1.0 INTRODUCTION

1.1 Project Background

This project summary incorporates observations and the results of monitoring and sample analysis ("oversight") conducted during interior excavations and other miscellaneous mitigation and waste management activities at the MOD-PAC CORP. (MOD-PAC) facility located in the City of Buffalo, New York (Site), as shown on Figure 1 (Attachment 1). These various on-Site activities have been performed under the New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP). This oversight has been performed to document site conditions related to determining whether sub-slab soil/fill contamination was encountered during interior construction activities. Regarding the miscellaneous mitigation and waste disposal activities completed, this report provides documentation. This summary report documents field work activities, results of confirmatory analytical sampling results, and contains associated figures and tables.

2.0 OVERSIGHT MEASURES

This summary is based on the review of observations and of data collected during interior construction activities from August 2017 through September 2019. Analytical results are summarized on attached Table 1 (Attachment 2). Field notes (Attachment 3), select photographs (Attachment 4), laboratory analytical reports (Attachment 5) and ACM removal documentation are presented in Attachments 3-6.

2.1 Excavation Oversight Tasks

The Site has a historical industrial use past for over the past 100 years. Due to its historical usage, impacted fill materials have been encountered during the investigative phases of this BCP Project throughout the Site, including under portions of the various buildings located on-Site. As a result, the likelihood exists that in areas of the buildings where equipment footers and other mitigative activities have been conducted that subfloor impacted soil/fill materials would be encountered.

During the performance of each subfloor excavation event, an HEI environmental professional was on-site during the later stages of excavation to screen any removed soil/fill for visual and/or olfactory observations and for total volatile compounds using a calibrated organic vapor meter (OVM) equipped with a photoionization detector (PID). If impacted soil/fill was determined to have been encountered during interior excavation activities that soil/fill material was further evaluated through sampling/analysis to determine if it required separate handling and disposal.

For each interior excavation, the construction crews made efforts to suppress airborne dust and particulate matter during the cutting and breaking of the concrete floors, and excavation of the trenches and pits. Construction crews employed wet cutting techniques and the tarping of work areas which proved to be effective for the controlling the generation and migration of dust during construction activities.

2.2 January 2018 - Press-Trench Excavation

MOD-PAC completed a production equipment upgrade which included a new printing press installation within the main press area of the building. As part of this press installation, a new foundation was required to provide adequate support necessary for the new and larger equipment. Initially, the concrete floor and footer was removed, and analytical testing was completed to verify that the concrete could be recycled off-site at Swift River facility. The foundation trench subsequently excavated was approximately 46 feet long by 5 to 10 feet wide upon completion. Appropriate screening of the excavated soil/fill and the soil/fill sidewalls of the remaining footer trench were screened as described above.

The soil/fill underlying the concrete was generally observed to be dark brown to black foundry sand with varying amounts of cinders and trace amounts of slag. Three grab samples were retrieved from the bottom of the trench and screened in the field with the OVM. Reading from the OVM ranged from non-detect to 15,000 ppm at PT-02. A strong solvent-type odor was noted in the sample from PT-02. Two additional samples were collected approximately 9 to 10 feet from PT-02 to delineate the solvent odors. Additionally, OVM readings ranged from 6,000 ppm to 15,000 ppm within the soil from the trench, as well as from sidewall confirmation samples. The soil required for excavation associated with the press-trench foundation was removed and transported to the southern portion of the Site for future landfill disposal along with soil/fill generated from the southern Site remedial area. The soil from the press-trench foundation was separately staged on plastic and covered.

Analytical confirmatory samples were collected on January 8, 2018 from the sidewalls and bottom of the trench, identified as PT01, PT02, PT03 and PT06, and analyzed for VOCs, SVOCs, metals and PCBs. Analytical results did not indicate the presence of compounds exceeding RRUSCO; however, analytical results identified matrix interference during analysis. The excavation was limited due to required soil removal associated with press installation. The excavation was backfilled with concrete appropriate to meet foundation requirements.

On May 20, 2019 the press trench was extended approximately 15 feet to the south to accommodate a change in the proposed equipment to be installed. HEI was present on-site to screen soils at the bottom and sides of the excavation. The soil/fill underlying the concrete floor was generally a dark brown to black foundry sand with varying amounts of cinders and trace amounts of slag. All OVM readings taken at that time were non-detect. No further sampling or investigation was recommended at that time.

2.3 October 2018 – Sheeter Pit

MOD-PAC continued equipment upgrading included a new sheeter in the main sheeter area to the south of the courtyard within the Building. As part of the sheeter installation, a new foundation was required to provide adequate support necessary for the new equipment. Two foundation pits were installed; Sheeter Pit #1 was approximately 24 feet by 14 feet. Sheeter Pit # 2 was approximately 14 feet by 5 feet.

Both excavations were approximately 18 inches in depth beneath the concrete floor. All concrete within the pit areas was removed and staged on the southern exterior of the Site for evaluation for off-site management.

The soil/fill underlying the concrete was observed to be generally dark brown to black foundry sand with varying amounts of cinders. Six samples from Sheeter Pit #1 and four samples from Sheeter Pit #2 were collected for screening and laboratory analysis. In addition, the sidewalls of the pits were screened in the field with an OVM. All screening readings on the OVM were non-detect. None of the samples analyzed had parameters of concern detected. The soil required for excavation associated with the sheeter pit foundation was removed and transported to the southern portion of the Site for future landfill disposal associated with southern Site remedial area. The soil from the sheeter pit foundation was separately staged on plastic and covered. No further sampling or investigation was recommended at that time. The excavation was backfilled with subbase gravel and concrete appropriate to meet foundation requirements was poured.

2.4 February - March 2019 – Die Cutter Pit

MOD-PAC continued equipment upgrading included a new die cutter in the second die cutting area in the northern portion of the Building As part of the sheeter installation. A new foundation was required to provide adequate support necessary for the new equipment. One foundation pit was installed (Die Cutter Pit) which was approximately 14 feet by 10 feet by 18" deep beneath the concrete floor. All concrete within the pit limits was removed and staged on the southern exterior of the Site for evaluation for off-site management.

The soil/fill underlying the concrete was generally dark brown to black foundry sand with varying amounts of cinders. One bottom sample was collected (the excavation was not complete at the time of the site visit) and screened in the field with an OVM. All readings from the OVM were non-detect. The soil required for excavation associated with the Die Cutter Pit foundation was removed and transported to the southern portion of the Site for future landfill disposal associated with southern Site remedial area. The soil from the Die Cutter Pit foundation was separately staged on plastic and covered.

HEI returned to the Site when the excavation was completed to obtain sidewall samples. A west well sample could not be collected due to the presence of a concrete pier. The pier was subsequently removed and backfilled with clean crushed stone. Analytical confirmatory samples were collected from the sidewalls and bottom of the pit, identified as DC-EX-BOTTOM, DC-EX-NW, DC-EX-EW, DC-EX-SW, and DC-EX-SW Duplicate. Samples were analyzed for VOCs, SVOCs, metals and PCBs. Analytical results indicated the presence of several SVOCs over IUSCOs within the bottom sample (DC-EX-BOTTOM) and included benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, and dibenzo(a,h)anthracene. Benzo(k)fluoranthene and chrysene exceeded RRUSCOs. Indeno(1,2,3-cd)pyrene exceeded CUSCOs. Samples within this pit also exhibited the presence arsenic, lead, and acetone not exceeding

RRUSCOs. However, these concentrations detected are all below the applicable Site Specific Action Limits (SSALs) developed for this BCP Project. The excavation was limited due to required soil removal associated with die cutter installation. No further sampling or investigation was recommended at that time. The excavation was backfilled with subbase gravel and concrete appropriate to meet foundation requirements and to achieve a cover in excess of two feet in depth.

2.5 March 2019 – Aerator Jogger Pit

MOD-PAC continued equipment upgrading included a new aerator jogger in the south central portion of the Building. As part of the aerator jogger installation, a new foundation was required to provide adequate support necessary for the new equipment. One foundation pit was installed (Aerator Jogger Pit) which was approximately 12 feet by 12 feet by 32 inches deep beneath the concrete floor. The concrete floor within the limits of the pit was removed and staged on the southern exterior of the Site for evaluation for off-site management.

The soil/fill underlying the concrete was generally dark brown to black foundry sand with varying amounts of cinders. One bottom sample was collected (the excavation was not complete at the time of the site visit) and screened in the field with an OVM. All readings from the OVM were non-detect. The soil required for excavation associated with the pit foundation was removed and transported to the southern portion of the Site for future landfill disposal associated with southern Site remedial area. The soil from the Aerator Jogger Pit foundation was separately staged on plastic and covered.

Analytical confirmatory samples were collected from the sidewalls and bottom of the pit, identified as AJ-EX-BOTTOM, AJ-EX-NW, AJ-EX-SW, AJ-EX-EW, AJ-EX-WW, and analyzed for VOCs, SVOCs, metals and PCBs. Analytical results indicated the presence of compounds exceeding various soil cleanup objectives. All five of the submitted sample locations exceeded IUSCOs for benzo(a)pyrene, benzo(a)anthracene, arsenic, and/or bibenzo(a,h)anthracene. Four locations exceeded CUSCOs for benzo(a)anthracene, benzo(b)fluoranthene, dibenzo(a,h)anthracene, indeno(1,2,3-cd)pyrene, and barium. Benzo(a)anthracene, benzo(b)fluoranthene, chrysene, indeno(1,2,3-cd)pyrene were identified in five samples and exceeded RRUSCOs. Acetone, trichloroethene, benzo(k)fluoranthene, chrysene, copper, lead, and zinc were also detected but did not exceed RRUSCOs. However, these concentrations detected are all below the applicable Site Specific Action Limits (SSALs) developed for this BCP Project. The excavation was limited due to required soil removal associated with jogger installation. Prior to the analytical results being obtained, the excavation was backfilled with subbase gravel and concrete appropriate to meet foundation requirements to achieve a cover in excess of two feet in depth.

2.6 March 2019 – Sheeter Pit #3

MOD-PAC continued equipment upgrading included another new sheeter in the main sheeter area to the south of the courtyard within the Building. As part of the sheeter installation, a new foundation was required to provide adequate support

necessary for the new equipment. A foundation pit was installed measuring approximately 10 feet by 10 feet by 18 inches deep beneath the concrete floor. The concrete floor was removed and staged on the southern exterior of the Site for evaluation for off-site management.

Analytical confirmatory samples were collected from the sidewalls and bottom of the pit, identified as Sheeter Pit #3-NW, Sheeter Pit #3-SW, Sheeter Pit #3-EW, Sheeter Pit #3-WW, and Sheeter Pit #3-Bottom, and were analyzed for VOCs, SVOCs, metals and PCBs. Analytical results indicated the presence of benzo(b)fluoranthene exceeding RRUSCO. Acetone and zinc were also detected in the pit samples but did not exceed RRUSCOs. However, these concentrations detected are all below the applicable Site Specific Action Limits (SSALs) developed for this BCP Project. The excavation was limited due to required soil removal associated with sheeter installation. The excavation was backfilled with subbase gravel and concrete appropriate to meet foundation requirements. The soil required for excavation associated with the sheeter pit foundation was removed and transported to the southern portion of the Site for future landfill disposal associated with southern Site remedial area. The soil from the sheeter pit foundation was separately staged on plastic and covered.

2.7 August 2019 – Sheeter Trenches (Sheeter #8)

MOD-PAC continued equipment upgrading included another new sheeter in the main sheeter area to the south of the courtyard within the Building. As part of the sheeter installation, a new foundation was required to provide adequate support necessary for the new equipment. Two foundation trenches were installed measuring approximately 18 inches by 24 feet by 12 inches deep beneath the concrete floor. The concrete was removed and staged on the southern exterior of the Site for evaluation for off-site management.

Dark brown fine to medium sand was removed from each trench. One bottom sample and two sidewall samples were collected from each trench and screened in the field with an OVM. All readings from the OVM were non-detect. HEI did not submit samples for analysis due to the proximity and similar soil characteristics at Sheeter Pit #3. The soil required for excavation associated with these sheeter trenches was removed and transported to the southern portion of the Site for future landfill disposal associated with southern Site remedial area. The soil from these sheeter trenches was separately staged on plastic and covered.

