11th Floor

14203

GZA GeoEnvironmental of New York (GZA) is pleased to provide the attached Phase I Environmental Site Assessment Report. This assessment was completed in accordance with the guidelines described in ASTM Standard Practice E1527-2005 for Phase I Environmental Site Assessments.

This report is based on our review of available historical and environmental records, visual observations of the surface of the subject and adjoining properties and personal interviews with available persons having knowledge of the property. Recognized environmental conditions have been identified and a Phase II subsurface investigation is recommended. The Executive Summary summarizes the results of our work and should be reviewed in conjunction with the entire report.

We hope this satisfies your present needs. If you need any additional information, please call Thomas Bohlen at 716-844-7050.

Sincerely,

GZA GEOENVIRONMENTAL OF NEW YORK

Thomas Bohlen

1.00 INTRODUCTION

1.10 PROJECT AUTHORIZATION

This report presents the results of a Phase I Environmental Site Assessment (ESA) conducted by GZA GeoEnvironmental of New York (GZA) for Northtown Associates LLC (Client), at the Northtown Plaza located along Sheridan Drive, Eggert Road and Bailey Avenue in the Town of Amherst, New York (Site). Authorization to proceed on this project was granted by Client on August 7, 2013. The site visit for the environmental assessment of the property was conducted on August 22 and 23, 2013.

1.20 PROJECT OBJECTIVES

The objectives of this Phase I Environmental Site Assessment are:

- To render an opinion as to whether surficial or historical evidence indicates the
 presence of recognized environmental conditions which could result in the presence
 of hazardous substances or petroleum products in the environment, as defined in
 ASTM Standard Practice E1527-05 for Phase I Environmental Site Assessments.
- To permit the Client to satisfy one of the requirements to qualify for certain Landowner Liability Protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

As defined by ASTM Method E1527-05, the term recognized environmental condition means "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property."

1.30 SCOPE OF SERVICES

GZA's assessment of the Site was completed in general accordance with ASTM Method E1527-05 and GZA's proposal for services. GZA's scope of services consisted of the following activities:

- Review of federal and state regulatory agency databases identified by ASTM for the Site listing and other property listed within a selected radius around the Site;
- Contact with local environmental regulatory agencies to inquire about environmental conditions at the Site and in its vicinity;
- Review of the Site history through available ASTM Standard Historical Sources;

- A site reconnaissance to make surficial observations for evidence of recognized environmental conditions;
- Visual observations from public property of properties within \(\frac{1}{4} \) mile of the Site;
- Observations of adjoining properties to view for the potential use of hazardous materials;

- Review of the information provided as part of "User responsibilities" described in ASTM 1527-05; and
- Preparation of this report which presents GZA's field observations, results, and opinions.

This report is subject to modification if subsequent information is developed by GZA or any other party, and it is subject to the limitations presented in Section 13.00 and Appendix A.

2.00 BACKGROUND SITE INFORMATION

The following information was obtained during GZA's site reconnaissance and from an interview with a Key Site Manager knowledgeable about the Site. Photographs depicting Site conditions at the time of GZA's assessment are presented in Appendix B. Additional information on Site use and area observations and activity at the Site is contained in Sections 6.00 and 7.00.

2.10 SITE LOCATION

The Site consists of six (6) parcels of land located on Sheridan Drive, Bailey Avenue, and Eggert Road in the Town of Amherst, New York. The Site is occupied by 6 commercial/retail buildings with approximately 35 commercial and retail occupants. One (1) residential dwelling with one tenant (the second floor unit us unoccupied) is located in the southeast corner of the Site. A locus plan is attached as Figure 1 and Site Plan as Figure 2. Figure 2 also contains the Northtown Plaza Leasing Plan provided to GZA by the owner at the time of our Site Visit.

2.20 SITE DESCRIPTION

The Site consists of six (6) parcels of land totaling approximately 25 acres and is occupied by a commercial plaza consisting of six (6) buildings occupied by approximately 35 occupants. The following tax map parcel information was provided to GZA by the client.

Parcel 67.41-1-2.1-3131 Sheridan Drive (known as the Northtown Business Park) is a multi-use and multi-tenant structure. This parcel contains Building 5 as shown on Figure 2.

Parcel 67.41-1-3 - 1979 Eggert Road is a two-story residential dwelling. This parcel contains Building 7 as shown on Figure 2. The 1st floor of the building was occupied at the time of our site visit and the 2nd floor apartment was not occupied. This structure was not accessible during our site visit.

Parcel 67.41-1-15 – 4514 Baily Avenue is a paved portion of the Site located off of Bailey Avenue and does not contain a structure.

Parcel 67.41-1-17 – 4532 Bailey Avenue is a one story brick structure used by Northtown, Inc. as there maintenance garage. It contains Building 6 as shown on Figure 2.

Parcel 67.10-1-3.1/B and 67.10-13.1 – 2125 Eggert Road and 3045 Sheridan Drive, respectively, appears to have been combined into one parcel that makes up a majority of the western portion of the plaza. It contains Buildings 1 through 4 as shown on Figure 2. We note that a small portion of this parcel, located within the northern portion of Building 3 is occupied by First Niagara Bank. They have a land lease with Northtown Inc. for this portion of the building and are the owners of the unit.

2.30 CURRENT SITE USE

At the time of GZA's site visit, the Site was occupied by the Northtown Plaza, which consists of six (6) commercial/retail buildings. There is also one (1) residential dwelling located in the southeast corner of the Site. The remaining Site areas were occupied by paved parking areas. A more detailed description of Site use and our reconnaissance observations are discussed in Section 6.0.

2.40 ADJOINING PROPERTIES USE

The properties that adjoin the Site are shown on Figure 2 and generally described as follows.

• North: Commercial and Retail

• South: Commercial, Retail and Residential

East: Commercial and RetailWest: Commercial and Retail

2.50 AREA USE

The general property usage in the vicinity of the Site is:

North: Commercial, Retail and Residential
 South: Commercial, Retail and Residential
 East: Commercial, Retail and Residential
 West: Commercial, Retail and Residential

2.60 SITE UTILITIES

Gas: National Fuel Electricity: National Grid

<u>Potable Water:</u> Erie County Water District

<u>Sanitary Sewer:</u> Town of Amherst <u>Storm Sewer:</u> Town of Amherst

Solid Waste: Various commercial waste haulers determined by tenants

3.00 ENVIRONMENTAL SETTING

The following subsection provides information regarding the general regional physiographic, regional hydrology and soil/rock conditions in the area of the Site.

3.10 REGIONAL PHYSIOGRAPHY

Based on a review of the U.S. Geologic Survey Map for Buffalo NE, NY dated 1965, the Site is approximately 600 feet above mean sea level. The Site area topographic gradient appears to gradually slope to the north.

3.20 REGIONAL HYDROLOGY

Based on a review of the USGS topographic map, Buffalo NE, NY and knowledge of the Site area, the estimated depth to groundwater is likely greater than forty feet below ground surface. A tributary of Ellicott Creek is located approximately 500 feet northeast of the Site, and appears to flow in a northeasterly direction. Ellicott Creek is located approximately 1.6 miles northeast and 2.3 miles east of the Site and flows in a westerly direction. Surface water flow is expected to drain towards on-Site catch basins located throughout the Site. Roof drains are connected directly to the storm sewer system. Localized groundwater flow at the Site is expected to flow in a general northerly direction. Localized flow direction in the area of the Site may vary as a result

of underground utilities, septic systems, or heterogeneous subsurface conditions. Subsequent references to upgradient and downgradient properties are based on the assumed northerly groundwater flow direction.

3.30 SOIL AND ROCK CONDITIONS

Based on the EDR Geocheck report, the bedrock at the Site is anticipated to be of Paleozoic era (upper Silurian), stratified sequence. According to the Soil Conservation Service STATSGO data supplied by EDR and the Soil Survey of Erie County, New York, dated 1986, the Site soils consist of Urban land. This unit is a miscellaneous area where 80 percent or more of the soil surface is covered by asphalt, concrete, buildings, or other impervious structures.

3.40 WETLANDS

Based on information provided by Environmental Data Resources (EDR), the Site is not located within the 100 year or 500 year floodplain, and state or national wetlands are not present on-Site.

GZA searched the NYSDEC website (http://www.dec.ny.gov/imsmaps/ERM/viewer.htm) and U.S. Fish and Wildlife Service National Wetlands Inventory (http://107.20.228.18/Wetlands/WetlandsMapper.html) to identify potential wetlands. No wetlands were identified.

4.00 HISTORICAL USE INFORMATION

The site history was developed from ASTM Standard Historical Sources and information provided by individuals at the Town of Amherst Assessor's and Building Department. A list of sources interviewed is included in Section 9.00. ASTM indicates that "all obvious uses of the property shall be identified from the present, back to the property's first developed use, or back to 1940, whichever is earlier. ASTM further indicates that "data failure is not uncommon" when trying to establish the historical use of a property. A historical summary report is provided in Section 4.10 below. Specific detail obtained from ASTM historical sources is contained in subsequent sections.

4.10 SITE AND AREA HISTORY SUMMARY

The Site appears to have been used as agricultural land until it was developed for commercial use in the mid-1950s. The Site continued to be developed for commercial use from 1958 to about 1983, where it reached a configuration similar to that during our site visit.

The surrounding area consisted primarily of agricultural land or residential type facilities until the early 1950s. The surrounding area was developed primarily for residential use with the with the exception of the main roads (Eggert Road, Sheridan Drive, Bailey Avenue and Niagara Falls Boulevard) that have primarily commercial development.

4.20 CITY DIRECTORIES REVIEW

GZA requested City Directories for the three main streets (Eggert Road, Sheridan Drive, and Bailey Avenue) in the vicinity of the Site due to the number of different addresses that make up the Site. Information was provided for the following years 1963, 1969, 1975, 1980, 1986, 1991, 1998, 2003, 2008 and 2013 via Polk City Directories. The information can be found in Appendix C.

The following listings were identified as potential occupants that may have used chemicals or products.

Bailey Avenue

- 1963 4532 Bailey Avenue Gardner-Denver Company mfrs. machinery; 4544 Bailey Avenue Eggertsville Service Center gas station
- **1969, 1975** 4532 Bailey Avenue Gardner-Denver Company mfrs. Machinery

Eggert Road

- **1963, 1969, 1975** 2125 Eggert Road Northtown Auto Wash
- 1980 2125 Eggert Road Formula Car Wash
- **1986, 1993** 2125 Eggert Road Northtown Plaza Car Wash
- 2003, 2008 2125 Eggert Road Buffalo Discount Muffler
- **2013** 2125 Eggert Road Total Automotive auto repair and service

Sheridan Drive

- 1963 3045 Sheridan Drive Dunlop Tire Sales; 3075 Sheridan Drive One Hour Martinizing clothing cleaner; 3109 Sheridan Drive – Brighton Appliance Service
- **1969** 3045 Sheridan Drive Dunlop Tire Sales; 3075 Sheridan Drive Northtown One Hour Cleaners
- **1975**, **1980**, **1986** 3045 Sheridan Drive Dunlop Tire; 3077 Sheridan Drive Northtown One Hour Cleaners

- **1991, 1998** 3045 Sheridan Drive Dunn Tire; 3077 Sheridan Drive Northtown One Hour Cleaners
- **2003** 3045 Sheridan Drive Dunn Tire
- **2008, 2013** 3045 Sheridan Drive Dunn Tire; 3077 Sheridan Drive Giro Cleaners

4.30 HISTORIC TOPOGRAPHIC MAP REVIEW

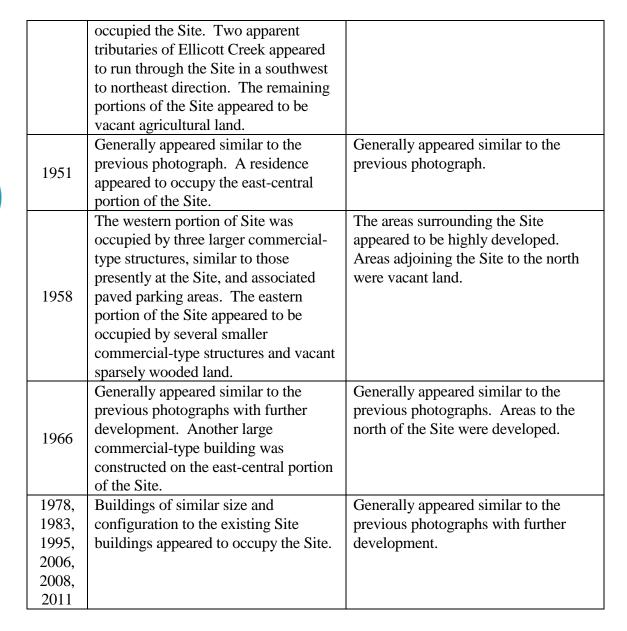

EDR provided historical topographic maps of the Site for the years 1901, 1946, 1948, 1950 and 1965. Copies of the topographic maps are included in Appendix C.

Year	Site	Nearby Properties
1901	The Site appeared to be vacant land. Two tributaries of Ellicott Creek appeared to run through the Site in a southwest to northeast direction.	The area surrounding the Site appeared to be mostly vacant land with some residences. Areas to the southwest of the Site appeared to be densely developed.
1946	Generally appeared similar to the previous map. Two dwellings appeared to occupy the western and eastern portions of the Site.	Generally appeared similar to the previous map with further development. The area surrounding the Site generally appeared to be vacant land with residential development and schools present.
1948, 1950	The Site was shaded in red, indicating it was highly developed. Individual Site features were not indicated on the map.	Generally appeared similar to the previous map with further development. The areas surrounding the Site were shaded in red, indicating they were highly developed.
1965	The Site was occupied by the Northtown Plaza Shopping Center. Six commercial-type structures appeared to occupy the Site.	Generally appeared similar to the previous map with further development.

4.40 AERIAL PHOTOGRAPH REVIEW

GZA reviewed copies of historical aerial infrared photographs provided by EDR dated 1958, 1966, 1978, 1983, 1995, 2006, 2008, 2009, and 2011; and http://www.erie.gov/depts/community/highways_aerial.phtml dated 1927 and 1951. Copies of the photographs are included in Appendix C.

Year	Site	Nearby Properties
	A residential-type structure appeared	The surrounding areas appeared to be
1927	to occupy the western portion of the	mostly vacant agricultural land with
	Site. Five north-south oriented roads	sparse residential development.

4.50 HISTORIC ATLAS REVIEW

GZA reviewed a copies of historical Sanborn maps provided by EDR dated 1957. Copies of the maps are included in Appendix C.

Year	Site	Nearby Properties
1957	The western portion of the Site was	The areas surrounding the Site
	occupied by the Northtown Plaza,	generally appeared to be developed
	which consisted of three buildings.	with residential and commercial type
	These buildings had approximately 23	structures. Two gasoline filling
	storefronts including a bank,	stations were present northeast of the
	restaurant, and paint and varnish shop.	Site, at the southern corners of Bailey
	A small waste room with incinerator	Avenue and Sheridan Drive.

Year	Site	Nearby Properties
	was located in a building in the	
	southern central portion of the Site. A	
	dwelling with an apartment occupied	
	the east-central portion of the Site. An	
	automotive repair facility occupied the	
	eastern portion of the Site at 4544	
	Bailey Avenue.	

4.60 TITLE SEARCH AND ENVIRONMENTAL LIEN SEARCH REPORT

A title search was provided to GZA by the Client. The title was completed by Commonwealth Land Title and was dated July 8, 2013. The title did not identify any environmental liens or provide information regarding past uses of the property.

4.70 BUILDING DEPARTMENT RECORDS

GZA visited the Town of Amherst Building Department for information pertaining to the Site. The desk clerk indicated she was unaware of any environmental concerns associated with the Site. The department maintains an electronic index of issued building permits dating back to at least the early 1950s. The desk clerk provided GZA with a copy of the building permit index for the Site addresses of 3027-3169 Sheridan Drive, 4514-4548 Bailey Avenue, and 1979-2129 Eggert Road. A copy of the building permit index is included in Appendix C. The desk clerk indicated a retrieval of all of the actual building permits referenced in the index was not feasible, due to volume and because the permits are stored at several different locations and in different media (i.e. archived hardcopy, microfilm, or scanned into a database). Many of the building permits on file pertained to signs, commercial alterations, construction, and electrical permits for historical plaza occupants. Based on information provided by the clerk and ASTM definitions, GZA considers these files not Practically Reviewable. ASTM reference definition 3.2.65

Five of the listings in the database were described as "T" – indicating they may pertain to tank installations and/or removals. The desk clerk was able to find the information pertaining to these listings on microfilm. That information is summarized below and is included in Appendix C.

- 4544 Bailey Avenue The electronic index references three "T" permits dated 12/7/1954, 2/15/1955, and 3/22/1955 for Eggertsville Super Service. The desk clerk indicated that the microfilm file pertaining to these listings contained the following.
 - o 2/9/1955 building permit for the installation of one (1) 550-gallon tank for a service garage. The file also included a drawing indicating the

locations of a 550-gallon waste oil tank, three (3) 3,000-gallon gasoline USTs, and the associated pump island.

- 2125 Eggert Road The electronic index references one "T" permit dated 8/10/1970 for Northtown Auto Wash Inc. The desk clerk indicated that the microfilm file pertaining to these listings contained the following.
 - 8/6/1970 installation drawings for three (3) 8,000-gallon metal tanks and associated pump island. The USTs were located northwest of the carwash building.
 - o 5/10/1996 installation drawings for one (1) 16' x 42" diameter partially underground propane tank at 3097 Sheridan Drive. The propane tank was located west of the carwash building and was noted to extend 3-inches above ground surface.
- 3097 Sheridan Drive Mr. Richard Andrews, Senior Fire Inspector, conducted a search of a database pertaining to the installation/removal of USTs for the Site addresses. The search indicated that a permit was issued to remove three (3) 8,000-gallon USTs on 10/24/1995 at 3097 Sheridan Drive.

The locations of the tanks are shown on Figure 2 and additional tank information is in Section 6.

4.80 PROPERTY TAX FILES

GZA visited the Town of Amherst Assessor's Office for information pertaining to the Site. The desk clerk was unaware of any environmental concerns associated with the Site. GZA requested information for the Site addresses of 3027-3169 Sheridan Drive, 4514-4548 Bailey Avenue, and 1979-2129 Eggert Road. Files were only available for the following addresses: 1979 Eggert Road, 3049-3139 Sheridan Drive, 3051 Sheridan Drive, 3131 Sheridan Drive, 4514 Bailey Avenue, and 4532 Bailey Avenue. GZA obtained copies of the tax cards from these files which are included in Appendix C. No environmentally pertinent information was observed in the files.

5.00 PREVIOUS SITE INVESTIGATIONS

GZA was not provided with any previous site investigation reports for review, other than those related to asbestos-contained material work (testing or abatement activities) completed at the Site for various tenant spaces.

6.00 SITE RECONNAISSANCE

The purpose of GZA's site reconnaissance was to make surficial observations for evidence of recognized environmental conditions which could result in the presence of hazardous materials in the environment. GZA Senior Project Manager Christopher Boron visited the Site on August 22 and 23, 2013 and was accompanied by Mr. Dale Russell, Vice President of Shopping Center Operations for Northtown Inc. during the Site reconnaissance. Observations were documented and pertinent features or areas of environmental concern were photographed and are referenced in the text. Selected photographs are included in Appendix B, and Figure 3 depicts pertinent Site features. A summary of each area assessed is presented below.

While de minimus staining was identified in several locations both inside and outside of the buildings, no evidence of Recognized Environmental Conditions was observed during the reconnaissance associated with this staining.

6.10 EXTERIOR OBSERVATIONS

The periphery of the Site was visually assessed for recognized environmental conditions.

6.10.1 Underground Storage Tanks (USTs)

Mr. Russell identified the location of two existing heating oil USTs, which are no longer in use and three former 8,000 gallon gasoline USTs. It is unknown what capacity the two heating oil USTs are, however the vent pipe and fill port for one of the USTs were observed protruding from the ground on the west side of Building 3. The other heating oil tank was located near the southwest corner of Building 4 and Mr. Russell believed that UST was filled with sand. No fill port or vent pipes were observed in the general vicinity. The location of these USTs is shown on Figure 2.

The three, 8,000 gallon gasoline tank were formerly present on the north side of Building 2 and were removed in 1995. The location of the former tanks is shown on Figure 3.

6.10.2 Aboveground Storage Tanks (ASTs)

No ASTs were observed on the exterior portions of the Site.

6.10.3 Hazardous Substances or Petroleum Products Use

No hazardous substances were observed during GZA's site reconnaissance. However, petroleum products are used at Buildings 1, 2 and 6. Building 1 is occupied by Dunn Tire, which performs routine maintenance on automobiles, in

addition to tire sales. Building 2 is occupied by Total Automotive, an automobile repair facility. Building 6 is the Northtown Plaza maintenance facility.

6.10.4 Staining

De minimis surficial staining was observed around two 55-gallon drums labeled as kitchen grease, stored on the southwest corner of Building 4 near the back door of Taste of India. Other de minimis staining observed was typical of parking lots.

6.10.5 Electrical Transformers/Equipment

There are approximately 39 pole mounted transformers associated with the Site. No staining was observed around the pole-mounted transformers.

A pad-mounted dry transformer is located on the south side of Building 5. No staining was observed around this transformer.

According to information provided by National Grid, National Grid owns the transformers located at the Site.

6.10.6 Drywells and Sumps

No evidence of exterior drywells or sumps was observed during GZA's site reconnaissance.

6.10.7 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were observed during the Site reconnaissance.

6.10.8 Wells

No evidence of wells was observed during GZA's site reconnaissance. Municipal water is available in the Site area.

6.10.9 Solid Waste

Solid waste generated at the Site is picked up by commercial waste haulers. It is the responsibility of the tenants at the Site to manage their own waste disposal. There were dumpsters located behind the various buildings at the Site for this purpose.

6.10.10 Process Wastewater

No evidence of on-site process wastewater disposal was observed.

6.10.11 Septic System

No septic systems were observed. Additionally, municipal sanitary sewer is available in the area.

6.10.12 Stressed Vegetation

No areas of stressed vegetation were observed on the Site.

6.10.13 Soil/Water Sampling

No subsurface exploration or chemical analysis has been included as part of GZA's scope of services. Information regarding subsurface conditions can be obtained by traditional subsurface exploration techniques and the collection and chemical analysis of soil and water samples.

6.10.14 Oil/Water Separators

Building 1 (Dunn Tire) and Building 2 (Total automotive) have oil/water separators. Mr. Russell was unable to identify the location of the oil/water separator associated with Building 1. The oil/water separator associated with Building 2 is located in the northern interior of the building. The oil/water separators are maintained by the tenants. No evidence of other oil/water separators was observed.

6.10.15 Surface Water Runoff

Surface water is expected to flow to the on-site network of storm water catch basins. Roof drains are tied directly into the storm sewer system. The majority of the Site is either covered with building or parking lot so there is little infiltration in to the ground.

6.10.16 Other Observations

Two small approximate 4-inch diameter drains were located on the west side of Building 3.

A pile of asphalt cold-patch, which was covered with a tarp and tires, was located on the south east side of Building 5. It is used by maintenance to repair the parking lot.

First Niagara Bank occupies a drive-through kiosk located on the north side of the Site.

Trench or circular drains are located in below-grade loading docks throughout the Site. According to Mr. Dale Russell these drains are tied to the storm sewer system at the Site.

6.20 INTERIOR OBSERVATIONS

Portions of the interior of the six buildings associated with the Site buildings were visually assessed for evidence of recognized environmental conditions. GZA did not attempt to view all the interior public area tenant spaces of the plaza, but focused on the equipment rooms, maintenance areas, chemical/petroleum product use areas and basements. The residential dwelling located along Eggert Road was not accessible at the time of our visit.

6.20.1 Construction

There are seven buildings that occupy the Site, six of which are associated with the Northtown Plaza (identified as Buildings 1 through 6 on Figure 2). Of these six buildings, four are concrete slab-on-grade, and there are three basement areas (one is located beneath Buildings 3 and two are located beneath Building 4).

The six plaza buildings are steel beam and joist construction and have mason walls. Metal studs and fire shield drywall are present between the tenant units. The finished units have drop ceiling and the interior finishes are based on the tenant's requirements.

Interior floor finishes of six plaza buildings consisted of 9" x 9" ACM floor tiles, 12" x 12" vinyl tile, linoleum, carpeting, and concrete. (It should be noted that 9"x9" floor tile most often contain asbestos.) Travertine floor tile was present in a hallway in the southwest corner of Building 5.

The six plaza buildings have either a gypsum deck roofing or metal roof deck with a tar or rubber cover.

Water leakage was observed in the unoccupied unit of Building 4 former occupied by Bon-Ton.

The residential dwelling (identified as Building 7 on Figure 2) has a concrete block foundation, a wood frame, vinyl siding and wood roof that is shingled. The interior of the residential dwelling was not accessible at the time of our visit.

6.20.2 Heating and Cooling

The six plaza buildings are heated by natural-gas roof-mounted units, with the exception of Building 2 (Total Automotive) which has a waste oil boiler for heat.

The residential building is heated by natural gas forced air.

6.20.3 Current Site Use

The Site is occupied by 6 commercial/retail buildings with approximately 35 commercial and retail occupants, and one (1) residential building with one tenant (the second floor unit us unoccupied). A list of the tenants and their location within the plaza at the time of our visit is shown on Figure 2.

6.20.4 Chemical Use and Storage Areas

Each tenant occupied unit likely has a maintenance storage area used to perform routine cleaning within the unit. The Veterans Adults Day Care and Social Security Administration have contracted cleaning services.

Chemical use and storage areas were observed in Buildings 1, 2, 4 and Building 6. Tenants within Buildings 1 and 2 perform automotive repair and Building 6 is used by Northtown, Inc. as the maintenance garage for the plaza. Therefore, small quantities of degreasers are stored at multiple areas within these three buildings.

Two 55-gallon drums of diesel fuel were located inside Building 6 for use in their maintenance vehicles. No staining was observed around the drums.

One 30-gallon drum of cooling water treatment was located on the 3rd floor of the former Bon Ton unit in Building 4.

6.20.5 Hazardous Wastes Generated and Waste Storage Areas

Hazardous waste is currently not generated at the Site. Used oil and used oil filters generated from oil changes inside Building 1 (Dunn Tire) were stored inside the building along the south wall in 55-gallon drums. Safety Kleen is responsible for the removal of used oil and filters.

Used oil and used oil filters generated from oil changes inside Building 2 (Total Automotive) are stored inside the building along the north wall. The used oil is stored in a steel 275 gallon AST and use in the boiler system to heat the building. Heritage Crystal Clean is responsible for the removal of used oil (not used in the

boiler) and filters. No evidence of release associated with this area was observed by GZA.

One 55-gallon drum of waste oil from equipment maintenance was located inside Building 6. No staining was observed around the drum.

6.20.6 Stains or Corrosion

De minimis amounts of staining were observed in Buildings 1, 2, 4, and 6. Tenants within Buildings 1 and 2 perform automotive repair. Building 6 is used by Northtown, Inc. as the maintenance garage for the plaza. Staining was typical of these types of activities. No conduits to the subsurface were noted in the vicinity of the staining.

A de minimis amount of staining was also observed in basement of Building 4 around two compressors associated with the chiller unit in the air handling room. Staining did not extend to any pathways to the environment. .

A small hydraulic oil leak had occurred in the hydraulic room for the freight elevator in the basement beneath Building 4 as evidenced by Speedy dry present on the floor.

No other significant areas of staining or corrosion were observed at the Site.

6.20.7 Floor Drains or Sumps

Floor drains are located within many of the bathrooms within the tenant occupied spaces. These are not considered an environmental concern.

Three floor drains were observed in the service area of Building 1 (Dunn Tire) which are connected to the oil/water separator. Trench drains were observed in service area of Building 2 (Total Automotive) which are connected to the oil/water separator. Safety clean is responsible for emptying the oil/water separators. Floor drains were also observed in the air handling room in the basement of Building 4.

Each of the three basement areas (one in Building 3 and two in Building 4) has one sanitary ejector sump, which pumps sanitary sewer material which collects in the sump, out of the basement and into the municipal sanitary sewer system.

A sump was also observed in the boiler room and in the hydraulic room for the freight elevator in the basement beneath Building 4.

6.20.8 Transformers

Transformers were observed within locked electrical rooms associated with Buildings 4 and 5. Building 4 had four different electrical rooms containing transformers of which two were not accessible. According to National Grid, National Grid owns the transformers.

GZN

6.20.9 Other Interior Observations

The dry cleaner (Gi-Ro) located in the southern most unit of Building 3 no longer provides in-house cleaning. The former dry cleaning equipment was removed in the late 1990s.

An incinerator was formerly located in the basement of Building 4.

Elevators were present within the basements in Buildings 3 and 4. Building 3 and 4 had passenger elevators and Building 4 had two freight elevators as well. The four elevators were hydraulic lift elevators.

7.00 VICINITY RECONNAISSANCE

As part of GZA's site assessment, a reconnaissance of the properties adjoining the Site, as well as the vicinity within a ¼ mile radius of the Site, was conducted from public properties. The result of GZA's vicinity reconnaissance is presented below.

7.10 HAZARDOUS MATERIAL USE AT ADJOINING PROPERTIES

Adjoining properties are identified in Section 2.30. Hazardous materials and/or petroleum products could potentially be used at:

- BJ's Gas Station is located north of the Site across Sheridan Drive and is a retail gas station which stores its product in underground storage tanks. Based on northerly regional groundwater flow evaluation, this property is downgradient.
- AAA Car Care Plus is located along the western property boundary of the Site
 and likely uses degreasers and petroleum products in the maintenance of
 automobiles perform at this property. No exterior storage of hazardous
 materials or petroleum products were observed on these properties during our
 vicinity reconnaissance. Based on northerly regional groundwater flow
 evaluation, this property is cross-gradient.

Wash-World Laundromat at 2040-2044 Eggert Road is located south of the Site across Eggert Road. No exterior storage of hazardous materials or petroleum products were observed on these properties during our vicinity reconnaissance.

Based on northerly regional groundwater flow evaluation, this property is upgradient of the Site. This property was listed as dry cleaner and small quantity generator of hazardous waste under Courtesy Cleaners as discussed in Section 8.1, however no releases were noted.

Pool-Brite is located is east of the Site across Bailey Avenue and likely sells
chemicals used to maintain recreational pools. No exterior storage of hazardous
materials or petroleum products were observed on the property during our
vicinity reconnaissance. Based on northerly regional groundwater flow
evaluation, this property is cross-gradient.

7.20 HAZARDOUS MATERIAL USE AT VICINITY PROPERTIES

The area within ½ mile of the study Site is primarily commercial and residential. Hazardous materials and/or petroleum products are potentially used at the following nearby properties.

- Firestone Auto Center is located northwest and downgradient of the Site at the corner of Niagara Falls Boulevard and Sheridan Drive. No exterior storage of hazardous materials or petroleum products was observed on these properties during our vicinity reconnaissance.
- U-Haul is located southwest and cross-gradient of the Site at the corner of Niagara Falls Boulevard and Eggert Road. No exterior storage of hazardous materials or petroleum products was observed on these properties during our vicinity reconnaissance.

8.00 REGULATORY DATABASE REVIEW

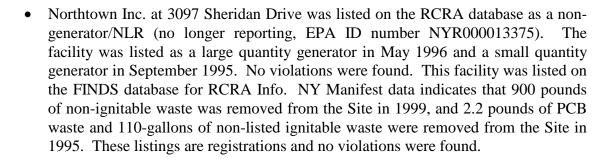

The following section is based on public information obtained from various federal, state, and local agencies that maintain environmental regulatory databases. These databases provide information about the regulatory status of a property and incidents involving use, storage, spillage, or transportation of oil or hazardous materials. Information was gathered on August 7, 2013 by GZA personnel and by a professional data search service, EDR. Federal, state, and local regulatory information is presented in Appendix D. A discussion of the reviewed information is presented in the following sections.

8.10 FEDERAL AGENCY DATABASES

Source: Environmental Data Resources, Inc.

<u>Site:</u> The Site was listed on the following federal databases

reviewed.

• Northtown Cleaners at 3077 Sheridan Drive was listed on the RCRA database as a non-generator/NLR (no longer reporting, EPA ID number NYD045166667). This facility was listed as a small quantity generator in July 1999 and as a large quantity generator in July 1985. No violations were found. This facility was listed on the RCRA database for RCRA Info and FIS. NY Manifest data indicated that at least 5,400 pounds of type F002 waste, identified as halogenated solvents and still bottoms from recovered solvents; and 227-gallons of type F001 waste, identified as unknown, were removed from the facility between 1987 and 1999. EDR indicated an additional 90 manifest listings were available. This facility was listed on the Drycleaners database (facility identification number 9-1422-00286). This facility was listed on the EDR US Hist Cleaners database (Giro Cleaners) for the years 2004 and 2007 through 2012. These listings are registrations and no violations were found.

Nearby Properties:

The following facilities were identified on the federal databases reviewed.

- Reid Petroleum Corp./Quick Stop Food Mart at 1924 Eggert Road, which adjoins
 the Site to the southeast, was listed on the RCRA database as a RCRA nongenerator/NLR (EPA ID number NYR000029744). No violations were identified.
 This facility was listed on the FINDS database for RCRA Info. Since these listings
 are registrations, and no violations have been found, they are not expected to have a
 significant impact on the environment at the Site.
- Auto Pro at 2131 Eggert Road, which adjoins the Site to the west, was listed on the RCRA database as a RCRA non-generator/NLR (EPA ID number NYD986981397). Two violations were listed which have achieved compliance. This facility was classified as a small quantity generator in 1991 and as a large quantity generator in 2001. This facility was listed on the FINDS database for RCRA Info and FIS. Due to the proximity of this facility to the Site, the potential exists for it to have impacted the Site soil and/or groundwater.
- Courtesy Cleaners at 2044 Eggert Road, which adjoins the Site to the south, was listed on the RCRA database as a conditionally exempt small quantity generator of hazardous waste. This facility was listed as a small quantity generator in 1999 and 2003; and a large quantity generator in 1992. No violations were found. This

facility was listed on the FINDS database for RCRA Info and FIS. This facility was also listed on the DRYCLEANERS database (facility identification number 9-1422-00272). Due to the proximity of this facility to the Site and being in an upgradient direction based on assumed groundwater flow direction, the potential exists for it to have impacted the Site soil and/or groundwater.

• In addition to the above listed facilities, one RCRA – small quantity generator, five RCRA – conditionally exempt small quantity generators, six RCRA – non-generators/no longer reporting facilities, and one US AIRS facility were identified within the indicated search radii. However, based upon the distance/direction from the Site and the facilities' regulatory status, these listings are not expected to have significantly impacted the environment at the Site.

8.20 STATE AGENCY DATABASE REVIEW

Source: Environmental Data Resources, Inc.

<u>Site:</u> The Site was listed on the following state databases reviewed.

- Northtown Plaza at 3097 Sheridan Drive was listed on the UST database (PBS registration number 9-600735). The facility status was listed as unregulated. The facility was listed for three (3) 8,000-gallon carbon-steel gasoline USTs. The USTs were closed/removed on October 25, 1995. No closure documentation is available pertaining to these USTs. GZA spoke with Andrea Skalski, NYSDEC PBS Group, regarding PBS registrations at Northtown. She indicated that when the three 8,000-gallon USTs were removed in 1995, the original PBS file (9-221295) was accidentally filed as a non-regulated site and then re-opened with the new registration number (9-600735), resulting in the duplicate registrations. She indicated that both PBS files registrations pertain to the same three 8,000-gallon USTs removed in 1995.
- A vault at the Site address of 2001 Eggert Road was listed on the NY Spills database (spill number 1201475) for an approximate 10-gallon release of non-PCB oil associated with a defective sump pump. The release was reportedly contained within the concrete vault. National Grid was the responsible party and contracted Op-Tech to pump out the oil and absorb the remaining material with absorbent pads. The release was remediated to the satisfaction of the regulators and the listing was closed in June 2012. This is considered a Historical Recognized Condition that requires no further action.
- Northtown at the Site address of 4544 Bailey Avenue was listed on the NY Spills database (spill number 9804627) for contamination associated with a NYSDOT project on Bailey Avenue. The regulatory agency reviewed analytical data associated with the project which indicated low-level exceedences. Toxicity

Characteristic Leaching Procedure (TCLP) analytical results were below STARS guidance values and samples did not exhibit staining or nuisance odors. The listing was closed in July 1999.

- Total Automotive Inc. at the Site address of 2125 Eggert Road, was listed on the EDR US Hist Auto Stations database. Northtown Plaza Car Wash at 2125 Eggert Road was listed on the UST and HIST UST databases (PBS registration number 9-221295) for three, 8,000-gallon closed unleaded gasoline USTs. The USTs were removed from the Site and reportedly closed on October 1, 1995. Closure documentation was provided from NYSDEC. We note that one composite soil sample (consisting of excavation sidewalls and bottom) was collected from the tank excavation. The results were non-detect.
- The Site address of 3065 Sheridan Drive, was listed on the EDR Hist Auto Stations database. Davidson's Truck Repair was listed as the occupant in 2003. No further information was available.
- The Site address of 2125 Eggert Road was listed on the NY Spills database (spill numbers 0608552 and 0608071) for pavement impacted when a transformer fell from a pole during a snow storm. Approximately 20-gallons of reported non-PCB oil were released from the transformer. The file indicates that the release was contained on the pavement and that no receivers or soil were impacted. The release was cleaned by Op-Tech on behalf of National Grid to the satisfaction of the regulators and the listing was closed in February 2007. Since subsurface soils were reportedly not impacted, and the listing was closed by the regulatory agency, GZA consider this aa Historical Recognized Condition.

Nearby Properties: The following facilities were identified on the state databases reviewed.

• A former gasoline station addressed as 3154 Sheridan Drive was listed on the NY Spills database (spill number 0003276) contamination identified during a Phase II ESA. NYSDEC reviewed the data associated with the Phase II ESA and identified only one compound exceeding regulatory guidelines. No further action was required and the listing was closed in February 2001. This address was also listed on the NY Spills database (spill number 0375032). This listing addresses residual contamination left behind from spill number 0003276. Impacted soils were noted to be removed along Carmen Street, on each side of a main sewer line, and along a former bank building. Confirmatory analytical samples indicated no volatile organic compound (VOC) exceedences, and only slight semi-volatile organic compound (SVOC) exceedences. The regulatory agency was provided with the full report and the listing was closed in October 2003. The listing has been closed by the regulatory agency and being downgradient of the Site, based on a northerly

groundwater flow direction, is not likely to have significantly impacted the Site soil and/or groundwater.

- Smith Dairy at 1924 Eggert Road, which adjoins the Site to the southeast, was listed on the UST database and HIST UST database (PBS registration number 9-487813) for several closed USTs. This facility was listed on the LTANKS database (spill numbers 0103704, 0103705, 0103706, and 0103707) for multiple tank test failures. These listings were closed in July 2001 and information pertaining to these releases was transferred to spill number 9608075. Remediation including UST and impacted soil removals and the installation of remediation systems occurred at the facility and the listing was closed to the satisfaction of the regulators in April 2002. The file noted that further work may be required during future road work. This facility was listed on the NY Spill database (spill number 9804621) for contamination associated with a New York State Department of Transportation (NYSDOT) highway project. Information pertaining to this listing was also transferred to spill number 9608075. This facility was listed on the NY Spills database (spill numbers 9502152 and 9012692) for minor surficial releases. The material was absorbed by Speed Dry to the satisfaction of the regulators and the listings were closed in May 1995 and November 1991. Due to the regulatory status of the above listings (i.e. closed) they are not expected to have significantly impacted the environment at the Site.
- A National Fuel excavation associated with a gas-line installation at Eggert and Carmen Roads, which adjoin the Site to the south, was listed on the NY Spills database (spill number 0652092) for petroleum contamination. Approximately 150 tons of soil and 400-gallons of impacted groundwater were removed from the excavation. Confirmatory analytical soil samples were noted to be below TAGM values and the listing was closed in January 2010. Since the listing has been closed it is not expected to have significantly impacted the environment at the Site.
- 2131 Eggert Road, which adjoins the Site to the west, was listed on the EDR US
 Hist Auto Stations database. Auto Pro Center was listed from 1999 through 2000,
 Colden Auto Collision in 2001, and AAA Car Care in 2011 and 2012. Due to the
 proximity of these automotive repair facilities to the Site, they have the potential to
 impact the Site soil and/or groundwater.
- 1st Amherst Development Corporation at Alberta & Sheridan Drive, which adjoins the Site to the north, was listed on the UST database (PBS registration number 9-600707) for two closed/removed 1,000-gallon USTs. Since the site is downgradient and these listings are registrations and no violations have been found, they are not expected to have significantly impacted the environment at the Site.
- Kristen Uniform and Linen at 2010 Eggert Road, which adjoins the Site to the south, was listed on the LTANKS and NY Spills databases (spill numbers 9302534 and 9308622) for contamination discovered during a test pit investigation. The

contaminated soil was removed and confirmatory analytical results were provided to NYSDEC. The listing was closed in August 1995. This facility was listed on the UST database (PBS registration number 9-600711) for four (4) closed/removed USTs. Since the listings have been closed by the regulators, they are not expected to have significantly impacted the environment at the Site.

- 2040 Eggert Road, which adjoins the Site to the south, was listed on the EDR US Hist Cleaners database. EDS Wash World was listed from 1999 through 2001 and Wash World Laundromat was listed in 2010 and 2011. Due to the proximity of these facilities to the Site, they have the potential to impact the Site soil and/or groundwater.
- NYSDOT Project/AMH Health at the intersection of Bailey and Eggert, which
 adjoin the Site to the southeast, was listed on the LTANKS database (spill number
 9804626). The contamination was noted to have originated from the Healthcare
 Center, as it was formerly a gas station. Contaminated soil excavation was limited
 due to the presence of utilities. Analytical results were provided to the satisfaction
 of the regulators and the listing was closed in May 2000. Since the listing has been
 closed, it is not expected to have significantly impacted the environment at the Site.
- Drums at Cobti's located at the intersection of Bailey and Eggert Road, which adjoins the Site to the southeast, was listed on the NY Spills database (spill number 9875362) for a complaint regarding deliberate cooking grease dumping. The police and the regulatory agency responded and discovered no evidence of a release. The listing was closed in January 1999. Since there was no evidence of an actual release and the listing was closed by the regulators, it is not expected to have significantly impacted the environment at the Site.
- Springbrook Golf Shop at 4555 North Bailey Avenue, which adjoins the Site to the east, was listed on the NY Spills database (spill number 0175201) for contamination discovered during a Phase II ESA. Approximately 300-tons of impacted material were removed and analytical sample results were provided to the satisfaction of the regulatory agency. The listing was closed in August 2001. Since the listing has been closed by NYSDEC, it is not expected to have significantly impacted the environment at the Site.
- An old gas station at 3140 Sheridan Drive, which adjoins the Site to the north, was
 listed on the NY Spills database (spill number 0302102) for contamination
 identified during a Phase II ESA. The report was provided to NYSDEC and the
 listing was closed in June 2003. Since the upgradient listing has been closed by the
 regulators, it is not expected to have significantly impacted the environment at the
 Site.
- A commercial site at 951 Niagara Falls Boulevard, which is approximately 340 feet west-northwest of the Site, was listed on the NY Spills database (spill number

0911057) for soil and reported minor groundwater contamination associated with a former tank field. The regulatory agency contacted the owner of the facility and indicated that remediation is required. This listing remains open; however, due to the distance and direction (i.e. in an assumed cross-gradient direction) this facility is not expected to have significantly impacted the environment at the Site.

In addition to the above listings, thirty-six NY Spills facilities, nineteen LTANKS
facilities, six UST facilities, two HIST UST facilities, eight AST facilities, one
HIST AST facility, one CBS facility, seventeen EDR US Hist. Auto. Stations, and
three drycleaning facilities were identified within the indicated search radii.
However, based upon the distance/direction from the Site and the facilities'
regulatory status, these listings are not expected to have significantly impacted the
environment at the Site.

Source: New York State Department of Environmental Conservation

(NYSDEC)

Summary: Submitted a Freedom of Information Legislation (FOIL) request

to NYSDEC dated August 8, 2013. NYSDEC responded with the contents of their petroleum bulk storage (PBS) file via email. The following information was available. Copies of the information provided by NYSDEC are included in Appendix C.

- 12/20/1986 A PBS application for the Northtown Plaza Car Wash located at 2125 Eggert Road. The application pertained to three (3) 8,000-gallon unleaded gasoline USTs.
- 10/1991 The PBS file contained the results of several tank tightness tests for three (3) USTs located at 2125 Eggert Road. The USTs were identified as, "Regular Unleaded Tank #1", "Ultra Unleaded Tank #1", and "Ultra Blend Tank #1". The maximum capacity of the three tanks was listed as 8,101 gallons. The test results are included in Appendix C.
- 6/9/1992 A PBS renewal application (PBS registration number 9-221295) for the Northtown Plaza Car Wash located at 2125 Eggert Road. The registration renewal pertained to three (3) 8,000-gallon unleaded gasoline USTs.
- 7/27/1993 NYSDEC performed a PBS inspection at the Northtown Plaza Car Wash. NYSDEC indicated the facility must post its registration certificate at the Site.
- 12/22/1995 A tank closure report for Northtown, Inc. at 2125 Eggert Road. The report indicated that three (3) 8,000-gallon gasoline USTs were removed from the Site by Elmwood Tank & Piping Corporation. The report included confirmatory analytical testing data for the UST removals. One composite sample consisting of

the "sidewalls and bottom of tank excavation" was analyzed for STARS 8021 parameters. Results were below STARS limits.

8.30 HEALTH DEPARTMENT RECORDS AND LOCAL REGULATORY AGENCIES

Source: New York State Department of Health (NYSDOH)/Erie County

Health Department (ECHD).

Summary: Submitted a FOIL request to NYSDOH and ECHD dated August

8, 2013. At the time of this report, GZA has not received a response from NYSDOH or ECHD. Pertinent information that may change the conclusion of this report will be forwarded to

Client upon receipt.

Source: Town of Amherst Building Department

Findings: The desk clerk did not have additional records to those summarized in

Section 4.70.

Source: Town of Amherst Assessor's Office

<u>Findings:</u> The desk clerk did not have additional records to those summarized in

Section 4.80.

9.00 INTERVIEWS

GZA interviewed the following people as part of this assessment:

- Dale Russell, Vice President of Shopping Center Operations
- Desk Clerk, Town of Amherst Building Department
- Richard J. Andrews, Senior Fire Inspector, Town of Amherst Building Department
- Desk Clerk, Town of Amherst Assessor's Office

The information provided by each is discussed and referenced in the text or provided below.

10.00 USER RESPONSIBILITIES

GZA requested information from the User regarding title information, environmental liens, Activity and Use Limitations, and specialized knowledge or commonly known

information regarding the Site, and reason for significantly lower purchase price (if applicable).

Section 12.3 of ASTM 1527-05 (The Evaluation and Report Preparation) indicates "the report shall state whether the user reported to the environmental professional any information pursuant to the user's responsibility described in Section 6.00" (of ASTM 1527-05).

A "GZA Modified User Questionnaire" was completed by the Client, and information has been incorporated into the report as appropriate.

11.00 FINDINGS AND CONCLUSIONS

A Phase I Environmental Site Assessment following the guidance of the ASTM Phase I Standard Practice 1527-05 has been conducted at the Northtown Plaza located along Sheridan Drive, Eggert Road and Bailey Avenue in the Town of Amherst, New York (Site). The study included a site reconnaissance, a review of Site history, a review of selected local, state and federal regulatory records, a review of information provided by the User, and interviews with persons and agencies familiar with environmental conditions at the Site. No subsurface explorations or chemical testing of soil or groundwater was conducted and no assessment for the presence of lead hazards, mold, radon or asbestos was completed as part of this Phase I ESA.

<u>11.10 FINDINGS</u>

The findings below are based on the work conducted as part of this assessment:

- The Site consists of six (6) parcels of land located on the land surrounded by Sheridan Drive, Bailey Avenue, and Eggert Road in the Town of Amherst, New York. The Site is occupied by 6 commercial/retail buildings. There is also one (1) two-unit rental residential dwelling located in the southeast corner of the Site.
- The following tax map parcel information was provided for the Site to GZA by the client.

Parcel 67.41-1-2.1-3131 Sheridan Drive (known as the Northtown Business Park) is a multi-use and multi-tenant structure.

Parcel 67.41-1-3 – 1979 Eggert Road is a two-story residential dwelling.

Parcel 67.41-1-15 – 4514 Baily Avenue is a paved portion of the Site located off of Bailey Avenue and does not contain a structure.

Parcel 67.41-1-17 – 4532 Bailey Avenue is a one story brick structure used by Northtown, Inc. as there maintenance garage.

Parcel 67.10-1-3.1/B and 67.10-13.1 – 2125 Eggert Road and 3045 Sheridan Drive, respectively, appear to have been combined into one parcel that makes up a majority of the western portion of the plaza. It contains four buildings. We note that a portion of one building is occupied by First Niagara Bank. They have a land lease with Northtown Inc. for this portion of the building and are the owners of the unit.

- Based on a review of the U.S. Geologic Survey Map for Buffalo NE, NY dated 1965, the Site is approximately 600 feet above mean sea level. The Site area topographic gradient appears to gradually slope to the north.
- Based on a review of the USGS topographic map, Buffalo NE, NY and knowledge of the Site area, the estimated depth to groundwater is likely greater than 40 feet below ground surface. Localized groundwater flow at the Site is expected to flow in a general northerly direction. Localized flow direction in the area of the Site may vary as a result of underground utilities, septic systems, or heterogeneous subsurface conditions. Surface water flow is expected to drain towards on-Site catch basins located throughout the Site.
- Based on information provided by Environmental Data Resources (EDR), the Site is not located within the 100 year or 500 year floodplain, and state or national wetlands are not present on-Site. However, a 500 year floodplain is located along Bull Creek, which adjoins the Site to the west of Lockport-Junction Road.
- GZA searched the NYSDEC website (http://www.dec.ny.gov/imsmaps/ERM/viewer.htm) and U.S. Fish and Wildlife Service National Wetlands Inventory (http://107.20.228.18/Wetlands/WetlandsMapper.html) to identify potential wetlands. No wetlands were identified.
- The Site appears to have been used as agricultural land until it was developed for commercial use in the mid-1950s. The Site continued with this commercial use from 1958 to about 1983, where it reached a configuration similar to that during our site visit.
- A dry cleaner (Gi-Ro) is located in the southern most unit of Building 3 but no longer provides in-house cleaning. The former dry cleaning equipment was removed in the late 1990s.
- At the time of GZA's site visit, the Site was occupied by the Northtown Plaza.

- The location of two existing heating oil USTs, no longer in use, and three former 8,000 gallon gasoline USTs were identified. The capacity of the two heating oil USTs are unknown. The three, 8,000 gallon gasoline tanks were formerly present on the north side of Building 2 and were removed in 1995. Closure documentation for the three, 8,000-gallon USTs was on file with NYSDEC.
- No ASTs were observed on the exterior portions of the Site.
- A pad-mounted dry transformer is located on the south side of Building 5. No staining was observed around this transformer.
- Building 1 (Dunn Tire) and Building 2 (Total automotive) have oil/water separators. Tenants are responsible for maintenance of the oil/water separators.
- Maintenance cleaning use and storage areas were observed in Buildings 1, 2, 4
 and Building 6. Tenants within Buildings 1 and 2 perform automotive repair and
 Building 6 is used by Northtown, Inc. as the maintenance garage for the plaza.
 Various degreasers and solvents are stored in small quantities at multiple areas
 with these three buildings. No evidence of release was noted in these areas.
- Two, 55-gallon drums of diesel fuel were located inside Building 6 for use in their maintenance vehicles. No staining was observed around the drums.
- The Site was listed on the following federal databases reviewed.
 - O Northtown Inc. at 3097 Sheridan Drive was listed on the RCRA database as a non-generator/NLR (no longer reporting, EPA ID number NYR000013375). The facility was listed as a large quantity generator in May 1996 and a small quantity generator in September 1995. These listings are registrations and no violations were found.
 - O Northtown Cleaners at 3077 Sheridan Drive was listed on the RCRA database as a non-generator/NLR (no longer reporting, EPA ID number NYD045166667). This facility was listed as a small quantity generator in July 1999 and as a large quantity generator in July 1985. No violations were found. This facility was listed on the RCRA database for RCRA Info and FIS. This facility was listed on the EDR US Hist Cleaners database (Giro Cleaners) for the years 2004 and 2007 through 2012. These listings are registrations and no violations were found.
- Auto Pro at 2131 Eggert Road, which adjoins the Site to the west, was listed on the RCRA database as a RCRA non-generator/NLR (EPA ID number NYD986981397). Two violations were listed which have achieved compliance. This facility was classified as a small quantity generator in 1991 and as a large quantity generator in 2001. This facility was listed on the FINDS database for

RCRA Info and FIS. Due to the proximity of this facility to the Site, the potential exists for it to have impacted the Site soil and/or groundwater.

- Courtesy Cleaners at 2040 Eggert Road, which adjoins the Site to the south, was listed on the RCRA database as a conditionally exempt small quantity generator of hazardous waste. This facility was listed as a small quantity generator in 1999 and 2003; and a large quantity generator in 1992. No violations were found. This facility was listed on the FINDS database for RCRA Info and FIS. This facility was also listed on the DRYCLEANERS database (facility identification number 9-1422-00272). Due to the proximity of this facility to the Site and being in an upgradient direction based on assumed groundwater flow direction, the potential exists for it to have impacted the Site soil and/or groundwater.
- The Site was listed on the following state databases reviewed.
 - O Northtown Plaza at 3097 Sheridan Drive was listed on the UST database (PBS registration number 9-600735). The facility status was listed as unregulated. The facility was listed for three (3) 8,000-gallon carbon-steel gasoline USTs. The USTs were closed/removed on October 25, 1995.
 - O A vault at the Site address of 2001 Eggert Road was listed on the NY Spills database (spill number 1201475) for an approximate 10-gallon release of non-PCB oil associated with a defective sump pump. National Grid was responsible for the Release. The release was contained within the concrete vault and cleaned to the satisfaction of the regulators and the listing was closed in June 2012. GZA considers this a Historical Recognized Environmental Condition that does not require further action.
 - Northtown at the Site address of 4544 Bailey Avenue was listed on the NY Spills database (spill number 9804627) for impacts associated with a NYSDOT project on Bailey Avenue. The listing was closed in July 1999.
 - O Total Automotive Inc. at the Site address of 2125 Eggert Road, was listed on the EDR US Hist Auto Stations database. Northtown Plaza Car Wash at 2125 Eggert Road was listed on the UST and HIST UST databases (PBS registration number 9-221295) for three, 8,000-gallon closed unleaded gasoline USTs. The USTs were closed on October 1, 1995. Closure documentation was provided from NYSDEC.
 - O The Site address of 2125 Eggert Road was listed on the NY Spills database (spill numbers 0608552 and 0608071) for pavement impacted when a transformer fell from a pole during a snow storm. Approximately 20-gallons of reported non-PCB oil were released from the transformer. The file indicates that the release was contained on the pavement and that no receivers or soil were impacted. National Grid was the responsible

party and the release was cleaned by Op-Tech to the satisfaction of the regulators and the listing was closed in February 2007. GZA considers this a Historical Recognized Condition that requires no further action.

- 2131 Eggert Road, which adjoins the Site to the west, was listed on the EDR US
 Hist Auto Stations database. Auto Pro Center was listed from 1999 through 2000,
 Colden Auto Collision in 2001, and AAA Car Care in 2011 and 2012. Due to the
 proximity of these automotive repair facilities to the Site, they have the potential
 to impact the Site soil and/or groundwater.
- 2040 Eggert Road, which adjoins the Site to the south, was listed on the EDR US
 Hist Cleaners database. EDS Wash World was listed from 1999 through 2001
 and Wash World Laundromat was listed in 2010 and 2011. Due to the proximity
 of these facilities to the Site, they have the potential to impact the Site soil and/or
 groundwater.

Based on the findings presented above, it is GZA's opinion that "we have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 at the Northtown Plaza located between Sheridan Drive, Eggert Road, and Bailey Avenue, in the Town of Amherst, New York (Site). Any exceptions to, or deletions from, this practice are described in Section 1.00 of this report. This assessment has revealed the following evidence of suspect Recognized Environmental Conditions in connection with the property".

- Two heating oil USTs that are not in use are still present in the subsurface at the Site. One of the USTs is believed to have been abandoned and filled with sand.
- Town of Amherst Building Department records indicate that at 4544 Bailey Avenue three 3,000gallon gasoline USTs and one, 550 waste oil tank were installed. No closure documentation was able to be located in association with these tanks.
- Northtown Cleaners at 3077 Sheridan Drive was listed as a generator of hazardous waste in due to its historic use of chlorinated solvents (dry cleaning operations are no longer conducted on-site)..
- Total Automotive Inc. at the Site address of 2125 Eggert Road, was listed on the EDR US Hist Auto Stations database. Northtown Plaza Car Wash at 2125 Eggert Road was listed on the UST and HIST UST databases (PBS registration number 9-221295) for three, 8,000-gallon closed unleaded gasoline USTs that were reportedly removed on October 1, 1995. Closure documentation was provided from NYSDEC. We note that one soil sample was collected from the tank excavation. The results were non-detect.

- 2131 Eggert Road, which adjoins the Site to the west, was listed on the EDR US Hist Auto Stations database. Auto Pro Center was listed from 1999 through 2000, Colden Auto Collision in 2001, and AAA Car Care in 2011 and 2012.
- 2040 Eggert Road, which adjoins the Site to the south, was listed on the EDR US
 Hist Cleaners database. EDS Wash World was listed from 1999 through 2001
 and Wash World Laundromat was listed in 2010 and 2011.

In addition, two spills associated with transformers were remediated to the satisfaction of the Regulatory Agencies at the Site and are considered Historical Recognized Conditions that require no further action. National Grid was the responsible party for these spills.

12.00 ENVIRONMENTAL PROFESSIONAL STATEMENT

GZA declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 12." We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312." The signature of the Environmental Professional is contained on the cover page of this report.

13.00 LIMITATIONS

GZA's site assessment was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and GZA observed the degree of care and skill generally exercised by other consultants under similar circumstances and conditions. GZA's findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion concerning the significance of the limited data gathered during the course of the environmental site assessment. No other warranty, express or implied, is made. Specifically, GZA does not and cannot represent that the Site contains no hazardous material, oil or other latent condition beyond that observed by GZA during its site

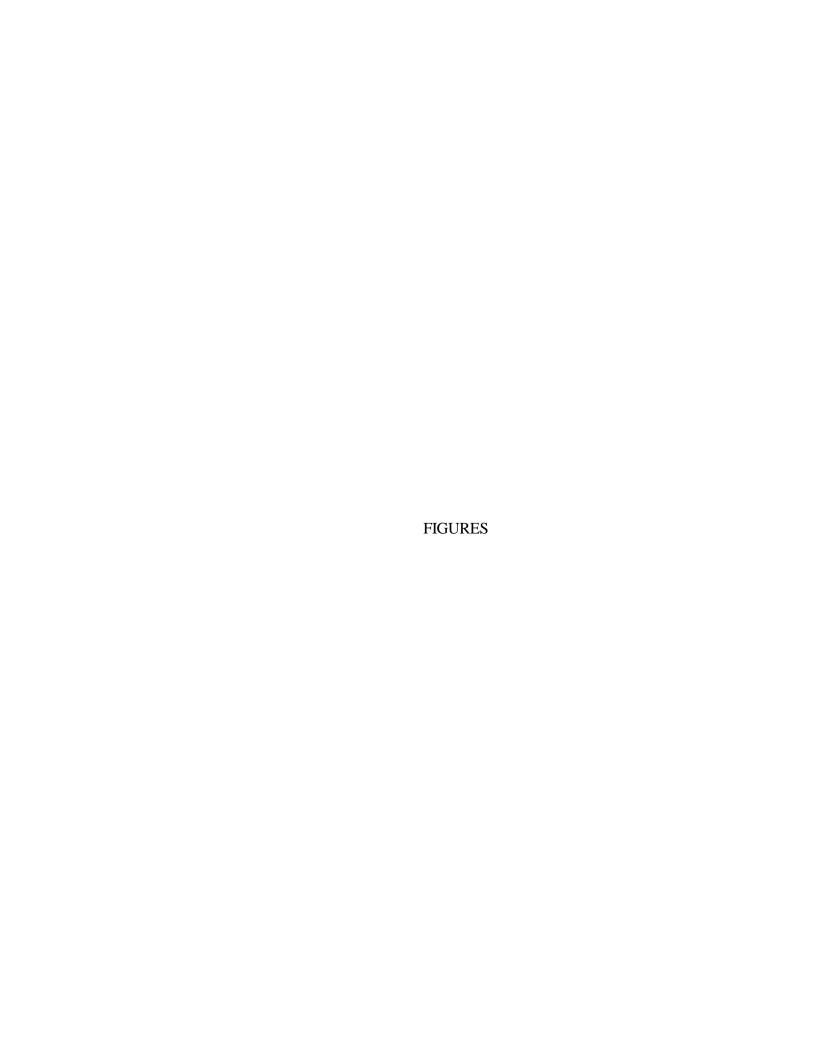

GZN

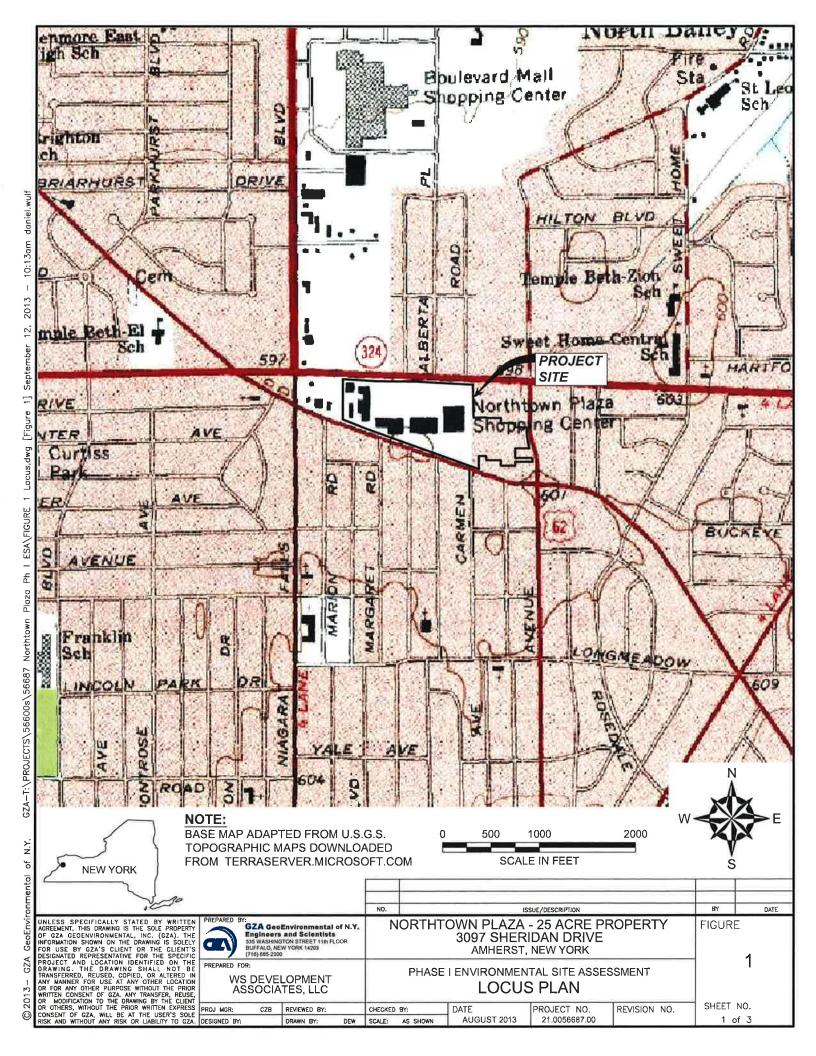

assessment. This report is also subject to the specific limitations contained in Appendix A.

