Re: Phase I Environmental Site Assessment
Seneca and Myrtle Street Properties
500 Seneca St, 322 Myrtle Ave, 332 Myrtle Ave,
27 Spring and 29 Spring Street
Buffalo, New York

Dear Guy:

GZA GeoEnvironmental (GZA) is pleased to provide the attached Phase I Environmental Site Assessment Report. This assessment was completed in general accordance with the guidelines described in ASTM Standard Practice E1527-2005 for Phase I Site Assessments.

This report is based on our review of available historical and environmental records, visual observations of the surface of the subject and adjoining properties and personal interviews with available persons having knowledge of the property. Recognized environmental conditions have been identified. See Section 11.00 of the report, our Findings and Conclusions, which is considered an Executive Summary, and should be reviewed in conjunction with the entire report.

We hope this satisfies your present needs. If you need any additional information, please call Michele Wittman at 716-685-2300.

Sincerely,

GZA GEOENVIRONMENTAL, INC.

1.00 INTRODUCTION

1.10 PROJECT AUTHORIZATION

This report presents the results of a Phase I Environmental Site Assessment (ESA) conducted by GZA GeoEnvironmental (GZA) for Zdarsky, Sawicki & Agonstinelli, LLP (Client) at the Seneca and Myrtle Street Properties addressed as 500 Seneca Street, 322 Myrtle Avenue, 332 Myrtle Avenue, 27 Spring Street and 29 Spring Street in Buffalo, New York (Site). The Site visit portion of this environmental assessment of the property was conducted on September 26, 2007.

Authorization to proceed on this project was granted in accordance with a signed proposal dated September 21, 2007.

1.20 PROJECT OBJECTIVES

The objectives of this Phase I Environmental Site Assessment are:

- To render an opinion as to whether surficial or historical evidence indicates the presence of recognized environmental conditions which could result in the presence of hazardous substances or petroleum products in the environment, as defined in ASTM Standard Practice E1527-05 for Phase I Environmental Site Assessments.
- To permit the Client to satisfy one of the requirements to qualify for certain Landowner Liability Protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

As defined by ASTM Method E1527-05, the term recognized environmental condition means "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property."

1.30 SCOPE OF SERVICES

GZA's assessment of the Site was completed in general accordance with ASTM Method E1527-05 and GZA's proposal for services. GZA's scope of services consisted of the following activities:

- Review of federal and state regulatory agency databases identified by ASTM for the Site listing and other property listed within a selected radius around the Site;
- Contact with local environmental regulatory agencies to inquire about environmental conditions at the Site and in its vicinity;

- Review of the Site history through available ASTM Standard Historical Sources;
- A site reconnaissance to make surficial observations for evidence of recognized environmental conditions;
- Visual observations from public property of properties within ¼ mile of the Site;
- Observations of adjoining properties to view for the potential use of hazardous materials;
- An interview with the property owner or Key Site Manager (identified by Client) as well as certain other available occupants and/or major tenants regarding the current and past site usage and facility operations (and past owners and occupants if identified);
- Review of the information provided as part of “User responsibilities” described in ASTM 1527-05; and
- Preparation of this report which presents GZA's field observations, results, and opinions.

This report is subject to modification if subsequent information is developed by GZA or any other party, and it is subject to the limitations presented in Section 13.00 and Appendix A.

2.00 BACKGROUND SITE INFORMATION

The following information was obtained during GZA's site reconnaissance and from an interview with a Key Site Manager knowledgeable about the Site. Photographs depicting Site conditions at the time of GZA's assessment are presented in Appendix B. Additional information on Site use and area observations and activity at the Site is contained in Sections 6.00 and 7.00.

2.10 SITE LOCATION

The Site consists of the following five parcels addressed as 500 Seneca St. (Parcel 1), 322 Myrtle Ave. (Parcel 2), 332 Myrtle Ave. (Parcel 3), 27 Spring St. (Parcel 4) and 29 Spring St. (Parcel 5) located within the block bound by Myrtle Avenue, Hamburg Street, Seneca Street and Spring Street, and on the north side of Myrtle Avenue in Buffalo, New York. A locus plan is attached as Figure 1.

2.20 SITE DESCRIPTION

The Site consists of five parcels totaling approximately 2.7 acres of land.

- Parcel 1 – 500 Seneca Street; approximately 1.9 acres, identified as SBL number 111.81-7-1 occupied by a six-story building containing approximately 327,900 square feet of space.
- Parcel 2 - 322 Myrtle Avenue; approximately 0.04 acres, identified as SBL number 111.81-2-16.1 occupied by a parking lot.
- Parcel 3 - 332 Myrtle Avenue; approximately 0.7 acres, identified as SBL number 111.81-2-16.2 occupied by a parking lot.
- Parcel 4 – 27 Spring Street, approximately 0.03 acres, identified as SBL number 111.81-2-17 occupied by a parking lot.
- Parcel 5 – 29 Spring Street, approximately 0.03 acres, identified as SBL number 111.81-2-17 occupied by a parking lot.

The Site building is located on Parcel 1 and consists of a six-story warehouse formerly used by New Era as a manufacturing and distribution warehouse for caps/hats. The remaining portions of the Site (Parcel 2 through Parcel 5) are occupied by a gravel parking lot.

2.30 CURRENT SITE USE

At the time of GZA's site visit, the Site building on Parcel 1 was generally vacant. However, the first floor was being used for temporary storage of machine parts for Enidine Co. The Site limits were provided by the Client and are indicated on Figure 2. A more detailed description of Site use and our reconnaissance observations is contained in Section 6.

2.40 ADJOINING PROPERTIES USE

The properties that adjoin the Site are

- North: Residential
- South: Seneca Street/Vacant land/Parking lot
- East: Hamburg Street/First Rate Sales & Service/Mesmer Refrigeration/Meier Supply
- West: Former MGM Auto Repair & Sales/Residential

2.50 AREA USE

The general property usage in the vicinity of the Site is

- North Residential
- South Vacant/Parking/Commercial
- East Commercial
- West Commercial/Residential

2.60 SITE UTILITIES

The Site is currently vacant. The following utilities are reportedly available in the area.

<u>Gas:</u>	National Fuel
<u>Electricity:</u>	National Grid
<u>Potable Water:</u>	City of Buffalo
<u>Sanitary Sewer:</u>	City of Buffalo
<u>Storm Sewer:</u>	City of Buffalo
<u>Solid Waste Disposal:</u>	Solid waste is currently not generated at the Site.

3.00 ENVIRONMENTAL SETTING

The following subsection provides information regarding the general regional physiographic, regional hydrology and soil/rock conditions in the area of the Site.

3.10 REGIONAL PHYSIOGRAPHY

Based on a review of the U.S. Geologic Survey Map for the Buffalo, Northeast quadrangle dated 1965, the Site is approximately 590 feet above mean sea level. The Site area topographic gradient appeared to slope gradually downward to the south to southwest. Local topography in the area slopes downward to the south. The Buffalo River is located approximately 1 mile south and west of the Site. The Niagara River is located approximately 1 ½ miles to the west.

3.20 REGIONAL HYDROLOGY

Based on review of the USGS topographic map, Buffalo, Northeast quadrangle and knowledge of the Site area, the estimated depth to groundwater is likely less than 20 feet below ground surface. Regional and site groundwater flow is assumed to be south to southwesterly, towards the Buffalo River. However, localized flow direction in the area of the Site may vary as a result of underground utilities, septic systems, or heterogeneous subsurface conditions. Subsequent references to upgradient and downgradient properties are based on the estimated south to southwesterly groundwater flow direction.

Based on the Environmental Data Resources (EDR) Geocheck report and the Erie County Internet Mapping Service at <http://gis1.erie.gov/website/erieny/Viewer.htm> the Site is not located within the 100 year or 500 year floodplain. State or national wetlands do not appear to be identified at the Site.

3.30 SOIL AND ROCK CONDITIONS

Based on the EDR Geoscheck report, the bedrock at the Site is anticipated to be of Paleozoic era. According to the Soil Conservation Service STATSGO data supplied by EDR, the soils in the Site area were identified as Urban land – this unit is a miscellaneous area in which 80% or more of the soil surface is covered by asphalt, concrete, buildings, or other impervious structures.

It was not practical to examine and identify the soils underlying these impervious Urban land areas. GZA also reviewed the Soil Survey of Erie County, New York by the United States Department of Agriculture Soil Conservation Service, issued December 1986, which also identified the Site soils on the western portion of the Site as urban land

4.00 HISTORICAL USE INFORMATION

The site history was developed from ASTM Standard Historical Sources and available files at the City of Buffalo Assessor's office, Building Department, office of Fire Prevention and interviews with the Key Site contacts, Mr. Robert Noworyta, Industrial Engineer for New Era. A list of sources interviewed is included in Section 9.00. ASTM indicates that "all obvious uses of the property shall be identified from the present, back to the property's first developed use, or back to 1940, whichever is earlier. ASTM further indicates that "data failure is not uncommon" when trying to establish the historical use of a property. A historical summary report is provided in Section 4.10 below. Specific detail obtained from ASTM historical sources is contained in subsequent sections.

4.10 SITE AND AREA HISTORY SUMMARY

The Site has been vacant since 2003. The Site was owned and operated by New Era Cap Company since 1986. Prior to that, the Site was historically occupied by Wolkind Bros. Inc, clothing rentals from approximately 1970 to 1980, a parking lot, Burnt Company Box manufactures from at least 1930 to the late 1950s and residential dwellings from at least 1930 until approximately the late 1960s.

In general, the surrounding area has been used for residential, commercial, and light industrial purposes.

4.20 CITY DIRECTORIES REVIEW

EDR provided a historic city directory extract for the Site address of 500 Seneca Street for the years 1968 to 2006. A copy of the city directory abstract is included in Appendix C. The information obtained from this review is provided below.

- 1968 to 1974 - Wolkind Bros
- 1985 to 1995 – Address not listed in research source
- 2000 – Residence
- 2006 – Address not listed in research source

In addition, GZA reviewed historic Buffalo city directories for the historic Site addresses of 500 and 514 Seneca Street; 322, 331 and 332 Myrtle Avenue; and 27 and 29 Spring Street for the years 1930 to 2003. Buffalo directories were not available prior to 1929. The information obtained from this review is provided below.

Year	Seneca St. (500-514)	Myrtle Ave. (322-332)	Spring St. (27-29)
1930 to 1952	Burnt Co. Box Mfrs. (514)	Residential	Residential
1955	Burnt Co. Box Mfrs. (514)	Parking lot	Residential
1960	Not listed	Parking lot	Residential
1965	Not listed	Parking lot (330) / SW mail Delivery Service	Residential
1971 to 1980	Not listed	Wolkind Bros. Inc Clothing Rentals (331)	Not listed
1985	Not listed	Not listed	Not listed
1990 to 2003	Not listed	New Era Cap Co (331)	Not listed

4.30 HISTORIC TOPOGRAPHIC MAP REVIEW

EDR provided historical topographic maps for the Site for the years 1901, 1946, 1948, 1950 and 1965. Copies of the topographic maps are included in Appendix C.

Year	Site	Nearby Properties
1901	The Site appeared to be located within highly developed area. No specific features or buildings were shown within Site limits.	The area surrounding the Site appeared to be within a highly developed area. Specific features were not identified.
1946, 1948, 1950, 1965	The Site was in an area shaded red, indicating the area was highly developed. No specific buildings or features were shown within the Site limits.	The surrounding areas were highly developed. Several churches and schools were shown in the area. Additionally, several railroad tracks were located south of the Site.

4.40 AERIAL PHOTOGRAPH REVIEW

GZA reviewed copies of historical aerial infrared orthophotographs provided by EDR dated 1959, 1966, 1978, and 1983; the New York State Department of State, Division of Coastal Resources, GIS Division: <http://www.nysgis.state.ny.us/gateway/index.html> dated 1995, 2002 and 2005; and http://www.erie.gov/depts/community/highways_aerial.phtml dated 1927. Copies of the photographs are included in Appendix C.

Year	Site	Nearby Properties
1927	Parcel 1 was occupied by one building, of similar size and configuration to the existing building. Parcels 2, 3, 4 and 5 appeared to be occupied by residential buildings.	The surrounding area appeared highly developed. Residential areas were apparent to the north and west. Industrial properties and railroad tracks were apparent to the south and east.
1927, 1959, 1966	Parcel 1 was occupied by one building, of similar size and configuration to the existing building. Parcels 2 and 3 appeared to be vacant land, used for parking. Parcels 4 and 5 appeared to be occupied by residential buildings.	The surrounding area appeared highly developed. Residential areas were apparent to the north and west. Industrial properties and railroad tracks were apparent to the south and east.
1978, 1983, 1995, 2002, 2005	Generally appeared similar to the previous photograph. However, Parcels 4 and 5 appeared to be vacant land.	Generally appeared similar to the previous map.

4.50 HISTORIC ATLAS REVIEW

EDR provided historical sanborn maps for the Site for the years 1889, 1899, 1926, 1950, 1981 and 1986. Copies of these maps are included in Appendix C.

Year	Site	Nearby Properties
1889, 1899	The Site appeared to be densely developed by residential and storefronts (unidentified occupants, typically on Seneca Street).	The areas surrounding the Site appeared to be occupied by residential and commercial type structures. Several railroad tracks were present south of the Site.
1926	The eastern portion of Parcel 1 was occupied by the FN Burt Company, Inc. identified as printers and paper box manufacturer. The western portion of the Site was occupied by houses and	Generally appeared similar to the previous map. An auto body manufacturer, printing company, and a drug store adjoined the Site to the south. Additionally, a gas tank was located within Myrtle Street, associated with

Year	Site	Nearby Properties
	store fronts. Parcels 2 through 5 were occupied by houses.	the FN Burt Company facility.
1950	The building on the eastern portion of Parcel 1 was expanded on the western portion of the parcel. The houses have been removed. One gasoline tank was shown at the northwestern corner of Parcel 1. Parcels 2 through 5 generally appeared similar to the previous map.	Generally appeared similar to the previous map. The gasoline tank located on Myrtle Street had been removed.
1981, 1986	Parcel 1 generally appeared similar to the previous map. Parcels 2 through 5 were vacant land and used for parking.	Generally appeared similar to the previous map.

4.60 TITLE SEARCH AND ENVIRONMENTAL LIEN SEARCH REPORT

Completion of a title search was not included in the scope of this assessment. No title information was provided by the Client.

GZA retained EDR to complete an Environmental Lien Search Report for the Site, which is included in Appendix C. EDR completed a search for the five Site parcels. No environmental liens or activity and use limitation (AULs) were found for the Site.

Additionally, GZA reviewed information on the Erie County Department of Real Property Tax Services website <http://www.erie.gov/depts/finance/webprop/index.asp> which identified the following property owner information:

<i>Parcel</i>	<i>Address</i>	<i>SBL Number</i>	<i>Ownership</i>
1	500 Seneca	111.81-7-1	Valerie Koch c/o New Era Cap Co – 11/3/1996 David Koch – 5/17/1985 John Nikiel – 12/31/1962
2	322 Myrtle	111.81-2-16.1	New Era Cap Co – 8/12/1996 Timothy Murek – 11/27/1989 John Nikiel – 12/31/1962
3	332 Myrtle	111.81-2-16.2	Valerie Koch c/o New Era Cap Co – 11/3/1996 David Koch – 5/17/1985
4	27 Spring	111.81-2-17	New Era Cap Co – 8/9/1994 City of Buffalo URA – 1/17/1993
5	29 Spring	111.81-2-18	New Era Cap Co – 11/3/1996 Luigi Sarno – 8/13/24

4.70 BUILDING DEPARTMENT RECORDS

GZA visited the City of Buffalo Building Department for information pertaining to the Site addresses.

Parcel 1 – 500 Seneca

- 7/25 – Repair rear part brick store and dwelling
- 9/67 – Install one 2,000-gallon gas tank
- 9/76 – Install service to 4th floor warehouse

331 Myrtle

- 2/00 – Renovations to building
- 4/03 – Electrical permit

Parcel 2 – 322 Myrtle

- No permits identified

Parcel 3 – 332 Myrtle

- No permits identified

Parcel 4 – 27 Spring

- 3/00 - Storefront
- 12/70 – Demo 1 ½ store 2 family dwelling

Parcel 5 – 29 Spring

- 10/34 – enlarge concrete block store-dwelling
- 1/67 – demo 1 ½ story family dwelling

4.80 PROPERTY TAX FILES

GZA visited the City of Buffalo, Assessors Office for information pertaining to the Site. The desk clerk was unaware of any environmental concerns associated with the Site. The following information was available.

Parcel 1 – 500 Myrtle

<u>Tax ID Number:</u>	111.81-7-1
<u>Lot Size:</u>	not provided
<u>Gross Floor Area:</u>	10,427,900 square feet
<u>Year Built:</u>	1920
<u>Usage:</u>	Warehouse
<u>Current Owner:</u>	Valerie Koch c/o New Era Cap Co. – 9/12/2006
<u>Past Owners:</u>	David Koch – year not provided
<u>Improvements:</u>	1952 – 550-gallon underground storage tank installed 1970 – Paving
<u>Pertinent Information:</u>	No additional information was provided

Parcel 2 – 322 Myrtle

Tax ID Number: 111.81-2-16.1
Lot Size: 59.25 feet x 36.27 feet
Gross Floor Area: no building
Year Built: not provided
Usage: vacant commercial
Current Owner: New Era Cap Company – 8/12/96
Past Owners: not provided
Improvements: not provided
Pertinent Information: No additional information was provided

Parcel 3 – 3322 Myrtle

Tax ID Number: 111.81-2-16.2
Lot Size: 394.55 feet x 82.62 feet
Gross Floor Area: no building
Year Built: not provided
Usage: vacant commercial
Current Owner: David Koch – year not provided
Past Owners: not provided
Improvements: not provided
Pertinent Information: No additional information was provided

Parcel 4 – 27 Spring

Tax ID Number: 111.81-2-17
Lot Size: 27.00 feet x 59.00 feet
Gross Floor Area: no building
Year Built: not provided
Usage: Residential vacant land
Current Owner: New Era Cap Co., Inc. – 6/21/1994
Past Owners: not provided
Improvements: not provided
Pertinent Information: No additional information was provided

Parcel 5 – 29 Spring

Tax ID Number: 111.81-2-18
Lot Size: 25.67 feet x 82.34.00 feet
Gross Floor Area: no building
Year Built: not provided
Usage: Residential vacant land
Current Owner: New Era Cap Co – 8/8/94
Past Owners: not provided
Improvements: not provided
Pertinent Information: No additional information was provided

4.90 OFFICE OF FIRE PREVENTION

GZA visited the City of Buffalo, Office of Fire Prevention for information pertaining to the Site and possible installation and removal of USTs. The following records of UST installation/removal were identified in the Office of Fire Prevention files for the Site addresses of 500-546 Seneca Street.

