SVOC	Semi-Volatile Organic Compound
TCE	Trichloroethene
USCO	Unrestricted Soil Cleanup Objective
USEPA	United States Environmental Protection Agency
VOC	Volatile Organic Compound

Certification

I, Thomas H. Forbes, am currently a registered professional engineer licensed by the State of New York, I had primary direct responsibility for implementation of the remedial program activities, and I certify that the Remedial Action Work Plan was implemented and that all construction activities were completed in substantial conformance with the Department-approved Remedial Action Work Plan.

I certify that the data submitted to the Department with this December 2025 Final Engineering Report for the 147 West Tupper Street Site demonstrates that the remediation requirements set forth in the Remedial Action Work Plan and in all applicable statutes and regulations have been or will be achieved in accordance with the time frames, if any, established in for the remedy.

I certify that all documents generated in support of this report have been submitted in accordance with the DER's electronic submission protocols and have been accepted by the Department.

I certify that all data generated in support of this report have been submitted in accordance with the Department's electronic data deliverable and have been accepted by the Department.

I certify that all information and statements in this certification form are true. I understand that a false statement made herein is punishable as a Class "A" misdemeanor, pursuant to Section 210.45 of the Penal Law. I, Thomas H. Forbes, of Roux Environmental Engineering and Geology, D.P.C., 2558 Hamburg Turnpike, Suite 300, Buffalo, NY 14218, am certifying as Owner's Designated Site Representative for the site.

It is a violation of Article 145 of New York State Education Law for any person to alter this document in any way without the express written verification of adoption by any New York State licensed engineer in accordance with Section 7209(2), Article 145, New York State Education Law.

1. Background and Site Description

147 West Tupper LLC entered into a Brownfield Cleanup Agreement (BCA) with the New York State Department of Environmental Conservation (NYSDEC) in November 2022, to investigate and remediate eight tax parcels totaling 0.84-acres located in Buffalo, New York, referred to as the 147 West Tupper Street Site (Site No. C915389).

The Site is located in the County of Erie, New York and consists of the following parcels:

Parcel Address	Tax ID No.
42 Trinity Place	111.29-4-22
44 Trinity Place	111.29-4-22/A
147 West Tupper Street	111.29-4-23
149 West Tupper Street	111.29-4-21.1
157 West Tupper Street	111.29-4-26
159 West Tupper Street	111.29-4-27
161 West Tupper Street	111.29-4-28
167 West Tupper Street	111.29-4-29

The Site is located west of Elmwood Avenue between Trinity Place (north) and West Tupper (south) in a highly developed residential area of the City of Buffalo. (see Figures 1 and 2). The Site was remediated to a 6NYCRR Track 1 Unrestricted Use cleanup, and will be used for mixed-use, with commercial spaces on the ground floors and apartment units above. A Site survey, metes and bounds description, the executed BCA, and BCA Amendments No. 1 and No. 2 are included in Appendix A.

1.2 Pre-BCP Previous Investigations/Remedial Measures

The following investigations and remedial measures were completed prior to the Site entering the BCP. This work was incorporated into the Brownfield Cleanup Program (BCP) Remedial Investigation/Alternatives Analysis (RI/AA) Report. Historic and remedial investigation locations and sample results are provided on Figure 3.

1.2.1 January 2022 – Phase I Environmental Site Assessment

TurnKey Environmental Restoration, LLC (TurnKey, now Roux) completed a Phase I Environmental Site Assessment (ESA) for 149 and 161 West Tupper Street and 42 and 44 Trinity Place, Buffalo, New York on January 26, 2022 (date of Site inspection).

Below is a summary of the Recognized Environmental Concerns (RECs) as they relate to 149 and 161 West Tupper Street and 42 and 44 Trinity Place:

- Historic operations (automotive repair, dental equipment service/manufacturing, factory, etc.) along with the reasonably anticipated use of petroleum and/or solvents are considered RECs as subsurface conditions are unknown.
- Floor drains and the four inactive inground lifts noted within historic automotive repair areas of Building 1 are considered RECs due to the potential for environmental impacts to the environment.
- The potential for miscellaneous urban fill materials exists on-site as former buildings were noted on-site. The presence of urban fill material from unknown sources is considered a REC due to the potential for impacts.

1.2.2 May 2022 – Phase II Environmental Investigation Report

TurnKey (now Roux) completed a Phase II Environmental Investigation (Phase II) on the Site in May 2022. Ten soil borings (designated SB-1 through SB-10) and six hand augers (designated as HC-1 through HC-6) were completed across the Site to characterize and analyze on-site soil/fill. Four soil borings were converted into temporary one-inch diameter monitoring wells (designated as SB-1/1W, SB-3/3W, SB-6/6W, and SB-7/7W) to characterize and analyze on-site groundwater conditions. Findings of the Phase II are detailed below:

- The Site has a history of automotive repair, dental instrument service/manufacturing, and factory operations. TurnKey noted the presence of floor drains and four inactive in-ground lifts within the vacant automotive repair building.
- The drilling and hand auger investigation identified widespread fill materials across the Site with field evidence of impact and/or analytical concerns, which are further detailed below.
- The highest photoionization detector (PID) reading identified during the work was 7.8 parts per million (ppm) at SB-7 (5-6 feet below ground surface, fbgs) completed proximate to an inground lift within the vacant automotive repair building. Black staining and petroleum-like odors were also noted at this location.
- Laboratory analytical results revealed the presence of soil/fill across the Site that is impacted by polycyclic aromatic hydrocarbons (PAHs) and/or metals with concentrations exceeding 6 NYCRR Part 375 Restricted-Residential Soil Cleanup Objectives (RRSCOs).
- Chlorinated volatile organic compounds (cVOCs) including cis-1,2-dichloroethene (cis-1,2-DCE), tetrachloroethene (PCE), and trichloroethene (TCE) were identified at concentrations exceeding their respective TOGS 1.1.1 Class GA Groundwater Quality Standards/Guidance Values (GWQS/GV) at SB-7/7W, which is located within the footprint of the vacant automotive repair building. No groundwater volatile organic compound (VOC) exceedances were identified in the three additional groundwater samples collected from the Site indicating that groundwater VOC impacts are likely localized.

1.3 BCP Remedial Investigation

RI activities were completed from December 2022 through July 2024. Results of the completed RI activities are summarized below.

Remedial Investigation

RI activities completed at the Site included:

- Collection of eight (8) surface soil/fill samples (SS-1 through SS-8);
- Advancement of 12 test pits (TP-1 through TP-12) ranging between 5 fbgs and 15 fbgs;

- Advancement of seven (7) soil borings for the installation of ground water monitoring wells (MW-1 through MW-7) to a depth of 20 fbgs;
- Advancement of one (1) interior hand-core;
- Eight (8) soil vapor samples (SV-1 through SV-8) were collected, and one ambient outdoor air sample was collected concurrent with the soil vapor samples (OA-1); and,
- Four (4) sub-slab vapor samples (SSV-1 through SSV-4) were collected, paired with four (4) interior ambient air samples (IA-1 through IA-4), and two outdoor ambient air samples were collected concurrent with the sub-slab and indoor air samples (OA-2 and OA-3).

Results of the RI as provided in the RI/AA report are summarized as follows:

Surface Soil/Fill

- Surface soil/fill is impacted by individual semi-volatile organic compounds (SVOCs), specifically PAHs, with concentrations exceeding Unrestricted SCOs (USCOs) and RRSCOs at five (5) of eight (8) surface soil samples. Arsenic, lead, manganese, and mercury were detected in surface soils at concentrations above its RRSCOs. Chromium, copper, nickel, and zinc were also detected at concentrations above USCOs. Certain pesticides and per- and polyfluoroalkyl substances (PFAS) were detected above their respective USCOs/unrestricted guidance values. No surface soil samples contained VOCs, polychlorinated biphenyls (PCBs), or herbicides at concentrations above laboratory detection limits.

Subsurface Soil/Fill:

- No VOCs were detected at concentrations exceeding RRSCOs in subsurface soil samples from the RI and Phase II activities. Acetone was detected slightly above its respective USCO at MW-3.
- One or more individual SVOCs were detected exceeding USCOs and/or RRSCOs at four (4) of the twenty (20) RI subsurface soil sample locations (MW-6, TP-5, TP-7, TP-8) and six (6) of the fifteen (15) Phase II subsurface soil sample locations (SB-1, SB-3, SB-4, SB-6, SB-10 and HC-1). The highest total PAH concentration, 303.5 mg/kg, was identified at SB-10.
- Four metals were detected in subsurface soil samples at concentrations above RRSCOs from the RI and Phase II including arsenic, barium, lead and mercury. Cadmium, chromium, copper, and zinc were detected exceeding USCOs.
- PCBs were not detected at concentrations above laboratory detection limits.
- No pesticides were detected at concentrations above RRSCOs. One or more individual pesticides were detected at estimated concentrations above their respective USCOs at RI MW-2 and RI TP-8.
- Herbicides were not detected at concentrations above laboratory detection limits.
- Perfluorooctanoic acid (PFOA) was not detected at concentrations above its guidance value for unrestricted use. Perfluorooctanesulfonic acid (PFOS) was reported at RI TP-8 above its guidance value for unrestricted use.

Groundwater

- VOCs were detected above GWQS/GV at one Phase II location, SB-7W. However, no VOCs were detected above GWQS/GV during the RI. Pesticides were detected above GWQS/GV at MW-6 and PFOA was detected above its GWQS/GV at MW-3 and MW-6. Naturally occurring metals were detected above GWQS/GV at all sample locations. SVOCs, 1,4-dioxane, and herbicides were not detected above GWQS/GV at any location.

Soil Vapor

- Thirty-seven individual VOCs were detected in soil vapor/outdoor air samples collected during the RI. New York State does not currently have promulgated guidance values for soil vapor air sampling results. Generally, low-level concentrations of VOCs were observed in the soil vapor and outdoor air samples. Slightly elevated concentrations of n-butane, n-heptane, n-hexane, and toluene were detected at SB-2, SV-3, SV-4, SV-5, and SV-7.

Sub-Slab Vapor

- Sub-slab vapor and indoor air analytical results in comparison to the New York State Department of Health (NYSDOH) Decision Matrices indicate "No Further Action (NFA)".

Alternatives Analysis

An Alternatives Analysis was completed to evaluate potential remedial alternatives that satisfy site-specific remedial action objectives (RAOs). Based on that analysis, the selected remedy was a Track 1 Unrestricted Use Soil Cleanup. This remedy is fully protective of human health and the environment and fully satisfies the RAOs for the Site. Therefore, this alternative was the recommended final remedial approach for the Site.

Amended Remedial Investigation

An amendment (BCP Amendment #2, see Appendix A) was made to the BCP application to include the addition of the 167 West Tupper Street parcel to the existing BCP Site C915389 and was agreed to by the Department on September 12, 2024. During the month of July 2024, RI activities completed at the additional parcel included:

- Advancement and collection of three (3) exterior hand-auguring samples (HA-1 through HA-3).

