

**(Fact Sheet Begins Next)**

## **Act Now to Continue Receiving Information About This Site!**

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

**You must sign up for the DER email listserv:**

<https://dec.ny.gov/environmental-protection/site-cleanup/regional-remediation-project-information/environmental-cleanup-email-newsletters>

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

### **Why You Should Go “Paperless”:**

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

**If “paperless” is not an option for you**, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

# 147 West Tupper Street Site

Department of  
Environmental  
Conservation

Brownfield Cleanup Program

Site No. C915389

Buffalo, Erie County

January 2026

## NYSDEC Certifies Cleanup Requirements Achieved at Brownfield Site

The New York State Department of Environmental Conservation (NYSDEC) has determined that the cleanup requirements to address contamination related to the 147 West Tupper Street site ("site") located at 147 West Tupper Street in Buffalo, Erie County, under New York State's Brownfield Cleanup Program have been met. Please see the map for the site location.

The cleanup activities were performed by 147 West Tupper LLC ("applicant") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). NYSDEC has approved a Final Engineering Report (FER) and issued a Certificate of Completion (COC) for the site.

- Access the approved FER, Notice of COC and other project documents online through the DECinfo Locator: <https://extapps.dec.ny.gov/data/DecDocs/C915389/>.
- Documents also are available at the location(s) identified under "Where to Find Information."

## Completion of the Project

The following activities have been completed to achieve the cleanup action objectives:

- Building Demolition – on-site buildings were demolished prior to the start of remedial excavation activities.
- Excavation - Excavation and off-site disposal of approximately 7,850 tons of soil impacted with semi-volatile organic compounds (SVOCs) and metals. Approximately 360 tons of approved clean fill was brought in to replace some of the excavated soil and establish the design grades at the site.
- Post excavation sampling – sampling of soil was performed after the excavation to confirm that the cleanup met standards

## Final Engineering Report Approved

NYSDEC has approved the FER, which:

- 1) Describes the cleanup activities completed.
- 2) Certifies that cleanup requirements have been achieved for the site.

## Next Steps

With its receipt of a COC, the applicant is eligible to redevelop the site. In addition, the applicant is eligible for tax credits to offset the costs of performing cleanup activities and for redevelopment of the site. A COC may be modified or revoked if, for example, there is a failure to comply with the terms of the order or agreement with NYSDEC.

## Site Description

The site is located at 147 West Tupper Street in the City of Buffalo, Erie County. It is about 0.837 acres and is located in a highly-developed urban area and is bordered by Trinity Place and residential properties to the north, Elmwood Avenue to the east, West Tupper Street to the south, and residential

properties to the west. Historic operations at the site included an auto repair facility, laundry facilities, light manufacturing, and residences. The primary contaminants of concern found on site were SVOCs and metals which have all been cleaned up under the Brownfield Cleanup Program.

The site is currently being redeveloped with a mixed-use building which will have commercial spaces on the ground floor and apartments on the upper floors. The site has been remediated to meet unrestricted use criteria.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C915389) at:

<https://appfactory.dec.ny.gov/DERExternalSearch/ERDSearch>

## **Brownfield Cleanup Program**

New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://dec.ny.gov/environmental-protection/site-cleanup/brownfield-and-state-superfund-programs/brownfield>

## **Stay Informed with DEC Delivers**

**We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.**

Sign up to receive site updates by email:
