a site-specific Health and Safety Plan (HASP) and Community Air Monitoring Plan (CAMP) meeting the minimum requirements of the sample HASP and CAMP included with the SMP.

For the Subject Sites III-5 and III-6, no ground-intrusive activities requiring disturbance of the cover system, management of on-Site soil/fill material, or placement of backfill materials occurred during the subject March 15, 2018 to March 15, 2020 reporting period with the exception of the Bethlehem Steel Rail Improvements Phase II Project described below.

4.2.1 Bethlehem Steel Rail Improvements Phase II Project

Phase II of the Bethlehem Steel Rail Improvements Project included construction of the new West Harbor Lead track line. The West Harbor Lead branches off from the main East Harbor Lead, just north of Smokes Creek, then traverses northwest and somewhat parallel and east of Smokes Creek, running along the southern boundary of Tecumseh Business Park Parcel III-6 (see Figure 4)

Between May 2018 and September 2018, ground intrusive work in preparation for the new West Harbor Lead rail line was performed on the southern portion of Site III-6. Work included excavation and uncovering select portions of an existing 54" non-potable waterline so this line could be cut and slip lined (with 42" HDPE pipe) to protect it from railroad loads crossing over the pipe.

Excavation activities to facilitate slip lining occurred at five locations along the West Connector Track Corridor on the western portion of Site III-6 (see Figure 4). Initially, the previously placed 12" slag cover material was removed and set aside away from work. Subgrade materials were excavated, field screened by Benchmark personnel, and temporarily stockpiled on poly adjacent to work area. After the waterline was successfully slip lined and pressure tested, the staged material was used as backfill over waterline.

The disturbed cover area of Site III-6 was recapped by placing demarcation netting over prepared subgrade and placing previously staged clean slag on top of the demarcation netting. In the footprint of new West Harbor Lead, additional BUD-approved steel slag obtained from the same source as the cover system (i.e., Iron City Recovery) was placed as rail ballast and the new track was constructed over the disturbed area as part of the final cover system.

4.2.2 Community Air Monitoring Program Activities

Benchmark personnel oversaw the excavation activities, including visual, olfactory and PID screening and conducted Community Air Monitoring Plan (CAMP) activities during excavation activities. All monitoring results conformed to the CAMP perimeter particulate (PM10) and the organic vapor perimeter 15-minute average thresholds during intrusive work. CAMP data is provided in Appendix C.

4.3 Annual Inspection and Certification Program

The Annual Inspection and Certification Program outlines requirements for certifying and attesting that the institutional controls and engineering controls employed on the Sites are unchanged from the original design and/or previous certification. The Annual Certification includes a Site Inspection and completion of the NYSDEC's IC/EC Certification Form. The Site inspection is intended to verify that the IC/ECs:

- Are in place and effective.
- Are performing as designed.
- That nothing has occurred that would impair the ability of the controls to protect the public health and environment.
- That nothing has occurred that would constitute a violation or failure to comply with any operation and maintenance plan for such controls.
- Access is available to the Site to evaluate continued maintenance of such controls.

Inspection of Sites III-5 and III-6 was conducted by Thomas Forbes, P.E. of Benchmark on February 24, 2020. Mr. Forbes meets the requirements of a Qualified Environmental Professional (QEP) per 6NYCRR Part 375.12. At the time of the inspection, the Sites were unoccupied and in service as photovoltaic (solar) power generating facilities. No observable indication of intrusive activities was noted during the Site inspection with the exception of the Bethlehem Steel Rail Improvements Project described above.

The completed Site Management Periodic Review Report Notice – Institutional and Engineering Controls Certification Forms are included in Appendix A. A PRR photo log is included in Appendix B.

4.4 Operation, Monitoring and Maintenance Plan

The remedy for Sites III-5 and III-6 does not rely on any mechanical systems such as sub-slab depressurization or soil vapor extraction, to protect public health and the environment. Therefore, an Operation and Maintenance Plan is not required.

5.0 GROUNDWATER MONITORING

Two years of monitoring were completed for Sites III-5 and III-6 at monitoring wells MWN-58A, MWN-59A, and MWN-60A. In June 2017 the NYSDEC requested to continue the annual groundwater monitoring for arsenic only to further evaluate any increasing values, particularly in monitoring well MW- 58A. A round of samples was collected from the wells on October 30, 2018. Total arsenic data were found to be generally consistent with those collected during the RI and prior events, with dissolved (soluble) arsenic results below groundwater quality standards (GWQS) at each well location. Discontinuation of groundwater monitoring at Sites III-5 and III-6 was approved by the NYSDEC January 15, 2019.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Conclusions and recommendations are as follows:

- At the time of the Site inspection, Sites III-5 and III-6 were in compliance with the SMP.

The following modifications are recommended for the Sites:

- Modification of the annual certification reporting requirements for Sites III-5 and III-6 from annual to triennial (every three years). We would specifically request that the reporting period be made coincidental with those of other solar farm operations on the Site (i.e., for Sites C915199B, C, D and I) to streamline the inspection and reporting efforts and facilitate Department review of these site PRRs, all of which are expected to undergo little or no changes in use or disruptive activity.
- No other modifications are recommended for the Site at this time.

7.0 DECLARATION/LIMITATION

This report has been prepared for the exclusive use of Steel Sun, LLC. The contents of this report are limited to information available at the time of the site inspection. The findings herein may be relied upon only at the discretion of Steel Sun, LLC. Use of or reliance upon this report or its findings by any other person or entity is prohibited without written permission of Benchmark Environmental Engineering and Science, PLLC.

Site Details

Box 1

Site No. C915199E

Site Name Site III-5 Tecumseh Phase III Business Park

Site Address: 2303 Hamburg Turnpike Zip Code: 14218
City/Town: Lackawanna
County: Erie
Site Acreage: 11.7

Reporting Period: March 15, 2018 to March 15, 2020

YES NO

1. Is the information above correct?

If NO, include handwritten above or on a separate sheet.

2. Has some or all of the site property been sold, subdivided, merged, or undergone a tax map amendment during this Reporting Period?

3. Has there been any change of use at the site during this Reporting Period (see 6NYCRR 375-1.11(d))?

4. Have any federal, state, and/or local permits (e.g., building, discharge) been issued for or at the property during this Reporting Period?

If you answered YES to questions 2 thru 4, include documentation or evidence that documentation has been previously submitted with this certification form.

5. Is the site currently undergoing development?

Box 2

YES NO

6. Is the current site use consistent with the use(s) listed below?
Commercial and Industrial

7. Are all ICs/ECs in place and functioning as designed?

IF THE ANSWER TO EITHER QUESTION 6 OR 7 IS NO, sign and date below and DO NOT COMPLETE THE REST OF THIS FORM. Otherwise continue.

A Corrective Measures Work Plan must be submitted along with this form to address these issues.

Periodic Review Report (PRR) Certification Statements

1. I certify by checking "YES" below that:

- a) the Periodic Review report and all attachments were prepared under the direction of, and reviewed by, the party making the certification;
- b) to the best of my knowledge and belief, the work and conclusions described in this certification are in accordance with the requirements of the site remedial program, and generally accepted engineering practices; and the information presented is accurate and complete.

YES NO

2. If this site has an IC/EC Plan (or equivalent as required in the Decision Document), for each Institutional or Engineering control listed in Boxes 3 and/or 4, I certify by checking "YES" below that all of the following statements are true:

- (a) the Institutional Control and/or Engineering Control(s) employed at this site is unchanged since the date that the Control was put in-place, or was last approved by the Department;
- (b) nothing has occurred that would impair the ability of such Control, to protect public health and the environment;
- (c) access to the site will continue to be provided to the Department, to evaluate the remedy, including access to evaluate the continued maintenance of this Control;
- (d) nothing has occurred that would constitute a violation or failure to comply with the Site Management Plan for this Control; and
- (e) if a financial assurance mechanism is required by the oversight document for the site, the mechanism remains valid and sufficient for its intended purpose established in the document.

YES NO

APPENDIX A2

SITE III-6

Enclosure 2
NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION
Site Management Periodic Review Report Notice
Institutional and Engineering Controls Certification Form

Site Details

Box 1

Site No. C915199F

Site Name Site III-6 Tecumseh Phase III Business Park

Site Address: 2303 Hamburg Turnpike Zip Code: 14218
City/Town: Lackawanna
County: Erie
Site Acreage: 10.9

Reporting Period: March 15, 2018 to March 15, 2020

YES NO

1. Is the information above correct?

If NO, include handwritten above or on a separate sheet.

2. Has some or all of the site property been sold, subdivided, merged, or undergone a tax map amendment during this Reporting Period?

3. Has there been any change of use at the site during this Reporting Period (see 6NYCRR 375-1.11(d))?

4. Have any federal, state, and/or local permits (e.g., building, discharge) been issued for or at the property during this Reporting Period?

If you answered YES to questions 2 thru 4, include documentation or evidence that documentation has been previously submitted with this certification form.

5. Is the site currently undergoing development?

Box 2

YES NO

6. Is the current site use consistent with the use(s) listed below?
Commercial and Industrial

7. Are all ICs/ECs in place and functioning as designed?

IF THE ANSWER TO EITHER QUESTION 6 OR 7 IS NO, sign and date below and DO NOT COMPLETE THE REST OF THIS FORM. Otherwise continue.

A Corrective Measures Work Plan must be submitted along with this form to address these issues.

SITE PHOTOLOG

PHOTOGRAPHIC LOG

Client Name: Steel Sun, LLC		Site Location: Tecumseh Phase III Business Park Sites III 5 & III 6	Project No.: 0397-020-001
Photo No. 1	Date 06/07/18	 A photograph showing a construction site in progress. In the foreground, several large, corrugated pipes are laid out on the ground. One pipe is particularly prominent, running diagonally across the frame. The ground is uneven and appears to be a mix of dirt and gravel. In the background, there are several wind turbines standing on a hill. A yellow caution tape with black hazard symbols runs across the site. A white truck is visible in the distance. The sky is clear and blue.	Direction Photo Taken: Northwest
Description: Bethlehem Steel Rail Improvement Phase II Project - Uncovering the existing 54-inch non-potable waterline and stockpiling subgrade materials.			
Photo No. 2	Date 06/25/18	 A photograph showing a construction site. In the foreground, there is a large, dark-colored HDPE pipe lying on the ground. A red ladder is leaning against it. The ground is covered in gravel and dirt. In the background, there is a long row of solar panels installed on a metal frame. The sky is clear and blue.	Direction Photo Taken: Northeast
Description: Bethlehem Steel Rail Improvement Phase II Project - Preparation for slip line with 42- inch HDPE pipe.			

PHOTOGRAPHIC LOG

Client Name: Steel Sun, LLC	Site Location: Tecumseh Phase III Business Park Sites III 5 & III 6	Project No.: 0397-020-001
Photo No. 3	Date 06/27/18	 A photograph showing a construction site. In the foreground, a large black HDPE pipe lies on the ground. A worker in a yellow vest and hard hat stands next to it. In the background, another worker is visible near a yellow excavator. A wooden shipping container with the text "FV Vellano" and "844 VELLANO" is partially visible on the left. Wind turbines are visible in the distance under a clear sky.

Photo No. 4	Date 06/26/18	 A photograph showing a large black HDPE pipe lying on the ground at a construction site. An excavator's arm and bucket are visible on the left, working near the pipe. A red ladder leans against the pipe. The background shows a fenced-in area with solar panels and some utility poles under a clear sky.