Results of the hand-auguring samples are summarized below:

Subsurface Soil/Fill:

- One or more individual PAHs were detected exceeding RRSCOs at all three (3) of the BCP amendment subsurface soil sample locations (HA-1, HA-2, and HA-3). Benzo(b)fluoranthene was in exceedance present at all three HA locations; Benzo(a)anthracene and Indeno(1,2,3-cd)pyrene were found in exceedance at HA-2 and HA-3; HA-2 had an exceedance of Benzo(a)pyrene.
- Two (2) metals were detected in subsurface soil samples at concentrations above RRSCOs from the BCP amendment subsurface soil sample locations including lead (at HA-1 through HA-3) and mercury (at HA-1 and HA-2).

2. Summary of Site Remedy

2.1 Remedial Action Objectives

Based on the results of the Remedial Investigation, the following RAOs were identified for this site.

2.1.1 Groundwater RAOs

RAOs for Public Health Protection

- Prevent ingestion of groundwater with contaminant levels exceeding drinking water standards.

RAOs for Environmental Protection

- Restore ground water aquifer to pre-disposal/pre-release conditions, to the extent practicable.
- Remove the source of ground or surface water contamination.

2.1.2 Soil RAOs

RAOs for Public Health Protection

- Prevent ingestion/direct contact with contaminated soil.
- Prevent inhalation of or exposure from contaminants volatilizing from contaminants in soil.

2.2 Description of Selected Remedy

The Site was remediated in accordance with the remedy selected by the NYSDEC in the Decision Document (DD) dated January 2024.

The factors considered during the selection of the remedy are those listed in 6NYCRR 375-1.8. The following are the components of the selected remedy:

1. Remedial Design: A remedial design program will be implemented to provide the details necessary for the construction, operation, optimization, maintenance, and monitoring of the remedial program. Green remediation principles and techniques will be implemented to the extent feasible in the design, implementation, and site management of the remedy as per DER-31. The major green remediation components are as follows:

    - Considering the environmental impacts of treatment technologies and remedy stewardship over the long term;
    - Reducing direct and indirect greenhouse gases and other emissions;
    - Increasing energy efficiency and minimizing use of non-renewable energy;
    - Conserving and efficiently managing resources and materials;
    - Reducing waste, increasing recycling and increasing reuse of materials which would otherwise be considered a waste;
    - Maximizing habitat value and creating habitat when possible;
    - Fostering green and healthy communities and working landscapes which balance ecological, economic and social goals;
    - Integrating the remedy with the end use where possible and encouraging green and sustainable re-development; and

- Additionally, to incorporate green remediation principles and techniques to the extent feasible in the future development at this site, any future on-site buildings shall be constructed, at a minimum, to meet the 2020 Energy Conservation Construction Code of New York (or most recent edition) to improve energy efficiency as an element of construction.

As part of the remedial program, to evaluate the remedy with respect to green and sustainable remediation principles, an environmental footprint analysis was completed. The environmental footprint analysis was completed using an accepted environmental footprint analysis calculator such as SEFA (Spreadsheets for Environmental Footprint Analysis, USEPA), SiteWise™ (available in the Sustainable Remediation Forum [SURF] library) or similar Department accepted tool. Water consumption, greenhouse gas emissions, renewable and non-renewable energy use, waste reduction and material use will be estimated, and goals for the project related to these green and sustainable remediation metrics, as well as for minimizing community impacts, protecting habitats and natural and cultural resources, and promoting environmental justice, was incorporated into the remedial program, as appropriate. The project included detailed requirements to achieve the green and sustainable remediation goals. Further, progress with respect to green and sustainable remediation metrics were tracked during implementation of the remedial action and reported in this Final Engineering Report (FER), including a comparison to the goals established during the remedial program.

Additionally, the remedial program included a climate change vulnerability assessment, that evaluated the impact of climate change on the project site and the proposed remedy. Potential vulnerabilities associated with extreme weather events (e.g., hurricanes, lightning, heat stress and drought), flooding, and sea level rise were identified, and the remedial program incorporated measures to minimize the impact of climate change on potential identified vulnerabilities.

2. Excavation: The existing on-site buildings will be demolished and materials which cannot be beneficially reused on-site will be taken off-site for proper disposal in order to implement the remedy. Excavation and off-site disposal of all on-site soils which exceed unrestricted SCOs, as defined by 6 NYCRR Part 375-6.8, or soil that creates a nuisance condition, as defined in Commissioner Policy CP-51 Section G, will be completed. Approximately 12,100 tons of soil meeting these criteria will be excavated and transported off-site for disposal. Collection and analysis of confirmation samples at the remedial excavation extents will be used to verify that SCOs for the site have been achieved. If confirmation sampling indicates that SCOs were not achieved at the stated remedial extent, further remedial excavation may be necessary.

   To ensure proper handling and disposal of excavated material, waste characterization sampling will be completed for all identified contaminated site material. Waste characterization sampling will be performed exclusively for the purposes of off-site disposal in a manner suitable to receiving facilities and in conformance with applicable laws, rules, and regulations.

   Clean fill meeting the requirements of 6 NYCRR Part 375-6.7(d) will be brought in as needed to replace the excavated soil and establish the designed grades at the site.

3. Building 1 Investigation: Further investigation and remediation (if necessary) beneath Building 1 will be completed after it is demolished, or as the subsurface is otherwise made accessible. The nature and extent of contamination in areas where access was previously limited or unavailable will be immediately and thoroughly investigated pursuant to the plan approved by the Department.

3. IRMs, Operable Units, & Remedial Contracts

The BCP remedy for this site was performed as a single project, and no interim remedial measures, operable units or separate construction contracts were performed.

4. Description of Remedial Actions Performed

Remedial activities completed at the Site were conducted in accordance with the NYSDEC-approved Remedial Action Work Plan (RAWP) for the 147 West Tupper Street Site (Revised May 2024). All deviations from the RAWP are noted below in Section 4.8.

4.1 Governing Documents

4.1.1 Site Specific Health & Safety Plan (HASP)

A Site-specific Health and Safety Plan (HASP) was included in Appendix B of the RAWP. All remedial work performed under this Remedial Action was in full compliance with governmental requirements, including Site and worker safety requirements mandated by Federal OSHA.

The HASP was complied with for all remedial and invasive work performed at the Site.

4.1.2 Quality Assurance Project Plan (QAPP)

The QAPP describes the specific policies, objectives, organization, functional activities and quality assurance/ quality control activities designed to achieve the project data quality objectives. The QAPP was included as part of the Remedial Investigation Work Plan (RIWP) approved by the NYSDEC.

4.1.3 Master Erosion Control Plan (MECP)

A Master Erosion Control Plan (MECP) was included in Appendix E of the RAWP. The MECP described the procedures for managing soi/fill and incorporated the NYSDEC NYS Standards and Specifications for Erosion and Sediment Control. The MECP was complied with during remedial activities performed at the Site.

4.1.4 Community Air Monitoring Plan (CAMP)

Real-time community air monitoring was performed during remedial activities at the Site. A Community Air Monitoring Plan (CAMP) was included in Appendix D of the RAWP. Particulate monitoring was performed during remedial activities in accordance with this plan. This CAMP is consistent with the requirements for community air monitoring at remediation sites as established by the NYSDOH and NYSDEC. Accordingly, it follows procedures and practices outlined under NYSDEC's DER-10 Appendix 1A (NYSDOH's Generic Community Air Monitoring Plan) and Appendix 1B (Fugitive Dust and Particulate Monitoring).

CAMP results are discussed in Section 4.2.5 below. CAMP data is included in Appendix B.

4.1.5 Contractors Site Operations Plans (SOPs)

The Remediation Engineer reviewed all plans and submittals for this remedial project (i.e. those listed above plus contractor and subcontractor submittals) and confirmed that they were in compliance with the RAWP. All remedial documents were submitted to NYSDEC and NYSDOH in a timely manner and prior to the start of work.

4.1.6 Community Participation Plan

NYSDEC has coordinated and led community relations throughout the course of the project. Roux has supported the NYSDEC's community relation activities, as necessary. An approved Citizen Participation (CP) Plan was prepared by Roux and is available for public review at the NYSDEC Region 9 office and the Buffalo and Erie County Public Library, the designated document repository.

As required for BCP sites, copies of the BCP application, RI Work Plan, including the HASP and CAMP, CP Plan, RI/AA Report, and RAWP were provided to the designated document repository for public review.

Public Notice and Fact Sheets were prepared by the Department, and mailed, as requested, and distributed via the NYSDEC email listserv, in accordance with the Department's approved Citizen Participation distribution list. A summary of the project's fact sheets is presented below. Copies of the fact sheets issued to date are provided in Appendix C.

- August 2022 – Public Notice for Brownfield Cleanup Program application and Draft Remedial Investigation Work Plan. Written comments were accepted from August 26, 2022 until September 23, 2022. No public comments were received.
- November 2023 – Public Notice for RI/AA Report. Written comments were accepted from November 1, 2023 through December 15, 2023. No public comments were received.

4.2 Remedial Program Elements

4.2.1 Contractors and Consultants

- Roux served as the Engineer of Record.
- Roux inspected the remedial work as completed by the contractors, corresponded with the NYSDEC, and collected samples for analysis.
- Empire Building Diagnostics (EBD) completed the onsite building demolition and asbestos abatement.
- EBD provided transportation services of the asbestos and construction & demolition (C&D) materials.
- EBD provided transportation services of the recycled concrete and brick materials.
- Swift River Associates, Inc. was utilized for recycling of concrete and brick materials associated with the building demolition.
- Modern Landfill, Inc. was utilized for disposal of asbestos containing materials (ACM) and building demolition waste.
- Roux completed remedial excavations.
- Pariso Logistics (Pariso) and Roux Associates, Inc. (Roux) provided contaminated hauling services.
- Allied Waste Niagara Falls Landfill LLC (Allied) was utilized for disposal of non-hazardous soil/fill.
- Kulback's completed backfill material import.
- County Line Stone provided gravel and stone backfill materials.
- Environmental Services Group (ESG) provided transportation and American Recyclers Company (ARC) provided disposal services for drummed oil waste and purge water.
- Pace Analytical provided laboratory analytical services.
- Data Validation Services reviewed and validated analytical data packages.

4.2.2 Site Preparation

Regular progress meetings/calls/emails took place throughout the project from October 2024 through April 2025.

Prior to excavation activities, underground utilities were marked out; waste disposal facilities' disposal applications were submitted and approved; transportation by NYSDEC licensed haulers was arranged; and construction equipment was mobilized to the Site. Pre-characterization and waste profile approvals were completed to allow for direct loading and off-site transportation of impacted soil/fill.

Documentation of agency approvals, including the DD, RAWP, import materials requests, export materials requests, and discharge permits are included in Appendix D.

4.2.3 General Site Controls

A 6-foot high chain link fence was installed around the perimeter of the 147 West Tupper Street site. Concrete jersey barriers were also installed along Elmwood Avenue and West Tupper Street to provide pedestrian traffic lanes. A gate was installed on the West Tupper Street side of the Site to maintain one point of ingress/egress from the Site.

4.2.4 Nuisance Controls

During excavation and off-site transportation activities, inspection and frequent cleaning of the exit/entrance to the site and adjacent roadways was completed. Additionally, water was used to control dust on-Site, as needed.

4.2.5 CAMP Results

CAMP monitoring activities were completed during building demolition and intrusive activities, in accordance with the approved air monitoring plan. Three CAMP stations were set up during remedial activities, one each at the upwind and downwind locations, and one in front of the school adjacent to the Site.