- 9/7/1967 – permit to install one 2,000-gallon tank, four feet underground. A sketch included with the permit identified the 2,000-gallon tank at the northwest corner of Parcel 1. Additionally, the sketch included a 550-gallon existing tank and pump. A copy of the permit is included in Appendix C.

5.00 PREVIOUS SITE INVESTIGATIONS

Previous reports were not provided to GZA for review.

6.00 SITE RECONNAISSANCE

The purpose of GZA's site reconnaissance was to make surficial observations for evidence of recognized environmental conditions which could result in the presence of hazardous materials in the environment. GZA Engineering Technician, Jennifer Davide, visited the Site on September 27, 2007. Mr. Bob Noworyta with New Era Cap Co, accompanied GZA during the visit to the Site. Observations were documented and pertinent features or areas of environmental concern were photographed and are referenced in the text. Selected photographs are included in Appendix B, and Figure 2 depicts pertinent Site features. A summary of each area assessed is presented below.

6.10 EXTERIOR OBSERVATIONS

The periphery of the Site was visually assessed for recognized environmental conditions.

6.10.1 Underground Storage Tanks (USTs)

A potential vent pipe was observed at the northwest corner of Parcel 1, located near the building. Additionally, a concrete pad with electrical line, possibly a former pump island, was also present in the northwestern portion of the parcel. These features appeared to be in a similar location to the former USTs identified in the Fire Department permits.

6.10.2 Aboveground Storage Tanks (ASTs)

No exterior ASTs were observed during our Site reconnaissance.

6.10.3 Hazardous Substances or Petroleum Products Use

No exterior hazardous substances or petroleum products were observed during the exterior reconnaissance.

6.10.4 Staining

No surficial staining (other than typical parking lot staining) was observed.

6.10.5 Electrical Transformers/Equipment

Three pole mounted transformers were observed at the property limits of the Site. The transformers are reportedly owned and maintained by the power company. No staining was observed on the transformers or poles.

6.10.6 Drywells and Sumps

No surficial evidence of exterior drywells or sumps were observed during GZA's site reconnaissance.

6.10.7 Pits, Ponds, and Lagoons

No surficial evidence of pits, ponds, or lagoons were observed during GZA's site reconnaissance.

6.10.8 Wells

No surficial evidence of wells were observed during GZA's site reconnaissance, and Mr. Noworyta indicated the Site is connected to the municipal water supply.

6.10.9 Solid Waste

Solid waste is currently not generated at the Site.

6.10.10 Process Wastewater

No surficial evidence of on-site process wastewater disposal was observed.

6.10.11 Septic System

No septic systems were observed. Mr. Noworyta indicated the Site is connected to the municipal sewer system.

6.10.12 Stressed Vegetation

No stressed vegetation was observed on the Site.

6.10.13 Soil/Water Sampling

No subsurface exploration or chemical analysis has been included as part of GZA's scope of services. Information regarding subsurface conditions can be obtained by traditional subsurface exploration techniques and the collection and chemical analysis of soil and water samples.

6.10.14 Oil/Water Separators

No evidence of oil/water separators was observed.

6.10.15 Surface Water Runoff

Surface water is expected to flow toward nearby streets and catch basins.

6.10.16 Other Observations

A small pile of bricks and concrete was observed in the parking area on Parcel 1.

Several pieces of granite material were stored on the western side of Parcel 1, within the parking area. Mr. Noworyta indicated that this was construction material generated during construction of New Era current facility and stored on the parcel.

6.20 INTERIOR OBSERVATIONS

The interior of on-Site structures, including occupied areas and storage areas, was visually assessed for evidence of recognized environmental conditions. A building is located on Parcel 1. Parcels 2 through 5 are vacant land, used for parking lot. The conditions observed are presented below.

6.20.1 Construction

The Site building consists of concrete block and brick walls and sits on a slab-on-grade foundation. A small/partial basement is present under a portion of the building. The building is a 5 to 6 story building.

6.20.2 Heating and Cooling

The Site building is heated with natural gas boilers. Mr. Noworyta believed the building was historically heated with natural gas as well and was not aware of an additional heating source. Ceiling mounted natural gas heaters were present in the building.

Two boiler rooms are present in the Site building, both accessible through the small courtyard in the center of the building. The boiler rooms are located on the first floor. The currently used boiler room contained a small quantity of typical boiler type chemicals. The historic boiler room has not been used in several years. Mr. Noworyta indicated potential asbestos containing materials (ACMs) are associated with the piping and boiler in the old boiler room.

6.20.3 Current Site Use

The Site building has been vacant since 2003. However, the first floor is used by Enidine for temporary storage of machine parts. Mr. Noworyta indicated that Enidine should have their equipment removed from the Site by the end of the year.

Mr. Noworyta indicated the Site was previously occupied by New Era Cap Co. from 1986 to 2003. Previously, silk screening was done that generated waste oils and inks. Mr. Noworyta indicated that approximately one 55-gallon drum of waste was generated per year and disposed by Safety Kleen. Approximately 10 years ago, New Era stopped doing the silk screening operations and switched to embroidery.

Mr. Noworyta indicated that during New Era operation, typically ordering and boxing were done on the 1st floor; sewing and cutting were completed on the 2nd, 3rd and 4th floors, and cap storage was on the 4th, 5th and 6th floors. GZA observed five hydraulic cutting machines and sewing machines on the 3rd floor of the building.

6.20.4 Chemical Use and Storage Areas

The Site building is currently vacant. Chemicals are not currently used at the Site. However, GZA observed typical boiler treatment chemicals in the boiler room. Mr. Noworyta indicated the containers were mostly empty and previously used in the boiler system. GZA observed one 35-gallon drum of Chem Aqua 300 boiler treatment; three

2-gallon boiler sludge conditioner; 20-gallons of Formula 2200-F; eight 40-pound bags of salt pellets for water softener; and six empty 5-gallon containers of Chem Aqua 100.

One flammable storage cabinet was also present in current boiler room, which contained 5-gallon containers of gasoline for the lawn mower and snow blower, two cans of spray paint, and a one-liter container of new oil.

No additional chemical use and storage areas were observed.

6.20.5 Hazardous Wastes Generated and Waste Storage Areas

Hazardous waste is currently not generated at the Site. Waste storage areas were not observed. Mr. Noworyta indicated that hazardous waste was not generated during routine operations for New Era. However, New Era previously used oils and inks associated with the silk screening operations which were discontinued approximately 10 years ago. During that time, approximately one 55-gallon drum of waste material was generated each year and disposed off-site by Safety Kleen.

6.20.6 Stains or Corrosion

No areas of staining or corrosion were observed by GZA during the interior reconnaissance.

6.20.7 Floor Drains or Sumps

One sump was observed in the partial basement area. Mr. Nowortya indicated the sump contains a pump, which discharges to the sanitary sewer system.

6.20.8 Transformers

No transformers were observed in the interior of the Site building. Electrical panels were observed, however, Mr. Noworyta did not believe the system contained oils.

Mr. Noworyta indicated that when New Era moved into the building in 1986, various interior electrical components were required to be removed and/or updated. This generally included removal of old transformers and electrical equipment. He believed the transformers may have contained PCBs. However, replacement electrical equipment was non-PCB containing.

6.20.9 Other Interior Observations

A fire suppression/sprinkler system is present in the building. Mr. Noworyta indicated that the previous occupant was a paper box manufacturer which utilized the system. Several aboveground water storage tanks were observed on the first floor of the building. Additionally, an access port to an underground water storage tank was also present on the first floor. Mr. Noworyta did not know the size of the underground water storage tank.

Two freight elevators and one passenger elevators are present in the building. Mr. Noworyta indicated the elevators are serviced by Gallegger Elevator and he was not aware of significant issues associated with the elevators.

6.30 NON-SCOPE CONSIDERATIONS:

Radon: Radon is a naturally occurring gas produced by the breakdown of uranium in soil, rock and water. The amount of radon in the air is measured in picocuries of radon per liter of air, or pCi/L. The Environmental Protection Agency (EPA) recommends remedial action be taken, if the level of indoor radon is greater than 4 pCi/L, known as the action level. The New York State Department of Health, Short Term Basement Radon Measurements dated August 2007, reported that 727 homes were tested in Buffalo. The average radon reading was 1.17 pCi/L. This is below the action level.

Asbestos: As a part of this assessment, GZA made observations for readily accessible suspect friable asbestos-containing materials (ACM). GZA observed suspect ACM at the Site, including floor tiles on each level of the building and pipe insulation. Additionally, Mr. Noworyta indicated that the old boiler system and boiler room contained ACMs. Additionally, due to the age of the Site building, it is possible that ACM are present in the Site building in areas that were not readily accessible.

Lead-Based Paints: Lead is a toxic metal known to be harmful to human health if inhaled or ingested. Lead-based paint is the most significant source of lead exposure in the U.S. today. Most buildings built before 1980 may contain some lead-based paint. Lead-based paint is considered to be a hazard if it is in poor condition, peeling, chipping, cracking or flaking. Due to the age of the building, it is possible that painted surfaces contain detectable quantities of lead. The painted surfaces within the Site building were observed to be in fair to poor condition, with several areas of peeling paint observed.

7.00 VICINITY RECONNAISSANCE

As part of GZA's site assessment, a reconnaissance of the properties adjoining the Site, as well as the vicinity within a ¼ mile radius of the Site, was conducted from public properties. The result of GZA's vicinity reconnaissance is presented below.

7.10 HAZARDOUS MATERIAL USE AT ADJOINING PROPERTIES

Adjoining properties are identified in Section 2.30. Hazardous materials and/or petroleum products are expected to be used at the former MGM Auto Repair facility adjoining the Site to the west, in an estimated cross gradient direction. Additionally, the southerly adjoining property likely used various hazardous materials and/or petroleum products in the past. This facility is located in an estimated downgradient direction, based on an estimated south to southwesterly groundwater flow direction.

7.20 HAZARDOUS MATERIAL USE AT VICINITY PROPERTIES

The area within ¼ mile of the study Site is primarily residential, commercial, and light industrial. Hazardous materials and/or petroleum products are generally not expected to be used at the facilities located within ¼ mile of the Site, within an estimated upgradient direction, based on a south to southwesterly groundwater flow direction, which is generally residential.

8.00 REGULATORY DATABASE REVIEW

The following section is based on public information obtained from various federal, state, and local agencies that maintain environmental regulatory databases. These databases provide information about the regulatory status of a property and incidents involving use, storage, spillage, or transportation of oil or hazardous materials. Information was gathered by GZA personnel and by a professional data search service, EDR. Federal, state, and local regulatory information is presented in Appendix D. A discussion of the reviewed information is presented in the following sections.

8.10 FEDERAL AGENCY DATABASES

Source: Environmental Data Resources, Inc.

Site: The Site was listed on the following federal databases

- New Era Cap Co was identified on the RCRIS – small quantity generator of hazardous waste database. No violations were identified. Mr. Noworyta believed this listing was associated with historic disposal of inks and compressor oils associated with the silk screening operations. Wastes were disposed off-site by Safety Kleen.
- NY Manifest was provided for disposal of PCB transformers with 500 ppm PCB in oil. The manifest was dated 1990. Mr. Noworyta believed the disposal of the PCB transformers was associated with the electrical upgrade and repair completed when New Era moved into the building.

Nearby Properties: The following facilities were identified adjoining the Site or in an estimated upgradient direction, based on a south to southwesterly groundwater flow direction.

- Fargo Building, which formerly adjoined the Site to the south, was listed on the RCRA large quantity generator database. No violations were identified. Available manifest information indicated that miscellaneous PCB wastes were disposed in 2002. Since this property is currently vacant land and located in an assumed down direction from the Site, it is not expected to have significantly impacted the environment at the Site.
- Central Auto at 541 Seneca, which formerly adjoined the Site to the south, was listed on the RCRA small quantity generator of hazardous wastes. No violations were found. Manifest information indicated non-listed ignitable wastes, mercury waste, halogenated solvent waste and miscellaneous PCB wastes were disposed in 1999. Since this property is currently vacant land and located in an assumed down direction from the Site, it is not expected to have significantly impacted the environment at the Site.
- Zinsser Co, Inc. at Schnitters Warehouse at 519 Hamburg Street, which adjoins the Site to the east, was listed on the RCRA small quantity generator database. No violations were found. Manifest information indicated non-listed ignitable wastes and non-listed corrosive wastes were disposed in 1996. Since these listings are for registrations, they are not expected to have significantly impacted the environment at the Site.
- In addition to the above listings, one CERCLIS – NFRAP listing, three CORRACTS listings, one RCRA large quantity generator of hazardous waste, five RCRA small quantity generators of hazardous waste, and one FUDS facility were also identified on the federal databases within the radii reviewed. However, due to the distance and/or direction from the Site, these facilities are not expected to have significantly impacted the environment at the Site.

8.20 STATE AGENCY DATABASE REVIEW

Source: Environmental Data Resources, Inc

Site: The Site was listed on the NY Spills database as number 9400891 on April 18, 1994, when New York State Department of Environmental Conservation (NYSDEC) received notice that the company was dumping cleaning solutions down the sewer. NYSDEC met on site and identified the cleaner as non-toxic cleaner, labeled as drain safe. No further action was required. Since no further work was required by the regulatory agency, this listing is considered a historic recognized environmental concern.

Nearby Properties: The following facilities were identified adjoining the Site or in an estimated upgradient direction, based on a south to southwesterly groundwater flow direction.

- The southern adjoining property, addressed as 493-503 Seneca, which adjoins the Site to the south, was listed on several state databases.
 - #0275500 was listed when contamination was identified during a tank excavation. Analytical results were slightly above regulatory guidance values. 142 tons of contaminated soil was removed and the spill was given an inactive status.
 - #9975194 was listed when abandoned drums were found in the abandoned building. The drums were removed and the spill was closed.
 - #0107549 was listed when disposal of hazardous material identified PCBs and metals. The spill was transferred to a separate regulatory agency department and the spill was closed.
 - #0275134 was listed when contaminated soil was encountered during tank removal. Contaminated soil was removed, however, residual contamination remained. No further action was required by the regulatory agency and the spill was given an “inactive” status.

Since the listings has been given a closed or “inactive” status by the regulatory agency and no further work was required, it is not expected to have significantly impacted the environment at the Site.

- 490 Seneca, which adjoins the Site to the west, was listed on the LTANKS database as spill #9609364 when contamination was found during tank removal. Contaminated soil was removed and biotreated on the property. The biotreated soil was removed from the property and the spill was closed. Since the listing has been closed by the regulatory agency it is not expected to have significantly impacted the environment at the Site. This property was also identified on the UST database for several removed tanks.

- In addition to the above listings, one HSWDS facilities, one SWRCY, fifteen LTANKS facilities, three UST facilities, and seven NY Spills facilities were also identified on the state databases within the radii reviewed. However, due to the distance and/or direction from the Site, these facilities are not expected to have significantly impacted the environment at the Site.

Source: New York State Department of Environmental Conservation (NYSDEC)

Summary: Submitted a Freedom of Information Legislation (FOIL) request to NYSDEC dated October 2, 2007. At the time of this report, GZA has not received a response from the NYSDEC departments. Pertinent information that may change the conclusion of this report will be forwarded to Client upon receipt.

8.30 HEALTH DEPARTMENT RECORDS AND LOCAL REGULATORY AGENCIES

Source: New York State Department of Health (NYSDOH)
Erie County Health Department (ECHD)

Summary: Submitted a FOIL request to the NYSDOH and ECHD dated October 2, 2007. At the time of this report, GZA has not received a response from ECHD or NYSDOH. Pertinent information that may change the conclusion of this report will be forwarded to Client upon receipt.

Source: City of Buffalo Assessor's Office

Findings: The desk clerk did not have any additional records other than those summarized in Section 4.00.

Source: City of Buffalo Building Department

Findings: The desk clerk did not have any additional records other than those summarized in Section 4.00.

9.00 INTERVIEWS

GZA interviewed the following people as part of this assessment:

- Mr. Bob Noworyta with New Era Cap Co.
- Desk Clerk, City of Buffalo Building Department
- Desk Clerk, City of Buffalo Assessor's Office
- Desk Clerk, Office of Fire Prevention

The information provided by each is discussed and referenced in the text or provided below.

10.00 USER RESPONSIBILITIES

GZA requested information from the User regarding title information, environmental liens, Activity and Use Limitations (AUL), and specialized knowledge or commonly known information regarding the Site and reason for significantly lower purchase price (if applicable). A copy of our user responsibility request is included in Appendix E. The Client did not provide a response to our request.

11.00 FINDINGS AND CONCLUSIONS

A Phase I Environmental Site Assessment following the general guidance of the ASTM Phase I Standard Practice 1527-05 has been conducted at the Seneca and Myrtle Street Properties in Buffalo, New York (Site). The study included a site reconnaissance, a review of Site history, a review of selected local, state and federal regulatory records, and interviews with persons and agencies familiar with environmental conditions at the Site. No subsurface explorations or chemical testing of soil or groundwater was conducted and no assessment for the presence of lead hazards, mold, radon or asbestos was completed.

11.10 FINDINGS

The findings below are based on the work conducted as part of this assessment:

- The Site consists of five parcels totaling approximately 2.7 acres of land. The Site building is located on Parcel 1 and consists of a six-story warehouse formerly used by New Era as a manufacturing and distribution warehouse for caps/hats. The remaining portions of the Site (Parcel 2 through Parcel 5) are occupied by a gravel parking lot
 - Parcel 1 – 500 Seneca Street; approximately 1.9 acres, identified as SBL number 111.81-7-1 occupied by a six-story building containing approximately 327,900 square feet of space.
 - Parcel 2 - 322 Myrtle Avenue; approximately 0.04 acres, identified as SBL number 111.81-2-16.1 occupied by a parking lot.
 - Parcel 3 - 332 Myrtle Avenue; approximately 0.7 acres, identified as SBL number 111.81-2-16.2 occupied by a parking lot.
 - Parcel 4 – 27 Spring Street, approximately 0.03 acres, identified as SBL number 111.81-2-17 occupied by a parking lot.
 - Parcel 5 – 29 Spring Street, approximately 0.03 acres, identified as SBL number 111.81-2-17 occupied by a parking lot.