2.8 Asbestos Abatement

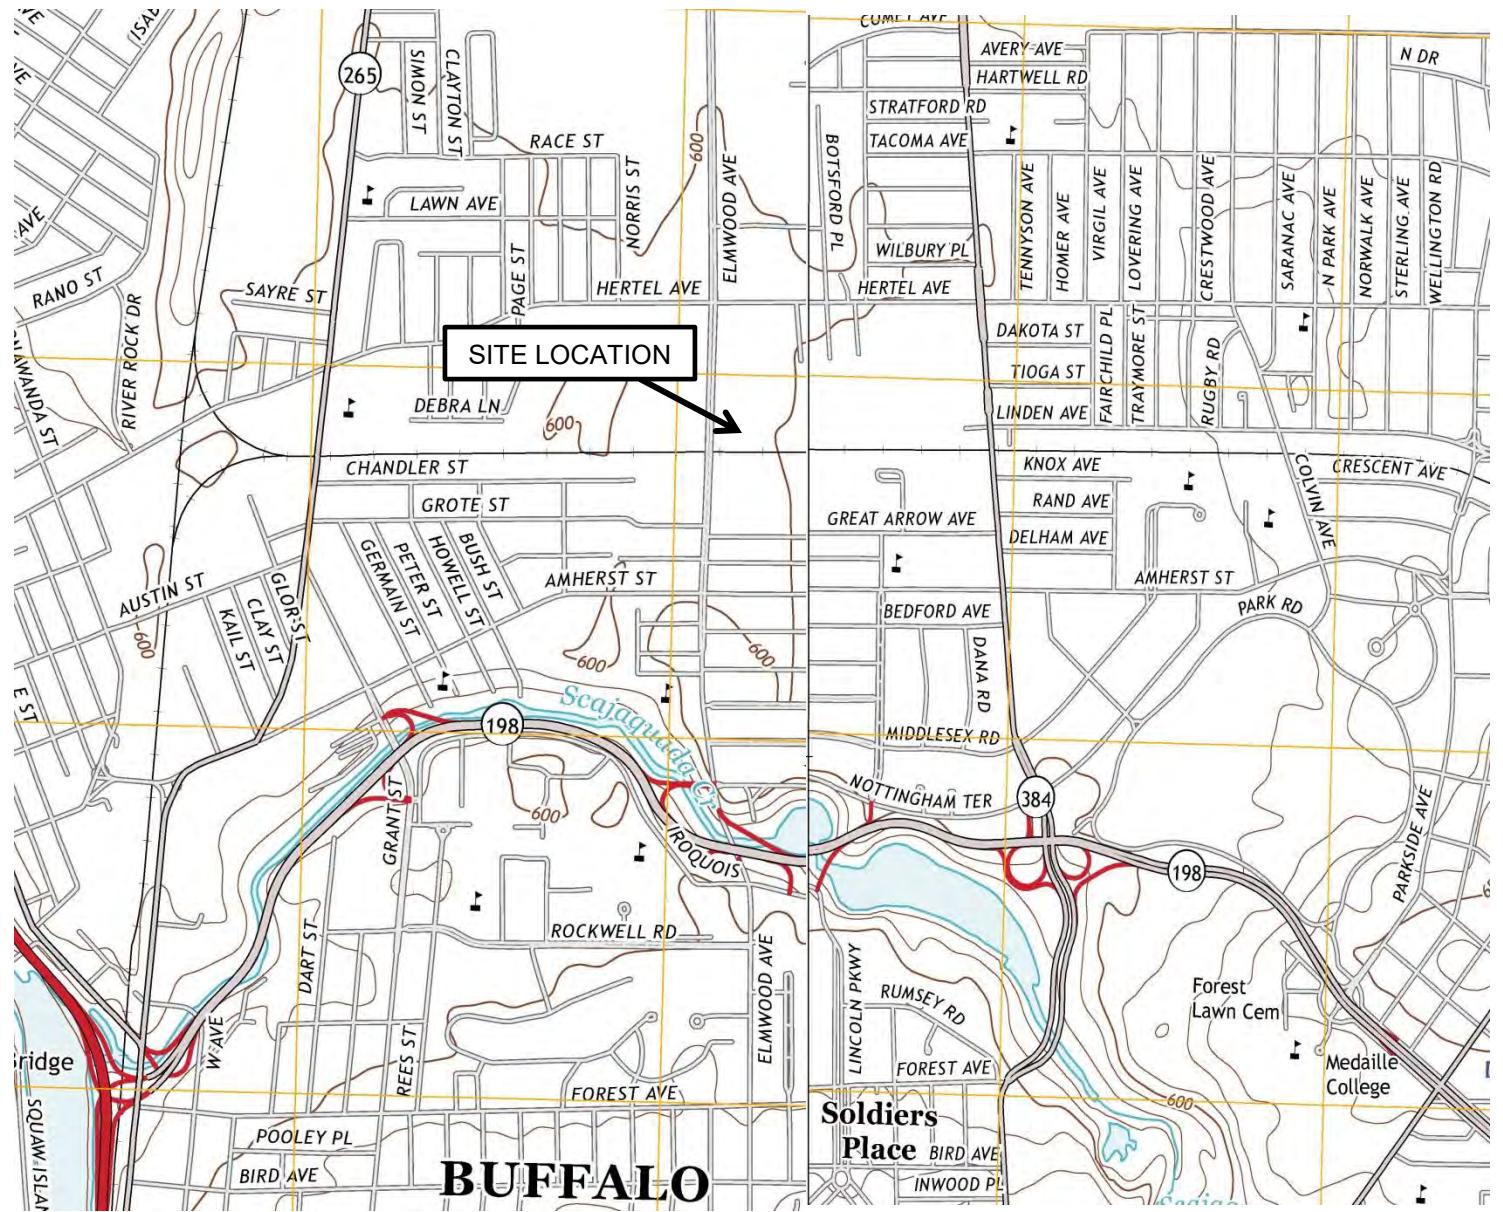

In addition to excavation activities, as part of general maintenance requirements, various areas of asbestos abatement were required to be completed, as described below:

- August 2017
 - Roofing repairs included removal and disposal of asbestos containing transite siding from an area above the paper stock room. Appropriate air monitoring was completed during this project.

- Removal and disposal of asbestos containing pipe lagging located in Area #108 of the site building. Appropriate air monitoring was completed during the project.
- November 2017
 - Removal and disposal of asbestos pipe insulation from the press room #12, 16 to 18 feet above floor level from column B2 to B7.
 - Removal and disposal of asbestos pipe insulation from the press room #12, 16 to 20 feet above floor level from column B2 to B3.
- September 2018
 - The removal and disposal of asbestos containing insulation and metal steam pipe from the new sheeter area. The work area was 20 feet above the floor level directly on column line #136 located within the facility.
- May 2019
 - The decontamination of incidental disturbance and the removal and disposal of asbestos containing steam pipe insulation and included metal steam pipe from Bin # A-243 area. The work area was in warehouse #108 20 feet above floor level located at the facility.
 - The removal and disposal of all asbestos containing insulation and metal steam pipe from the former bailer area. The work area was 20 feet above floor level located at the facility.
- July 2019
 - The removal and disposal of asbestos containing insulation and metal pipe from the press room #114. Work area was 18 feet above the floor level directly on column B-6 to B-19 located within the facility.
- August 2019
 - The removal and disposal of all asbestos containing pipe insulation which includes debris on top of concrete and dirt pad from the south west section of parking area located at the site.

No

1. Analytical testing performed by Alpha Analytical. Compounds detected in one or more samples are presented in this table.

Refer to Appendix for the full analytical report.

2. ug/kg = parts per billion; mg/kg = parts per million.

3. ND = not detected; NT = not tested; NV = no value.

4. Analytical results compared to NYSDEC Part 375-6; Remedial Program Soil Cleanup Objectives, T-11-375-6(M) and T-11-375-6(S), dated 17-Nov-2005 (a). Results are in Table 1.

Table 375-(a) Unrestricted Use Soil Cleanup Objective; and Table 375-6.8(b): Restricted Use Soil Cleanup Objectives.

5. * = Concentration of analyte exceeded range of the calibration curve, which required a re-analysis at a higher dilution.

