NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION
BROWNFIELD CLEANUP PROGRAM APPLICATION
Section VII – Property Environmental History**

ATTACHMENT D

- Environmental Reports

Attachment D

Environmental Reports

In accordance with Section VII, Question 1 of the BCP Application, a list and summary of each environmental report prepared for the site property is as follows. Copies of the reports are included in the Attachment after the summary.

1). Phase I Environmental Site Assessment, Central Park Plaza 129 Holden Street, Buffalo, New York – prepared by GZA GeoEnvironmental of New York (GZA) for LP Ciminelli Construction, dated August 2011. Pertinent findings of this report regarding the subject property are as follows:

- The site was first developed in at least the early 1900s by Buffalo Cement as a quarry, until the mid 1950s. The site was first developed by the Central Park Plaza in 1958 with the construction of three site buildings (Building 1 through Building 3). An additional building was constructed on the southern portion of the site in 1967 (Building 4) and the fifth building on the western portion of the site in 1989 (Building 5). The site operated as a shopping plaza from 1958 until the last of the tenants vacated the site in July 2011.
- Historic site tenants of concern within Building 1 include photo mart, laundromats, an automatic car wash, a dry cleaner and a chop shop. Several oil containers with missing covers and areas of staining were observed within the chop shop. No floor drains were apparent in the immediate vicinity of the chemical storage areas; however, observations were limited due to the amount of debris within the site building. GZA observe several cracks in the foundation within the chop shop.
- Historic site tenants of concern within Building 2 include an auto service shop.
- In addition, the site was listed twice on the NY Spills database. The potential exists for soil and/or groundwater contamination to have resulted from the historic site usage.
- A maintenance person with Site responsibilities informed GZA that the current owner had been dumping fill materials in the area east of Building 2 at the site and was unaware of the origin of the fill materials brought on-site.
- GZA observed suspect ACM materials during our site reconnaissance including floor tiles, ceiling tiles and pipe wrap throughout the site buildings. The interior portions of the site buildings were littered with debris piles including garbage, drywall, ceiling tiles, floor tiles, glass, wood, pipe wrap etc. Additionally, due to the age of the buildings (1958-1989) it is possible that ACM materials are present in areas that were not readily accessible.

Attachment D

Environmental Reports

- GZA observed painted surfaces in the interior portions of the site building to be in poor condition. Due to the age of the buildings (1958-1989) it is possible that painted surfaces contain detectable quantities of lead.
- GZA observed extensive areas of mold growth on floors, ceilings and walls throughout site buildings.

2). Phase II Environmental Site Assessment, Central Park Plaza 129 Holden Street Buffalo, New York – prepared by GZA GeoEnvironmental of New York (GZA) for Harter Secrest & Emery LLP, dated November 2011. Pertinent findings of this report regarding the subject property are as follows:

- The exterior surface cover generally consisted of asphalt or exposed sub-base. The subsurface conditions consisted of granular fill soils to depths of about 2 feet bgs. The granular soil extended deeper at SP-14 (4 feet bgs), SP-17 (8 feet bgs) and SP-18 (8 feet bgs). Underlying the granular soil generally was a cohesive fill soil (silts and clays) with lesser and various amounts of sand, gravel, brick, wood and glass at depths ranging from 4 to 10 feet bgs. At probe locations SP-5 through SP-8 and SP-19, granular fill soil was encountered at depths of 4 to 8 feet extending to the bottom of the soil probes.
- The interior surface cover inside the former chop shop was concrete. Cohesive fill soils (clayey silt) with lesser and various amounts of sand, gravel and brick, were encountered to a depth of 8 feet below grade in the two northern soil probes, SP-9 and SP-10. A sand and gravel fill layer was encountered at SP-9 from about 2 to 4 feet below grade. Subsurface soils at SP-11 in the southern portion of the former chop shop were granular fill soils (gravel and sand) with lesser and various amounts of silt and clay, to a depth of 1.5 feet below grade, overlying a cohesive soil (silty clay) to about 5 feet below grade and then back to a granular fill soil (sand) with lesser and various amounts of gravel, clay, silt and brick.
- Groundwater was not encountered at soil probe locations completed during our Phase II ESA.
- Thirteen (13) VOCs were detected at concentrations above method detection limits in one soil fill sample, SP-9 from 0 to 4 feet bgs. This sample was collected from inside Building 1 in the former chop shop area. Of the 13 compounds detected, the total xylene concentration exceeded its respective NYSDEC Part 375 Unrestricted Soil Cleanup Objectives. No VOCs were detected above method detection limits in the other five samples submitted for analytical testing.

Attachment D

Environmental Reports

- SVOCs were detected above method detection limits in five of the six fill soil samples submitted for analysis. Six (6) of the detected compound concentrations exceeded their respective USCOs and five (5) exceeded their respective NYSDEC Part 375 Residential Soil Cleanup Objectives at two (2) samples locations: SP-4, 2 to 6 feet bgs and SP-15, 0 to 4 feet bgs. Location SP-4 was located south of Building 1 in the area of the former photo mart and SP-15 was in an area of fill material brought to the site.
- PCBs were detected above method detection limits in one (1) sample, SP-9, 0 to 4 feet bgs. The detected concentration exceeds the USCO. This sample was collected from inside Building 1 in the former chop shop area. No PCBs were detected above method detection limits in the other five (5) samples submitted for analytical testing.
- Six (6) metals were detected above method detection limits in the six (6) fill soil samples sent for analysis. Cadmium, chromium and lead exceeded their respective USCOs and the concentrations of cadmium and chromium also exceed their respective RSCOs in the sample, SP-9, 0 to 4 feet bgs. Lead was detected at a concentration above its USCO in the sample SP-10, 0 to 4 feet bgs. Both probes SP-9 and SP-10 were completed inside the former chop shop area.
- The results of the Phase II ESA identified VOC, SVOC, PCBs and metals contamination in the fill soil at the site. The petroleum related VOCs detected underneath the building in the former chop shop are characteristic of a petroleum release and total xylene was detected above its USCO. A petroleum release was called into NYSDEC on October 28, 2011 and Spill No. 1109473 was assigned based on the analytical results.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Re: Phase I Environmental Site Assessment
Central Park Plaza
129 Holden Street
Buffalo, New York

Dear John:

GZA GeoEnvironmental of New York (GZA) is pleased to provide the attached Phase I Environmental Site Assessment Report. This assessment was completed in general accordance with the guidelines described in ASTM Standard Practice E1527-2005 for Phase I Environmental Site Assessments.

This report is based on our review of available historical and environmental records, visual observations of the surface of the subject and adjoining properties and personal interviews with available persons having knowledge of the property. Recognized environmental conditions have been identified. Section 11.00 of the report, our Findings and Conclusions, is considered an Executive Summary, and should be reviewed in conjunction with the entire report.

We hope this satisfies your present needs. If you need any additional information, please call Christopher Boron at 716-844-7046.

Sincerely,

GZA GEOENVIRONMENTAL OF NEW YORK

1.00 INTRODUCTION

1.10 PROJECT AUTHORIZATION

This report presents the results of a Phase I Environmental Site Assessment (ESA) conducted by GZA GeoEnvironmental of New York (GZA) for LP Ciminelli Construction (Client) at the Central Park Plaza, located at 129 Holden Street in Buffalo, New York (Site). The Site visit portion of this environmental assessment of the property was conducted on August 3, 2011. Authorization to proceed on this project was granted in accordance with our proposal dated July 20, 2011.

1.20 PROJECT OBJECTIVES

The objectives of this Phase I Environmental Site Assessment are:

- To render an opinion as to whether surficial or historical evidence indicates the presence of recognized environmental conditions which could result in the presence of hazardous substances or petroleum products in the environment, as defined in ASTM Standard Practice E1527-05 for Phase I Environmental Site Assessments.
- To permit the Client to satisfy one of the requirements to qualify for certain Landowner Liability Protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

As defined by ASTM Method E1527-05, the term recognized environmental condition means "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property."

1.30 SCOPE OF SERVICES

GZA's assessment of the Site was completed in general accordance with ASTM Method E1527-05 and GZA's proposal for services. We understand that this assessment is not funded with a Federal Grant awarded under the U.S. Environmental Protection Agency (EPA) Brownfield Assessment and Characterization Program. GZA's scope of services consisted of the following activities:

- Review of federal and state regulatory agency databases identified by ASTM for the Site listing and other property listed within a selected radius around the Site;
- Contact with local environmental regulatory agencies to inquire about environmental conditions at the Site and its vicinity;
- Review of the Site history through available ASTM Standard Historical Sources;

- A site reconnaissance to make surficial observations for evidence of recognized environmental conditions;
- Visual observations from public property of properties within ¼ mile of the Site;
- Observations of adjoining properties to view for the potential use of hazardous materials;
- Interview with the property owner or Key Site Manager (identified by Client) regarding the current and past site usage and facility operations;
- Review of the information provided as part of “User responsibilities” described in ASTM 1527-05; and
- Preparation of this report which presents GZA's field observations, results, and opinions.

This report is subject to modification if subsequent information is developed by GZA or any other party, and it is subject to the limitations presented in Section 13.00 and Appendix A.

2.00 BACKGROUND SITE INFORMATION

The following information was obtained during GZA's site reconnaissance and from an interview with a Key Site Manager knowledgeable about the Site (Mr. John Ciminelli, Senior Vice President of LP Ciminelli). Photographs depicting Site conditions at the time of GZA's assessment are presented in Appendix B. Additional information on Site use and area observations and activity at the Site is contained in Sections 6.00 and 7.00.

2.10 SITE LOCATION

The Site is comprised of one, 27.1 acre parcel (Central Park Plaza), addressed as 129 Holden Street in Buffalo, New York. A Site locus is included as Figure 1 and a Site plan as Figure 2.

2.20 SITE DESCRIPTION

The Site is addressed at 129 Holden Street located in Buffalo, New York and is known as the Central Park Plaza. The Site is identified as SBL No. 90.29-2-43.1 and includes the addresses of 1 through 90 Central Park Plaza (CPP) consisting of five Site buildings and one storage shed structure. The remaining portions of the Site consist of paved parking areas with a grass and gravel area on the southeastern corner and a grassy fill area on the northeastern corner of the Site.

2.30 CURRENT SITE USE

At the time of GZA's Site visit, the Site contained five (5) vacant buildings, formerly occupied by various tenants consisting of stores and offices spaces since approximately 1958. The last tenants vacated the Site in July 2011. The remaining portions of the Site consist of paved parking areas with a grass and gravel area on the southeastern corner and a grassy fill area on the northeastern corner of the Site. A more detailed description of Site use and our reconnaissance observations are contained in Section 6.00.

2.40 ADJOINING PROPERTIES USE

The properties that adjoin the Site are shown on Figure 2 and are generally described below.

- North: Residential
- South: Residential
- East: Residential/Apartments/US Post Office/Park Land
- West: Holden Street/Dollar General/Church/City Clean Laundromat/Health Services/Brooks Dry Cleaners

2.50 AREA USE

The general property usage in the vicinity of the Site is:

- North Residential
- South Residential
- East Residential/Commercial/Recreational
- West Commercial/Residential

2.60 SITE UTILITIES

<u>Gas:</u>	National Fuel
<u>Electricity:</u>	National Grid
<u>Potable Water:</u>	City of Buffalo
<u>Sanitary Sewer:</u>	City of Buffalo
<u>Storm Sewer:</u>	City of Buffalo
<u>Solid Waste:</u>	Allied Waste Disposal

3.00 ENVIRONMENTAL SETTING

The following subsection provides information regarding the general regional physiographic, regional hydrology and soil/rock conditions in the area of the Site.

3.10 REGIONAL PHYSIOGRAPHY

Based on a review of the U.S. Geologic Survey Map for Buffalo NE, NY dated 1965, the Site is approximately 670 feet above mean sea level. The Site area topographic gradient appears to be relatively flat with a gradual downward slope downward to the northwest towards the Niagara River, located approximately four miles west, northwest of the Site. In addition, Scajaquada Creek is located approximately 1.5 miles to the southwest of the Site.

3.20 REGIONAL HYDROLOGY

Based on review of the USGS topographic map, Buffalo NE, NY and knowledge of the Site area, the estimated depth to groundwater is likely less than 20 feet below ground surface. Regional and site groundwater flow is assumed to be northwesterly towards the Niagara River. However, localized flow direction in the area of the Site may vary as a result of underground utilities, or heterogeneous subsurface conditions. Subsequent references to upgradient and downgradient properties are based on the estimated northwesterly groundwater flow direction. Based on information provided by Environmental Data Resources (EDR), the Site is not located within the 100 year or 500 year floodplain. No wetlands are present on-Site.

3.30 SOIL AND ROCK CONDITIONS

Based on the EDR Geochek report, the bedrock at the Site is anticipated to be of Paleozoic era, stratified sequence. According to the Soil Conservation Service STATSGO data supplied by EDR, Soil Survey of Erie County, New York, dated 1986, the Site soils consists of Urban land. This soil is described as being nearly level, and having 80% or more of the soil surface covered by asphalt, concrete, building or other impervious surfaces.

4.00 HISTORICAL USE INFORMATION

The Site history was developed from ASTM Standard Historical Sources and available files at the City of Buffalo Tax Assessor's office, Building Department, Office of Fire Prevention, and Buffalo and Erie County Public Library. A list of sources interviewed is included in Section 9.00. ASTM indicates that "all obvious uses of the property shall be identified from the present, back to the property's first developed use, or back to 1940, whichever is earlier. ASTM further indicates that "data failure is not uncommon" when trying to establish the historical use of a property. A historical summary report is provided in Section 4.10 below. Specific detail obtained from ASTM historical sources is contained in subsequent sections.

4.10 SITE AND AREA HISTORY SUMMARY

Based on review of historical sources and interviews, The Site was first developed in at least the early 1900s by Buffalo Cement as part of a larger rock quarry. The quarry was in operation until the mid 1950s. In addition, a small pond was observed in the 1946 historic topographic map which was possibly associated with the rock quarry and has since been filled in. The Site was developed by the Central Park Plaza in 1958 with the construction of three Site buildings (Building 1 through Building 3). An additional building was constructed on the southern portion of the Site in 1967 (Building 4) and the fifth building was constructed on the western portion of the Site in 1989 (Building 5). The Site operated as a shopping plaza from 1958 until the last of the tenants vacated the Site in July 2011. Historic Site tenants included the following.

- Building 1: various stores, photograph processing store, laundromats, automatic car wash, dry cleaner, beauty salons, department stores, jewelry stores, shoe stores, restaurants, offices, furniture and electronics stores, martial arts studio, a charter school, a fitness center, drug stores, auto supply stores, a church, a grocery store, movie theater, bank, an elevator company and candy store.
- Building 2: various shops, clothing stores and an auto service.
- Building 3: various stores, a recording studio, clothing stores, Buffalo Reuse and its associated fenced in storage area.
- Building 4: grocery stores with a partial second floor.
- Building 5: shoe store.

4.20 CITY DIRECTORIES REVIEW

EDR completed a city directory search for the Central Park Plaza (CPP) Site address from 1960 to 2008. In addition, GZA reviewed historical city directories at the Buffalo and Erie County Public Library. The Site was not listed in the available City Directories prior to 1960. The information obtained from this review is provided below and included in Appendix C.

The Site and associated 5 buildings were occupied by various tenants from 1958 until 2011 including the following.

1 CPP	Murphy G C Co. Department Store (1960-1992)
2 CPP	Grocery store (1960-1975)
3 CPP	Thrift Store (1980), Department Store (1980)
4 CPP	Fish Market (1980), Kresge Variety Store (1960-1975)

- 5 CPP offices (1980),
Records (1975),
Bakery (1960-1964)
- 6 CPP Police Sub Station (1980-1985),
Central Park Automatic Car Wash (1970-1975),
Shoe Store (1960)
- 7 CPP Wigs (1980),
Gift Shop (1964-1970),
Womens Clothing (1960)
- 8 CPP Floral Galery (1980),
offices (1964-1975)
- 9 CPP Cadet Cleaners (1975-1992),
Candy Shop (1960-1970)
- 10 CPP McCrory Variety Store (2001),
Off Track Betting (1975-1980),
Style Corner Inc. (1970),
Kraus Mens Store (1960-1964)
- 11 CPP Sench Jewelers (1960),
Shoe Store (1970-1975),
Spa/Boutique and recruitment offices (1980)
- 12 CPP Restaurant, Martial Arts Studio (1980),
offices (1975),
shoe store (1960-1964)
- 13 CPP Art & Furniture store (1980),
restaurant (1960)
- 14 CPP restaurant (1980),
offices (1964-1975)
- 15 CPP shoe store (1960-1970)
- 16 CPP Hill Street Fashions (1980),
Lees Drug Store (1960-1975)
- 17 CPP Auto Supply Co. (1980),
Psychiatrice Clinic offices (1975),
Fotomat Corp. Film and developing (1975),
Central Park Shopping Center/offices (1964-1975),
Airway Hotels Inc., BAW Construction Contractors (1964),
Lee Jane Womens Clothing (1960)
- 18 CPP Bedding store (1980),
Western Auto Supply (1960-1975)
- 19 CPP bank (1980),
liquor store/locksmith (1975),
liquor store (1970),
Stationers (1060-1964)
- 20 CPP Church Fellowship (2008),
Rite Aid (1992-2001),
Super Duper Markets (1985),

	Movie Theater (1980), Bank (1960-1975)
21 CPP	BLSN Sys (1980), Theater Cinema (1975), Restaurant (1960-1970)
22 CPP	Rental Services (1980), Shoe service repair (1975), barber shop (1960-1970)
23 CPP	restaurant (1975-1980), shoe service (1970), Beauty Salon (1960-1964)
24 CPP	TV Services (1980), Dates Laundry Pick Up Delivery (1960-1970)
25 CPP	Brooks Central Park Plaza Cleaners (1980), Dairy Store (1975), Beauty Salon (1970), Otis Elevator Company (1964), Photo Supply Store (1960)
26 CPP	Coin Laundry (1970-1975), Beauty Salon (1975), Dairy Store (1970), Sporting Goods/Day & Nite Laundry (1960-1964), Record Store (1960)
28 CPP	Fotomat Corp. Film and Development (1980), A&P Foods (1960-1975)
29 CPP	Locksmith (1980)
30 CPP	Beauty Salon (2001-2008), Amvets Thrift Store (1985-1992)
40 CPP	Plaza Security (2001-2008), Bargin Outlet (1985-1992)
43 CPP	Jeans N Pants (1985-1992)
44 CPP	Restaurant (1985-1992)
46 CPP	offices (2001)
48 CPP	Cathedral of Praise (20010)
50 CPP	Uniforms/offices (2001-2008), US Army Recruiting Center (1992)
60 CPP	offices (2008)
62 CPP	Buffalo City Police (1992), Legal Services (1985)
63 CPP	Tax Masters (1985)
64 CPP	Dentist (1985)
66 CPP	Beauty Salon (1985)
70 CPP	Hair Dresser (1985-2008)
80 CPP	H&R Block (2008), Fashion Clothing (1985-1992)

90 CPP	Nail Manicurist (2001-2008)
100 CPP	Derby Lounge (1985-1992), Radioshack (1992-2001)
110 CPP	Restaurant (1985-1992)
120 CPP	H&R Block (2001), American Red Cross/offices (1985-1992)
129 CPP	offices (1980)
130 CPP	Rent-A-Center (1992-2001), Photo Gift and developing (1985)
140 CPP	Charter School (2008), Donut shop (1985-2001)
150 CPP	fitness facility (2001-2008), Thrift store (1992), Brooks Pharmacy (1985)

4.30 HISTORIC TOPOGRAPHIC MAP REVIEW

EDR provided historical topographic maps for the Site for the years 1901, 1946, 1948, 1950, and 1965. Copies of the topographic maps are included in Appendix C.

Year	Site	Nearby Properties
1901	The Site appeared to be vacant with no specific buildings or features present.	The area to the southwest of the Site was highly developed by the City of Buffalo. Scajaquada Creek is located south of the Site, Niagara River to the west and railroad tracks to the east.
1946	The Site appeared to be vacant with no buildings present. The southeastern portion of the Site contained a small pond.	The area surrounding the Site was shaded, indicating it was highly developed by the City of Buffalo. Commercial type structures are apparent west of the Site. Two large ponds are apparent northeast of the Site, the Buffalo Zoo and Forest Lawn Cemetery are located to the west, Bennett High School is located to the north and railroad tracks are apparent to the east of the Site.
1948, 1950	Generally appeared similar to the previous map. The pond is no longer present.	Generally appeared similar to the previous map with further commercial development. The two ponds to the northeast of the Site are no longer present.
1965	The Site appeared to be occupied by three buildings. One large, long building located on the northern portion	Generally appeared similar to the previous map with further development. The surrounding area was shaded red,

Year	Site	Nearby Properties
	of the Site (Building 1), one smaller building located just east of that in the northeastern portion of the Site (Building 2), and one larger structure located on the eastern portion (Building 3).	indicating it was highly developed. Numerous schools, churches and commercial type structures were apparent in the surrounding area.

4.40 AERIAL PHOTOGRAPH REVIEW

GZA reviewed copies of historical aerial infrared orthophotographs provided by EDR dated 1927, 1958, 1966, 1978, 1983, 1985, 1995, 2006 and 2008; the New York State Department of State, Division of Coastal Resources, GIS Division: <http://www.nysgis.state.ny.us/gateway/index.html> dated 1995, 2002, 2005 and 2008; and http://www.erie.gov/depts/community/highways_aerial.phtml dated 1927 and 1951. Copies of the photographs are included in Appendix C.

Year	Site	Nearby Properties
1927	The Site appeared to be occupied by a portion of a larger quarry with no specific Site buildings or features present.	The surrounding area appeared to be highly developed with several residential and commercial type structures by the City of Buffalo. A quarry is apparent to the north, railroad tracks are apparent to the east of the Site and commercial structures to the northeast and west.
1951	The Site appeared to be grass covered with a few trails present and no remnants of the former quarry.	Generally appeared similar to the previous photograph with further development. Several commercial type structures are apparent to the north, west and east of the Site.
1958	The Site appeared to be occupied by three structures, similar in size and shape to Buildings 1, 2 and 3 which are currently present. The remaining southwestern portion of the Site appeared to be utilized as parking areas.	Generally appeared similar to the previous photograph.
1966	Generally appeared similar to the previous photograph.	Generally appeared similar to the previous photograph with further development of residential type structures adjoining the Site to the north, baseball fields to the east and a water tank to the northeast of the Site.

Year	Site	Nearby Properties
1978, 1983, 1985	Generally appeared similar to the previous photograph with the additional construction of a fourth structure located on the southern portion of the Site, similar in size and shape to Building 4.	Generally appeared similar to the previous photograph.
1994, 1995	Generally appeared similar to the previous photograph with an additional smaller building constructed on the western portion of the Site, similar in size and shape to Building 5.	Generally appeared similar to the previous photograph.
2002, 2005, 2006, 2008	The Site appeared to be occupied by five buildings, similar in size and configuration to current Site conditions. Additionally, a small storage shed is apparent on the northern portion of the Site.	Generally appeared similar to the previous photograph.

4.50 HISTORIC ATLAS REVIEW

EDR provided historical Sanborn Maps for the Site for the years 1916, 1935, 1950 and 1986. Copies of the historic Sanborn Maps are included in Appendix C.

Year	Site	Nearby Properties
1916	The Site appeared to be occupied by a portion of a larger quarry.	The area surrounding the Site appeared to be occupied by a quarry. A crushing plant is apparent to the northwest of the Site with associated storage structures. The area to the South of the Site appeared to be occupied by residential dwellings.
1935	The Site appeared to be occupied by Buffalo Cement Company stone quarry. The northwestern portion of the Site appeared to be occupied by a portion of a storage structure that included a transformer and motor house. A private road is located on the eastern portion of the Site orientated in a north to south direction.	The area surrounding the Site appeared to be occupied by Buffalo Cement Company stone quarry with an associated storage structure and engine room located just northwest of the Site. The area to the south appeared to be occupied by residential dwellings. ACME Building Warehouse is apparent southeast of the Site.
1950	The Site appeared to be occupied by a quarry with no specific Site buildings or features shown. A private road is located on the eastern portion of the Site orientated in a north to south direction.	The area to the north and south of the Site appeared to be occupied by residential dwellings and associated garages. A cinder block division wall is apparent north of the Site. ACME

Year	Site	Nearby Properties
		Building Warehouse is apparent southeast of the Site.
1986	The Site appeared to be occupied by the Central Park Plaza shopping center, comprised of five structures, similar to the current Site layout, with various shops and tenants. Building 1 on the northwestern portion of the Site contained a transformer room on the western portion of the building. Building 2 on the northeastern portion of the Site contained an auto service shop.	The area to the north and south of the Site appeared to be occupied by residential dwellings and associated garages. A building labeled "NC" adjoins the Site to the east with a playground beyond that. LP Ciminelli Construction is located southeast of the Site.

4.60 TITLE SEARCH AND ENVIRONMENTAL LIEN SEARCH REPORT

Mr. John Ciminelli, Senior Vice President of LP Ciminelli, completed a user questionnaire and indicated that no Activity and Use Limitations (AULs) or environmental liens are known for the Site. A copy of this questionnaire is included in Appendix E.

4.70 BUILDING DEPARTMENT RECORDS

GZA visited the City of Buffalo Building Department for information pertaining to the Site. The desk clerk was unaware of any environmental concerns associated with the Site. There were numerous building permits on file for converted uses of the buildings, plumbing permits, electrical permits, repair permits and sign permits. The following pertinent information was available.

- 5/1957 Erect masonry shopping center
- 6/1967 Erect and use one story building as a department store
- 9/1969 Erect and use building for sale of films and processing
- 5/1971 Erect and use building for sale of films and film processing
- 5/1978 Repair and alter dry cleaning and Laundromat (26 CPP)
- 7/1984 Erect and use building as retail outlet with parking areas
- 7/1986 Erect and use one story shoe store

4.80 PROPERTY TAX FILES

GZA visited the City of Buffalo Assessor's Office for information pertaining to the Site. The desk clerk was unaware of any environmental concerns associated with the Site. The following information was available and copies of the following information are included within Appendix C.

- SBL#: 90.29-2-43.1
- Lot Size: 27.1 acres
- Use: Shopping Plaza
- Year Built and gross floor area:
 - Building 1 1958 134,093 sq. ft.
 - Building 2 1958 9,836 sq. ft.
 - Building 3 1958 35,173 sq. ft.
 - Building 4 1967 62,900 sq. ft.
 - Building 5 1989 3,053 sq. ft.
- Current Owner: Central Park Plaza Associates
- Previous Owners: not listed
- Improvements:
 - 1958-canopy
 - 1967-concrete paving
 - 1970-asphalt paving
 - 1970-drive thru window

4.90 OFFICE OF FIRE PREVENTION

GZA contacted the City of Buffalo Office of Fire Prevention for information pertaining to the Site and possible installation and removal of USTs. The desk clerk was unaware of any environmental concerns associated with the Site and indicated there are no records or permits regarding storage tanks at the Site.

5.00 PREVIOUS SITE INVESTIGATIONS

GZA was not provided previous reports for the Site.

6.00 SITE RECONNAISSANCE

The purpose of GZA's site reconnaissance was to make surficial observations for evidence of recognized environmental conditions which could result in the presence of hazardous materials in the environment. GZA Environmental Scientist, Jennifer Davide, visited the Site on August 3, 2011. Mr. John Ciminelli, Senior Vice President of LP Ciminelli and Mr. Steven Tootill, Maintenance worker for Lt. Col. Matt Urban Human Services Center of

W.N.Y., accompanied GZA during the Site visit. Observations were documented and pertinent features or areas of environmental concern were photographed and are referenced in the text. Selected photographs are included in Appendix B, and pertinent Site features are depicted in Figure 2. A summary of each area assessed is presented below.

6.10 EXTERIOR OBSERVATIONS

The periphery of the Site was visually assessed for recognized environmental conditions.

6.10.1 Underground Storage Tanks (USTs)

No evidence of underground storage tanks, fill ports or vent pipes were observed during our Site reconnaissance.

6.10.2 Aboveground Storage Tanks (ASTs)

No ASTs were observed on the exterior portions of the Site during our site reconnaissance.

6.10.3 Hazardous Substances or Petroleum Products Use

No hazardous substance or petroleum products were observed during GZA's exterior site reconnaissance.

6.10.4 Staining

No areas of staining, aside from typical parking lot staining, were observed.

6.10.5 Electrical Transformers/Equipment

Three pole mounted transformer locations (each containing three transformers) were observed on the northern portion of the Site, north of Buildings 1 and 2. No significant areas of staining or leaking were observed on the poles or on the ground under the transformers. Mr. Tootill informed GZA the transformers are owned and maintained by the power authority. Additionally, a former transformer pad area was observed along the southwestern corner of Building 4. No areas of staining were observed on the pad.

6.10.6 Drywells and Sumps

No surficial evidence of exterior drywells or sumps was observed during GZA's site reconnaissance.

6.10.7 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were observed during the site reconnaissance.

6.10.8 Wells

No surficial evidence of wells were observed during GZA's site reconnaissance. Mr. Tootill informed GZA the Site is serviced by municipal water.

6.10.9 Solid Waste

Three (3) Allied Waste and one Waste Management dumpster were located on the northern portion of the Site, north of Buildings 1 and 2. No areas of staining were identified around the dumpsters.

6.10.10 Process Wastewater

No surficial evidence of exterior on-site process wastewater disposal was observed.

6.10.11 Septic System

No septic systems were observed. Mr. Tootill indicated the Site buildings are currently serviced by municipal sanitary sewer.

6.10.12 Stressed Vegetation

No areas of stressed vegetation were observed on the Site. However, fill material placement was observed on the northeastern corner of the Site. Mr. Tootill informed GZA the owner of the Site had been dumping fill materials in this area of the Site. Mr. Tootill was unaware of the origin of the fill materials brought on-Site.

6.10.13 Soil/Water Sampling

No subsurface exploration or chemical analysis has been included as part of GZA's scope of services. Information regarding subsurface conditions can be obtained by traditional subsurface exploration techniques and the collection and chemical analysis of soil and water samples.

6.10.14 Oil/Water Separators

No oil/water separators were observed on the Site.

6.10.15 Surface Water Runoff

Surface water is expected to flow towards catch basins within the Site parking lot, flow towards catch basins within Holden Street, Central Park Plaza, Manhattan Avenue, or infiltrate into the ground.

6.10.16 Other Observations

- A pile of tires was observed along the northeastern corner of Building 2.
- A fenced storage yard was observed on the southeastern portion of the Site, adjoining Building 3 to the south. Mr. Ciminelli informed GZA this storage area contained building materials. GZA observed piles of brick, concrete, doors, various building materials and a fork lift.
- A small storage shed was observed along the northern property line, north of Building 1. The shed appeared to be in poor condition and GZA did not enter the structure.

6.20 INTERIOR OBSERVATIONS

The interior of the five (5) Site buildings were visually assessed for evidence of recognized environmental conditions.

6.20.1 Construction

There are five buildings on Site, all one story buildings with the exception of Building 4 which contains a partial second story. The buildings are constructed with steel frames, cinderblock walls and a brick façade. Interior construction generally consisted of drywall, or cinderblock walls, drop ceiling tiles or open truss steel ceilings and concrete slab-on-grade floors. Floor covering consisted of suspect ACM 9 x 9 floor tiles, carpeting or bare concrete. The western portion of Building 1 contains a basement which was in poor condition with water damage and building debris piles. It should be noted that each of the Site buildings interior finishing's were in poor condition with holes in walls and ceilings. Additionally water damage was observed in many areas with the exception of Building 5.

6.20.2 Heating and Cooling

Mr. Ciminelli informed GZA the Site buildings are heated and cooled by HVAC roof top units. However, some of these units have been removed, leaving some spaces open to the environment.

6.20.3 Current Site Use

At the time of GZA's site visit, the Site consisted of five vacant buildings which made up the former Central Park Plaza shopping center. The Site buildings are

currently in poor condition with holes in walls, ceilings, water damage and mold growth. Additionally, numerous piles of debris (consisting of dry wall, wood, pipe wrap, glass etc.) and broken glass were observed in each of the buildings. The remaining portions of the Site consist of paved parking areas with a grass and gravel area on the southeastern corner and a grassy fill area on the northeastern corner of the Site.

6.20.4 Chemical Use and Storage Areas

GZA observed chemical storage areas within Building 1, which historically contained various tenants including photograph development store, laundromats, beauty salons, automatic car wash and a dry cleaner, among other various tenants; and Building 4 which has historically been occupied as a grocery store.

GZA observed the following chemicals within Building 1:

- GZA observed 55-gallon drum of the following products: first coat sealer undercoat, ZIP, Mycrobreeze and Conquest on the western portion of Building 1. The chemicals appeared to be sealed with no significant areas of staining or leaking.
- A former 'chop shop' was located in 40-50 CPP, centrally located within Building 1. GZA observed approximately 200 automobile tires, propane tanks, portable gasoline tanks, four 5-gallon containers of joint compound, four, 1-gallon containers of paint, 5-gallon container of super paint, and several containers varying in size from 1 quart to 1 gallon of the following: raid, oil, paint, bleach, penetrating oil, WD-40 and antifreeze. Additionally, a make-shift paint booth was observed within the 'chop shop' containing numerous containers ranging in size from 32 ounce to 5-gallon of paints, primers, enamels, thinners and strippers. The chemical storage areas within the 'chop shop' were disorganized. Many of the chemical containers did not have covers and there were areas of staining.
- GZA observed three empty 55-gallon drums of acetone within the rear of a former nail salon and one 5-gallon container of Truguard on the eastern portion of Building 1. The chemicals appeared to be sealed with no significant areas of staining or leaking.

GZA observed the following chemicals within the second floor of Building 4:

- Two 5-gallon containers of floor wax, eight 1-gallon containers of sanitizer, three 5-gallon containers of degrease and sanitizer, one 5-gallon container of mold control, two cylinders of refrigerants for the former cooler and freezers within the grocery store and five 5-gallon containers of

paint. The chemicals appeared to be sealed with no significant areas of staining or leaking.

Mr. Ciminelli and Mr. Tootill informed GZA that Lt. Col. Matt Urban Human Services Center of W.N.Y would be taking an inventory of the chemicals present and properly disposing of them. GZA contacted Ms. Leslie Vishwanath, Lt. Col. Matt Urban Human Services Center of W.N.Y for further information on the removal of the chemicals. Ms. Vishwanath indicated they are waiting for the current owner to provide funding for her company to properly remove and dispose of all chemicals on-Site and that she is unaware of the estimated timeframe for the removal at the time of our conversation. Additionally, Ms. Vishwanath provided GZA with an inventory list of chemicals, miscellaneous waste and tires as part of an environmental services quotation to remove these items from the Site. A copy of this environmental services quotation is attached in Appendix C.

6.20.5 Hazardous Wastes Generated and Waste Storage Areas

A former 'chop shop' was located in 40-50 CPP of Building 1. GZA observed seven 5-gallon containers and one 55-gallon drum of waste oil. The oil containers were missing covers and areas of staining were observed on the floor. Additionally, an approximate 250-gallon AST was also observed within the 'chop shop' which appeared to be empty. No floor drains were apparent in the immediate vicinity of the chemical storage areas; however, observations were limited due to the amount of debris within the Site building. GZA observe several cracks in the floor within the 'chop shop'.

6.20.6 Stains or Corrosion

GZA observed areas of floor staining within the 'chop shop' centrally located within Building 1. No floor drains were apparent in the immediate vicinity of the chemical storage areas; however, observations were limited due to the amount of debris within the Site building. GZA observed several cracks in the foundation.

6.20.7 Floor Drains or Sumps

Floor drains were apparent within restrooms of the Site buildings and throughout the former grocery store within Building 4. Additionally, GZA observed what was believed to be a floor drain within the 'chop shop' inside Building 1. Mr. Ciminelli indicated he believed the floor drains were connected to the City of Buffalo municipal sewer system.

A partial basement was observed within the western portion of Building 1. The basement was in poor condition with water damage, building debris piles, areas of ponding water and mold growth. GZA's observations were limited to the amount of

debris within the basement area. No sumps or drains were observed within the basement.

6.20.8 Transformers

No electrical transformers were observed within the Site buildings. Mr. Ciminelli informed GZA the interior transformers had been removed.

6.20.9 Other Interior Observations

- GZA observed a garbage can filled with light bulbs within the northwestern portion of Building 1.
- The interior of the Site buildings were littered with garbage and building debris including drywall, ceiling tiles, floor tiles, glass, wood, pipe wrap etc.
- A make-shift paint booth was observed within the 'chop shop' within Building 1.

6.30 NON-SCOPE CONSIDERATIONS:

Radon: Radon is a naturally occurring gas produced by the breakdown of uranium in soil, rock and water. The amount of radon in the air is measured in picocuries of radon per liter of air, or pCi/L. The Environmental Protection Agency (EPA) recommends remedial action be taken, if the level of indoor radon is greater than 4 pCi/L, known as the action level. The New York State Department of Health, Short Term Basement Radon Measurements dated October 2010, reported that 895 homes were tested in Buffalo. The average radon reading was 1.20 pCi/L. This is below the action level.

Asbestos: As a part of this assessment, GZA made observations for readily accessible suspect asbestos-containing materials (ACM). No intrusive observations were made, nor were roofing materials observed. GZA observed suspect ACM materials during our Site reconnaissance including floor tiles, ceiling tiles and pipe wrap throughout the Site buildings. Mr. Ciminelli informed GZA the buildings contained asbestos and the debris piles within Building 1 contained ACM materials. Additionally, due to the age of the buildings (1958-1989) it is possible that ACM materials are present in areas that were not readily accessible.

Lead-Based Paints: Lead is a toxic metal known to be harmful to human health if inhaled or ingested. Lead-based paint is the most significant source of lead exposure in the U.S. today. Most buildings built before 1980 may contain some lead-based paint. Lead-based paint is considered to be a hazard if it is in poor condition, peeling, chipping, cracking or flaking. Due to the age of the buildings (1958-1989) it is possible that painted surfaces contain detectable quantities of lead. GZA observed painted surfaces in the interior portions of the Site building to be in poor condition.

Mold: Biological contaminants including molds, viruses and bacteria in indoor environments have become a major concern for property owners, business managers and employers. Unhealthful indoor air quality induced by biological contaminants has resulted in health hazards among workers and occupants, substantial liability, environmental concerns, regulatory mandates, diminished property values, termination of leases, and labor relations issues. GZA observed extensive areas of mold growth on floors, ceilings and walls throughout Site buildings.

7.00 VICINITY RECONNAISSANCE

As part of GZA's site assessment, a reconnaissance of the properties adjoining the Site, as well as the vicinity within a ¼ mile radius of the Site, was conducted from public properties. The result of GZA's vicinity reconnaissance is presented below.

7.10 HAZARDOUS MATERIAL USE AT ADJOINING PROPERTIES

Adjoining properties are identified in Section 2.30. Hazardous materials and/or petroleum products are expected to be used at Brooks Dry Cleaning, which adjoins the Site to the west and Buffalo Weatherization which adjoins the Site to the east.

7.20 HAZARDOUS MATERIAL USE AT VICINITY PROPERTIES

The area within ¼ mile of the study Site is primarily commercial and residential. Hazardous materials and/or petroleum products are expected to be used at the Sunoco gas station located approximately 400 feet north, northwest of the Site.

8.00 REGULATORY DATABASE REVIEW

The following section is based on public information obtained from various federal, state, and local agencies that maintain environmental regulatory databases. These databases provide information about the regulatory status of a property and incidents involving use, storage, spillage, or transportation of oil or hazardous materials. Information was gathered by GZA personnel and by a professional data search service, EDR. Federal, state, and local regulatory information is presented in Appendix D. A discussion of the reviewed information is presented in the following sections.

8.10 FEDERAL AGENCY DATABASES

Source: Environmental Data Resources, Inc.

Site: The Site was listed on the following federal databases reviewed.

- Spill No. 0703866 was listed at the Central Park Plaza (Site) on the RCRA database as a large quantity generator (LQG). LQG facilities are described as generating more than 100 kilograms of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, release into or on any land or water, or acutely hazardous wastes generated during any calendar month. The owner and operator registered for this listing at the Site was reported as Niagara Mohawk, listing waste code B007 (polychlorinated biphenyls waste code) as the hazardous waste. No violations were found and no further information was provided.
- Brooks Central Park Cleaners, located at 250 CPP (Site) was listed on the FINDS and RCRA database as a non-generator with no violations found.

Nearby Properties:

The following nearby properties were identified to be either adjoining or upgradient of the Site on the databases reviewed based on an estimated northwesterly groundwater flow direction.

- Brooks Cleaners located at 140 Holden Street, adjoining the Site to the west was listed on the FINDS and RCRA database as a non-generator with no violations found. This facility was formerly listed as a small quantity generator in 1985 and no longer generates hazardous waste. Since this listing is a registration, it is not expected to have a significant impact on the environment at the Site.
- US Postal Services Central Park, located at 170 Manhattan Avenue, adjoining the Site to the east, was listed on the FINDS and RCRA database as a non-generator with no violations found. Since this listing is a registration, it is not expected to have a significant impact on the environment at the Site.
- Electronic Recycling Technologies, located at 135 Manhattan Avenue, adjoining the Site to the east, was listed on the FINDS and RCRA database as a non-generator with no violations found. Since this listing is a registration, it is not expected to have a significant impact on the environment at the Site.
- In addition to the above listed facilities, one CERC-NFRAP facility, seven RCRA-non gen facilities, one HSWDS facility, and one DRYCLEANERS facility were identified within the indicated search radii. However, based upon the distance/direction from the Site and the facilities' regulatory status, these listings are not expected to have significantly impacted the environment at the Site.

8.20 STATE AGENCY DATABASE REVIEW

Source:

Environmental Data Resources, Inc

Site: The Site was listed on the following state databases reviewed.

- Brooks Central Park Cleaners, located at 250 Central Park Plaza (Site) was listed on the MANIFEST database for disposing of F002-Halo Solvent wastes in 1987.
- A car fire at 170 Central Park Plaza (Site) was listed on the NY Spills database. Spill No. 0704399 was listed when an abandoned, disassembled car caught fire on the northwestern portion of the Site. The fire was put out; oxygen and acetylene cylinder tanks were discovered inside the car, removed and stored inside the plaza until they were returned to Mills Welding Supply as stamped on the tanks. No further action was required and the spill was closed in November 2007.

Nearby Properties: The following nearby properties were identified to be either adjoining or upgradient of the Site on the databases reviewed based on an estimated northwesterly groundwater flow direction.

- Brooks Cleaners located at 140 Holden Street, adjoining the Site to the west was listed on the MANIFEST database for disposing of F002-Halo Solvent wastes. Since this listing is a registration, it is not expected to have a significant impact on the environment at the Site.
- US Postal Services Central Park, located at 170 Manhattan Avenue, adjoining the Site to the east, was listed on the UST database. Facility ID No. 9-026883 was listed for two 10,000-gallon closed and removed USTs. In addition, this facility was also listed on the MANIFEST database for disposing of D001-non-listed ignitable wastes. Since this listing is a registration, it is not expected to have a significant impact on the environment at the Site.
- Electronic Recycling Technologies, located at 135 Manhattan Avenue, adjoining the Site to the east, was listed on the LTANKS database. Spill No. 9804656 was listed when contamination was discovered during an unregistered tank removal. Approximately 30 yards of contaminated soil was removed. Confirmatory soil sample results exceeded regulatory limits and additional soil excavation was completed. Confirmatory soil sample results were generally below NYSDEC soil criteria levels but slightly exceeded the limits for benzo [b] fluoranthene at 120 ppb. The facility was closed in May 2001; however, it was noted that any soil removed from the property would have to be properly managed. In addition, this facility was listed on the MANIFEST database for disposing of D002-non-listed corrosive wastes, F027-waste sodium pentachlorophenate solution and D001-non-listed ignitable wastes.
- LP Ciminelli at 135 Manhattan Avenue, approximately 40 feet south of the Site was listed on the NY Spills database. Spill No. 9404023 was listed when soil was encountered contaminated with waste oil. The soil was excavated and bio-treated and

confirmatory soil samples were below NYSDEC guidance values. No further action was required and the spill was closed in August 1995. Additionally, Spill No. 931412 was listed when approximately 100, 55-gallon drums and nearly 200 1-gallon paint cans were found at the property. Some of the drums and cans appeared to be leaking on the ground. The drums and containers were removed, soil samples were collected. No further action was required by the regulatory agency and the spill was closed in March 1994.