There were occasional equipment malfunctions in individual CAMP stations during remedial activities that led to the temporary shut-down of the particulate and/or organic vapor meter, resulting in a failure to record or recover data. Monitoring results generally conformed to the Community Air Monitoring perimeter particulate requirement (i.e., <150 ug/m^3) and the organic vapor requirement (i.e., <5 ppm) during Remedial Activities, with the following exceptions:

- On 12/13/2024, 12/17/2024, 12/18/2024, 12/20/2024, 12/23/2024, and 1/28/2025 there was a device malfunction and only VOC measurements were collected from CAMP station #5.
- On 1/29/2025, 1/30/2025, 1/31/2025, 2/3/2025, and 2/4/2025 there was a device malfunction and only VOC measurements were collected from CAMP station #7.
- On 1/16/2025 and 1/27/2025 there was a device malfunction and only VOC measurements were collected from CAMP station #8.
- On 11/11/2024 and 11/26/2024 a brief spike in dust particulates occurred at CAMP station #8 due to demolition related activities occurring on-site.
- On 4/2/2025 there was a device malfunction and only dust measurements were collected from CAMP station #5.

However, at the time of these issues, no exceedances were recorded on the remaining CAMP stations, no olfactory concerns were observed, and no visible dust was noted to be leaving the Site on these dates. In the event of an equipment malfunction, steps were taken to troubleshoot the cause of the incident to ensure future functionality of the CAMP station. Copies of all field data sheets relating to the CAMP are provided in electronic format in Appendix B.

4.2.6 Reporting

NYSDEC, 147 West Tupper LLC, and Roux maintained frequent and regular communications throughout the entire remedial project, including on-Site meetings and electronic and telephone correspondence regarding cleanup progress.

Daily field logs and a digital photo log were completed documenting all remedial activities. Weekly Progress Reports were submitted to the NYSDEC during remedial activities.

Copies of Field Activity Daily Logs (FADLs) are included in electronic format in Appendix E.

The digital photo log is included in electronic format in Appendix F.

4.3 Contaminated Materials Removal

The 147 West Tupper Street Site was remediated to a 6NYCRR Track 1 Unrestricted Use cleanup. Materials removed from the site included: concrete and brick, ACMs, C&D debris, tires, inground lifts, non-hazardous impacted soil/fill, RI purge water, and waste oil drums. Table 1 shows the quantities of material removed from the site and the disposal/recycling locations. Figures 4 and 5 show the soil removal areas, inground lift locations, excavation activities extents, and end-point sample locations. Tables 2 and 3 summarize end-point confirmatory sample results compared to Track 1 Unrestricted soil cleanup objectives.

Disposal documents are provided electronically in Appendix G, including disposal facility applications and approvals in in Appendix G1, disposal load summaries in Appendix G2, and disposal manifests, bills of lading, and/or scale receipts are included in Appendix G3.

4.3.1 Building Demolition

On-Site buildings were demolished prior to the start of remedial excavation activities. Where necessary, buildings were abated of asbestos-containing materials. EBD performed the abatement and building demolition. ACM and C&D materials were transported by EBD to Modern Landfill, Inc. in Model City New York. Recyclable demolition materials including brick, asphalt, concrete, and metal were transported off-site to Metallico Buffalo, Swift River Associates, Inc. or Geiter Done of WNY, Inc., which are registered recycling facilities.

Table 1 shows the quantities of material removed from the site and the disposal/recycling locations. Disposal facility documentation is included in Appendix G1; load summaries are included in Appendix G2; and manifests and/or bills of lading are included in electronic format in Appendix G3.

4.3.2 Remedial Excavation

Remedial excavations were completed between January 15th and April 2, 2025. A total of 7,853.63 tons of non-hazardous impacted soil-fill was excavated by Roux and transported off-site under contract by Pariso

and Roux to Allied Waste Niagara Falls Landfill in Niagara Falls, New York. Concrete foundation removed were transported by Roux to Iron City in Buffalo, NY for recycling (see Table 1).

Remedial excavation depths ranged from approximately 2 fbgs in the western portion of the Site to approximately 9 fbgs in the eastern portion of the Site. Excavation extents, depths are shown on Figure 4. Post-excavation confirmatory sample locations are shown on Figure 5.

A small area of soils was unable to be excavated due to utility poles and was left in-place until the pole was removed at a later date. The utility pole was removed on 4/2/2025 and the remaining soils were excavated by Kulback's and transported off-site by Pariso to Allied Waste Niagara Falls Landfill in Niagara Falls, New York. One (1) post-excavation confirmatory sample (BS-40) was collected after the removal of soils in this area.

Monitoring wells MW-1 through MW-7 were located within the remedial excavation boundary and were decommissioned during remedial excavation by physically removing the well casings after the full length of the wells was filled completely with grout. The removed well materials were disposed with the C&D material. Well decommissioning logs are provided in Appendix J.

Disposal facility applications, including waste characterization analytical results, and disposal facility approvals are included in Appendix G1; load summaries are included in Appendix G2; and manifests and/or bills of lading are included in electronic format in Appendix G3.

4.3.3 Hydraulic Lift Removal

Four (4) hydraulic lifts were present within Building 1 beneath the former building slab. Figure 4 shows the area of the removed inground lifts. The lifts were inspected, found to be empty, and removed from the ground. No visual or olfactory signs of contamination were discovered around the former lifts. Additionally, there was no presence of organic vapors.

The four (4) lifts and associated piping were cleaned and taken to Metallico, Inc. for recycling.

4.3.4 Non-hazardous Drum Waste

During the RI three waste oil/slurry drums were discovered. Additionally, purge water and soils that were generated during the RI were drummed. The soil drums were emptied, and the soil was transported to Allied Waste Niagara Falls Landfill in Niagara Falls, NY with the soil from the remedial excavation. Roux collected a sample from the drums for characterization and disposal approval. Laboratory analytical reports are included in Appendix H. On February 26th, 2025, ESG transported the three waste oil/slurry drums and one purge water drum off-site for disposal to ARC of Tonawanda, NY.

Disposal facility applications, including waste characterization analytical results, and disposal facility approvals are included in Appendix G1; load summaries are included in Appendix G2; and manifests and/or bills of lading are included in electronic format in Appendix G3.

4.3.5 Water Management

Surface water run-in was encountered subsequent the remedial excavation during construction activities. Water from the excavation was pumped into the Buffalo Sewer Authority (BSA) sewer system. A copy of the BSA sewer discharge permit is included in Appendix D.

4.4 Remedial Performance/Documentation Sampling

Remedial excavation activities were completed across the Site between January 2025 and April 2025. Confirmatory samples were collected at the completion of the excavation to verify achievement of remedial goals in accordance with the approved RAWP.

A total of 75 confirmatory samples (excluding quality assurance (QA)/quality control (QC) samples) were collected from the exterior excavations, including:

- 28 sidewall samples and 47 bottom samples for Full List VOCs, SVOCs, pesticides, and metals.

USCO exceedances were detected at 9 sidewall sample locations, however these results represent off-site conditions as the sidewall samples were collected from the limits of the BCP Site. The results are summarized on Table 2 with a synopsis below:

- Along the northern limits of the BCP site: SW-12 (2 fbgs) contained a USCO exceedance of zinc; SW-16 (1 fbgs) contained a USCO exceedance of lead, mercury, and 4,4'-DDE; and SW-18 (1 fbgs) contained an RRSCO exceedance of lead, a USCO exceedance of lead, a CSCO exceedance of mercury, and a USCO exceedance of 4,4'-DDE and 4,4'-DDT.
- Along the eastern limits of the BCP site: SW-9 (4.5 fbgs) contained a USCO exceedance of lead and mercury.
- Along the western limits of the BCP site: SW-17 (1 fbgs) contained USCO exceedances of benzo(k)fluoranthene, lead, zinc, 4,4'-DDE, and 4,4'-DDT; contained RRSCO exceedances of benzo(a)anthracene, benzo(b)fluoranthene, chrysene, indeno(1,2,3-cd)pyrene, and mercury; contained CSCO exceedances of benzo(a)pyrene and dibenzo(a,h)anthracene.
- Along the southern limits of the BCP site: SW-1 (4.5 fbgs) contained a USCO exceedance of acetone; SW-24 (1 fbgs) contained a USCO exceedance of lead; SW-27 (2 fbgs) contained a USCO exceedance of zinc and 4,4'-DDE; and SW-28 (2 fbgs) contained a USCO exceedance of lead and mercury.

During the remedial activities six (6) post-excavation bottom samples required additional soil/fill removal activities to achieve the USCOs. After additional soil/fill was removed, the areas were resampled. The resample locations were given the same initial sample number with an “A” designation added. The results are summarized on Table 3. Resampled locations were analyzed for the compound only which had the USCO exceedance. All bottom sample results were below USCOs. Analytical reports are included in Appendix H.

All verification samples were collected and analyzed in accordance with United States Environmental Protection Agency (USEPA) SW-846 methodology with equivalent Category B deliverables to allow for independent third-party data usability assessment.

The Data Usability Summary Report (DUSR), completed by Data Validation Services (DVS), indicates that samples were collected and reported in compliance with the required analytical protocols. Most sample results are usable either as reported or with minor qualification. The DUSR is included in Appendix I, and associated raw data is provided electronically in Appendix H. Additionally, Roux uploaded all of the data to the NYSDEC EQuIS system.

4.5 On-Site Clean Soil Removal

After completion of remedial action excavation activities and achievement of USCOs. A total of 251 loads of clean native soils were removed from the Site to facilitate the construction of the new building and parking garage. The clean soil was transported off-site to a department-approved construction project located at 4412 Walden Avenue in Lancaster, New York. The clean soil will be used under a commercial building slab and asphalt parking. A letter was submitted to the department dated March 6, 2025 and provided in Appendix D and bills of lading are provided in Appendix G3.

4.6 Imported Backfill Soil and Stone

4.6.1 Virgin Source Gravel

After remedial excavation was deemed complete and post confirmatory samples were collected in the area, backfill was used to construct a ramp to access the property along West Tupper. Additional gravel was imported for subbase of the concrete floor of the building. Approximately 360.31 tons of DEC-approved virgin source 2-inch crusher run gravel from County Line Stone Co., Inc. (CLSC), located in Akron, NY was imported. All virgin source gravel backfill source material was approved in accordance with the work plan, DER-10 and/or correspondence with the Department. Table 4 provides a summary of the backfill source and quantity. NYSDEC approvals of backfill material is provided in Appendix D and bills of lading are provided in Appendix G3.

4.7 Contamination Remaining at the Site

The 147 Tupper Street Site was remediated to achieve a Track 1 Unrestricted Use cleanup, which is consistent with the intended use of the Site. Therefore, no contamination remains on-Site above applicable SCOs.

4.8 Deviations from the Remedial Action Work Plan

The remedial activities were completed in general accordance with the approved RAWP.

Notes:
1. Only those parameters detected at a minimum of one sample location are presented in this table; all other compounds were reported as non-detect.
2. Values per NYSDEC Part 375 Soil Cleanup Objectives (SCOs).
3. Sample results were reported by the laboratory in micograms per kilogram (ug/kg) and converted to milligram per kilogram (mg/kg) for comparison to SCOs.

Definitions:
ND = Parameter not detected above laboratory detection limit. NA = Sample not analyzed for parameter.
"-" = No SCO available.
J = Estimated value; result is less than the sample quantitation limit but greater than zero.