7. E = Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
7. L = Estimated value. The target analyte is below the reporting limit (RL), but above the method detection limit (MDL).

8. R = The PPD between the results for the two columns exceeds the method's limit of detection.

9. Shading indicates: exceeds UUSCO - Unrestricted Use Soil Cleanup Objective

9. Shading indicates exceeds USCSO - Unrestricted Use Soil Cleanup Objective exceeds RRUSCO - Restricted Residential Use Soil Cleanup Obj.

Rite in the Rain

3/6/19 1801 Elmwood Ave Buffalo NY
Weather: 12°F Sunny

- HEI arrived on-site @ 9:30am to observe interior construction activities in 3 locations.
- The 'Dreutter Excavation' was currently being framed up for the foundation pour.
The Contractor said that approximately 20 T of soil was removed from the excavation.
- HEI collected four sidewall samples and one bottom sample within the center of the overall excavation.

Excavation limits

3/6/19 1801 Elmwood Ave Buffalo, NY

Weather: 12° F. Sunny

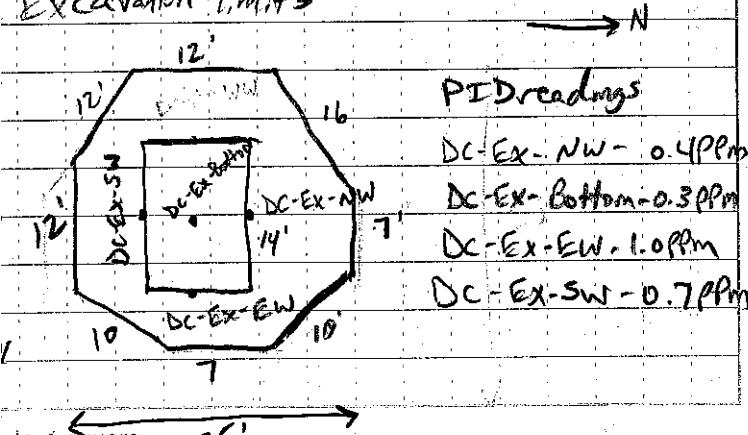

HEI arrived on-site @ 9:30am
to observe interior construction activities
in 3 locations.

The 'Dre cutter Excavation' was
currently being framed up for the foundation
pour.

The contractor said that approximately
20 T of soil was removed from the
excavation.

HEI collected four sidewall samples
and one bottom sample within the center
of the overall excavation.

Excavation limits

The excavation was 18" bg in the center.

- A west wall sample was not obtained due to a pier was located in that area.
- The pier was removed and was backfilled with clean crushed stone.

Excavation is 10' off Southwall and
65' East of Westwall

HEI moved over to the next excavation
area. ('Aerator / Jogger Pit') (AJ-Ex)

- HEI began collecting representative soil
samples at the sidewalls and bottom.

- Contractor was still excavating at time of
arrival ~ 10:50am

Excavation Dimensions

12' W x 12' L x 32" D

(PID Readings)	
AF-Ex-NW	0.7PPM
AF-Ex-Bottom	1.0PPM
AF-Ex-EW	1.2PPM

Scale: 1 square = _____

Note: in the hole

The soils consisted of Dk Brown
foundry sand with Bricks, concrete, and
glass.

HEI left side @ 12pm

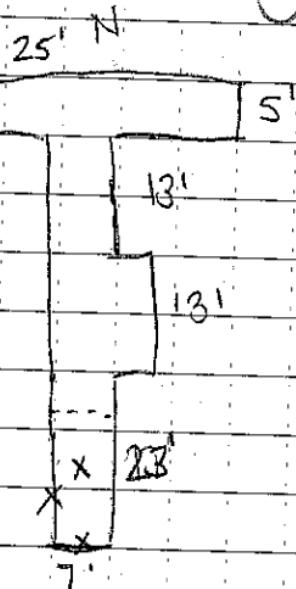

Worksite:

Date:

05/20/19 1801 ELMWOOD AVE; MPC

Arrived on-site @ 1 pm
to sample new press trench
for the installation of a
new press @ MPC.
The excavation was
approximately;

According to Mike Sobczynski
only Southern 15' x 17' section
of trench needed to be
sampled. The rest of the
trench was sampled at an
earlier date during floor
removal.

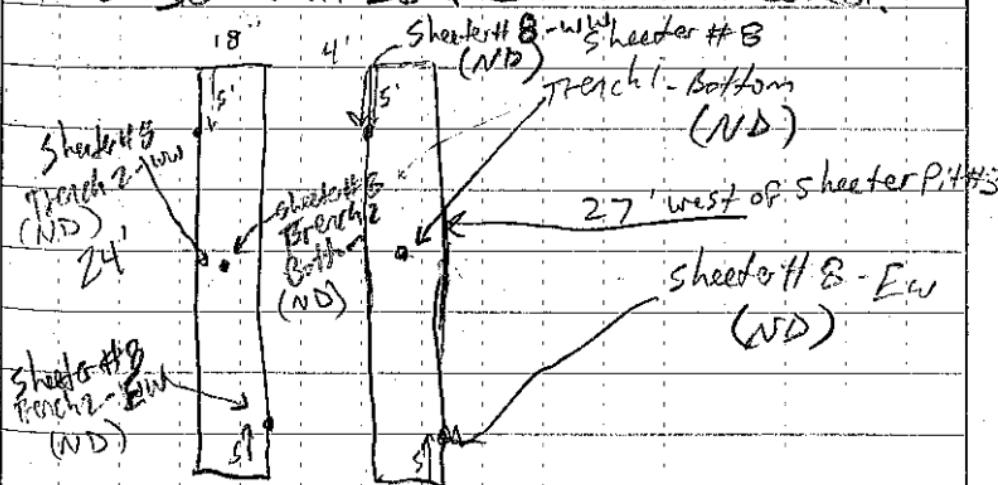

Scale: 1 square = 5

Rite in the Rain

8/13/19 Mod-Pac BC#~~C915314~~

HEI arrived on-site @ 11:30 am to provide oversight in the installation of sheeter #8.

- Work involved Installation of two trenches 18" wide x 24' long x 18" deep.
"sheeter#8 trench 1 & sheeter#8 trench 2
- 6" of concrete was removed then 12" of Dk Brown f/m sand.
- HEI collected representative sidewall and bottom samples and screened for potential VOCs.
- Within each Trench one bottom and two side wall samples were collected.

- All soil samples were screened with the PID and came back as 'ND'.

HEI did not submit the samples for analysis due to the similar conditions observed at sheeter pit #3.