- Fire at 125 Manhattan Avenue, approximately 125 feet south of the Site was listed on the NY Spills database (Spill No. 9306059) when activities at the facility were causing an odor. The spill department copied the complaint to the Division of Air. No further action was required and the spill was closed in August 1993.
- A vacant house at 125 Richlawn Avenue, located approximately 370 feet south of the Site was listed on the NY Spills database. Spill No. 0102073 was listed when approximately twelve, 5-gallon containers of cooking oil were discovered inside the house. The containers were removed, no further action was required and the spill was closed in May 2001.
- Oil spill at 98 Manhattan Avenue, approximately 370 feet south of the Site was listed on the NY Spills database (Spill No. 9407740) when a fuel supplier delivered fuel to a former tank location. The oil was delivered into an exterior fill pipe left in place. Approximately 300-gallons of #2 Fuel oil was spilled onto the basement floor, most of which flowed into a storm drain and into the Buffalo Sewer. Speedy Dri was used on the floor to clean the oil. Of the 300 gallons spilled, approximately 15-gallons of product were recovered. No further action was required and the spill was closed in October 1994.
- Laidlaw Transit, located at 140 Shawnee Avenue, approximately 900 feet southeast of the Site was listed on the UST and AST database. Facility ID 9-446394 was listed for four 5,000-gallon closed and removed diesel USTs, one in-service 250-gallon UST, one in-service 10,000-gallon AST and three in-service 275-gallon ASTs. Additionally, this facility was listed on the NY Spills database. Spill No. 9875136 was listed when contaminated soil was encountered during a tank removal. The facility was remediated and soil samples were collected. NYSDEC gave the facility an 'inactive' status and the spill was closed in September 1999.
- Buffalo Urban Renewal, located at 290 Leroy Street, approximately 1,270 feet south of the Site, was listed on the LTANKS database. Spill No. 9208261 was listed for an excavation that was being done for the construction of new homes and a tank was discovered. The tank was removed, no evidence of soil contamination was encountered, no addition remediation was necessary and the spill was closed in March 1996.

- In addition to the above listed facilities, five UST facilities, one AST facility, two ERP facilities, three NY Spills facilities, seven MANIFEST facilities, and one TANKS facility were identified within the indicated search radii. However, based upon the distance/direction from the Site and the facilities' regulatory status, these listings are not expected to have significantly impacted the environment at the Site.

Source: New York State Department of Environmental Conservation (NYSDEC)

Summary: Submitted a Freedom of Information Legislation (FOIL) request to NYSDEC dated August 9, 2011. GZA has not received a response from NYSDEC. Pertinent information that may change the conclusion of this report will be forwarded to Client upon receipt.

8.30 HEALTH DEPARTMENT RECORDS AND LOCAL REGULATORY AGENCIES

Source: New York State Department of Health (NYSDOH)/Erie County Health Department (ECHD)

Summary: Submitted a Freedom of Information Legislation (FOIL) request to NYSDOH, and ECHD dated August 9, 2011. GZA received a letter from NYSDOH dated July 11, 2011 indicating that our request has been forwarded to the appropriate Department program areas to identify documents that are responsive to our request and within 20 business days, GZA will be notified in writing of any available documents and reports. A copy of this letter is included in Appendix C. At the time of this report, GZA has not received a response from ECHD. Pertinent information that may change the conclusion of this report will be forwarded to Client upon receipt.

Source: City of Buffalo Assessor's Office

Findings: The desk clerk did not have any additional records other than those summarized in Section 4.40.

Source: City of Buffalo Building Department

Findings: The desk clerk did not have any additional records other than those summarized in Section 4.40.

9.00 INTERVIEWS

GZA interviewed the following people as part of this assessment:

- Mr. John Ciminelli, Senior Vice President of LP Ciminelli Construction
- Mr. Steven Tootill, Maintenance worker for Lt. Col. Matt Urban Human Services Center of W.N.Y
- Ms. Leslie Vishwanath, Lt. Col. Matt Urban Human Services Center of W.N.Y
- Desk Clerk, City of Buffalo Building Department
- Desk Clerk, City of Buffalo Assessor's Office
- Desk Clerk, City of Buffalo Office of Fire Prevention
- Desk Clerk, Buffalo and Erie County Public Library

The information provided by each is discussed and referenced in the text or provided below.

10.00 USER RESPONSIBILITIES

GZA requested information from the User regarding title information, environmental liens, Activity and Use Limitations, and specialized knowledge or commonly known information regarding the Site and reason for significantly lower purchase price (if applicable).

- a review of land title records and lien records for environmental liens or Activity and Use Limitations. ASTM states that this information shall be reported to the Environmental Professional;
- communicate any "specialized knowledge or experience of the user" regarding recognized environmental conditions at the property to the Environmental Professional;
- communicate any "actual knowledge" of the user of any environmental lien or AULs;
- "consider the relationship of the purchase price to the fair market value."
- communicate any "commonly known or reasonably ascertainable" information regarding recognized environmental conditions at the property to the Environmental Professional; and

Section 12.3 of ASTM 1527-05 (The Evaluation and Report Preparation) indicates "the report shall state whether the user reported to the environmental professional any information pursuant to the user's responsibility described in Section 6.00." User information is included

in Appendix E. No activity use limitations or environmental liens were identified for the Site.

GZA was provided a Modified User Questionnaire by Mr. John Ciminelli, Senior Vice President of LP Ciminelli Construction. A Copy of our user responsibility request is included in Appendix E.

- No environmental liens were known for the Site.
- No AULs are known for the Site.

11.00 FINDINGS AND CONCLUSIONS

A Phase I Environmental Site Assessment following the general guidance of the ASTM Phase I Standard Practice 1527-05 has been conducted at the Central Park Plaza, located at 129 Holden Street in Buffalo, New York (Site). The study included a site reconnaissance, a review of Site history, a review of selected local, state and federal regulatory records, a review of information provided by the User, and interviews with persons and agencies familiar with environmental conditions at the Site. No subsurface explorations or chemical testing of soil or groundwater were conducted and no assessment for the presence of lead hazards, mold, radon or asbestos was completed by GZA.

11.10 FINDINGS

The findings below are based on the work conducted as part of this assessment:

- The Site is addressed at 129 Holden Street located in Buffalo, New York and is known as the Central Park Plaza. The Site is identified as SBL No. 90.29-2-43.1 and includes the addresses of 1 through 90 Central Park Plaza (CPP) consisting of five Site buildings and one storage shed structure. The remaining portions of the Site consist of paved parking areas with a grass and gravel area on the southeastern corner and a grassy fill area on the northeastern corner of the Site.
- At the time of GZA's Site visit, the Site contained five (5) vacant buildings, formerly occupied by various tenants consisting of stores and offices spaces since approximately 1958. The last tenants vacated the Site in July 2011. The remaining portions of the Site consist of paved parking areas with a grass and gravel area on the southeastern corner and a grassy fill area on the northeastern corner of the Site.
- Based on a review of the U.S. Geologic Survey Map for Buffalo NE, NY dated 1965, the Site is approximately 670 feet above mean sea level. The Site area topographic gradient appears to be relatively flat with a gradual downward slope downward to the northwest towards the Niagara River, located approximately four

miles west, northwest of the Site. In addition, Scajaquada Creek is located approximately 1.5 miles to the southwest of the Site.

- Based on review of the USGS topographic map, Buffalo NE, NY and knowledge of the Site area, the estimated depth to groundwater is likely less than 20 feet below ground surface. Regional and site groundwater flow is assumed to be northwesterly towards the Niagara River. However, localized flow direction in the area of the Site may vary as a result of underground utilities, or heterogeneous subsurface conditions. Subsequent references to upgradient and downgradient properties are based on the estimated northwesterly groundwater flow direction. Based on information provided by Environmental Data Resources (EDR), the Site is not located within the 100 year or 500 year floodplain. No wetlands are present on-Site.
- Based on review of historical sources and interviews, The Site was first developed in at least the early 1900s by Buffalo Cement as part of a larger rock quarry. The quarry was in operation until the mid 1950s. In addition, a small pond was observed in the 1946 historic topographic map which was possibly associated with the rock quarry and has since been filled in. The Site was developed by the Central Park Plaza in 1958 with the construction of three Site buildings (Building 1 through Building 3). An additional building was constructed on the southern portion of the Site in 1967 (Building 4) and the fifth building was constructed on the western portion of the Site in 1989 (Building 5). The Site operated as a shopping plaza from 1958 until the last of the tenants vacated the Site in July 2011. Historic Site tenants included the following.
 - Building 1: various stores, photograph processing store, laundromats, automatic car wash, dry cleaner, beauty salons, department stores, jewelry stores, shoe stores, restaurants, offices, furniture and electronics stores, martial arts studio, a charter school, a fitness center, drug stores, auto supply stores, a church, a grocery store, movie theater, bank, an elevator company and candy store.
 - Building 2: various shops, clothing stores and an auto service.
 - Building 3; various stores, a recording studio, clothing stores, Buffalo Reuse and its associated fenced in storage area.
 - Building 4: grocery stores with a partial second floor.
 - Building 5: shoe store.
- No evidence of USTs or ASTs, fill ports or vent pipes were observed during our Site reconnaissance.

- Three pole mounted transformer locations (each containing three transformers) were observed on the northern portion of the Site, north of Buildings 1 and 2. No significant areas of staining or leaking were observed on the poles or on the ground under the transformers. Mr. Tootill informed GZA the transformers are owned and maintained by the power authority. Additionally, a former transformer pad area was observed along the southwestern corner of Building 4. No areas of staining were observed on the pad.
- Three (3) Allied Waste and one Waste Management dumpster were located on the northern portion of the Site, north of Buildings 1 and 2. No areas of staining were identified around the dumpsters.
- No areas of stressed vegetation were observed on the Site. However, fill material placement was observed on the northeastern corner of the Site. Mr. Tootill informed GZA the owner of the Site had been dumping fill materials in this area of the Site. Mr. Tootill was unaware of the origin of the fill materials brought on-Site.
- A pile of tires was observed along the northeastern corner of Building 2.
- A fenced storage yard was observed on the southeastern portion of the Site, adjoining Building 3 to the south. Mr. Ciminelli informed GZA this storage area contained building materials. GZA observed piles of brick, concrete, doors, various building materials and a fork lift.
- A small storage shed was observed along the northern property line, north of Building 1. The shed appeared to be in poor condition and GZA did not enter the structure.
- There are five buildings on Site, all one story buildings with the exception of Building 4 which contains a partial second story. The buildings are constructed with steel frames, cinderblock walls and a brick façade. Interior construction generally consisted of drywall, or cinderblock walls, drop ceiling tiles or open truss steel ceilings and concrete slab-on-grade floors. Floor covering consisted of suspect ACM 9 x 9 floor tiles, carpeting or bare concrete. The western portion of Building 1 contains a basement which was in poor condition with water damage and building debris piles. It should be noted that each of the Site building's interior finishing's were in poor condition with holes in walls and ceilings. Additionally water damage was observed in many areas with the exception of Building 5.
- Mr. Ciminelli informed GZA the Site buildings are heated and cooled by HVAC roof top units. However, some of these units have been removed; leaving some spaces open to the environment.
- At the time of GZA's site visit, the Site consisted of five vacant buildings which made up the former Central Park Plaza shopping center. The Site buildings are currently in

poor condition with holes in walls, ceilings, water damage and mold growth. Additionally, numerous piles of debris (consisting of dry wall, wood, pipe wrap, glass etc.) and broken glass were observed in each of the buildings. The remaining portions of the Site consist of paved parking areas with a grass and gravel area on the southeastern corner and a grassy fill area on the northeastern corner of the Site.

- GZA observed chemical storage areas within Building 1, which historically contained various tenants including photograph development store, laundromats, beauty salons, automatic car wash and a dry cleaner, among other various tenants; and Building 4 which has historically been occupied as a grocery store.

