RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Site Description:

The site is located along the Buffalo River and was used for the disposal of wastes such as demolition debris, tank sediments, sewer sediments, soils containing asphalt and general refuse. Prior to Mobil's ownership, the property was used by the City of Buffalo for the disposal of municipal wastes. The U.S.G.S. analysis of soil samples taken in August of 1982 indicated the presence of high levels of lead and various organic compounds. A State Superfund Phase I Investigation Report was completed in 1983. A Phase II Report by Mobil Oil was completed in 1987. Data from this report showed the presence of lead in soil samples at levels of up to 3,160 ppm. The Industrial Waste Survey of 1979 indicates that sludge containing tetraethyl-lead was disposed at this site. Further site investigation was conducted under the DEC's Multi-Media Pollution Prevention (M2P2) Program. The site is part of a 77 acre petroleum storage and distribution terminal which was historically an oil refinery. Currently two remedial systems are in place to contain and

recover spilled oil in soils and groundwater. This system has operated since 1971. In 2004 Exxon/Mobil submitted plans to upgrade the containment system. As part of this effort buried abandoned pipes are being removed from the northern portion of the terminal.

Environmental Problems: Soil is contaminated with lead, which may in part be due to tetraethyl-lead. Oily seeps are visible along the Buffalo River. Adsorbents are placed in the seeps areas. Access to this site is limited by fencing and the lead waste at the site is not considered a significant threat to the environment.

Health Problems Assessment: Direct contact with contaminated on-site soils is unlikely because site access is restricted by a locked fence. Exposures through drinking water ingestion are not expected because the area is served by public water.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and

their precursors, as well as hazardous air pollutants (HAPs).

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Record Upd: 2006-06-12 07:59:00
 Updated By: MLDOSTER
 Site Description:

The "site" was a yard located behind a building owned by the Behringer's. The samples, shown to be characteristic hazardous waste (lead from 5.57 ppm to 250 ppm), were taken from the yard near the corner of a shed located in the yard behind the building. The soil consisted of mixed fill. Clay was encountered at a shallow depth (less than 5 feet). The shallow aquifer was perched and seasonal. The clay layer acted as an aquitard for vertical migration of groundwater. The location is in South Buffalo in an industrial/residential area. The groundwater below the site is not used as a potable water supply, however, there was a potential for exposure via direct contact and wind erosion of the contaminated soil. A routine site inspection by DEC Staff, noted that the owner had stockpiled high level lead contaminated soil. Children were documented playing in the soil. The owner refused to address the issue citing insufficient financial capability. The DEC removed the contaminated soil under an Emergency Removal Contract. A Record of Decision (ROD) was signed in April 1996. The ROD no further action was required.

Environmental Problems: High levels of lead that were found in site soils have been removed. No further action is required. Groundwater was not impacted.

Health Problems Assesment: A completed interim remedial measure which included the excavation and off-site disposal of approximately 1,000 cubic yards of lead contaminated soil and the backfilling and covering of the excavation with at least two feet of "clean" earth cover material should prevent exposures from occurring. Public water serves the area which eliminates potential exposures via drinking water.

Site Description:

The Bengart and Memel (B&M) site is located in an urban commercial area on the south side of Clinton St. in the city of Buffalo. The surrounding land use is a mix of commercial and warehousing operations on the southern side of Clinton St. with residential and commercial on the north side of Clinton St. The southern end of the site is bounded by railroad lines. During B&M operations, scrap metal was processed and sorted. B&M periodically received transformers and capacitors containing PCB oils. These operations were primarily limited to the northwest portion of the site where PCB contamination was detected. The PCB containing oils were spilled on this portion of the site contaminating the soil and shallow groundwater. Oil spills also drained off the site reaching the Buffalo Sewer Authority (BSA) sanitary sewer system on Clinton St. PCB contamination of the sanitary sewer system was discovered by the BSA. In 1982, a Consent Order was executed by B&M which required remediation of the PCB spill area on the site. Remedial actions included excavation of contaminated soil, installation of a groundwater collection and treatment system, chemical treatment of PCB contaminated soils as part of an EPA demonstration project. In 1985 contaminated soil in excess of 50 ppm PCBs was excavated and placed in drums for subsequent chemical treatment to reduce the PCB levels to less than 50 ppm. This demonstration project was moderately successful, achieving up to 90% reduction in PCB levels in the soils. Treatment of the contaminated soils was completed in 1986. Some of treated soils were placed back onto the site and used as fill or were disposed offsite in a secure landfill. Because PCBs less than 50 ppm were left in place at the site, a shallow groundwater collection system was installed to capture PCB impacted groundwater in the shallow groundwater horizon. Collected water was batch processed by a carbon adsorption system prior to discharge to the Buffalo sanitary sewer system. The PCB contaminated area was covered with an asphalt cap to minimize contact with residual level PCB contaminated soil and reduce the generation of PCB impacted shallow groundwater. The site was reclassified to Class 4 in 1987. Initially during the signing of the Department Order on Consent, the main site features consisted of three concrete block buildings with the balance of land previously used for employee parking and for non-ferrous scrap metal stockpiling and sorting. The PCB contaminated area currently contains a dilapidated concrete block building, the asphalt capped area, and groundwater collection and treatment system. The balance and larger portion of the original site containing the larger buildings was subdivided and sold several times since the issuance of a Department Order on Consent. The subdivided portion of the site is currently being utilized by an automobile wrecking operation. The remaining portion of the subdivided site containing remediation measures remains idle. Currently, the groundwater collection and treatment system is inoperable, and the responsible party has failed to maintain and operate the system. NYSDEC will assess site conditions and develop a long-term site management strategy during 2006.

Environmental Problems:

01/13/06 - Exposure to PCBs was to be eliminated by the management of shallow groundwater and maintenance of the asphalt cap area at the northwest section of the site. The responsible party has not maintained the asphalt cap nor operated the PCB leachate collection system since 2001. Potential release points include groundwater bypassing collection sump, broken pipes in treatment system, and overflow from potentially contaminated media in the treatment system containment area. Pending securing site access agreements, a site evaluation to assess current site conditions will commence.

Health Problems Assessment:

Contaminated soils were excavated and treated. A groundwater collection and treatment system is in operation. These remedial actions have eliminated the

Other Pertinent Environmental Activity Identified at Site

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

CONSENT:

Full-text of a consent decree on this site issued by a United States District Court is available from EDR.

Env Problem: With remediation of site, the wastes are contained. The environmental impacts have been mitigated and environmental threats have been removed. The site is being monitored and maintained under a long term O and M Plan by the City of Buffalo. With remediation of site, the wastes are contained. The environmental impacts have been mitigated and environmental threats have been removed. The site is being monitored and maintained under a long term O and M Plan by the City of Buffalo.

Site Description: The site consisted of two properties known as: Bern Metals (3.7 acres) and Universal Metals (1.5 acres). The site was an abandoned scrap reprocessor. Based upon complaints from citizens, DEC conducted a Phase I Investigation in 1987. ApproximateThe site consisted of two properties known as: Bern Metals (3.7 acres) and Universal Metals (1.5 acres). The site was an abandoned scrap reprocessor. Based upon complaints from citizens, DEC conducted a Phase I Investigation in 1987. Approximately two hundred 55 gallon drums were found on the Bern Metals property, along with other wastes including: metal turnings, waste chemicals, sludges, battery cases, spilled battery acids. Subsequently, 25 leaking transformers containing PCBs were found on the Bern Metals property, along with other wastes including: metal turnings, waste chemicals, sludges, battery cases, spilled battery acids. Subsequently, 25 leaking transformers containing PCBs were found on the Universal Metals property. In 1990 USEPA conducted an emergency removal at the site. Drums, gas cylinders and transformers, were removed from the site. Under order by USEPA in 1994, a group of potentially responsible parties (PRPs) remed on the Universal Metals property. In 1990 USEPA conducted an emergency removal at the site. Drums, gas cylinders and transformers, were removed from the site. Under order by USEPA in 1994, a group of potentially responsible parties (PRPs) remediated neighboring residential properties and erected a fence around the contaminated site. The PRPs conducted a Remedial Investigation and Feasibility Study (RI/FS)of the site during the period 1993-1995. The Record of Decision (ROD) was signed indicated neighboring residential properties and erected a fence around the contaminated site. The PRPs conducted a Remedial Investigation and Feasibility Study (RI/FS)of the site during the period 1993-1995. The Record of Decision (ROD) was signed in1996 which required the contaminated soils be consolidated and properly capped. Under a separate New York State consent order, the PRPs consolidated and capped the waste onto the property known as Bern Metals (approximate acreage of 3.7 acres), com1996 which required the contaminated soils be consolidated and properly capped. Under a separate New York State consent order, the PRPs consolidated and capped the waste onto the property known as Bern Metals (approximate acreage of 3.7 acres), completing the project in 2002. The long-term Operation, Maintenance and Monitoring Plan is in effect and is being implemented by the City of Buffalo. The Universal Metals property has been remediated as required by the ROD. This parcel no longer popleting the project in 2002. The long-term Operation, Maintenance and Monitoring Plan is in effect and is being implemented by the City of Buffalo. The Universal Metals property has been remediated as required by the ROD. This parcel no longer poses any environmental or human health threats and has been removed from the site. The reclassified site has been renamed the Bern Metals site.ses

Site Description: Review of aerial photographs indicate that the property south of Republic Steel had been subjected to filling activities at various times between the years of 1951 to 1975. A Phase I/II Investigation report for this site was completed in 1990. Analyses of groundwater, surface water and sediments found volatile and Semivolatile organic compounds ranging in concentration from 1 to 240 ppm. Groundwater quality standards for arsenic, cyanide and manganese were contravened. Additional studies were performed by the potentially responsible parties (PRPs) in 1997. The site was included as part of an area wide remediation and development plan (South Buffalo Redevelopment Project) under the Voluntary Cleanup Program. The VCP will address this site as well as the former Republic Steel property (91 acres), the former Donner Hanna Coke Plant

parcel (53 acres) and Republic Steel Warehouse parcel (43 acres). The proposed agreement would deal with the extensive remediation of the site and the future commercial development of the property. As part of this proposed project, LTV Steel completed a series of extensive investigations on these properties. The results of these investigations confirm the presence of waste materials that exceed the TCLP thresholds for benzene and lead in several areas on these properties. The results also confirm the presence of benzene contamination in the groundwater on these properties at levels above established groundwater standards. LTV Steel filed for Bankruptcy in December of 2001 and National Steel filed for Bankruptcy in February of 2002. As a result of the bankruptcy, title of all properties has been transferred to Steelfields LTD who in turn entered into a Voluntary Cleanup Agreement(Site #V-00619) with DEC on October 15, 2002. After a 90 day public comment period the VCP work plan was approved December 27, 2002. As part of the settlement with the bankruptcy Court the Companies have committed to provide \$16.5 million to fund the clean-up of the site. Work began in 2003 and is on-going.

Environmental Problems: Analysis of the soil samples shows high levels of most of the PNAs and VOCs, and the concentration of iron was higher than background levels. Groundwater is also contaminated at this site.

Health Problems Assesment: Access to the site is partially controlled by fencing, but trespassing has occurred. The Site Investigation documented on-site contamination of subsoils and groundwater with coal tar waste, however, the ongoing remediation of the site under the Steelfield's cleanup and site use restrictions will eliminate the potential for future exposures. Exposures to contaminated groundwater via drinking water are not expected because the area is served by public water.

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D003	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/20/2007	Source: EPA
Date Data Arrived at EDR: 05/03/2007	Telephone: N/A
Date Made Active in Reports: 07/05/2007	Last EDR Contact: 08/31/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 10/29/2007
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/20/2007	Source: EPA
Date Data Arrived at EDR: 05/03/2007	Telephone: N/A

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/20/2007

	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007	Source: EPA
Date Data Arrived at EDR: 06/20/2007	Telephone: 703-412-9810
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 09/19/2007
Number of Days to Update: 70	Next Scheduled EDR Contact: 12/17/2007
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007	Source: EPA

	Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 703-692-8801
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 08/09/2007
Number of Days to Update: 62	Next Scheduled EDR Contact: 11/05/2007
	Data Release Frequency: Semi-Annually

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2005	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 09/20/2006	Telephone: 202-528-4285
Date Made Active in Reports: 11/22/2006	Last EDR Contact: 08/31/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 10/01/2007
	Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 06/20/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/09/2007	Telephone: 202-566-2777

Number of Days to Update: 57	Next Scheduled EDR Contact: 10/01/2007
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 12/31/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/08/2006	Telephone: 505-845-0011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005	Source: EPA
Date Data Arrived at EDR: 03/13/2007	Telephone: 202-564-4203

ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 06/29/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/02/2007	Telephone: 202-564-5088
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 06/22/2007
Number of Days to Update: 58	Next Scheduled EDR Contact: 07/16/2007
	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 09/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 12/17/2007
	Data Release Frequency: No Update Planned

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

North Map:	42078-H7 BUFFALO NE, NY
Most Recent Revision:	1965

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ERIE, NY	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	3602300010B
Additional Panels in search area:	3602300020B

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> BUFFALO SE	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Devonian
Series: Middle Devonian
Code: D2 (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

ENVIRONMENTAL REGULATORY AGENCY INFORMATION

September 26, 2007

Ms. Linda Ross
New York State Department of
Environmental Conservation
270 Michigan Avenue
Buffalo, NY 14203

Re: Freedom of Information Act (FOIA) Request
Portion of Honeywell site (former Buffalo Color site)
343 (aka 322) Elk Street
Buffalo, New York 14210

Dear Ms. Ross:

Our company is currently performing a Phase I Environmental Site Assessment (ESA) for the above referenced property that is located in Sub-area E of the former Buffalo Color site. The property is a warehouse, located at 343 Elk Street in the city of Buffalo, County of Erie, New York. The subject property's tax map ID is listed as 122.12-1-9.12. NYD080335052 and NYD980507729 are the two known EPA ID numbers for the former Buffalo Color site.

We are requesting Historic RCRA Facilities Investigation (RFI) Reports and Quarterly Monitoring Reports for the above referenced site.

Please inform us if any such files exist and when they may be reviewed. We appreciate your assistance in this matter.

Sincerely,
Benchmark Environmental Engineering & Science, PLLC

Brock Greene
Project Environmental Scientist

ENVIRONMENTAL QUESTIONNAIRE

PROJECT # 0099-004-700 DATE: 9/25/07

1. SITE INFORMATION

SITE NAME: Armor Electric Motor + Crane Services

ADDRESS: 343 Elk Street

BUSINESS OWNER/OPERATOR: Tom Parlak

TITLE: President YRS. IN POSITION

2. SIZE AND NATURE OF OPERATION:

TOTAL SQ. FTG. OF BLDG. 25,000 PROPERTY SIZE (FT./ACRES): ~1.7

DESCRIPTION OF OPERATIONS: - Vacant (moving in) - future use will include Electric Motor + Crane repair

CURRENT TENANTS: Armor Electric

WHAT IS THE INTENDED USE OF THE SUBJECT PROPERTY AND/OR STRUCTURES LOCATED ON THE SUBJECT PROPERTY? Commercial/Industrial office/warehouse

3. WHAT ARE THE PAST USES/OCCUPANTS OF THIS FACILITY/PROPERTY AND DATES OF OCCUPANCY?

- 1) Buffalo Color Laboratory + Warehouse
2)
3)

4. UTILITIES:

FLOOR DRAINS: Y-warehouse DISCHARGE POINT Buffalo Sewer

SUMP PUMPS: N DISCHARGE POINT

STORM DRAINS: Ext. DISCHARGE POINT Buffalo Sewer

OTHER:

ON-SITE UTILITIES: N/G/E/S/W

WHEN WAS SUBJECT PROPERTY CONNECTED TO MUNICIPAL SEWER, IF CURRENTLY CONNECTED? Current Bldg built in 1988 - sewer connected at last Den

5. LIST AND DESCRIBE THE STORMWATER AND WASTEWATER DISCHARGES FROM THE FACILITY, INCLUDING THE SOURCES, DISCHARGE POINTS, AND RECEIVING WATERS OR FACILITY:

None

6. WHAT IS THE NATURE OF THE WASTES GENERATED ON-SITE (INCLUDING HAZ./REG. WASTES, THE DISPOSAL METHODS AND WASTE DISPOSAL VENDORS)?

General Refuse

HOW IS IT STORED ON-SITE? Pumpsters - ~~the~~ Wilson

WHO COLLECTS THE WASTES? Pumpsters - ~~the~~ Wilson

7. HAS THE REFUSE SERVICE EVER REFUSED TO COLLECT THE WASTE? NO YES, EXPLAIN

8. HAVE THERE BEEN ANY COMPLAINTS OR NOTICES OF VIOLATIONS ABOUT YOUR FACILITY?

NO YES, NATURE _____

9. WHAT TYPE OF HVAC (HEATING, VENTILATION & AIR CONDITIONING) SYSTEM DOES THIS FACILITY HAVE? (NAT. GAS, ELECTRIC, HEATING OIL, PROPANE, ETC./FORCED AIR, RADIANT, HVAC, ETC.) NG - forced air

10. WAS THIS FACILITY EVER HEATED WITH OIL? NO YES Sean

WHEN? _____

STORAGE CONTAINER OF OIL: _____

11. WAS THIS SITE EVER A CAR REPAIR SHOP, PAINT SHOP, OR GAS STATION?

NO YES, WHEN? _____ OWNER? _____

12. ARE THERE ANY ABOVEGROUND OR UNDERGROUND STORAGE TANKS? NO YES

UST AST, CAPACITY _____ PRODUCT _____ LOCATION _____

UST AST, CAPACITY _____ PRODUCT _____ LOCATION _____

UST AST, CAPACITY _____ PRODUCT _____ LOCATION _____

DO THE TANKS COMPLY WITH DECEMBER 1998 EPA REQUIREMENTS? (including overfill protection, monitoring systems, cathodic protection/double walled tank and piping, etc.) _____

WHEN WERE THE TANKS LAST TESTED? _____

ARE THEY REGISTERED? _____

LEAK DETECTION DEVICES IN PLACE? ____ IF YES, TYPE OF SYSTEM? _____

MONITORING REPORTS AVAILABLE? ____ IF YES, PLEASE SUPPLY COPIES

13. WERE THERE EVER TO YOUR KNOWLEDGE ANY UNDERGROUND OR ABOVEGROUND TANKS LOCATED ON-SITE PREVIOUSLY? _____

NO ____ YES, WHEN? _____

ARE CLOSURE REPORTS AVAILABLE? _____ IF SO, PLEASE SUPPLY COPIES

14. WHAT TYPE OF CHEMICALS ARE USED IN THE OPERATIONS?

(ATTACH LIST) _____ *None now - unknown prior*

LIST HAZ. WASTE/MATERIAL STORAGE LOCATION(S) _____ *None*

15. LIST THE ENVIRONMENTAL OR SAFETY REPORTS TO BE SUBMITTED TO REGULATORY AGENCIES, THE FREQUENCY OF SUCH REPORTS, AND THE AGENCIES TO WHICH THEY ARE SUBMITTED.