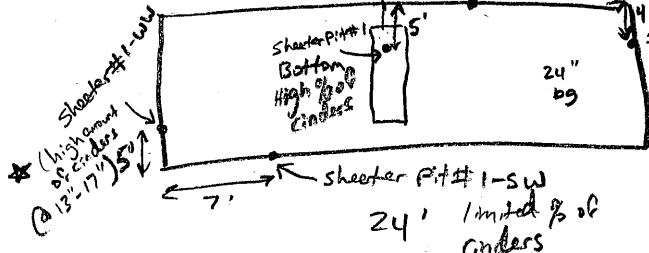

- HEI observed the work progress that has been made on the SDS system in the Area A. Matrix was finishing up hanging overhead piping. All 10 extraction points have been completed.

HEI left the site @ 12:30pm

Lab Number: L1800592
Report Date: 01/15/18

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Number: E1605

Lab Number: L1800592
Report Date: 01/15/18

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

L1800592-01, -02 and -05: The analysis of Volatile Organics by EPA Method 5035/8260 Low Level could not be performed due to the elevated concentrations of non-target compounds in the sample.

L1800592-03: The sample has elevated detection limits due to the dilution required by the elevated concentrations of non-target compounds in the sample.

Semivolatile Organics

L1800592-03: The sample has elevated detection limits due to the dilution required by the sample matrix.

The WG1079914-4/-5 MS/MSD recoveries, performed on L1800592-04, are below the acceptance criteria for 2,4-dinitrophenol (0%/0%) due to the concentration of this compound falling below the reported detection limit.

Total Metals

L1800592-01 through -04: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by matrix interferences encountered during analysis.

The WG1079869-3/-4 MS/MSD recoveries for aluminum (677%/767%), calcium (313%/236%), iron (0%/472%), magnesium (MSD at 71%) and manganese (63%/193%), performed on L1800592-04, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG1079869-3/-4 MS/MSD recoveries, performed on L1800592-04, are outside the acceptance criteria for copper (74%/72%), sodium (128%/126%) and thallium (72%/68%). A post digestion spike was performed and yielded unacceptable recoveries for sodium (151%) and thallium (172%); all other compounds were within acceptance criteria. This has been attributed to sample matrix.

The WG1079869-3/-4 MS/MSD RPD for iron (23%), performed on L1800592-04, is above the acceptance criteria.

The WG1079993-3/-4 MS/MSD recoveries, performed on L1800592-04, are outside the acceptance criteria

for mercury (135%/139%). A post digestion spike was performed and was within acceptance criteria.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related

Report Format: DU Report with 'J' Qualifiers

Project Number: E1605

Lab Number: L1800592
Report Date: 01/15/18

Data Qualifiers

projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedances are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at its own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 624: m/p-xylene, o-xylene

EPA 8260C: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), Methyl methacrylate, 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.

EPA 8270D: NPW: Dimethylnaphthalene, 1,4-Diphenylhydrazine; SCM: Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 300: DW: Bromide

EPA 6860: SCM: Perchlorate

EPA 9010: NPW and SCM: Amenable Cyanide Distillation

SM4500: NPW: Amenable Cyanide, Dissolved Oxygen; SCM: Total Phosphorus, TKN, NO₂, NO₃.

Mansfield Facility

SM 2540D: TSS

EPA 8082A: NPW: PCB: 1, 5, 31, 87, 101, 110, 141, 151, 153, 180, 183, 187.

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

Biological Tissue Matrix: EPA 3050B

Project Name: REMEDIAL INVESTIGATION OCT2018
Project Number: E1605

Lab Number: L1844369
Report Date: 11/06/18

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEX data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: REMEDIAL INVESTIGATION OCT2018
Project Number: E1605

Lab Number: L1844369
Report Date: 11/06/18

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

L1844369-12 was analyzed as a High Level Methanol in order to quantitate the sample within the calibration range. The result should be considered estimated, and is qualified with an E flag, for any compound that exceeded the calibration on the initial Low Level analysis. The results of both analyses are reported.

Semivolatile Organics

L1844369-13: The sample has elevated detection limits due to the dilution required by the sample matrix. The WG1174737-4/-5 MS/MSD recoveries, performed on L1844369-09, are below the acceptance criteria for 2,4-dinitrophenol (0%/0%) due to the concentration of this compound falling below the reported detection limit.

Total Metals

L1844369-03 through -13: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by matrix interferences encountered during analysis.

The WG1175006-3/-4 MS/MSD recoveries for aluminum (0%/6%), calcium (303%/687%), iron (0%/0%) and manganese (MS 0%), performed on L1844369-09, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG1175006-3/-4 MS/MSD recoveries, performed on L1844369-09, are outside the acceptance criteria for arsenic (72%/71%), chromium (66%/64%), copper (MS 66%), lead (0%/0%) and thallium (64%/62%). A post digestion spike was performed and was within acceptance criteria.

The WG1175006-4 MSD recovery, performed on L1844369-09, is outside the acceptance criteria for magnesium (141%). A post digestion spike was performed and yielded an unacceptable recovery for magnesium (71%). The serial dilution recovery was acceptable; therefore, the matrix test passed for the sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

- Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.
- Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.
- Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.
- Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.
- Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Report Format: DU Report with 'J' Qualifiers

Project Name: REMEDIAL INVESTIGATION OCT2018
Project Number: E1605

Lab Number: L1844369
Report Date: 11/06/18

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedances are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at its own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 624/624.1: m/p-xylene, o-xylene

EPA 8260C: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), Methyl methacrylate, 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.

EPA 8270D: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.

EPA 6860: SCM: Perchlorate

SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility

SM 2540D: TSS

EPA 8082A: NPW: PCB: 1, 5, 31, 87,101, 110, 141, 151, 153, 180, 183, 187.

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water

EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; EPA 353.2: Nitrate-N, Nitrite-N; SM4500NO3-F: Nitrate-N, Nitrite-N; SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B

EPA 332: Perchlorate; EPA 524.2: THMs and VOCs; EPA 504.1: EDB, DBCP.

Microbiology: SM9215B; SM9223-P/A, SM9223B-Colilert-QT,SM9222D.

Non-Potable Water

SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2320B, SM4500CL-E, SM4500F-BC, SM4500NH3-BH: Ammonia-N and Kjeldahl-N, EPA 350.1: Ammonia-N, LACHAT 10-107-06-1-B: Ammonia-N, EPA 351.1, SM4500NO3-F, EPA 353.2: Nitrate-N, SM4500P-E, SM4500P-B, E, SM4500SO4-E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, EPA 420.1, SM4500-CN-CE, SM2540D, EPA 300: Chloride, Sulfate, Nitrate.

EPA 624.1: Volatile Halocarbons & Aromatics,

EPA 608.3: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625.1: SVOC (Acid/Base/Neutral Extractables), EPA 600/4-81-045: PCB-Oil.

Microbiology: SM9223B-Colilert-QT; Enterolert-QT, SM9221E, EPA 1600, EPA 1603.