GZA observed the following chemicals within Building 1:

- GZA observed 55-gallon drum of the following products: first coat sealer undercoat, ZIP, Mycrobreeze and Conquest on the western portion of Building 1. The chemicals appeared to be sealed with no significant areas of staining or leaking.
- A former 'chop shop' was located in 40-50 CPP, centrally located within Building 1. GZA observed approximately 200 automobile tires, propane tanks, portable gasoline tanks, four 5-gallon containers of joint compound, four, 1-gallon containers of paint, 5-gallon container of super paint, and several containers varying in size from 1 quart to 1 gallon of the following: raid, oil, paint, bleach, penetrating oil, WD-40 and antifreeze. Additionally, a make-shift paint booth was observed within the 'chop shop' containing numerous containers ranging in size from 32 ounce to 5-gallon of paints, primers, enamels, thinners and strippers. The chemical storage areas within the 'chop shop' were disorganized. Many of the chemical containers did not have covers and there were areas of staining.
- GZA observed three empty 55-gallon drums of acetone within the rear of a former nail salon and one 5-gallon container of Truguard on the eastern portion of Building 1. The chemicals appeared to be sealed with no significant areas of staining or leaking.

GZA observed the following chemicals within the second floor of Building 4:

- Two 5-gallon containers of floor wax, eight 1-gallon containers of sanitizer, three 5-gallon containers of degreaser and sanitizer, one 5-gallon container of mold control, two cylinders of refrigerants for the former cooler and freezers within the grocery store and five 5-gallon containers of paint. The chemicals appeared to be sealed with no significant areas of staining or leaking.

- Mr. Ciminelli and Mr. Tootill informed GZA that Lt. Col. Matt Urban Human Services Center of W.N.Y would be taking an inventory of the chemicals present and properly disposing of them. GZA contacted Ms. Leslie Vishwanath, Lt. Col. Matt Urban Human Services Center of W.N.Y for further information on the removal of the chemicals. Ms. Vishwanath indicated they are waiting for the current owner to provide funding for her company to properly remove and dispose of all chemicals on-Site and that she is unaware of the estimated timeframe for the removal at the time of our conversation. Additionally, Ms. Vishwanath provided GZA with an inventory list of chemicals, miscellaneous waste and tires as part of an environmental services quotation to remove these items from the Site. A copy of this environmental services quotation is attached in Appendix C.
- A former 'chop shop' was located in 40-50 CPP of Building 1. GZA observed seven 5-gallon containers and one 55-gallon drum of waste oil. The oil containers were missing covers and areas of staining were observed on the floor. Additionally, an approximate 250-gallon AST was also observed within the 'chop shop' which appeared to be empty. No floor drains were apparent in the immediate vicinity of the chemical storage areas; however, observations were limited due to the amount of debris within the Site building. GZA observe several cracks in the floor within the 'chop shop'.
- GZA observed areas of floor staining within the 'chop shop' centrally located within Building 1. No floor drains were apparent in the immediate vicinity of the chemical storage areas; however, observations were limited due to the amount of debris within the Site building. GZA observe several cracks in the foundation.
- Floor drains were apparent within restrooms of the Site buildings and throughout the former grocery store within Building 4. Additionally, GZA observed what was believed to be a floor drain within the 'chop shop' inside Building 1. Mr. Ciminelli indicated he believed the floor drains were connected to the City of Buffalo municipal sewer system.
- A partial basement was observed within the western portion of Building 1. The basement was in poor condition with water damage, building debris piles, areas of ponding water and mold growth. GZAs observations were limited to the amount of debris within the basement area. No sumps or drains were observed within the basement.
- GZA observed a garbage can filled with light bulbs within the northwestern portion of Building 1.
- The interior of the Site buildings were littered with garbage and building debris including drywall, ceiling tiles, floor tiles, glass, wood, pipe wrap etc.
- A make-shift paint booth was observed within the 'chop shop' within Building 1.

- Radon is a naturally occurring gas produced by the breakdown of uranium in soil, rock and water. The amount of radon in the air is measured in picocuries of radon per liter of air, or pCi/L. The Environmental Protection Agency (EPA) recommends remedial action be taken, if the level of indoor radon is greater than 4 pCi/L, known as the action level. The New York State Department of Health, Short Term Basement Radon Measurements dated October 2010, reported that 895 homes were tested in Buffalo. The average radon reading was 1.20 pCi/L. This is below the action level.

As a part of this assessment, GZA made observations for readily accessible suspect asbestos-containing materials (ACM). No intrusive observations were made, nor were roofing materials observed. GZA observed suspect ACM materials during our Site reconnaissance including floor tiles, ceiling tiles and pipe wrap throughout the Site buildings. Mr. Ciminelli informed GZA the buildings contained asbestos and the debris piles within Building 1 contained ACM materials. Additionally, due to the age of the buildings (1958-1989) it is possible that ACM materials are present in areas that were not readily accessible.

- Lead is a toxic metal known to be harmful to human health if inhaled or ingested. Lead-based paint is the most significant source of lead exposure in the U.S. today. Most buildings built before 1980 may contain some lead-based paint. Lead-based paint is considered to be a hazard if it is in poor condition, peeling, chipping, cracking or flaking. Due to the age of the buildings (1958-1989) it is possible that painted surfaces contain detectable quantities of lead. GZA observed painted surfaces in the interior portions of the Site building to be in poor condition.
- Biological contaminants including molds, viruses and bacteria in indoor environments have become a major concern for property owners, business managers and employers. Unhealthful indoor air quality induced by biological contaminants has resulted in health hazards among workers and occupants, substantial liability, environmental concerns, regulatory mandates, diminished property values, termination of leases, and labor relations issues. GZA observed extensive areas of mold growth on floors, ceilings and walls throughout Site buildings.
- The Site was listed on the following federal databases reviewed.
- Spill No. 0703866 was listed at the Central Park Plaza (Site) on the RCRA database as a large quantity generator (LQG). LQG facilities are described as generating more than 100 kilograms of any residue or contaminated soil, waste or other debris resulting from the cleanup off a spill, release into or on any land or water, or acutely hazardous wastes generated during any calendar month. The owner and operator registered for this listing at the Site was reported as Niagara Mohawk, listing waste code B007 (polychlorinated biphenyls waste code) as the hazardous waste. No violations were found and no further information was provided.

- Brooks Central Park Cleaners, located at 250 CPP (Site) was listed on the FINDS and RCRA database as a non-generator with no violations found. Additionally, this Site was listed on the MANIFEST database for disposing of F002-Halo Solvent wastes in 1987.
- A car fire at 170 Central Park Plaza (Site) was listed on the NY Spills database. Spill No. 0704399 was listed when an abandoned, disassembled car caught fire on the northwestern portion of the Site. The fire was put out; oxygen and acetylene cylinder tanks were discovered inside the car, removed and stored inside the plaza until they were returned to Mills Welding Supply as stamped on the tanks. No further action was required and the spill was closed in November 2007.
- Several nearby facilities were listed on the State and Federal databases reviewed. However, due to their distance/direction from the Site, or the current regulatory status (i.e. closed, inactive), these listings are not expected to have significantly impact the environment at the Site.
- GZA was provided Environmental Site Assessment Questionnaires by Mr. John Ciminelli, Senior Vice President of LP Ciminelli indicating there are no environmental liens or AULs for the Site.

11.20 CONCLUSIONS AND OPINIONS

Based on the findings presented above, it is GZA's opinion that "we have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 at Central Park Plaza, located at 129 Holden Street in Buffalo, New York (Site). Any exceptions to, or deletions from, this practice are described in Section 1.00 of this report. This assessment has revealed the following evidence of a Recognized Environmental Conditions in connection with the property".

- The Site was first developed in at least the early 1900s by Buffalo Cement as a quarry, until the mid 1950s. The Site was first developed by the Central Park Plaza in 1958 with the construction of three Site buildings (Building 1 through Building 3). An additional building was constructed on the southern portion of the Site in 1967 (Building 4) and the fifth building on the western portion of the Site in 1989 (Building 5). The Site operated as a shopping plaza from 1958 until the last of the tenants vacated the Site in July 2011.
- Historic Site tenants of concern within Building 1 include photo marts, laundromats, an automatic car wash, a dry cleaner and a chop shop. Several oil containers with missing covers and areas of staining were observed within the chop shop. No floor drains were apparent in the immediate vicinity of the chemical storage areas; however, observations were limited due to the amount of debris within the Site building. GZA observe several cracks in the foundation within the chop shop.

- Historic Site tenants of concern within Building 2 include an auto service shop.
- In addition, the Site was listed twice on the NY Spills database. The potential exists for soil and/or groundwater contamination to have resulted from the historic Site usage.
- Mr. Tootill informed GZA that the current owner had been dumping fill materials in the area east of Building 2 at the Site. Mr. Tootill was unaware of the origin of the fill materials brought on-Site.
- GZA observed suspect ACM materials during our Site reconnaissance including floor tiles, ceiling tiles and pipe wrap throughout the Site buildings. The interior portions of the Site buildings were littered with debris piles including garbage, drywall, ceiling tiles, floor tiles, glass, wood, pipe wrap etc. Additionally, due to the age of the buildings (1958-1989) it is possible that ACM materials are present in areas that were not readily accessible.
- GZA observed painted surfaces in the interior portions of the Site building to be in poor condition. Due to the age of the buildings (1958-1989) it is possible that painted surfaces contain detectable quantities of lead.
- GZA observed extensive areas of mold growth on floors, ceilings and walls throughout Site Buildings.

Based on the information obtained as part of this assessment, it is GZA's opinion that the historic Site usage and surrounding area usage represent recognized environmental concerns. GZA recommends that a Phase II ESA subsurface investigation, including sampling and analysis of groundwater and soil samples, would be required to determine if past Site activities have impacted the Site soil and/or groundwater.

In addition to the soil and groundwater samples, GZA recommends testing of the floor drains within the 'chop shop' area of Building 1 due to its historic use, areas of staining and open containers of waste oil products.

GZA understands that the Site buildings will be demolished. However, if the buildings are to remain in-place and be renovated/occupied, it is recommended that a mold survey be conducted to determine the extent and type of mold contamination present in the Site building, and mold removal/remediation be completed.

Additionally, an asbestos contained materials and lead based paint survey would be necessary to assess for the presence of these materials within the on-Site structures.

12.00 ENVIRONMENTAL PROFESSIONAL STATEMENT

GZA declares that, “to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 12.” We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.” The signature of the Environmental Professional is contained on the cover page of this report.