- At the time of GZA's site visit, the Site building on Parcel 1 was generally vacant. However, the first floor was being used for temporary storage of machine parts for Enidine Co.
- Based on review of the USGS topographic map, Buffalo, Northeast quadrangle and knowledge of the Site area, the estimated depth to groundwater is likely less than 20 feet below ground surface. Regional and site groundwater flow is assumed to be south to southwesterly, towards the Buffalo River. Based on the Environmental Data Resources (EDR) Geotcheck report, the Site is not located within the 100 year or 500 year floodplain. State or national wetlands do not appear to be identified at the Site.
- The Site has been vacant since 2003. The Site was owned and operated by New Era Cap Company since 1986. Prior to that, the Site was historically occupied by Wolkind Bros. Inc, clothing rentals from approximately 1970 to 1980, a parking lot, Burnt Company Box manufactures from at least 1930 to the late 1950s and residential dwellings from at least 1930 until approximately the late 1960s.
- GZA retained EDR to complete an environmental lien search on the Site. No environmental liens or activity use limitation (AULs) were found for the parcels.
- Historic records identified a 2,000-gallon tank installed on the northwestern corner of the Parcel 1. The tank was installed in 1967. Additionally, the permit referenced a existing 550-gallon tank, for a total capacity of 2,550-gallons. The 550-gallon tank appears to have been installed in 1952. There were no records found that indicated these tanks have been removed.
- A potential vent pipe was observed at the northwest corner of Parcel 1, located near the building. Additionally, a concrete pad with electrical line, possibly a former pump island, was also present in the northwestern portion of the parcel. These features appeared to be in a similar location to the former USTs identified in the Fire Department permits.
- The Site building is heated with natural gas boilers. Mr. Noworyta believed the building was historically heated with natural gas as well and was not aware of an additional heating source. Ceiling mounted natural gas heaters were present in the building.
- Two boiler rooms are present in the Site building, both accessible through the small courtyard in the center of the building. The boiler rooms are located on the first floor. The currently used boiler room contained a small quantity of typical boiler type chemicals. The historic boiler room has not been used in several years.

- The Site building has been vacant since 2003. However, the first floor is used by Enidine for temporary storage of machine parts. Mr. Noworyta indicated that Enidine should have their equipment removed from the Site by the end of the year.
- Mr. Noworyta indicated the Site was previously occupied by New Era Cap Co. from 1986 to 2003. Previously, silk screening was done that generated waste oils and inks. Mr. Noworyta indicated that approximately one 55-gallon drum of waste was generated per year and disposed by Safety Kleen. Approximately 10 years ago, New Era stopped doing the silk screening operations and switched to embroidery.
- Mr. Noworyta indicated that during New Era operation, typically ordering and boxing were done on the 1st floor; sewing and cutting were completed on the 2nd, 3rd and 4th floors, and cap storage was on the 4th, 5th and 6th floors. GZA observed five hydraulic cutting machines and sewing machines on the 3rd floor of the building.
- The Site building is currently vacant. Chemicals are not currently used at the Site. However, GZA observed typical boiler treatment chemicals in the boiler room. Mr. Noworyta indicated the containers were mostly empty and previously used in the boiler system. GZA observed one 35-gallon drum of Chem Aqua 300 boiler treatment; three 2-gallon boiler sludge conditioner; 20-gallons of Formula 2200-F; eight 40-pound bags of salt pellets for water softner; and six empty 5-gallon containers of Chem Aqua 100.
- One flammable storage cabinet was also present in current boiler room, which contained 5-gallon containers of gasoline for the lawn mower and snow blower, two cans of spray paint, and 1 liter container of new oil.
- Hazardous waste is currently not generated at the Site. Waste storage areas were not observed. Mr. Noworyta indicated that hazardous waste was not generated during routine operations for New Era. However, New Era previously used oils and inks associated with the silk screening operations which were discontinued approximately 10 years ago. During that time, approximately one 55-gallon drum of waste material was generated each year and disposed off-site by Safety Kleen.
- Mr. Noworyta indicated that when New Era moved into the building in 1986, various interior electrical components were required to be removed and/or updated. This generally included removal of old transformers and electrical equipment. He believed the transformers may have contained PCBs. However, replacement electrical equipment was non-PCB containing.
- A fire suppression/sprinkler system is present in the building. Mr. Noworyta indicated that the previous occupant was a paper box manufacturer which utilized the system. Several aboveground water storage tanks were observed on the first floor of the building.

Additionally, an access port to an underground water storage tank was also present on the first floor. Mr. Noworyta did not know the size of the underground water storage tank.

- As a part of this assessment, GZA made observations for readily accessible suspect friable asbestos-containing materials (ACM). GZA observed suspect ACM at the Site, including floor tiles on each level of the building and pipe insulation. Additionally, Mr. Noworyta indicated that the old boiler system and boiler room contained ACMs. Additionally, due to the age of the Site building, it is possible that ACM are present in the Site building in areas that were not readily accessible.
- Lead is a toxic metal known to be harmful to human health if inhaled or ingested. Lead-based paint is the most significant source of lead exposure in the U.S. today. Most buildings built before 1980 may contain some lead-based paint. Lead-based paint is considered to be a hazard if it is in poor condition, peeling, chipping, cracking or flaking. Due to the age of the building, it is possible that painted surfaces contain detectable quantities of lead. The painted surfaces within the Site building were observed to be in fair to poor condition, with several areas of peeling paint observed.
- New Era Cap Co was identified on the RCRIS – small quantity generator of hazardous waste database. No violations were identified. Mr. Noworyta believed this listing was associated with historic disposal of inks and compressor oils associated with the silk screening operations. Wastes were disposed off-site by Safety Kleen.
- NY Manifest was provided for disposal of PCB transformers with 500 ppm PCB in oil. The manifest was dated 1990. Mr. Noworyta believed the disposal of the PCB transformers was associated with the electrical upgrade and repair completed when New Era moved into the building.
- The Site was listed on the NY Spills database as number 9400891 on April 18, 1994, when New York State Department of Environmental Conservation (NYSDEC) received notice that the company was dumping cleaning solutions down the sewer. NYSDEC met on site and identified the cleaner as non-toxic cleaner, labeled as drain safe. No further action was required. Since no further work was required by the regulatory agency, this listing is considered a historic recognized environmental concern.
- Several nearby facilities were listed on the State and Federal databases reviewed. However, due to their distance/direction from the Site, or the current regulatory status (i.e. closed, inactive), these listings are not expected to have significantly impacted the environment at the Site.

- GZA requested information from the User regarding title information, environmental liens, Activity and Use Limitations, and specialized knowledge or commonly known information regarding the Site and reason for significantly lower purchase price (if applicable). GZA did not receive a response to our request. This is considered a data gap. In order to fulfill this data gap, the User responsibility request should be proved to GZA.

11.20 CONCLUSIONS AND OPINIONS

Based on the presented findings above, it is GZA's opinion that "we have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 at the Former Oil Storage Facility located at Seneca and Myrtle Properties in Buffalo, New York. Any exceptions to, or deletions from, this practice are described in Section 1.00 of this report. This assessment has revealed the following evidence of Recognized Environmental Conditions in connection with the property.

- The Site was owned and operated by New Era Cap Co since 1986. Prior to that, the Site was historically occupied by Wolkind Bros. Inc, clothing rentals from approximately 1970 to 1980, a parking lot, Burnt Company Box manufactures from at least 1930 to the late 1950s and residential dwellings from at least 1930 until approximately the late 1960s. The box manufacturer and New Era likely utilized various chemical and petroleum products. New Era was also identified as a RCRIS small quantity generator of hazardous wastes and on the NY Manifest for disposal of PCB containing transformers. These listings confirm the historic use of hazardous materials at the Site. The historic storage, transport and disposal at these facilities are unknown. The potential exists for historic spills or releases to have impacted the Site soil and/or groundwater.
- Historic records identified a 2,000-gallon tank installed on the northwestern corner of the Parcel 1. The tank was installed in 1967. Additionally, the permit referenced a existing 550-gallon tank, for a total capacity of 2,550-gallons. The 550-gallon tank appears to been installed in 1952. There were no records found that indicated these tanks have been removed. Additionally, GZA observed a potential vent pipe and area of the former pump island. It is possible that the tanks are still present at the Site. Potential spills and/or releases from these tanks may have impacted the environment at the Site.

It is GZA's opinion that a subsurface investigation consisting of a geophysical survey in an attempt to identify locations of possible existing USTs and subsurface soil and groundwater sampling and analyses would be necessary to confirm the presence of hazardous materials in the environment associated with the identified Recognized Environmental Conditions. Additionally, an asbestos survey and lead based paint survey would be necessary to assess for the presence of these materials within the on-Site structure.

12.00 ENVIRONMENTAL PROFESSIONAL STATEMENT

GZA declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 12. “We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.” The signature of the Environmental Professional is contained on the cover page of this report.

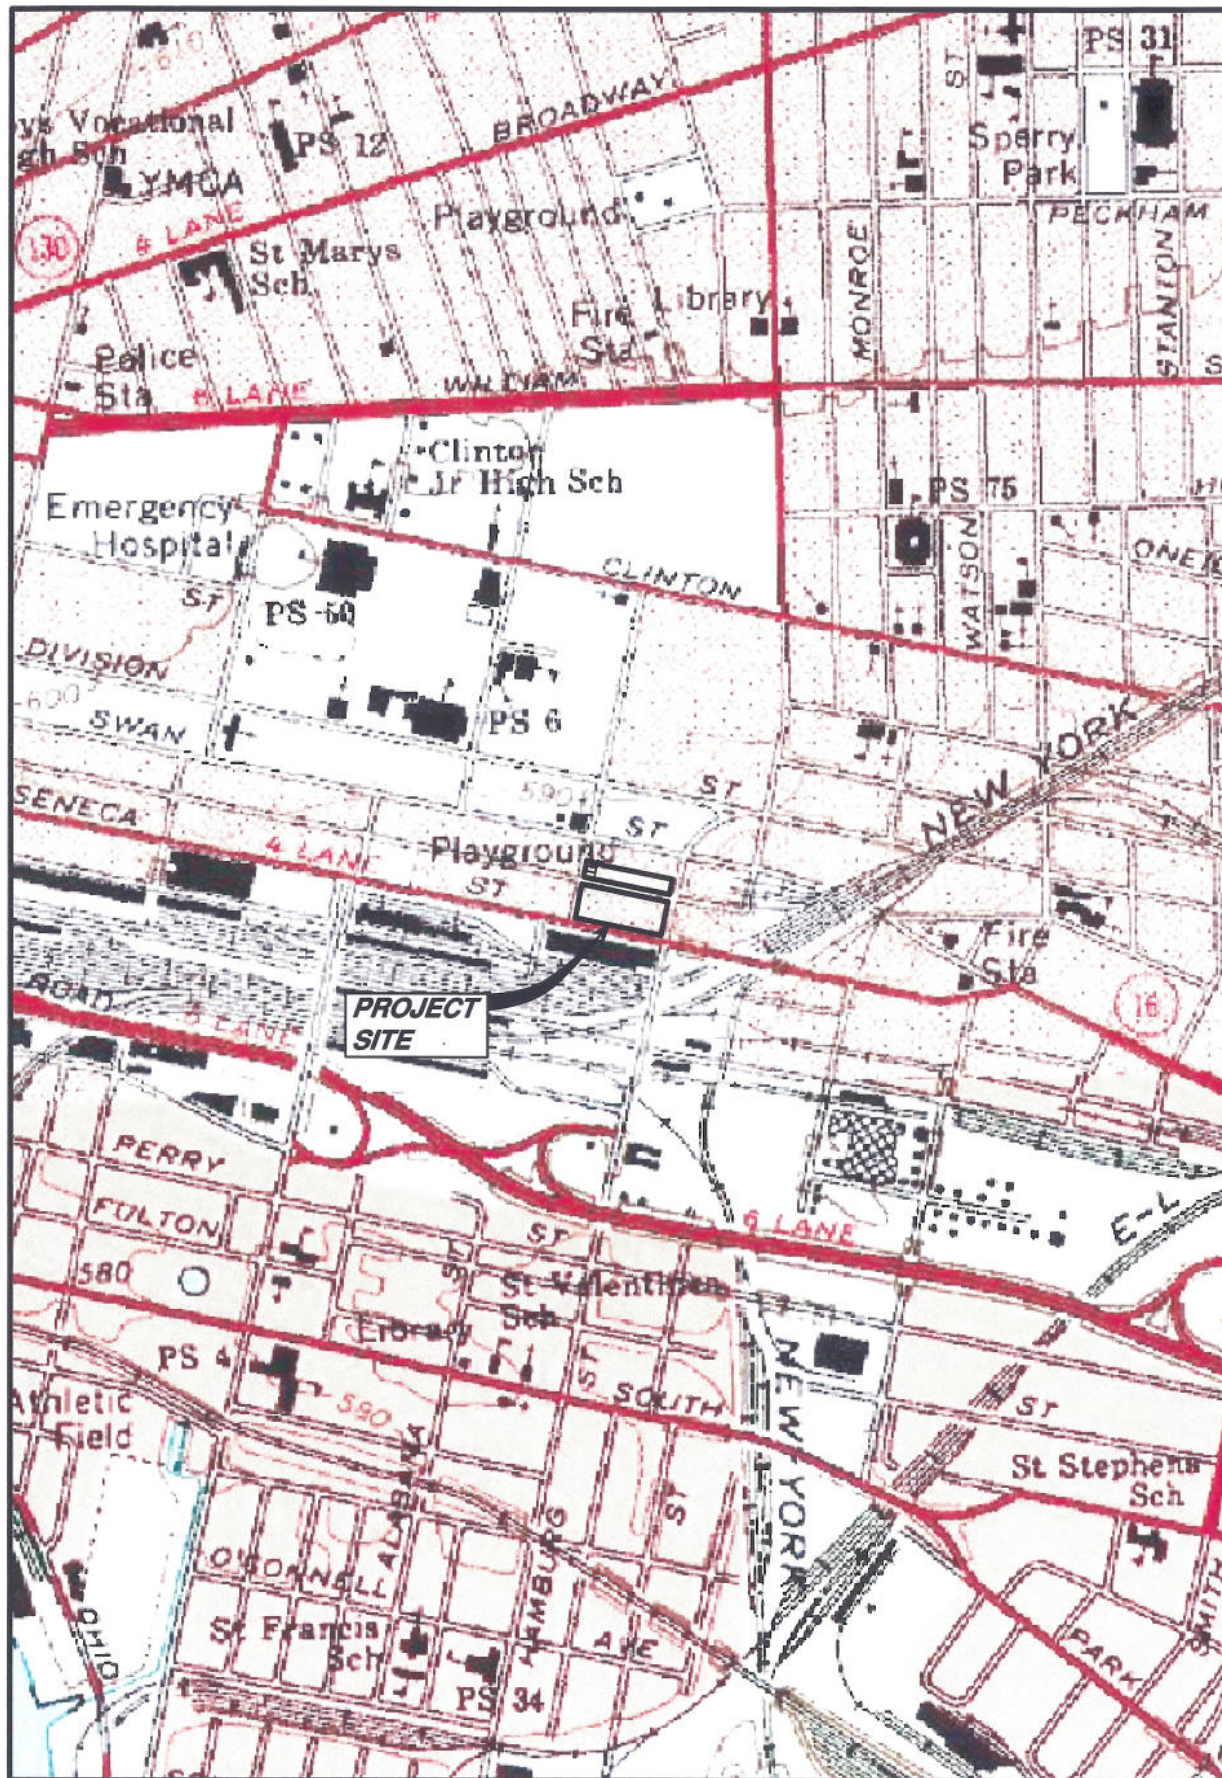

13.00 LIMITATIONS

GZA's site assessment was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and GZA observed the degree of care and skill generally exercised by other consultants under similar circumstances and conditions. GZA's findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion concerning the significance of the limited data gathered during the course of the environmental site assessment. No other warranty, express or implied, is made. Specifically, GZA does not and cannot represent that the Site contains no hazardous material, oil or other latent condition beyond that observed by GZA during its site assessment. This report is also subject to the specific limitations contained in Appendix A.

It should be noted that when an assessment is completed without subsurface explorations and chemical screening of soil and groundwater beneath the site, no data can be generated regarding latent subsurface conditions which may be the result of on-site or off-site sources.

This study and report have been prepared on behalf of and for the exclusive use of Zdarsky, Sawicki & Agostinelli, LLP, solely for use in an environmental assessment of the Site. This report and findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party, nor relied on by any other party in whole or in part, without the prior written consent of GZA. However, GZA acknowledges and agrees that the Report may be conveyed to the Lender associated with the proximate financing of the Site to the extent set forth in our master service agreement. Client acknowledges and agrees that reliance upon the report and the findings in the report by any other party, or for any other purpose, shall be at that party's sole risk and without any liability to GZA.

LIMITATIONS

PHASE I ENVIRONMENTAL SITE ASSESSMENT LIMITATIONS

1. The observations described in this report were made under the conditions stated herein. The conclusions presented in the report were based solely upon the services described, and not on scientific tasks or procedures beyond the scope of described services or the time and budgetary constraints imposed by Client.
2. The findings, conclusions and recommendations in this report are based on information concerning the facility available to GZA and observations made during a Phase I ESA related to the property. Conditions in many of the elements of the Phase I ESA are subject to change, so the status at any given time could differ from the status at the time of our services.
3. In preparing this report, GZA has relied on certain information provided by state and local officials and other parties referenced therein, and on information contained in the files of state and/or local agencies available to GZA at the time of the Site assessment. Although there may have been some degree of overlap in the information provided by these various sources, GZA did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this Site assessment.
4. Observations were made of the Site and of structures on the Site as indicated within the report.
5. Unless otherwise specified in the report, GZA did not perform testing or analyses to determine the presence or concentration of asbestos or polychlorinated biphenyls (PCBs) at the Site or in the environment at the Site.
6. No specific attempt was made to check on the compliance of present or past owners or operators of the Site with federal, state, or local laws and regulations, environmental or otherwise.
7. Except as noted within the text of the report, no quantitative laboratory testing was performed as part of the Site assessment.

EDR City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening report designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. EDR Historical Topographic Map Report

Environmental Data Resources, Inc.'s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report includes results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers follows established procedures to:

- search for parcel information, legal description, and ownership based on client supplied address information;
- research indexes and title repositories;
- obtain a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument (title, parties involved, and description); and
- provide a copy of the deed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report includes results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers follows established procedures to:

- search for parcel information, legal description, and ownership based on client supplied address information;
- research indexes and title repositories;
- obtain a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument (title, parties involved, and description); and
- provide a copy of the deed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/21/2007 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<i>MOLLENBER-BETZ</i>	<i>300 SCOTT ST</i>	<i>1/4 - 1/2 WSW</i>	<i>J39</i>	<i>213</i>

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/26/2007 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/13/2006 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 12/31/2005 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

STATE AND LOCAL RECORDS

HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 HSWDS site within approximately 0.5 miles of the target property.

