# (Fact Sheet Begins Next)

# Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

## You must sign up for the DER email listserv:

https://dec.ny.gov/environmental-protection/site-cleanup/regional-remediation-project-information/environmental-cleanup-email-newsletters

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

## Why You Should Go "Paperless":

- ☑ Get site information faster and share it easily;
- ☑ Receive information about all sites in a chosen county read what you want, delete the rest;
- ☑ It helps the environment and stretches your tax dollars.

If "paperless" is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

# **Hurwitz Company Site**

Brownfield Cleanup Program Site No. C915290 Buffalo, Erie County

December 2025

# **Cleanup Action Completed at Brownfield Site**

Action has been completed to address the contamination related to the Hurwitz Company Site ("site") located at 267 Marilla Street, Buffalo, Erie County under New York State's Brownfield Cleanup Program (BCP). Please see the map for the site location.

Cleanup activities were performed by Liberty Iron & Metal, Inc and AIM Recycling, LLC ("applicants") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). The applicants have submitted a proposed Final Engineering Report (FER) for NYSDEC review which states that cleanup requirements have been or will be achieved to fully protect public health and the environment for the proposed site use.

- Access the approved RAWP and other project documents online through the DECinfo Locator: https://extapps.dec.ny.gov/data/DecDocs/C915290/.
- Documents also are available at the locations identified under "Where to Find Information."

## **Highlights of the Site Cleanup**

The following activities have been completed to achieve the cleanup action objectives:

- Excavation Excavation of about 25,000 tons of contaminated soil/fill material exceeding the Commercial Use soil cleanup objectives (CSCOs) and Site-Specific Action Levels (SSALs), the site-specific cleanup criteria. Clean fill was brought to establish the cover system and design grades at the site.
- Stockpile Reuse/Removal: Out of ten stockpiles that were present on-site from previous excavations and remedial activities, two of them, totaling approximately 1,275 tons, required off-site disposal of contaminated soil/fill exceeding CSCOs and SSALs. The remaining eight were deemed acceptable for reuse as backfill for remedial excavations beneath the site cover system.
- Vertical Hydraulic Barrier Wall A vertical hydraulic barrier (wall was installed on the eastern and southern borders of the site boundaries to minimize groundwater migration from off-site. The barrier wall is approximately 1,270 linear feet, 28-inches thick and the bottom of t is on average 7 feet below ground surface.
- Site Cover System The new development will maintain a site cover, which consists of a 1-foot stone cover and a 1-foot clean soil cover in landscaped areas. The stone and soil cover was placed over a demarcation layer, with the upper 6 inches of the soil of sufficient quality to maintain a vegetation layer.
- Development of a Site Management Plan (SMP) for long-term management of residual contamination as required by the Environmental Easement, including plans for: (1) Institutional and Engineering Controls (IC/ECs); (2) monitoring; (3) operation and maintenance; and (4) reporting.
- An Environmental Easement was recorded to prevent future exposure to any contamination remaining at the site and to ensure implementation of the SMP.

#### **Next Steps**

When NYSDEC approves the FER, it will be made available to the public (see "Where to Find Information"). NYSDEC then will issue a Certificate of Completion (COC) that will be announced in a fact sheet. The applicants would be able to redevelop the site after receiving a COC. In addition, the

applicants will be eligible for tax credits to offset a portion of the costs of performing cleanup activities and for redevelopment of the site.

#### **Site Description**

The 8.03-acre Hurwitz Company Site is located at 267 Marilla Street in the City of Buffalo, Erie County. The site is on the south side of Marilla Street, just east of the Hopkins Street overpass and just north of an active railroad corridor. The site was previously used as a scrap yard from 1922 to 2020 and is currently vacant.

The site has since been cleaned up to commercial soil cleanup standards and site-specific action levels approved by the NYSDEC. Redevelopment of the site will be for commercial or industrial purposes.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C915290) at:

https://appfactory.dec.ny.gov/DERExternalSearch/ERDSearch

#### **Brownfield Cleanup Program**

New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:
