1.0 INTRODUCTION

TurnKey Environmental Restoration, LLC (TurnKey), has prepared this Periodic Review Report (PRR), on behalf of 1093 Group, LLC, to summarize the post-remedial status of New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP) Niagara Street and Pennsylvania Avenue Site (Site) (C915223).

This PRR has been prepared in accordance with the NYSDEC DER-10 *Technical Guidance for Site Investigation and Remediation* (May 2010) and the NYSDEC's Institutional and Engineering Controls(IC/EC) Certification Form has been completed for the Site (see Appendix A).

This PRR and the associated inspections form have been completed for the post-remedial activities at the Site for the December 24, 2009 to June 24, 2011 reporting period.

1.1 Site Background

The Site encompasses approximately 0.27-acres of land which was redeveloped as a commercial retail operation (Family Dollar) in the City of Buffalo, New York (see Figure 1). The Site was formerly comprised of two separate adjoining tax parcels which were historically used as a filling station and automobile service operation. Figure 2 shows the former parcels and buildings prior to remediation.

On-Site soil and groundwater were contaminated by petroleum hydrocarbons related to the former underground storage tanks (USTs) and automobile repair operations.

1.2 Remedial History

9154 Group, LLC entered into a Brownfield Cleanup Agreement (BCA) (Index #B9-0759-07-11, Site #C915223) with the New York State Department of Environmental Conservation (NYSDEC) in October 2008. In November 2008, an "Amendment Application for Change of Party" was submitted to the NYSDEC to change the applicant from 9154 Group, LLC to 1093 Group, LLC, and the Department approved the change in February 2009. 1093 Group, LLC then completed the investigation and remediation of the Site under the supervision of the NYSDEC and NYSDOH.

The Remedial Investigation/Interim Remedial Measures (RI/IRM) Work Plan was approved by the NYSDEC on November 18, 2008. Remedial activities were performed at the Site between February and July 2009. The remedial program was successful in achieving the remedial objectives for the Site, and the Site Management Plan (SMP) and Final Engineering Report (FER) were approved by the Department in December 2009. The NYSDEC issued a COC for the Site on December 24, 2009.

1.3 Compliance

At the time of the Site inspection, the Site was fully compliant with the Department's approved SMP.

1.4 Recommendations

Based on the post-remedial results for the Site, TurnKey makes the following two recommendations for the Site.

- Modify groundwater monitoring to Annual beginning in 2012. To date, 1093 Group, LLC has completed three (3) groundwater monitoring event, and is planning to complete the Fall 2011 semi-annual sampling event. Post-remedial groundwater monitoring results show a continued decrease in contaminant levels, and the Site is in full compliance with the SMP; therefore, a modification to annual groundwater monitoring is prudent and protective of the environment.
- Modify the groundwater monitoring well network to MW-1 and MW-2 only. Analytical results for MW-5 and MW-6 have been non-detect or below regulatory guidance values for all completed monitoring events.

Beyond those changes described above, no modifications to the current SMP are recommended at this time.

2.0 SITE OVERVIEW

The Niagara Street and Pennsylvania Avenue Site (Site) is located in the City of Buffalo, County of Erie, New York and is addressed at 517 Niagara Street (SBL# 110.27-5-1.1) on the Erie County Tax Map. The Site is located on the southeast corner of Niagara Street and Pennsylvania Avenue, and bordered by Reynolds Alley, Pennsylvania Avenue, and Niagara Street.

The remedial activities were completed from February through July 2009. The remedial activities included:

- Demolition of the former service station building and product dispenser canopy;
- Removal of five underground storage tanks (USTs), including associated dispensing units and underground product piping. Extraction and off-site disposal of residual product/water mixture from the USTs and the in-ground lift.
- Excavation of petroleum-impacted soil/fill followed by off-site transportation and disposal at a commercial landfill.
- Excavation and disposal of surface soil/fill with slightly elevated SVOCs (above restricted-residential SCOs) across the southeast portion of the Site. That material was also transported off-Site and disposed of at a commercial landfill.
- Extraction and treatment of groundwater from the excavation during remediation activities.
- Placement and compaction of backfill.

Remedial activities were completed in July 2009. The FER and SMP for the Site were approved by the Department in December 2009. The COC was issued for the Site on December 24, 2009.

3.0 SITE MANAGEMENT PLAN

The Niagara Street and Pennsylvania Avenue Site post-remedial Site Management Plan (SMP) was approved by the NYSDEC in December 2009. This SMP provides a detailed description of all procedures required to manage remaining contamination at the Site after completion of the Remedial Action, including: (1) implementation and management of all Institutional Controls; (2) groundwater monitoring; and, (3) performance of periodic inspections, certification of results, and submittal of Periodic Review Reports.

A brief description of these SMP components is presented below.

3.1 Institutional Control Plan

As a requirement of the SMP a series of Institutional Controls are required to (1) prevent future exposure to remaining contamination by controlling disturbances of the subsurface contamination; and, (2) limit the use and development of the Site to restricted-residential use or more restricted uses (i.e., commercial or industrial).

3.1.1 Excavation Work Plan

The Excavation Work Plan, which is included within the approved-SMP for the Site, provides guidelines for the management of soil and fill material during any future intrusive activities.

No intrusive activities requiring management of on-Site soil or fill material; or the placement of backfill materials occurred during the monitoring period.

3.1.2 Site Land Use

The Site is currently utilized as a commercial retail operation, and is in compliance with the Site's land use criteria (restricted-residential use).

3.2 Long-Term Groundwater Monitoring (LTGWM) Plan

As a requirement of the SMPs, long-term groundwater monitoring is being performed at the Site. Semi-annual groundwater monitoring was conducted during this reporting period in May and November 2010, and May 2011. The semi-annual groundwater monitoring reports for this reporting period are included in Appendix C.

3.3 Annual Inspection and Certification Program

The Annual Inspection and Certification Program outlines the requirements for the Site, to certify and attest that the institutional controls and/or engineering controls employed at the Site are unchanged from the previous certification. The Annual Certification will primarily consist of an annual Site Inspection to complete the auto-generated NYSDEC Institutional and Engineering Controls (IC/EC) Certification Form. The site inspection will verify that the IC/ECs:

- Are in place and effective.
- Are performing as designed.
- That nothing has occurred that would impair the ability of the controls to protect the public health and environment.
- That nothing has occurred that would constitute a violation or failure to comply with any operation and maintenance plan for such controls.
- Access is available to the Site to evaluate continued maintenance of such controls.

A Site Inspection of the property was conducted by a TurnKey Qualified Environmental Professional (QEP) on May 13, 2011. At the time of the inspection, the property was being used as a commercial retail operation (Family Dollar), with surface parking, paved walkways and landscaped areas. No observable indication of intrusive activities was noted during the Site Inspection. The Site is on municipal water supply, and no observable use of groundwater was noted during the site inspection.

The completed Site Management Periodic Review Report Notice – Institutional and Engineering Controls Certification Form is included in Appendix A. A photolog of the site inspection is included in Appendix B.

3.4 Engineering and Institutional Control Requirements and Compliance

As detailed in the Environmental Easements, several Institutional Controls (ICs) need to be maintained as a requirement of the BCA for the Site.

3.4.1 Institutional Controls

- Groundwater-Use Restriction – the use of groundwater for potable and non-potable purposes is prohibited; and
- Land-Use Restriction: The controlled property may be used for restricted-residential, commercial and/or industrial use; and,
- Implementation of the SMP.

4.0 CONCLUSIONS AND RECOMMENDATIONS

Conclusions and recommendations are as follows:

- At the time of the site inspection, the Site was in compliance with the Site Management Plan.

The following modifications are recommended for the Site.

- Modify groundwater monitoring schedule from semi-annual to annual beginning in 2012. To date, 1093 Group, LLC has completed three (3) groundwater monitoring event, and is planning to complete the Fall 2011 semi-annual sampling event in accordance with the Environmental Easement. Post-remedial groundwater monitoring results show a continued decrease in contaminant levels, and the Site is in full compliance with the SMP; therefore, a modification to annual groundwater monitoring is prudent and protective of the environment.
- Modify the groundwater monitoring well network, to be included in annual sampling to MW-1 and MW-2 only. Analytical results for MW-5 and MW-6 have been below laboratory detection limits (i.e., non-detect) or below regulatory guidance values for all completed monitoring events.