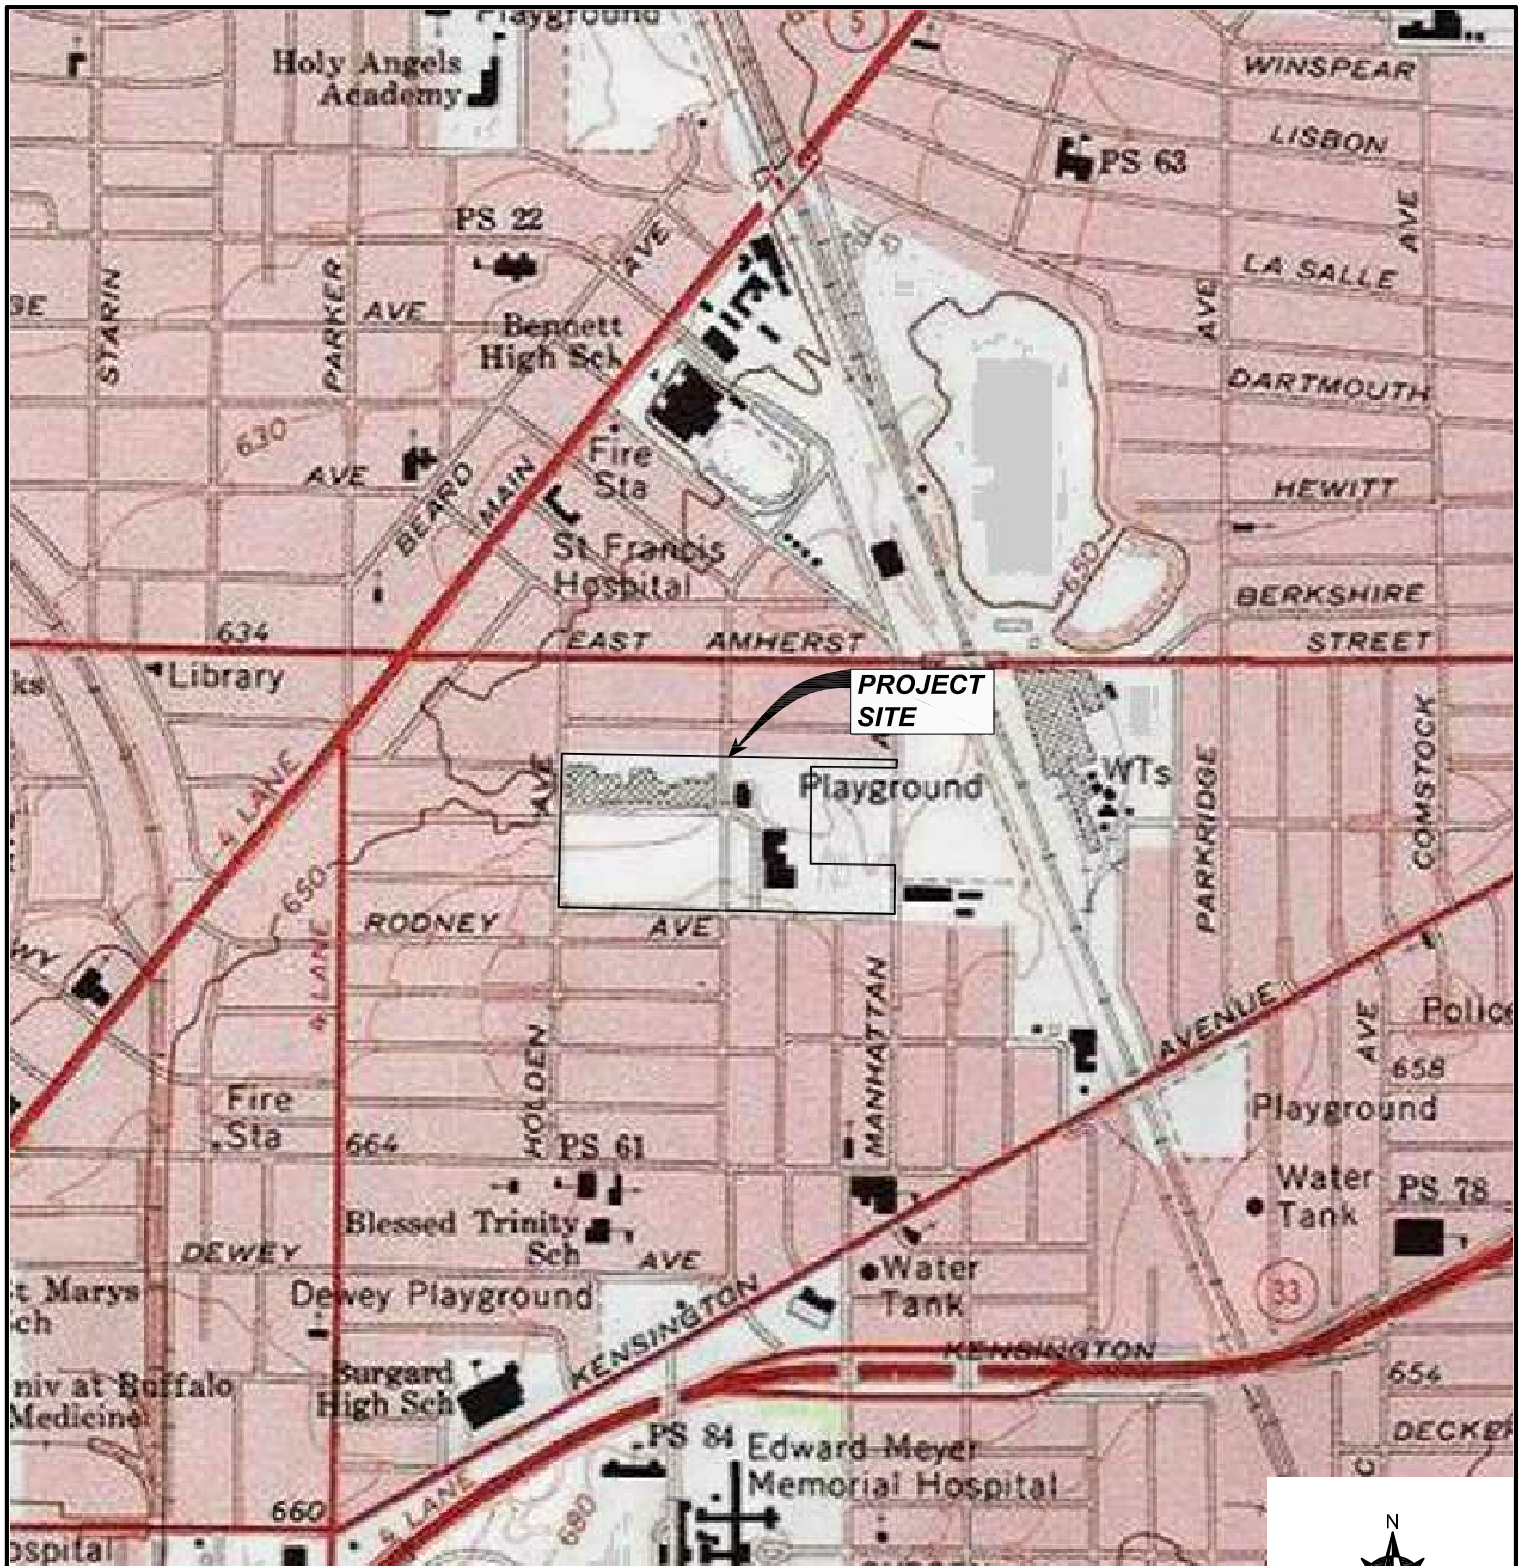

13.00 LIMITATIONS

GZA's site assessment was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and GZA observed the degree of care and skill generally exercised by other consultants under similar circumstances and conditions. GZA's findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion concerning the significance of the limited data gathered during the course of the environmental site assessment. No other warranty, express or implied, is made. Specifically, GZA does not and cannot represent that the Site contains no hazardous material, oil or other latent condition beyond that observed by GZA during its site assessment. This report is also subject to the specific limitations contained in Appendix A.

It should be noted that when an assessment is completed without subsurface explorations and chemical screening of soil and groundwater beneath the site, no data can be generated regarding latent subsurface conditions which may be the result of on-site or off-site sources.

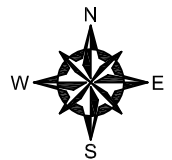

This study and report have been prepared on behalf of and for the exclusive use of LP Ciminelli Construction, solely for use in an environmental assessment of the Site. This report and findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party, nor relied on by any other party in whole or in part, without the prior written consent of GZA. However, GZA acknowledges and agrees that the Report may be conveyed to the Lender associated with the proximate financing of the Site to the extent set forth in our agreement. Client acknowledges and agrees that reliance upon the report and the findings in the report by any other party, or for any other purpose, shall be at that party's sole risk and without any liability to GZA.

APPENDIX A
LIMITATIONS

PHASE I ENVIRONMENTAL SITE ASSESSMENT LIMITATIONS

1. The observations described in this report were made under the conditions stated herein. The conclusions presented in the report were based solely upon the services described, and not on scientific tasks or procedures beyond the scope of described services or the time and budgetary constraints imposed by Client.
2. The findings, conclusions and recommendations in this report are based on information concerning the facility available to GZA and observations made during a Phase I ESA related to the property. Conditions in many of the elements of the Phase I ESA are subject to change, so the status at any given time could differ from the status at the time of our services.
3. In preparing this report, GZA has relied on certain information provided by state and local officials and other parties referenced therein, and on information contained in the files of state and/or local agencies available to GZA at the time of the Site assessment. Although there may have been some degree of overlap in the information provided by these various sources, GZA did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this Site assessment.
4. Observations were made of the Site and of structures on the Site as indicated within the report.
5. Unless otherwise specified in the report, GZA did not perform testing or analyses to determine the presence or concentration of asbestos or polychlorinated biphenyls (PCBs) at the Site or in the environment at the Site.
6. No specific attempt was made to check on the compliance of present or past owners or operators of the Site with federal, state, or local laws and regulations, environmental or otherwise.
7. Except as noted within the text of the report, no quantitative laboratory testing was performed as part of the Site assessment. Where such analyses have been conducted by an outside laboratory, GZA has relied upon the data provided, and has not conducted an independent evaluation of the reliability of these data.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1925 through 2008. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

Maps Provided:

1986
1950
1935
1916

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
- ☒ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

GZA GeoEnvironmental, Inc. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

RE: Environmental Services Quotation –
Clean-Out of portion of Central Park Plaza- 129 Holden, Buffalo, NY 14215

Leslie:

Tonawanda Tank Transport Service Inc. is pleased to offer the following ESTIMATED pricing proposal for the clean-out of various materials from the Central Park Plaza, based upon our site visit earlier this month.

Tires: based upon our site visit we estimate between 200 and 250 tires, approx 80% being automotive type, 20% Truck type and about 4 Tractor tires. The pricing for removal, transportation and disposal will be as follows:

Labor to gather and load tires and transportation based upon 250 tires \$ 1,295.00. Should additional tires be found over 250 or if an additional truck is needed, additional charges will apply.

Disposal Automotive Tires	\$ 3.00 Each (*)
Disposal Truck Tires	\$ 8.50 Each (*)
Disposal Tractor Tires	\$ 25.00 Each (*)

(*) Any Tires found still on the rim will be charged an additional \$20.00 Each
Tires on rims and attached to the axel in the back room cannot be taken
Until removed from the axel and is not included in this quotation.

Automotive Gas Tanks: Approx. 10 Automotive gasoline tanks were also found in various locations in the warehouse, each of which contain up to 15 gallons of gasoline still present in them.

Labor to gather the tanks, drain them empty and load for scrap and disposal of the gasoline will be \$ 1,600.00. If additional automotive tanks are found or if the gasoline contents exceed 110 Gallons, additional charges will apply.

Central Park Plaza
Clean-Up Proposal
July 26, 2011
Page 2

Misc. Chemicals: Throughout the area are Misc. Chemicals including Paints, Aerosols, Oils, Antifreeze, Cleaners, and Universal Waste Lamps (See attached Misc. Chemical Listing).

Based upon this Misc. Chemical list our price for labor, consolidation, equipment, packaging, disposal and transportation, and overall project management/supervision would be \$ 9,925.00.

Should additional materials be found above and beyond what is listed additional charges will apply.

All prices proposed in the quotation is offered on a T & D basis, you will be charged based upon the actual material found, packaged and removed. **The pricing contained herein should be used as an estimate only.** All pricing based upon doing the entire project as outlined. All rates quoted do not include New York State sales tax. Sales tax will be added to our invoice, if applicable.