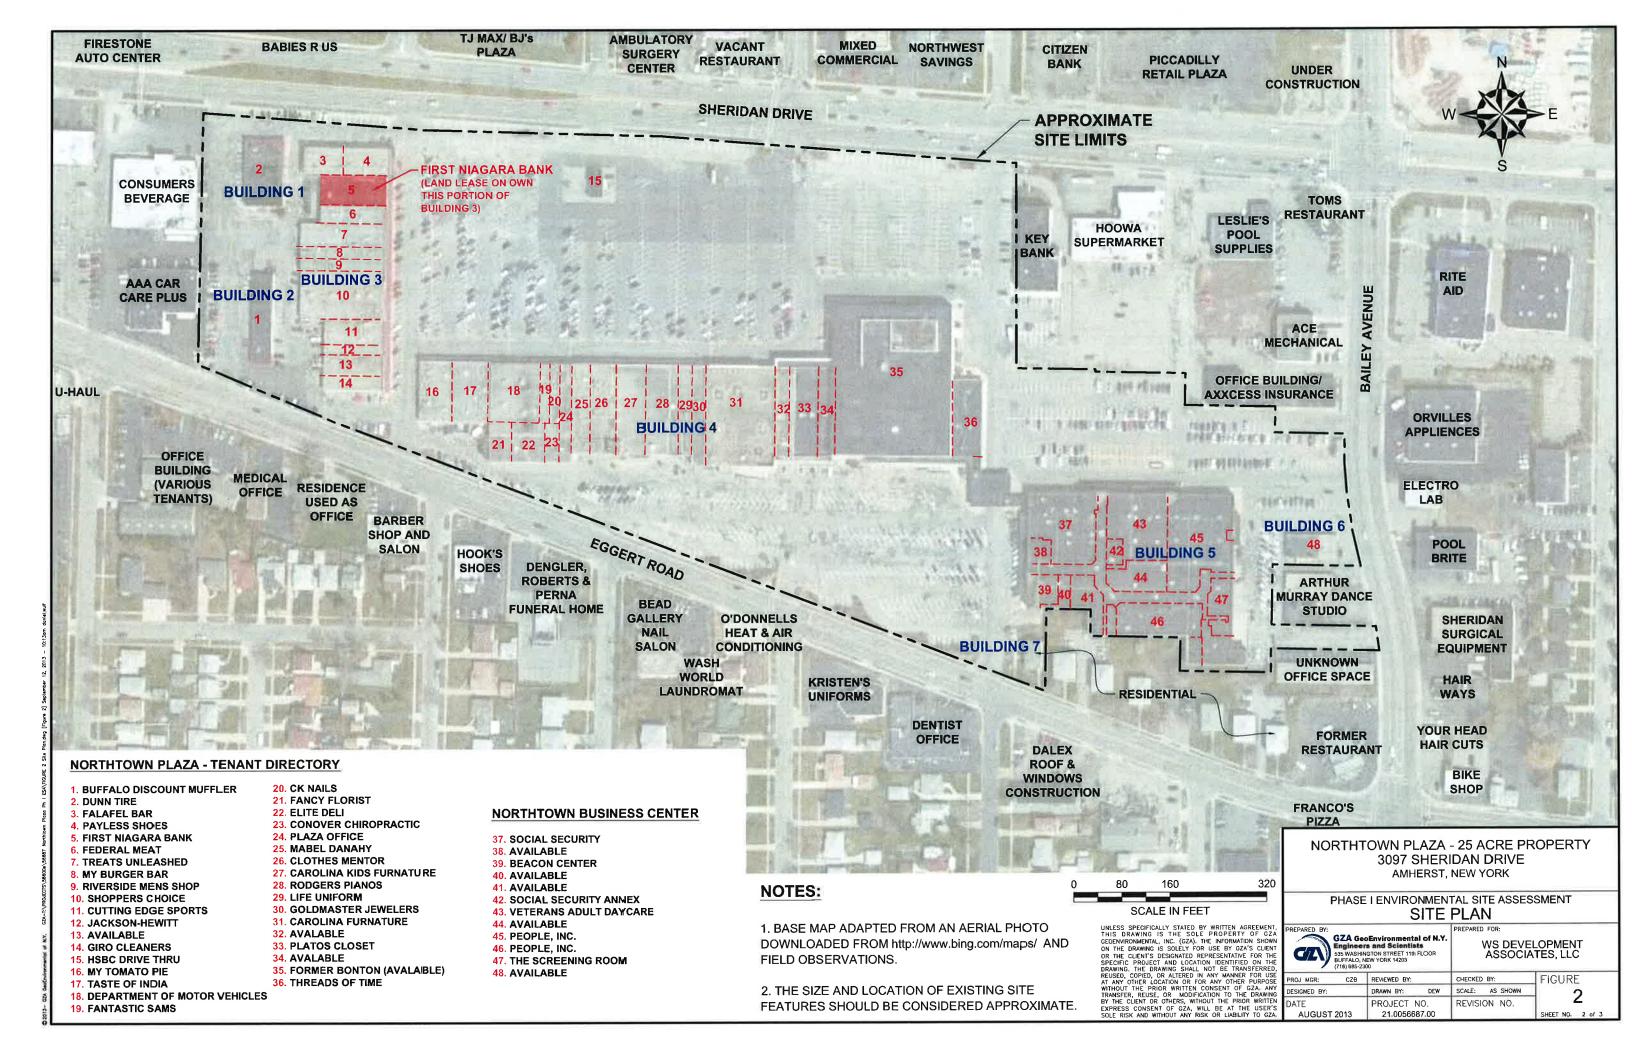

It should be noted that when an assessment is completed without subsurface explorations and chemical screening of soil and groundwater beneath the site, no data can be generated regarding latent subsurface conditions which may be the result of on-site or off-site sources.

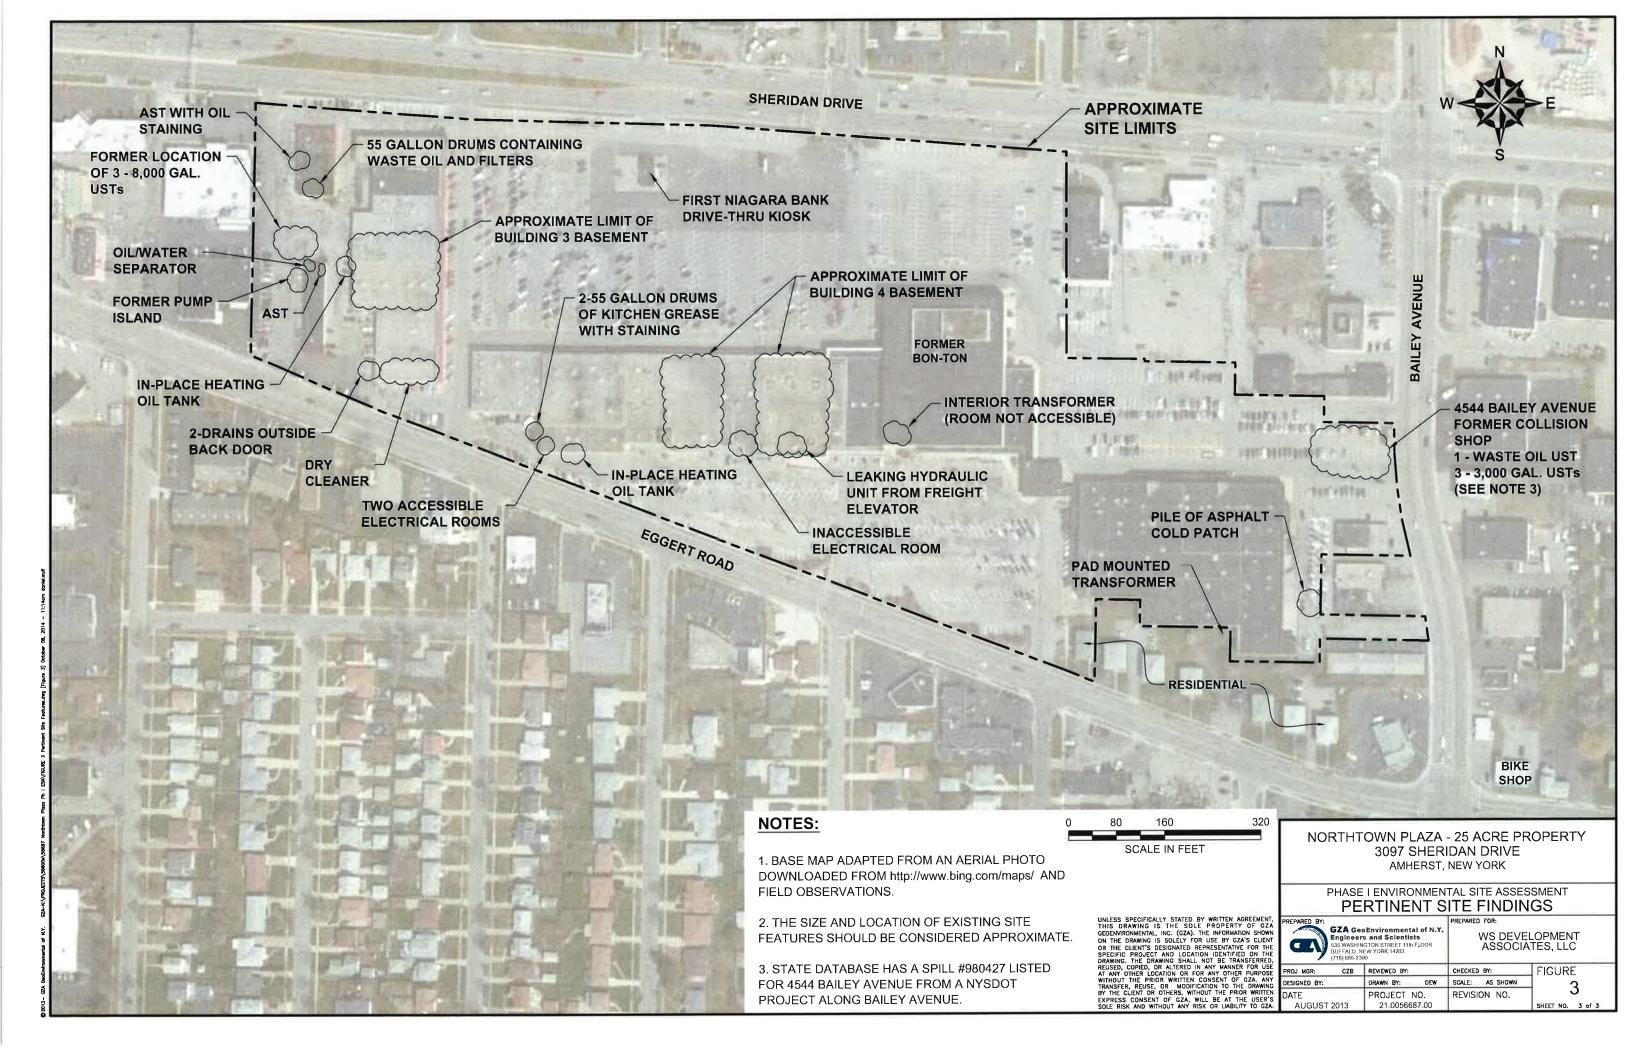

This study and report have been prepared on behalf of and for the exclusive use of the Client and its affiliates solely for use in an environmental assessment of the Site. This report and findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party, nor relied on by any other party in whole or in part, without the prior written consent of GZA. However, GZA acknowledges and agrees that the Report may be conveyed to the Lender associated with the proximate financing of the Site to the extent set forth in our agreement. Client acknowledges and agrees that reliance upon the report and the findings in the report by any other party, or for any other purpose, shall be at that party's sole risk and without any liability to GZA.

APPENDIX A

LIMITATIONS

PHASE I ENVIRONMENTAL SITE ASSESSMENT LIMITATIONS

Use of Report

1. GZA GeoEnvironmental, Inc. (GZA) prepared this report on behalf of, and for the exclusive use of the Client and its affiliates for the stated purpose(s) and location(s) identified in the Report. However, GZA acknowledges and agrees that the Report may be conveyed to the seller and lender associated with the proximate purchase of the subject location(s) to the extent set forth in our signed proposal dated July 26, 2013. Use of this report, in whole or in part, at other locations, or for other purposes, may lead to inappropriate conclusions; and we do not accept any responsibility for the consequences of such use(s). Further, reliance by any party not identified in the agreement, for any use, without our prior written permission, shall be at that party's sole risk, and without any liability to GZA.

Standard of Care

- 2. Our findings and conclusions are based on the work conducted as part of the Scope of Services set forth in the Report, and reflect our professional judgment. These findings and conclusions must be considered not as scientific or engineering certainties, but rather as our professional opinions concerning the limited data gathered during the course of our work. Conditions other than described in this report may be found at the subject location(s).
- 3. Our services were performed using the degree of skill and care ordinarily exercised by qualified professionals performing the same type of services, at the same time, under similar conditions, at the same or a similar property. No warranty, expressed or implied, is made.

Uncertainty not Eliminated

4. No environmental site assessment can eliminate the uncertainty of the possible presence of Recognized Environmental Conditions (RECs). This report was prepared to help reduce, not to eliminate, such uncertainties. Consistent with American Society for Testing and Materials (ASTM) Guidance (ASTM 1527-05), our opinions were developed in light of the constraints imposed by time and budget.

Limits to Observations

5. As indicated in the Report, we made observations for evidence of RECs at the Site and for conditions at adjoining properties that could result in RECs at the Site. Observations were made of the Site and of structures on the Site as indicated within the report. Where access to portions of the Site or to structures on the Site was unavailable or limited, GZA renders no opinion as to the presence of hazardous substances, hazardous wastes, or petroleum products, or to the presence of indirect evidence relating to these materials, in that portion of the Site or structure. In addition, GZA renders no opinion as to the presence of hazardous substances, hazardous wastes, or petroleum products, or to the presence of indirect evidence relating to these materials, where direct observation of the interior walls, floor, or ceiling of a structure on the Site was obstructed by objects or coverings on or over these surfaces. Our opinions are necessarily based on these limited observations. Additionally, some activities or events of potential interest, at the Site or on adjoining properties, may have

been transient and not observable at the time of our visit.

Reliance on Information from Others

6. We relied upon information made available by Federal, state and local authorities, the Key Site Manager, and others. We did not attempt to independently verify the accuracy or completeness of that information. Inconsistencies in this information which we have noted, if any, are discussed in the Report.

Additional Information

7. Additional opinions or information regarding RECs may be developed by the lender, seller, buyer, or other parties. Such additional opinions or information may not fully support the opinions provided in this report. In the event such additional opinions or information is developed, we recommend that we be retained, in a timely manner, to review this material. This will provide us the opportunity to evaluate and modify, as necessary, the opinions provided in the Report

Compliance with Regulations and Codes

8. Our services were performed to render an opinion on the presence of RECs. Unless specifically addressed within the Report, we rendered no opinion on the compliance of Site conditions or activities with local, state, or Federal codes or regulations.

Shelf Life

9. The opinions expressed in this Report are based on conditions observed during the course of our work on this Site; these conditions may change over time. ASTM Guidance (see ASTM 1527-05) states that observations and opinions are only valid for 180 days. After 180 days, an update of portions of the Report may be necessary.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

New York State Department of Environmental Conservation 270 Michigan Avenue, Buffalo, New York, 14203-2999

July 27, 1993

North Town, Inc. 3097 Sheridan Drive Amherst, New York 14226

Dear Sir or Madam:

Petroleum Bulk Storage #9-221295

On July 23, 1993, I inspected your facility, Northtown Plaza Car Wash, 2125 Eggert Road, Amherst, for compliance with the Petroleum Bulk Storage (PBS) regulations (6NYCRR Parts 612, 613 and 614).

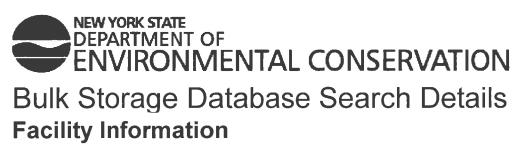

You did not have the registration certificate posted. The PBS regulations require the certificate be posted on site and accurately report facility information.

Your cooperation in this matter is appreciated. If you have any questions, please call me at 851-7220.

Sincerely,

Marshall D. Bolles
Environmental Engineering
Technician I

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WALMART SUPERCENTER #2210	3290 SHERIDAN DR	ENE 1/8 - 1/4 (0.150 mi.)	S92	221

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 6 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 05/21/2013 has revealed that there are 20 LTANKS sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 05/21/2013 has revealed that there are 36 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 20 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

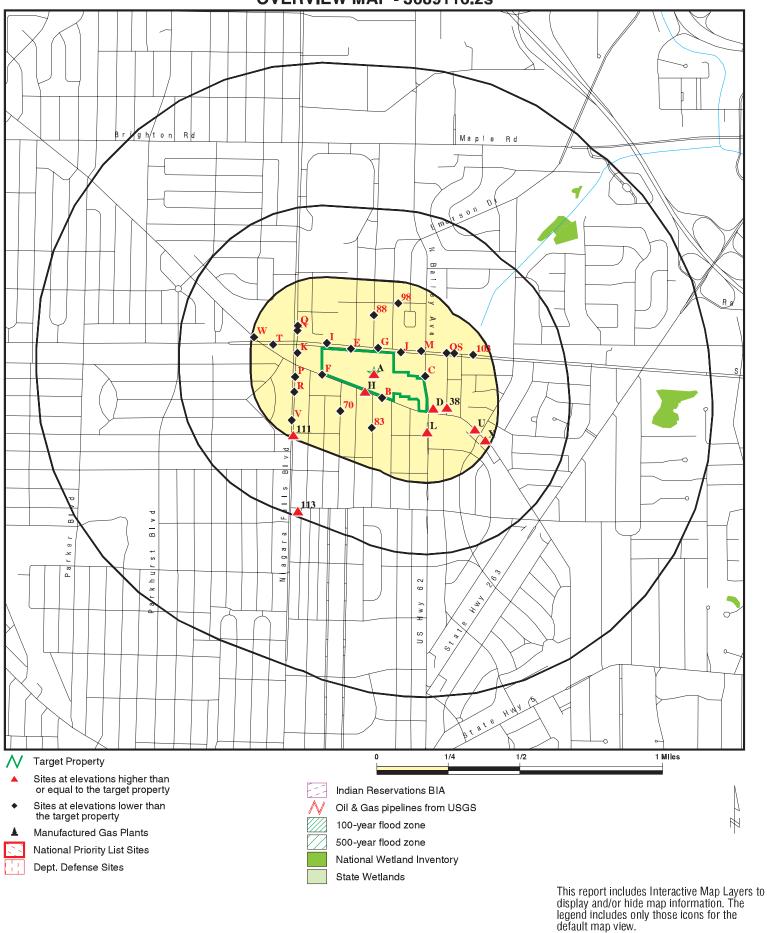

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 3 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

AND SAC, DECIDED TO HIRE NWECC TO MONITOR STARTING MONDAY. 08/28/01 RMC/DON SEYMOUR/SITE. WANTS TO CLOSE A UST IN PLACE, RMC ADVISED THAT WE WOULD NOT COMMENT AS NO APPROVABLE REMEDIATION PLAN IS IN PLACE AND THAT DEC IS ONLY OBSERVING WHAT WORK IS BEING DONE. THEY ARE NOT ADDRESSING THE ISLAND/TANK PIT AREA. RICK ANDREWS FROM AMHERST STOPPED BY AND RMC ADVISED THE SAME, NWECC MONITOR ON SITE. 08/29/01 RMC/FILE. AMHERST CALLED REGARDING SITE, MLD TOOK THE CALL, RMC UPDATED SAC, PJB AND DAN KING. TALKED AGAIN WITH DON SEYMOUR VIA PHONE, REID WILL NOW DO TANK TOP, RMC ADVISED THAT CONTAMINATION WILL LIKELY GO DEEPER AROUND THE USTS THAT THEY CAN DIG, AND THAT THAT MAY NOT BE GOOD ENOUGH. RMC UPDATED JOE H AND DAN KING AGAIN. KING RETURNED AMHERST CALL, AMHERST LATER CALLED BACK AND ADVISED THAT THEY WERE CONSIDERING A STOP WORK ORDER.08/31/01 RMC/SAC/SITE. ONLY THE CONCRETE ON THE NORTH SIDE OF THE ISLAND HAS BEEN CUT, NOT YET REMOVED, NO WORK YET ON THE ISLAND AREAS. NO ONE ON SITE KNOWS HOW FAR OR IF THE ENTIRE SLAB WILL BE REMOVED, LEFT PHONE MESSAGE FOR DON SEYMOUR, 09/04/01 RMC/FILE, RECEIVED CALL FROM SAC, SENTINAL SENT LETTER, SAC TO RESPOND. SAC SENT LETTER AFTER CONFIRING WITH DAN KING.11/13/01 RMC/FILE. RECEIVED LETTER FROM SENTINEL, ALL USTS WILL BE PULLED EXCEPT FOR ONE NEAR LIGHT POLE. FAX SAID THEY WERE STARTING 11/12. RMC UPDATED JOE H AND NWECC. UPDATE 11/30/01 1/18/02 RMC/FILE. LEFT MESSAGE FOR DON SEYMOUR REQUESTING REPORT.DUE 2/28/02 04/17/02 RMC/FILE, REVIEWED FILE FOR STATUS DETERMINATION, RP RMOVED SITE CONTAMINATION TO THE EXTENT POSSIBLE AND 4 USTS, ONE UST REMAINS IT WAS CUT CLEANED AND FILLED IN PLACE, THE RP DOCUMENTED THE REMOVAL OF ABOUT 700 TONS IMPACTED SOIL AND 9000 GALLONS CONTAMINATED WATER. SITE DATA PROVIDED BY THE RPS CONTRACTOR SHOWS ONLY MINOR TAGM EXCEEDANCES REMAIN, THE DEC REMOVED CONTAMINATION DURING THE ROAD RECONSTRUCTIONS TO THE EXTENT POSSIBLE. SOIL AND GROUND WATER CONDITIONS OFF SITE WITH IN INACTIVE, FURTHER WORK MAY BE REQUIRED DURING FUTERE ROAD WORK. RMC RECOMMENDS THAT THE SITE BE MADE INACTIVE. THE RP IS RESPONSIBLE FOR ALL COSTS INCURRED. RMC ALSO NOTED THAT SOME OF THE LETTERS AND DOCUMENTS ARE MISSING FROM THE FILE. LETTER. 02/7/03 RMC/DONNA ROSS, AG/PHONE DISCUSSED AREA L, 9804621 PART OF 1924 EGGERT ROAD SPILL AND AREA M, 9804626 AMHERST HEALTH CARE ON OPPOSITE SIDE OF THE ROAD. NO CONNECTION FOUND BETWEEN SITES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: 3/23/2007: RJJ AT SITE AT 1100...WHILE INSTALLING A NEW