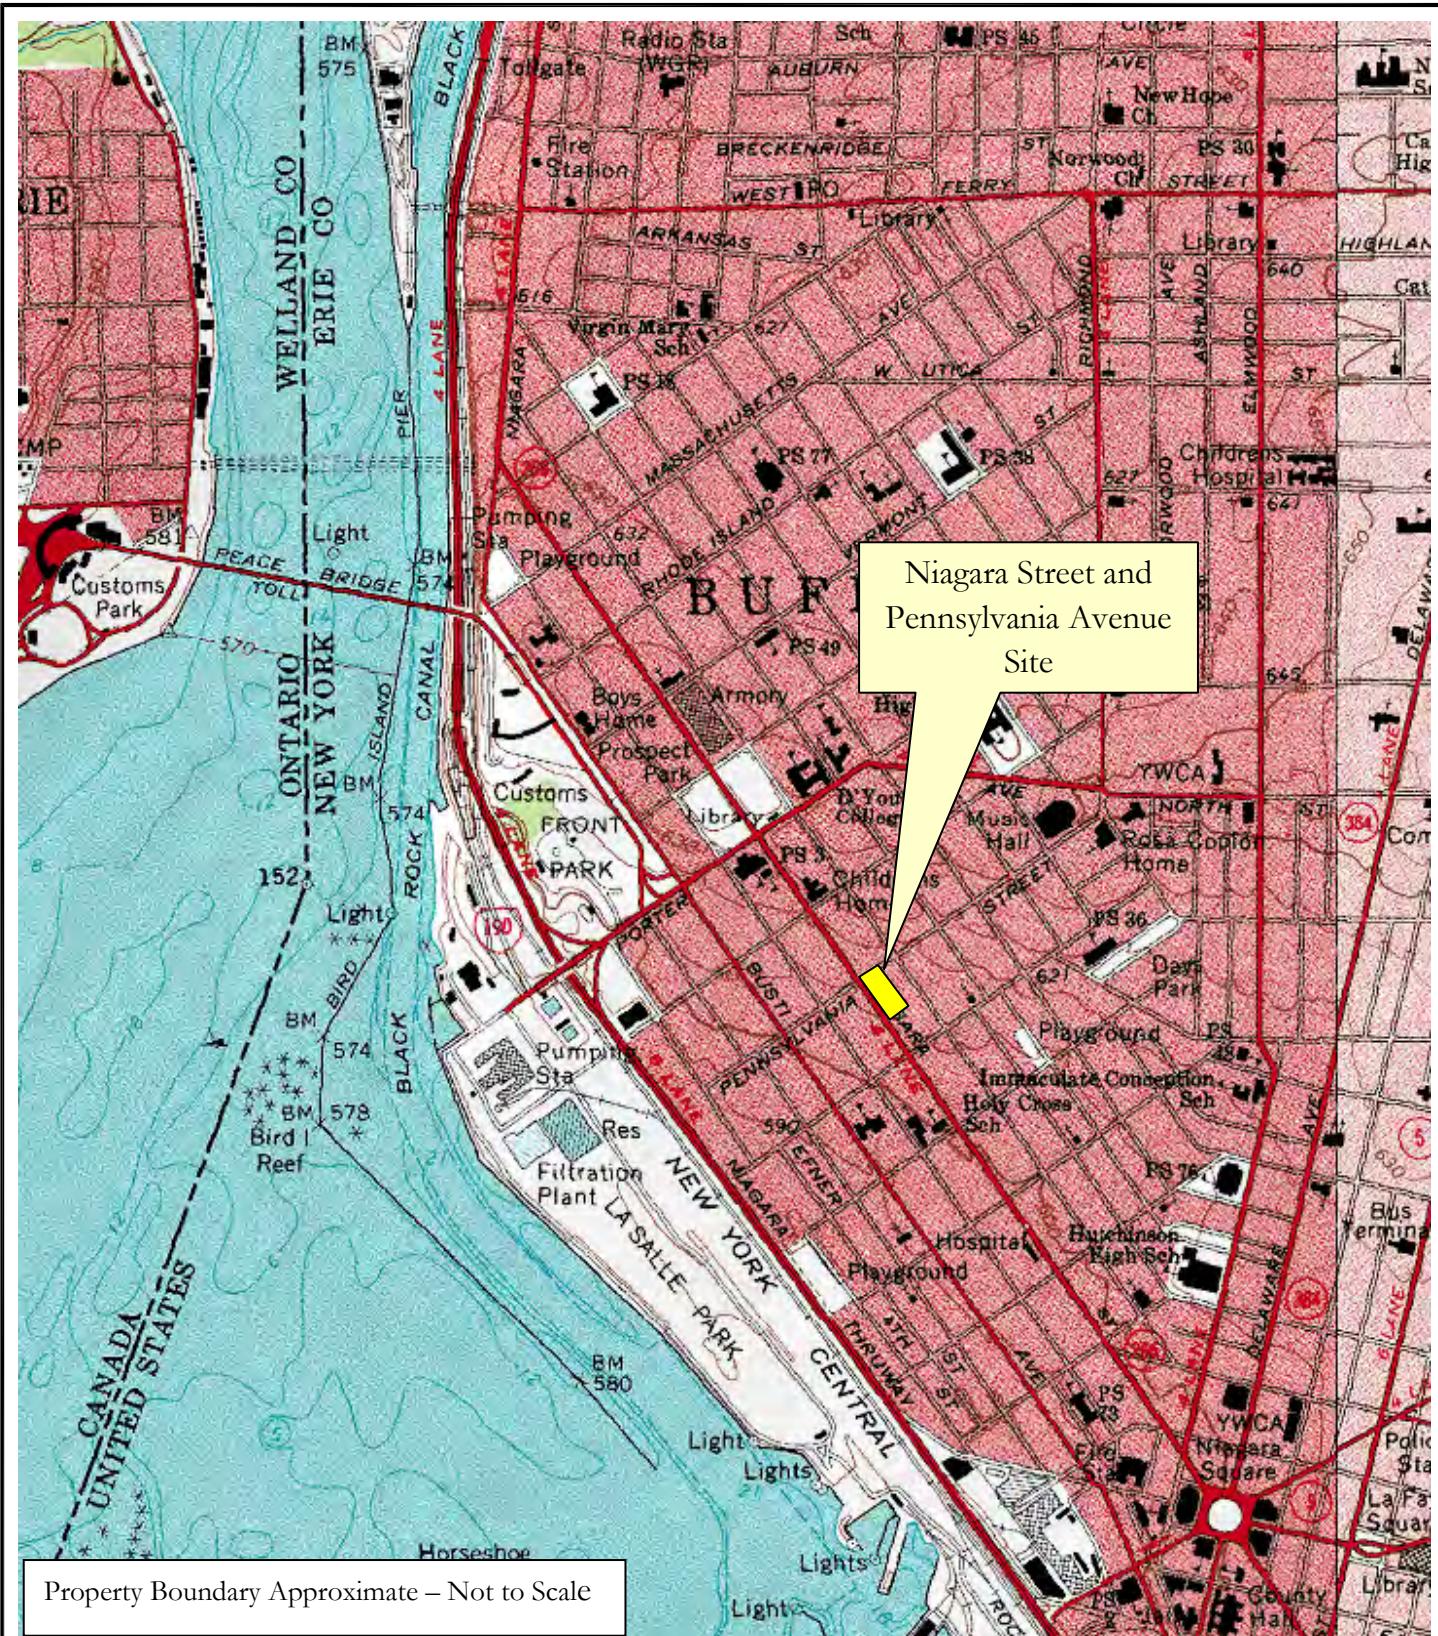

5.0 DECLARATION/LIMITATION

TurnKey Environmental Restoration, LLC in association with Benchmark Environmental Engineering and Science, PLLC, personnel conducted the annual site inspections for Brownfield Cleanup Program Site No. C915223, located in Buffalo, New York, according to generally accepted practices. This report complied with the scope of work provided to 1093 Group, LLC by TurnKey Environmental Restoration, LLC.

This report has been prepared for the exclusive use of 1093 Group, LLC. The contents of this report are limited to information available at the time of the site inspection. The findings herein may be relied upon only at the discretion of 1093 Group, LLC. Use of or reliance upon this report or its findings by any other person or entity is prohibited without written permission of TurnKey Environmental Restoration, LLC.

INSTITUTIONAL CONTROLS CERTIFICATION FORM

Enclosure 1
NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION
Site Management Periodic Review Report Notice
Institutional and Engineering Controls Certification Form

Site Details

Box 1

Site No. C915223

Site Name Niagara Street and Pennsylvania Avenue Site

Site Address: 517 Niagara Street Zip Code: 14201

City/Town: Buffalo

County: Erie

Site Acreage: 0.3

Reporting Period: December 24, 2009 to June 24, 2011

YES NO

1. Is the information above correct?

If NO, include handwritten above or on a separate sheet.

2. Has some or all of the site property been sold, subdivided, merged, or undergone a tax map amendment during this Reporting Period?

3. Has there been any change of use at the site during this Reporting Period (see 6NYCRR 375-1.11(d))?

4. Have any federal, state, and/or local permits (e.g., building, discharge) been issued for or at the property during this Reporting Period?

If you answered YES to questions 2 thru 4, include documentation or evidence that documentation has been previously submitted with this certification form.

5. Is the site currently undergoing development?

Box 2

YES NO

6. Is the current site use consistent with the use(s) listed below?
Restricted-Residential, Commercial, and Industrial

7. Are all ICs/ECs in place and functioning as designed?

IF THE ANSWER TO EITHER QUESTION 6 OR 7 IS NO, sign and date below and
DO NOT COMPLETE THE REST OF THIS FORM.

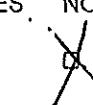

A Corrective Measures Work Plan must be submitted along with this form to address these issues.

Signature of Owner, Remedial Party or Designated Representative

Date

Box 2A

YES NO

8. Has any new information revealed that assumptions made in the Qualitative Exposure Assessment regarding offsite contamination are no longer valid?

If you answered YES to question 8, include documentation or evidence that documentation has been previously submitted with this certification form.

9. Are the assumptions in the Qualitative Exposure Assessment still valid? (The Qualitative Exposure Assessment must be certified every five years)

If you answered NO to question 9, the Periodic Review Report must include an updated Qualitative Exposure Assessment based on the new assumptions.

Description of Engineering Controls

None Required

Control Description for Site No. C915223

Parcel: 110.27-5-1.1

No engineering controls. Institutional controls include an Environmental Easement (EE), and a Site Management Plan, Ground Water Monitoring Plan, and periodic certification. EE restricts site to "restricted residential" use, ground water is prohibited for consumptive use, and SMP is required.

Periodic Review Report (PRR) Certification Statements

1. I certify by checking "YES" below that:

- a) the Periodic Review report and all attachments were prepared under the direction of, and reviewed by, the party making the certification;
- b) to the best of my knowledge and belief, the work and conclusions described in this certification are in accordance with the requirements of the site remedial program, and generally accepted engineering practices; and the information presented is accurate and complete.

YES NO

2. If this site has an IC/EC Plan (or equivalent as required in the Decision Document), for each Institutional or Engineering control listed in Boxes 3 and/or 4, I certify by checking "YES" below that all of the following statements are true:

- (a) the Institutional Control and/or Engineering Control(s) employed at this site is unchanged since the date that the Control was put in-place, or was last approved by the Department;
- (b) nothing has occurred that would impair the ability of such Control, to protect public health and the environment;
- (c) access to the site will continue to be provided to the Department, to evaluate the remedy, including access to evaluate the continued maintenance of this Control;
- (d) nothing has occurred that would constitute a violation or failure to comply with the Site Management Plan for this Control; and
- (e) If a financial assurance mechanism is required by the oversight document for the site, the mechanism remains valid and sufficient for its intended purpose established in the document.

YES NO

**IF THE ANSWER TO QUESTION 2 IS NO, sign and date below and
DO NOT COMPLETE THE REST OF THIS FORM.**

A Corrective Measures Work Plan must be submitted along with this form to address these issues.

Signature of Owner, Remedial Party or Designated Representative

Date

IC CERTIFICATIONS
SITE NO. C915223

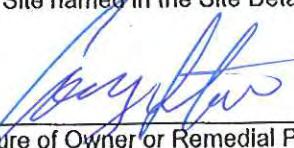

Box 6

SITE OWNER OR DESIGNATED REPRESENTATIVE SIGNATURE

I certify that all information and statements in Boxes 2 and/or 3 are true. I understand that a false statement made herein is punishable as a Class "A" misdemeanor, pursuant to Section 210.45 of the Penal Law.

I Corey Stewart at 295 Main St. Suite 210,

SEMI-ANNUAL GROUNDWATER MONITORING REPORT

June 24, 2011

Mr. Dave Szymanski
NY State Department of Environmental Conservation
Division of Environmental Remediation, Region 9
270 Michigan Ave.
Buffalo, New York 14203

Re: May 2011 and November 2010 Groundwater Monitoring Events
BCP Site No. C915223
1093 Group, LLC
Buffalo, New York

Dear Mr. Szymanski:

On behalf of our client, 1093 Group, LLC, TurnKey Environmental Restoration, LLC (TurnKey) is herein transmitting the results from the November 2010 and May 2011 semi-annual ground water monitoring event performed for the Niagara Street and Pennsylvania Avenue Site, located at 517 Niagara Street, Buffalo, New York (see Figure 1).

The groundwater monitoring events were performed on November 8th, 2010 and May 13th, 2011 and included sampling and analysis of MW-1, MW-2, MW-5, and MW-6. Groundwater samples from each of the sampled wells were analyzed for Target Compound List (TCL) method 8260B STARS list volatile organic compounds (VOCs). Field parameters including pH, oxidation-reduction potential (ORP), dissolved oxygen (DO), temperature, turbidity, and specific conductance was also measured in each of the sampled monitoring wells. Table 1 summarizes the analytical results from the November 2010 and May 2011 groundwater monitoring events with comparison to NYSDEC Class GA groundwater quality standards (GWQS) as listed in NYSDEC Division of Water Technical and Operational Guidance Series (TOGS) (1.1.1). The laboratory analytical package is included in Attachment 1.

As shown on Table 1, no VOCs were detected above the laboratory reporting limits for MW-5 and MW-6. It is noteworthy that benzene concentrations at these two monitoring locations have decreased to non-detectable levels from concentrations formerly exceeding GWQS identified during the Remedial Investigation (RI). Petroleum-related VOCs at MW-2 were detected below GWQS with the exception of benzene for the May 2011 event. Elevated petroleum-related VOCs exceeding GWQS were detected in MW-1. It should be

pointed out that there has been a decrease in total VOC concentrations at this location since site groundwater monitoring began in May 2010. MW-1 is located in the western portion of the site, adjacent to the corner of Niagara Street and Pennsylvania Avenue.