_____ *None*

16. DO YOU HAVE ANY FEDERAL, STATE OR LOCAL PERMITS FOR THE FOLLOWING? *None*

SPDES _____ RCRA _____ EPA ID# _____ TITLE V AIR EMISSIONS _____

17. HAVE YOU EVER TRANSPORTED HAZARDOUS WASTE FROM THIS SITE?

NO ____ YES, MANIFESTS AVAILABLE? _____

18. ARE PCBs OR PCB-CONTAINING EQUIPMENT PRESENT ON THE SUBJECT PROPERTY, INCLUDING LIGHT BALLASTS OR OTHER EQUIPMENT? ____ YES NO

LOCATION: _____ TYPE OF EQUIP.? _____

LOCATION: _____ TYPE OF EQUIP.? _____

NilMo - Substation adjacent to site (on Elk + Lee)

19. ARE THERE TRANSFORMERS LOCATED ON-SITE? YES NO
IF SO AND THEY ARE UTILITY OR PRIVATELY OWNED, WHAT IS THE NAME OF THE UTILITY COMPANY? _____

20. DO YOU TREAT OR DISPOSE OF ANY WASTE MATERIALS ON-SITE INCLUDING INCINERATION, NEUTRALIZATION, OR LANDFILLING?
 NO YES, TYPE _____

21. DO YOU STORE ANY HAZ./REG. WASTES ON-SITE FOR TRANSFER TO A DISPOSAL FACILITY?
 NO YES, RECIPIENT OF WASTES _____ PERMIT # _____

22. HAVE YOU EVER BEEN THE SUBJECT OF AN ENFORCEMENT ACTION BY ANY FEDERAL, STATE, OR LOCAL AGENCY REGARDING ENVIRONMENTAL ISSUES?
 NO YES, NATURE _____

23. HAVE THERE BEEN ANY SPILLS, UNPERMITTED DISCHARGES, OR RELEASES OF HAZARDOUS OR CONTAMINATED MATERIALS AT OR NEAR THIS FACILITY?
 NO YES, NATURE Adjacent Buffalo Color/Honeywell Site

24. ARE THERE ANY STAINED, STRESSED OR DEAD VEGETATION/SURFACES ON-SITE?
 NO YES, SUSPECTED CAUSE _____

25. ARE YOU PRESENTLY UNDER ANY FEDERAL, STATE, OR LOCAL CONSENT ORDERS, DECREES OR CAUSES OF ACTION? NO YES, ARE ANY PENDING? NO YES

26. HAVE YOU EVER ALLOWED OR PERMITTED ANY OTHER ENTITY TO DUMP, STORE, DISPOSE, TRANSPORT, BURY, INCINERATE, OR LANDFILL ANY MATERIALS AT THIS SITE?
 NO YES, WHO? _____ WHEN? _____

27. DOES ANYONE OTHER THAN YOUR OPERATIONS UTILIZE THIS SITE PRESENTLY?
 NO YES, WHO? _____
NATURE OF THEIR OPERATIONS: _____

28. HAVE YOU EVER EXPERIENCED ANY PROBLEMS FROM ODORS, DRAINAGE, STORAGE PRACTICES, OR OPERATIONS FROM YOUR NEIGHBORS?

NO ___ YES, NATURE However, Buffalo Color is adjacent
 WHAT WERE THE ACTIONS TAKEN TO CORRECT THESE PROBLEMS?

29. ARE YOU AWARE OF ANY ENVIRONMENTAL LIENS ON THE PROPERTY?

NO ___ YES, NATURE _____

30. WAS THERE EVER A SEPTIC TANK, LEACH FIELD, INJECTION WELL, OR DRY WELL LOCATED ON THE PROPERTY?

NO ___ YES, WHEN (unknown)

31. ARE THERE, OR WERE THERE EVER, ANY WATER WELLS LOCATED ON-SITE?

___ NO ___ YES, WHEN (unknown)

32. ARE THERE ANY DRY CLEANING OPERATIONS CONDUCTED ON-SITE? NO ___ YES

IF SO, WHAT IS THE CURRENT MACHINE GENERATION USED ON-SITE? _____

HOW OLD IS THE CURRENT MACHINE? _____

WAS THERE A PREVIOUS MACHINE UTILIZED ON-SITE? ___ NO ___ YES

HOW LONG HAS DRY CLEANING BEEN CONDUCTED ON-SITE? _____

33. IS THERE CURRENTLY ANY X-RAY DEVELOPING OR FILM DEVELOPING CONDUCTED ON-SITE?

NO ___ YES, IF YES, IS THERE A SILVER RECOVERY SYSTEM IN USE? ___ NO ___ YES

34. DO YOU HAVE SPECIALIZED KNOWLEDGE THAT WOULD PROVIDE INFORMATION REGARDING PREVIOUS OWNERSHIP OR USES OF THE PROPERTY THAT MAY BE MATERIAL TO IDENTIFYING RECOGNIZED ENVIRONMENTAL CONDITIONS ABOUT THE SITE?