Mansfield Facility:

Drinking Water

EPA 200.7: Al, Ba, Cd, Cr, Cu, Fe, Mn, Ni, Na, Ag, Ca, Zn. EPA 200.8: Al, Sb, As, Ba, Be, Cd, Cr, Cu, Pb, Mn, Ni, Se, Ag, TL, Zn. EPA 245.1 Hg. EPA 522.

Non-Potable Water

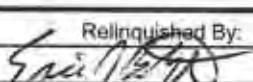

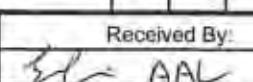

EPA 200.7: Al, Sb, As, Be, Cd, Ca, Cr, Co, Cu, Fe, Pb, Mg, Mn, Mo, Ni, K, Se, Ag, Na, Sr, TL, Ti, V, Zn.

EPA 200.8: Al, Sb, As, Be, Cd, Cr, Cu, Fe, Pb, Mn, Ni, K, Se, Ag, Na, TL, Zn.

EPA 245.1 Hg.

SM2340B

Project Name: PRESS PIT EXCAVATION
Project Number: E1605

Lab Number: L1908144
Report Date: 03/18/19

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt

L1908144-01 and -13 through -17: The Client IDs were specified by the client.

L1908144-01: The water-preserved VOA vials for Volatile Organics Low-Level analysis were received at the laboratory beyond the 48 hour holding time required for freezing. The client was notified and the results of the analysis are reported.

Volatile Organics

L1908144-03: The internal standard (IS) response for 1,4-dichlorobenzene-d4 (31%) and the surrogate recovery for 4-bromofluorobenzene (132%) were outside the acceptance criteria; however, re-analysis achieved similar results: 1,4-dichlorobenzene-d4 (31%) and 4-bromofluorobenzene (133%). The results of both analyses are reported.

L1908144-04: The internal standard (IS) responses for chlorobenzene-d5 (33%) and 1,4-dichlorobenzene-d4 (11%) and surrogate recoveries for 1,2-dichloroethane-d4 (145%), toluene-d8 (165%) and 4-bromofluorobenzene (152%) were outside the acceptance criteria. The second low-level vial was broken and could not be analyzed. A high-level analysis was performed, and those results are also reported.

L1908144-05: The internal standard (IS) responses for chlorobenzene-d5 (34%) and 1,4-dichlorobenzene-d4 (12%) and the surrogate recoveries for 1,2-dichloroethane-d4 (147%), toluene-d8 (153%) and 4-bromofluorobenzene (141%) were outside the acceptance criteria; however, re-analysis achieved similar results: chlorobenzene-d5 (44%), 1,4-dichlorobenzene-d4 (16%), 1,2-dichloroethane-d4 (135%), toluene-d8 (155%) and 4-bromofluorobenzene (151%). The results of both analyses are reported.

L1908144-13: The internal standard (IS) response for 1,4-dichlorobenzene-d4 (24%) and the surrogate recovery for 4-bromofluorobenzene (138%) were outside the acceptance criteria; however, re-analysis achieved similar results: 1,4-dichlorobenzene-d4 (29%) and 4-bromofluorobenzene (141%). The results of

Project Name: PRESS PIT EXCAVATION
Project Number: E1605

Lab Number: L1908144
Report Date: 03/18/19

Case Narrative (continued)

both analyses are reported.

L1908144-15: The internal standard (IS) response for 1,4-dichlorobenzene-d4 (21%) and the surrogate recoveries for 1,2-dichloroethane-d4 (131%) and 4-bromofluorobenzene (145%) were outside the acceptance criteria; however, re-analysis achieved similar results: 1,4-dichlorobenzene-d4 (27%) and 4-bromofluorobenzene (148%). The results of both analyses are reported.

Semivolatile Organics

L1908144-06: The sample has elevated detection limits due to the dilution required by the sample matrix.

L1908144-13 through -17: The sample has elevated detection limits due to the limited sample volume utilized during extraction, as required by the sample matrix.

The WG1213938-4 MS recovery, performed on L1908144-08, is outside the acceptance criteria for benzo(k)fluoranthene (0%). The unacceptable percent recovery is attributed to the elevated concentrations of target compounds present in the native sample.

The WG1213938-4/-5 MS/MSD recoveries, performed on L1908144-08, are below the acceptance criteria for 2,4-dinitrophenol (0%/0%) and 4,6-dinitro-o-cresol (0%/(0%) due to the concentrations of these compounds falling below the reported detection limits.

Total Metals

L1908144-01 through -10 and -13 through -17: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by matrix interferences encountered during analysis.

The WG1213841-3/-4 MS/MSD recoveries for aluminum (341%/0%), calcium (MS 139%), copper (0%/442%), iron (3230%/61300%) and manganese (0%/867%), performed on L1908144-08, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG1213841-3/-4 MS/MSD recoveries, performed on L1908144-08, are outside the acceptance criteria for cadmium (MSD 38%) and sodium (MS 72%). A post digestion spike was performed and yielded unacceptable recoveries for cadmium (78%) and sodium (127%). The serial dilution recoveries were not applicable; therefore, these elements fail the matrix test and the results reported in the native sample should be

Project Name: PRESS PIT EXCAVATION
Project Number: E1605

Lab Number: L1908144
Report Date: 03/18/19

Case Narrative (continued)

considered estimated.

The WG1213841-3/-4 MS/MSD recoveries, performed on L1908144-08, are outside the acceptance criteria for arsenic (MSD 160%), chromium (MSD 218%), nickel (MSD 219%) and thallium (MS 73%). A post digestion spike was performed and was within acceptance criteria.

The WG1213841-3/-4 MS/MSD RPDs for antimony (29%), arsenic (29%), cadmium (75%), chromium (56%), copper (69%), iron (129%), manganese (102%), nickel (67%) and thallium (23%), performed on L1908144-08, are above the acceptance criteria.

The WG1213995-3/-4 MS/MSD recoveries, performed on L1908144-08, are outside the acceptance criteria for mercury (139%/123%). A post digestion spike was performed and was within acceptance criteria.

The WG1214903-3 MS recoveries for aluminum (738%), calcium (446%), iron (3500%) and manganese (484%), performed on L1908144-13, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG1214903-3 MS recovery, performed on L1908144-13, is outside the acceptance criteria for thallium (70%). A post digestion spike was performed and was within acceptance criteria.

The WG1214903-3 MS recovery, performed on L1908144-13, is outside the acceptance criteria for zinc (320%). A post digestion spike was performed and yielded an unacceptable recovery for zinc (79%). The serial dilution recovery was acceptable; therefore, the matrix test passed for the sample matrix.

The WG1214903-4 Laboratory Duplicate RPDs for barium (83%), copper (30%), lead (71%) and zinc (57%), performed on L1908144-13, are outside the acceptance criteria. The elevated RPD has been attributed to the non-homogeneous nature of the native sample.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Project Name: PRESS PIT EXCAVATION

Project Number: E1605

Lab Number: L1908144

Report Date: 03/18/19

SAMPLE RESULTS

Lab ID: L1908144-17
 Client ID: SHEETER PIT#3-EW
 Sample Location: 1801 ELMWOOD AVE., MOD-PAC

Date Collected: 03/11/19 09:10
 Date Received: 03/11/19
 Field Prep: Not Specified

Sample Depth:

Matrix: Soil
 Percent Solids: 96%

Project Name: PRESS PIT EXCAVATION
Project Number: E1605

Lab Number: L1908144
Report Date: 03/18/19

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
	Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the

Report Format: DU Report with 'J' Qualifiers

Project Name: PRESS PIT EXCAVATION
Project Number: E1605

Lab Number: L1908144
Report Date: 03/18/19

original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e., co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedances are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at its own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 624/624.1: m/p-xylene, o-xylene

EPA 8260C: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), Methyl methacrylate, 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.

EPA 8270D: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.

EPA 6860: SCM: Perchlorate

SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility

SM 2540D: TSS

EPA 8082A: NPW: PCB: 1, 5, 31, 87,101, 110, 141, 151, 153, 180, 183, 187.

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water

EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; EPA 353.2: Nitrate-N, Nitrite-N; SM4500NO3-F: Nitrate-N, Nitrite-N; SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B

EPA 332: Perchlorate; EPA 524.2: THMs and VOCs; EPA 504.1: EDB, DBCP.

Microbiology: SM9215B; SM9223-P/A, SM9223B-Colilert-QT,SM9222D.

Non-Potable Water

Buffalo, NY 14203

Re: **Planned Asbestos Removal**
MOD-PAC CORP.
1801 Elmwood Avenue
Buffalo, Erie County, NY
BCP Site No. C915314

Dear Mr. Lopes:

MOD-PAC CORP. (MOD-PAC) has entered into the Brownfield Cleanup Program (BCP) for the above referenced site. MOD-PAC has asbestos removal requirements associated the following two projects, which are required to be completed before Winter 2017.

- Roofing repairs to include removal and disposal of asbestos containing transite siding from an area above the paper stock room. Appropriate air monitoring will be completed during this project. After completed ACM removal, the roofing repairs will be completed.
- Removal and disposal of asbestos containing pipe lagging located in Area #108 of the site building. Appropriate air monitoring will be completed during the project.

A general scope of work and cost estimates are attached. Work is planned to begin in late August 2017. Should you have any questions or need further information, please contact me at 716-667-3130.

Very truly yours,
HAZARD EVALUATIONS, INC.

**Re: Asbestos Abatement GLA 1875 O- 1801 Elmwood Ave. Buffalo, NY -
Area – Transite Siding Removal**

Dear Mr. Steffen,

We propose to furnish all the necessary labor, materials, tools, equipment, insurance, supervision, OSHA personnel air sampling necessary to complete asbestos abatement as outlined in the scope of work and survey supplied by owner. The owner or site representative must hire a third party independent asbestos monitoring firm for project specific variance, project and air monitoring requirements, final visual inspection after abatement is complete and an asbestos survey for minor, small and large asbestos projects. This work shall be completed under large asbestos project protocol and in accordance with all rules and regulations following all Federal, State and Local agencies, and for proper liaison to and interface with such regulatory authorities having jurisdiction, and as to guidelines as set forth by the EPA, OSHA, NIOSH DEC, DOT, and NYS-DOL.

WORK SCOPE:

The removal and disposal of asbestos containing transite siding (approximately 810SF), from Area # (wall above paper stock room) located at Mod Pac Corp. Buffalo, N.Y..

GENERAL CONDITIONS & CLARIFICATIONS:

The following are general conditions and clarifications, which are meant to help identify the owner and contractor responsibilities during the performance of this abatement project.

The owner is responsible to provide all necessary utilities including electric, potable cold water, sanitary drain; all utilities are understood to be located within approximately 100 feet of the work site.

The contractor shall provide and install temporary water and sanitary drain hoses. It is the owner's responsibility to provide standard garden style or standard IPS water fittings with a shut off valve at the source.

All work to be performed at AM and PM hours and to owner's preference.

PRICING - GLA 1875 O -

**Asbestos Abatement (approximately 810SF) \$16,312.00
Sixteen Thousand Three Hundred Twelve Dollars & 00/100**

If contractor is successful in securing the contract for this work the following paragraph must be included in any purchase orders or contracts which are issued for this work. The purpose of this paragraph is to help define the limits of liability with regards to the asbestos which is already in place and located at the job site prior to the start of work. The contractor will take responsibility for the containment of the asbestos and the control of asbestos debris once the project begins and the work on site actually starts.

It is understood that the owner is considered as the "generator" of the asbestos containing material waste. The contractor is responsible to perform the safe and proper removal and/or encapsulation, handling. And proper on site clean up of asbestos materials, dust and debris and if required the disposal of the asbestos containing waste for the generator. The generator shall retain title to and ownership of all asbestos containing waste as well as title to all other "associated materials" utilized in the removal, enclosure, or encapsulation of the asbestos containing material. Final disposal manifest (waste shipment record) will be forwarded to you within 45 calendar days of the removal of the asbestos containing material from your job site.

In no event shall the contractor be liable for any loss, expense or claim relating to damage or injury to any person or property, which occurred prior to the contract start date or which results from an event which occurred or a condition or state of fact which existed prior to the start date of this contract (including but not limited to the presence of asbestos in the owners facility or the release thereof into the environment), if such event or condition is not caused or made worse by the contractor. Owner agrees to indemnify and hold harmless the contractor from and against any such loss, expenses or claim including but not limited to legal expenses incurred in the defense of such claim. The contractor agrees to indemnify and hold harmless the owner, its agents and employees, from and against any claims, loss, expense including attorneys and experts fees arising from contractors acts or omissions, including any condition's made worse by contractors

actions or failure to act.

Payment terms are net 30 days: all invoices are due and payable in accordance with specific terms upon receipt. Interest will be charged on any outstanding past due balances at the rate of 1.5% per month (18% per annum.). Any fees, expenses, costs, incurred for the collection of unpaid balances will be paid by you including, but not limited to collection agency fees, attorney fees, and court costs. This quote is contingent upon execution of contact within 30 days upon receipt.

If you have any questions concerning any items detailed in this proposal or requires clarifications on any items, please do not hesitate to contact us.

Very Truly Yours,

Bradley E. Bengart
President

Dave Steffen
Mod Pac
1801 Elmwood Ave.
Buffalo, NY

Mr. Steffen:

AMD Environmental is pleased to provide you with the following work proposal for asbestos services.

Project location: **1801 Elmwood Ave., Buffalo, NY (Warehouse T.S.I Abatement Project)**

High volume and/or low volume pumps will be used to monitor the concentration of airborne fibers during this project. AMD Environmental, Inc. (NYS DOL # 56177) will conduct air monitoring in accordance with guidelines and techniques identified in NY Code Rule 56. AMD Environmental, Inc. will prepare and submit the required NYS site specific variance on the client's behalf, in order to reduce unnecessary hardships relating to the clean up and abatement work activities in accordance with guidelines and techniques identified in NY Code Rule 56.