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 07/11/2007 has revealed that there are 17 LTANKS sites within approximately 0.5 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 15 HIST LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

HIST SPILLS: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 10 NY Hist Spills sites within approximately 0.125 miles of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Start DECRemark - 0275134 Prior to Sept, 2004 data translation this spill Lead
DEC Field was "JFO" 06/11/02 JFO ON SITE MET WITH DENNIS SUTTON OF THE CITY OF BUFFALO AND BOB OSMUND OF PAN-AMERICAN ENVIRONMENTAL. THEY WILL RE-EXCAVATE THE FORMER TANK PIT TO REMOVE ANY CANTAMINATION ON THE BOTTOM AND THE WEST WALL. THE WEST WALL IS ONLY SLIGHTLY OVER TAGMS. WHILE REMOVING SOIL IN ANOTHER AREA WHERE PCB'S WERE DISCOVERED (BEING HANDLED BY MARTY DOSTER) THEY DISCOVERED ANOTHER 500 GALLON TANK.THEY WILL REMOVE THIS TANK AND ANY CONTAMINATION AND SAMPLE THE WALLS AND BOTTOM. I WILL CHECK TOMORROW.
06/12/02 JFO SPOKE WITH MARTY DOSTER. HE SAID HE IS NOT HANDLING THIS SITE.
JFO ON SITE MET WITH DENNIS S AND BOB O. THE EXCAVATIONIS APPROX 15' X 40' X 3'. BOB WILL COLLECT 5 BOTTOM SAMPLES (F-1, F-2, F-3N, F-4S & F-5), AND A COMPOSITE SAMPLE FROM THE SOUTH SIDEWALL (F-6), A WEST (CORRECTED FROM NORTH) SIDEWALL AT THE REMOVED TANK (T-W) AND A BOTTOM SAMP BELOW THE REMOVED TANK (T-B). ALSO THEY WILL REMOVE MORE SOIL FROM THE OTHER TANKPIT AND RESAMPLE (FT-W & FT-B). SAMPLES 1 THRU 6 ANALYZE FOR PCB'S " T-B AND T-W ANALYZE FOR 8021 AND 8270 AND PCB'S " FT-B AND FT-W ANALYZE FOR 8270
ONLY 7/2/02:SAC TELECON DENNIS SUTTON, HE HAS SAMPLE RESULTS AND WANTS SEND THEM TO DEC AND SEE IF HE CAN BACKFILL EXCAVATION, JFO ON VACATION, SAC AGREED TO LOOK AT RESULTS AND JFO SPILL HISTORY NOTES TO SEE IF HE CAN DECIPHER IF ALL REQUIREMENTS ARE MET, SAC TOLD MR. SUTTON THAT IT IS DEC'S POSITION THAT IT IS UP TO THE RP IF THEY WANT TO BACKFILL BUT THAT IF FURTHER WORK IS REQUIRED THEN DEC CAN REQUIRE RE-EXCAVATION OF THE AREA, MR. SUTTON UNDERSTOOD THIS.
7/2/02:SAC RECEIVED AND REVIEWED RESULTS, SAC ALSO REVIEWED JFO'S HISTORY NOTES FOR THE SITE, DATA RECEIVED WAS DIFFICULT TO READ ALONG WITH THE CORRESPONDING SITE DRAWING DEPICTING WHERE SAMPLES WERE TAKEN, ALSO THERE APPEARED TO BE A CONFLICT WITH WHAT WAS PRESENTED IN JFO'S NOTES TO WHAT SAMPLES WERE ANALYZED, SAC DISCUSSED W/PJB, BASED ON THE FAX PJB WANTED A MORE LEGIBLE AND BETTER REPORT ON WHAT WAS DONE ON THE SITE BEFORE ANY COMMENT WOULD BE MADE, SAC CALLED DENNIS SUTTON BACK AND DISCUSSED THESE ITEMS WITH HIM, MR. SUTTON UNDERSTOOD THIS, AGAIN SAC TOLD HIM THAT IT WAS UP TO THE CITY IF THEY WANTED TO BACKFILL THE EXCAVATION AND THAT THEY MAY WANT TO LINE THE AREA WITH PLASTIC TO SEGREGATE THE NATIVE MATERIAL W/THE BACKFILL, MR. SUTTON UNDERSTOOD THIS, HE WILL PROCEED W/THE SITE AS HE DETERMINES HE NEEDS TO AND THEN PRESENT CLEANUP REPORT TO JFO & MARTY DOSTER AND DISCUSS ANY FURTHER REQUIREMENTS WITH THEM.
07/16/02 JFO TELCON WITH DENNIS SUTTON OF THE CITY. HE WILL SEND A COPY OF ALL THE ANALYTICAL AND COPIES OF THE DISPOSAL RECEIPTS. JFO TELCON WITH JOHN BERRY OF PANAMERICAN ENV. HE FAXED COPIES OF THE ANALYTICAL. REC'D RESULTS
FOR: SAMPLE F-1 <1 PPM F-2 <1 PPM F-3N
<1 PPM F-4S 1.8 PPM PCB 1260 F-5 <1 PPM
F-6 260 PPM PCB 1260 SAMPLES T-B & T-W WERE SAMPLED FOR 8021, 8270 AND PCB'S. THE 8021 & 8270 RESULTS ARE BELOW TAGMS, THE PCB'S ARE <1 PPM. THE NORTH WALL WAS A CONCRETE WALL AND THE SOUTH AND EAST WALLS WERE REMOVED. SAMPLES FT-B & FT-W THIS WAS THE ORIGINAL TANK PIT. THE INITIAL RESULTS WERE OK FOR VOC'S BUT SVOC'S WERE HIGH IN THE BOTTOM SAMPLE AND WEST WALL SAMPLE. MORE SOIL WAS REMOVED FROM THE WEST WALL AND THE BOTTOM, IT WAS THEN RESAMPLED FOR 8270. THE RESULTS ARE <TAGMS. 07/17/02 JFO GAVE MLD A COPY OF THE PCB RESULTS. 07/18/02 JFO RECEIVED THE DISPOSAL RECEIPTS

FOR THE PCB CONTAMINATED SOIL. NO FURTHER ACTION REQUIRED BY SPILLS AT THIS TIME. THIS SITE IS INACTIVE CLOSED 09/27/02 JFO REC'D A CLOSURE REPORT FROM DENNIS SUTTON INDICATING PCB CONTAMINATION AT 260 ppm. I INFORMED MARTY DOSTER, HE WILL REVIEW THE REPORT AND WILL HANDLE THIS ISSUE. 11/26/02 JFO AND FG MET WITH MLD.EPA IS THE LEAD AT THIS SITE. MLD HAS A COPY OF THE RESULTS AND KEEPING TRACK OF THE PROGRESS. 12/24/02 JFO REC'D ANALYTICAL RESULTS (8021 & 8270) FROM AN EXCAVATION AT THIS SITE. I NEED THE SIDEWALL RESULTS ALSO. 12/30/02 JFO SPOKE WITHANDY MCLELLAN OF UNYSE. HE WILL SAMPLE THE SIDEWALLS TODAY AND SEND ME THE RESULTS. 01/09/03 JFO REC'D THE RESULTS FROM THE 4 SIDEWALL SAMPLES. THE NORTH AND WEST ARE SLIGHTLY ABOVE TAGMS FOR SVOC'S. THIS SITE WILL STILL BE "INACTIVE". NEEDDISPOSAL RECEIPTS. 01/29/03 DUE TO THE ANALYTICAL RESULTS, ANOTHER SPILL NUMBER WAS ASSIGNED TO THIS SITE. SEE SPILL #0275500. ALSO, THE PHASE II, PHASE III AND PCB INFORMATION SUPPLIED TO ME BY MARTY DOSTER WILL BE FILED WITH THE NEW SPILL. #0275500 END DECRemark - 0275134

Remarks: Start CallerRemark - 0275134 CALLER SAID THAT THEY REMOVED A 550-UST AND THE ANAYTICAL RESULTS ARE ABOVE TAGA. END CallerRemark - 0275134

Other Pertinent Environmental Activity Identified at Site

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ABOUT SAMPLING. HE WILL SAMPLE AND ANALYZE. I WILL MEET HIM ON SITE TUESDAY.
10/12/99: MF SITE INSPECTION, MET RANDY STEGNER, UNYSE 856-2956 X 3 AND
DENNIS YEAGER, MAINLINE CONST, 277 HICKORY ST. 842-0860. CONSTRUCTION COMPANY
SPLIT OPEN THREE ABANDONED DRUMS THAT WERE UNDER DEBRIS WHILE DEMOLISHING
STRUCTOR, ONE DRUM CONTAINED WASTE OIL. THIS AREA TO BE REMEDIATED. RANDY
10/20/99: JFO RECEIVED ANALYTICAL FOR THE WATER IN THE BASEMENT. ETHYLBENEZENE
AT 14 PPB AND XYLENE AT 26 PPB. I SPOKE TO ANDY MCCLELLEN. THEY WILL GET
PERMISSION FROM BSA TO PUMP WATER TO SANITARY SEWER. 11/01/99: JFO SITE
INSPECTION, MET LEN BEROWSKI OF MAINLINE CONTRACTORS. HE WILL DIG
CONTAMINATION TODAY AND PLACE IT ON PLASTIC AND COVER. 12/01/99: JFO
TELECON ROB ZUCHLEWSKI, VP OF MAINLINE CONSTRUCTION. THE SOIL WILL BE DISPOSED
OF AT BFI. I ALSO INFORMED HIM OF OUR NOTIFICATION REQUIREMENTS FOR SPILLS AND
SENT HIM A COPY OF OUR REGULATIONS OUTLINING REPORTING SPILLS.
JFO TELECON FROM RENE ARNO. THE WATER IS BEING PUMPED OUT OF THE BASEMENT TO
THE SANITARY SEWER. JFO TELECON TO ROB ZUCHLEWSKI, THEY HAVE A
PERMIT TO DISPOSE OF WATER TO THE SEWER. THEY WILL FAX ME A COPY. 12/02/99:
JFO RECEIVED A COPY OF THE TEMPORARY DISCHARGE PERMIT FORM THE BUFFALO SEWER
AUTHORITY. 02/08/00: JFO TELCON WITH DENNIS SUTTON. PAUL MIELCAREK FROM
INSPECTIONS AND PERMITS IS HANDLING THIS SPILL FOR THE CITY OF BUFFALO. HIS
PHONE # IS 851-4903. DENNIS WILL CONTACT HIM TODAY FOR AN UPDATE. 02/11/00:
JFO TELCON WITH PAUL MIELCAREK. AS FAR AS HE KNOWS THE SOIL IS STILL ON SITE.
HE WILL CHECK TODAY AND CALL ME BACK MONDAY THE 14TH. 06/16/00: JFO TELECON
TO PAUL MIELCAREK. HE THOUGHT THE SOIL WAS DISPOSED. HE WILL CHECK WITH LARRY
SCHIVONE (HIS INSPECTOR) ON MONDAY TO SEE IF THE SOIL WAS DISPOSED. HE WILL
CALL ME BACK. 06/23/00: JFO RECEIVED DISPOSAL RECEIPTS. NO FURTHER ACTION
REQUIRED. CLOSED END DECRemark - 9908360

DEC Memo:

Start DECRemark - 9975514 Prior to Sept, 2004 data translation this spill Lead
DEC Field was "MJS" 11/12/99: MJS TELECON WITH MIKE MUGAS AND TOOK INFORMATION.
THE SITE OF THE NEW HOUSING IS FORMER INDUSTRIAL PROPERTY. CITY OF BUFFALO NOW
BUILDING NEW HOUSES AND FOUND A 1500 GALLON TANK. CONTAMINATED SOIL REMOVED AND
SAMPLES TAKEN. SAMPLES INDICATE CONTAMINATION REMAINS. THEY WILL EXCAVATE
ADDITIONAL SOILS NEXT WEEK. 11/12/99: MJS RECEIVED FAX OF SAMPLE RESULTS,
HIGHEST IS 3080 PPB 1,2,4-TRIMETHYLBENZENE. APPROX 14 PPM TOTAL VOC'S (DIRECT
METHOD). 11/17/99: MJS SITE INSPECTION, MET WITH MIKE MUGAS AND MIKE
STEFFAN. THEY HAVE REMOVED THREE ADDITIONAL TRUCKLOADS OF SOIL AND WILL NEED TO
REMOVE ONE ADDITIONAL LOAD OF SOIL FROM WALL CLOSEST TO SENECA STREET. MJS
ADVISED THEM TO OBTAIN SEPARATE COMPOSITE SAMPLES FROM BOTTOM AND FROM
SIDEWALLS AND ANALYZE VIA TCLP. 11/17/99: MJS SECOND SITE INSPECTION, MET
WITH MIKE MUGAS. ADDITIONAL LOAD REMOVED FROM WALL BY SENECA ST AND HE
HAS OBTAINED CONFIRMATORY SAMPLES. RESULTS WILL BE DUE ON MONDAY 11/22. 11/
/99: MJS TELECON WITH MIKE STEFFAN. SECOND ROUND OF SAMPLES STILL INDICATE
LOW-LEVEL CONTAMINATION. THEY WILL REMOVE ADDITIONAL SOIL AGAIN AND SAMPLE FOR
THIRD TIME. CITY OF BUFFALO NEEDS CLEAN CLOSURE (HOUSING DEVELOPMENT).
11/22/99: MJS RECEIVED FAX OF SECOND ROUND OF SAMPLING. BOTTOM SAMPLE HAS
LOW-LEVEL HITS - HIGHEST IS 5.6 PPB (TCLP) N-BUTYLBENZENE. SIDEWALLS - ONLY
HIT IS 7.3 PPB (TCLP) 1,2,4-TRIMETHYLBENZENE 12/01/99: MJS TELECON FROM MIKE
STEFFAN. ADDITIONAL SOIL REMOVED AND HE HAS RECEIVED RESULTS FROM THIRD ROUND
SAMPLE AND THEY MEET STARS #1 STANDARDS. MJS ADVISED HIM WE NEED FINAL RESULTS
AND DISPOSAL DOCUMENTATION TO ISSUE CLOSURE LETTER. 12/01/99: MJS RECEIVED
FAX OF SAMPLE RESULTS AND CONFIRMED THAT TCLP RESULTS ARE BELOW GROUNDWATER
STANDARDS. 12/21/99: MJS TELECON WITH MIKE STEFFAN. HE IS PREPARING REPORT
AND WILL FORWARD WHEN COMPLETE. 01/03/00: MJS TELECON WITH MIKE STEFFAN.
REPORT FORTHCOMING. 01/14/00: MJS RECEIVED CLOSURE REPORT FROM ECOLOGY &
ENVIRONMENT ON 1/13. MJS REVIEWED REPORT, THIRD ROUND OF CONFIRMATORY SAMPLES

FINDS:

Other Pertinent Environmental Activity Identified at Site

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large
databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large
databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