___ NO YES, NATURE formerly part of Buffalo Color

35. WHAT ARE THE PAST AND PRESENT USES OF THE PROPERTIES ADJACENT TO YOU?

PLEASE INCLUDE DATES OF OCCUPANCY.

DIRECTION	CURRENT USE/OCCUPANT	PAST USES/OCCUPANTS
NORTH:	<u>Elk St. / Honeywell</u>	<u>Allied Signal</u>
SOUTH:	<u>former Buffalo Color</u>	<u>Allied Signal</u>
EAST:	<u>Parking</u>	<u>unknown</u>
WEST:	<u>Loc St.</u>	<u>former Buffalo Color</u>

36. ARE THERE ANY PENDING, THREATENED OR PAST LITIGATION RELEVANT TO HAZARDOUS SUBSTANCES OR PETROLEUM PRODUCTS IN, ON OR FROM THE SUBJECT PROPERTY? _____

Not involving ~~the~~ Armor Electric

37. ARE THERE ANY PENDING, THREATENED OR PAST ADMINISTRATIVE PROCEEDINGS RELEVANT TO HAZARDOUS SUBSTANCES OR PETROLEUM PRODUCTS IN, ON OR FROM THE SUBJECT PROPERTY? _____

Not involving Armor Electric

38. ARE THERE ANY NOTICES FROM ANY GOVERNMENTAL ENTITY REGARDING ANY POSSIBLE VIOLATION OF ENVIRONMENTAL LAWS OR POSSIBLE LIABILITY RELATING TO HAZARDOUS SUBSTANCES OR PETROLEUM PRODUCTS RELATED TO THE SITE? _____

Unknown - Honeywell is the responsible party for four Buffalo Club / Honeywell site

CERTIFICATION OF RESPONSES:

I, Tom Pawlak, the owner/operator and/or responsible person for this facility, do hereby attest and certify that to the **best of my knowledge**, the answers and information provided in this questionnaire, are true and accurate. I have not willfully withheld information that may be pertinent to the questions contained herein and have not distorted or misrepresented the facts regarding the content of this questionnaire.

APPENDIX J

USER QUESTIONNAIRE

September 25, 2007

Mr. Tom Pawlak
Armor Shield, LLC
343 Elk Street
Buffalo, New York

Re: Phase I Environmental Site Assessment
343 Elk Street
Buffalo, New York

Dear Mr. Pawlak:

As you are aware, Benchmark Environmental Engineering & Science, PLLC (Benchmark) is currently conducting a Phase I Environmental Site Assessment (ESA) at the referenced site (Site).

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user of the Phase I ESA report must provide certain information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

As such, please provide responses to the questions on the attached User Questionnaire.

If you have any questions, please do not hesitate to call anytime. We look forward to continue working with you on this important project.

Sincerely,
Benchmark Environmental Engineering & Science, PLLC

Michael Lesakowski
Project Manager

343 Elk Street
Buffalo, NY

USER QUESTIONNAIRE

1.) Are you aware of any environmental cleanup liens against the Site that have been filed or recorded in a registry under federal, tribal, state or local law?

No Yes (explain) _____

2.) Are you aware of any engineering controls, land use restrictions or institutional controls that are in place and/or that have been filed or recorded in a registry under federal, tribal, state or local law?

