1.0 EXECUTIVE SUMMARY

1.1 REPORT FINDINGS

The following details the findings of TurnKey Environmental Restoration, LLC (TurnKey) relative to all appropriate inquiries of recognized environmental conditions (RECs) for the site located at 1095 Niagara Street in the City of Buffalo New York in accordance with ASTM E1527-05. It should be noted that this Phase I Environmental Site Assessment (ESA) includes only a portion of what is required by the user to comply with all appropriate inquiries (See Appendix L). This section is provided for convenience to the reader. The reader is encouraged to read the entire report.

TurnKey understands that this assessment was requested by 4215 Group, Inc. (i.e., the User) for the purpose of meeting the all appropriate inquiry (AAI) provisions necessary to qualify for landowner liability protections under CERCLA (See Appendix M).

1.1.1 Site Description

The property is characterized as an approximately 0.95-acre vacant site of the former Keystone Chromium Co. plating and manufacturing operations. The parcel, addressed at 1095 Niagara Street, Buffalo, New York, (see Figures 1 and 2) is known to have been a metal foundry and plating operation since at least 1905. The subject property is located in a historically mixed commercial-industrial and residential area of the City of Buffalo. Site photos are included in Appendix A.

1.1.2 Site Reconnaissance

Based solely on observations made during the site inspection, the following conditions indicative of releases or threatened releases of petroleum products or hazardous substances on, at, in, or to the subject property were identified:

- Based on knowledge of TurnKey personnel, the Site is the former Keystone Chromium Corp. manufacturing site. Past use of the Site included a metal plating operation; such operations typically use and store hazardous and/or regulated materials.
- Several areas of staining were noted during the Site reconnaissance. Some of the staining was green, potentially indicating a chromium release.
- Multiple piles of debris likely related to the demolished building are present on Site.
- Several 55-gallons drums with unknown contents were noted on Site.

- The west adjacent properties are industrial use properties.

1.1.3 Site History

The historical use of the subject property has been researched through review of historic maps, historic aerial photographs, municipal records, city directories and/or other reasonably obtainable documents, as detailed below.

Date Range	Apparent Use	Source
1899	Residential and Greenhouses	Sanborn Maps
At least 1905 - 2007	Metal plating and foundry	Aerial Photos, Sanborn Maps, Municipal records
2007-present	Vacant (Demolished)	Aerial Photos and Municipal Records

A review of historical information identified no conditions indicative of releases or threatened releases of hazardous substances and/or petroleum products on, at, in, or to the subject property, except for the following:

- Based on review of Sanborn maps and municipal records, the site was used as a foundry and metal plating operation since at least 1905.
- Municipal records indicate that a permit was issued for one 1,000-gasoline UST for the subject property. Municipal records also indicate that several USTs were installed and on adjoining parcels, with indications of at least one leaking tank on the north adjacent property.
- Records indicate that multiple fires occurred on site. One fire was severe enough to require the buildings be demolished and one fire was noted to have been caused by a “chemical reaction.”

1.1.4 Environmental Regulatory Information

The following conditions indicative of releases or threatened releases of hazardous substances and/or petroleum products on, at, in, or to the subject property were identified based on review of regulatory information:

- The subject property, identified as Keystone Chromium Corporation, addressed at 1095 Niagara Street, is listed as a Resource Conservation and Recovery Act (RCRA) – Non Gen, NY Spills (NY SPILLS), NY Historical Spills (Hist SPILLS), Manifest, and a FINDS site. The Site was classified as a Large Quantity Generator of Hazardous Waste from at least 1984 through at least 2001. The facility generated several hazardous waste streams (F001, F002, F006 and D002), including halogenated solvents, electroplating sludge and corrosive wastes. Numerous compliance violations were noted for that time period. NYSDEC Spill No. 9206401 was related to “chromic acid washed into sewer.” Spill was closed on 10/28/1992.

- An adjacent property, identified as Oliver Gear Inc., addressed at 1120 Niagara Street, is listed as a RCRA – Conditional Exempt Small Quantity Generator (RCRA-CESQG), and a FINDS site. This property is listed as a RCRA-CESQC based on the known use of solvents (D001), lead (D008), benzene (D018), tetrachloroethylene (PCE) (D039), and trichloroethylene (TCE) (D040).
- An adjacent property, identified as Curtis Screw Co Inc, addressed at both 1130 Niagara Street and 17 Gull Street, is listed as a Leaking Tanks (LTANKS), Historical LTANKS (HIST LTANKS), Underground Storage Tanks (UST), Historical UST (HIST UST), Chemical Bulk Storage (CBS), CBS Aboveground Storage Tank (CBS AST), AST, Historical AST (HIST AST), and NY SPILLS.

NYSDEC Spill No. 0485364 is related to contamination found during excavation in area of three former USTs (cutting oil and #2 fuel oil) and was closed on 01/23/2006. The EDR report notes correspondence stating that this spill was related to historical Spill No. 9504343.

NYSDEC Spill No. 9503204 was related to an equipment failure that resulted in hydraulic oil spilling on parking area, and the spill was closed on 06/29/1995.

- An adjacent property, identified as Modern Heat Treating and Forging, addressed at 1112 Niagara Street, is listed as a CBS, CBS UST, CBS AST, MANIFEST, RCRA-NonGen, and a FINDS site. The EDR report notes that Modern Heat Treating and Forging was listed as a RCRA–Large Quantity Generator (RCRA-LQG) in 1996 and as a RCRA-Small Quantity Generator (RCRA-SQG) in 1999.

1.1.5 Interviews

Interviews were attempted (questionnaires) with the Site owner and the User of this report to identify potential releases or threatened releases of hazardous substances and/or petroleum products on, at, in, or to the subject property. However, no response has been received at the time of report preparation.

1.2 DATA GAPS

The following data gaps¹ were encountered in completion of this inquiry.

¹ A data gap is defined by 40 CFR 312.10 as “a lack of or inability to obtain information required by the standards and practices” of preparation of this document “despite good faith efforts by the environmental professional” or others to gather such information.

Type of Data Gap	Details of Data Gap	Sources Consulted	Significance
Abstract of Title	The abstract of title was not available for review at the time of report preparation.	The title search was reportedly ordered by the user of this report, but was not provided to TurnKey.	This data gap did not limit TurnKey's ability to provide an opinion on RECs related to the site.
User Questionnaire	TurnKey was not provided with response to the User Questionnaire at the time of report preparation	User	This data gap did not limit TurnKey's ability to provide an opinion on RECs related to the site.
NYSDEC FOIA	TurnKey did not receive response from NYSDEC related to FOIA request	NYSDEC	This data gap did not limit TurnKey's ability to provide an opinion on RECs related to the site.

1.3 LIMITATIONS

To the best of our knowledge, the information contained in this report is true and accurate. TurnKey personnel have exercised due diligence in the compilation of the information contained herein appropriate to environmental professionals engaged in investigations of this sort. TurnKey makes no guarantees regarding the accuracy of information gained from other sources. Refer to Appendix K for additional limitations.

1.4 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 for 1095 Niagara Street, Buffalo, Erie County, New York. Any exceptions to, or deletions from, this practice are described within Section 1.3 of the report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except for the following:

- The subject property was formerly owned by the Keystone Chromium Corporation, a chromium plating operation. The site had been a metal alloy foundry since at least 1905 and metal plating operation since at least 1936. Metal plating facilities typically generate hazardous wastes such as spent halogenated solvents/degreasers, acid solutions, and metal-laden wastewater.
- Several areas of staining were noted during the Site reconnaissance. Some of the staining was green, potentially indicating a chromium release.
- Several 55-gallons drums with unknown contents were noted on Site.
- The subject property is listed as a Resource Conservation and Recovery Act (RCRA) – Non Gen, NY Spills (NY SPILLS), NY Historical Spills (Hist SPILLS), Manifest, and a FINDS site. The Site was classified as a Large Quantity Generator of

Hazardous Waste from at least 1984 through at least 2001. The facility generated several hazardous waste streams (F001, F002, F006 and D002), including halogenated solvents, electroplating sludge and corrosive wastes.

- Adjacent properties include commercial and industrial sites known to utilize hazardous materials and/or generate hazardous wastes, and are listed as CBS, CBS UST, CBS AST, UST, AST, Hist UST, Hist AST, NY Spills, Hist NY Spills, MANIFEST, RCRA-NonGen, and FINDS sites. Additionally, neighboring parcels were historically listed as RCRA-LQG and RCRA-SQG sites. The subject property could potentially be impacted by industrial and commercial adjacent or nearby properties, including historical leaking tanks on the adjoining parcel.

1.5 OPINION

Based on the information contained in this report, it is the opinion of the environmental professional preparing this report that the following additional investigation is warranted.

- A Phase II Environmental Investigation is recommended for the subject property to better determine the impact of RECs identified in this report. The investigation should include, at a minimum, soil and groundwater sample collection and analysis for VOCs and metals typically associated with metal plating facilities.