The second semi-annual sampling event is tentatively scheduled to be completed in September/October 2011.

Please contact us with any questions or comments.

Sincerely,
TurnKey Environmental Restoration, LLC

Michael Lesakowski
Project Manager

TABLE 1
GROUNDWATER ANALYTICAL DATA SUMMARY

NIAGARA STREET AND PENNSYLVANIA AVENUE SITE
BUFFALO, NEW YORK

Parameter ¹	Class GA GWQS ²	Sample Locations											
		MW-1			MW-2			MW-5			MW-6		
		May-10	Nov-10	May-11	May-10	Nov-10	May-11	May-10	Nov-10	May-11	May-10	Nov-10	May-11
Volatile Organic Compounds (VOCs) - ug/L													
Benzene	1	560 D	820 D	4.7	1.1	0.64 J	5	ND	ND	ND	ND	ND	ND
Ethylbenzene	5	1700 D	1500 D	26	1.1	ND							
Isopropylbenzene (Cumene)	5	95	73	15	ND								
Methyl tert butyl ether (MTBE)	10	ND	49	ND	5.1	4.4	ND	ND	ND	ND	ND	0.57 J	ND
Toluene	5	29	20	0.87 J	ND	ND	ND	ND	ND	2.2	ND	ND	ND
Total Xylene	5	1233 D	760 D	56	ND								
n-Butylbenzene	5	12	27	16	ND								
n-Propylbenzene	5	290 D	190 D	ND									
p-Cymene (p-isopropyltoluene)	5	9.8	13	ND									
1,2,4-Trimethylbenzene	5	780 D	1000 D	96	ND								
1,3,5-Trimethylbenzene	5	83	21	11	ND								
sec-Butylbenzene	5	12	12	ND									
tert-Butylbenzene	5	0.96 J	ND										

Notes:

1. Only those parameters detected at a minimum of one sample location are presented in table; all other compounds reported as non-detect.
2. Regulatory limits are NYSDEC Class "GA" Groundwater Quality Standards (GWQS) as published in NYSDEC Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations (June 1998).
3. Blind Dup was collected at MW-2, MS/MSD was collected at MW-6.

Definitions:

ND = Parameter not detected above laboratory detection limit.

- = No guidance value available.

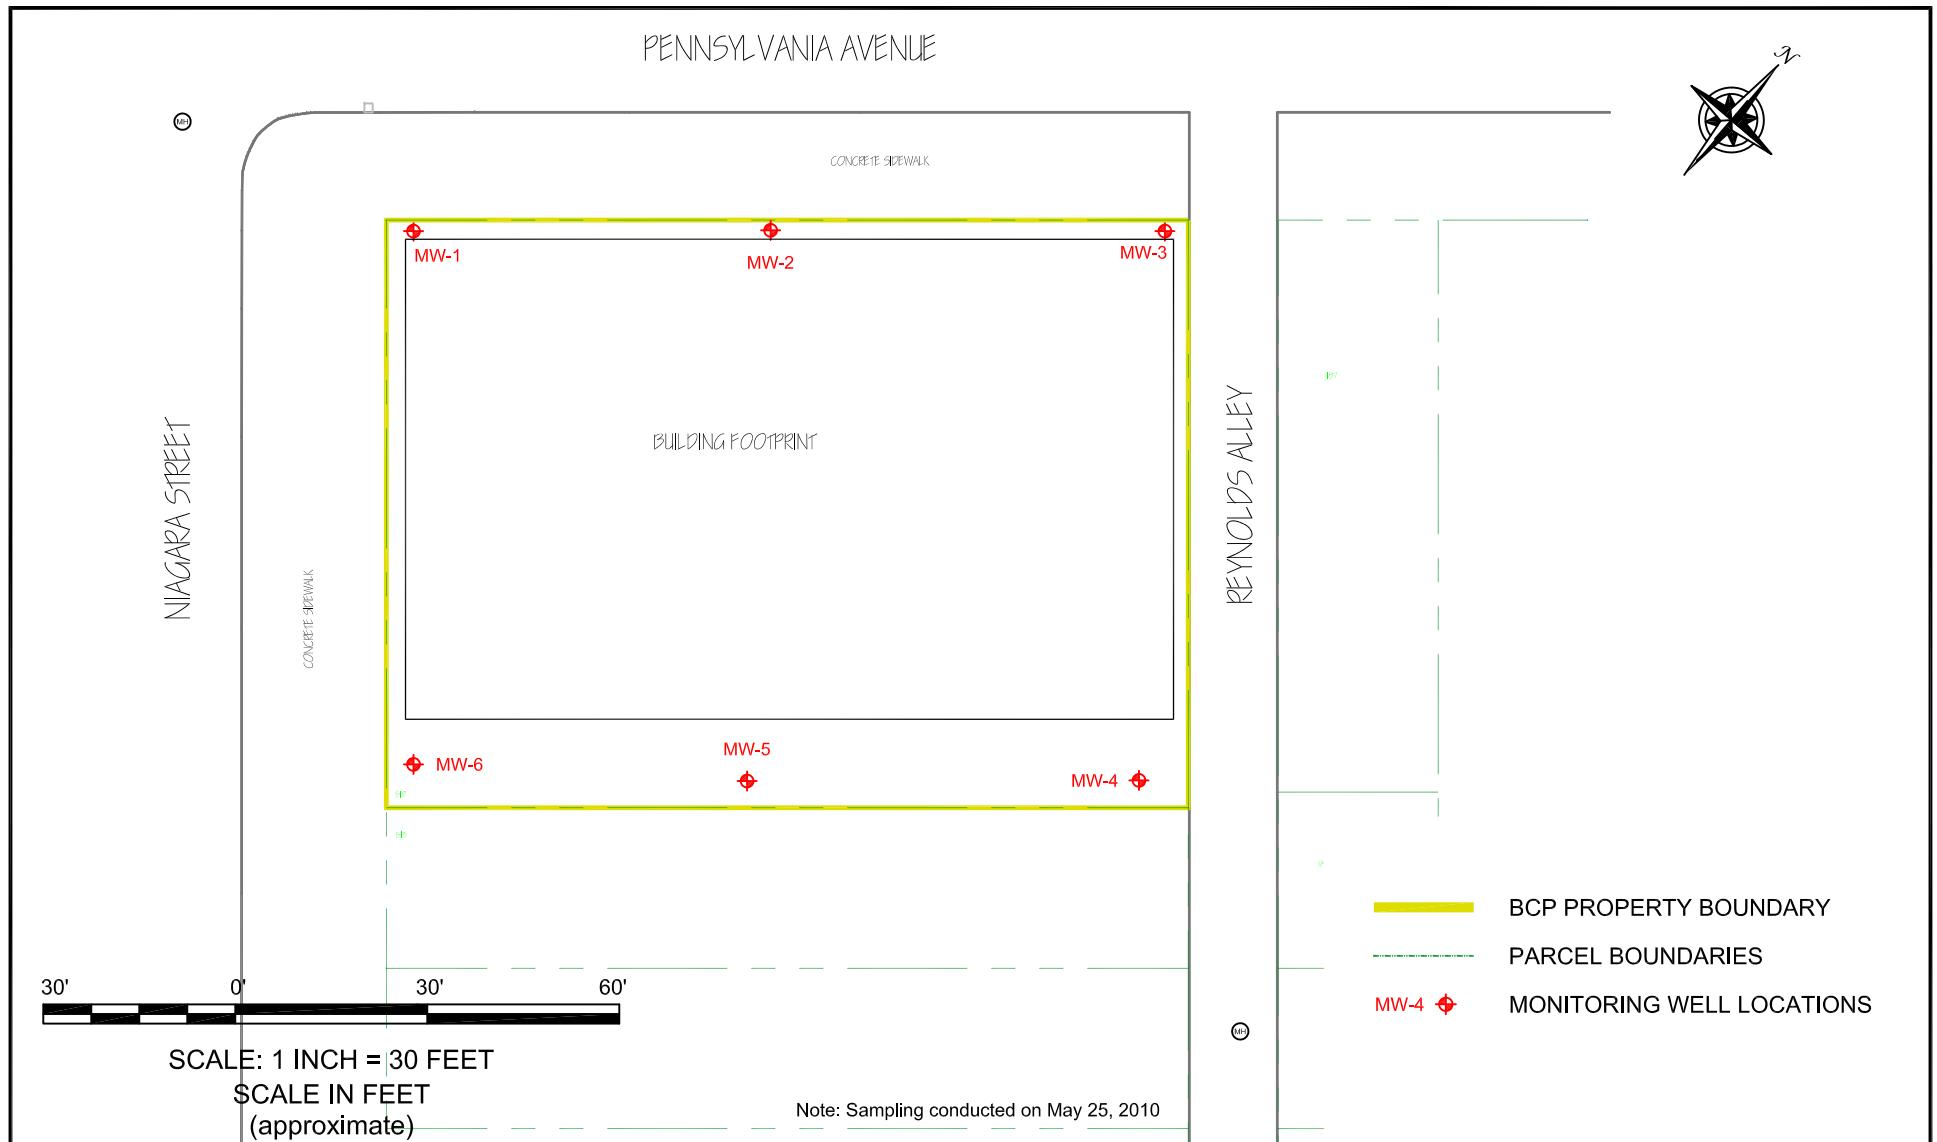

J = Estimated value; result is less than the sample quantitation limit but greater than zero.

D = All compounds were identified in an analysis at the secondary dilution factor.

BOLD Exceeds NYSDEC Class "GA" Groundwater Quality Standards

CASE NARRATIVE

According to 40CFR Part 136.3, pH, Chlorine Residual, Dissolved Oxygen, Sulfite, and Temperature analyses are to be performed immediately after aqueous sample collection. When these parameters are not indicated as field (e.g. field-pH), they were not analyzed immediately, but as soon as possible after laboratory receipt.

A pertinent document is appended to this report, 1 page, is included and is an integral part of this report.

Reproduction of this analytical report is permitted only in its entirety. This report shall not be reproduced except in full without the written approval of the laboratory.

TestAmerica Laboratories, Inc. certifies that the analytical results contained herein apply only to the samples tested as received by our Laboratory.

Benchmark Environmental & Engineering Science
2558 Hamburg Turnpike, Suite 300
Lackawanna, NY 14218

Work Order: RTK0820
Project: Benchmark - Niagara St. site
Project Number: TURN

Received: 11/09/10
Reported: 11/18/10 09:18

DATA QUALIFIERS AND DEFINITIONS

- D08** Dilution required due to high concentration of target analyte(s)
- J** Analyte detected at a level less than the Reporting Limit (RL) and greater than or equal to the Method Detection Limit (MDL). Concentrations within this range are estimated.
- M8** The MS and/or MSD were below the acceptance limits. See Blank Spike (LCS).
- NR** Any inclusion of NR indicates that the project specific requirements do not require reporting estimated values below the laboratory reporting limit.

Re: Semi-annual Groundwater Monitoring Event
BCP Site No. C915223
1093 Group, LLC
Buffalo, New York

Dear Mr. Murray:

On behalf of our client, 1093 Group, LLC, TurnKey Environmental Restoration, LLC (TurnKey) is herein transmitting the results from the initial semi-annual ground water monitoring event performed for the Niagara Street and Pennsylvania Avenue Site, located at 517 Niagara Street, Buffalo, New York (see Figure 1).