We estimate the packaging to take approx 2 days. Once all the chemicals are packaged, proper waste facility approvals will be required before any chemical waste can be shipped off-site (we estimate approx 2-weeks after packaging before final shipment can take place)

As per federal regulations, Tonawanda Tank Transport Service Inc. does not accept and cannot handle radioactive or biologically active, infectious materials.

The prices quoted herein are firm for 30 days from the date of this proposal. This quotation incorporates our Terms and Conditions, which are attached, and we respectfully request that you signify your acceptance with both a formal purchase order as well as your signature on this quotation.

Any changes in amounts, sizes or number of containers, as well as, chemical and physical properties from those identified here may result in additional charges.

We sincerely appreciate the opportunity to present this proposal and look forward to participating in your waste management program.

Sincerely,

Mark C. Hageman, CHMM
Environmental Services Manager

**TONAWANDA TANK TRANSPORT SERVICE, INC.
TERMS AND CONDITIONS**

Following are the general terms and conditions by which Tonawanda Tank Transport Service, Inc. (TTT) offers its waste management services. These conditions are offered in conjunction with a firm letter of quote, which references specific waste materials and/or transportation offered.

ACCEPTANCE - TTT certifies that it has obtained disposal approval for your wastes as listed, and that the disposal facility listed has the required permits and existing capacity to handle your waste materials as quoted.

PACKAGING - All drum containers used to ship wastes must be via container approved by DOT/EPA for waste transport and must be properly sealed and free of any exterior residues. Drums must be labeled by law. (Quotes reference 55 gallon drums where drums are listed.)

ENVIRONMENTAL FEES/TAXES - All legislated fees, surcharges, taxes and related charges levied for the transport and/or disposal of the listed waste material(s) will be so invoiced to the generator including retroactive adjustments for same.

NON-CONFORMING/OFF-SPECIFICATION WASTE - All pricing and services herein stated are based upon the waste materials being as represented, identified and/or specified to Tonawanda Tank Transport Service, Inc. by the generator. Any deviation from the waste material representation, identification or specification will deem the material non-conforming/off-specification. Title for such non-conforming/off-specification shall at all times remain with the generator. All charges associated with handling, processing and/or returning any non-conforming/off-specification waste material shall be the responsibility of the generator. These charges may include TSDF rejection fees, out of route mileage charges, standard drum transportation and stop charges. Waste will be returned at transporter's convenience.

RIGHTS RESERVED - TTT reserves the right to decline to accept for collection, transportation, treatment or disposal any waste which, in its judgment, it cannot transport, treat or dispose of in a lawful manner or without risk of harm to public health or the environment or which cannot be handled economically due to a change in disposal, treatment, charges or sites, governmental regulations or other factors beyond the control of TTT.

WEIGHT LIMITATIONS - Since legal allowable load weight limits change depending on equipment variances and by state, TTT reserves the right to refuse for transport any load which is determined to be overweight at the time of pickup, until correction is made to adjust the weight to comply with requirements. It is TTT's responsibility to determine maximum allowable load limitations per shipment and advise the generator of any required adjustments needed to bring the load into weight compliance prior to shipment. Generator is responsible for removal of excess product and applicable demurrage charges.

PAYMENT TERMS - NET 15 DAYS (US FUNDS) - Customer agrees to make payment to the office of TTT in the amount as specified on the invoice rendered within 15 days after the date of invoice. All disputes involving items for charges on the invoice must be submitted to TTT in writing within fifteen (15) days from the date of invoice. In the event TTT has not received payment within 15 days after the date of invoice or written notification of disputed items or charges within fifteen (15) days from the date of invoice, customer agrees to pay interest on the unpaid balance at the rate of 1.5 percent per month, commencing upon the expiration of a 30 day period from the date of the invoice.

DRUM SHIPMENTS - For less than truckload (LTL) quantities, there is a \$60.00 stop-off charge for pickup. For deliveries to more than one facility, there is an additional \$60.00 stop-off charge per each additional facility. We allow for one hour free loading time and one hour free unloading time for LTL shipments; and two hours free loading time and two hours free unloading time for truckload shipments. Detention will be charged at a rate of \$12.50 per quarter hour thereafter.

BULK SHIPMENTS - Waste materials shipped in bulk tank trucks sometimes require a tank washout, and/or physical removal of high solids residue that does not come out of the truck at unloading. The Generator will be advised of this as it occurs and the Generator will be responsible for all bulk tank cleanout charges for labor, materials and sludge disposal.

CITY OF BUFFALO

DEPARTMENT OF PERMIT & INSPECTION SERVICES

RECORD REQUEST FORM

Under the provisions of the New York FREEDOM OF INFORMATION LAW (F.O.I.L.), Article 6 of the Public Officers Law, I hereby request the records or portions thereof that I have reasonably described in Part "B" of this form.

PART A - APPLICANT INFORMATION

1. Name of Applicant: Jennifer Davide
2. Company Name: GZA GeoEnvironmental
3. Address: 535 Washington St State: NY Zip Code: 14203
4. Type of Business: Environmental Consultants
5. Telephone Number: (716) 844-7050 Fax Number: (716) 685-3629
6. E-Mail: Jennifer.davide@gza.com ☐ I do not want to receive any information via e-mail.

PART B - INFORMATION REQUESTED

Describe the records that you are requesting in the space provided below. Please include as much detail as possible such as dates, titles, or any other information that may assist us in locating the record(s) you are seeking. Please be mindful that the record or document that you are requesting may not exist.

Permits: Construction / demo / additions / installation
and/or removal of storage tanks for the
CENTRAL PARK PLAZA at 129 Holden St in
Buffalo

PART C - METHODS OF REVIEW

- ☒ I would like an appointment to review the records that I am requesting in the Office of the City of Buffalo Department of Economic Development, Permit & Inspection Services. If I desire copies, I understand that I will be charged a fee in accordance with the schedule listed below in the section entitled "Fees." I also understand that copies may not be immediately available.
- ☐ I would like the requested documents mailed to me. I understand that I will be billed for copying charges and will not receive the documents until I have remitted payment to the address listed in the section entitled "Submission of Request." I understand that I will be charged a fee in accordance with the schedule listed below in the section entitled "Fees."
- ☐ I would like the requested information provided via an electronic format.

PART D – FEES

If you should desire copies of records, the following fees will apply in accordance with 16 NYCRR §6-1.2. Advanced payment is required before records will be released. Please make check or money orders payable to the **City of Buffalo**.

CHARGES FOR COPYING:

Pages up to 9" x 14" \$.25 ea. Pages over 9" x 14" \$.70 ea.

The fee for special reproductions such as photocopies for large items shall be based upon the average unit cost of copying a record, excluding fixed costs of the department, such as operator salaries.

PART E – SUBMISSION OF REQUEST

After you have reasonably described the records you wish to inspect or obtain, please sign this form and return it to the address listed below. Requests may be mailed or hand delivered. Please note that you do not have to complete this form in order to request records from this Department, however, it will facilitate access to the records.

CITY OF BUFFALO DEPARTMENT OF ECONOMIC DEVELOPMENT, PERMIT & INSPECTION SERVICES

ATTN: RECORDS ACCESS OFFICER

65 NIAGARA SQUARE, CITY HALL ROOM 301

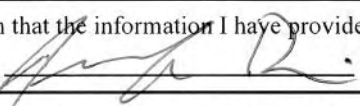

BUFFALO, NEW YORK 14202

PART F – COMMERCIAL PURPOSES CERTIFICATION & AFFIRMATION

THIS SECTION MUST ONLY BE COMPLETED IF YOU ARE REQUESTING A LIST OF NAMES AND ADDRESSES. By signing below, I certify that such list(s) will not be used for commercial or fundraising purpose. Section 87(2)(b) and 89(2)(b)(iii) of the New York State Public Officers Law permit the City of Buffalo to seek a certification from an applicant seeking disclosure of a list of names and addresses, that such list will not be used for commercial or fundraising purposes.

Signature: _____ **Print Name:** _____ **Date:** _____

I hereby affirm that the information I have provided on this request form is correct.

Signature:  **Print Name:** Jennifer Davide **Date:** 8/12/11

PART G – DISPOSITION OF REQUEST-----DO NOT WRITE BELOW THIS LINE-----

☐ **REQUEST RECEIVED** – The Department of Economic Development, Permit & Inspection Services is reviewing your request. The Department will notify you as to whether your request will be granted or denied on or about the following date: _____.

☐ **APPROVED** – The approximate date the records will be available: _____. To arrange for access to the records, contact: _____

☐ **DENIED** – For the reason(s) checked: References are to Section 87 of the NYS Public Officers Law

- ☐ Records are specifically exempted from disclosure by state or federal statute 2 (a)
- ☐ Disclosure would constitute an unwarranted invasion of personal privacy 2(b)
- ☐ Disclosure would impair present or imminent contract awards or collective bargaining negotiations 2 (c)
- ☐ Records are exempt from disclosure under the Law Enforcement Exemption 2 (e)
- ☐ Disclosure could endanger the life or safety of any person 2 (f)
- ☐ Records are exempt from disclosure under the Inter/Intra – Agency Materials Exemption 2 (g)
- ☐ Other: _____

☐ **MATERIAL REDACTED** _____

☐ **UNAVAILABLE** – For the reason(s) indicated:

- ☐ Records Requested were not described in sufficient detail
- ☐ The records you have requested are not maintained by this department
- ☐ This Department maintains the records you have requested, but the records could not be located after a diligent search.
- ☐ Other: _____

SIGNED: _____ **TITLE:** _____ **DATE:** _____

PART H – APPEALS

If you are denied access to records or portions of records, you may submit a written appeal the Commissioner of Economic Development, Permit & Inspection Services, City Hall, Room 324. Such appeal must be made within **thirty (30) days** after you receive the denial. Please attach a copy of this completed form when filing your appeal. The Appeals Officer will evaluate the appeal and respond to you in writing within **ten (10) business days** after receipt of the appeal.

Joe Martens
Commissioner

August 22, 2011

Jennifer Davide
GZA GeoEnvironmental of New York
535 Washington Street, 11th Floor
Buffalo, NY 14203

Dear Ms. Davide:

This letter acknowledges receipt of your request(s) dated 8/9/2011 for access to records relative to:

Central Park Plaza 129 Holden St, Buffalo

Your request(s) has been forwarded to the appropriate individual program(s) within DEC.

To assist you in obtaining information, many records can be immediately accessed through the Department's website www.dec.ny.gov. The following links provide information commonly requested of the Department:

- DEC Permit Application Data www.dec.ny.gov/cfm/xtapps/envapps
- Spills, Tanks and Remedial Site Database Search www.dec.ny.gov/chemical/8437.html
- Mapping Gateway www.dec.ny.gov/pubs/212.html

If your record request is for undeveloped property, the Department recommends using the Environmental Resource Mapper www.dec.ny.gov/animals/38801.html to determine the location of both freshwater wetlands regulated by the State of New York and New York State's classified streams and water bodies. If your request did not specify records on wetlands or other environmental resources, the Department search may not include information on environmental resources that are state protected.

Following the necessary file search, you will be contacted as to whether such records are in our custody. If all records are not provided because the records are excepted from disclosure, you will be notified of the reasons and of your right to appeal the determination.

Due to the large volume of requests we receive, you may expect a reply by 9/19/2011.

Sincerely,

Peter Grasso
Regional Enforcement Coordinator