GAS-LINE, NATIONAL FUEL ENCOUNTERED PETROLEUM AND PETROLEUM ODORS IN

THEIR 4'X4'X4' EXCAVATION NEXT TO 1974 EGGERT RD....CHARLIE

BURKE, NATIONAL FUEL, SAID THAT THEY WILL PLACE THE EXCAVATED SOIL, ON PLASTIC, ON SITE, BUT THE PROPERTY OWNER, MR. JOSEPH DIVITA, SAID THAT HE

WILL DISPOSE IT...I ALSO INFORMED MR. DIVITO THAT FURTHER

INVESTIGATION WILL BE NEEDED TO DETERMINE THE CAUSE/EXTENT OF THE CONTAMINATION...I GAVE HIM OUR 'LIST-OF-CONTRACTORS' AND SAID THAT I WILL SEND HIM A LETTER...IN THE EXCAVATION, THERE WAS ONLY A SMALL AMOUNT OF CONTAMINATION WHICH ENTERED IT...NATIONAL FUEL WILL BACKFILL THE EXCAVATION, AFTER THEY MAKE REPAIRS...DRAFTED AND SENT A

'RP' LETTER TO MR. DIVITO.4/16/2007: RJJ AT SITE AT 1300...NATIONAL FUEL IS STILL DOING WORK ALONG THE STREET...THEY HAVE STAGED THE CONTAMINATED SOIL,ON PLASTIC,ON SITE AND COVERED(~10 TONS).4/25/2007:

RECEIVED A LETTER FROM MR. DAVID K. BARNES, MR. DIVITO'S ATTORNEY, WHICH STATES THAT MR. DIVITO WILL REMEDIATE THE SITE.6/7/2007: MR. DIVITO TELECOM RJJ, HE SAID THAT NATIONAL FUEL HAS JUST FINISHED THEIR WORK SO NOW HE WILL HIRE AN ENVIROMENTAL COMPANY TO DISPOSE THE CONTAMINATED SOIL AND INVESTIGATE THE SOURCE...(THE CONTAMINATED SOIL PILE IS STILL ON SITE AND COVERED AND NATIONAL FUEL DID NOT ENCOUNTER ANY ADDITIONAL PETROLEUM CONTAMINATED SOIL)...MR. DIVITO WILL KEEP ME INFORMED.9/26/2007: MR. DIVITO TELECON RJJ, HE SAID THAT HE HAS HIRED ENSOL TO DISPOSE THE SOIL AND THAT THEY WILL BE PICKING UP THE SOIL SOON...ALSO, HE WILL TALK TO THEM ABOUT INVESTIGATING THE SOURCE.10/31/2007: RJJ AT SITE AT 1400...THE CONTAMINATED SOIL IS STILL ON SITE, SO I WILL DRAFT A LETTER TO 'RP' REQUESTING DISPOSAL RECEIPTS BY 11/30/2007.11/19/2007: RECEIVED THE DISPOSAL RECEIPTS FOR THE 4.84 TONS OF PETROLEUM CONTAMINATED SOIL TAKEN TO THE TONAWANDA LANDFILL.7/29/2008: JOE DITIVO TELECON RJJ,HE SAID THAT HE WILL HIRE ENSOL TO GEO-PROBE ON HIS PROPERTY...JOE WILL

RJJ,HE SAID THAT HE SENT STEWARD FINTON,ATTORNEY FOR ALL-AUTOMOTIVE SERVICES,THEIR WORKPLAN/COST,AND AFTER HE GETS APPROVAL TO GEOPROBE,HE WILL CONTACT ME TO SET UP A MEETING ON SITE.12/23/2008: RJJ/ENSOL AT SITE AT 0830...ENSOL WILL GEOPROBE,AT LEAST 3-BORINGS NEAR THE SIDEWALK TO DETERMINE IF THERE IS ANY CONTAMINATED SOIL ON THE PROPERTY...IF THEY ENCOUNTER OBVIOUS PETREOLEUM CONTAMINATION,THEY WILL CONTINUE GEOPROBING TO FIND THE EXTENT.1/21/2009: RECEIVED THE SOIL SAMPLING & TESTING REPORT FROM

HAVE NICK MORREALE, ENSOL, CONTACT ME.11/25/2008: NICK MORREALE TELECON

EXTENT.1/21/2009: RECEIVED THE SOIL SAMPLING & TESTING REPORT FROM ENSOL,INC....IT INDICATES SOME SLIGHT 'TAGM' EXCEEDENCES AT B-1,WHICH IS JUST SOUTH OF THE GAS METER BOX BEHIND THE BUILDING...(THE 2 OTHER SAMPLES,WHICH ARE EAST & WEST OF B-1 WERE ND)...I WILL DISCUSS THESE RESULTS WITH SAC...AFTER REVIEWING THESE RESULTS,SAC SAID THAT

NATIONAL FUEL GAS EXCAVATION (Continued)

S108467437

ADDITIONAL INVESTIGATION/OR EXCAVATION OF THE PETROLEUM CONTAMINATED SOIL WILL BE NEEDED...I TELECON KATIE, ENSOL, AND INFORMED HER... SHE WILL CONTACT PROPERTY OWNER, THEN INFORM ME OF THEIR DECISION.4/23/2009: RECEIVED A LETTER FROM ATTORNEY STEWARD FINTON WHICH STATES THAT THEY ARE IN THE PROCESS OF OBTAINING QUOTES TO COMPLETE THIS WORK...MR. FINTON WILL KEEP ME INFORMED.8/10/2009: RJJ TELECON MR. FINTON, HE SAID THAT THEY WILL OBTAIN ADDITIONAL QUOTES TO REMEDIATE & KEEP ME INFORMED...ALSO, THE PROPERTY IS 'FOR SALE', SO THIS WILL HAVE TO BE RESOLVED BEFORE ANY SALE.10/6/2009: STEWARD FINTON TELECON RJJ, HE SAID THAT THEY HAVE HIRED ENSOL INC. TO REMEDIATE THE PROPERTY & THAT THEY WILL BEGIN SOON...MR. FINTON WILL KEEP ME INFORMED.11/19/2009: RECEIVED THE PROPOSED REMEDIATION WORKPLAN FROM ENSOL, INC.... AFTER REVIEWING THIS PLAN, I APPROVE IT...DRAFTED AND SENT A LETTER TO PROPERTY OWNER APPROVING THIS WORKPLAN.12/1/2009: RJJ AT SITE AT 0930...ENSOL INC. HAS STARTED TO REMEDIATE THE PROPERTY...THEY HAVE SUBCONTRACTED ES&G ENVIROMENTAL TO EXCAVATE THE CONTAMINATION...THUS FAR THEY HAVE REMOVED ~20 TONS OF PETROLEUM CONTAMINATED SOIL...ALSO, THEY HAVE UNCOVERED AN OLD, NOT USED,OIL/WATER SEPARATOR, '15' EAST WARD, WHICH IS FULL OF WATER WITH OIL SLUDGE ON THE BOTTOM...ENSOL WILL CONTINUE TO EXCAVATE, THEN PUMP OUT & REMOVE THE OIL/WATER SEPARATOR...THIS APPEARS TO BE THE SOURCE OF THE SPILL...I WILL CHECK ON REMEDIATION LATTER TODAY...RJJ AT SITE AT 1330...ENSOL HAS REMOVED THE OIL/WATER SEPARATOR & ALSO REMOVED AN OLD 275 GAL FUEL OIL UST NEXT TO IT...IT APPEARS THAT BOTH, TANKS WERE THE CAUSE FOR THIS SPILL...THUS FAR, ENSOL HAS REMOVED ~40 TONS OF CONTAMINATED SOIL...THEY SHOULD FINISH TOMORROW, OBTAIN 3-SIDEWALL & 1 FLOOR CONFIRMATORY SOIL SAMPLES, THEN BACKFILL (THE NORTHWALL IS RIGHT UP TO THE FOUNDATION).12/2/2009: ENSOL HAS FINISHED EXCAVATING...THEY HAVE REMOVED ~150 TONS OF PETROLEUM CONTAMINATED SOIL...THE EXCAVATION IS ~8'X25'X8' AND NOW APPEARS TO HAVE NO ODORS,AND JUST SOME STAIINED SOIL NEAR THE UTILITY LINS, WHERE THEY CAN NOT EXCAVATE ANY FURTHER...ENSOL WILL OBTAIN THE CONFIRMATORY SOIL SAMPLES.THEN BACKFILL.1/6/2010: RECEIVED THE FINAL REPORT FROM ENSOL, WHICH INCLUDES THE DISPOSAL RECEIPTS FOR 149.26 TONS OF PETROLEUM CONTAMINATED SOIL TAKEN TO THIER LANDFILL & THE DISPOSAL RECEIPTS FOR THE 400 GAL OF WATER PUMPED OUT OF THE EXCAVATION, TAKEN TO AMERICAN RECYCLERS CORP. IN TONAWANDA, NY... ALSO, ALL THE CONFIRMATORY ANALYTICAL RESULTS FROM THE EXCAVATION ARE ALL BELOW OUR 'TAGM' GUIDANCE VALUES...THE CONTAMINATED SOIL HAS BEEN REMOVED & PROPERLY DISPOSED OF...DRAFTED & SENT A 'CLOSURE' LETTER TO 'RP'...NO FURTHER ACTION NEEDED...SPILL CLOSED OUT.

Remarks: WHILE EXCAVATING TO INSTALL SERVICE TAPS ON A MAIN GAS LINE, PETROLEUM CONTAMINATION WAS FOUND.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

 ${\tt ACETATE, ETHYL \, BENZENE, ETHYL \, ETHER, \, METHYL \, ISOBUTYL \, KETONE, \, N-BUTYL}$

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

"SAC"07/15/98: RNL REVIEWED SITE ASSESSMENT FORM NYSDOT FOR THEIR HIGHWAY PROJECT ON BAILEY AVENUE, SITE TO BE ACTIVE DUE HIGH LEVELS OF PETROLEUM, SPILLS TO CONTACT ADJACENT OWNER, NYSDOT TO DISPOSE OR TREAT ANY REMOVED SOIL, RNL SENT LETTER TO NYSDOT03/28/00: SAC SITE

INSPECTION, MET WITH JOHN PUZAN, NYSDOT EIC, AND MIKE CAPPELLA,

HOLMES & MURPHY/GENERAL CONTRACTORS, BASED ON THE PLAN NYSDOT WILL BE EXCAVATING TO INSTALL A BOX CULVERT IN THE AFFFECTED AREA, ONCE THIS TAKES PLACE THEY WILL NOTIFY OP-TECH WHICH WILL MONITOR THE SITE AND SAC, SOIL WILL BE STAGED FOR DISPOSAL, DUE TO UTILITIES IN THE AREA EXCAVATION WILL BE LIMITED.04/04/00: SAC TELECON FROM JOHN PUZAN, THEY BEGAN WORK IN THE AFFECTED AREA LATE IN THE AFTERNOON AND OBSERVED CONTAMINATION. THEY HAVE STOPPED WORK IN THE AREA PRESENTLY.04/05/00: SAC SITE INSPECTION, MET MIKE CAPPELLA AND STEVE LOOP OF OP-TECH WHO IS THE ENVIRONMNETAL MONITOR ON THE SITE, SMALL POCKET OF CONTAMINATION FOUND WHILE EXCAVATING FOR A BOX CULVERT, CONTAMINATION WAS IN A VERY SMALL AREA CONFIRMING RESULTS FROM NYSDOT ORIGINAL SITE ASSESSMENT BY WATTS ENGINEERS, MR. CAPPELLA SAID BASED

ON HIS OBSERVATIONS THE CONTAMINATION CAME FROM THE SIDE OF HEALTHCARE CENTER, SINCE HEALTHCARE CENTER WAS A GAS STATION AND

Direction Distance

EDR ID Number Elevation **EPA ID Number** Site Database(s)

NYSDOT PROJECT/AMH HEALTH (Continued)

S103826798

SINCE THE SOIL IN THE AREA IS CLAY IT APPEARS SOME CONTAMINATION TOOK THE PATH OF LEAST RESISTANCE AND MUST HAVE ENTERED THE UTILITY (WATERMAIN) TRENCH AND RAN UNTIL IT REACHED A WATER SERVICELINE THAT RAN FROM THE WATER MAIN TO THE SUNOCO STATION ACROSS THE STREET, THE SOIL BEING CLAY LIMITED THE AREA OF THE CONTAMINATION, NYSDOT REMOVED ALL CONTAMINATION POSSIBLE WITH THE EXCEPTION OF WHAT REMAINS AROUND THE WATER MAIN, RED CLAY WAS AT THE BOTTOM OF THE NYSDOT EXCAVATION, ODORS STILL APPARENT IN THE AREA DUE TO CONTAMINATION THAT EXISTS AROUND THE WATER MAIN, CONFIRMATORY SAMPLE TAKEN BY OP-TECH.05/01/00: SAC REVIEWED SPILL FILE FOR SPILL NUMBER 9714320 WHICH INVOLVED THE REMOVAL OF CONTAMINATED SOIL AT THE AMHERST NURSING HOME SITE WHERE THERE USED TO BE A GAS STATION, BASED ON DRAWING FOR THE WORK DONE. THE FORMER TANK AREA AND PUMP ISLAND AREA WERE EXCAVATED ALMOST AS FAR AS THEY COULD TO BAILEY AVENUE AND AN AREA NEXT TO EGGERT ROAD SAC DISCUSS WITH RNL, SINCE ALL AREAS WERE REEMOVED AS MUCH AS THEY COULD, NO INVESTIGATION OF THE NURSING HOME SITE WILL BE REQUIRED. 05/24/00: SAC RECEIVED DISPOSAL RECEIPTS FOR ABOUT 80 TONS OF SOIL AND CONFIRMATORY SAMPLE RESULTS USING EPA METHOD 8021 TCLP, RESULTS FOR TOLUENE ABOVE GUIDANCE VALUES AT 13.0 ppb AND m&p-XYLENE AT 12.0 ppb, DISCUSSED WITH RNL, "I" PER RNL, DRAFTED INACTIVE LETTER.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was

"SAC"4/17/03:SAC INSPECT SITE, NO ONE PRESENT AT TIME OF INSPECTION BUT EXCAVATOR WAS STILL AT SITE, NO SOIL STAGED AT SITE, EXCAVATION WAS LARGE AND APPEARED TO START AT FRONT CORNER OF BUILDING TOWARD

SIDEWALK AND ALONG THE FRONT OF THE BUILDING, BUILDING IS AN

ABANADONED DRIVE THRU BANK.4/18/03:SAC WENT BY SITE IN MORNING BUT NO

ONE WORKING.4/21/03:SAC INSPECT SITE, MET W/PETE CHERENZIA,
C.E.M.,INC. - NO WORK WAS DONE ON 4/18 BECAUSE THE LANDFILL WAS
CLOSED, THEY CONTINUE TO EXCAVATE THE AREA AND WILL PROCEED TO
EXCAVATE ALONG CARMEN ROAD THE NEXT FEW DAYS, THERE IS ALSO A SEWER
MAIN OF WHICH THEY WILL EXCAVATE ON THE OTHER SIDE, APPROXIMATELY
1400 TONS OF MATERIAL HAS BEEN EXCAVATED AND DISPOSED, MR. CHERENZIA
SAID HE IS DOING THE WORK FOR JAMESTOWN SAVINGS BANK.4/22/03:SAC
TELECON TOWN OF AMHERST ASSESSOR'S OFFICE - OWNER OF PROPERTY
IS:SHERIDAN/CARMEN LLC.c/o ALBERTA PROPERTIES, LLC4248 RIDGE LEA
ROADAMHERST, NEW YORK 142264/22/03:SAC INSPECT SITE, NO ONE AT SITE
AS INSPECTION WAS LATER IN THE DAY, THERE IS AN EXCAVATION ON OTHER
SIDE OF SEWER LINE, THERE IS ANOTHER EXCAVATION TO THE NORTH OF THE

THE BUILDING ON THE EAST SIDE OF IT, IT IS FILLED W/WATER, ONE VERY SMALL STRINGLIKE SHEEN OBSERVED, BLACKTOP WAS BROKEN IN LARGE PART OF THE SITE THAT HAS NOT BEEN EXCAVATED. 4/23/03:SAC TELECON PETE CHERENZIA, MR. CHERENZIA SAID THAT NO CONTAMINATION WAS FOUND ON THE OTHER SIDE OF THE EXCAVATION, ALSO OTHER TWO EXCAVATIONS (NEXT TO THE BANK BUILDING AND THE EXCAVATION TO THE NORTH OF THE EAST SIDE OF THE MAIN EXCAVATION) NO CONTAMINATION WAS OBSERVED ON THE PID METER, MR. CHERENZIA WILL SAMPLE EXCAVATIONS, HE EXPECTS RESULTS BY NEXT WEEK.5/7/03:SAC TELECON PETE CHERENZIA, MR. CHERENZIA HAS RESULTS

EAST SIDE OF THE MAIN EXCAVATION, THERE IS ANOTHER EXCAVATION NEXT TO

FROM THE CONFIRMATORY SAMPLES FROM THE EXCAVATION, SOME SEMI-VOLATILE COMPOUNDS DID EXCEED TAGM 4046 GUIDANCE VALUES, HE WILL HAVE HIS SECRETARY SEND IN RESULTS.5/8/03:RECEIVED ANALYTICAL RESULTS, THERE WERE TAGM 4046 GUIDANCE VALUES WERE EXCEEDED ON A LOW LEVEL FOR SEMI VOLATILES, NO GUIDANCE VALUES WERE EXCEEDED FOR VOLATILES, NO DIAGRAM WAS SENT INDICATING WHERE SAMPLES WERE TAKEN.9/23/03:SAC CALLED CEM,

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008 Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: F001

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED

IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: P001

Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS,

WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P075

Waste name: NICOTINE, & SALTS

Waste code: U002

Waste name: ACETONE (I)

Waste code: U279

Waste name: CARBARYL (OR) 1-NAPHTHALENOL, METHYLCARBAMATE

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was

"SAC"04/21/00: SAC GAVE PJB COPY OF REPORT, SAC SITE INSPECTION, MET JIM ZYMANEK - AMHERST DISASTER COORDINATOR, AND MEMBERS OF EGGERTSVILLE FIRE COMPANY, DEAN MESSING - ERIE COUNTY EMERGENCY SERVICES, AND MEMBERS OF THE FACILITY'S MAINTENANCE STAFF, THEY HAVE A NEW ADDITION TO NURSING HOME AND THE PLAN IS TO REMODEL THE INTERIOR OF THE EXISTING BUILDING, WORKERS WERE REMODELING THE 1ST FLOOR IN THE EXISTING BUILDING WHEN THEY WERE OVERCOME BY UNKNOWN SUBSTANCE IN THE AIR CAUSING THEIR EYES TO WATER AND THROATS TO CLOSE, THE VENTILATION SYSTEM WAS TURNED ON AND SPREAD THE MATERIAL THROUGH THE FACILITY AND CAUSING THE EVACUATION OF THE BUILDING WHERE

PATIENTS WERE TAKEN TO THE HOSPITAL, JERRY FROM THE FIRE DEPT.

INSPECTED THE AREA AND WAS SUBJECTED TO THE SAME SYMPTOMS BUT DID NOT BELIEVE IT WAS GASOLINE BECAUSE IT CAUSED A BURNING SENSATION IN HIS THROAT LIKE AN ACID AND HE DID NOT SMELL GASOLINE ODORS, THE PATIENTS AT THE HOSPITAL WERE TESTED AND TESTS INDICATE THEY WERE EXPOSED TO OCTANE, WHEN THE FIRE DEPT USED THEIR METER TO SCREEN THE AIR, THE

Map ID Direction Distance Elevation MAP FINDINGS

Site Database(s) EPA ID Number

AMHERST NURSING HOME (Continued)

S104652099

EDR ID Number

METER DID HAVE A READING OF OCTANE, ONCE THE HOME WAS VENTILATED THE FIRE DEPT CHECKED IT OVER WITH THE METER AGAIN AND NO ODORS WERE OBSERVED AND THE METER NO LONGER DETECTED ANY ORGANIC VAPORS INCLUDING OCTANE, SAC INSPECTED AREA WHERE COMPLAINTS BEGAN AND OBSERVED NO VAPORS, BASED ON LACK OF VAPORS NOTED BY THE METER AND OLFACTORY SENSES, FIRE DEPT. OKAYED AREA FOR PATIENTS TO RETURN, HEALTH DEPT. WAS INSPECTING FACILITY AND ONCE THEY WERE SATISFIED THE PATIENTS COULD BE BROUGHT BACK INTO THE FACILITY, MR. ZYMANEK WILL CONTACT SAC NEXT WEEK TO REVIEW SITE. 04/24/00: SAC RECEIVED ANOTHER COMPLAINT REGARDING THE SAME MATERIAL, NURSING HOME HAD TO BE EVACUATED AGAIN, SAC NOTIFIED DAN KING BECAUSE PJB IS ON VACATION, SAC SITE INSPECTION, MET JIM ZYMANEK, EGGERTSVILLE FIRE COMPANY, JACK SNIDERHAN OF BUFFALO FIRE DEPT, VARIOUS MEMBER OF THE HEALTH DEPT. INCLUDING DAVE CREAMER, DEAN MESSING OF ERIE COUNTY EMERGENCY SERVICES, MEMBERS OF THE FACILITY'S MAINTENANCE STAFF, AMHERST FIRE WENT IN AND METERED TO SEE IF THEY DETECT THE PROBLEM AND TRACE IT BACK, NOTHING WAS FOUND, THEY CHECKED FOR CORROSIVES AND NOTHING WAS FOUND, THE BUFFALO FIRE DEPT WAS CALLED IN BECAUSE THEY HAVE A VAPOR ANALYZER WHICH INCLUDES MASS SPECTROSCOPY TO TAKE AIR SAMPLES IN VARIOUS LOCATIONS INSIDE THE BUILDING AND OUTSIDE IN SEWER MANHOLES, ALL SAMPLE RESULTS WERE NON-DETECT, WHILE IN THE BUILDING THE FIRE DEPT. WAS USING SUPPLIED AIR, THE PEOPLE AND WORKERS IN THE FACILITY THAT WERE EXPOSED TO THE MATERIAL CLAIMED THEY COULD SEE A HAZE AND THAT IT CHOKED THEM AND THEIR EYES AND THROAT WATERED & BURNED, THERE WAS AN INSTANCE ALSO ON SATURDAY EVENING/SUNDAY MORNING WHERE THIS SITUATION WAS DETECTED BY ONE OF THE STAFF UP ON THE 2ND FLOOR, THEY HAVE FOUND IT HAS GONE TO THE SECOND FLOOR AND ALSO TO THE NEW ADDITION, IT WAS ALSO DETECTED IN THE ELEVATOR, PEOPLE THAT WERE TAKEN TO THE HOSPITAL WERE TESTED BUT THE RESULTS DID NOT IDENTIFY A CHEMICAL EXPOSURE, THERE IS REMODELING GOING ON IN THE BUILDING WHICH INCLUDES DUCT WORK AND DRYWALLING AND THERE IS A QUESTION AS TO WHETHER THIS COULD BE CAUSING THE PROBLEM, THE FACILITY WILL REMAIN EVACUATED FOR NOW, THE FACILITY WILL HIRE A CONSULTANT AND TRY TO DETERMINE WHAT MIGHT BE CAUSING THE PROBLEM SAC DISCUSSED SITE WITH DAVE TACKLEY - NYSDOT ENVIRONMENTAL SPECIALIST AND JOHN PUZAN -NYSDOT ENGINEER IN CHARGE ON THE ROAD WIDENING PROJECT, AND MIKE CIPOLLA - HOLMES & MURPHY WHICH IS THE GENERAL CONTRACTOR ON THE ROAD WIDENING WORK, NO ADDITIONAL CONTAMINATION WAS UNCOVERED BESIDES WHAT WAS FOUND AROUND THE WATER SERVICE LINE THAT WAS FOUND NEAR THE CORNER, SAC NOTIFIED DAN KING OF FINDINGS.04/25/00: SAC TELECON CAMERON O'CONNOR - NYSDOH, MR. O'CONNOR WAS REQUESTED BY NYSDOH IN ALBANY TO CALL SAC AND GET FURTHER INFORMATION ON THE INCIDENT, SAC DISCUSSED SITUATION WITH MR. O'CONNOR.05/05/00: SAC TELECON MIKE FLEMING OF H.G. REALTY WHO OWN THE FACILITY, THEY HIRED UNYSE TO INVESTIGATE SOURCE OF THE ODORS, THEY WERE ABLE TO DETERMINE THAT THE ODORS CAME FROM DRAINS WHICH HAD CLOSED VENTS DUE TO THE REMODELING, HOWEVER, THEY CONTINUE TO USE THE DRAINS FOR LAUNDRY AND CLEANING THE BLEACH AND AMMONIA, SINCE THESE CHEMICALS COULD NOT VENT THROUGH THE VENTS, THE FUMES BACKED UP INTO THE FACILITY, MR. FLEMING SAID HE WOULD PROVIDE SAC WITH A COPY OF THE REPORT ONCE HE IS ABLE.07/13/00: SAC RECEIVED REPORT FROM HG REALTY ALONG W/ANALYTICAL RESULTS FOR CHLORINE AND AMMONIA ANALYSIS, LEVELS WERE WITHIN PERMISSIBLE LEVELS PER THE REPORT.

Remarks:

GASOLINE FUMES LEAKING FROM FUEL TANKS AT NURSING HOME. NURSING HOME EVACUATED, 12 PEOPLE TRANSPORTED TO LOCAL HOSPITAL. CALL BACK/REQUEST OF RESPONSE. 4459 NORTH BAILY RD.

Not reported

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "JFO"07/15/98: JDC ON SITE, MET JACK CARONE, DOT AND LINDA SCOTT, EP&S, INSPECTED EXCAVATION AREA ALONG NF BLVD AND OBSERVED SMALL AREA OF PERCHED WATER AT FOUR FEET FROM GRADE. ON THE WATER SURFACE WAS SHEEN AND SPOTTED FREE PRODUCT. EPS SAID THEY WOULD BIND THE OIL IN SORBENTS, THE WATER WOULD BE SORBED UP BY THE SOILS AND BE TRANSPORTED OVER TO FLANNIGAN FURNATURE FOR STAGING. ADDITIONAL STORAGE SITE MAY BE USE ALONG THE 990 NEAR SWEETHOME ROAD. ALL SOILS WILL BE STAGED ON PLASTIC AND BE PROFILED FOR DISPOSAL BY EPS.7/16/98: JDC ON SITE AND MET NYSDOT AND EP&S. SOIL CONTAMINATION CONMTINUED ALONG NF BLVD TO THE INTERSECTION WITH SHERIDAN DRIVE. AN UNDERGROUND TANK WAS DISCOVERD AT THE CORNER OF SHERIDAN AND NF BLVD. THIS TANK WAS ESTIMATED TO BE 500 TO 1000 GALLONS AND AND FULL WITH WATER THAT HAD PETROLEUM ODOR AND SHEEN. NYSDOT WILL REMOVE THE TANK, EP&S WILL PROCESS THE WATER AND CLEAN THE TANK. JDC MET JACK CARONE AT THE FIELD OFFICE AND ADVISED HIM ON TANK CLOSURE PROCEDURES AND REVIEWED THEIR SITE ASSESSMENT REPORT. IN THE REPORT AMHERST FIRE REPORTED THE REMOVAL OF A 10,000 GALLON TANK AND ONE 550 GALLON WASTE OIL TANK. NO SITE ANALYSIS WAS DONE UNDER THE NYSDOT SITE ASSESSMENT REPORT. REQUESTED THAT AN EXCAVATION SAMPLE ANALYSIS BE DONE ONCE THE TANK HAS BEEN REMOVED UNDRE TCLP 8021 AND 8270.07/16/98: JDC TELECON MR KEEFER OF PETROLEUM SALES AND SERVICE AND CONFIRMED THEIR OWNERSHIP OF THE SITE NEXT TO THE NYSDOT SITE. ADVISED THAT SITE INEVSTIGATION MAY BE REQUIRED BASED ON THE DISCOVERY OF A TANK WITH CONTAMINATION. JDC ADVISED THAT DOT WOULD BE REMOVING THE TANK AND ABOUT 500 YARDS OF SOIL. JCD SENT LETTER DATED 07/24/99 TO PETROLEUM SALES AND SERVICE AFTER CONSULTING WITH RMC ON AN OLD SPILL NUMBER FOR THAT PROPERTY. (9206340) 07/29/98: JDC ON SITE, MET MANAGER HIRED BY NATIONAL FUEL GAS TO INSTALL GASLINE AND TRENCH. HE STATED THAT CONTAMINATED SOILS WERE DISCOVERD AT THE CORNER OF NF BLVD AND SHERIDAN, JUST NORTH OF FUEL TANK REMOVED BY NYSDOT, APPROXIMATELY 10 YRDS OF SOIL AND TRANSPORTED TO STAGING AREA OFF CHESTNUT RIDGE OFF SWEETHOME. FOUND SOILS STAGED WITH PLASTIC.08/10/98: JDC TELECON MIKE OLSON, FIRESTONE, AND REQUESTED STATUS ON THE REMEDIATION PROJECT. HE STATED THAT FIRESTONE MAY RETAIN SOME LIABILITY IN THIS MATTER. WILL FORWARD HIM COPIES OF OUR FILE FOR REVIEW.09/30/98: JDC RECIEVED AND REVIEWED EXCAVATION SAMPLE RESULTS AND FOUND LEVELS OF CONTAMINATES IN GROUNDWATER, ALL CONTAMINATED SOILS DISPOSED OF BY EP&S. WILL CONTINUE TO FOLLOWUP WITH PETRO USA ON POTENTIAL OTHER SITE CONTAMINATION.05/17/99: JDC REVIEWED FILE AND FOUND NO RESPONSE AS REQUESTED IN A JULY 98 LETTER, REQUESTING MORE INVESTIGATION BASED ON ELEVATED SAMPLING DATA FROM FROM KANTI LABS BY EP&S DATED 7/17/98. LEFT MESSAGE WITH MR KEEFER OF PETRO SALES AND SERVICE.07/30/99: JFO ASSUMED SITE RESPONSIBILITY SINCE JDC NO LONGER WORKS FOR DEPARTMENT07/30/99: JFO SENT LETTER TO BERNARD KIEFFER OF PETRO SALES AND SERVICE. REQUESTING INFORMATION IN JDC'S LETTER OF JUNE 24, 1998 BY AUGUST 13, 1999.08/02/99: JFO TELECON FROM BERNARD KIEFFER, HE IS MEETING WIHT REPS FROM FIRESTONE THIS WEEK, HE WILL GET INFORMATION AND SUBMIT TO ME08/16/99: JFO TELECON MIKE OLSEN (FIRESTONE). HE WILL SEND INFORMATION ON SITE08/30/99: JFO TELECON JEANEAN SHEPARD OF NYSDOT, SHE WILL CHECK FOR ANALYTICAL09/15/99: JFO REVIEWED SAMPLE RESULTS AND DISPOSAL RECEIPTS FOR SOIL AND WATER. THE RESULTS FOR THE GW REFERRED TO IN JDC'S NOTES OF 9/30/98 ARE NOT GW RESULTS, THEY ARE THE RESULTS FOR CONTAMINATED WATER THAT WAS DISPOSED (1119 GALLONS). THE EXCAVATION RESULTS ARE BELOW DETECTION LIMIT. MR KEIFFER WAS NOTIFIED BY PHONE. NO FURTHER ACTION REQUIRED. CLOSED

CAN, UP TO THE BUILDING FOUNDATION, THEN TAKE SOIL SAMPLES... AFTER THEY REMOVE THE SECOND TANK TOMORROW, THEY WILL ALSO TAKE GEO-PROBE SOIL SAMPLES ALL AROUND THE PROPERTY, TO SEE IF THERE ARE ANY OTHER AREAS OF CONTAMINATION...DRAFTED AND SENT A 'RP' LETTER TO PROPERTY OWNER RICHARD DORAN.12/17/2002: RJJ AT SITE AT 1100...THE EXCAVATION INSIDE IS ABOUT 10'X6'X8' AND NOW LOOKS AND SMELLS CLEAN...SEAN WILL TAKE 4 WALL AND 1 FLOOR SAMPLE...OUTSIDE, THEY EXCAVATED 1-550 FUEL OIL TANK AND THE PIT LOOKS AND SMELLS CLEAN...THEY WILL ALSO TAKE 4-WALL AND 1-FLOOR SAMPLE...THE CONTAMINATED SOIL WILL BE STAGED ON SITE, ON PLASTIC, AWAITING DISPOSAL. 1/31/2003: SHAWN IRWIN TELECON RJJ SAID THAT 1 ANALYTICAL SAMPLE CAME BACK ABOVE OUR GUIDANCE VALUES, SO THEY WILL HAVE TO EXCAVATE MORE ON THE OUTSIDE EXCAVATION...SHAWN WILL KEEP ME INFORMED ON THEIR PLANS.2/6/2003: RECEIVED THE GEOPROBE INVESTIGATION REPORT FROM KAYVER GROUP, SEAN IRWIN, WHICH INDICATES THAT THERE IS STILL HIGH LEVELS OF CONTAMINATION AT B1 AND B6,AND AT B-13...SEAN WILL CONTACT BP CORPORATION TO SEE IF THEY WILL TAKE RESPONSIBILITY FOR THE REMEDIATION.3/10/03:SAC TELECON SEAN IRWIN, MR. IRWIN SAID PETER RUPPAR, ATTORNEY FOR THE RP HAS SENT A LETTER TO BRITISH PETROLEUM (BP) REQUESTING THEY TAKE RESPONSIBILTY FOR THE CLEANUP, BP HAS RESPONDED WITH A LETTER DATED 2/27/03 TO MR. RUPPAR THAT THEY NEED 30 TO 60 DAYS BEFORE RESPONDING TO THE REQUEST.6/3/2003: RJJ TELECON SEAN IRWIN, HE SAID THAT BP WILL START GEO-PROBING THE AREA ON 6/4/2003 AND THAT THEY WILL SEND ME THE RESULTS.06/12/03 RMC/SITE. RECEIVED COMPLAINT ABOUT CONTAMINATED SOIL AT 3218 SHERIDAN, UPON INSPECTION FOUND CORRECT ADDRESS TO BE 3220, APPEARS CONTAMINATED SOIL PILE HAS BEEN SITE FOR MORE THAT 60 DAYS. RMC NOTED RECENT GEOPROBING ON THE PROPERTY. 8/25/2003: RECEIVED A LETTER FROM SEAN IRWIN EXPLAINING THEIR PROBLEMS WITH SECOR'S PROPOSED REMEDIATION PLANS...I TELECONED SEAN AND TOLD HIM THAT I HAVE NOT RECEIVED THE WORKPLAN, SO HE WILL SEND ME A COPY AND WE WILL DISCUSS THIS LATTER IN THE WEEK...I ALSO TOLD HIM THAT THE CONTAMINATED SOIL MUST BE REMOVED SOON...HE WILL TALK WITH MR. DORAN ABOUT THIS.8/27/2003: RECEIVED SECOR'S SITE CHARACTERIZATION ACTIVITIES ON THE PROPERTY, AND THEIR PROPOSED WORKPLAN ON THE REMEDIATION...I TELECON BOTH SEAN IRWIN AND MIKE TEELING AND TOLD THEM THAT SECOR'S PROPOSAL IS ACCEPTABLE...MIKE TEELING WILL CONTACT BP AND TELL THEM THIS...(IN THE WORKPLAN, NO CONFIRMATORY SOIL SAMPLING WILL BE TAKEN, SINCE THEY HAVE ALREADY DEFINED THE EXTENT OF CONTAMINATION WITH THEIR EXTENSIVE GEO-BORINGS.)8/29/2003: RECEIVED THE CONFIRMATORY ANALYTICAL RESULTS FOR THE TANK PIT EXCAVATION OF THE 2 WASTE OIL TANKS REMOVED,1 FROM INSIDE THE BUILDING, AND 1 FROM OUTSIDE...ONLY A FEW COMPOUNDS ARE SLIGHTLY HIGHER THAN OUR TAGA GUIDANCE LEVELS, SO WE CAN MAKE THIS SITE 'INACTIVE', AFTER THE REMAINING CONTAMINATION IS REMOVED, UNDER THE PARKING LOT.9/19/2003: MODERN HAS TRANSPORTED THE CONTAMINATED SOIL AND DISPOSED IT AT THEIR LANDILL...SEAN IRWIN WILL SEND ME THE DISPOSAL RECEIPTS.12/11/2003: RICHARD DORAN, PROPERTY OWNER, TELECON RJJ, HE SAID THAT THEY ARE IN THE PROCESS OF SELLING THE PROPERTY TO BENDERSON AND THAT EITHER BP OR BENDERSON WILL CONTINUE THE REMEDIATION SOON.12/12/2003: RECEIVED THE DISPOSAL RECEIPTS FOR 67.15 TONS OF CONTAMINATED SOIL TAKEN TO MODERN LANDFILL FROM SEAN IRWIN, KAYVER GROUP. 1/8/2004: SEAN IRWIN TELECON RJJ,HE SAID THAT BENDERSON IS IN THE PROCESS OF OBTAINING THE PROPERTY, AND THAT THEY WILL CONTINUE THE REMEDIATION IN A COUPLE OF MONTHS...I SAID THAT THIS WOULD BE ACCEPTABLE...SEAN WILL HAVE BENDERSON'S ATTORNEY DRAFT UP A LETTER EXPLAINING THIS.5/11/2004: RJJ TELECON RICHARD DORAN.HE SAID THAT THE SITE HAS BEEN SOLD TO BENDERSON CORP. IN MARCH AND MR. RICHARD FRANCO IS THE NEW CONTACT

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was

"MJS"09/14/99: MJS TOOK REPORT FROM MR SAVAGE. THEY ARE EXCAVATING SOILS AND STOCKPILING, NEED INSPECTION BY TOMORROW.09/15/99: MJS SITE INSPECTION, MET WITH KEVIN AND JAMIE FROM NATURES WAY. THEY FOUND A 500 GALLON TANK, FOUND AND REMOVED CONTAMINATED SOIL, SAMPLES OBTAINED (EXCAVATION #1). ALSO, ADDITIONAL CONTAMINATED SOILS IDENTIFIED AT VERY NORTHWEST CORNER OF SITE BY INTERSECTION (EXCAVATION #2). SOILS REMOVED TO THE BEST OF THEIR ABILITY BUT POCKET OF GROSSLY CONTAMINATED SOILS REMAINS AT NORTHWEST CORNER OF EXCAVATION, UNDER NATURAL GAS LINE (SEE SKETCH). APPEARS THIS IS AN OLD TANK PIT. CANNOT EXCAVATE FURTHER OR ON OTHER SIDE OF GAS LINE DUE TO OBVIOUS OTHER UTILITIES(GAS, ELECTRIC, WATER, SEWER). ADVISED NATURES WAY TO OBTAIN SAMPLES OF CLEAN AREAS (BOTTOM AND SIDEWALLS) AND SAMPLE SUSPECT CONTAMINATED POCKET SEPARATELY. ALSO, THEY WILL PLACE PLASTIC SHEETING BETWEEN CONTAMINATED AREA AND NEW BACKFILL. MJS ADVISED THEM TO HAVE UTILITIES MARKED OUT, WILL REQUIRE SOIL BORINGS ON OTHER SIDE OF UTILITIES TO CHARACTERIZE EXTENT OF CONTAMINATION. FURTHER EXCAVATION/REMEDIATRION MAY BE NECESSARY DEPENDENT ON SOIL BORING RESULTS. MJS MET WITH JOHN PAWLOSKI OF BENDERSON DEVELOPMENT AND EXPLAINED DECISION.10/12/99: MJS TELECON WITH RUSS SAVAGE, NATURES WAY, THEY CALLED FOR UTILITY MARKOUT BUT NOT DONE PROPERLY. HE WILL CALL FOR MEETING THIS WEEK AND GET BACK TO ME. HE RECEIVED SAMPLE RESULTS.05/10/00: MJS REVIEWED REPORT RECEIVED ON 5/2. ALL SAMPLE RESULTS AT EXCAVATION #1 ARE NON-DETECT. APPROX 200 TONS SOILS DISPOSED FROM THIS EXCAVATION. THE SOIL SAMPLES FROM EXCAVATION #2 INDICATE THAT BOTTOM AND EAST, WEST, SOUTH SIDES CLEAN. NORTH SIDE ALSO CLEAN EXCEPT FOR NORTHWEST CORNER (SAMPLED SEPARATELY, SUSPECTED CONTAMINATED). SAMPLE RESULTS FOR THIS CORNER INDICATE TOTAL 8021 CONTAMINANT CONCENTRATION OF 2366 PPB (1921 PPB IS NAPTHALENE). THEY INSTALLED SEVEN GOEPROBE BORINGS ON OTHER SIDE OF UTILITIES ALONG BOTH SHERIDAN AND BAILEY, INSTALLED TO 10' BGS. INTERVALS WITH HIGHEST OVM RESULTS SUBMITTED FOR ANALYSIS. ONE OF THE SIX SAMPLES HAD COMPOUNDS ABOVE SOIL GUIDELINES, BUT WELL BELOW EXPOSURE ASSESSMENT VALUES. MJS SENT INACTIVE LETTER TO RP.10/25/00: MJS FILE REVIEW, FILE STILL ACTIVE ON COMPUTER, MJS MAKE INACTIVE. CONTAMINATED SOIL FOUND WHILE EXCAVATING FOR NEW ECKERD DRUG STORE.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was

"RMC"01/16/03 RMC/FILE. SITE REASSIGNED TO RMC FROM SAC. RMC TO VIST

SITE. UPDATE 1/31/0301/17/03 RMC/SITE, WALKED AREA. DEC HAS HAS

NUMEROUS SPILLS IN THIS AREA. IT IS NOT KNOWN WHERE NFG FOUND ODORS IN THE SOIL 5 YEARS AGO. RMC DISCUSSED WITH PJB, TO CLOSE SITE DUE TO

PASSAGE OF TIME. CLOSE OUT.

Remarks: several excavations indicate strong petroleum contamination

Handler Activities Summary:

U.S. importer of hazardous waste: No Mixed waste (haz. and radioactive): Nο Recycler of hazardous waste: No Transporter of hazardous waste: No Treater, storer or disposer of HW: No Underground injection activity: No On-site burner exemption: No Furnace exemption: No Used oil fuel burner: No Used oil processor: No User oil refiner: Nο Used oil fuel marketer to burner: No Used oil Specification marketer: No Used oil transfer facility: No Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007

Waste name: CHROMIUM

Waste code: D009
Waste name: MERCURY

Waste code: D010
Waste name: SELENIUM

Waste code: D024
Waste name: M-CRESOL

Waste code: P001

Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS,

WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P075

Waste name: NICOTINE, & SALTS

Violation Status: No violations found

CALLED JOE SAPIIENZA, 481-4874. REQUESTED REPORT AND SCHEDULE FOR REST OF THE WORK, WANTS TO DO REST OF THE WORK IN 3/09. DUE 11/15/08.01/08/09 RMC/JOE SAPIENZA/PHONE. HE HAS PAID FOR THE WORK BUT NOT YET RECEIVED A REPORT. HE WILL CONTACT HIS CONTRACTOR AGAIN, DUE 1/30/09.01/14/09 RMC/FILE. RECEIVED REPORT FROM TITAN WRECKING AND ENVIRONMENTAL. REMOVED 550 GALLON UST, DISPOSED 139.52 TONS IMPACTED SOILS, EXCAVATIONS TO DATE WERE AT THE SOUTH END OF THE BUILDING, 7 POST EXCAVATION SAMPLES TAKEN, WW2 HAS MINOR EXCEEDANCES, NW SHOWS NUMEROUS SVOC EXCEEDANCES. SAMPLES ON SITE MAP APPEAR TO BE MIS LABLED. MORE SITE WORK IS REQUIRED. UPDATE 2/28/09.06/02/09 RMC/JOE SAPIENZA/PHONE. HE HIRED LEADER TO SAMPLE FRONT AROUND THE UST. REPORT DUE 8/15/0906/16/09 RMC/FILE. RECEIVED REPORT ON MW4. REPORT STATES THAT STARS COMPOUNDS WILL BE TESTED FOR. THE RESULTS WERE INCOMPLETE, CALLED JEFF WITTLINGER, LEADER, HE WILL LOOK INTO. UPDATE 6/30/09.06/24/09 RMC/SITE. SITE THE SAME AS IN 2008. UPDATE 7/15/0909/25/09 RMC/FILE. LAST KNOWN UST ON SITE. WAS SCHEDULED TO BE PULLED TODAY. RRP HIRED LUNN CONCRETE TO PULL THE TANK. RMC WAS INFORMED AT 1PM THAT A CRANE WAS NEED AND ORDED TO REMOVED THE 4K UST AS IT WAS FILLED WITH SAND. RMC ADVISED PRP AND CONTRACTOR THAT WHEN A TANK IS FILLED THE CONTRACTOR USUALLY CUTS IT IN PLACE AND REMOVES THE CONTENTS THEN THEY REMOVED THE TANK. UPDATE 10/1/0910/20/09 RMC/FILE. RECEIVED CALL THAT UST WILL BE PULLED 10/21, CONTRACTOR WILL BE ON SITE AT 10 AM.10/21/09 RMC/SITE, 12NOON, NO CONTRACTOR ON SITE. LATER RECEIVED MESSAGE THAT WORK WOULD NOT START UNTIL 2 PM. 10/23/09 RMC/JOE SAPIENZA/SITE. NO WORK HAS BEEN DONE DUE TO WATER IN THE HOLE. PUMPING INTO 150 GALLON TOTES. EST 450 GALLONS IN HOLE AND 500 IN STONE IN TANK. CAN SEE INTO THE CUT OPEN TANK FLOODED WITH WATER. 10/26/09 RMC/SITE. PUMPING WATER ONE TOTE FULL ONE 1/2 FULL. 600 GALLONS IN EXCAVATON 500 IN TANK. NO PROGRESS MADE WITH EXCACATION.10/27/09. RMC/JOE SAMPIENZA/PHONE. REPORTS THAT 8 TANKS OF WATER TAKEN OUT SO FAR. UST FULLY UNCOVERED AND CONTACTOR IS GOING TO CUT THE UST OPEN. 10/29/09 RMC/SITE. NO ONE WORKING. PIT HAS ABOUT 1000 GALLONS WATER. UST CUT AND ABOUT 1/2 THE PEA STONE HAS BEEN EXCAVATED OUT. ABOUT 5 LOADS HAS BEEN STOCKPILED SO FAR. NO ONE ON SITE. 11/06/09 RMC/SITE. UST REMOVED AND STAGED ON SOUTH END OF THE BUILDING. HOLE STILL FILLED TO WITH IN 4 FOOT OF GRADE WITH WATER. 11/10/09 RMC/TOWN OF AMHERST/PHONE. AMHERST WANTED TO KNOW IF DEC KNEW ABOUT THE PROJECT. 12/28/09 RMC/FILE. RECEIVED A CALL LAST WEEK FROM JOE SAPIENZA. HE HAS THE EXCAVATION RESULTS AND WILL FORWARD THEM TO ME. DISPOSAL AND RESULTS DUE 1/7/10. 02/19/10 RMC/FILE. RECEIVED SAMPLE RESULTS BUT NOT DISPOSAL RECEIPTS. LETTER. RESPONSE DUE 3/15/10.05/03/10 RMC/JOE SAPIENZA/PHONE. DISPOSAL WILL TAKE PLACE IN TWO WEEKS. RECIEPTS DUE 6/1/1006/14/10 RMC/FILE. REVEIVED DISPOSAL RECEIPTS FOR 3 LOADS IMPACTED SOIL REMOVED FROM NE CORNOR OF THE PROPERTY. REVIEWED FILE. ALL KNOWN USTS AND SOURCE AREAS HAVE BEEN REMEDIATED. EXCEEDANCES NOTED IN SEVERAL SAMPLES TAKEN ABOUT THE PROPERTY. SITE TO BE MADE INACTIVE. LETTER. INACTIVE. ANALYTICAL RESULTS FROM SOIL BORINGS AND MW'S ARE ABOVE TAGM'S AND GW

DEC Memo: 5/15/2009: ANDY KUSERIK,LCS,TELECON RJJ,HE SAID THAT THEY UNCOVERED
AN UST DURING THEIR PHASE 2 ON THE PROPERTY...LSC HAS SUBMITTED A

WORKPLAN TO REMOVE/REMEDIATE THE PROPERTY TO THE PROPERTY OWNERS AND

ARE AWAITING THEIR REPLY...ANDY WILL KEEP ME INFORMED.6/18/2009: RJJ AT SITE AT 1230...GURNEY,BECKER & BOURNE,INC.,THE CURRENT PROPERTY OWNERS,HAVE HIRED GALLOWAY TECHNICAL SERVICES TO REMEDIATE THE SITE...TODAY,BILL GALLOWAY HAS UNCOVERED 2-1000 GAL GASOLINE USTS,NOT 1,AND EXCAVATED & STAGED ON-SITE,THE PETROLEUM CONTAMINATED

1,AND EXCAVATED & STAGED ON-SITE, THE PETROLEUM CONTAMINATED SOIL...THE 2-USTS ARE FULL OF WATER, SO THEY WILL HAVE ENVIRONMENTAL SERVICE GROUP PUMP OUT & REMOVE THE 2 TANKS TOMORROW, THEN BILL WILL CONTINUE WITH EXCAVATING ANY CONTAMINATED SOIL THEY ENCOUNTER...THEY WILL ALSO BRING A BAKER TANK TO PUMP ANY CONTAMINATED WATER INTO, THAT

THEY ENCOUNTER...ALSO, JACK FISHER, SENTINEL TECH. IS ONSITE AS A CONSULTANT FOR MONRO MUFFLER, WHO LEASED THE PROPERTY LAST...BILL WILL KEEP ME INFORMED AND I WILL CHECK ON SITE TOMORROW.6/19/2009: RJJ AT SITE AT 1300...ES&G HAS PUMPED OUT ~1750 GAL OF WATER FROM BOTH USTS INTO THEIR VAC TRUCK TANK, WHICH WILL REMAIN ON SITE, UNTIL ANALYTICAL COMES BACK FOR DISPOSAL...GALLOWAY SERVICES THEN REMOVED BOTH 1000 GAL USTS AND EXCAVATED ~75 TONS OF PETROLEUM CONTAMINATED SOIL, ON

SITE...THEY WILL CONTINUE TO EXCAVATE TILL CLEAN...I WILL INSPECT
AGAIN NEXT WEEK.6/22/2009: RJJ AT SITE AT 1000...BILL GALLOWAY

SERVICES HAS EXCAVATED ADDITIONAL IMPACTED SOIL...THEY STILL NEED TO EXCAVATE FURTHER ON THE EASTSIDE OF THE EXCAVATION, WHERE THE UST PIPING RAN TO THE PUMP ISLANDS.6/22/2009: RJJ AT SITE AT 0930...WHILE EXCAVATING THE UST PIPING, EASTWARD, THEY HAVE ENCOUNTERED SOME ADDITIONAL PETROLEUM CONTAMINATED SOIL...THIS MIGHT BE FROM A NEARBY OLD OIL/WATER SEPERATOR...GALLOWAY SERVICES WILL CONTINUE EXCAVATING TILL CLEAN.7/1/2009: RJJ AT SITE AT 1000...BILL GALLOWAY IS

CONTINUING EXCAVATING, EASTWARD...THEY ALSO OBTAINED CONFIRMATORY SOIL SAMPLES, FROM WHERE THE USTS WERE.7/2/2009: RECEIVED AN UPDATE REPORT FROM ECI(ENVIRONMENTAL COMPLIANCE, INC., THEY ARE THE PROPERTY OWNERS ENVIRONMENTAL CONSULTANTS), WHICH INCLUDES LCS'S PHASE 2 & THE TOWN OF TONAWANDA'S USTS REPORT.7/14/2009: RJJ AT SITE AT 1330...GALLOWAY TECHNICAL SERVICES HAS EXCAVATED SOUTHWARD, TOWARD THE OIL/WATER SEPARATOR & HAVE REMOVED ~50 TONS OF ADDITIONAL IMPACTED SOIL...THEY

OBTAINED 3-WALL & 1-FLOOR COMPOSITE SOIL SAMPLES, PER MY
INSTRUCTIONS(THEY HAVE ALREADY SAMPLED THE EASTWALL)...THE EXCAVATION
NOW APPEARS TO HAVE NO STAINED SOIL OR ANY PETROLEUM ODORS OF ANY
KIND.8/21/2009: RECEIVED THE FINAL REPORT FROM ECI WHICH INCLUDES THE
DISPOSAL RECEIPTS FOR 217.14 TONS OF PETROLEUM CONTAMINATED SOIL
TAKEN TO THE TONAWANDA LANDFILL & THE ANALYTICAL RESULTS FROM THE
EXCAVATION(ALL THE RESULTS ARE ALL BELOW OUR 'STARS' GUIDANCE

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was

"SAC"07/15/98: RNL REVIEWED SITE ASSESSMENT FROM NYSDOT FOR THEIR HIGHWAY PROJECT ON BAILEY AVENUE, SITE TO BE ACTIVE DUE TO HIGH LEVELS OF PETROLEUM, SPILLS TO CONTACT ADJACENT OWNER, NYSDOT TO DISPOSE OR TREAT ANY REMOVED SOIL, RNL SENT LETTER TO NYSDOT03/28/00: SAC SITE INSPECTION, MET JOHN PUZAN, NYSDOT EIC AND GREG WEBER,

CHECKED AREAS WHERE SOIL WAS REMOVED, AREAS WERE BACKFILLED AND WATER

LINE INSTALLED, MR. PUZAN SAID THAT NO STAINING OR ODORS WERE
OBSERVED IN THESE AREAS BUT ALL SOIL WAS DISPOSED OF THAT WAS
EXCAVATED FROM THESE AREAS, SINCE THERE WAS A LACK OF NUISANCE
CHARACTERISTICS (i.e. ODORS, STAINING) AND ALSO BASED ON SAC TELECON
WITH FRIEND LABORATORIES WHERE THE BASE-NEUTRALS THAT WERE IDENTIFIED
COULD HAVE BEEN MATRIX INTERFERENCE FROM ASPHALT IN THE SAMPLE, IT IS
QUESTIONABLE WHETHER THERE WAS A SPILL AT THESE LOCATIONS, SAC OPENED
UP NEW SPILL NUMBER 0075004 TO RESAMPLE AREAS IN THE RIGHT OF WAY AND
ANALYZE SAMPLES USING EPA METHOD 8270 TCLP, RESULTS CAME BACK NON
DETECTIBLE FOR ALL PARAMETERS AND SAMPLES TAKEN DID NOT HAVE ODORS OR
STAINING PER NAUTRE'S WAY.05/23/00: SAC RECEIVED COPIES OF DISPOSAL
RECEIPTS FROM OP-TECH, SOIL DISPOSED FROM THESE AREAS WERE INCLUDED
WITH CONTAMINATED SOIL THAT CAME FROM THE OUIK-NAME ON THE CORNER OF

BAILEY AND EGGERT (SPILL NUMBER 9608075 BEING HANDLED BY RMC), NO

FURTHER WORK REQUIRED.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EDR ID Number

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

PARTIALLY REMOVED AND CORDONED OFF. FIFTEEN DRUMS ON SITE. MR REIMONDO STATED THAT THEY ARE BRINGING FRAC TANK TOMORROW TO CONTINUE PUMPING.09/15/97: MJS TELECON TO JOHN REIMONDO FOR UPDATE. LEAK FOUND IN FIBERGLASS PIPING AND REPAIRED. OIL/WATER FROM DRUMS WAS TREATED VIA CARBON.09/17/97: MJS RECEIVED REPORT FROM GES INC WITH EFFLUENT SAMPLE RESULTS. TWO 180-POUND CARBON DRUMS USED IN SERIES. 4820 GALLONS WATER TREATED TOTAL. NO COMPOUNDS DETECTED AFTER CARBON TREATMENT.09/23/97: MJS SENT LETTER TO MOBIL REQUIRING SAMPLING OF TANK PIT MONITORING WELLS TO DETERMINE CONDITION OF GROUNDWATER. RESULTS DUE 11/1/97.09/26/97: MJS RECEIVED MESSAGE FROM BRIAN CAREY THAT THEY WILL SAMPLE TANK PIT WELLS ON MON 9/29.10/06/97: MJS TELECON WITH BRIAN CAREY. THEY WILL USE VACUUM TRUCK ON FRI 10/10 TO REMOVE WATER FROM TANK PIT PRIOR TO TAKING SAMPLES. WATER WILL BE TREATED AT MOBIL TERMINAL GW TREATMENT SYSTEM. MR CAREY WILL FORWARD LETTER TO THIS EFFECT.10/10/97: MJS TELECON WITH MR CAREY. THEY REMOVED 5000 GALLONS OF WATER FROM TANK PIT AND DROPPED WATER LEVEL APPROX 1.5 FEET. THEY WILL REMOVE AN ADDITIONAL 5000 GALLONS LATER TODAY AND SAMPLE TANK PIT WELLS NEXT WEEK. MJS RECEIVED LETTER FROM MR CAREY.10/22/97: MJS OFFICE MEETING WITH MOBIL AND GES. SAMPLES COLLECTED ON 10/15 AND RESULTS DUE BY END OF MONTH. REPORT DUE BY MID-NOVEMBER. IF RESULTS INDICATE CONTAMINATION THEY WILL REMOVE ADDITIONAL WATER FROM TANK PIT.12/04/97: MJS TELECON FROM BRIAN CAREY, MOBIL CREW ON SITE PERFORMING TANK WORK, TOP OF TANKS UNCOVERED. WATER PUMPED FROM TANK PIT TO FRAC TANK. WATER HAS PETROLEUM ODOR BUT NO PRODUCT. MR CAREY REQUESTED APPROVAL TO TRANSPORT WATER TO MOBIL TERMINAL FOR TREATMENT AS BEFORE. MJS AGREED. REPORT DUE THIS MONTH.12/15/97: MJS RECEIVED LETTER AND REPORT FROM MOBIL. TOTAL OF 8500 GALLONS OF WATER REMOVED FROM TANK PIT ON 10/10/99. TANK PIT WELLS SAMPLED ON 10/15, RESULTS INDICATE ELEVATED VOC CONCENTRATIONS (59,120 PPB AND 38,485 TOTAL STARS 8021 ANALYTES). ADDITIONAL DEWATERING ON 12/4 AND WATER STORED IN FRAC TANK PENDING TRANSPORTATION TO MOBIL TERMINAL FOR TREATMENT, LETTER STATES THAT MOBIL IS PREPARING A WORK PLAN FOR THIS SITE.05/04/98: MJS TELECON WITH BRIAN CAREY. THEY PLAN TO UTILIZE A MOBILE TREATMENT UNIT (TRAILER) TO REMEDIATE TANK PIT AT VARIOUS TIMES THIS SEASON. THEY WILL BE ON SITE WITH EQUIPMENT MON 5/9.07/16/98: MJS RECEIVED REPORT FOR JAN-JUNE 1998 FROM MOBIL. REMEDIATION TRAILER WITH GROUNDWATER TREATMENT SYSTEM OPERATED ON SITE ON MAY 11-13 AND JUNE 2-4. WATER TREATED VIA SERIES OF CARBON UNITS. INFLUENT, MIDDLE AND EFFLUENT SAMPLES OBTAINED DURING EACH EVENT. TOTAL OF 30,824 GALLONS WATER REMOVED FROM TANK PIT DURING THE TWO EVENTS. TP-1 AND TP-2 SAMPLED ON 4/29 (PRIOR TO TREATMENT EVENTS). TOTAL 8021 STARS COMPOUNDS ARE 26,656 AND 20,302 PPB. REMEDIATION EVENT PLANNED FOR LATER THIS MONTH.11/27/98: MJS RECEIVED REPORT FOR JUL-NOV 1998. REMEDIATION EVENTS TOOK PLACE ON 7/29 AND 11/6. 24,480 GALLONS WATER TREATED DURING THESE TWO EVENTS, 60,124 GALLONS TOTAL. TP-1 AND TP-2 SAMPLED ON 7/20. ALL THREE WELLS SAMPLED ON 10/12. ANALYSIS FOR BTEX+MTBE ONLY.TP-1 TP-2 TP-3 DATEBTEX/MTBE2690/550 10309/690 NS 7/20/98 268/840 2110/1300 5930/960 12/12/98 705/5300 174/1100 NS 1/16/99 331/1300 38/420 526/670 4/29/99 257/NS 550/ NS NS/NS 7/13/99 663/950 183/850 423/750 10/27/9903/01/99: MJS TELECON FROM MARC FALZONE, GES. HE WILL BE SENDING REPORT.03/02/99: MJS RECEIVED REPORT FOR NOV 1998-JAN 1999. GROUNDWATER SAMPLING PERFORMED ON 1/16/99 -BTEX AND MTBE. SEE ABOVE FOR RESULTS. NEXT REMEDIATION EVENT SCHEDULED FOR MARCH 1999 AND NEXT SAMPLING SCHEDULED FOR DEC 1999.06/17/99: MJS RECEIVED REPORT FOR FEB-APR 1999. REMEDIATION EVENT 4/30/99-5/3/99. TANK PIT WELL SAMPLING ON 4/29/99. SEE ABOVE

EXCAVATION OF ~3000 TONS OF PETROLEUM CONTAMINATED SOIL.)3/14/2007: JEFF WALKER, GES, TELECON RJJ, HE SAID THAT THEY HAVE BEGUN TO REMOVE THE OLD WASTE OIL AND FUEL OIL USTS TODAY, THEN IN 2 WEEKS, THEY WILL REMOVE THE GASOLINE USTS, PER THE RAP. 3/19/2007: RJJ AT SITE AT 1330...GES, JEFF WALKER, HAS REMOVED THE WASTE OIL AND FUEL OIL USTS...THIS EXCAVATION IS ~20'X10'X10' AND APPEARS TO HAVE NO VISIBLE STAINING OR ANY PETROLUM ODORS...TODAY, THEY ARE REMOVING THE PIPING IN THE FRONT OF THE BUILDING...JEFF WILL KEEP ME INFORMED ON THEIR ACTIVITIES.3/30/2007: RJJ AT SITE AT 1000...GES HAS ALREADY REMOVED THE 6000(SPECIAL UNLEADED),6000(SUPER UNLEADED),& 10000 GAL REGULAR UNLEADED GASOLINE USTS AND THE 6000 GAL DIESEL FUEL UST...THE EXCAVATION ~ 75'X50'X12' AND APPEARS TO HAVE NO VISIBLE STAINING OR PETROLEUM ODORS...NEXT WEEK, GES WILL REMOVE THE ASSOCIATED PIPING...THEY ALSO TRANSPORTED ~900 TONS OF CONTAMINATED SOIL TO MODERN LANDFILL.4/5/2007: RJJ AT SITE AT 1000...GES IS CONTINUING TO EXCAVATE THE CONTAMINATED SOIL ON SITE...THUS FAR, THEY HAVE DISPOSED ~2000 TONS OF SOIL...TODAY.THEY ARE EXCAVATING AROUND THE PUMP ISLAND CANAPYS...ALSO, ON THE NORTHSIDE OF THE EXCAVATION, NEAR THE SIDEWALK, THERE IS A GAS-LINE, SO THEY CAN NOT EXCAVATE ANY FURTHER IN THAT DIRECTION.4/12/2007: RJJ AT SITE AT 1030...GES IS STILL CONTINUING EXCAVATING/DISPOSE THE PETROLEUM CONTAMINATED SOIL...TODAY, THEY ARE EXCAVATING TOWARD THE WESTSIDE OF THE PROPERTY...THUS FAR.THEY HAVE REMOVED/DISPOSED ~4700 TONS OF SOIL.4/18/2007: RJJ AT SITE AT 1330...GES HAS FINISHED EXCAVATING AS MUCH/FAR ON THE PROPERTY AS THEY CAN, DUE TO MANY UTILITY LINES(GAS, WATER, ELECTRICAL), AND ARE NOW BACKFILLING THE SITE... ALL TOTAL, THEY HAVE EXCAVATED ~6000 TONS OF CONTAMINATED SOIL...IN A FEW AREAS, NEAR THE UTILITY LINES AND UP TO THE ISLAND CANAPY, THERE IS STILL SOME RESIDUE SOIL STAINING, HOWEVER, NO FURTHER SOIL REMOVAL IS POSSIBLE...GES WAS TAKEN ALL THE NECESSARY SOIL SAMPLES AND WILL SEND ME THEIR FINAL REPORT.5/11/2007: RECEIVED THE TANK EXCAVATION ASSESSMENT REPORT FROM GES.WHICH INCLUDES THE DISPOSAL RECEIPTS FOR 5,526.44 TONS OF PETROLEUM IMPACTED SOIL TAKEN TO ENSOL...ALSO,A FEW FLOOR SAMPLES ARE HIGHER THAN OUR 'TAGM' LEVELS...I WILL DISCUSS THIS REPORT WITH GES...JEREMIAH SMITH, GES, TELECON RJJ, HE SAID THAT THERE IS ANOTHER REPORT WITH ADDITIONAL CONFIRMATORY SAMPLES THAT WILL BE SENT TO ME.6/21/2007: RECEIVED A REPORT, VIA-E-MAIL, FROM GES, WHICH WILL ALSO BE SENT TO US, THROUGH THE MAIL.... RECEIVED THE FINAL REPORT, IN THE MAIL, FROM GES, WITH ADDITIONAL ANALYTICAL DATA...GES IS REQUESTING AN 'INACTIVE' STATIS FOR THIS SITE...A FEW SOIL SAMPLES ARE STILL SLIGHTLY HIGHER THAN OUR 'TAGM' GUIDANCE VALUES, SO I WILL REVIEW THIS WITH SAC.7/3/2007: RICHARD BENDER, OWNER OF PROPERTY, TELECON RJJ, HE ASKED ABOUT THE STATIS OF THIS SITE...I TOLD HIM THAT WE ARE REVIEWING THE FINAL REPORT AND I WILL NOTIFY HIM OF OUR DECISION.7/12/2007: AFTER REVIEWING THE SPILL FILE, SAC SAID THAT WE CAN NOW MAKE THIS SITE 'INACTIVE'...DRAFTED AND SENT AN 'INACTIVE' LETTER TO EXXON MOBILE...NO FURTHER ACTION NEEDED...SPILL CLOSED OUT.11/8/2007: RECEIVED A LETTER FROM GES EXPLAINING THAT THEY ABONDONED ON-SITE MONITORING WELLS TW-1,2,3,MW-2,3,&4 IN ACCORDANCE WITH THE NYSDEC MONITORING WELL DECOMMISSIONING POLICY...I WILL INCLUDE THIS LETTER IN THE SPILL FILE.

Remarks:

DURING DISPENSER UPGRADE HISTORIC CONTAMINATION HAS BEEN DISCOVERED. AREA TO BE EXCAVATED AND RETESTED.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

PROPERTY. THEY ARE PLANNING TO HAVE A RESOLUTION PASSED BY TOWN BOARD REQUESTING ERIE COUNTY PURSUE A TIO FOR THE SITE SO THE COUNTY CAN GAIN SITE ACCESS AUTHORITY AND GRANT DEC ACCESS TO CONDUCT A LIMITED PHASE II WHERE THE SUSPECTED TANKS ARE. REVEIW OF TOWN RECORDS SHOWS TWO 2,000 GAL USTS WERE REPLACED BY ATLANTIC IN 1960 ON THE EAST SIDE OF THE BUILDING, BUT THEY HAVE NO RECORDS THE WERE EVER REMOVED. ERIC WILL CONTACT KEN SWANEKAMP AT ECDEP TO DISCUSS BEST WAY TO PROCEED.

BACK TAXES ON THE PROPERTY EXCEED \$75K.

Remarks: TOWN OF AMHERST IS INVESTIGATING THE ABANDONMENT OF THE FORMER SUNSET

DRYCLEANERS FACILITY AT 1815 EGGERT ROAD. THE FACILITY IS LOCATED IN A RESIDENTIAL AREA AND THE TOWN WAS CONCERNED WITH THE RELEASE OF CHLORINATED VOCs DURING PAST OPERATIONS. DURING DISCOVERY TOWN RECORDS SHOWED THE FACILITY WAS ALSO A FORMER GAS STATION WITH 2 4000 GAL. TANKS INSTALLED IN 1960. THERE ARE NO RECORDS THE TANKS WERE

EVER REMOVED AND NO PBS RECORDS EXIST FOR THE SITE.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Elevation: 599 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 42078-H7 BUFFALO NE, NY

Most Recent Revision: 1965

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

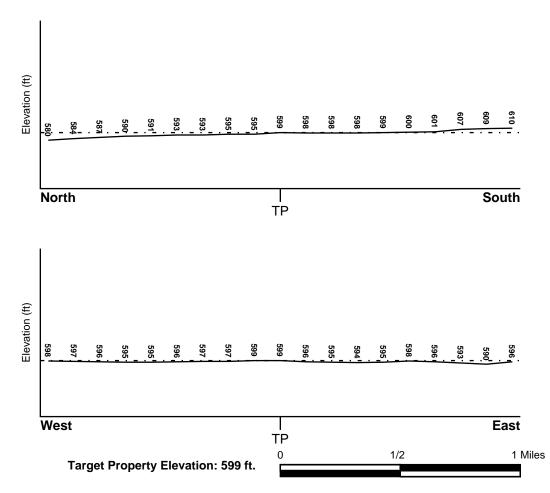

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

FEMA Flood Electronic Data

NWI Quad at Target Property

Data Coverage

BUFFALO NE

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 MAP ID
 FROM TP
 GROUNDWATER FLOW

 Not Reported
 GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

August 13, 2013

Thomas Bohlen GZA GeoEnvironmental of New York 535 Washington Street, 11th Floor Buffalo, NY 14203

Dear Mr. Bohlen:

This letter acknowledges receipt of your request dated 8/8/2013 for access to records relative to:

R9-13-204 Northtown Plaza 3027-3169 Sheridan Dr., 4514-4548 Bailey Ave., & 1979 - 2129 Eggert Rd., Amherst

Your request has been forwarded to the appropriate individual programs within DEC.

To assist you in obtaining information, many records can be immediately accessed through the Department's website www.dec.ny.gov. The following links provide information commonly requested of the Department:

- DEC Permit Application Data <u>www.dec.ny.gov/cfmx/extapps/envapps</u>
- Spills, Tanks and Remedial Site Database Search www.dec.ny.gov/chemical/8437.html
- Mapping Gateway <u>www.dec.ny.gov/pubs/212.html</u>
- Hazardous Waste Facility information & EPA ID numbers www.epa.gov/enviro/facts/rcrainfo/search.html
- Hazardous Waste Facility Inspection & Enforcement records <u>www.epa-echo.gov/echo/compliance</u> report rcra.html
- Toxic Release Inventory www.epa.gov/tri/tridata/

If your record request is for undeveloped property, the Department recommends using the Environmental Resource Mapper www.dec.ny.gov/animals/38801.html to determine the location of both freshwater wetlands regulated by the State of New York and New York State's classified streams and water bodies. If your request did not specify records on wetlands or other environmental resources, the Department search may not include information on environmental resources that are state protected.

Following the necessary file search, you will be contacted as to whether such records are in our custody. If all records are not provided because the records are excepted from disclosure, you will be notified of the reasons and of your right to appeal the determination.

Due to the large volume of requests we receive, you may expect a reply by 9/10/2013.

Sincerely

Peter Grasso

Regional Enforcement Coordinator

Re: 13-08-221

Dear Mr. Bohlen:

This will acknowledge receipt of your request for records under the Freedom of Information Law, received by this office on August 13, 2013.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

A determination as to whether your request is granted or denied will be reached in approximately 20 days or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble, and review documents that may be responsive to your request.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Elizabeth A. Sullivan, Esq.

APPENDIX E USER QUESTIONNAIRE

Site Name: Northtown Plaza, Amherst, New York Title and Signature of Person Completing Questionnaire (Print Name & Title) of Development for (Signature)

(Print Name & Title) of Development for (Signature)

(Proper Moneyes) Date: * On behalf of Northtown Associates LLC and its affiliates and not individually If the environmental professional, upon receipt of this questionnaire, believes any additional information is necessary in order to form a professional opinion, please contact me. The following are a series of questions from ASTM 1527-05 that must be answered in order to qualify for Landowner Liability Protection under CERCLA. Please provide an answer to each question or attach pertinent information and identify a number for each attachment. (1) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? No Yes (Describe or attach information) Attachment No. To the best of my knowledge, none beyond any that have been identified by the environmental professional. (2) Are you aware of any Activity and Use Limitations (AULs), such as engineering controls (e.g. engineered caps, foundations, liners, treatment methods, etc. in use to prevent contamination from migrating to surrounding areas), land use restrictions or institutional controls (e.g. administrative measures restricting groundwater use. construction, or property use) that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? No Yes (Describe or attach information) Attachment No.

environmental professional. (3) Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes (Describe or attach information) No Attachment No. To the best of my knowledge and in my capacity as user, it is my opinion that information obtained during the inquiry as to specialized knowledge, as required by 40 CFR 312.28, which is not otherwise known by the environmental professional, would not impact an environmental professional's opinion as to conditions indicative of releases and threatened releases of hazardous substances or petroleum products on. at, in, or to the property. The inquiry has been conducted but the results have not been provided to the environmental professional as provided for in 40 CFR 312.22 and ASTM 1527-05. (4) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? No Yes (Describe or attach information) Attachment No. To the best of my knowledge and in my capacity as user, it is my opinion that information obtained during the inquiry as to purchase price of the property, as required by 40 CFR 312.29, would not impact an environmental professional's opinion as to conditions indicative of releases and threatened releases of hazardous substances or petroleum products on, at, in, or to the property. The inquiry has been conducted but the results have not been provided to the environmental professional as provided for in 40 CFR 312.22 and ASTM 1527-05. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? No Yes (Describe or attach information) Attachment No. See previous statement. (5) Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User, (a) Do you know the past uses of the property?

To the best of my knowledge, none beyond any that have been identified by the

No Yes (Describe or attach information) Attachment No.
To the best of my knowledge and in my capacity as user, I have no material knowledge of any commonly known or reasonably ascertainable information that is not already possessed by the environmental professional.
(b) Do you know of specific chemicals that are present or once were present at the
property?
To the best of my knowledge and in my capacity as user, I have no material knowledge of any commonly known or reasonably ascertainable information that is not already possessed by the environmental professional.
(c) Do you know of spills or other chemical releases that have taken place at the
property? No Yes (Describe or attach information) Attachment No.
To the best of my knowledge and in my capacity as user, I have no material knowledge of any commonly known or reasonably ascertainable information that is not already possessed by the environmental professional.

APPENDIX F QUALIFICATIONS

Thomas Bohlen

Project Geologist

Education

B.A., 2009, Geology, State University of New York College at Buffalo

B.S., 2009, Earth Science Education, State University of New York College at Buffalo

Areas of Specialization

- Environmental Site Assessments
- Geotechnical Investigations
- Hydrologic Investigations
- CQA Monitoring and Testing
- Soil and Rock Classification

Experience:

Years with GZA: 6.0 Years with other firms: 3.0

Training

- Certified Operation of a Surface Moisture/Density Gauge (Troxler training)
- USDOT/IATA training on shipping and/or transportation of Hazardous materials
- OSHA 40 hour HAZWOPER training

Summary of Experience

Mr. Bohlen has been involved in a variety of environmental projects as a Project Geologist. Mr. Bohlen's range of responsibilities has included Phase I environmental site assessments; Phase II environmental site assessments; remedial investigations; geotechnical laboratory testing; geotechnical investigations; soil vapor testing; air sampling and soil and groundwater sampling. He has conducted numerous Environmental Site Assessment (Phase I and Phase II) reports and remedial investigation reports on residential, commercial and industrial properties. Recent relevant work experience includes the following.

Relevant Project Experience

Phase I and Phase II Environmental Site Assessments. Have performed numerous Phase I and Phase II ESA's throughout the Buffalo area and New York State. Clients have ranged from investors and commercial banks to current property owners. Responsibilities have included budget preparation, field investigation activities, soil, groundwater, soil vapor and indoor air sampling, geophysical surveys, and report preparation.

Field Technician, Allied Waste Sanitary Landfill, Division of Republic Services, Niagara Falls, New York

Provided construction monitoring and quality assurance testing for cell construction. Administered the quality assurance/quality control (QA/QC) plan for the construction monitoring of the composite liner, including compaction testing of the clay barrier and collecting undisturbed tube samples for permeability testing.

Asphalt Emulsion Production/Terminal Storage Facility, Tonawanda, New York – Conducted a site inspection and review and update of an existing Spill Prevention, Control and Countermeasure (SPCC) Plan at an asphalt emulsion production/terminal storage facility regulated under a NYSDEC – MOSF permit.

Indian Point Energy Center, Buchannan, New York – Performed field testing to better define a tritium contamination plume at a nuclear powered electric generating station. Field activities included monitoring well installations, transducer installations, well development, and sustained yield testing.

Brownfield Cleanup Program Work-Industrial Facility, Lockport, New York– Provided oversight, performed soil screening and testing, geotechnicial oversight and development of the installation of bedrock monitoring wells, in additional to low-flow groundwater sampling of previously installed wells located on-site associated with regulated monitoring program.

Confidential Client, Industrial Facility, Lockport, New York - A trichloroethylene (TCE) and tetrachloroethene (PCE) plume is migrating in bedrock groundwater from a former AST spill. Performed groundwater sampling and monitored groundwater contaminant conditions to assess natural attenuation parameters. Conducted field work outlined in our Remedial Investigation and Feasibility Study (RI/FS) reports, approved by NYSDEC. The Record of Decision (ROD) has been issued and the remedial alternative selected based on the FS is Monitored Natural Attenuation (MNA).

Contract to Closure, Remedial Activities, Commercial Facility, Rochester, **New York** – Former gasoline stations were located at two adjoining properties from the early 1950s through 1990s. Soil and groundwater contamination was identified at both properties. The site owner signed a Stipulation Agreement with NYSDEC to remediate the Site, but had taken no action to remediate. Our client wanted to develop the Site for commercial use as a credit union/banking GZA performed soil and groundwater sampling investigations, demolished Site buildings, prepared a NYSDEC approved work plan to remediate the soil and groundwater, removed soil impacted with free product, and performed in-situ chemical oxidation injections to remediate Site groundwater in order to achieve NYSDEC inactive status. GZA prepared the Closure Report to summarize Site activities, which is currently being reviewed by NYSDEC. In order to obtain an inactive status, GZA completed a Qualitative Risk Assessment at the Site, which determined there would be no risk to future construction workers or commercial employees.

Laboratory Technician, Various Projects and Locations – Conducted geotechnical laboratory testing, along with classifying soil samples; performing index tests (natural moisture content, Atterberg limits, grain size analysis); moisture-density tests; and constant head and falling head permeability test procedures.

RESUME

Christopher Boron Senior Project Manager

Education

B.S., 1995, Geology, State University of New York College at Fredonia

Areas of Specialization

- Remedial Investigation/ Feasibility Studies
- Environmental Site Assessment
- Hydrologic Investigations
- Field Work
- Mulit-media Sampling
- Landfill CQA/CQC

Summary of Experience

Mr. Boron's professional experience includes both environmental and geotechnical engineering projects. He has performed remedial investigations, feasibility studies, remediation of soil and groundwater, Phase I and II environmental site assessments, hydrologic assessments, along with solid waste facility construction management and construction quality assurance monitoring and testing. He is proficient in using the field gas chromatograph (GC) and has completed groundwater, soil, and soil gas surveys with the instrument. He is responsible for project management, client contact, proposal and budget preparation, management of field teams including GZA and subcontract personnel, project scheduling, and report preparation. Relevant project experience follows.

Relevant Project Experience

Confidential Client, Lockport, New York. A trichloroethylene (TCE) and tetrachloroethene (PCE) plume is migrating in bedrock groundwater from a former AST spill. Performed groundwater sampling and monitored groundwater contaminant conditions to assess natural attenuation parameters. Prepared Remedial Investigation and Feasibility Study (RI/FS) reports. The RI/FS Reports have been approved by NYSDEC. The Record of Decision (ROD) has been issued and the remedial alternative selected based on the FS is Monitored Natural Attenuation (MNA). Assessment of soil vapor intrusion of an on-site building is currently underway prior to implementing the ROD, which will begin in early 2006.

Contract to Closure, Remedial Activities, Commercial Facility, Rochester, New York – Soil and groundwater at two adjacent properties have been contaminated with petroleum from former gasoline stations which occupied the properties as far back as the early 1950's. The site owner signed a Stipulation Agreement with NYSDEC to remediate the Site, but had taken no action to remediate. Our client wants to develop the Site for commercial use as a credit union. GZA performed soil and groundwater sampling investigations, demolished Site buildings, prepared a NYSDEC approved work plan to remediate the soil and groundwater, removed soil impacted with free product, performed in-situ chemical oxidation injections to remediate Site groundwater to achieve NYSDEC inactive status. GZA prepared the Closure Report which summarizes Site activities, which is currently being reviewed by NYSDEC. Responsibilities included Site investigations, soil and groundwater sampling, work plan and budget preparation, remedial design and implementation, chemical injections, confirmatory sampling and closure report preparation.

Voluntary Cleanup - Commercial Facility, Hamburg, New York. Conducted a Phase II environmental site assessment at retail facility, which was occupied by a dry cleaner in one unit from mid 1950s to late 1990s. Identified tetrachloroethene (PCE) in various soil samples located beneath the building floor slab and in an alleyway behind the building. Concentrations of soil and groundwater behind the building were above NYSDEC regulatory standards. Completed an additional investigation to identify potential sources and extent of contamination. A source area was identified outside the building in the soil in the alleyway. Collected shallow and deep water samples, which identified shallow groundwater contamination, but confirmed clay confining layer. An Interim Remedial Measures (IRM) was completed which included soil removal and disposal and installation of sub-slab vapor mitigation system to prevent contaminated vapor intrusion into the building. Work included site reconnaissance, historical review, soil probes (exterior and interior), soil gas survey with gas chromatograph, interior ambient and sub-slab air sampling, monitoring well installation oversight, soil and groundwater

RESUME

Christopher Boron Senior Project Manager

Experience:

Years with GZA: 12 Years with other firms: 0

Professional Affiliations

Buffalo Association of Professional Geologists, Director

Air and Waste Management Association of Western New York sampling, IRM oversight and closure report preparation. NYSDEC is currently reviewing report and Site closure status is pending.

Confidential Client, Webster, New York – Groundwater at an active gasoline station has been contaminated with gasoline. The client has signed a Stipulation Agreement with NYSDEC to remediate the Site. A remedial investigation with a NYSDEC approved work plan to delineate the extent of the groundwater plume has been completed. Preparation of the Remedial Action Plan is currently underway. Responsibilities included client and NYSDEC contact, work plan and budget preparation, project staffing, and report preparation.

NYSDEC Superfund Standby Contract, New York State. Remedial Investigation/Feasibility Study (RI/FS) projects include management of field activities, assessment of soil and groundwater contamination both on and off-Site and report preparation for both RI and FS reports.

- Remedial Investigation, Grove Cleaners, Hewlett, New York. Groundwater at a former dry cleaners site contains chlorinated organic contamination. Performed a comprehensive field gas chromatograph field screening of subsurface soils and groundwater samples to delineate the source of contamination during the on-site characterization studies and groundwater samples during off-Site characterization. Conducted monitoring well assessment, development, groundwater sampling and was involved with hydrogeologic and analytical data interpretation and RI report preparation. The work was completed in accordance with regulatory-approved site- specific work plans.
- Preliminary Site Assessments, New York, NYSDEC. Performed PSAs at two sites near New York City. Work included subsurface investigation including soil and groundwater sampling, groundwater screening with a portable gas chromatograph, hydrogeologic evaluation, geochemical evaluation and preparation of hazardous ranking score (HRS). Analyzed potential risk associated with the sites, to evaluate whether the sites belong on the inactive hazardous waste registry; and wrote portions of the report.
- Preliminary Site Assessment, Crusher Road Site, Bedford, New York. The site groundwater is contaminated with PCE from an unknown source. Field studies identified the source of the PCE was due to unauthorized disposal at a former town dump, currently utilized as the town highway department, which impacted the subsurface soils and groundwater at the Site. Completed soil borings and groundwater sample collection, development of existing monitoring wells, and soil/groundwater analytical sampling to delineate the extent and origin of the contamination plume. Performed field screening with a portable gas chromatograph of subsurface soil and groundwater samples to delineate source of contamination during the on and off-site characterization studies.

Phase II Environmental Site Assessments. Have performed numerous Phase II ESA's throughout the Buffalo area and New York State. Clients have ranged from investors and commercial banks to current property owners. Responsibilities have included, project management, budget preparation, field investigation activities, soil, groundwater, soil vapor and indoor air sampling, geophysical surveys, and report preparation.