1.6 RELIANCE AND DECLARATION

TurnKey authorizes 4215 Group, Inc. to use this report in reference to the subject property. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

2.0 PURPOSE

The primary purpose of this assessment was to document the inquiry of the environmental professional for all appropriate inquiries for the subject property. Specifically, this document is intended to provide the “all appropriate inquiries” for the purposes of CERCLA Section 101(35) (B). Such is applicable to persons seeking to qualify for (i) the innocent landowner defense pursuant to CERCLA Sections 101(35) and 107(b)(3); (ii) the bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 107(r); and, (iii) the contiguous property owner liability protection pursuant to CERCLA Section 107(q). This report was not intended as part of the site characterization and assessment with use of a grant awarded under CERCLA Section 104(k)(2)(B). More specifically, the scope is intended to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property.

3.0 SCOPE OF WORK

This Environmental Assessment report has been prepared in accordance with “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,” ASTM E 1527-05. This standard was devised to address the site assessment portion for *Innocent Landowners, Standards for Conducting All Appropriate Inquiries* (40 CFR 312). The scope of work is intended to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property, via the following tasks.

A) Review of information provided by the person seeking liability protection relative to: environmental cleanup liens; specialized knowledge or experience regarding the subject property; relationship of the purchase price to the fair market value of the property, if the property were not contaminated; and, commonly known or reasonably available information about the subject property.

B) Interviews with past and present owners, operators and occupants.

C) Review of historical sources of information documenting the subject property’s first use.

D) Review of Federal, State, tribal and local government records, as defined in 40 CFR 312.26.

E) A visual inspection of the subject property and adjoining properties (to the extent possible).

F) Preparation of this written report on all appropriate inquiries.

4.0 SUBJECT PROPERTY/VICINITY DESCRIPTION

The property is characterized as a vacant 0.95-acre site in the City of Buffalo, Erie County, New York (see Figure 1). The parcel, addressed at 1095 Niagara Street, was formerly the Keystone Chromium Corporation site (see Figure 2). The surrounding area is generally characterized as residential (east and south), commercial (north and south) and industrial (north and west). The Black Rock Canal and the Niagara River are located approximately one-quarter mile to the west.

4.1 SITE RECONNAISSANCE

A visual site review of the subject property was completed to document site conditions and to identify recognized environmental conditions. The site reconnaissance included a walkover of all accessible areas. Mr. Michael Lesakowski, and Mr. Bryan C. Hann, of TurnKey performed the reconnaissance.

The following summarizes TurnKey's observations.

4.1.1 Overview

General Site Information	
Name of Site	former Keystone Chromium Corp.
Site Address	1095 Niagara Street
Municipality, County, State	City of Buffalo, Erie County, New York
Fronting Streets	Niagara and Albany Streets
Site Size (acres)	0.95 +/-
Site Topography	Flat
Nearest Water Body	Niagara River and Black Rock Canal
Exterior Conditions/Improvements	Vacant (recently demolished)

4.1.2 Storage Tanks and Containers

There was no evidence of above-grade storage tanks (ASTs) or underground storage tanks (USTs). Several 55-gallon drums were noted with unknown contents.

4.1.3 Hazardous or Regulated Materials

There was no evidence of current use of hazardous or regulated materials on site. Based on the known past use as a metal plating operation, it is likely that hazardous and regulated materials were utilized on-Site.

4.1.4 Solid, Hazardous or Regulated Waste

Multiple piles of general refuse/debris (i.e. bricks and concrete) were noted on the subject property. Numerous automobile tires were also noted on-Site. Furthermore, several piles of brick and concrete debris, some green-stained, were noted on-Site.

4.1.5 Staining, Corrosion, Stressed Vegetation and/or Dead Vegetation

Several areas of staining were noted across the subject property. Dark-colored staining in the vicinity of 55-gallon drums was noted on the east property boundary; “petroleum-like” staining was noted in two other areas of the Site and several areas of green-staining, likely related to the former chromium plating operations, were also noted.

4.1.6 Fill

There was widespread evidence of fill, likely related to on-Site demolition activities.

4.1.7 Wastewaters

According to the Site owner, the Site has been serviced by municipal sewers since the 1950s.

4.1.8 Potable Water Supply/Wells

The site is serviced by municipal water supply.

4.1.9 Air Emissions

No process exhaust systems were noted on-site at the time of the site investigation.

4.1.10 PCBs

Pole-mounted transformers were noted adjacent to the Site along Albany Street; due to their height, TurnKey personnel were not able to observe whether they were labeled as non-PCB-containing electrical equipment.

4.2 ADJACENT SITE USE

The adjacent properties were visually inspected from the subject property at the time of the site reconnaissance. The surrounding property uses include the following:

Direction	Owner/Current Use	Apparent Past Use	Concerns
North	Commercial Industrial	- Same	- Potential impact related to former commercial / manufacturing operations
South:	Restaurant / Residential	- Same	- None
East:	Residential	- Same	- None
West:	Commercial/Industrial	- Same	- Potential impact related to heat treating operation across Niagara Street to the west

4.3 SUBJECT SITE PHOTOGRAPHS

Photographs of the subject property were taken by TurnKey on April 18, 2008. Photographs were taken with the objective of documenting the physical condition of the subject property and any improvements thereon. Photographs are included in Appendix A.

4.4 SUMMARY OF OBSERVATIONS OF POTENTIAL CONCERNS

Based solely on observations made during the site inspection, the following conditions indicative of releases or threatened releases of petroleum products or hazardous substances on, at, in, or to the subject property were identified:

- Based on knowledge of TurnKey personnel, the Site is the former Keystone Chromium Corp. manufacturing site. Past use of the Site included a metal plating operation; such operations typically use and store hazardous and/or regulated materials.
- Several areas of staining were noted during the Site reconnaissance. Some of the staining was green, potentially indicating a chromium release.
- Multiple piles of debris likely related to the demolished building are present on Site.
- Several 55-gallons drums with unknown contents were noted on Site
- The west adjacent properties are industrial use properties.

5.0 SUBJECT PROPERTY HISTORY AND USE

The historical use of the subject property has been researched through review of historic maps, historic aerial photographs, municipal records, city directories, historic topographic maps, and/or other reasonably obtainable documents. The following summarizes TurnKey’s research.

5.1 HISTORIC AERIAL PHOTOGRAPHS

Historical aerial photographs serve to reveal former topography, buildings, structures and man-made works such as canals, lagoons and railroads that may have been altered or may no longer be in existence. Historical aerial photographs were reviewed from 1927 and 1951. Additional aerials from www.local.live.com (circa 2005 through 2007) were obtained and reviewed by TurnKey, with general observations noted below. Copies of the aerial photographs are included in Appendix B.

YEAR	OBSERVATIONS
2007	
Subject Property	The appears as currently developed (vacant)
Surrounding Area	The surrounding residential and commercial properties appear to be as currently developed; commercial/industrial land-use to the north and west, mixed commercial and residential land-use to the east and north
2006	
Subject Property	The Site’s former manufacturing building is present, with apparent roof damage and general disrepair.
Surrounding Area	The surrounding residential and commercial properties appear to be similar to current development with commercial/industrial land-use to the north and west, mixed commercial and residential land-use to the east and north
2005	
Subject Property	The Site’s former manufacturing building is present.
Surrounding Area	The surrounding residential and commercial properties appear to be similar to current development with commercial/industrial land-use to the north and west, mixed commercial and residential land-use to the east and north
1951	
Subject Property	The Site is present, as described in the 2005 aerial. The map scale does not allow a detailed observation.
Surrounding Area	The surrounding residential and commercial properties appear to be similar to current development with commercial/industrial land-use to the north and west, mixed commercial and residential land-use to the east and north.
1927	
Subject Property	The Site is present, though appears smaller than observed in the 1951 aerial. The map scale does not allow a detailed observation.
Surrounding Area	The surrounding residential and commercial properties appear to be similar to current development with commercial/industrial land-use to the north and west, mixed commercial and residential land-use to the east and north.

5.2 SANBORN MAPS

Sanborn maps serve to reveal former topography, buildings, structures and man-made works such as canals, lagoons and railroads that may have been altered or may no longer be in existence. Sanborn maps for the years 1925, 1951, and 1981 were reviewed and copies are provided in Appendix C. Changes in land use and general subject property characteristics are limited by the scale of the maps.

YEAR	OCCUPANTS/PROPERTY USES
1981	
Subject Property	Manufacturing plant shown (Keystone Chromium Co)
North	Commercial development shown (Rich Products, Fork Lift Sales and Repair)
South	No coverage
East	Residential dwellings
West	No coverage
1951	
Subject Property	Manufacturing plant shown (Keystone Chromium Co.)
North	Commercial development shown (Lincoln Storage and Carting Co., Auto Repair, Rich Products, City of Buffalo DPW Mechanic Svce.)
South	No coverage
East	Commercial (Auto repair and bakery) and Residential dwellings
West	No coverage
1925	
Subject Property	Manufacturing operation shown (American Body Co.) part of subject property occupied by Joseph F. Stabell Corp / Lincoln Storage and Carting Co.
North	Residential dwellings
South	No coverage
East	Residential dwellings
West	No coverage
1899	
Subject Property	Residential dwellings and E.J. Buxton Greenhouses
North	Commercial development shown (Joseph F. Stabell Corp. / Lincoln Storage and Carting Co., Auto Repair, Thomas Brown Contracting) and Residential dwellings
South	No coverage
East	Commercial (Auto repair and bakery) and Residential dwellings
West	C.J. Curtiss Co. Malt House

5.3 CITY DIRECTORIES

Historical city directories were not obtained as historic Sanborn and aerial maps provided adequate historical information.