No Yes (explain) _____

3.) As the User of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No Yes (explain) However, adjacent site is former Buffalo Color Site / Hexwell (Known impacted site)

4.) Does the purchase price being paid for this property reasonably reflect fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

No Yes (if No, explain) Perceived impact due to general area of site

5.) Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User,

- a. Do you know the past use of the property? Buffalo Color Laboratory
- b. Do you know of specific chemicals that are present or once were present at the property? No
- c. Do you know of spills or other chemical releases that have taken place at the property? No
- d. Do you know of any environmental cleanup activities that have taken place at the property? No

6.) As the User of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

No Yes (explain) Adjacent property is former Buffalo Color Site / Hexwell (Known contaminated site)

343 Elk Street
Buffalo, NY

CERTIFICATION OF RESPONSES:

I, Tom Pawlak, the user of the Phase I ESA being completed for this Site, do hereby attest and certify that to the best of my knowledge, the answers and information provided in this questionnaire, are true and accurate. I have not willfully withheld information that may be pertinent to the questions contained herein and have not distorted or misrepresented the facts regarding the content of this questionnaire.

Admiral Electric Motor + Crane Services, Inc

APPENDIX K

LIMITATIONS

Limitations

This Phase I Environmental Site Assessment (ESA) is based on current and historical information reviewed by Benchmark and Benchmark's site inspection. This report is not to be considered as an environmental audit of the subject property or a complete environmental investigation of the subject property.

The purpose of this assessment is not to proclaim a property is devoid of environmental impact but rather to identify recognized environmental conditions (RECs). RECs are defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to the public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions."

This Phase I ESA makes no warranties nor implies any liability regarding:

1. Site specific practices and/or disposal methods of the past or future owners.
2. Adjacent property owners, their environmental practices and/or impact of such properties and practices on the subject property other than observed from the subject property.
3. Unreported spills.
4. Practices, waste disposal, environmental concerns and/or modifications to waste site indexes after the date on this report.
5. Site groundwater or soil conditions.
6. Accuracy or completeness of information supplied to Benchmark by others.
7. Environmental conditions in areas that were not practically or safely accessible.

8. Accuracy of previous studies (if any) provided to Benchmark.

This report is also subject to any and all limitations defined within ASTM E1527-05. This includes, but is not limited to, the limitation that this report is intended to identify environmental conditions at a specific time and the report is only valid for a period of six months from the date of issuance.

The principles defined within ASTM E1527-05, and followed within this study, include the following.

- This practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property.
- All appropriate inquiry does not mean an exhaustive assessment of a clean property. One of the purposes of this practice is to identify a balance between limiting costs/time and the reduction of uncertainty about unknown conditions.
- The level of inquiry is variable and depends on the type of property, risk level of the user and information developed in the course of the inquiry.
- Subsequent environmental assessments should not be used as standards to evaluate the appropriateness of prior inquiries based on hindsight, new information or new techniques.

APPENDIX L

USER RESPONSIBILITIES

User Responsibilities

The following information is the responsibility of the user and not of the environmental professional. This information may be provided by the user to the environmental professional for use in the final opinion of the all appropriate inquiry. If the information is not provided by the user, the environmental professional's ability to render such an opinion may be hindered and identified as a data gap.

- Searches for environmental cleanup liens against the subject property that are filed or recorded under any federal, tribal, state or local law, as required by 40 CFR Section 312.25.
- Assessments of any specialized knowledge or experience on the part of the landowner, as required by 40 CFR Section 312.28.
- An assessment of the relationship of the purchase price to the fair market value of the subject property, if the property was not contaminated, as required by 40 CFR Section 312.29.
- An assessment of commonly known or reasonably ascertainable information about the subject property, as required by 40 CFR Section 312.30.

APPENDIX M

USER PROTECTIONS

User Protections

Persons claiming the liability protections under CERCLA must meet the statutory requirements of one of the following landowner liability protections. [It should be noted that the user must also satisfy certain continuing obligations outside the scope of this Phase I Environmental Assessment, as required by CERCLA].

- The innocent landowner defense pursuant to CERCLA Sections 101(35) and 107(b)(3).
- The bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 107®.
- The contiguous property owner liability protection pursuant to CERCLA Section 107(q).