This groundwater monitoring event was performed on May 25th, 2010 and included sampling and analysis of MW-1, MW-2, MW-5, and MW-6. Groundwater samples from each of the sampled wells were analyzed for STARS list volatile organic compounds (VOCs). Field parameters including pH, oxidation-reduction potential (ORP), dissolved oxygen (DO), temperature, turbidity, and specific conductance were also measured in each of the sampled monitoring wells. Table 1 summarizes the analytical results from the May 2010 groundwater monitoring event with comparison to NYSDEC Class GA groundwater quality standards (GWQS) as listed in NYSDEC Division of Water Technical and Operational Guidance Series (TOGS) (1.1.1). Field data sheets are presented in Attachment 1. The laboratory analytical package is included in Attachment 2.

As shown on Table 1, no VOCs were detected above the laboratory reporting limits, and were reported as non-detect (ND) for MW-5 and MW-6. It is noteworthy that benzene concentrations have decreased to non-detectable levels from concentrations formerly exceeding GWQS identified during the Remedial Investigation (RI) in MW-5 and MW-6. No VOCs were detected above GWQS in MW-2 with the minor exception of slightly elevated benzene (1.1 ug/L vs. 1.0 ug/L GWQS, respectively). Elevated petroleum-related

VOCs exceeding GWQS were detected in MW-1. MW-1 is located in the western portion of the site, adjacent to the corner of Niagara Street and Pennsylvania Avenue.

TurnKey recommends continued monitoring in accordance with the approved Site Management Plan. The second semi-annual sampling event is tentatively scheduled to be completed in September/October 2010.

Please contact us with any questions or comments.

Sincerely,
TurnKey Environmental Restoration, LLC

Michael Lesakowski
Project Manager

TABLES

TABLE 1
GROUNDWATER ANALYTICAL DATA SUMMARY
May 25, 2010

1093 GROUP, LLC
NIAGARA STREET AND PENNSYLVANIA AVENUE SITE
BUFFALO, NEW YORK

Parameter ¹	Class GA GWQS ²	Sample Locations			
		MW-1	MW-2	MW-5	MW-6
Volatile Organic Compounds (VOCs) - ug/L					
Benzene	1	560 D	1.1	ND	ND
Ethylbenzene	5	1700 D	1.1	ND	ND
Isopropylbenzene (Cumene)	5	95	ND	ND	ND
Methyl tert butyl ether (MTBE)	10	ND	5.1	ND	ND
Toluene	5	29	ND	ND	ND
Total Xylene	5	1233 D	ND	ND	ND
n-Butylbenzene	5	12	ND	ND	ND
n-Propylbenzene	5	290 D	ND	ND	ND
p-Cymene (p-isopropyltoluene)	5	9.8	ND	ND	ND
1,2,4-Trimethylbenzene	5	780 D	ND	ND	ND
1,3,5-Trimethylbenzene	5	83	ND	ND	ND
sec-Butylbenzene	5	12	ND	ND	ND
tert-Butylbenzene	5	0.96 J	ND	ND	ND

Notes:

1. Only those parameters detected at a minimum of one sample location are presented in table; all other compounds reported as non-detect.
2. Regulatory limits are NYSDEC Class "GA" Groundwater Quality Standards (GWQS) as published in NYSDEC Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations (June 1998).

Definitions:

ND = Parameter not detected above laboratory detection limit.

-- = No guidance value available.

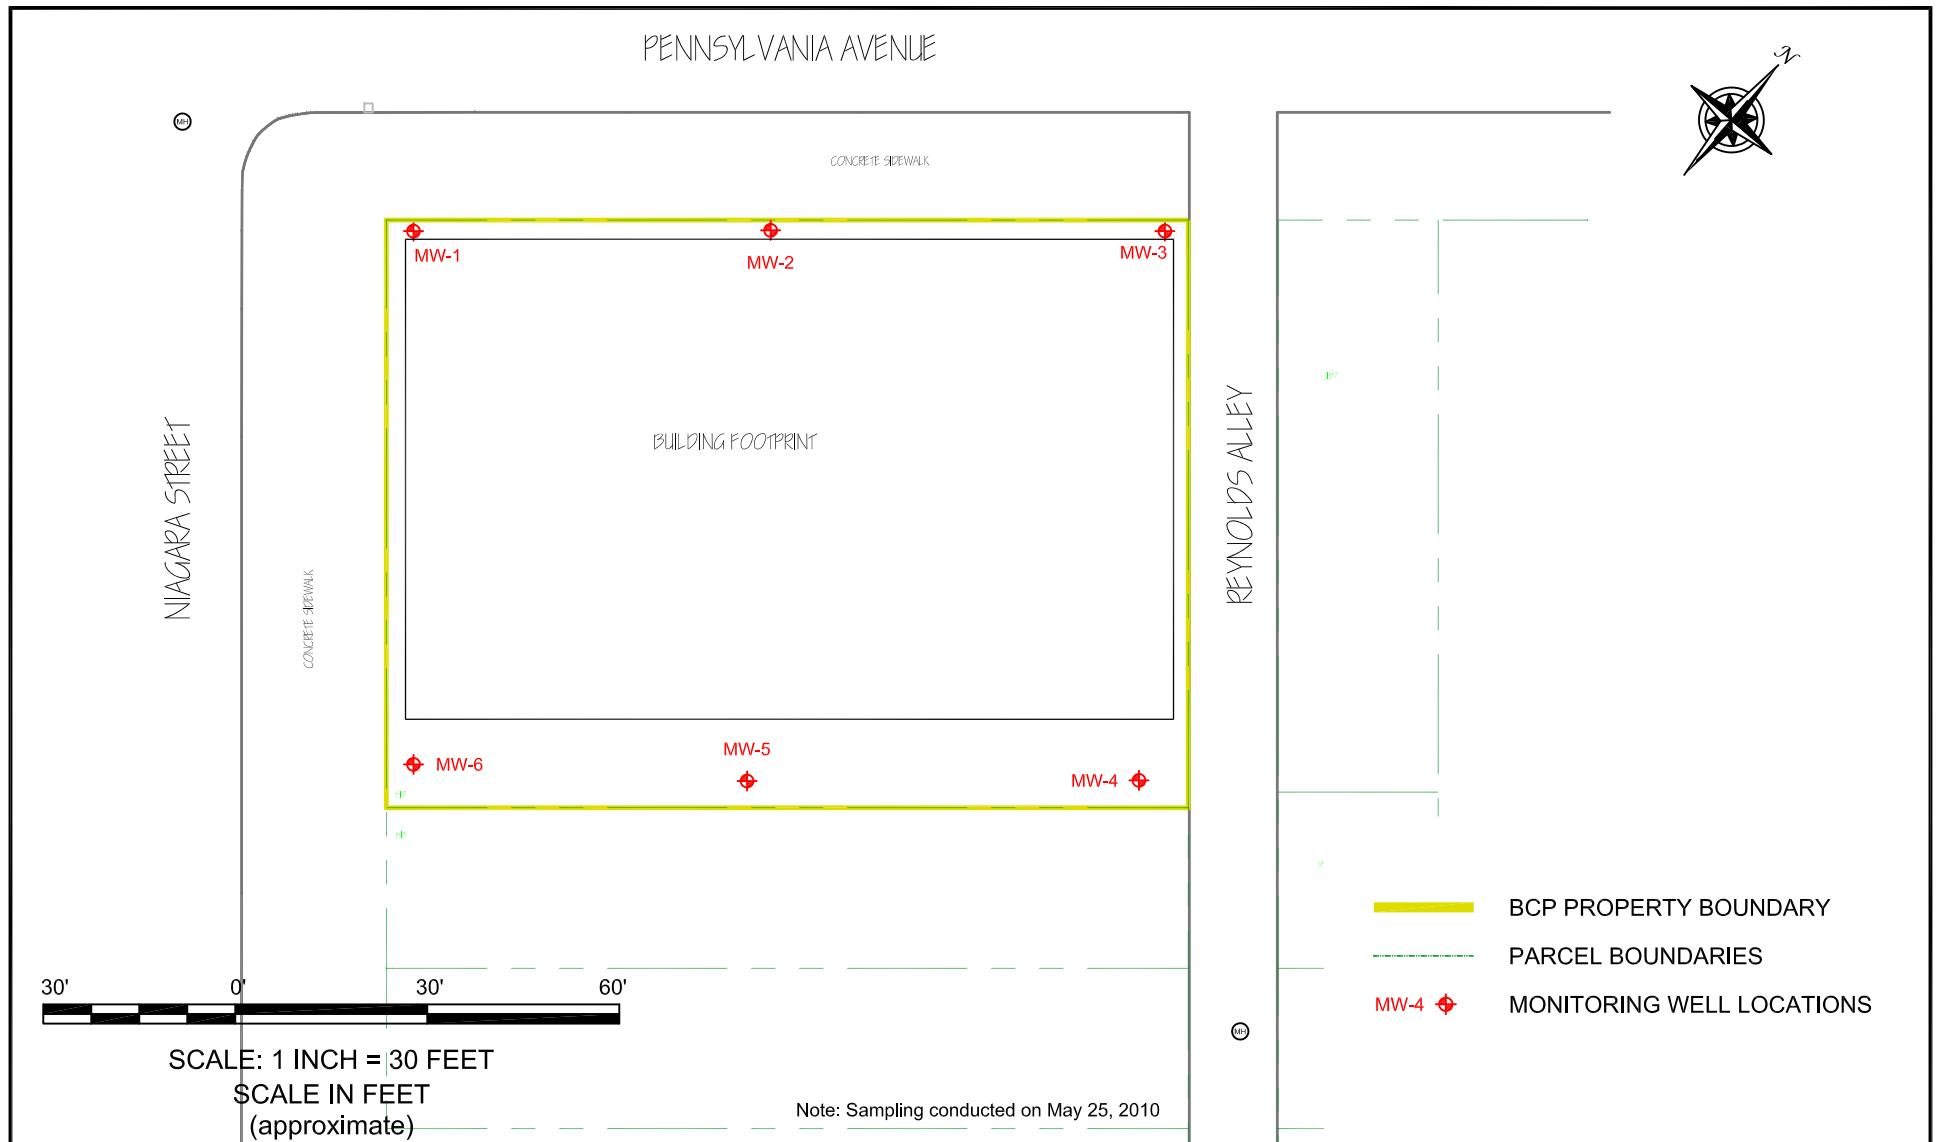

J = Estimated value; result is less than the sample quantitation limit but greater than zero.

D = All compounds were identified in an analysis at the secondary dilution factor.

BOLD

Exceeds NYSDEC Class "GA" Groundwater Quality Standards

CASE NARRATIVE

According to 40CFR Part 136.3, pH, Chlorine Residual, Dissolved Oxygen, Sulfite, and Temperature analyses are to be performed immediately after aqueous sample collection. When these parameters are not indicated as field (e.g. field-pH), they were not analyzed immediately, but as soon as possible after laboratory receipt.

A pertinent document is appended to this report, 1 page, is included and is an integral part of this report.

Reproduction of this analytical report is permitted only in its entirety. This report shall not be reproduced except in full without the written approval of the laboratory.

TestAmerica Laboratories, Inc. certifies that the analytical results contained herein apply only to the samples tested as received by our Laboratory.

Benchmark Environmental & Engineering Science
2558 Hamburg Turnpike, Suite 300
Lackawanna, NY 14218

Work Order: RTE1305
Project: Benchmark - Niagara St. site
Project Number: TURN

Received: 05/26/10
Reported: 06/04/10 10:39

DATA QUALIFIERS AND DEFINITIONS

- D08** Dilution required due to high concentration of target analyte(s)
- J** Analyte detected at a level less than the Reporting Limit (RL) and greater than or equal to the Method Detection Limit (MDL). Concentrations within this range are estimated.
- NR** Any inclusion of NR indicates that the project specific requirements do not require reporting estimated values below the laboratory reporting limit.