5.4 HISTORIC TOPOGRAPHIC MAPS

Historic topographic maps reviewed for additional information regarding the subject property and surrounding area. Maps were reviewed from 1901 and 1948; however,

individual structures are not shown on either map. Copies of the maps are included in Appendix E.

5.5 MUNICIPAL RECORDS

Subject Property Information	
Sources	City of Buffalo, Erie County GIS
SBL Nos.	087.17-1-61
Size (acres)	0.95 +/-
Current Owner	1095 Niagara Street Inc.
Square Footage of Buildings	NA – demolished in 2007
Date of Construction	Unknown; initially prior to 1905
Utilities Provided	Electric, gas, water and sewer are available

5.5.1 Municipal Records

TurnKey personnel visited the City of Buffalo municipal offices and obtained records for 1095 Niagara Street. The municipal records are included in Appendix F and summarized below.

- **February 9, 2007:** City of Buffalo – Building Demolition Permit was issued related to the April 25, 2006 demolition application for “fire-damaged building.” Permit was issued to 1095 Niagara Street Inc. and Alkey Castricone.
- **April 28, 2006:** City of Buffalo – Asbestos Removal Permit was issued related to April 7, 2006 application. Asbestos removal in preparation for demolition. Permit was issued to 1095 Niagara Street Inc. and Alkey Castricone.
- **October 17, 1984:** Plumbing Permit #P13305 was issued for “5 sumps” for Keystone Plate addressed at 1095 Niagara.
- **August 6, 1973:** Permit No. 63002 was issued to Keystone Corp. addressed at 1093-1095 Niagara for demolition of 1 story building.
- **August 25, 1960:** Permit No. A 15043 issued for repair of building “Metal Finishing Plant” noted.
- **November 25, 1942:** Permit No. 34900 was issued to Keystone Chromium Co. to erect brick and block boiler house.
- **May 16, 1936:** Building Permit #R027316 was issued to Keystone Chromium Co. to alter brick factory.

- **August 22, 1928:** Permit No. I3297 issued for installation of 1,000-gallon gasoline tank. Permit was issued to E.H. Scott Trans Co. addressed at 1095 Niagara Street.
- **August 30, 1916:** Permit No. 49601 was issued to Aluminum Casting Co., addressed at 1095 Niagara Street, for construction of one-story shop.
- **April 1, 1909:** Permit No. 5022 was issued to Alloy and Brass Foundry Co., addressed at 1095 Niagara Street, for repair of brick chimney in factory.
- **September 24, 1906:** Permit No. 23113 was issued to Liberty Brass Foundry, addressed at 1095 Niagara Street, for construction of foundry.
- **October 5, 1905:** Permit No. 20985 was issued to Liberty Brass Foundry, addressed at 1095-1101 Niagara Street, for the construction of a 2-story factory.

Additional permits were issued for overlapping properties and permit applicants. Due to the age of the permits, and some illegible writing, full description of permit is unclear. Copies of permits are provided in Appendix E.

City of Buffalo Fire Department records were reviewed by TurnKey personnel for 1095 Niagara Street. The records are summarized below:

- **April 28, 2006:** Letter correspondence requesting emergency demolition of 1095 Niagara Street as result of the “heavy fire damage and has been structurally compromised.”
- **May 18, 1979:** Letter correspondence of a fire caused by a “chemical reaction” at the 1095 Niagara Street, Keystone Corp. on May 10, 1979.
- **July 9, 1963:** Fire report related to “rag can in spray room” within chromium plating manufacturing site, addressed at 1095 Niagara Street.

The Fire Department records also indicate that the adjacent property, addressed at 1109 Niagara Street, Lincoln Storage, placed several USTs. Notes which indicate leaking tanks were noted in the fire department records.

5.5.2 Abstract of Title

Abstract of Title information was not available to TurnKey.

5.6 SUMMARY OF HISTORIC USES

The historical use of the subject property has been researched through review of historic maps, historic aerial photographs, municipal records, city directories and/or other reasonably obtainable documents, as detailed below.

Date Range	Apparent Use	Source
1899	Residential and Greenhouses	Sanborn Maps
At least 1905 - 2007	Metal plating and foundry	Aerial Photos, Historical Topographic Maps, Sanborn Maps, Municipal records,
2007-present	Vacant (Demolished)	Aerial Photos and Municipal Records

A review of historical information identified no conditions indicative of releases or threatened releases of hazardous substances and/or petroleum products on, at, in, or to the subject property, except for the following:

- Based on review of Sanborn maps and municipal records, the site was used as a metal alloy foundry since at least 1905 and metal plating operation since at least 1936.
- Municipal records indicate that a permit was issued for one 1,000-gal gasoline UST for the subject property. Municipal records also indicate that several USTs were installed and on adjoining parcels, with indications of at least one leaking tank on the north adjacent property.
- Records indicate that multiple fires occurred on site. One fire was severe enough to require the buildings be demolished and one fire was noted to have been caused by a “chemical reaction.”

6.0 PHYSICAL AND HYDROGEOLOGIC SETTING

The subject property is included on the USGS Topographic Buffalo Northwest Quadrangle Map. Regional groundwater would appear to flow in a western direction towards the Niagara River based on a review of geological/soils and USGS quadrangle maps.

Surface soils in the City of Buffalo are generally characterized as urban land with level to gently sloping land in which 80 percent or more of the soil surface is covered by asphalt, concrete, buildings, or other impervious structures typical of an urban environment. In addition, the presence of overburden fill material is widespread and common throughout the City of Buffalo.

7.0 REGULATORY INFORMATION

Regulatory information involving the subject property was obtained through a commercial database search company, interviews with local municipalities and/or other knowledgeable persons, NYSDEC FOIL requests, and user-supplied information. The following summarizes the regulatory research.

7.1 ENVIRONMENTAL RECORDS DATABASE

Federal and state environmental regulatory information provided by EDR. Databases were reviewed at the radii defined in 40 CFR 312.26 (See Appendix G).

Any sites unplottable by EDR were also reviewed, to the extent practical based on the site name and address, to assess whether they are also present within their appropriate radii. Any listings for the subject property or any adjacent sites are included in the details below.

7.1.1 Subject Property

Based on the EDR report, the subject property, identified as Keystone Chromium Corporation, addressed at 1095 Niagara Street, is listed as a Resource Conservation and Recovery Act (RCRA) – Non Gen, NY Spills (NY SPILLS), NY Historical Spills (Hist SPILLS), Manifest, and a FINDS site.

The Site was classified as a Large Quantity Generator of Hazardous Waste from at least 1984 through at least 2001. The facility generated several hazardous waste streams (F001, F002, F006 and D002), including halogenated solvents, electroplating sludge and corrosive wastes. NYSDEC Spill No. 9206401 was related to “chromic acid washed into sewer.” Spill was closed on 10/28/1992.

An additional entries on the EDR report attributed to the subject property, identified as “Near the Corner”, addressed at 1095 Niagara Street / Albany Street and Castricone Concrete, address at Albany Street/Niagara Street, are listed as New York Spills (SPILLS) sites. The spill associated with Castricone Concrete is related to a 5-gallon spill of concrete cure and seal and is closed. The spill associated with “Near the Corner” (i.e., NYSDEC Spill No. 391698) is related to two drums being abandoned on the subject property. According to EDR, the drums were reportedly removed from the Site. However, the spill report remains open.

7.1.2 Adjacent / Nearby Properties

An adjacent property, identified as Oliver Gear Inc., addressed at 1120 Niagara Street, is listed as a RCRA – Conditional Exempt Small Quantity Generator (RCRA-CESQG), and a FINDS site. This property is listed as a RCRA-CESQC based on the

known use of solvents (D001), lead (D008), benzene (D018), tetrachloroethylene (PCE) (D039), and trichloroethylene (TCE) (D040).

An adjacent property, identified as Curtis Screw Co Inc, addressed at both 1130 Niagara Street and 17 Gull Street, is listed as a Leaking Tanks (LTANKS), Historical LTANKS (HIST LTANKS), Underground Storage Tanks (UST), Historical UST (HIST UST), Chemical Bulk Storage (CBS), CBS Aboveground Storage Tank (CBS AST), AST, Historical AST (HIST AST), and NY SPILLS.

NYSDEC Spill No. 0485364 is related to contamination found during excavation in area of three former USTs (cutting oil and #2 fuel oil) and was closed on 01/23/2006. The EDR report notes correspondence stating that this spill was related to historical Spill No. 9504343.

NYSDEC Spill No. 9503204 was related to an equipment failure that resulted in hydraulic oil spilling on parking area, and the spill was closed on 06/29/1995.

An adjacent property, identified as Modern Heat Treating and Forging, addressed at 1112 Niagara Street, is listed as a CBS, CBS UST, CBS AST, MANIFEST, RCRA-NonGen, and a FINDS site. The EDR report notes that Modern Heat Treating and Forging was listed as a RCRA–Large Quantity Generator (RCRA-LQG) in 1996 and as a RCRA-Small Quantity Generator (RCRA-SQG) in 1999.

7.1.3 Surrounding Properties

In addition to the nearby sites listed above, several additional sites listed on one or more environmental databases are located proximate to the subject property. However, based on TurnKey’s review, each of these additional sites falls in to one or more of the following categories:

- It is listed on databases that indicate a potential for, but not an actual documented current or historical release (e.g., RCRA small quantity generator or large quantity generator; registered chemical bulk storage or petroleum bulk storage sites). As such, these sites are not considered to pose a recognized environmental condition at the subject property due to absence of a documented release.
- It is located greater than ¼ mile from the subject property, and is not considered a recognized environmental condition at the subject property based on the distance to the subject property.
- It is present at a location that is not expected to pose potential for impact on the subject property due to topography and likely groundwater flow direction, and is not considered a recognized environmental condition at the subject

property based on unlikelihood for impacts associated with migration of contaminants onto the subject property.

The discussion included above regarding adjacent and surrounding properties is based on information supplied to TurnKey as well as observations of nearby properties at the time of the site reconnaissance. Further study would be required to positively confirm whether the subject property has been impacted by nearby properties. It is also important to note that the environmental history and status of nearby properties, real or perceived, can affect the valuation of the target property.

7.2 NYSDEC RECORDS

To augment the information provided by EDR, a Freedom of Information Law (FOIL) request was forwarded to the NYSDEC for information concerning the subject property. Appendix H contains NYSDEC correspondence regarding the subject property. No response from the NYSDEC has been received at the time of this report preparation.

7.3 ENFORCEMENT ACTIONS/PERMITTED ACTIVITIES/INSTITUTIONAL CONTROLS

According to obtainable information to date, there have been no enforcement actions, orders or institutional controls imposed against the referenced subject property.

7.4 SUMMARY OF REGULATORY INFORMATION

The following conditions indicative of releases or threatened releases of hazardous substances and/or petroleum products on, at, in, or to the subject property were identified based on review of regulatory information:

- The subject property, identified as Keystone Chromium Corporation, addressed at 1095 Niagara Street, is listed as a Resource Conservation and Recovery Act (RCRA) – Non Gen, NY Spills (NY SPILLS), NY Historical Spills (Hist SPILLS), Manifest, and a FINDS site. The Site was classified as a Large Quantity Generator of Hazardous Waste from at least 1984 through at least 2001. The facility generated several hazardous waste streams (F001, F002, F006 and D002), including halogenated solvents, electroplating sludge and corrosive wastes. Numerous compliance violations were noted for that time period. NYSDEC Spill No. 9206401 was related to “chromic acid washed into sewer.” Spill was closed on 10/28/1992.
- An adjacent property, identified as Oliver Gear Inc., addressed at 1120 Niagara Street, is listed as a RCRA – Conditional Exempt Small Quantity Generator (RCRA-

CESQG), and a FINDS site. This property is listed as a RCRA-CESQC based on the known use of solvents (D001), lead (D008), benzene (D018), tetrachloroethylene (PCE) (D039), and trichloroethylene (TCE) (D040).

- An adjacent property, identified as Curtis Screw Co Inc, addressed at both 1130 Niagara Street and 17 Gull Street, is listed as a Leaking Tanks (LTANKS), Historical LTANKS (HIST LTANKS), Underground Storage Tanks (UST), Historical UST (HIST UST), Chemical Bulk Storage (CBS), CBS Aboveground Storage Tank (CBS AST), AST, Historical AST (HIST AST), and NY SPILLS.

NYSDEC Spill No. 0485364 is related to contamination found during excavation in area of three former USTs (cutting oil and #2 fuel oil) and was closed on 01/23/2006. The EDR report notes correspondence stating that this spill was related to historical Spill No. 9504343.

NYSDEC Spill No. 9503204 was related to an equipment failure that resulted in hydraulic oil spilling on parking area, and the spill was closed on 06/29/1995.

- An adjacent property, identified as Modern Heat Treating and Forging, addressed at 1112 Niagara Street, is listed as a CBS, CBS UST, CBS AST, MANIFEST, RCRA-NonGen, and a FINDS site. The EDR report notes that Modern Heat Treating and Forging was listed as a RCRA–Large Quantity Generator (RCRA-LQG) in 1996 and as a RCRA-Small Quantity Generator (RCRA-SQG) in 1999.

8.0 INTERVIEWS/USER PROVIDED INFORMATION

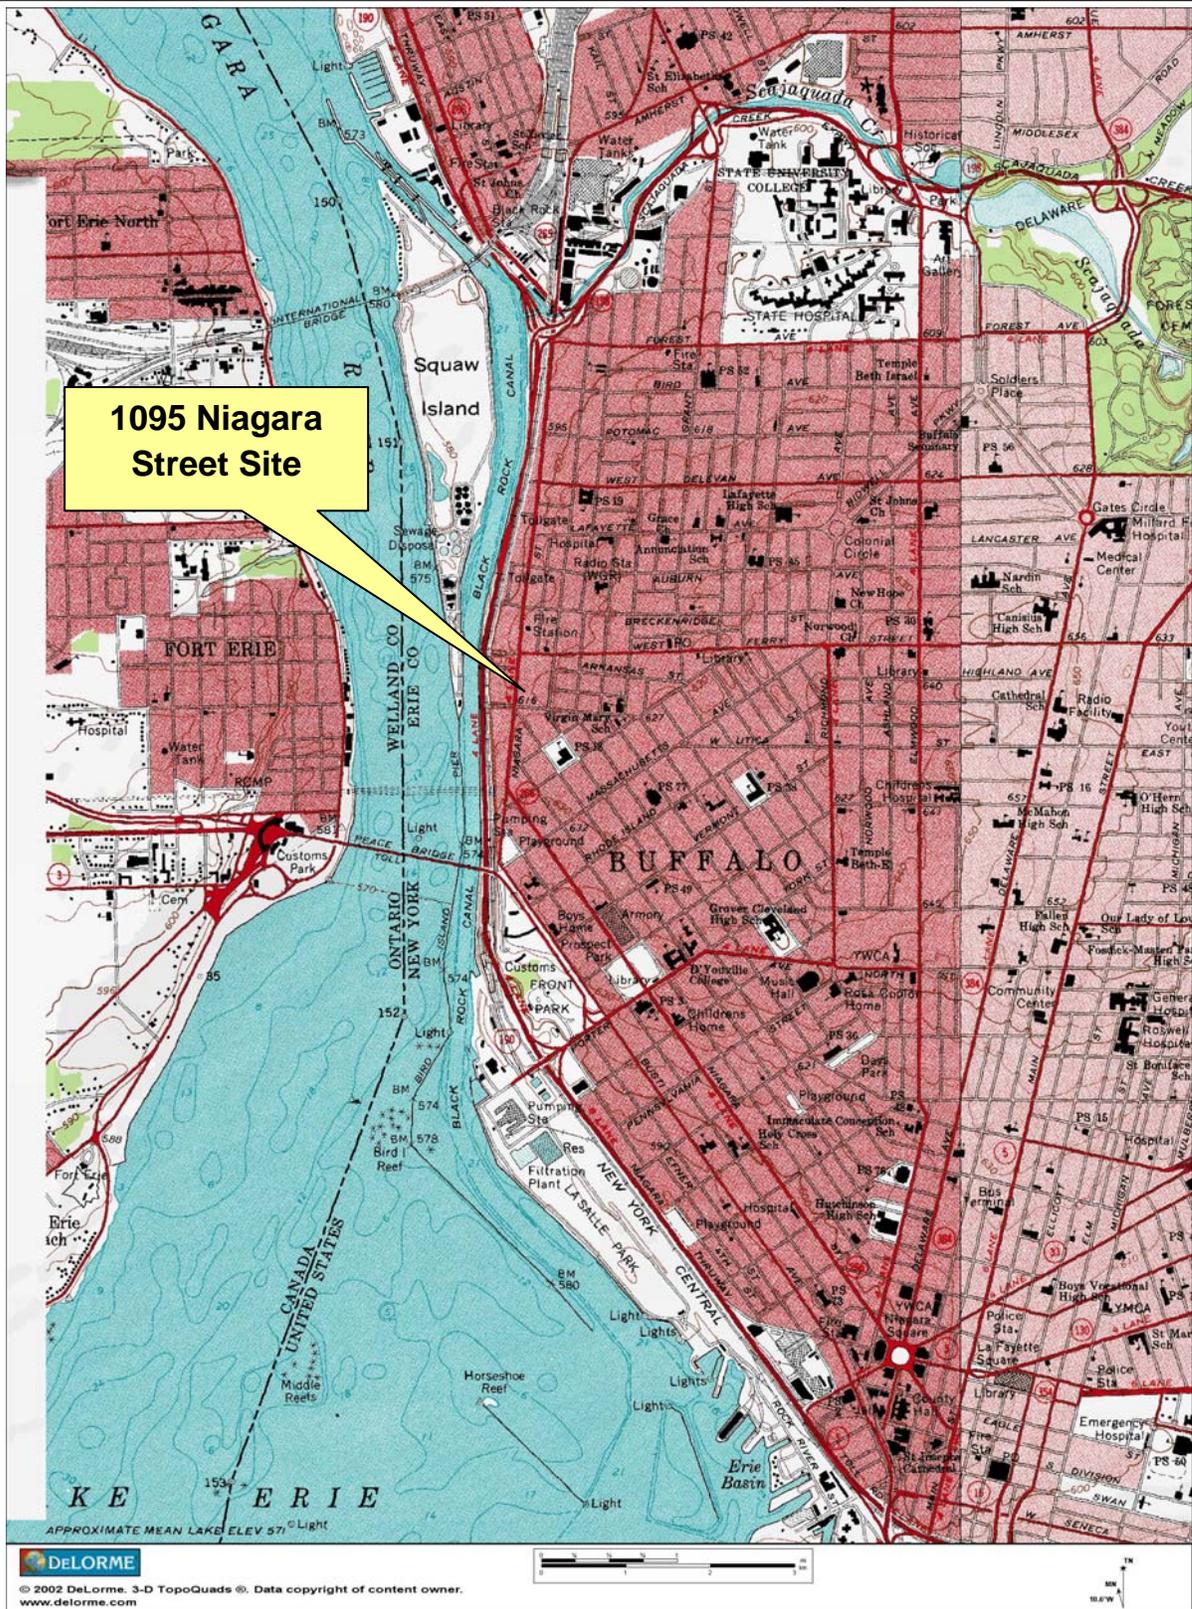

8.1 User Provided Information

As required under 40 CFR 312, those seeking liability protection under CERCLA, for which this report is prepared, must provide the environmental professional certain information and documentation. TurnKey provided a User Questionnaire to 4215 Group Inc.

No response from 4215 Group, Inc. was available for review at the time of writing this report.

RE: 1095 NIAGARA ST.

Dear Mr. Karet:

Thank you for the walk through of your facility located at 1095 Niagara St. To help make this building safer to the public and the Fire Dept., the following recommendations are being made to you:

1. Furnish signs on the outside of the building stating that there are "open pits" inside.
2. Keep the building secured.
3. Frequent inspections by you or a representative of your company should be made.

If you have any questions, please call me.

Thank you,

Lt Ken Poczalski

RE: 1095 Niagara Street
Buffalo, NY 14213

On 12/03/05, the Buffalo Fire Department responded to a multiple alarm fire at 1095 Niagara Street.

The building, a 2 story, type 3 building, suffered heavy fire damage and has been structurally compromised. The building in its present state presents a hazard to both the general public and, in particular, to the Buffalo Fire Department.

I am requesting an emergency demolition of the building.

Attn: John Corrigan
 Quality Control Manager

Dear Sir: .

In reference to your letter dated February 4, 1986 regarding the contingency plan, the Fire Department will accept any information that would be helpful in the event that it would have to respond in an emergency to Keystone Corporation - 1095 Niagara Street.

The Bureau of Fire Prevention is responsible for Fire Department record keeping and will forward to the District Fire Companies this information.

Very truly yours,

Chester Pawarski (ch)

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/06/2008 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 12/31/2006 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
STERLING ENGINE CO		1/8 - 1/4 N	G38	241

STATE AND LOCAL RECORDS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, and dated 02/05/2008 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
CHEMCORE, INC	1382 NIAGARA STREET	1/2 - 1 N	47	266
Class Code: Significant threat to the public health or environment - action required.				

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 02/05/2008 has revealed that there are 10 LTANKS sites within approximately 0.5 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 8 HIST LTANKS sites within approximately 0.5 miles of the target property.

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 8 NY Hist Spills sites within approximately 0.125 miles of the target property.

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown
Mixed waste (haz. and radioactive): Unknown
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: Unknown
Furnace exemption: Unknown
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 05/07/1999
Facility name: OLIVER GEAR INC
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Relative: FINDS:
Higher Other Pertinent Environmental Activity Identified at Site

Actual: TRIS (Toxics Release Inventory System) contains information from
617 ft. facilities on the amounts of over 300 listed toxic chemicals that
 these facilities release directly to air, water, land, or that are
 transported off-site.

The NEI (National Emissions Inventory) database contains information
 on stationary and mobile sources that emit criteria air pollutants and
 their precursors, as well as hazardous air pollutants (HAPs).

FIS (New York - Facility Information System) is New York's Department
 of Environmental Conservation (DEC) information system for tracking
 environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource
 Conservation and Recovery Act (RCRA) program through the tracking of
 events and activities related to facilities that generate, transport,
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
 program staff to track the notification, permit, compliance, and
 corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Start DECRemark - 0485364 12/23/04:SAC telecon Paul Meosky - Hodgson Russ. Mr. Meosky reported contamination that was found around the former location of 3 tanks where there was a previous spill and clean up. The spill number was 9504353. 2 tankwere #2 fuel oil and the other tank was a cutting oil. Per Mr. Meosky, the contaminant of concern was cutting oil for Spill Number 9504353 and he believes this time it is the fuel oil. He will send in the analytical results, boring logs, and site map showing the boring locations. Mr. Meosky said for now he would be the contact person. 1/27/05 CALL INTO MR. MEOSKY REQUESTING SUBMISSION OF THE INFORMATION HE INDICATED HE WAS TO HAVE PROVIDED ON 12/23/04. REQUESTED A CALL BACK. 2/22/05RECD THE BORING LOGS FOR TWO BORINGS AND THE ANALYSIS OF SOIL AND GROUNDWATER FROM THESE LOCATIONS. THE SOIL EXCEEDS TAGMS FOR THE SVOC BENZO COMPOUNDS AND THE GROUNDWATER EXCEEDS FOR THE SAME COMPOUNDS. THE SAMPLES WERE COLLECTED FROM A FORMER UST REMOVAL THAT THE DEC MADE INACTIVE. CALL INTO MR. MEOSKY ASKING WHAT CURTIS SCREW PLANS ON DOING. 6/27/05 LETTER REQUESTING INVESTIGATION AND REMEDIATION SENT TO CURTIS SCREW. A RESPONSE IS DUE BY 7/13/05. 7/13/05 PAUL MEOSKY CALLED ANDINDICATED HE WILL REVIEW THE STATUS OF THE SITE AND GET BACK TO ME WITHIN TWO WEEKS. 10/27/05 EVAN CASEY WITH GREAT LAKES ENVIRONMENTAL NOTIFIED THIS OFFICE THAT HE COMPLETED SITE SAMPLING ON SATURDAY AND DIDN'T NOTIFY THIS OFFICE. HE SAID SAMPLES HAD BEEN SUBMITTED TO THE LABORATORY AND RESULTS ARE

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

Start DECRemark - 9875035 Prior to Sept, 2004 data translation this spill Lead
DEC Field was "JDC" 9/18/98: JDC TELECON WITH RALPH LEWSKIW, MIKEN CO AND
DISCUSSED SITE SPILL. HE HAD HIRED A CONTRACTOR TO EVALUATE AND PREVENT
FURTHER SPILLAGE FROM MACHINERY. JDC TELECON WITH MARK LAPUMA, LCS, INC. AT
827-8893, HE HAS DEVELOPED A REMEDIATION PLAN. NO CONTAMINATION WAS FOUND OFF
SITE. OILS HAVE LEAKED FROM OPERATING MACHINERY TO FLOOR AND THROUGH TO
BASEMENT FLOOR WHERE OILS HAVE ACCUMULATED. JDC WILL CONTACT TOM CORBETT AND
ARRANGE FOR SITE VISIT OR REFERRAL. 9/24/98: UNABLE TO CONTACT TOM
CORBETT. CONTACTED MR LAPUMA AND LEFT MESSAGE TO ARRANGE A SITE INSPECTION.
BASED ON INSPECTION AND REMEDIATION PLAN WILL ATTEMPT TO CLOSE FILE. ACCORDING
TO MR LAPUMA, MIKEN WILL BE CLOSING THEIR OPERATION OVER THE NEXT 6 MONTHS.
9/25/98: JDC MET WITH MARK LAPUMA, LCS AND RALPH LESKIW, MIKEN AND INSPECTED
WORK FLOOR AND BASEMENT AREA FOR OIL SPILLAGE. FLOOR FREE OF ANY PRODUCT. SOME
STAINING WAS ON FLOOR BELOW MAIN FLOOR PRESSES. ALL OIL IS SWEEP-UP ON A
REGULAR BASIS AND COLLECTED IN 55 GALLON DRUMS FOR DISPOSAL THROUGH BFI.
BASEMENT FLOOR SHOWED NO INDICATIONS OF CRACKING OR SEEPAGE. BASED ON THESE
FINDINGS, NO FURTHER ACTION WILL BE REQUIRED. 10/2/98: RECEIVED COPY OF
SITE REPORT AND FOUND SATISFACTORY. END DECRemark - 9875035