Fee Schedule

Asbestos Technician Hourly Rate: (Weekday ≤ 8hrs.) \$35.00/Hr. for estimated 120 Hrs. (2 wks)	\$ 4,200.00
Asbestos Technician Overtime Rate: (Weekday ≥ 8hrs. & weekends) \$48.00/Hr. for estimated 20 Hrs.	\$ 960.00.
Sample Cost: PCM Air Samples (Standard 48 Hr. TAT) : \$ 8.00/Sample for estimated 150 Samples	\$ 1,200.00
Sample Cost: PCM Air Samples (RUSH 6 Hr. TAT) : \$ 24.00/Sample for estimated 12 samples (Final Clearance)	\$ TBD
Visual inspections / Final Report :	\$ 250.00
NYS Variance application: - For Asbestos Debris in basement (Site assessment, Variance Preparation, Reporting, NYS submission fee)	\$1,800.00
TOTAL COST:	\$8,410.00

Note: If days on-site go beyond the estimated days the total cost will reflect the additional days at the standard Day Rates listed above. Sample Quantities are estimates only the final cost for sampling will be determined by the variation of material being sampled onsite.

Please sign and return- via email, mail, or fax.

Press Rm. #12 / Rm. #114 – Pipe & Insulation Removal**

Dear Mr. Steffen,

We propose to furnish all the necessary labor, materials, tools, equipment, insurance, supervision, OSHA personnel air sampling necessary to complete asbestos abatement as outlined in the scope of work and survey supplied by owner. The owner or site representative must hire a third party independent asbestos monitoring firm for project specific variance, project and air monitoring requirements, final visual inspection after abatement is complete and an asbestos survey for minor, small and large asbestos projects. This work shall be completed under small asbestos project protocol and in accordance with all rules and regulations following all Federal, State and Local agencies, and for proper liaison to and interface with such regulatory authorities having jurisdiction, and as to guidelines as set forth by the EPA, OSHA, NIOSH DEC, DOT, and NYS-DOL.

WORK SCOPE:

The removal and disposal of asbestos containing pipe insulation (under NYS-DOL Variance File #17-1095), from the Press Rm. #12 / Rm. #114 Area 16' to 18' above floor level from column B2 to B7 located at Mod Pac Corp. Buffalo, N. Y..

GENERAL CONDITIONS & CLARIFICATIONS:

The following are general conditions and clarifications, which are meant to help identify the owner and contractor responsibilities during the performance of this abatement project.

The owner is responsible to provide all necessary utilities including electric, potable cold water, sanitary drain; all utilities are understood to be located within approximately 100 feet of the work site.

The contractor shall provide and install temporary water and sanitary drain hoses. It is the owner's responsibility to provide standard garden style or standard IPS water fittings with a shut off valve at the source.

All work to be performed at AM and PM hours and to owner's preference on weekends from Friday to Sunday.

PRICING - GLA 1875 Q -

**Asbestos Abatement \$37,611.00
Thirty Seven Thousand Six Hundred Eleven Dollars & 00/100**

If contractor is successful in securing the contract for this work the following paragraph must be included in any purchase orders or contracts which are issued for this work. The purpose of this paragraph is to help define the limits of liability with regards to the asbestos which is already in place and located at the job site prior to the start of work. The contractor will take responsibility for the containment of the asbestos and the control of asbestos debris once the project begins and the work on site actually starts.

It is understood that the owner is considered as the "generator" of the asbestos containing material waste. The contractor is responsible to perform the safe and proper removal and or encapsulation, handling. And proper on site clean up of asbestos materials, dust and debris and if required the disposal of the asbestos containing waste for the generator. The generator shall retain title to and ownership of all asbestos containing waste as well as title to all other "associated materials" utilized in the removal, enclosure, or encapsulation of the asbestos containing material. Final disposal manifest (waste shipment record) will be forwarded to you within 45 calendar days of the removal of the asbestos containing material from your job site.

In no event shall the contractor be liable for any loss, expense or claim relating to damage or injury to any person or property, which occurred prior to the contract start date or which results from an event which occurred or a condition or state of fact which existed prior to the start date of this contract (including but not limited to the presence of asbestos in the owners facility or the release thereof into the environment), if such event or condition is not caused or made worse by the contractor. Owner agrees to indemnify and hold harmless the contractor from and against any such loss, expenses or claim including but not limited to legal expenses incurred in the defense of such claim. The contractor agrees to indemnify and hold harmless the owner, it's agents and

employees, from and against any claims, loss, expense including attorneys and experts fees arising from contractors acts or omissions, including any condition's made worse by contractors actions or failure to act.

Payment terms are (2% discount / 10 days) or net 30 days: all invoices are due and payable in accordance with specific terms upon receipt. Interest will be charged on any outstanding past due balances at the rate of 1.5% per month (18% per annum.). Any fees, expenses, costs, incurred for the collection of unpaid balances will be paid by you including, but not limited to collection agency fees, attorney fees, and court costs. This quote is contingent upon execution of contact within 30 days upon receipt.

If you have any questions concerning any items detailed in this proposal or requires clarifications on any items, please do not hesitate to contact us.

The generator shall retain title to and ownership of all asbestos containing waste as well as title to all other "associated materials" utilized in the removal, enclosure, or encapsulation of the asbestos containing material. Final disposal manifest (waste shipment record) will be forwarded to you within 45 calendar days of the removal of the asbestos containing material from your job site.

In no event shall the contractor be liable for any loss, expense or claim relating to damage or injury to any person or property, which occurred prior to the contract start date or which results from an event which occurred or a condition or state of fact which existed prior to the start date of this contract (including but not limited to the presence of asbestos in the owners facility or the release thereof into the environment), if such event or condition is not caused or made worse by the contractor. Owner agrees to indemnify and hold harmless the contractor from and against any such loss, expenses or claim including but not limited to legal expenses incurred in the defense of such claim. The contractor agrees to indemnify and hold harmless the owner, it's agents and

employees, from and against any claims, loss, expense including attorneys and experts fees arising from contractors acts or omissions, including any condition's made worse by contractors actions or failure to act.

Payment terms are (2% discount / 10 days) or net 30 days: all invoices are due and payable in accordance with specific terms upon receipt. Interest will be charged on any outstanding past due balances at the rate of 1.5% per month (18% per annum.). Any fees, expenses, costs, incurred for the collection of unpaid balances will be paid by you including, but not limited to collection agency fees, attorney fees, and court costs. This quote is contingent upon execution of contact within 30 days upon receipt.

If you have any questions concerning any items detailed in this proposal or requires clarifications on any items, please do not hesitate to contact us.

Very Truly Yours,

Bradley E. Bengart
President