AT FAULT, JOB GOING OUT FOR BID, WILL NOTIFY ME WHEN EXCAVATION TO BEGIN.
07/19/90: CAFSENT LETTER FOR UPDATE ON STATUS. 09/11/90: JDC SITE
INSPECTION, FOUND OIL SEEPING FROM STAIR WELL. CONTACTED CITY ENGINEERS AND BSA
TO INSPECT. OIL TO BE TESTED FOR TYPE, LINES TO BE RETESTED ON DIESEL. PADS
APPLIED TO SPILLAGE BY BSA. 09/13/90: JDC TELECON WITH MR MCDOUGH, CITY OF
BUFFALO ENGINEERING, DECIDED TO PLACE MONITORING WELLS TO IDENTIFY SOURCE.
TESTING TO BE PUT ON HOLD. 09/19/90: JDC SITE MEETING WITH CITY AND SLC
(CONTRACTOR), LOCATED WELLS (4) FOR DRILLING. WILL USE WELLS TO LOCATE FUEL
SOURCE AND SECONDARY CONTAINMENT FOR TANKS ONCE OUR INVESTIGATION IS COMPLETED.
12/07/90: MJH SITE INSPECTION, WELLS NOT PROPERLY INSTALLED PRODUCT STILL
SEEPING INTO STAIRWAY, GROUNDWATER CONTOURS TO BE DETERMINED. 12/11/90: MJH
SENT LETTER REQUESTING STATUS UPDATE 12/10/90. 06/12/91: JDC TELECON MR.
MCDONNELL AND REQUESTED STATUS. 06/13/91: JDC SITE INSPECTION, BAILED WELLS
AND FOUND NO CONTAMINATION OR SHEEN. WAITING FOR STATUS REPORT FROM CITY.
09/10/91: JDC NOTE TO FILE, WAITING ON LETTER FROM CITY REGARDING REMEDIAL
ACTION. 10/10/91: JDC TELECON TO MR. LINDSAY, CITY OF BUFFALO, HE WILL BE
CONTRACTING WITH AN ENVIRONMETAL FIRM TO COMPLETE WELL WORK. 07/13/92: JDC
TELECON TO MR. LINDSEY AND REQUESTED STATUS. HE SAID SLC HAS DONE SOME RECENT
WORK IN REPLACING LEAKING FUEL LINES. 11/04/93: JDC SENT LETTER TO MR.
LINDSAY REQUESTING THAT WELL SAMPLES BE TAKEN AND ANALYZED FOR 8021 AND
SUBMISSION OF BORING LOGS. 05/13/94: JDC SENT LETTER REQUESTING SAMPLING.
RESPONSE DATE 6/13/94. 06/15/94: JDC FAXED CLEANUP CORRESPONDANCE TO MR
LINDSAY'S REPLACEMENT, BOB O'HARA, REQUESTING GW SAMPLING. 07/22/94: JDC
TELECON MR. O'HARA, WORK BEING BID OUT, WAITING FOR RESPONSES. REQUESTED
WRITTEN NOTIFICATION WHEN WORK WILL BEGIN. 08/11/94: JDC TELECON FROM PAUL
MC DONALD, HE SAID WELLS WILL BE SAMPLED ON TUESDAY 8/16/94. 06/16/95: JDC
NOTE TO FILE, HAVE NOT RECEIVED ANY SAMPLE RESULTS, WILL SEND LETTER REQUESTING
STATUS. 03/02/95: JDC SENT LETTER TO MR. O'HARA AND REQUESTED RETEST OF
TANK AND MW3 RESAMPLE UNDER 8021. 11/13/95: JDC SENT STATUS REQUEST LETTER
WITH LEGAL ACTION. 11/27/95: JDC RECEIVED LETTER REQUESTING RESPONSE DATES
BE EXTENDED. JDC SENT LETTER GIVING EXTENSION UNTIL 1/19/95. 12/20/95: JDC
TELECON WITH MR. O'HARA, HE WILL BE SENDING OUT STATUS LETTER. RECENTLY LOST
PAUL MCDONALD TO BOARD OF EDUCATION, WILL BE ASSIGNING NEW PERSON TO REVIEW AND
ACT ON CASE. 01/03/96: JDC REVIEWED SITE INVESTIGATION PROPOSAL FROM
MR. O'HARA, ANTICIPATES A CONTRACTOR TO BEGIN WORK IN 4/96 AFTER NEW ENGINEER
IS ASSIGNED AND BID IS ACCEPTED. 07/22/99: MF ASSUMES SITE RESPONSIBILITY AS
JDC NO LONGER WORKS FOR DEPARTMENT 07/22/99: MF TELECON TO BOB O'HARA, HE
CLAIMED CITY HIRED TYREE AS CONTRACTOR, R & D HIRED AS CONSULTANT FOR TANK
INSTALLATION. 10/20/99: MF TELECON BOB O'HARA, HE SAID R & D ON SITE DOING
PRILIMARY WORK. MF TELECON TO PETER MERLOW, R & D 856-2142. HE WILL
CALL WHEN DOING THE REMOVAL, SHOULD BE BEFORE DECEMBER. ED PORTER WILL BE MAIN
FIELD CONTACT. 12/06/99: MF TELECON BOB O'HARA OR PETER MERLOW, BOTH NOT IN.
TO RETURN CALL. 01/03/00: MF TELECON TO PETER MERLOW, NOT IN, TO RETURN
CALL. 01/03/00: MF TELECON TO ROBERT O'HARA, HE SAID PETER KNOWS ABOUT
REMOVAL. 01/05/00: MF TELECON PETER MERLOW, NOT IN, TO RETURN CALL.
01/10/00: MF TELECON PETER MERLOW, FOUR TANKS INCLUDING A 10K GASOLINE, 2K
POSSIBLE GASOLINE, 8K DIESEL & 8K FUEL OIL. REMOVAL EXPECTED TO START 1/24/00.
HE WILL NOTIFY ME WHEN DATE IS FIRMED. THE 10K GASOLINE FAILED TT, ALL TANKS
TESTED PRIOR TO REMOVAL. 01/26/00: MF FOR FG, JIM BISHOP OF TYREE SAID
UST'S WILL BE REMOVED 1/31/00. 01/31/00: MF SITE INSPECTION, NO ACTIVITY.
01/31/00: MF TELECON GARY ELLINGTON, CLAIMED PROBLEM WITH FUEL STILL IN THE
TANK. EXPECTS WORK TO START THIS WEEK. WILL CALL ME. 02/09/00: MF SITE
INSPECTION, NO ONE ON SITE. HUGE EXCAVATION, SHEEN ON GW AT APPX 12'.
02/10/00: MF SITE INSPECTION, MET GARY ELLINGTON OF TYREE, PETER MARLOW & ED,
R&D ENGINEERING. SO FAR THEY REMOVED A 10K GASOLINE TANK, A 6 OR 8K DIESEL FULL
OF SLURRY. TWO 500 GALLON ABANDONED AND A 300 GALLON ABANDONED TANK. THEY
HAVELEFT A 8K DIESEL & A 8K FUEL OIL TANK TO BE REMOVED. EXPLAINED SAMPLING TO

JDC SITE INSPECTION, BAILED WELLS AND FOUND NO CONTAMINATION OR SHEEN. WAITING FOR STATUS REPORT FROM CITY. 09/10/91: JDC NOTE TO FILE, WAITING ON LETTER FROM CITY REGARDING REMEDIAL ACTION. 10/10/91: JDC TELECON TO MR. LINDSAY, CITY OF BUFFALO, HE WILL BE CONTRACTING WITH AN ENVIRONMETAL FIRM TO COMPLETE WELL WORK. 07/13/92: JDC TELECON TO MR. LINDSEY AND REQUESTED STATUS. HE SAID SLC HAS DONE SOME RECENT WORK IN REPLACING LEAKING FUEL LINES. 11/04/93: JDC SENT LETTER TO MR. LINDSAY REQUESTING THAT WELL SAMPLES BE TAKEN AND ANALYZED FOR 8021 AND SUBMISSION OF BORING LOGS. 05/13/94: JDC SENT LETTER REQUESTING SAMPLING. RESPONSE DATE 6/13/94. 06/15/94: JDC FAXED CLEANUP CORRESPONDANCE TO MR LINDSAY S REPLACEMENT, BOB O HARA, REQUESTINGGW SAMPLING. 07/22/94: JDC TELECON MR. O HARA, WORK BEING BID OUT, WAITING FOR RESPONSES. REQUESTED WRITTEN NOTIFICATION WHEN WORK WILL BEGIN. 08/11/94: JDC TELECON FROM PAUL MC DONALD, HE SAID WELLS WILL BE SAMPLED ON TUESDAY 8/16/94. 06/16/95: JDCNOTE TO FILE, HAVE NOT RECEIVED ANY SAMPLE RESULTS, WILL SEND LETTER REQUESTING STATUS. 03/02/95: JDC SENT LETTER TO MR. O HARA AND REQUESTED RETEST OF TANK AND MW3 RESAMPLE UNDER 8021. 11/13/95: JDC SENT STATUS REQUEST LETTER WITH LEGAL ACTION. 11/27/95: JDC RECEIVED LETTER REQUESTING RESPONSE DATES BE EXTENDED. JDC SENT LETTER GIVING EXTENSION UNTIL 1/19/95. 12/20/95: JDC TELECON WITH MR. O HARA, HE WILL BE SENDING OUT STATUS LETTER. RECENTLY LOST PAUL MCDONALD TO BOARD OF EDUCATION, WILL BEASSIGNING NEW PERSON TO REVIEW AND ACT ON CASE. 01/03/96: JDC REVIEWED SITE INVESTIGATION PROPOSAL FROM MR. O HARA, ANTICIPATES A CONTRACTOR TO BEGIN WORK IN 4/96 AFTER NEW ENGINEER IS ASSIGNED AND BID IS ACCEPTED. 07/22/99: MF ASSUMES SITE RESPONSIBILITY AS JDC NO LONGER WORKS FOR DEPARTMENT 07/22/99: MF TELECON TO BOB O HARA, HE CLAIMED CITY HIRED TYREE AS CONTRACTOR, R D HIRED AS CONSULTANT FOR TANK INSTALLATION. 10/20/99: MF TELECON BOB O HARA, HE SAID R D ON SITE DOING PRILIMARY WORK. MFTELECON TO PETER MERLOW, R D 856-2142. HE WILL CALL WHEN DOING THE REMOVAL, SHOULD BE BEFORE DECEMBER. ED PORTER WILL BE MAIN FIELD CONTACT. 12/06/99: MF TELECON BOB O HARA OR PETER MERLOW, BOTH NOT IN. TO RETURN CALL. 01/03/00: MF TELECON TO PETERMERLOW, NOT IN, TO RETURN CALL. 01/03/00: MF TELECON TO ROBERT O HARA, HE SAID PETER KNOWS ABOUT REMOVAL. 01/05/00: MF TELECON PETER MERLOW, NOT IN, TO RETURN CALL. 01/10/00: MF TELECON PETER MERLOW, FOUR TANKS INCLUDING A 10K GASOLINE, 2K POSSIBLEGASOLINE, 8K DIESEL 8K FUEL OIL. REMOVAL EXPECTED TO START 1/24/00. HE WILL NOTIFY ME WHEN DATE IS FIRMED. THE 10K GASOLINE FAILED TT, ALL TANKS TESTED PRIOR TO REMOVAL. 01/26/00: MF FOR FG, JIM BISHOP OF TYREE SAID UST S WILL BE REMOVED 1/31/00. 01/31/00: MF SITE INSPECTION, NO ACTIVITY. 01/31/00: MF TELECON GARY ELLINGTON, CLAIMED PROBLEM WITH FUEL STILL IN THE TANK. EXPECTS WORK TO START THIS WEEK. WILL CALL ME. 02/09/00: MF SITE INSPECTION, NO ONE ON SITE. HUGE EXCAVATION, SHEEN ON GW AT APPX 12 . 02/10/00: MF SITE INSPECTION, MET GARY ELLINGTON OF TYREE, PETER MARLOW ED, R D ENGINEERING. SO FAR THEY REMOVED A 10K GASOLINE TANK, A 6 OR 8K DIESEL FULL OF SLURRY. TWO 500 GALLON ABANDONED AND A 300 GALLON ABANDONED TANK. THEY HAVE LEFTA 8K DIESEL A 8K FUEL OIL TANK TO BE REMOVED. EXPLAINED SAMPLING TO GARY, 8021 8270 BN S. ON SOIL WATER. LOT OF CONTAMINATED SOIL. OLD GASOLINE ODOR. SOIL MOSTLY CLAY. CONTAMINATION AROUND BUILDING, IN THE AREA OF THE REMOVED ISLANDS. EXPLAINED SOILREMOVAL ONLY REMEDIATION OPTION DUE TO CLAY SOILS. BED ROCK AT 12 . 03/27/00: MF SENT 1ST SAMPLING DISPOSAL LETTER, DUE 4/15/00. 05/01/00: MF ELECON TO PETE MARLOW, TOLD HIM I HAVN T RECEIVED ANYTHING AS YET. HE WILL HAVE INFO FOWARDED TO ME. 05/09/00: MF RECEIVED 4/00 REPORT. INCLUDED SOIL DISPOSAL RECEIPTS >6000 TONS , EXCAVATION SAMPLE RESULTS. SAMPLING AREAS PG-3, PG-4 VERY HIGH 8021 DIRECT PG-5 VERY HIGH 8270 BN S, DIRECT. AREAS PG-4 PG-5 ARE AGAINST THE BUILDING, NO FURTHER EXCAVATION CAN BE DONE IN THIS AREA. PG-3 WAS TAKEN AT 4 IN THE BOTTOM OF THE EXCAVATION. A TOTAL OF 10 SAMPLES WERE TAKEN. TYREE RECOMMENDS A LIMITED SUBSURFACE INVESTIGATION TO DETERMINE THE IMPACT TO GW QUALITY. 05/10/00: MF SENT LETTER TO RP ADDITIONAL REMEDIATION NECESSARY. PLAN BY 7/15/00. 05/16/00: MF TELECON PETER MARLOW, THEY WILL RESAMPLE FOR TCLP IN PG-3, 4 5. HE WILL CALL WHEN HE HAS A FIRM DATE FOR

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large
databases of environmental information in this integrated system.

FIS (New York - Facility Information System) is New York's Department
of Environmental Conservation (DEC) information system for tracking
environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Field was "FG" 01/04/00: FG SITE INSPECTION. UST REMOVED AND EXCAVATION
BACKFILLED. 10 DRUMS STAGED ON SITE, CONTENTS - SOME PRODUCT TO BE REUSED AND
SOME TANK BOTTOMS. UST HAD ALREADY BEEN MOVED OFF SITE FOR DISPOSAL.
01/05/00: FG SITE INSPECTION. DIGGING OUT UST EXCAVATION. CONTAMINATION
PRESENT. SOIL IS BEING LOADED DIRECTLY INTO TRUCKS GOING TO THE LANDFILL.
WORK IS TO CONTINUE ALL DAY. NEW UST ISSCHEDULED TO BE INSTALLED TOMORROW.
EXCAVATION SAMPLES TO BE COLLECTED. 01/05/00: FG RECEIVED REPORT OF TANK
TEST FAILURE NOTED IN SPILL 9910197 WHICH HAS BEEN CLOSED. ALL FURTHER ACTION
REFERRED TO THIS SPILL 9910703. 04/10/00: FG RECEIVEDTYREE'S CLOSURE REPORT
FOR THIS SITE. SOIL DISPOSAL RECEIPTS ARE INCLUDED BUT TANK BOTTOM DRUM
DISPOSAL RECEIPTS WERE NOT INCLUDED. ANALYTICAL FROM THE EXCAVATION SAMPLES
WAS INCLUDED. SVOC'S TOTAL VALUES (PPB) WHICH EXCEED STARS - NORTH SIDEWALL:
11,977PPB, SOUTH SIDEWALL: 1593 PPB, EAST SIDEWALL: 2201 PPB. FURTHER WORK
IS REQUIRED. FG SENT LETTER TO THE CITY OF BUFFALO REQUIRING ADDITIONAL WORK.
07/31/00: FG NOTE TO FILE, TYREE COMPLETED ADDITIONAL SAMPLING AT THE SITE.
THEY DIDA SOIL BORING ALONG THE NORTH SIDEWALL. THE RESULTS ARE NON DETECT FOR
THE 8270 STARS ANALYTES. THEY DID NOT DO ANY SAMPLING ALONG THE EAST OR SOUTH
SIDEWALLS BECAUSE THE VALUES WERE LOW ENOUGH FOR INACTIVE STATUS. NO FURTHER
WORK, THE SITE CAN BE MADE INACTIVE. 08/14/00: FG NOTE TO FILE, TANK BOTTOM
DISPOSAL RECEIPTS WERE REQUESTED IN THE 4/13/00 LETTER BUT DO NOT NEED TO BE
SUBMITTED AS WE DO NOT REQUIRE DOCUMENTATION IN THE SPILL FILE FOR THIS
DISPOSAL. END DECRemark - 9910703

9910703. 04/10/00: FG RECEIVED TYREE S CLOSURE REPORT FOR THIS SITE. SOIL DISPOSAL RECEIPTS ARE INCLUDED BUT TANK BOTTOM DRUM DISPOSAL RECEIPTS WERE NOT INCLUDED. ANALYTICAL FROM THE EXCAVATION SAMPLES WAS INCLUDED. SVOC S TOTAL VALUES PPB) WHICH EXCEED STARS - NORTH SIDEWALL: 11,977PPB, SOUTH SIDEWALL: 1593 PPB, EAST SIDEWALL: 2201 PPB. FURTHER WORK IS REQUIRED. FGSENT LETTER TO THE CITY OF BUFFALO REQUIRING ADDITIONAL WORK. 07/31/00: FG NOTE TO FILE, TYREE COMPLETED ADDITIONAL SAMPLING AT THE SITE. THEY DID A SOIL BORING ALONG THE NORTH SIDEWALL. THE RESULTS ARE NON DETECT FOR THE 8270 STARS ANALYTES.THEY DID NOT DO ANY SAMPLING ALONG THE EAST OR SOUTH SIDEWALLS BECAUSE THE VALUES WERE LOW ENOUGH FOR INACTIVE STATUS. NO FURTHER WORK, THE SITE CAN BE MADE INACTIVE. 08/14/00: FG NOTE TO FILE, TANK BOTTOM DISPOSAL RECEIPTS WERE REQUESTED IN THE4/13/00 LETTER BUT DO NOT NEED TO BE SUBMITTED AS WE DO NOT REQUIRE DOCUMENTATION IN THE SPILL FILE FOR THIS DISPOSAL.

Remark: WHILE REMOVING UST, FOUND CONTAMINATED SOIL AND LIQUID PRODUCT -- SAMPLE TAKEN -- CLEAN UP PENDING RESULTS.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/18/2007	Source: EPA
Date Data Arrived at EDR: 08/03/2007	Telephone: N/A
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 07/31/2007
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/29/2007
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/20/2007	Source: EPA
Date Data Arrived at EDR: 05/03/2007	Telephone: N/A
Date Made Active in Reports: 07/05/2007	Last EDR Contact: 08/31/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 10/29/2007
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Data Arrived at EDR: 02/02/1994

Date Made Active in Reports: 03/30/1994

Number of Days to Update: 56

Source: EPA

Telephone: 202-564-4267

Next Scheduled EDR Contact: 11/19/2007

Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Last EDR Contact: 09/19/2007

Next Scheduled EDR Contact: 12/17/2007

Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: (212) 637-3660

	Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 06/20/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/09/2007	Telephone: 202-566-2777

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 06/08/2007	Source: EPA
Date Data Arrived at EDR: 07/03/2007	Telephone: 703-416-0223
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 07/02/2007
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/01/2007
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 12/31/2005

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005	Source: EPA

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Next Scheduled EDR Contact: 10/29/2007
Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 03/08/2007

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Devonian
Series: Middle Devonian
Code: D2 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

USER QUESTIONNAIRE

GZA MODIFIED USER QUESTIONNAIRE

Site Name: Seneca and Myrtle Properties: 500 Seneca, 332 Myrtle, 322 Myrtle, 27 Spring and 29 Spring Street, Buffalo, New York

Title and Signature of Person Completing Questionnaire

Date: _____

The following are a series of questions from ASTM 1527-05 that must be answered in order to qualify for Landowner Liability Protection under CERCLA. Please provide an answer to each question or attach pertinent information.

- (1) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

? No ? Yes (Describe or attach information) Attachment No. _____

- (2) Are you aware of any Activity and Use Limitations (AULs), such as engineering controls (e.g. engineered caps, foundations, liners, treatment methods, etc. in use to prevent contamination from migrating to surrounding areas), land use restrictions or institutional controls (e.g. administrative measures restricting groundwater use, construction, or property use) that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

? No ? Yes (Describe or attach information) Attachment No. _____

- (3) Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you

would have specialized knowledge of the chemicals and processes used by this type of business?

? No ? Yes (Describe or attach information) Attachment No. _____

- (4) Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

? No ? Yes (Describe or attach information) Attachment No. _____

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

? No ? Yes (Describe or attach information) Attachment No. _____

- (5) Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User,

- (a) Do you know the past uses of the property?

? No ? Yes (Describe or attach information) Attachment No. _____

- (b) Do you know of specific chemicals that are present or once were present at the property? ? No ? Yes (Describe or attach information) Attachment No. _____
-

- (c) Do you know of spills or other chemical releases that have taken place at the property? ? No ? Yes (Describe or attach information) Attachment No. _____
-

(d) Do you know of any environmental cleanups that have taken place at the property?

? No ? Yes (Describe or attach information) Attachment No. _____

(6) As the User of the ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

? No ? Yes (Describe or attach information) Attachment No. _____

(7) ASTM identifies certain documents as “Helpful Documents” for the understanding of environmental conditions at the Site. Are you aware of any of the following documents; and if so, can they be made available?

? No ? Yes (Describe or attach information) Attachment No. _____

? Prior Environmental Assessments	? Risk Assessments
? Compliance Reports	? Hazardous Waste Generation Notices
? Environmental Permits	? Notices from Environmental Agencies
? Tank Registrations	? Underground Injection System Registrations
? Material Safety Data Sheets (MSDS)	? Community Right to Know Plans
? Safety or Spill Protection Plans	? Hydrogeologic or Geotechnical Reports

(8) Do you know who the past owners of the property are and can you provide contact information?

? No ? Yes (Describe or attach information) Attachment No. _____

(9) Do you have a complete site plan of the property that shows property boundaries and can you make it available?

? No ? Yes (Describe or attach information) Attachment No. _____

APPENDIX F

QUALIFICATIONS

Jennifer Davide
Environmental Scientist

Education

B.S., 2005, Social Sciences –
Environmental Studies, State
University of New York at
Buffalo

Areas of Specialization

- Environmental Site Assessments
- Geotechnical Laboratory Testing

Experience:

Years with GZA: 1
Years with other firms: 0.5

Summary of Experience

Ms. Davide has been involved in a variety of environmental projects as an environmental scientist. Ms. Davide's range of responsibilities has included Phase I environmental site assessments, Phase II environmental site assessments, geotechnical laboratory testing, and groundwater and soil sampling. She has conducted Environmental Site Assessments (Phase I and Phase II) on residential, commercial and industrial properties. Recent relevant work experience includes the following.

Relevant Project Experience

Multi-Site Commercial Drug Store Facilities, Western New York Area.

Conducted work to complete Phase I Environmental Site Assessments at 25 drug store facilities. Work was completed on a fast-track with reports completed within three weeks. Historic environmental concerns, including former dry cleaner and gasoline station usage, was identified at eleven of 25 properties. GZA completed fast track Phase II investigations on the eleven properties that included subsurface investigation, soil and groundwater sample collection and analysis and report preparation. Phase II investigations were completed within required fast track time frame designated by Client. Reports were issued to client and lender to proceed with resale transaction.

Former Bowling Lanes, Tonawanda, New York - Completed Phase I environmental site assessment at 15,000 square foot vacant facility. Historical research identified the former occupant as a bowling alley and automotive sale and service facility. Identified concerns included former usage, potential historic tanks and mold. Recommended additional investigation to include soil and groundwater sampling. Work included site reconnaissance, historical review, and report preparation.

Retail Facility, North Tonawanda, New York - Conducted a Phase I environmental site assessment at a cabinet distribution facility. Identified former occupant as an industrial motor repair facility and railroad tracks. Recommended additional investigation to evaluate historic occupants. Work included site reconnaissance, historical review, and report preparation.

Industrial Complex, Fredonia, New York – Conducted a Phase II environmental site assessment at a metal fabrication facility. Completed soil and groundwater collection and analysis, as well as a sump sample. Work included soil probe oversight, collection of sample, data review and interpretation, and report preparation.

Vacant Properties, Buffalo, New York – Conducted a Phase I environmental site assessment at five contiguous properties occupied by three vacant buildings. Historic building occupants included repair facility, retail stores and welding shop. However, buildings occupied entire property area and connected to municipal sanitary sewer. No additional work was recommended. Work included site reconnaissance, historical review and report preparation.

Michele M. Wittman
Senior Project Manager

Education

B.A., 1994, Geology, State
University of New York at
Buffalo

B.S., 1994, Social Sciences –
Environmental Studies, State
University of New York at
Buffalo

Professional Registrations

2002, Professional Geologist,
Washington, #29940

Areas of Specialization

- Remedial Investigations /
Feasibility Studies
- Environmental Site
Assessments
- Geologic Evaluations
- Hydrogeologic
Investigations
- Soil Testing

Summary of Experience

Ms. Wittman has 15 years of professional experience in conducting a variety of environmental projects for both private and public clients. Clients have included industry, governmental agencies, developers, legal firms, financial institutions, and engineering firms. Project work has included conducting and managing Phase I and Phase II Environmental Site Assessments throughout New York and surrounding states, regulatory compliance, hydrogeologic investigations, and remediation of soil and groundwater. Responsibilities as project manager include supervising field and technical activities, training staff, data analysis, report preparation, and client contact.

Ms. Wittman also worked one year (from 2000 to 2001) at an international financial institution as an Assistant Vice President and Environmental Risk Analysis Officer. During her tenure at this position, Ms. Wittman was responsible for evaluating potential environmental risk associated with a property and potential recourse to the bank. Ms. Wittman reviewed hundreds of Phase I and Phase II Environmental Site Assessments completed throughout the country for completeness and potential risks. Additionally, Ms. Wittman provided remedial costs estimates to evaluate the potential risk and future losses. Relevant work experience at GZA is summarized in the following project descriptions.

Relevant Project Experience

Voluntary Cleanup Program - Commercial Facility, Hamburg, New York. Completed a Phase I environmental site assessment at retail facility constructed in the early 1950s. Identified historical dry cleaner usage in one unit from mid 1950s to late 1990s. Conducted a Phase II environmental assessment in the rear of the facility, as well as inside the former dry cleaner unit. Identified tetrachloroethene in various soil sample located beneath the building floor slab and behind the building (i.e. back door). Concentrations behind the building were above regulatory standards. Additional investigation was completed to identify potential source under building and extent of contamination. No source was identified below the building slab, but confirmed to be outside the building. Collected shallow and deep water samples, which identified shallow groundwater contamination, but confirmed clay confining layer. Interim remedial measures (IRM) included soil removal, resulting in approximately 200 tons of soil that was disposed at a hazardous waste landfill. Confirmatory soil sampled identified the vertical and north-south extent of contamination in the alley. However, significant amounts of contamination remained on the sidewalls limited by building foundations. A soil vapor intrusion study was done. Vapor analysis identified the presence of compounds of concern at concentrations above draft guidance values under the floor slab and below draft guidance values above the floor slab (within the working area). To achieve site closure, GZA negotiated a remedial solution that included confirmation sampling of soils around the building structure to confirm the limited presence of chlorinated solvents, installation of a sub-slab depressurization/vent system and re-sampling of indoor air. This additional work did not identify the presence of compounds of concern above regulatory guidance limits.

Experience:

Years with GZA: 11
Years with other firms: 5

Professional Affiliations:

New York State Council of
Professional Geologists
Buffalo Association of
Professional Geologists
Air and Waste Management
Association of Western New
York

Contract to Closure, Remedial Activities, Commercial Facility, Rochester, New York – Former gasoline stations were located at two adjoining properties from the early 1950s through 1990s. Soil and groundwater contamination was identified at both properties. The site owner signed a Stipulation Agreement with NYSDEC to remediate the Site, but had taken no action to remediate. Our client wanted to develop the Site for commercial use as a credit union/banking facility. GZA performed soil and groundwater sampling investigations, demolished Site buildings, prepared a NYSDEC approved work plan to remediate the soil and groundwater, removed soil impacted with free product, and performed in-situ chemical oxidation injections to remediate Site groundwater in order to achieve NYSDEC inactive status. GZA prepared the Closure Report to summarize Site activities, which is currently being reviewed by NYSDEC. In order to obtain an inactive status, GZA completed a Qualitative Risk Assessment at the Site, which determined there would be no risk to future construction workers or commercial employees.

Phase II and Brownfield, Former Steel Plant, Site, Pittsburgh, Pennsylvania. Conducted field investigation on an 85-acre former steel plant. Study included the installation of deep monitoring wells, performing 31 shallow soil probes, and analysis of soil and groundwater samples for volatile organic compounds (VOCs), metals, and PCBs. Results indicated several areas of existing contamination including possible PCB oil contamination.

Vacant Building, Lancaster, New York Conducted a Phase I environmental site assessment at vacant warehouse building. Identified potential fill port and vent pipe for suspect tank under building slab during site reconnaissance. Historical review identified potential second tank within parking area of property. Completed Phase II investigation including geophysical survey and soil probes. Identified potential geophysical anomaly in area of exterior UST. Supervised removal of one interior tank and one exterior tank and collected confirmatory soil samples for analysis. Completed report summarizing tank removal and submitted to state regulatory agency to receive inactive status on open spill. No additional work was required by regulatory authority and property transaction was completed.

Residential Facility, Not-for-Profit Organization, Amherst, New York Completed Phase I environmental site assessment at approximate 9 acre facility with five buildings, including residential quarters, maintenance building and garage. Identified two former fuel oil underground storage tanks, one former fuel oil aboveground tank located on a dirt floor in the basement, and one suspect underground tank near maintenance building. Completed Phase II investigation in area of former tanks and identified contamination near suspect tank at maintenance building. Provided remedial cost estimate to remove tank and contaminated soil. Client put remediation out to bid and contractor underbid our estimate. Client indicated that after removal of tank and impacted soil, our estimate was very close to the project ending cost.

Multi-Site Gas Station Facilities, Western New York Area. Managed and completed limited Phase I Environmental Site Assessments on 88 gas station facilities work included file review and historical review. Each site and condition were categorized. Estimated remedial cost and escrow amounts were determined.

Ernest R. Hanna, PE

Principal

Education

B.S., 1979, Biology/Geology,
University of Rochester

M.S., 1986, Civil and Environmental
Engineering, University of Wisconsin-
Madison

Professional Registrations

1989, PE, NY, #065440

Areas of Specialization

- Environmental Engineering
- Geotechnical Engineering
- Geosynthetics
- Trenchless Technology

Summary of Experience

Mr. Hanna has been responsible for data review, site investigation, engineering design, report preparation and construction monitoring/administration for numerous environmental and geotechnical projects that involve site development, building foundations, bridge abutments, dams, slopes and tunnels. He has incorporated the use of trenchless technology and geosynthetics whenever possible in his projects. As an Associate in Charge and Operations Manager of the Buffalo office, Mr. Hanna is responsible for contracting, scheduling, field supervision, design oversight, report preparation and review, and client contact. An example of selected local projects follows.

Project Experience

Environmental Restoration Project, Batavia Iron & Metal, City of Batavia, New York. The City of Batavia obtained authority to access 6.8 acres of vacant industrial property formerly owned by the Batavia Iron and Metal Co. (Site), which previously used to reclaim iron, metal and wire materials for sale to recycling and manufacturing firms. The Site has been vacant since 2000. Various waste debris (including concrete block, scrap metal, wood, tires, propane tanks, steel drums, rubbish, etc.) is present over a large portion of the Site. To date, GZA has prepared required work plans approved by NYSDEC and completed various field activities including test pits, surface soil and surface water sample collection, soil probes, monitoring well installation, and groundwater sampling. An Interim Remedial Measure (IRM) was also done at the Site to consolidate and secure PCB impacted soil for future off-Site disposal. Responsible for overall management and review of work being done by GZA under NYSDEC ERP Program.

Environmental Restoration Project, Broome County Brownfield Cleanup, 312 Maple Road, Endicott, New York. Retained by the Broome County Environmental Management Council to assist them in assessing this contaminated site, formerly operated as a chemical processing facility. Performed an initial Phase I and Phase II Environmental Site Assessment. Assisted Broome County in its application through the Voluntary Clean-up Program (VCP); however, the County has now received a ERP grant through the newly regulated Brownfield Clean-up Program. Project tasks include development and implementation of a NYSDEC approved work plans in accordance with DER-10. Field activities includes an IRM consisting of excavation and disposal of an estimated 400 tons of chlorinated solvent contaminated soil and completion of a vapor intrusion assessment of the facility and surrounding properties in accordance with NYSDEC and NYSDOH requirements. Responsible for overall management and review of work being done by GZA under NYSDEC ERP Program.

Voluntary Cleanup Program at 5 Buffalo Street, Hamburg, New York. Our Phase I environmental site assessment identified historical dry cleaner usage. The subsequent Phase II environmental assessment identified tetrachloroethene in various soil samples located beneath the building floor slab and behind the building. Initiated discussions with NYSDEC to enter the voluntary clean-up program (VCP) and prepared an application and work plan. Remedial activities were recommended, waste characterization sampling and analysis performed. Remedial actions completed in March

2004 included soil vapor assessment and remediation.

GZA Program Manager, NYSDEC Superfund Standby Contract.

Responsible for overall management and review of work being done by GZA under its Superfund Standby Contract with NYSDEC. Work completed consists of preliminary site assessments (8 sites), and remedial investigations and feasibility studies (5 sites). These sites have been throughout New York State. The work involved the collection and chemical analysis of soil gas, surface and subsurface soils, surface water and groundwater, and sediment samples. Geophysical techniques were also used.

Trucking Terminal Remediation, Rochester, New York. Conducted a Remediation Assessment Study for a former trucking facility. Three 4,000-gallon USTs were removed from the facility in 1991. A Phase I and Phase II environmental site assessment (ESA) was completed that noted the potential for off-site migration of contamination. The scope of work includes soil probe sampling, monitoring well installation and soil and groundwater sampling. Directed the injection of 3,000 pounds of oxygen releasing compound (ORC) and provided closure documentation for the site under NYSDEC exposure assessment guidelines.

Supermarket Management, Inc., Brownfield - Voluntary Cleanup, Buffalo, New York - The proposed site is a one-city block area with a history of commercial and industrial uses. Business on-site included chemical manufacture, dyeing and cleaning, auto repair, dry cleaner, commercial, and residential. The property owner purchased the site in the 1970s. During Phase II investigations, several possible source areas were identified, the source removed and an exposure assessment completed. NYSDEC accepted the exposure assessment, and the spill has an "inactive status."

Hamburg Nike Base/Town Landfill – Retained by the Town of Hamburg to assess potential contamination at this 320-acre site that consists of a former Nike Base and landfill, and is currently used for recreation and town highway garage purposes. GZA assessed the hydrogeologic and geochemical conditions at the site in soil, sediment, surface water, groundwater, and air. Negotiated scope of work with NYSDEC, NYSDOH, Corps of Engineers, and Town representatives. Prepared and made press releases and participated in press conferences to discuss the results with the public. Also, assessed the existing on-Site closed Town Landfill following a site visit and comment letter received by the Town from NYSDEC. A remedial closure plan was prepared to address the concerns raised by State regulators.

McKenna Landfill Remedial Closure, Waste Management of North America, Albion, New York. Principal during remedial design for closure of this solid waste management facility under a NYSDEC, Department of Environmental Remediation consent order. Components included waste limit identification, wetland delineation, re-use of on-Site soils, adjacent Erie canal, slurry wall design and construction, leachate collection, and groundwater and surface water control.

Batavia Landfill Superfund Site, Batavia, New York. Provided technical review during remedial investigation and feasibility study at this former landfill site. Principal engineer during supplemental surface water and sediment sampling studies related to an expanded ecological assessment of the site. Also provided technical review during the ecological assessment.

www.gza.com

Dear Guy:

GZA GeoEnvironmental of New York (GZA) is pleased to submit this report describing the results of our Phase II investigation at the above referenced site. Our investigation included an EM-61 geophysical survey prior to the subsurface investigation, observing soil probes at ten locations, headspace screening of soil samples taken from the soil probe macrocore sampler, chemical analysis of six selected subsurface soil samples and two groundwater samples.

Based on the results of our Phase II investigation, two areas of concern have been identified.

- Underground Storage Tank (UST) Area – Two historic USTs appear to be present in the northwestern corner of the Site. The USTs are not currently being used and appear to have been abandoned. Analytical results identified petroleum type compounds in the groundwater at concentrations above New York State Department of Environmental Conservation (NYSDEC) guidance values. Further investigation to confirm the presence of these USTs and their closure/removal is warranted. *GZA recommends that NYSDEC be contacted and informed of the potential release.*
- Chlorinated Solvents - Chlorinated solvents were detected in one locations under the existing building slab. The source and extent of the chlorinated solvents is not know. However, the detected concentrations in both the soil and groundwater sample collected from this one location exceed NYSDEC groundwater standards. The potential exists for vapor intrusion into the building due to the elevated levels of PCE beneath the building. Additionally, the potential exists for off-site impacts (i.e. groundwater, vapor intrusion, etc.). The extent of the chlorinated solvents contamination should be further explored. *GZA recommends that NYSDEC be contacted and informed of the results.*

GZA offers the following recommendations.

- GZA recommends that this report be provided to the NYSDEC and the two areas of concern be reported.
- The two apparent USTs should be properly registered and removed.
- Further investigation is recommended in the area of SP-9 to further evaluate the extent of the chlorinated solvent contamination identified in the soil and groundwater at this location. Additional chlorinated solvent vapor intrusion should be evaluated within the Site building.

We trust this report satisfies your present needs. Should you have any questions or require additional information following your review, please do not hesitate to contact the undersigned.

Sincerely

GZA GEOENVIRONMENTAL OF NEW YORK

1.00 INTRODUCTION

In accordance with our October 8, 2007 proposal, GZA GeoEnvironmental of New York (GZA) performed a Phase II Environmental Site Assessment (ESA) at the Seneca and Myrtle Street Properties, located at 500 Seneca St, 322 Myrtle Ave, 332 Myrtle Ave, 27 Spring St and 29 Spring St in Buffalo, New York (Site) for Adarsky, Sawicki & Agostinelli, LLP. A Locus Plan is attached as Figure 1 and a Site Plan as Figure 2.

GZA completed a previous Phase I ESA¹ dated October 10, 2007 at the Site. The following environmental concerns were identified.

- The Site was owned and operated by New Era Cap Co since 1986. Prior to that, the Site was historically occupied by Wolkind Bros. Inc, clothing rentals from approximately 1970 to 1980, a parking lot, Burnt Company Box manufactures from at least 1930 to the late 1950s and residential dwellings from at least 1930 until approximately the late 1960s. The box manufacturer and New Era likely utilized various chemical and petroleum products. New Era was also identified as a RCRIS small quantity generator of hazardous wastes and on the NY Manifest for disposal of PCB containing transformers. These listings confirm the historic use of hazardous materials at the Site. The historic storage, transport and disposal at these facilities are unknown.
- Historic records identified a 2,000-gallon tank installed on the northwestern corner of the Parcel 1. The tank was installed in 1967. Additionally, the permit referenced a existing 550-gallon tank, for a total capacity of 2,550-gallons. The 550-gallon tank appears to have been installed in 1952. There were no records found that indicated these tanks have been removed. Additionally, GZA observed a potential vent pipe and the area of the former pump island. It is possible that the tanks are still present at the Site.

2.00 PURPOSE AND SCOPE OF WORK

The purpose of this Phase II ESA is to assess if historic underground storage tanks (USTs) may be present and if the historic use and USTs have resulted in an environmental impact at the Site. To accomplish this, the following activities were done.

- Contacted our subcontractor, Geomatrix to perform an electromagnetic (EM) geophysical survey using an EM61 at the Site. The EM survey was completed on the northwestern portion of the Site to assist in identifying potential buried metal anomalies or potential presence of USTs.
- Observed the completion of ten soil probes done by GZA's subcontractor, Matrix Environmental Technologies, Inc. (Matrix)

¹ "Phase I Environmental Site Assessment, Seneca and Myrtle Street Properties, 500 Seneca St, 322 Myrtle Ave, 332 Myrtle Ave, 27 Spring and 29 Spring Street, Buffalo, NY ", prepared for Zdarsky, Sawicki & Agostinelli, LLP., dated October 10, 2007.

- Collected soil samples continuously in four-foot sample intervals to depths, which varied from approximately 12 feet to 16 feet below ground surface (bgs).
- Observed the installation of four (4) temporary micro-wells for groundwater sample collection.
- Field screened soil samples, using an organic vapor meter (OVM) equipped with a photoionization detector (PID), that were collected with a macrocore sampler at each probe location.
- Selected six soil probe samples for chemical analysis, which included five soil samples for volatile organic compounds (VOCs) via EPA Method 8260 Full List and semi-volatile organic compounds (SVOCs) via EPA Method 8270 base STARS list analysis. One soil sample (SP-7 from 1 to 4 feet) was also analyzed for PCBs via EPA Method 8082.
- Selected two groundwater samples from the temporary micro-wells installed. Each groundwater sample was analyzed for chemical analysis, which included VOCs via EPA Method 8260 Full List and SVOCs via EPA Method 8270 STARS list.
- Prepared this report, which summarizes the data collected during this Phase II ESA.

This report presents GZA's field observations, results, and opinions and is subject to the limitations presented in Appendix A and modifications if subsequent information is developed by GZA or any other party.

3.00 FIELD STUDIES

This section describes the field studies done as part of GZA's EM geophysical survey and subsurface investigation. A copy of the geophysical survey report is included as Appendix B.

3.10 ELECTROMAGNETIC GEOPHYSICAL SURVEY

On November 8, 2007 GZA's subcontractor, Geomatrix, performed an EM geophysical survey, using an EM61, to assist in mapping the distribution of buried metals in an attempt to locate anomalies indicative of USTs at the Site. Readings were recorded to identify anomalies. Figure 3 provides a plan view of the geophysical EM results. The Geomatrix report is included as Appendix B.

- Anomaly A was identified as a buried metal anomaly. A linear anomaly appeared to be associated with anomaly A. A vent was also observed

northwest of Anomaly A. Geomatic indicated that it is very likely that Anomaly A is related to a UST.

- Anomaly B was also identified as a buried metal anomaly located between the building and gate. The ground surface in this area is concrete. Anomaly B may be related to a UST or it may be due to reinforcement metal in the concrete and/or interference from the metal in the gate.

GZA reviewed the two identified anomaly locations and compared these locations to the historic records identifying the tank locations. There is good correlation between the locations, for both the 2,000-gallon UST, which appeared to be at a similar location to Anomaly A, and the 550-gallon UST, which appeared to correlate with Anomaly B. Based on the historic record review, geophysical survey results, and site observations of potential vent pipes in the areas, it is likely that the two USTs are currently present at the Site.

3.20 SOIL PROBE INSTALLATIONS

GZA's subcontractor, Matrix, completed ten soil probes as part of the Phase II ESA on November 12, 2007. The soil probes were completed using a Geoprobe 54LT track mounted rig equipped with a pneumatic hammer. The probes are designated as SP-1 through SP-10 as shown on Figure 2.

- SP-1 was done in the area of the 550-gallon UST located on the northwestern portion of the Site.
- SP-2, SP-3 and SP-4 were done on the three accessible sides of the apparent 2,000-gallon UST located on the northwestern portion of the Site.
- SP-5 was done in the area of the former pump island located on the northwestern portion of the Site.
- SP-6 and SP-8 were done in an assumed downgradient direction from the USTs and pump island.
- SP-7 was done on the southwestern portion of the Site across from the adjoining facility, where PCBs were previously detected.
- SP-9 was done within the loading dock area on the northern portion of the Site.
- SP-10 was done within the courtyard area on the eastern portion of the Site.

Generally, the soil probes were advanced using a 2-inch diameter, 48-inch long macrocore sampler that was driven continuously at 48-inch intervals. A dedicated acetate sampler liner was used between sampling intervals. Representative portions of the recovered soils were placed in plastic zip-lock bags for further classification and headspace analysis. The completed soil probe holes were generally backfilled with the soil cuttings and/or topped with asphalt patch.

GZA prepared soil probe logs summarizing the general subsurface conditions that were observed and encountered at each probe location. These logs are based on visual observations

of the recovered soils and include a summary description of the soils using color and composition. Soil probe logs are presented as Appendix C.

3.30 HEADSPACE SCREENING PROCEDURE

Collected soil samples were placed in plastic zip-lock bags. The headspace in each bag was screened for organic vapor compounds using an organic vapor meter (OVM) outfitted with a photoionization detector and a 10.2 eV ultraviolet lamp. The OVM used was a Mini Ray 2000 and was calibrated in accordance with manufacturer's recommendations. A gas standard of isobutylene was used at an equivalent concentration of 100 parts per million (ppm) as benzene for calibration. Ambient air at the Site was used to establish background organic vapor concentrations. Organic vapor concentrations were generally non-detect, or below 5 ppm in the samples collected from SP-3 to SP-8. Headspace readings at SP-1 and SP-2 generally ranged from non-detect to 83 ppm; and at SP-10 ranged from non-detect to 322 ppm. The highest OVM readings were detected at SP-9, ranging from non-detect to 9,999+. The highest reading was encountered from 6 to 8 feet below ground surface. Headspace results were recorded on the probe logs included as Appendix C.

3.40 GROUNDWATER COLLECTION

Temporary 1-inch diameter polyvinyl chloride (PVC) micro-wells were installed at the completion of drilling at locations SP-1 and SP-3, near the UST locations; at SP-7, an assumed downgradient location; and at SP-9, where the highest OVM reading was measured. Samples were collected using disposable polyethylene bailers and placed in laboratory supplied analytical jars. Temporary micro-wells were removed and the holes backfilled after groundwater samples were collected. Groundwater samples were collected and analyzed from SP-1 and SP-9 only.

4.00 ANALYTICAL LABORATORY TESTING

Six subsurface soil samples and two groundwater samples were selected and submitted for analytical testing. The selected soil and groundwater samples were packed in an ice filled cooler and sent to the GZA GeoEnvironmental Laboratory in Hopkinton, Massachusetts following typical chain-of-custody procedures. Table 1 is a summary of the samples collected and the analysis completed.

5.00 SUBSURFACE CONDITIONS

5.10 SOILS

Subsurface conditions at the soil probe locations generally consisted of:

Layer Designation	Depth	Material Encountered
Surface Layer	Generally within the upper 0.5 to 1-foot	6 inches of asphalt or concrete with an underlying subbase; or 6 inches of topsoil
Fill Layer	Encountered at each soil probe location, generally ranging from 4 to 4.5 feet below ground surface	Granular soils consisting of sand and gravel, with lesser amounts of silt and brick. Cohesive fill material consisting of clayey silt with lesser amounts of gravel, sand and brick
Natural Soils	Below the fill and/or surficial layer.	Generally consists of a clay and silt mixture with lesser amounts of sand and gravel. Intermittent layers of silty sand with gravel were found at SP-1, 2, 3, and 9.

5.20 GROUNDWATER

Groundwater was encountered at depths ranging from approximately 6 to 10 feet below ground surface at each probe location. Temporary 1 inch monitoring wells were installed at SP-1, SP-3, SP-7 and SP-9. Groundwater in the temporary wells ranged from 6.5 to 9.6 feet below ground surface.

6.00 ANALYTICAL TEST RESULTS

Findings of the laboratory testing of the six subsurface soil samples and two groundwater samples analyzed for chemical compounds are presented below. The analytical laboratory report is provided as Appendix D. The analytical results for the soil and ground water samples are summarized on Table 2 and Table 3 respectively.

The analytical test results for the subsurface soil samples were compared to:

- NYSDEC Recommended Soil Cleanup Objectives (RSCOs) presented in NYSDEC, Technical and Administrative Guidance Memorandum (TAGM) HWR-

94-4046: Determination of Soil Cleanup Objectives and Cleanup Levels, dated January 1994, amended December 2000.

- NYSDEC Part 375 Unrestricted and Restricted Use Soil Cleanup Objectives (SCO).

The analytical test results for the groundwater samples were compared to:

- NYSDEC Class GA criteria presented in the Division of Water Technical and Operational Guidance Series (TOGS 1.1.), dated October 1993, revised June 1998, errata January 1999 and amended April 2000.

6.10 SUBSURFACE SOILS

Volatile Organic Compounds: No VOCs were detected above method detection limits from the sample collected from SP-4 and SP-5, in the area of the suspect 2,000-gallon UST.

- SP-1 – Two VOCs, including m&p xylene and 1,2,4-trimethylbenzene, were detected in the soil sample collected from 2-4 feet below ground surface, at concentrations below their respective TAGM 4046 guidance value. An OVM reading of 83 ppm was identified at this sample location, which is near the suspect 550-gallon UST.
- SP-9 – Three VOCs, including cis-1,2-dichloroethene (DCE), trichloroethene (TCE) and tetrachloroethene (PCE) were detected at concentrations within the soil sample from 6 to 8 feet above their respective TAGM 4046 guidance values and the Part 375 Unrestricted Use SCO. Additionally, PCE was detected at a concentration of 270,000 parts per billion (ppb), which exceeds its respective Part 375 Restricted Commercial Use SCO. This soil sample exhibited an OVM reading of greater than 9,999+ ppm and an odor was detected during sample collection.
- SP-10 – Eight typical petroleum type VOCs were detected above method detection limits at the sample collected from 4 to 6 feet below ground surface. The detected concentrations were below their respective TAGM 4046 guidance values. An OVM reading from the sample was recorded as 322 ppm.

Semi-Volatile Organic Compounds: No SVOCs were detected at concentrations above method detection limits in the five soil samples tested.

Polychlorinated Biphenyls: No PCBs were detected at concentrations above method detection limits in the one soil sample tested.

6.20 GROUNDWATER

Volatile Organic Compounds: Two groundwater samples were collected for VOC analysis.

- SP-1 – Eight VOCs were detected above their respective Class GA criteria, as shown on Table 3. The VOCs appeared to be typical petroleum type compounds. SP-1 was located near the apparent 550-gallon UST. The highest detected concentration was benzene, at a concentration of 970 ppb, exceeding its Class GA criteria of 1 ppb.
- SP-9 – Five VOCs were detected above their respective Class GA Criteria, as shown on Table 3. The detected VOCs appeared to be chlorinated solvents. The highest detected concentration was PCE at a concentration of 20,000 ppb, exceeding its Class GA criteria of 5 ppb.

Semi-Volatile Organic Compounds: No SVOCs were detected at concentrations above method detection limits in the one groundwater samples tested from SP-1.

7.00 CONCLUSIONS AND RECOMMENDATIONS

GZA was retained to assess if historical Site usage or identified USTs have resulted in an environmental impact at the Site. Our work included an EM-61 geophysical survey prior to the subsurface investigation, observing soil probes at ten locations, collection of surface soil samples, headspace screening of soil samples taken from the soil probe macrocore sampler and chemical analysis of six subsurface soil samples and two groundwater samples.

A summary of our findings and our opinion based upon the work conducted as part of this study follows.

- GZA retained Geomatrix, to perform an EM geophysical survey using an EM61 at the Site, to map the distribution of buried metals in an attempt to locate anomalies indicative of USTs at the Site. Readings were recorded that identify the following two anomalies.
 - Anomaly A was identified as a buried metal anomaly. A linear anomaly appeared to be associated with anomaly A. A vent was also observed northwest of Anomaly A. Geomatrix indicated that it is very likely that Anomaly A is related to a UST.
 - Anomaly B was also identified as a buried metal anomaly located between the building and gate. The ground surface in this area is concrete.

Anomaly B may be related to a UST or it may be due to reinforcement metal in the concrete and/or interference from the metal in the gate.

GZA reviewed the two identified anomaly locations and compared these locations to the historic records identifying the tank locations. There is good correlation between the locations, for both the 2,000-gallon UST, which appeared to be at a similar location to Anomaly A, and the 550-gallon UST, which appeared to correlate with Anomaly B. Based on the historic record review, geophysical survey results, and site observations of potential vent pipes in the areas, it is likely that the two USTs are currently present at the Site.

- Subsurface conditions at the soil probe locations generally consisted of approximately 6-inches of asphalt and subbase gravel, concrete (SP-9) or topsoil (SP-2) overlying a fill material, generally consisting of a sand and gravel mixture with silt, clay and brick. Fill depths generally ranged from 4 to 4.5 feet below ground surface. Native soils generally consisted of a clay and silt mixture with varying amounts of sand and gravel. Intermittent layers of silty sand and gravel were found at SP-1, 2, 3 and 9.
- Groundwater was encountered at depths ranging from approximately 6 to 10 feet below ground surface at each probe location. Temporary 1 inch monitoring wells were installed at SP-1, SP-3, SP-7 and SP-9. Groundwater in the temporary wells ranged from 6.5 to 9.6 feet below ground surface.

Based on the results of our Phase II investigation, two areas of concern have been identified.

- UST Area – Two historic USTs appear to be present in the northwestern corner of the Site. The USTs are not currently being used and appear to have been abandoned. Analytical results identified petroleum type compounds in the groundwater at concentrations above NYSDEC guidance values. Further investigation to confirm the presence of these USTs and their closure/removal is warranted. *GZA recommends that NYSDEC be contacted and informed of the potential release.*
- Chlorinated Solvents - Chlorinated solvents were detected in one locations under the existing building slab. The source and extent of the chlorinated solvents is not know. However, the detected concentrations in both the soil and groundwater sample collected from this one location exceed NYSDEC groundwater standards. The potential exists for vapor intrusion into the building due to the elevated levels of PCE beneath the building. Additionally, the potential exists for off-site impacts (i.e. groundwater, vapor intrusion, etc.). The extent of the chlorinated solvents contamination should be further explored. *GZA recommends that NYSDEC be contacted and informed of the results.*

GZA offers the following recommendations.

- GZA recommends that this report be provided to the NYSDEC and the two areas of concern be reported.
- The two apparent USTs should be properly registered and removed.
- Further investigation is recommended in the area of SP-9 to further evaluate the extent of the chlorinated solvent contamination identified in the soil and groundwater at this location. Additional chlorinated solvent vapor intrusion should be evaluated within the Site building.

APPENDIX A
LIMITATIONS

LIMITATIONS

1. The observations described in this report were made under the conditions stated therein. The conclusions presented in the report were based solely upon the services described therein, and not on scientific tasks or procedures beyond the scope of described services or the time and budgetary constraints imposed by Client. The work described in this report was carried out in accordance with the Terms and Conditions of our Agreement.
2. In preparing this report, GZA GeoEnvironmental of New York (GZA) has relied on certain information provided by state and local officials and other parties referenced therein, and on information contained in the files of state and/or local agencies available to GZA at the time of the site assessment. Although there may have been some degree of overlap in the information provided by these various sources, GZA did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this site assessment.
3. In the event that bank counsel or title examiner for Client obtains information on environmental or hazardous waste issues at the site not contained in this report, such information shall be brought to GZA's attention forthwith. GZA will evaluate such information and, on the basis of this evaluation, may modify the conclusions stated in this report.
4. Observations were made of the site and of structures on the site as indicated within the report. Where access to portions of the site or to structures on the site was unavailable or limited, GZA renders no opinion as to the presence of hazardous material or oil, or to the presence of indirect evidence relating to hazardous material or oil, in that portion of the site or structure. In addition, GZA renders no opinion as to the presence of hazardous material or oil, or to the presence of indirect evidence relating to hazardous material or oil, where direct observation of the interior walls, floor, or ceiling of a structure on a site was obstructed by objects or coverings on or over these surfaces.
5. Unless otherwise specified in the report, GZA did not perform testing or analyses to determine the presence or concentration of asbestos or polychlorinated biphenyls (PCB's) at the site or in the environment at the site.
6. The purpose of this report was to assess the physical characteristics of the subject site with respect to the presence in the environment of hazardous material or oil. No specific attempt was made to check on the compliance of present or past owners or operators of the site with federal, state, or local laws and regulations, environmental or otherwise.
7. The conclusions and recommendations contained in this report are based in part upon the data obtained from a limited number of soil and/or groundwater samples obtained from widely spaced subsurface explorations. The nature and extent of variations between these explorations may not become evident until further exploration. If variations or other latent conditions then appear evident, it will be necessary to reevaluate the conclusions and

recommendations of this report.

8. Water level readings have been made in the test pits, borings, and/or observation wells at the times and under the conditions stated on the test pit or boring logs. However, it must be noted that fluctuations in the level of groundwater may occur due to variations in rainfall and other factors different from those prevailing at the time measurements were made.
9. Except as noted within the text of the report, no quantitative laboratory testing was performed as part of the site assessment. Where such analyses have been conducted by an outside laboratory, GZA has relied upon the data provided, and has not conducted an independent evaluation of the reliability of these data.
10. The conclusions and recommendations contained in this report are based in part upon various types of chemical data and are contingent upon their validity. These data have been reviewed and interpretations made in the report. As indicated within the report, some of these data are preliminary "screening" level data, and should be confirmed with quantitative analyses if more specific information is necessary. Moreover, it should be noted that variations in the types and concentrations of contaminants and variations in their flow paths may occur due to seasonal water table fluctuations, past disposal practices, the passage of time, and other factors. Should additional chemical data become available in the future, these data should be reviewed by GZA and the conclusions and recommendations presented herein modified accordingly.
11. Chemical analyses have been performed for specific parameters during the course of this site assessment, as described in the text. However, it should be noted that additional chemical constituents not searched for during the current study may be present in soil and/or groundwater at the site.
12. It is recommended that GZA be retained to provide further engineering services during construction and/or implementation of any remedial measures recommended in this report. This is to allow GZA to observe compliance with the concepts and recommendations contained herein, and to allow the development of design changes in the event that subsurface conditions differ from those anticipated.

Dear Ms. Wittman:

Subject: Geophysical Survey Results – 500 Seneca St, Buffalo, NY

1.0 INTRODUCTION

This report presents the results of a geophysical investigation performed at a portion of the property located at 500 Seneca Street in Buffalo, NY. Historical information obtained by GZA indicate the potential for two underground storage tanks to be present on site. A geophysical survey was performed by Geomatrix Consultants, Inc. (Geomatrix) to map the distribution of buried metals in an attempt to locate anomalies indicative of USTs. The survey was performed on November 12, 2007 utilizing electromagnetic techniques.

The geophysical results presented herein are intended to serve as a guide to focus any future intrusive investigations, if warranted. Additional collaborative data are generally necessary to confirm geophysical anomalies.

2.0 METHODOLOGY

A reference grid was installed to facilitate data acquisition along lines spaced 3 feet apart. The grid was marked with orange and white paint. Select grid coordinates were labeled to aid in the event that future work was necessary. The southwest corner of the building was established as grid coordinate 50N,50E. Grid North was taken as the direction parallel to the west wall of the building.

ELECTROMAGNETIC SURVEY METHODOLOGY

The site was geophysically surveyed using the Geonics EM61. The EM61 unit is a high sensitivity, high resolution time domain electromagnetic (TDEM) metal detector that can detect both ferrous and nonferrous metallic objects. It has an approximate investigation depth of 10 feet. The processing console is contained in a backpack worn by the operator which is interfaced to a digital data logger. The transmitter and two receiver coils are located on a two-wheeled cart that is pulled by the operator.

EM equipment in use (photo not from this site)

The device's transmitter coil generates a pulsed primary EM field at a rate of 150 pulses per second, inducing eddy currents into the subsurface. The decay rates of these eddy currents are measured by two, 3.28 foot by 1.64 foot (1 meter by $\frac{1}{2}$ meter) rectangular receiver coils. By taking the measurements at a relatively long time frame after termination of the primary pulse, the response is practically independent of the survey area's terrain conductivity. Specifically, the decay rates of the eddy currents are much longer for metals than for normal soils allowing the discrimination of the two.

Data are collected from the EM61's two receiver coils. One of the receiver coils is located coincident to the transmitter coil. The other receiver coil is located 1.31 feet (0.4 meters) above the transmitter coil. Data from the top receiver coil are stored on Channel 1 of a digital data logger. Data from the bottom receiver coil are stored on Channel 2 of the data logger. Channel 1 and Channel 2 data are simultaneously recorded at each station location. The instrument responses are recorded in units of milliVolts (mV). Data were recorded digitally by a data logger at a rate of approximately 2 measurements per foot along the survey lines which were spaced 3 feet apart.

3.0 RESULTS

The EM61 data for the survey are presented in Figure 1. The color bar to the right of the map indicates the colors associated with the values measured with the EM61. Areas suspected to be free of buried metals are shown as color shades of light blue. All areas exhibiting a

response greater than background (0 to 30 mVolts) likely contain buried metals. These areas are depicted in shades of dark blue through yellow on the figures.

Anomaly A is a buried metal anomaly centered at 70N,35E. A linear anomaly appears to be associated with Anomaly A. A vent was observed northwest of Anomaly A. It is very likely that Anomaly A is related to a UST.

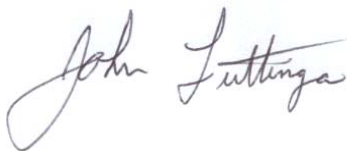

Anomaly B is a buried metal anomaly located between the building and the gate. We noted the ground surface in this area is concrete. Anomaly B may be related to a UST or it may be due to reinforcement metal in the concrete and/or interference from the metal in the gate.

4.0 LIMITATIONS

The geophysical methods used during this survey are established, indirect techniques for non-invasive subsurface reconnaissance exploration. As these instruments utilize indirect methods, they are subject to inherent limitations and ambiguities. All geophysical methods utilize interpretative techniques which can be significantly impacted by varying site conditions. Anomalies can only be identified if they show recognizable patterns against data representative of background or natural conditions. Therefore, where possible, confirmation of any geophysical anomalies identified or interpreted should be sought through the use of historical aerial photography, test pit and/or borehole information.

We trust the information contained in this report is sufficient for your present needs. Please do not hesitate to contact us if you have any questions or require additional information.

Sincerely yours,
GEOMATRIX CONSULTANTS, INC.

A handwritten signature in dark ink, reading "John Luttinger". The signature is fluid and cursive, with the first name "John" being more prominent and the last name "Luttinger" following in a similar style.

John Luttinger

Project Name.: **500 Seneca St.-Former New Era**
Project No.: **21.0056365.00**

Date Received: **11/13/2007**
Date Reported: **11/20/2007**
Work Order No.: **0711-00106**

PROJECT NARRATIVE:

1. Sample Receipt

The samples were received on 11/13/07 via __GZA courier, __x_UPS, __FEDEX, or __hand delivered. The temperature of the __temperature blank/ __x_cooler air, was 4.7 degrees C. The temperature requirement for most analyses is above freezing to 6 degrees C. The samples were received intact for all requested analyses.

The chain of custody indicates that the samples, when required, were chemically preserved in accordance with the method they reference.

2. EPA Method 8260 - VOCs

The percent recoveries for the surrogates in the diluted runs are as follows:

SP-9 6-8ft.: 1,2- Dichloroethane-D4 - 104%, Toluene-D8 - 124%, 4-Bromofluorobenzene - 97.2%

Attach QC 8260 11/15/07 S - Solid
Attach QC 8260 11/17/07 S - Solid

3. EPA Method 8082 - PCBs

Attach QC 8082 11/14/07 - Solid

4. EPA Method 8270 - PAHs

Attach QC 8270 11/14/07 - Solid

Data Authorized By: _____

NELAC certification, as indicated by the NELAC Lab ID Number, is per analyte. For a complete list of NELAC validated analytes, please contact the laboratory.

Abbreviations:

% R = % Recovery
DF = Dilution Factor
DFS = Dilution Factor Solids
CF = Calculation Factor
DO = Diluted Out

Method Key:

Method 8260: The current version of the method is 8260B.
Method 8021: The current version of the method is 8021B.
Method 8270: The current version of the method is 8270C.
Method 6010: The current version of the method is 6010B.

Please note that the laboratory signed copy of the chain of custody record is an integral part of the data report.

The laboratory report shall not be reproduced except in full without the written consent of the laboratory.

Soil data is reported on a dry weight basis unless otherwise specified.
Matrix Spike / Matrix Spike Duplicate sets are performed as per method and are reported at the end of the analytical report if assigned on the Chain of Custody.

ANALYTICAL REPORT

GZA GeoEnvironmental of NY
535 Washington Street
11th Floor
Buffalo, NY 14203-1415
Michelle Wittman

Project Name.: **500 Seneca St.-Former New Era**
Project No.: **21.0056365.00**

Date Received: **11/13/2007**
Date Reported: **11/20/2007**
Work Order No.: **0711-00107**

PROJECT NARRATIVE:

1. Sample Receipt

The samples were received on 11/13/07 via GZA courier, x UPS, FEDEX, or hand delivered. The temperature of the temperature blank/ x cooler air, was 4.7 degrees C. The temperature requirement for most analyses is above freezing to 6 degrees C. The samples were received intact for all requested analyses.

The chain of custody indicates that the samples, when required, were chemically preserved in accordance with the method they reference.

2. EPA Method 8260 - VOCs

Data Authorized By: _____

NELAC certification, as indicated by the NELAC Lab ID Number, is per analyte. For a complete list of NELAC validated analytes, please contact the laboratory.

Abbreviations:

% R = % Recovery
DF = Dilution Factor
DFS = Dilution Factor Solids
CF = Calculation Factor
DO = Diluted Out

Method Key:

Method 8260: The current version of the method is 8260B.
Method 8021: The current version of the method is 8021B.
Method 8270: The current version of the method is 8270C.
Method 6010: The current version of the method is 6010B.

Please note that the laboratory signed copy of the chain of custody record is an integral part of the data report.

The laboratory report shall not be reproduced except in full without the written consent of the laboratory.

Soil data is reported on a dry weight basis unless otherwise specified.

Matrix Spike / Matrix Spike Duplicate sets are performed as per method and are reported at the end of the analytical report if assigned on the Chain of Custody.

Re: **Summary Report; USTs Removal and Excavation Report**
500 Seneca Street, Buffalo, New York
NYSDEC Spill # 0751217

Dear Mr. Murphy:

In accordance with an agreement between New Era Cap Company, Inc. ("Client") and Hazard Evaluations, Inc. (HEI), HEI completed activities at the above-referenced (subject) site related to the closure of two underground gasoline storage tanks (USTs; one 2,000-gallon and one 500-gallon), the management of fluids related to the UST removals, and the remediation of impacted soil encountered. A summary of the remedial activities completed at the subject site is provided below.

UST Removals

Prior to the initiation of any field activities, HEI: 1) Requested the locations of underground utilities in the vicinity of the subject site; 2) Notified the New York State Department of Environmental Conservation (NYSDEC) regarding these UST removals; and 3) Obtained a proper building permit from the City of Buffalo. Subsequently, on December 13, 2007, HEI retained Frank's Vacuum Truck Services to remove the remaining fluids in the existing USTs. A total of 1,650 gallons of non-hazardous petroleum/water mixture was removed from the USTs and transported off-site to an appropriate facility for disposal (Refer to Attachment 1; Waste Disposal Receipts).

A tracked excavator was then used to remove soil from above and around the USTs to allow their removal. Clean overburden material was stockpiled on-site for later use as backfill after confirmatory sampling/analysis). HEI observed that soil in the immediate vicinity of the 500-gallon UST exhibited petroleum odors and staining. As a result, HEI reported the apparent petroleum release to the NYSDEC, and Spill # 0751217 was issued to the subject site. Readily accessible, visually impacted soil was removed from the 500-gallon UST excavation and staged on polyethylene sheeting in an on-site location within the fenced work area. Once the soil/fill material in the immediate area of the 500-gallon UST was removed, apparent native soils consisting of very dense clay and silt were encountered at a depth of approximately eight feet below grade (bg). The extent of the 500-gallon UST excavation to the East and North was limited due to the presence of the facility structure and the adjacent

street (Myrtle Avenue), respectively. It should be noted that Mr. John Otto of the NYSDEC visited the site and observed the 500-gallon UST excavation prior to backfilling.

Please Note: No soil staining, petroleum odors or other visible evidence of impacted soil was observed in the immediate vicinity of the 2000-gallon UST. Also, no groundwater was observed in either UST excavation.

Upon the removal of the USTs from their excavations, they were placed on polyethylene sheeting. The 2,000-gallon UST was observed to be in excellent condition, while the 500-gallon tank exhibited several holes in its surface, apparently due to corrosion. The atmospheres in both tanks were rendered safe through the use of Nitrogen gas, and the tanks were cut open for cleaning. Residues from the interior surfaces of the USTs were evacuated using the vacuum truck. The cleaned USTs and associated piping were removed from the site and transported to a scrap yard for recycling. The 'clean tank' certificate is presented in Attachment 1.

A total of seven subsurface soil post-excavation verification samples were collected for laboratory analysis, including one from each of the sidewalls of the 500-gallon UST excavation, one from the floor of the 500-gallon UST excavation, one from the floor of the 2,000-gallon UST excavation and one from the pump island and piping area. The soil samples were placed in sampling bags and screened for the presence of VOCs utilizing a photoionization detector (PID). The East and North wall samples exhibited elevated PID readings (22,323 ppb and 1,639 ppb, respectively); however, as noted above, further soil excavation could not be performed due to the presence of the on-site building and the adjacent street. Each of these soil samples was submitted to a NYSDEC-certified laboratory for analysis using USEPA Method 8260 (VOCs; STARS list). Following the post-excavation soil sampling, the excavation was backfilled with clean fill material from an off-site source, which was compacted using the excavator bucket. Attachment 2 presents HEI's field notes.

Impacted Soil Disposal

A composite sample of the stockpiled impacted soil removed from the 500-gallon tank excavation was collected and submitted for laboratory analysis for Toxicity Characteristic Leaching Procedure (TCLP) Benzene, TCLP Lead, Total Petroleum Hydrocarbons (TPH), pH and Ignitability, as required by the disposal facility. This stockpiled contaminated soil was approved for disposal at the Tonawanda Landfill by Ensol, Inc. (NYSDEC Facility #15S29). On January 9, 2008, this stockpiled soil was loaded onto dump trucks and transported to the landfill for disposal. A total of 44.58 tons of impacted soil was removed from the site (Attachment 1).

Post-Excavation Verification Sampling Results

The post-excavation soil sample laboratory analytical results (Table 1, Attachment 3) revealed the presence of target VOCs parameters at concentrations exceeding method detection limits (MDLs) in five of the seven samples submitted; however, only the East Wall and Excavation Floor samples for the 500-gallon UST

exhibited parameters at concentrations exceeding the applicable NYSDEC Recommended Soil Cleanup Objectives (RSCOs) as published in Technical and Administrative Guidance Memorandum (TAGM) #4046. It should be noted that the Excavation Floor sample had only one parameter (Benzene) exceeding its applicable RSCO, and that sample consisted of native clay, exhibited a relatively low PID headspace screening result (56 ppm), and was observed by Mr. John Otto, the NYSDEC representative, who indicated on-site that the extent of excavation appeared to be adequate.

No elevated concentrations of target VOCs above MDLs were detected in the soil sample collected from the floor of the 2,000-gallon UST excavation. The Laboratory Analytical Report is presented in Attachment 4.

CONCLUSIONS

Based on the remedial activities performed and the post-excavation verification soil sample laboratory analytical results, HEI suggests that this site is eligible to be granted an "inactive" status on the NYSDEC Spills Database with no further remedial activities being required at this time. Field observations and post-excavation sampling results indicate that there were no petroleum releases from the 2,000-gallon UST. Although the post-excavation samples indicate that residual VOCs contamination remains within the soil profile in both the eastern wall and floor of the 500-gallon UST excavation, HEI does not recommend additional remedial action. Additional excavation of soils in the eastern wall of the 500-gallon UST excavation would be impracticable due to the potential impact on the stability of the foundation of the building at the subject site, which is immediately adjacent to this excavation. Moreover, based on the dense nature of the clay and silt that comprises the soil profile encountered on the floor of the 500-gallon UST excavation, it appears that there is a low probability for the residual contamination to impact the underlying groundwater table.

The information presented above should adequately summarize HEI's remedial efforts at the subject site. Upon written Client authorization, HEI will prepare both a copy of this report and a cover letter requesting site inactivation which will be submitted to the NYSDEC for review. If you have any questions regarding the content of this letter report or its attachments, please contact me directly.

Very truly yours,
HAZARD EVALUATIONS, INC.

C. Mark Hanna, CHMM
President

FIELD INVESTIGATION REPORT

Travelled to the subject site. Uncovered the fill port for the 500 Gallon tank and noted that the tank was full. Opened 2,000 Gallon tank and noted fluid, but not sure how much.

Franks Vacuum truck service arrived on the site. Began by first removing fluid from the 2,000-Gallon tank, then the 500 Gallon tank. Vacuum truck on standby until tanks are pulled and cleaned.

Wyndel arrived on the site and uncovered the 500-gallon tank. Some clean fill in the top 1-Ft of soil placed in pile for back filling. Impacted soil then encountered. VOC headspace reading of soil in the vicinity of the tank was 2200 ppm.

Called NYSDDEC and reported the spill. Spoke with John Otto and Spill # 0751217 was issued to the site. John arrived on site and inspected excavation. Excavated impacted soil from the 500-Gallon tank excavation. Once the sand bedding material and a few feet of native sit clay material was removed, the staining and odor ended. We could not reach extent on the east wall due to the building, on the north wall due to the road. Collected Verification samples for VOC screening and analysis.

See the screening results on next page ↓

FIELD INVESTIGATION REPORT

Soil Screening Results

500 Gallon Tank Excavation Floor (1')	<u>164 ppm</u>	
Excavated another Foot to 8' BG.		
500 Gallon Tank Excavation Floor (8')	<u>55.9 ppm</u>	Submitted.
500 Gallon Tank (North Wall)	<u>983 ppm</u>	Submitted.
500 Gallon Tank (West Wall)	<u>28.9 ppm</u>	Submitted.
500 Gallon Tank (East Wall)	<u>1898 ppm</u>	Submitted.
500 Gallon Tank (South Wall)	<u>1.1 ppm</u>	Submitted.

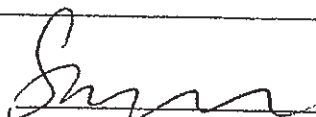

Note again that the North wall was bound by the road and the East wall was bound by the Building.

Placed the soil on plastic. Collected composite for soil characterization and submitted.

Excavated and removed the 2000 Gallon tank. No contamination noted. Collected composite floor sample for analysis. VOC reading of 1.4 ppm

The tanks were placed on plastic for cleaning. The 500 Gallon tank had obvious holes in the bottom of tank along the ends. The 2000 Gallon tank appeared to be in good condition. Parged tanks with nitrogen and cut opened and cleaned.

 Orchard Park, NY 14127
 (716) 667-3130

FIELD INVESTIGATION REPORT

Removed the pump island and piping. Collected a composite sample from under the pump island and the pipe. No odor noted. Submitted for analysis.

While performing cleaning duties, noticed fluid leaking via truck hose on to snow. Apparently a valve had not shut according to driver. He vacuumed up the snow it had impacted. Not sure of volume. Observed only water coming out of hose. Removed several scoops of soil from area where water had spilled and placed on the soil pile (as precautionary). Took soil sample from area. No odor noted. Will submit for 8760 ~~★~~.

Backfilling performed as good as possible, given very snowy conditions. Will straighten up when we load soil out.

Items to finalize:
 A) Put lock on gate on Seneca
 B) Ensure other gate is functional as it was bumped with excavator.
 C) Shovel any fill off the sidewalks.
 Tanks taken to scrap yard.
 Left S.H.

2) NA = Not Applicable
3) " " means compound not detected above Method Detection Limit (MDL).

Table 4
Laboratory Analytical Report

Analytical Report Cover Page

For Lab Project # 01-4598

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil or solid samples have been reported on a dry weight basis, unless qualified "reported as received".

This page is part of a multipage document. This document may not be reproduced except in its entirety, without the prior consent of Paradigm Environmental Services, Inc.

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

NYSDOH ELAP does not certify for all parameters. Paradigm Environmental Services or the indicated subcontracted laboratory does hold certification for all analytes where certification is offered by ELAP unless otherwise specified.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.

"E" = Result has been estimated, calibration limit exceeded.

"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.

"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.

"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

This report contains a total of 14 pages.