Remarks: Start CallerRemark - 9875035 MACHINERY LEAKING LUBRICATING OIL. OIL IS SEEPING
THROUGH THE FLOOR TO THE BASEMENT WHERE IT IS POOLED ALL OVER FLOOR. PROBLEM
NOTED DURING DEC INSPECTION. END CallerRemark - 9875035

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: Start DECRemark - 0075331 Prior to Sept, 2004 data translation this spill Lead DEC Field was "RJJ" 08/29/2000: RJJ SITE INVESTIGATION AT 1330...MEET WITH DAVID MEGASON, PLANT MANAGER, AND A GROUP OF WORKERS FROM THE BUFFALO SEWER AUTHORITY...DAVE TOOK US UP TO ON THE ROOF OF RICH PRODUCTS, WHERE ABOUT 50-70 GAL. OF PCB TRANSFORMER OIL SLOWLY LEAKED INTO THEIR SECONDARY CONTAINMENT AREA...THEY FIRST NOTICED THIS ON 8/26/2000, THEY HIRED DRAIN DOCTOR TO CONTAIN THE SPILL, THEY PUT SPEEDI-DRY ALLOVER THE AREA...THEY ALSO WILL BE HIRING AN ENVIRONMENTAL FIRM TO COMPLETE THE CLEAN UP AND DISPOSAL OF THE 243 PPM PCB OIL, SINCE IT IS OVER 50 PPM, IT IS HAZARDOUS...SINCE IT DIDN'T RAIN, IT DOESN'T APPEAR THAT ANY OIL RAN DOWN THE ROOF DRAIN, HOWEVER THEY WILL PUT AN ABSORBANT AROUND THE DRAIN,TO MAKE SURE THAT NO PRODUCT DOES GO DOWN THE DRAIN...THE TRANSFORMER IS OUT-OF-SERVICE AND THEY HAVE ALREADY CONNECTED A NEW ONE TO RUN THEIR COOLING SYSTEM...THEY COVERED THE LEAKING ONE WITH PLASTIC, SO THAT IF IT RAINS, NO OIL WILL BE ABLE TO WASH AWAY...AFTER THEY CLEAN UP THE ROOF AND DRAIN, THEY WILL TAKE SWAB TESTS TO DETERMINE IF ANY PCB'S ARE STILL PRESENT, IF THEY ARE, THEN MORE CLEAN UP WILL HAVE TO BE DONE...DAVE WILL SEND ME ALL THE TEST RESULTS AND THE DISPOSAL RECEIPTS...THE BUFFALO SEWER AUTHORITY WAS SATISFIED WITH THE ACTIONS TAKEN, THEY DO NOT SEE ANY PROBLEMS WITH THE SEWER LINES...I WILL DRAFT AND SEND A 'RESPONSIBLE PARTY NOTIFICATION' LETTER.
08/30/2000: DAVE MEGASON E-MAILED RJJ STATING ME THAT THEY WILL BE USING THE DRAIN DOCTOR FOR THE GENERAL CLEANUP, AND THEN THE CONTAMINATES WILL BE HANDED OFF TO CHEMICAL WASTE MANAGEMENT FOR DISPOSAL...HE ALSO CALLED EPA AND THE EPA REPORT # IS 540365. 09/07/2000:RJJ SITE INVESTIGATION AT 1300...MEET WITH DAVE MEGASON ON THE ROOF...HE GAVE ME THE PCB-IN-WIPES ANALYSIS THAT CHOPRA-LEE DID...OF THE 25 PCB-IN-WIPES TESTED, THE HIGHEST RESULTS WERE 2.36 PPB...THIS

DEC Remarks: 08/29/2000: RJJ SITE INVESTIGATION AT 1330...MEET WITH DAVID MEGASON, PLANT
MANAGER, AND A GROUP OF WORKERS FROM THE BUFFALO SEWER AUTHORITY...DAVE TOOK US
UP TO ON THE ROOF OF RICH PRODUCTS, WHERE ABOUT 50-70 GAL. OF PCB TRANSFORMER
OIL SLOWLY LEAKED INTO THEIR SECONDARY CONTANIMENT AREA...THEY FIRST NOTICED
THIS ON 8/26/2000, THEY HIRED DRAIN DOCTOR TO CONTAIN THE SPILL, THEY PUT
SPEEDI-DRY ALL OVER THE AREA...THEY ALSO WILL BE HIRING AN ENVIRONMENTAL FIRM
TO COMPLETE THE CLEAN UP AND DISPOSAL OF THE 243 PPM PCB OIL, SINCE IT IS OVER
50 PPM, IT IS HAZARDOUS...SINCE IT DIDN T RAIN, IT DOESN T APPEAR THAT ANY OIL
RAN DOWN THE ROOF DRAIN, HOWEVER THEY WILL PUT AN ABSORBANT AROUND THE DRAIN,TO
MAKE SURE THAT NO PRODUCT DOES GO DOWN THE DRAIN...THE TRANSFORMER IS
OUT-OF-SERVICE AND THEY HAVE ALREADY CONNECTED A NEW ONE TO RUN THEIR COOLING
SYSTEM...THEY COVERED THE LEAKING ONE WITH PLASTIC, SO THAT IF IT RAINS, NO OIL
WILL BE ABLE TO WASH AWAY...AFTER THEY CLEAN UP THE ROOF AND DRAIN,THEY WILL

TAKE SWAB TESTS TO DETERMINE IF ANY PCB S ARE STILL PRESENT, IF THEY ARE, THEN MORE CLEAN UP WILL HAVE TO BE DONE...DAVE WILL SEND ME ALL THE TEST RESULTS AND THE DISPOSAL RECEIPTS...THE BUFFALO SEWER AUTHORITY WAS SATISFIED WITH THE ACTIONS TAKEN, THEY DO NOT SEE ANY PROBLEMS WITH THE SEWER LINES...I WILL DRAFT AND SEND A RESPONSIBLE PARTY NOTIFICATION LETTER. 08/30/2000: DAVE MEGASON E-MAILED RJJ STATING ME THAT THEY WILL BE USING THE DRAIN DOCTOR FOR THE GENERAL CLEANUP, AND THEN THE CONTAMINATES WILL BE HANDED OFF TO CHEMICAL WASTE MANAGEMENT FOR DISPOSAL...HE ALSO CALLED EPA AND THE EPA REPORT IS 540365. 09/07/2000: RJJ SITE INVESTIGATION AT 1300...MEET WITH DAVE MEGASON ON THE ROOF...HE GAVE ME THE PCB-IN-WIPES ANALYSIS THAT CHOPRA-LEE DID...OF THE 25 PCB-IN-WIPES TESTED, THE HIGHEST RESULTS WERE 2.36 PPB...THIS WAS BEFORE THEY CLEANED UP THE AREA, THEY WILL RETEST AFTER CLEAN UP...ALSO, THE EAST SIDE DRAIN CAME BACK ON...DAVE ALSO SAID THAT THEY WILL GET A LARGE CRANE TO REMOVE THE CLEANED AND EMPTY TRANSFORMER IN NOVEMBER...I TOLD HIM THAT THIS WOULD BE ACCEPTABLE...THEY PLAN TO HAVE THE TRANSFORMER INCINERATED...DAVE WILL KEEP ME INFORMED OF ANY OTHER ACTIONS. 11/02/2000: RJJ RECEIVED THE ANALYTICAL RESULTS FROM THE TRANSFORMER AREA TAKEN 9/15 AND 10/25...THE PCB LEVELS WERE ALL BELOW OUR ACCEPTABLE LIMITS...THEY WILL REMOVE THE TRANSFORMERS AROUND THANKSGIVING, AND SEND ME ALL CERTIFICATES OF DESTRUCTION. 12/08/2000: RJJ TELECON DAVE MEGASON, HE SAID THAT DUE TO THE STORM, THEY COULDN'T REMOVE THE TRANSFORMERS, BUT THEY WILL AS SOON AS THE SNOW MELTS IN THEIR PARKING LOT...HE WILL CALL ME WHEN THEY DO THIS. 04/24/2001: RJJ RECEIVED THE DISPOSAL RECEIPTS FOR THE TRANSFORMERS WHICH WERE TAKEN TO WASTE MANAGEMENT, INC...NO FURTHER ACTION NEEDED...SPILL CLOSED OUT.

Remark: CALLER SAID THAT THEY HAD A SLOW PCB TRANSFORMER LEAK, ON THEIR ROOF, AND SOME OF THE OIL MIGHT HAVE RAN DOWN THE DRAIN INTO THE STREET SEWER...SPILL HAS BEEN CONTAINED AND BUFFALO SEWER HAS BEEN NOTIFIED.

 Comments:

continued from 03/16/01. The plan is to combine the #2 fuel oil from one tank with the #6 fuel oil from the other to facilitate removal. Tanks will then be drained and properly closed. The BSA has not ruled out future use of these ASTs, though this is very unlikely. A letter is expected from Mr. Boryszak soon. PFK 09/25/01 Telecon w/M. Boryszak - work is commencing. He will keep DEC informed of progress. " 10/31/01 Site visit w/RJ - #6 fuel oil tank empty. Contractor finishing removal of residual oil on tank floor. Walls cleaned. " 11/08/01 Met w/Steve Jasinski (Int.Waste Removal), M.Boryszak. O.K. to close entry hatch & stencil AST #6 as closed. See next page 10/31/00 Both 150k ASTs out of svce. for a few years. Mr. Boryszak believes each tank is approx. 1/2 filled with #6 F.O. He also states that BSA has no plans to reactivate them and will eventually close them permanently. ASTs # 7&8 use AutoStik Jr-4 (interstitial). PFK 02/21/01 Met w/Mr. Boryszak. We both determined that each of the 150k ASTs contain approx. 100,000 gallons of product. Tk.#5 CONTAINS FUEL OIL WHICH IS NOT (#6). IT IS NOW IMMEDIATELY DUE FOR A 10 YR. - INSPECTION. Tank #6 DOES contain #6 fuel oil. Mr. Boryszak asked for letter to summarize what BSA is required to do. PFK

03/16/01 Letter (03/06/01) sent, outlining requirements. Telecon w/ Mr. Boryszak. He is taking bids from contractors. See next page.AST #5 (#2 & #6 fuel oil mixture) to be emptied, cleaned and closed next. BSA will begin soon & update accordingly. PFK 12/17/01 Telecon w/M. Boryszak - AST #5 drained & cleaned. Inspected tank - empty & clean. O.K. to close.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

611 ft.

FUDS Description Details:

The Navy used 1 acre of land at the Naval Industrial Reserve Plant, Sterling Engine Plant, in Buffalo, New York. The building constructed on the site was used for testing marine engines. The buildings on the site are beneficially used by the current owner. There is a vault with three 5,000-gal. tanks in the northern portion of the site. The tanks are no longer in use. The current owner uses the area of the vault (and possibly inside the vault as well) for waste disposal.

FUDS History Details:

On 18 June 1943, the Navy purchased 1.00 acre of unimproved land for

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Problems: An environmental assessment is planned for this Site to be completed in 2008 to determine the nature and extent of potential environmental contamination.
Site Description: The 1318 Niagara Street Site encompasses 0.77-acres in the western portion of the City of Buffalo, Erie County, New York. The Site is located in an urban setting, and is bounded to the east by Niagara Street, to the west by Penn Central Railroad, and beyond by New York State I-190 and the Black Rock Canal. The Site is bordered to the north and south by commercial properties. The Site was utilized as a brewery from before 1909 until 1987. The Site was held by private owners from 1987 to 2004, and is now owned by the City of Buffalo. The City of Buffalo began demolition of the Site buildings in May of 2006. During the demolition activities in January of 2007, two 20,000-gallon underground storage tanks were discovered and excavated from the Site. Chemical analysis of the tank contents indicated the presence of polychlorinated biphenyls (PCBs) at elevated concentrations, as well as other chlorinated solvents. The tank contents were removed and sent off site for disposal. Upon removal of the tanks it was discovered that one of the tanks had leaked. The remains of the demolished Site buildings have been disposed of off-site, and the two empty USTs have been staged on a portion of the Site. The Site is currently inactive, and has been secured with a chain link fence. In July of 2007, the City of Buffalo entered into an Environmental Restoration Program to investigate the Site. The City of Buffalo is currently in the process of entering a State Assistance Contract (SAC) with the New York State Department of Environmental Conservation. Once the SAC is initiated, the City of Buffalo will begin the investigation of the Site for potential environmental

DEC Remarks: 9/3/99 FG SITE INSPECTION. NO ACTIVITY ON SITE. CALL IN TO DOUG REID WITH LCS WHO CALLED IN THE SPILL. 9/7/99 FG SPOKE TO DOUGLAS REID WITH LCS. HE SAID HIS ASSESSMENT IS PART OF A REAL ESTATE TRANSACTION. HE IS WORKING FOR THE BANK. GEOPROBPOINTS WERE PUT IN AT THE FORMER UST LOCATION AND ISLANDS. ODORS WERE PRESENT 0-3 FT AT THE ISLAND AND PETROLEUM WAS PRESENT 10-12 FT AT THE TANK PIT. SOIL IS CLAY EXCEPT FOR THE TANK PIT ISLAND. TIGHT BEDROCK IS UNDERNEATH. THERE IS A FUEL OILUST STILL IN PLACE ON SITE. MR. REID SAID HE WILL NOT SEND THE ASSESSMENT ALONG. 9/7/99 LTR SENT TO MR. WIESMORE REQUESTING REMEDIATION. A RESPONSE IS DUE 9/30/99. 12/13/00 LTR SENT TO MR. WIESMORE REQUESTING A RESPONSE TO THE 9/9/99 LTR BY 12/20/99. 1/31/00 LTR SENT TO MR. WIESMORE REQUESTING REMEDIATION OR SUBMISSION OF A SIGNED RIGHT OF ENTRY BY 2/18/00. 7/11/00 RECEIVED RIGHT OF ENTRY FROM CAROL WIESMORE, PROPERTY OWNER. RECEIVED A COPY OF THE DEED WHICH INDICATES THAT TEXACO WAS THE PREVIOUS OWNER AND OPERATOR. CONTACTED MR. ROGER HADLEY OF TEXACO, 713)752-3162, MANAGER ENVIRONMENTAL PROJECT MANAGEMENT SERVICES, POB 1404, HOUSTON, TEXAS 77251. HE SAID TO SEND HIM THE INFORMATION WE HAVE AND HE WILL SEARCH HIS RECORDS FOR INFORMATION. I TOLD HIM WE HAVE THE SIGNED RIGHT OF ENTRY. HE SAID HE WILL LOOK AT HIS RECORDS AN OURS AND GET BACK TO US ON REMEDIATION. LTR SENT REQUESTING HIS RESPONSE BY 8/2/00. 7/19/00 RECD THE LCS PHASE I/II WHICH SHOWS SOILS AND BEDROCK GROUNDWATER CONTAMINATION. NO ANALYTICAL WAS COMPLETED. COPY OF THE REPORT WAS SENT TO ROGER HADLEY WITH TEXACO. 8/7/00 RECD TEXACO RESPONSE. THEY INDICATED THAT THEY WILL COMPLETE A SITE ASSESSMENT AND EXPECT A WORK PLAN TO BE SUBMITTED BY EARLYSEPTEMBER 2000. 9/21/00 JUDSON POLIKOFF WITH TEXACO CALLED AND SAID THAT MRS. WIESMORE RECEIVED THE RIGHT OF ENTRY BUT HASN T RETURNED IT TO THEM YET. HE SAID TEXACO IS READY TO BEGIN WORK AS SOON AS SHE DOES. 10/20/00 RECD THE SIGNED AGREEMENT WITH TEXACO. CAROL WIESMORE SIGNED IT AND IT NOW NEEDS TEXACO S SIGNATURE. THIS DOCUMENT WAS MAILED TO TEXACO AND THEY WILL SIGN IT AND PROVIDE AN INVESTIGATION PLAN FOR THE SITE. 11/6/00 RECD A LTR FROM TEXACO STATING THAT THEY SIGNED THE AGREEMENT AND RETURNED IT TO THE WIESMORE S. TEXACO WILL PROVIDE A WORK PLAN BY 11/6/00. 12/12/00 FG SPOKE TO DOUG LIDDELL WITH GES. HE SAID THAT HE BEGAN THE SITE

Site Description:

ChemCore, Inc. is a two story, 39,000 sq./ft. warehouse/office building. The building's primary occupant(s) were ChemCore, Inc. which operated a chemical bulk sales operation until going bankrupt in 1998 and Crandall Filling Machine which was a tool making operation for the bottle filling industry until moving its operation in May 1999. The facility has been used for chemical storage and sales since approximately 1920. As part of the bankruptcy agreement ChemCore completed a Phase I, Environmental Assessment to determine the value of the facility as collateral. As a result of the recommendations a Phase II, Limited Site Evaluation was completed which included several soil borings. Toxicity Characteristic Leaching Procedure (TCLP) samples taken from these borings indicated the presence of hazardous waste. The hazardous waste as identified consisted of primarily, tetrachloroethene, 1,1,1-trichloroethane, and trichloroethene. A subsequent Immediate Investigative Work Assignment (IIWA) completed by the Department verified soil contamination at depth under the facility and under parking areas directly to the north and south of the facility. Installation and sampling of monitoring wells has indicated that the groundwater under the facility is also contaminated. Water level measurements from these wells and from nearby Black Rock Channel suggests a hydraulic connection between the two. The site has been referred by DEE to implement an Remedial Investigation / Feasibility Study (RI/FS) under State Superfund. A consultant was selected in January 2001 and the RI/FS is complete. A ROD has been issued that includes complete demolition of the buildings, excavation of the highest contamination areas and a groundwater pump and treatment systems with a five year review. Included in the remedial effort is a pilot test of enhanced bioremediation of groundwater. The remedial design was completed in August 2005. The remedial construction is completed and on-site the pump and treat system is in operation.

Environmental Problems: Contamination has been found in site soils and groundwater, under the building and outside of the building to the north. It has also been indicated that there is a hydraulic connection between the contaminated groundwater and Black Rock Channel. The remedial action has removed the contaminated soil and the on-site groundwater pump and treat system is in operation. This action has eliminated the migration of contaminants from the soil and the pump and treat system will remediate the groundwater over time.

Health Problems Assesment: The site is fenced, thus limiting access. Most of the property is occupied by the building and parking areas cover the remainder of the property. Exposures via drinking water are not expected because nearby residences and businesses are served by public water.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/31/2008	Source: EPA
Date Data Arrived at EDR: 02/04/2008	Telephone: N/A
Date Made Active in Reports: 03/17/2008	Last EDR Contact: 01/28/2008
Number of Days to Update: 42	Next Scheduled EDR Contact: 04/28/2008
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/31/2008	Source: EPA
Date Data Arrived at EDR: 02/08/2008	Telephone: N/A

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 02/19/2008
Number of Days to Update: 56	Next Scheduled EDR Contact: 05/19/2008
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/09/2008	Source: EPA
Date Data Arrived at EDR: 02/05/2008	Telephone: 703-412-9810
Date Made Active in Reports: 02/20/2008	Last EDR Contact: 04/18/2008
Number of Days to Update: 15	Next Scheduled EDR Contact: 06/16/2008
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810

Number of Days to Update: 76	Next Scheduled EDR Contact: 06/16/2008
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/08/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/07/2008	Telephone: 202-564-6023

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008
Date Data Arrived at EDR: 03/06/2008

Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2008

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008
Date Data Arrived at EDR: 03/06/2008
Date Made Active in Reports: 04/18/2008

DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 02/14/2008	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 02/27/2008	Telephone: 202-366-4595
Date Made Active in Reports: 03/20/2008	Last EDR Contact: 02/27/2008
Number of Days to Update: 22	Next Scheduled EDR Contact: 05/26/2008
	Data Release Frequency: Varies

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 09/01/2007

Data Release Frequency: Quarterly

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 01/03/2008

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/19/2006

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

STATE AND LOCAL RECORDS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 02/05/2008	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 03/13/2008	Telephone: 518-402-9622
Date Made Active in Reports: 04/09/2008	Last EDR Contact: 03/13/2008
Number of Days to Update: 27	Next Scheduled EDR Contact: 06/09/2008
	Data Release Frequency: Annually

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

REGULATORY INFORMATION

April 23, 2008

FOIA Coordinator
NYSDEC – Region 9
270 Michigan Ave
Buffalo, NY 14203-2915

Re: Freedom of Information Law (FOIL) Request
1095 Niagara Street
Buffalo, New York

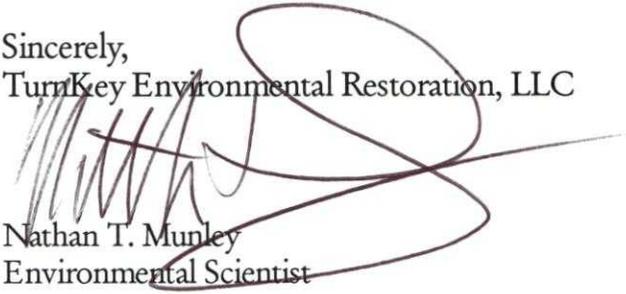

To Whom It May Concern:

Our company is currently performing a Phase I Environmental Site Assessment (ESA) for the above referenced property. The property was formerly the Keystone Chromium Corp. Site, at the corner of Niagara and Albany Streets (SBL No. 99.42-1-22). The Site is a known historical metal plating operation.

We are requesting any and all information from all departments regarding any complaints, investigations, or citations against the subject property that have been initiated or recorded by NYSDEC.

Please inform us if any such files exist and when they may be reviewed. We appreciate your assistance in this matter.

Sincerely,
TurnKey Environmental Restoration, LLC

Nathan T. Munley
Environmental Scientist

APR 28 2008

Alexander B. Grannis
Commissioner

April 25, 2008

Mr. Nathan T. Munley
TurnKey Environmental Restoration LLC
726 Exchange Street, Suite 624
Buffalo, NY 14210

Dear Mr. Munley:

This letter acknowledges receipt of your request(s) dated April 23, 2008 for access to records relative to:

Former Keystone Chromium Corp., 1095 Niagara Street, Buffalo

Your request(s) has been forwarded to the appropriate individual program(s) within DEC.

If your request is related to spill information, you can access information immediately through DEC's online "Spills Incidents' Database" at www.dec.ny.gov/chemical/8437.html. If you locate a spill number from the database, please reference the spill number when requesting information.

If your request is related to bulk storage tank information, you can access information immediately through DEC's online search engine for bulk storage programs (petroleum and chemical) at www.dec.ny.gov/cfm/xtapps/derfoil/. If you locate a petroleum or bulk storage registration number from the database, please reference the number when requesting information.

Following the necessary file search, you will be contacted as to whether such records are in our custody. If all records are not provided because the records are excepted from disclosure, you will be notified of the reasons and of your right to appeal the determination.

Due to the large volume of requests we receive, you may expect a reply by May 23, 2008.

Sincerely,

Laurie A. Knight
Principal Clerk

APPENDIX J

USER PROVIDED INFORMATION

No Response Received

APPENDIX K

LIMITATIONS

Limitations

This Phase I Environmental Site Assessment (ESA) is based on current and historical information reviewed by TurnKey and TurnKey's site inspection. This report is not to be considered as an environmental audit of the subject property or a complete environmental investigation of the subject property.

The purpose of this assessment is not to proclaim a property is devoid of environmental impact but rather to identify recognized environmental conditions (RECs). RECs are defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to the public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions."

This Phase I ESA, makes no warranties nor implies any liability regarding:

- 1) Site specific practices and/or disposal methods of the past or future owners.
- 2) Adjacent property owners, their environmental practices and/or impact of such properties and practices on the subject property other than observed from the subject property.
- 3) Unreported spills.
- 4) Practices, waste disposal, environmental concerns and/or modifications to waste site indexes after the date on this report.
- 5) Site groundwater or soil conditions.
- 6) Accuracy or completeness of information supplied to TurnKey by others.
- 7) Environmental conditions in areas that were not practically or safely accessible.
- 8) Accuracy of previous studies (if any) provided to TurnKey.

This report is also subject to any and all limitations defined within ASTM E1527-05. This includes, but is not limited to, the limitation that this report is intended to identify

environmental conditions at a specific time and the report is only valid for a period of six months from the date of issuance.

The principles defined within ASTM E1527-05, and followed within this study, include the following.

- This practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property.
- All appropriate inquiry does not mean an exhaustive assessment of a clean property. One of the purposes of this practice is to identify a balance between limiting costs/time and the reduction of uncertainty about unknown conditions.
- The level of inquiry is variable and depends on the type of property, risk level of the user and information developed in the course of the inquiry.
- Subsequent environmental assessments should not be used as standards to evaluate the appropriateness of prior inquiries based on hindsight, new information or new techniques.

APPENDIX L

USER RESPONSIBILITIES

User Responsibilities

The following information is the responsibility of the user and not of the environmental professional. This information may be provided by the user to the environmental professional for use in the final opinion of the all appropriate inquiry. If the information is not provided by the user, the environmental professional's ability to render such an opinion may be hindered and identified as a data gap.

- Searches for environmental cleanup liens against the subject property that are filed or recorded under any federal, tribal, state or local law, as required by 40 CFR section 312.25.
- Assessments of any specialized knowledge or experience on the part of the landowner, as required by 40 CFR section 312.28.
- An assessment of the relationship of the purchase price to the fair market value of the subject property, if the property was not contaminated, as required by 40 CFR 312.29.
- An assessment of commonly known or reasonably ascertainable information about the subject property, as required by 40 CFR Section 312.30.

APPENDIX M

USER PROTECTIONS

User Protections

Persons claiming the liability protections under CERCLA must meet the statutory requirements of one of the following landowner liability protections. [It should be noted that the user must also satisfy certain continuing obligations outside the scope of this Phase I Environmental Assessment, as required by CERCLA].

- The innocent landowner defense pursuant to CERCLA Sections 101(35) and 107(b)(3).
- The bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 107(r).
- The contiguous property owner liability protection pursuant to CERCLA Section 107(q).