Bold	= Result exceeds Unrestricted Use SCOs
Bold	= Result exceeds Restricted Residential Use SCOs.
Bold	= Result exceeds Commercial Use SCOs.

Notes:
1. Only those parameters detected at a minimum of one sample location are presented in this table; all other compounds were reported as non-detect.
2. Values per NYSDEC Part 375 Soil Cleanup Objectives (SCOs) .
3. Sample results were reported by the laboratory in micrograms per kilogram (ug/kg) and converted to milligram per kilogram (mg/kg) for comparison to SCOs.
4. BS-4 was resampled for acetone only as sample BS-4A due to a minor exceedance of the Unrestricted Use SCO. The reported data for acetone is from the recollected sample.
5. BS-5 was resampled for lead only as sample BS-5A due to minor exceedances of the Unrestricted Use SCO. The reported data for lead is from the recollected sample.
6. BS-18 was resampled for lead only as sample BS-18A due to a minor exceedance of the Unrestricted Use SCO. The reported data for lead is from the recollected sample.
7. BS-23 was resampled for mercury only as sample BS-23A due to a minor exceedance of the Unrestricted Use SCO. The reported data for mercury is from the recollected sample.
8. BS-32 was resampled for manganese and mercury only as sample BS-32A due to minor exceedances of the Unrestricted SCOs. The reported data for manganese and mercury are for the recollected sample.
9. BS-38 was resampled for lead only as sample BS-38A due to a minor exceedance of the Unrestricted SCO. The reported data for lead is from the recollected sample.
10. BS-39 was resampled for acetone only as sample BS-39A due to a minor exceedance of the Unrestricted Use SCO. The reported data for acetone if from the recollected sample.

Definitions:
ND = Parameter not detected above laboratory detection limit.
NA = Sample not analyzed for parameter.
"--" = No SCO available.
J = Estimated value; result is less than the sample quantitation limit but greater than zero.

= Result exceeds Unrestricted Use SCOs

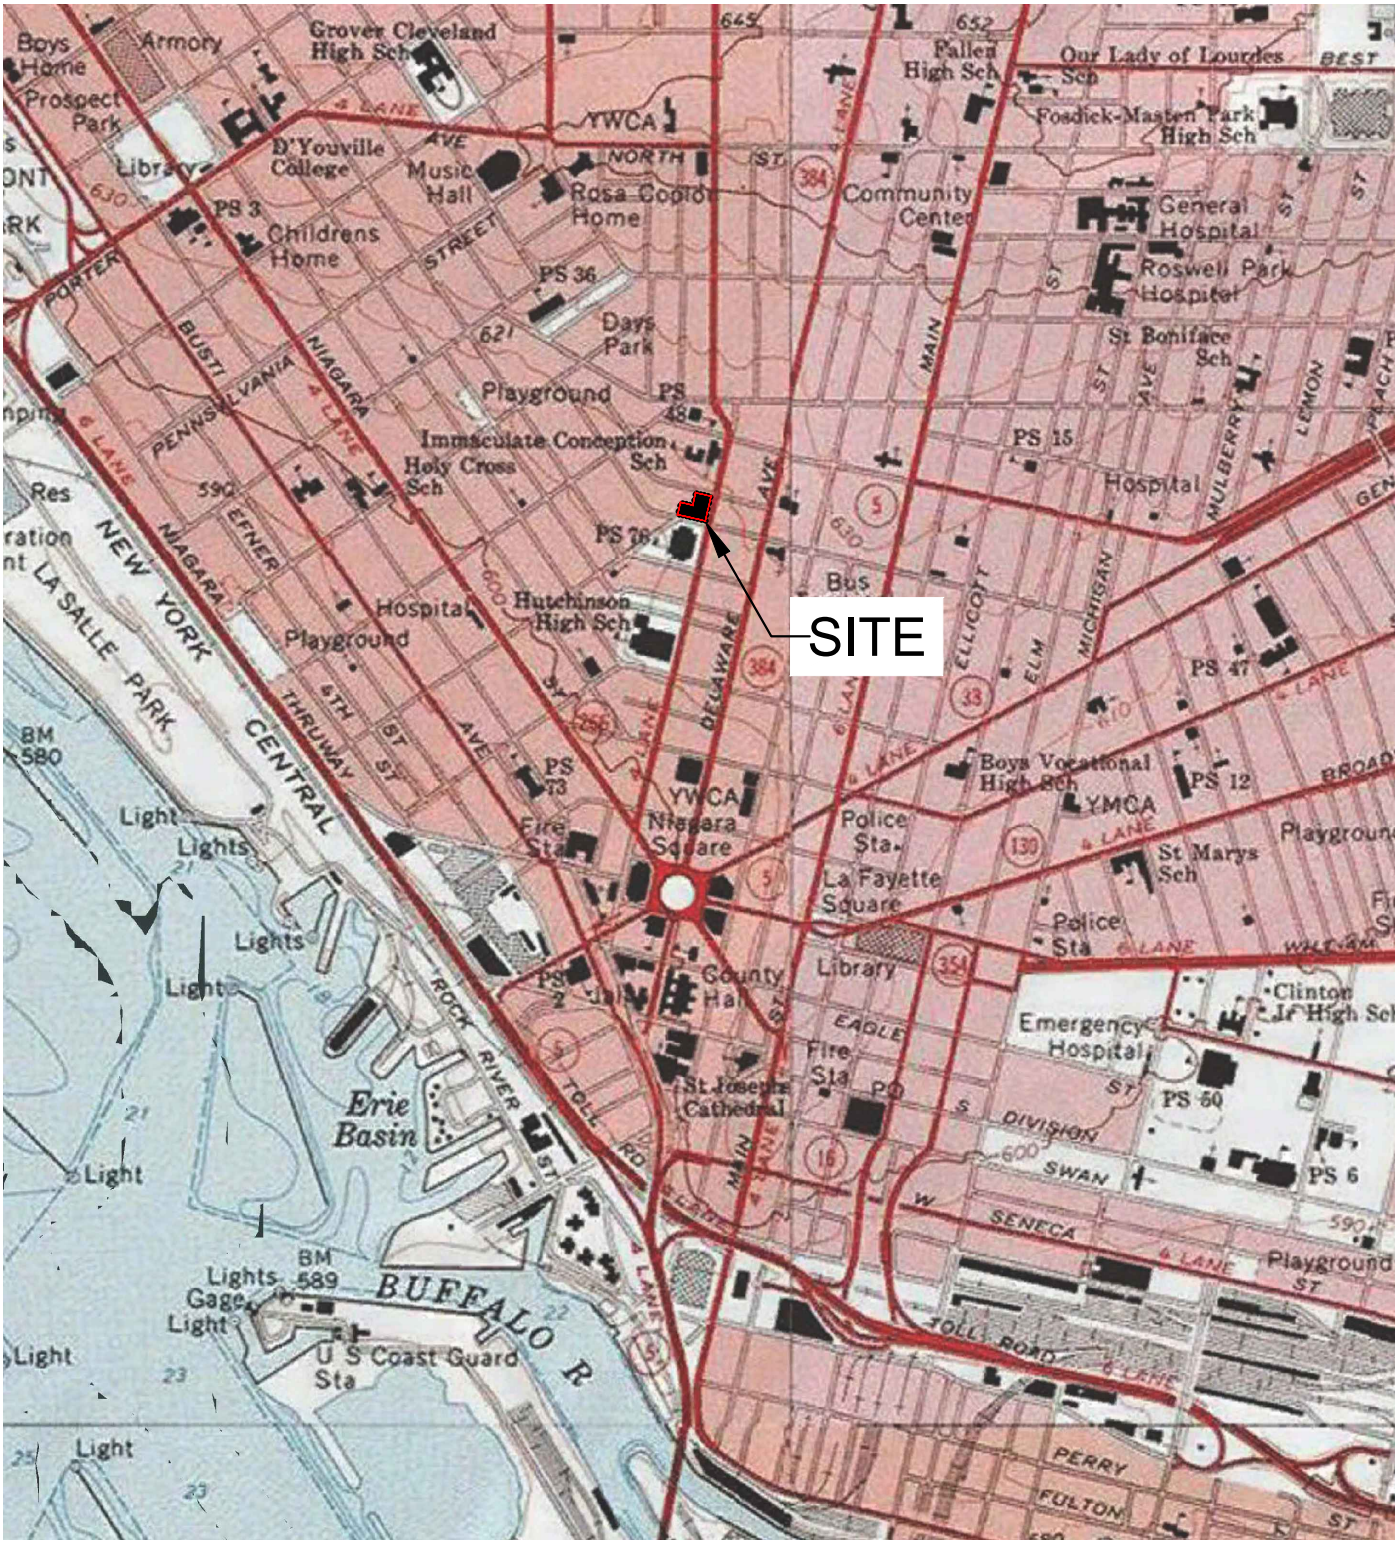

TABLE 4

RE: Site Name: 147 West Tupper Street Site
Site No.: C915389
Location of Site: 147 West Tupper Street, Erie County, Buffalo, New York 14201

Dear Chris Wan,

To complete your file, attached is a fully executed copy of the Brownfield Cleanup Agreement for the 147 West Tupper Street site.

If you have any further questions relating to this matter, please contact the project attorney for this site, Gregory Scholand, Esq., NYS Department of Environmental Conservation, Office of General Counsel, 700 Delaware Avenue, Buffalo, NY 14209 or by email at gregory.scholand@dec.ny.gov.

Sincerely,

Andrew Guglielmi

NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION
BROWNFIELD CLEANUP PROGRAM
ECL §27-1401 *et seq.*

In the Matter of a Remedial Program for

BROWNFIELD SITE CLEANUP AGREEMENT
Index No. C915389-11-22

147 West Tupper Street Site
DEC Site No: C915389
Located at: 147 West Tupper Street
Erie County
Buffalo, NY 14201

Hereinafter referred to as "Site"

by:

147 West Tupper LLC
61 Johnson Park, Suite A, Buffalo, NY 14201

Hereinafter referred to as "Applicant"

WHEREAS, the Department of Environmental Conservation ("Department") is authorized to administer the Brownfield Cleanup Program ("BCP") set forth in Article 27, Title 14 of the Environmental Conservation Law ("ECL"); and

WHEREAS, the Applicant submitted an application received by the Department on July 26, 2022; and

WHEREAS, the Department has determined that the Site and Applicant are eligible to participate in the BCP.

NOW, THEREFORE, IN CONSIDERATION OF AND IN EXCHANGE FOR THE MUTUAL COVENANTS AND PROMISES, THE PARTIES AGREE TO THE FOLLOWING:

I. Applicant Status

The Applicant, 147 West Tupper LLC, is participating in the BCP as a Volunteer as defined in ECL 27-1405(1)(b).

II. Tangible Property Tax Credit Status

The Site is not located in a city having a population of one million or more. It is therefore presumed that the Site is eligible for tangible property tax credits.

III. Real Property

The Site subject to this Brownfield Cleanup Agreement (the "BCA" or "Agreement") consists of approximately 0.730 acres, a Map of which is attached as Exhibit "A", and is described as follows:

Tax Map/Parcel No.: 111.29-4-23
Street Number: 147 West Tupper Street, Buffalo
Owner: 147 West Tupper LLC

Tax Map/Parcel No.: 111.29-4-21.1
Street Number: 149 West Tupper Street, Buffalo
Owner: 147 West Tupper LLC

Tax Map/Parcel No.: 111.29-4-27
Street Number: 159 West Tupper Street, Buffalo
Owner: 147 West Tupper LLC

Tax Map/Parcel No.: 111.29-4-28
Street Number: 161 West Tupper Street, Buffalo
Owner: 147 West Tupper LLC

Tax Map/Parcel No.: 111.29-4-22
Street Number: 42 Trinity Place, Buffalo
Owner: 147 West Tupper LLC

Tax Map/Parcel No.: 111.29-4-22./A
Street Number: 44 Trinity Place, Buffalo
Owner: 147 West Tupper LLC

IV. Communications

A. All written communications required by this Agreement shall be transmitted by United States Postal Service, by private courier service, by hand delivery, or by electronic mail.

1. Communication from Applicant shall be sent to:

Benjamin McPherson
New York State Department of Environmental Conservation
Division of Environmental Remediation
700 Delaware Ave
Buffalo, NY 14209-2202
benjamin.mcpherson@dec.ny.gov

Note: one hard copy (unbound) of work plans and reports is required, as well as one electronic copy.

B. The Department and Applicant reserve the right to designate additional or different addressees for communication on written notice to the other. Additionally, the Department reserves the right to request that the Applicant provide more than one paper copy of any work plan or report.

C. Each party shall notify the other within ninety (90) days after any change in the addresses listed in this paragraph or in Paragraph III.

V. Miscellaneous

A. Applicant acknowledges that it has read, understands, and agrees to abide by all the terms set forth in Appendix A - "Standard Clauses for All New York State Brownfield Site Cleanup Agreements" which is attached to and hereby made a part of this Agreement as if set forth fully herein.

B. In the event of a conflict between the terms of this BCA (including any and all attachments thereto and amendments thereof) and the terms of Appendix A, the terms of this BCA shall control.

C. The effective date of this Agreement is the date it is signed by the Commissioner or the Commissioner's designee.

DATED: 11/21/2022

THIS BROWNFIELD CLEANUP AGREEMENT IS HEREBY APPROVED, Acting by and Through the Department of Environmental Conservation as Designee of the Commissioner,

By: Andrew Guglielmi

Andrew O. Guglielmi, Director
Division of Environmental Remediation

CONSENT BY APPLICANT

Applicant hereby consents to the issuing and entering of this Agreement, and agrees to be bound by this Agreement.

APPENDIX A

STANDARD CLAUSES FOR ALL NEW YORK STATE BROWNFIELD SITE CLEANUP AGREEMENTS

The parties to the Brownfield Site Cleanup Agreement (hereinafter "BCA" or "Agreement") agree to be bound by the following clauses which are hereby made a part of the BCA. The word "Applicant" herein refers to any party to the Agreement, other than the New York State Department of Environmental Conservation (herein after "Department").

I. Citizen Participation Plan

Within twenty (20) days after the effective date of this Agreement, Applicant shall submit for review and approval a written citizen participation plan prepared in accordance with the requirements of Environmental Conservation Law (ECL) § 27-1417 and 6 NYCRR §§ 375-1.10 and 375-3.10. Upon approval, the Citizen Participation Plan shall be deemed to be incorporated into and made a part of this Agreement.

II. Development, Performance, and Reporting of Work Plans

A. Work Plan Requirements

The work plans ("Work Plan" or "Work Plans") under this Agreement shall be prepared and implemented in accordance with the requirements of ECL Article 27, Title 14, 6 NYCRR §§ 375-1.6(a) and 375-3.6, and all applicable laws, rules, regulations, and guidance documents. The Work Plans shall be captioned as follows:

1. "Remedial Investigation Work Plan" if the Work Plan provides for the investigation of the nature and extent of contamination within the boundaries of the Site and, if the Applicant is a "Participant", the extent of contamination emanating from such Site. If the Applicant is a "Volunteer" it shall perform a qualitative exposure assessment of the contamination emanating from the Site in accordance with ECL § 27-1415(2)(b) and Department guidance;

2. "Remedial Work Plan" if the Work Plan provides for the development and implementation of a Remedial Program for contamination within the boundaries of the Site and, if the Applicant is a "Participant", the contamination that has emanated from such Site;

3. "IRM Work Plan" if the Work Plan provides for an interim remedial measure; or

4. "Site Management Plan" if the Work Plan provides for the identification and implementation of institutional and/or engineering controls as well as any necessary monitoring and/or operation and maintenance of the remedy.

5. "Supplemental" if additional work plans other than those set forth in II.A.1-4 are required to be prepared and implemented.

B. Submission/Implementation of Work Plans

1. The first proposed Work Plan to be submitted under this Agreement shall be submitted no later than thirty (30) days after the effective date of this Agreement. Thereafter, the Applicant shall submit such other and additional work plans as determined in a schedule to be approved by the Department.

2. Any proposed Work Plan shall be submitted for the Department's review and approval and shall include, at a minimum, a chronological description of the anticipated activities to be conducted in accordance with current guidance, a schedule for performance of those activities, and sufficient detail to allow the Department to evaluate that Work Plan. The Department shall use best efforts in accordance with 6 NYCRR § 375-3.6(b) to approve, modify, or reject a proposed Work Plan within forty-five (45) days from its receipt or within fifteen (15) days from the close of the comment period, if applicable, whichever is later.

i. Upon the Department's written approval of a Work Plan, such Department-approved Work Plan shall be deemed to be incorporated into and made a part of this Agreement and shall be implemented in accordance with the schedule contained therein. All work undertaken as part of a remedial program for a Site must be detailed in a department-approved Work Plan or a submittal approved in form and content by the Department.

ii. If the Department requires modification of a Work Plan, the reason for such modification shall be provided in writing and the provisions of 6 NYCRR § 375-1.6(d)(3) shall apply.

iii. If the Department disapproves a Work Plan, the reason for such disapproval shall be provided in writing and the provisions of 6 NYCRR § 375-1.6(d)(4) shall apply.

3. A Site Management Plan, if necessary, shall be submitted in accordance with the schedule set forth in the IRM Work Plan or Remedial Work Plan.

C. Submission of Final Reports

1. In accordance with the schedule contained in an approved Work Plan, Applicant shall submit a Final Report for an Investigation Work Plan prepared in accordance with ECL § 27-1411(1) and 6 NYCRR § 375-1.6. If such Final Report concludes that no remediation is necessary, and the Site does not meet the requirements for Track 1, Applicant shall submit an Alternatives Analysis prepared in accordance with ECL § 27-1413 and 6 NYCRR § 375-3.8(f) that supports such determination.

2. In accordance with the schedule contained in an approved Work Plan, Applicant shall submit a Final Engineering Report certifying that remediation of the Site has been performed in accordance with the requirements of ECL §§ 27-1419(1) and (2) and 6 NYCRR § 375-1.6. The Department shall review such Report, the submittals made pursuant to this Agreement, and any other relevant information regarding the Site and make a determination as to whether the goals of the remedial program have been or will be achieved in accordance with established timeframes; if so, a written Certificate of Completion will be issued in accordance with ECL § 27-1419, 6 NYCRR §§ 375-1.9 and 375-3.9.

3. Within sixty (60) days of the Department's approval of a Final Report, Applicant shall submit such additional Work Plans as it proposes to implement.In addition, Applicant shall include with every report submitted to the Department a schedule for the submission of any subsequent work plan required to meet the requirements of ECL Article 27 Title 14. Failure to submit any additional Work Plans within such period shall, unless other Work Plans are under review by the Department or being implemented by Applicant, result in the termination of this Agreement pursuant to Paragraph XII.

D. Review of Submittals other than Work Plans

1. The Department shall timely notify Applicant in writing of its approval or disapproval of each submittal other than a Work Plan in accordance with 6 NYCRR § 375-1.6. All Department-approved submittals shall be incorporated into and become an enforceable part of this Agreement.

2. If the Department disapproves a submittal covered by this Subparagraph, it shall specify the reason for its disapproval and may request Applicant to modify or expand the submittal. Within fifteen (15) days after receiving written notice that Applicant's submittal has been disapproved, Applicant shall elect in writing to either (i) modify or expand it within thirty (30) days of receipt of the written notice of disapproval; (ii) complete any other Department-approved Work Plan(s); (iii) invoke dispute resolution pursuant to Paragraph XIII; or (iv) terminate this Agreement pursuant to Paragraph XII. If Applicant submits a revised submittal and it is disapproved, the Department and Applicant may pursue whatever remedies may be available under this Agreement or under law. All work undertaken as part of a remedial program, including work undertaken pursuant to submittals other than Work Plans, must be approved by the department prior to implementation by the Applicant.

E. Department's Determination of Need for Remediation

The Department shall determine upon its approval of each Final Report dealing with the investigation of the Site whether remediation, or additional remediation as the case may be, is needed for protection of public health and the environment.

1. If the Department makes a preliminary determination that remediation, or additional remediation, is not needed for protection of public health and the environment, the Department shall notify the public of such determination and seek public comment in accordance with ECL § 27-1417(3)(f). The Department shall provide timely notification to the Applicant of its final determination following the close of the public comment period.

2. If the Department determines that additional remediation is not needed and such

determination is based upon use restrictions, Applicant shall cause to be recorded an Environmental Easement in accordance with 6 NYCRR § 375-1.8(h).

3. If the Department determines that remediation, or additional remediation, is needed, Applicant may elect to submit for review and approval a proposed Remedial Work Plan (or modify an existing Work Plan for the Site) for a remedy selected upon due consideration of the factors set forth in ECL § 27-1415(3) and 6 NYCRR § 375-1.8(f). A proposed Remedial Work Plan addressing the Site's remediation will be noticed for public comment in accordance with ECL § 27-1417(3)(f) and the Citizen Participation Plan developed pursuant to this Agreement. If the Department determines following the close of the public comment period that modifications to the proposed Remedial Work Plan are needed, Applicant agrees to negotiate appropriate modifications to such Work Plan. If Applicant elects not to develop a Work Plan under this Subparagraph then this Agreement shall terminate in accordance with Paragraph XII. If the Applicant elects to develop a Work Plan, then it will be reviewed in accordance with Paragraph II.D above.

F. Institutional/Engineering Control Certification

In the event that the remedy for the Site, if any, or any Work Plan for the Site, requires institutional or engineering controls, Applicant shall submit a written certification in accordance with 6 NYCRR §§ 375-1.8(h)(3) and 375-3.8(h)(2).

III. Enforcement

Except as provided in Paragraph V, this Agreement shall be enforceable as a contractual agreement under the laws of the State of New York. Applicant shall not suffer any penalty except as provided in Paragraph V, or be subject to any proceeding or action if it cannot comply with any requirement of this Agreement as a result of a Force Majeure Event as described at 6 NYCRR § 375-1.5(b)(4) provided Applicant complies with the requirements set forth therein.

IV. Entry upon Site

A. Applicant hereby agrees to provide access to the Site and to all relevant information regarding activities at the Site in accordance with the provisions of ECL § 27-1431. Applicant agrees to provide the Department upon request with proof of access if it is not the owner of the Site.

B. The Department shall have the right to periodically inspect the Site to ensure that the use of the property complies with the terms and conditions of this Agreement. The Department will generally conduct such inspections during business hours, but retains the right to inspect at any time.

C. Failure to provide access as provided for under this Paragraph may result in termination of this Agreement pursuant to Paragraph XII.

V. Payment of State Costs (Applicable only to Applicants with Participant Status)

A. Within forty-five (45) days after receipt of an itemized invoice from the Department, Applicant shall pay to the Department a sum of money which shall represent reimbursement for State Costs as provided by 6 NYCRR § 375-1.5 (b)(3)(i).

B. Costs shall be documented as provided by 6 NYCRR § 375-1.5(b)(3)(ii). The Department shall not be required to provide any other documentation of costs, provided however, that the Department's records shall be available consistent with, and in accordance with, Article 6 of the Public Officers Law.

C. Each such payment shall be made payable to the "Commissioner of NYSDEC" and shall be sent to:

Division of Management and Budget
New York State Department of Environmental Conservation
625 Broadway, 10th Floor
Albany, New York 12233-4900

D. Each party shall provide written notification to the other within ninety (90) days of any change in the foregoing addresses.

E. If Applicant objects to any invoiced costs under this Agreement, the provisions of 6 NYCRR §§ 375-1.5 (b)(3)(v) and (vi) shall apply. Objections shall be sent to the Department as provided under subparagraph V.C above.

F. In the event of non-payment of any invoice within the 45 days provided herein, the Department may seek enforcement of this provision pursuant to Paragraph III or the Department may commence an enforcement action for non-compliance with ECL § 27-1409(2) and ECL § 71-4003.

VI. Liability Limitation

Subsequent to the issuance of a Certificate of Completion pursuant to this Agreement, Applicant shall be entitled to the Liability Limitation set forth at ECL § 27-1421, subject to the terms and conditions stated therein and to the provisions of 6 NYCRR §§ 375-1.9 and 375-3.9.

VII. Reservation of Rights

A. Except as provided in Subparagraph VII.B, Applicant reserves all rights and defenses under applicable law to contest, defend against, dispute, or disprove any action, proceeding, allegation, assertion, determination, or order of the Department, including any assertion of remedial liability by the Department against Applicant, and further reserves all rights including the rights to notice, to be heard, to appeal, and to any other due process respecting any action or proceeding by the Department, including the enforcement of this Agreement. The existence of this Agreement or Applicant's compliance with it shall not be construed as an admission of any liability, fault, wrongdoing, or violation of law by Applicant, and shall not give rise to any presumption of law or finding of fact which shall inure to the benefit of any third party.

B. Notwithstanding the foregoing, Applicant hereby waives any right it may have to make a claim pursuant to Article 12 of the Navigation Law with respect to the Site and releases the State and the New York Environmental Protection and Spill Compensation Fund from any and all legal or equitable claims, suits, causes of action, or demands whatsoever with respect to the Site that Applicant may have as a result of Applicant's entering into or fulfilling the terms of this Agreement.

VIII. Indemnification

Applicant shall indemnify and hold the Department, the State of New York, and their representatives and employees harmless from any claim, suit, action, and cost of every name and description arising out of or resulting from the fulfillment or attempted fulfillment of this Agreement by Applicant prior to the Termination Date except for those claims, suits, actions, and costs arising from the State's gross negligence or willful or intentional misconduct by the Department, the State of New York, and/or their representatives and employees during the course of any activities conducted pursuant to this Agreement. In the event that the Applicant is a Participant, this provision shall also include the Trustee of the State's Natural Resources. The Department shall provide Applicant with written notice no less than thirty (30) days prior to commencing a lawsuit seeking indemnification pursuant to this Paragraph.

IX. Change of Use

Applicant shall notify the Department at least sixty (60) days in advance of any change of use, as defined in ECL § 27-1425, which is proposed for the Site, in accordance with the provisions of 6 NYCRR § 375-1.11(d). In the event the Department determines that the proposed change of use is prohibited, the Department shall notify Applicant of such determination within forty-five (45) days of receipt of such notice.

X. Environmental Easement

A. Within thirty (30) days after the Department's approval of a Remedial Work Plan which relies upon one or more institutional and/or engineering controls, or within sixty (60) days after the Department's determination pursuant to Subparagraph II.E.2 that additional remediation is not needed based upon use restrictions, Applicant shall submit to the Department for approval an Environmental Easement to run with the land in favor of the State which complies with the requirements of ECL Article 71, Title 36 and 6 NYCRR § 375-1.8(h)(2). Applicant shall cause such instrument to be recorded with the recording officer for the county in which the Site is located within thirty (30) days after the Department's approval of such instrument. Applicant shall provide the Department with a copy of such instrument certified by the recording officer to be a true and faithful copy within thirty (30) days of such recording (or such longer period of time as may be required to obtain a certified copy provided Applicant advises the Department of the status of its efforts to obtain same within such thirty (30) day period), which shall be deemed to be incorporated into this Agreement.

B. Applicant or the owner of the Site may petition the Department to modify or extinguish the Environmental Easement filed pursuant to this Agreement at such time as it can certify that the Site is protective of public health and the environment without reliance upon the restrictions set forth in such instrument. Such certification shall be made by a Professional Engineer or Qualified Environmental Professional as defined at 6 NYCRR § 375-1.2(ak) approved by the Department. The Department will not unreasonably withhold its consent.

XI. Progress Reports

Applicant shall submit a written progress report of its actions under this Agreement to the parties identified in Subparagraph III.A.1 of the Agreement by the 10th day of each month commencing with the month subsequent to the approval of the first Work Plan and ending with the Termination Date, unless a different frequency is set forth in a Work Plan. Such reports shall, at a minimum, include: all actions relative to the Site during the previous reporting period and those anticipated for the next reporting period; all approved activity modifications (changes of work scope and/or schedule); all results of sampling and tests and all other data received or generated by or on behalf of Applicant in connection with this Site, whether under this Agreement or otherwise, in the previous reporting period, including quality assurance/quality control information; information regarding percentage of completion; unresolved delays encountered or anticipated that may affect the future schedule and efforts made to mitigate such delays; and information regarding activities undertaken in support of the Citizen Participation Plan during the previous reporting period and those anticipated for the next reporting period.

XII. Termination of Agreement

Applicant or the Department may terminate this Agreement consistent with the provisions of 6 NYCRR §§ 375-3.5(b), (c), and (d) by providing written notification to the parties listed in Paragraph IV of the Agreement.

XIII. Dispute Resolution

A. In the event disputes arise under this Agreement, Applicant may, within fifteen (15) days after Applicant knew or should have known of the facts which are the basis of the dispute, initiate dispute resolution in accordance with the provisions of 6 NYCRR § 375-1.5(b)(2).

B. All cost incurred by the Department associated with dispute resolution are State costs subject to reimbursement pursuant to Paragraph V of Appendix A of this Agreement, if applicable.

C. Notwithstanding any other rights otherwise authorized in law or equity, any disputes pursuant to this Agreement shall be limited to Departmental decisions on remedial activities. In no event shall such dispute authorize a challenge to the applicable statute or regulation.

XIV. Miscellaneous

A. If the information provided and any certifications made by Applicant are not materially accurate and complete, this Agreement, except with respect to Applicant's obligations pursuant to Paragraphs V, if applicable, and VII.B, and VIII, shall be null and void ab initio fifteen (15) days after the Department's notification of such inaccuracy or incompleteness or fifteen (15) days after issuance of a final decision resolving a dispute pursuant to Paragraph XIII, whichever is later, unless Applicant submits information within that fifteen (15) day time period indicating that the information provided and the certifications made were materially accurate and complete. In the event this Agreement is rendered null and void, any Certificate of Completion and/or Liability Limitation that may have been issued or may have arisen under this Agreement shall also be null and void ab initio, and the Department shall reserve all rights that it may have under law.

B. By entering into this Agreement, Applicant agrees to comply with and be bound by the provisions of 6 NYCRR §§ 375-1, 375-3 and 375-6; the provisions of such subparts that are referenced herein are referenced for clarity and convenience only and the failure of this Agreement to specifically reference any particular regulatory provision is not intended to imply that such provision is not applicable to activities performed under this Agreement.

C. The Department may exempt Applicant from the requirement to obtain any state or local permit or other authorization for any activity conducted pursuant to this Agreement in accordance with 6 NYCRR §§ 375-1.12(b), (c), and (d).

D. 1. Applicant shall use "best efforts" to obtain all Site access, permits, easements, approvals, institutional controls, and/or authorizations necessary to perform Applicant's obligations under this Agreement, including all Department-approved Work Plans and the schedules contained therein. If, despite Applicant's best efforts, any access, permits, easements, approvals, institutional controls, or authorizations cannot be obtained, Applicant shall promptly notify the Department and include a summary of the steps taken. The Department may, as it deems appropriate and within its authority, assist Applicant in obtaining same.

2. If an interest in property is needed to implement an institutional control required by a Work Plan and such interest cannot be obtained, the Department may require Applicant to modify the Work Plan pursuant to 6 NYCRR § 375-1.6(d)(3) to reflect changes necessitated by Applicant's inability to obtain such interest.

E. The paragraph headings set forth in this Agreement are included for convenience of reference only and shall be disregarded in the construction and interpretation of any provisions of this Agreement.

F. 1. The terms of this Agreement shall constitute the complete and entire agreement between the Department and Applicant concerning the implementation of the activities required by this Agreement. No term, condition, understanding, or agreement purporting to modify or vary any term of this Agreement shall be binding unless made in writing and subscribed by the party to be bound. No informal advice, guidance, suggestion, or comment by the Department shall be construed as relieving Applicant of its obligation to obtain such formal approvals as may be required by this Agreement. In the event of a conflict between the terms of this Agreement and any Work Plan submitted pursuant to this Agreement, the terms of this Agreement shall control over the terms of the Work Plan(s). Applicant consents to and agrees not to contest the authority and jurisdiction of the Department to enter into or enforce this Agreement.

2. i. Except as set forth herein, if Applicant desires that any provision of this Agreement be changed, Applicant shall make timely written application to the Commissioner with copies to the parties in Subparagraph IV.A.1 of the Agreement.

ii. If Applicant seeks to modify an approved Work Plan, a written request shall be made to the Department's project manager, with copies to the parties listed in Subparagraph IV.A.1 of the Agreement.

iii. Requests for a change to a time frame set forth in this Agreement shall be made in writing to the Department's project attorney and project manager; such requests shall not be unreasonably denied and a written response to such requests shall be sent to Applicant promptly.

G. 1. If there are multiple parties signing this Agreement, the term "Applicant" shall be read in the plural, the obligations of each such party under this Agreement are joint and several, and the insolvency of or failure by any Applicant to implement any obligations under this Agreement shall not affect the obligations of the remaining Applicant(s) under this Agreement.

2. If Applicant is a partnership, the obligations of all general partners (including limited partners who act as general partners) under this Agreement are joint and several and the insolvency or failure of any general partner to implement any obligations under this Agreement shall not affect the obligations of the remaining partner(s) under this Agreement.

3. Notwithstanding the foregoing Subparagraphs XIV.G.1 and 2, if multiple parties sign this Agreement as Applicants but not all of the signing parties elect to implement a Work Plan, all Applicants are jointly and severally liable for each and every obligation under this Agreement through the completion of activities in such Work Plan that all such parties consented to; thereafter, only those Applicants electing to perform additional work shall be jointly and severally liable under this Agreement for the obligations and activities under such additional Work Plan(s). The parties electing not to implement the additional Work Plan(s) shall have no obligations under this Agreement relative to the activities set forth in such Work Plan(s). Further, only those Applicants electing to implement such additional Work Plan(s) shall be eligible to receive the Liability Limitation referenced in Paragraph VI.

4. Any change to parties pursuant to this Agreement, including successors and assigns through acquisition of title, is subject to approval by the Department, after submittal of an application acceptable to the Department.

H. Applicant shall be entitled to receive contribution protection and/or to seek contribution to the extent authorized by ECL § 27-1421(6) and 6 NYCRR § 375-1.5(b)(5).

I. Applicant shall not be considered an operator of the Site solely by virtue of having executed and/or implemented this Agreement.

J. Applicant and Applicant's agents, grantees, lessees, sublessees, successors, and assigns shall be bound by this Agreement. Any change in ownership of Applicant including, but not limited to, any transfer of assets or real or personal property, shall in no way alter Applicant's responsibilities under this Agreement.

K. Unless otherwise expressly provided herein, terms used in this Agreement which are defined in ECL Article 27 or in regulations promulgated thereunder shall have the meaning assigned to them under said statute or regulations.

L. Applicant's obligations under this Agreement shall not be deemed to constitute any type of fine or penalty.

M. In accordance with 6 NYCRR § 375-1.6(a)(4), the Department shall be notified at least 7 days in advance of, and be allowed to attend, any field activities to be conducted under a Department approved work plan, as well as any pre-bid meetings, job progress meetings, substantial completion meeting and inspection, and final inspection and meeting; provided, however that the Department may be excluded from portions of meetings where privileged matters are discussed.

N. In accordance with 6 NYCRR § 375-1.11(a), all work plans; reports, including all attachments and appendices, and certifications, submitted by a remedial party shall be submitted in print, as well as in an electronic format acceptable to the Department.

O. This Agreement may be executed for the convenience of the parties hereto, individually or in combination, in one or more counterparts, each of which shall be deemed to have the status of an executed original and all of which shall together constitute one and the same.

OPERATING AGREEMENT

OF

147 West Tupper LLC

A

LIMITED LIABILITY COMPANY

This Operating Agreement is effective as of December 13th, 2017, between and among the undersigned confirms our understanding as to the matters contained herein.

The parties hereto agree as follows:

ARTICLE I

Definitions

The following terms and phrases shall have the meanings indicated:

A. "Act" shall mean the 147 West Tupper LLC Limited Liability Company Act, as amended.

B. "Capital Account" shall mean, with respect to each Member, the account established for each Member which will initially equal the Capital Contributions of such Member and will be (a) increased by the amount of Net Profits allocated to such Member and (b) reduced by the amount of Net Losses allocated to such Member and the amount of cash flow distributed to such Member. Member's Capital Accounts shall be determined and maintained.

C. "Capital Contributions shall mean the fair market value of the amounts contributed by the Members.

D. "Code" shall mean the Internal Revenue Code of 1986, as amended, or corresponding provisions of subsequent revenue laws.

E. "Operating Managers" shall mean the Member or Members selected by the Members in accordance with this Agreement to serve as Operating Manager or Operating Managers of the Company.

F. "Members" shall mean the persons designated as such in this Agreement, any successor(s) to their interests as such in the Company; and any other person who pursuant to this Agreement shall become a Member, and any reference to a "Member" shall be to any one of the Members.

G. "Net Profits" and "Net Losses" shall mean the net profit or net loss, respectively, of the Company.

H. The words "membership interest" shall mean a Member's interest in the Company, which shall be in proportion to his share of the current profits of the Company. Profits and losses shall be allocated on the basis of the value of the contributions of each Member as stated in the Operating Agreement. A "majority in interest of the Members" and "two-thirds in interest of the Members" shall mean Members whose aggregate share of the current profits of the Company constitute more than one-half of two-thirds, respectively, of the aggregate shares of all of the Members.

I. "Company" shall mean this Limited Liability Company.

J. "Person" shall mean any natural person, corporation, partnership, joint venture, association, limited liability company or other business or legal entity.

ARTICLE II
Organization of the Company

A. The purpose of the Company is to conduct any lawful business for which limited liability companies may be organized and to do all things necessary or useful in connection with the foregoing.

B. The Company name shall be 147 West Tupper LLC. The Member or Members in the Company shall continue to do business under the name until the Operating Managers shall change the name or the Company shall terminate.

C. The principal address of the Company shall be 61 Johnson Park, Suite A Buffalo, NY 14201 or such other place or places as the Operating Managers may determine. The Operating Managers will give notice to the Members promptly after any change in the location of the principal office of the Company.

D. The Company shall terminate on None except that the Company may terminate prior to such date as provided in this Agreement.

ARTICLE III
Status of Members

A. No Member will be bound by, or be personally liable for the expenses, liabilities or obligations of the Company.

B. No Member will be entitled to withdraw any part of his Capital Account or to receive any distributions from the Company except as expressly provided in this Agreement.

C. No member will have the right to require partition of the Property or to complete any sale or appraisal of the Company's assets or any sale of a deceased Member's interest in the Company's assets, notwithstanding any provision of law to the contrary.

ARTICLE IV
Meeting of Members

A. An annual meeting of Members shall be held within five (5) months after the close of the fiscal year of the Company on such date and at the time and place (either within or without the State of its organization) as shall be fixed by the Members. At the annual meeting the Members shall elect the Operating Managers and transact such other business as may properly be brought before the meeting.

B. A special meeting of Members may be called at any time by the Operating Managers and shall be called by the Operating Managers at the request in writing of a majority in interest of the Members entitled to vote at such meeting. Any such request shall state the purpose or purposes of the proposed meeting. Business transacted at any special meeting of Members shall be confined to the purposes set forth in the notice thereof.

C. Written notice of the time, place and purpose of every meeting of Members (and, if other than an annual meeting, the person or persons at whose discretion the meeting is being

called), shall be given by the Operating Managers to each Member of record entitled to vote at such meeting, not less than ten nor more than sixty days prior to the date set for the meeting. Notice shall be given either personally or by mailing said notice by first class mail to each Member at his address appearing on the record book of the Company for the purpose of receiving notice. A written waiver of notice setting forth the purposes of the meeting for which notice is waived, signed by the person or persons entitled to such notice, whether before or after the time of the meeting stated therein shall be deemed equivalent to the giving of such notice. The attendance by a Member at a meeting either in person or by proxy without protesting the lack of notice thereof shall constitute a waiver of notice of such Member. All notices given with respect to an original meeting shall extend to any and all adjournments thereof and such business as might have been transacted at the original meeting may be transacted at any adjournment thereof, no notice of any adjourned meeting need be given if an announcement of the time and place of the adjourned meeting is made at the original meeting.

D. The holders of a majority in interest of the Members present in person or represented by proxy, shall be requisite and shall constitute a quorum at all meetings of members except as otherwise provided by statute or the Articles of Organization. If, however, a quorum shall not be present or represented at any meeting of Members, the Members entitled to vote thereat, present in person or represented by proxy, shall have power to adjourn the meeting from time to time, without notice other than announcement at the meeting, until a quorum shall be present or represented, any business may be transacted which might have been transacted at the meeting as originally notified. When a quorum is once present to organize a meeting, such quorum is not deemed broken by the subsequent withdrawal of any Members.

E. Every Member entitled to vote at any meeting shall be entitled to vote in accordance with his membership interest in the Company held by him of record on the date fixed as the record date for said meeting and may so vote in person or by proxy. Any Company action shall be authorized by a majority in interest of the votes cast by the Members entitled to vote thereon except as may otherwise be provided by statute, the Articles of Organization or this Operating Agreement.

F. Every proxy must be signed by the Member entitled to vote or by his duly authorized attorney-in-fact and shall be valid only if filed with the Operating Managers of the Company prior to the commencement of voting on the matter in regard to which said proxy is to be voted. No proxy shall be valid after the expiration of eleven months from the date of its execution unless otherwise expressly provided in the proxy. Every proxy shall be revocable at the pleasure of the person executing it except as otherwise provided by statute. Unless the proxy by its terms provides for a specific revocation date and except as otherwise provided by statute, revocation of a proxy shall not be effective unless and until such revocation is executed in writing by the Member who executed such proxy and the revocation is filed with the Operating Managers of the Company prior to the voting of the proxy.

G. All meetings of Members shall be presided over by the Operating Managers, or if not present, by a Member thereby chosen by the Members at the meeting. The Operating Managers or the person presiding at the meeting shall appoint any person present to act as secretary of the meeting.

H. For the purpose of determining the Members entitled to notice of, or to vote at any meeting of Members or any adjournment thereof or to express consent or dissent from any proposal without a meeting, or for the purpose of determining the Members entitled to receive payment of any distribution of Cash Flow or the allotment of any rights, or for the purpose of any other action, the Members may fix, in advance, a date as the record date for any such determination of Members. Such date shall not be more than fifty nor less than ten days before the date of any meeting nor more than fifty days prior to any action taken without a meeting, the

payment of any distribution of Cash Flow or the allotment of any rights, or any other action. When a determination of Members of record entitled to notice of, or to vote at any meeting of Members has been made as provided in this Section, such determination shall apply to any adjournment thereof, unless the Members fix a new record date under this Section for the adjourned date.

I. The Company shall be entitled to treat the holder of record of any membership interest as the holder in fact thereof and, accordingly, shall not be bound to recognize any equitable or other claim to or interest in such membership interest on the part of any other person whether or not it shall have express or other notice thereof, except as otherwise provided by the Act.

ARTICLE V
Management

A. Management of the Company shall be vested in all of the Members who shall also serve as Operating Managers of the Company. The Operating Managers shall vote in proportion to their Membership Interests in the Company. Except as otherwise provided in this Agreement, all decisions of the Operating Managers shall be by a majority in interest of the Members. All Operating Managers must be Members of the Company. No Member will take part in or interfere in any manner with the conduct or control of the business of the Company or have any right or authority to act for or bind the Company except as provided in this Agreement.

B. The Operating Managers shall hold office for the term for which elected and until a successor has been elected and qualified. A vacancy in the office of Operating Manager arising from any cause may be filled for the unexpired portion of the term by the Members.

C. Any Operating Manager may resign at any time by giving written notice to the Members. Any such resignation shall take effect at the time specified therein or, if the time is not specified therein, upon the receipt thereof, irrespective of whether any such resignations shall have been accepted.

D. The Company shall be managed by the Operating Managers and the conduct of the Company's business shall be controlled and conducted solely and exclusively by the Operating Managers in accordance with this Agreement. In addition to and not in limitation of any rights and powers conferred by law or other provisions of this Agreement, the Operating Managers shall have and may exercise on behalf of the Company all powers and rights necessary, proper, convenient or advisable to effectuate and carry out the purposes, business and objectives of the Company, and to maximize Company profits. Such powers shall include, without limitation, the following:

1) To open accounts and deposit and maintain funds in the name of the Company in banks or savings and loan associations.
2) To determine the appropriate accounting method or methods to be used by the Company.
3) To commence lawsuits and other proceedings.
4) To retain accountants, attorneys or other agents to act on behalf of the Company.
5) To execute, acknowledge and deliver any and all instruments to effectuate the foregoing, and to take all such action in connection therewith as the Operating Managers deem necessary or appropriate.

E. Notwithstanding the foregoing, the Operating Managers may not make any of the following management decisions without obtaining the consent of two-thirds in interest of the Members:

1) To acquire, sell, assign, or otherwise transfer any interest in any property.
2) To create any indebtedness for borrowed money whether or not secured.
3) To make, execute or deliver on behalf of the Company any assignment for the benefit of creditors or any guarantee, indemnity bond, or surety bond.
4) To obligate the Company or any Member as a surety, guarantor or accommodation party to any obligation.
5) To confess any judgment on behalf of the Company.
6) To do any act which makes it impossible to carry on the ordinary business of the Company.
7) To make any decisions regarding any employee.
8) To obligate the Company in any manner for a liability in Excess of $10,000.

F. The Operating Manager shall serve as Tax Matters Member.

G. Any person made or threatened to be made a party to an action or proceeding, whether civil or criminal, by reason of the fact that he, his testator or in testate, then, is, or was a manager, Member, employee or agent of the company, or then serves or has served on behalf of the company in any capacity at the request of the Company, shall be indemnified by the Company against reasonable expenses, judgments, fines, and amounts actually and necessarily incurred in connection with the defense of such action or proceeding or in connection with an appeal therein, to the fullest extent permissible by the Act. Such right of indemnification shall not be deemed exclusive or any other rights to which such person may be entitled.

ARTICLE VI
Capital

A. The Members have contributed to the Company in exchange for their membership interests; interests in cash and other property as set forth on Schedule A, annexed hereto.

B. The fair market value and the adjusted basis of the contributing Member of any property other than cash contributed to the Company by a Member shall be set forth on Schedule A, annexed hereto.

C. Except as expressly provided in the Agreement, no Member shall be required to make any additional contributions to the capital of the Company.

D. No interest shall be paid on the Capital Account of any Member.

E. A Capital Account shall be established for each Member on the books and records of the Company in accordance with section 1.1.B. If any assets of the Company are distributed to the Members in kinds, the Capital Accounts of the Members shall be adjusted to reflect the difference between the fair market value of such assets on the date of distribution and the basis of the Company in such assets.

ARTICLE VII
Distributions of Cash

A. The Company shall distribute to the Members from time to time all cash (regardless of the source thereof) of the Company which is not required for the operation or the reasonable working capital requirements of the Company, (such cash is sometimes referred to herein as "Cash Flow"). For purposes of this Agreement all Cash Flow allocated to the Members shall be allocated among them in the ration in which the total Capital Contributed by each Member pursuant to Section 6.1 on the last day of each calendar month during the year bears to the total Capital Contributed by all Members pursuant to Section 6.1 on such date without regard to the number of days during such month in which such a person was Member.

B. Distribution of Cash Flow shall be made from time to time in such manner as determined by the Operating Managers.

ARTICLE VIII
Profits and Losses

A. The Net Profits and Losses of the Company shall be the net profits and net losses of the Company as determined for Federal income tax purposes.

B. The Net Profits and Net Losses of the Company and each item of income, gain, loss, deduction or credit entering into the computation thereof, shall be allocated to the Members in the same proportions that they would have shared if there had been Cash Flow.

C. References herein to "reg. Sec." are to the regulations promulgated by the United States Treasury to the Code. "No recourse liability" means any liability with respect to which no Member bears the risk of loss. The following special allocations shall be made in the following order:

1. If there is a net decrease in minimum gain, during the fiscal year of the Company, each Member, shall be specially allocated items of gross income and gain for such fiscal year (and, if necessary, subsequent fiscal years) in an amount equal to that Member's share of the net decrease of minimum gain. Allocations in accordance with this Section shall be made first from the disposition of Company assets, subject to nonrecourse liabilities, to the extent of the minimum gain attributable to those assets, to the and thereafter, from a pro-rata portion of the Company's other items of income and gain for the taxable year.
2. If there is a net decrease in a Member's nonrecourse liability minimum gain attributable to Members' nonrecourse liabilities during any fiscal year, each Member who has a share of the Member's nonrecourse liability minimum gain attributable to Member nonrecourse liability shall be specially allocated items of gross income and gain for such fiscal year (and, if necessary subsequent fiscal years) in an amount equal to that Member's share of the net decrease in Members' nonrecourse debt minimum gain attributable to such Member nonrecourse debt. Allocations pursuant to this Section shall be made first from gain recognized from the disposition of Company assets subject to Member nonrecourse liabilities to the extent of member minimum gain attributable to those assets, and thereafter, from a pro-rata portion of the Company's other times of income and gain for the fiscal year.
3. A Member who unexpectedly receives an adjustment, allocation or distribution will be allocated items of income and gain in an amount and manner sufficient to eliminate such deficit balance as quickly as possible. An allocation shall be made pursuant to this Section and if and to the extent a Member would have a deficit in his adjusted Capital Account after all other allocations were made as if this paragraph were not in the agreement.
4. Nonrecourse deductions shall be allocated among the Members in the same proportion in which they share the Cash Flow of the Company.

5. Any nonrecourse deduction shall be allocated to any Member who bears the economic risk of loss with respect to the Member nonrecourse liability to which such deduction is attributable.

D. Any Company gain or loss realized with respect to property, other than money, contributed to the Company by a Member shall be shared among the Members and regulations to be promulgated thereunder so as to take account of the difference between the Company basis and the fair market value of the property at the time of the contribution ("built-in gain or loss"). Such built-in gain or loss shall be allocated to the contributing Member upon the disposition of the property.

ARTICLE IX
Admission and Withdrawal of a Member

A. A Member may transfer his interest in the Company to another person or entity only with the prior unanimous consent of the other Members either in writing or at a meeting called for such purpose. If all of the other Members do not approve of the transfer, the transferee shall have no right to participate in the management of the business and affairs of the Company or to become a Member. The transferee shall be entitled to receive the share of profits, losses and Cash Flow or other compensation by way of income and the return of contributions to which the transferor otherwise would be entitled.

B. The Members agree to sign such additional documents as may be required in order to admit additional Members to the Company as well as, among other things, to provide for the division of profits, losses and Cash Flow among the Members.

C. All costs and expenses incurred by the Company in connection with the assignment of a Member's interest, including any filing fees and publishing costs and the fees and disbursements of counsel, shall be paid by the assigning Member.

D. Each person who becomes a Member in the Company, by becoming a Member, shall and does hereby ratify and agree to be bound by the terms and conditions of this Agreement.

ARTICLE X
Termination or Dissolution of Company

A. The Company shall be terminated prior to the date of expiration of the term if a majority interest of the Members consent that the Company should be terminated and dissolved, or the Company is dissolved pursuant to this Agreement.

B. The Company shall be terminated in the event any Member (i) withdraws, resigns or is expelled from the Company; (ii) makes an assignment for the benefit of creditors, is the subject of an order for relief under Title 11 of the United States Code, files a petition or answer seeking for himself any reorganization, arrangement, composition, readjustment, liquidation, dissolution or similar relief under any statute, law or regulation, files an answer or other pleading, admitting or failing to contest the material allegations of a petition filed against him in any proceeding of this nature, seeks, consents to, or acquiesces in the appointment of a trustee, receiver or liquidator for all or any substantial part of his properties; (iii) dies; or (iv) a judgment is entered by a court of competent jurisdiction adjudicating him incompetent to manage his person or his property.

C. If the Company is dissolved, the owners of a majority in interest of the remaining Members may elect to reconstitute and continue the Company as a successor Company upon the

same conditions as are set forth in this Agreement. Any such election to continue the Company will not result in the creation of a new Company among the remaining Members, nor will such election require the amendment of this Agreement or the execution of an amended Agreement.

D. Upon the termination and dissolution of the Company, the then Operating Manager, or Operating Managers, if any, or, if there is no Operating Manager, any person elected to perform such liquidation by the written consent of the owners of a majority in interest of the Members, shall proceed to the liquidation of the Company. The proceeds of such liquidation shall be applied and distributed as follows:

1) If any assets of the Company are to be distributed in kind, such assets shall be distributed on the basis of the fair market value thereof, and any Member entitled to any interest in such assets shall receive such interest therein as a tenant-in-common with all other members so entitled. The fair market value of such assets shall be determined by an independent appraiser to be selected by the Company's independent public accountants. The amount by which the fair market value of any Property to be distributed in kind to the Members exceeds or is less than the basis of such Property, shall, to the extent not otherwise recognized by the Company, be taken into account in computing Net Profits or Net Losses (and shall be allocated among the Members) for purposes of crediting or charging the Capital Accounts of, and liquidating distributions to, the Members.

2) All distributions upon liquidation of the Company shall be distributed as follows:

a. To each of the Members, in proportion to the amounts of their respective positive Capital Accounts, as such accounts have been adjusted.

(i) To reflect the Net Profit or Net Loss realized or incurred upon the sale of the Company's property or assets and any deemed sale.

(ii) In accordance with Section 8.2 to reflect all Net Profits or Net Losses with respect to the year of liquidation. No Member shall be liable to repay the negative amount of his Capital Account.

E. Each of the Members shall be furnished with a statement, reviewed by the Company's independent public accountants, which shall set forth the assets and liabilities of the Company as of the date of the Company's liquidation. Upon completion of the liquidation, the Operating Managers shall execute and cause to be filed Articles of Dissolution of the Company and any and all other documents necessary with respect to termination of the company.

ARTICLE XI
Books and Reports

A. The Operating Managers shall cause the Company to maintain the following records:

1. Complete and accurate books of account, in which shall be entered, fully and accurately, each and every transaction of the Company, shall be kept by the Operating Managers at the principal office of the Company. The fiscal year of the company shall be the calendar year. The books of account of the Company shall be kept in accordance with sound accounting practices and principles applied in a consistent manner by the Company; provided, however, that all methods of accounting and treating particular transactions shall be in accordance with the methods of accounting employed for Federal income tax purposes. All determinations by the Operating Managers with respect to the treatment of any item or its allocation for Federal, State or Local tax purposes shall be binding upon all the Members unless the determination is inconsistent with any express provision of the Agreement.

2. A current list of the full name and last known mailing address of each Member set forth in alphabetical order together with the contribution and share in profits and losses of each Member; a copy of the Articles of Organization of the Limited Liability Company and any amendments thereto; a copy of Limited Liability Company's Federal, State and Local income tax returns for the three most recent fiscal years.

3. Any Member shall have the right from time to time at his expense to have his accountants and representatives examine and/or audit the books and records of the Company and the information referred to in this Section, and the Operating Managers will make such books and records of information available for such examinations and/or audits.

B. No value shall be placed for any purpose upon the Company name or the right to its uses, or upon the goodwill of the Company or its business. Upon termination or dissolution of the Company (without reconstitution thereof) as provided in this Agreement, neither the Company name or the right to its use, nor the goodwill of the Company, shall be considered as an asset of the Company.

C. The Operating Manager will cause to be sent to the Members within a reasonable period after the close of each year the following: (a) annual statements of the Company's gross receipts and operating expenses, and the capital accounts of each Member, prepared by the Company's independent public accountants, to be transmitted to each Member; and (b) a report to be transmitted to each Member indicating the Member's share of the Company's profit or loss for that year and the Member's allocable share of all items of income, gain, loss, deduction and credit, for Federal Income Tax purposes.

ARTICLE XII
Tax Elections

A. In the event of a transfer of a Member's interest, or upon the death of a Member, or in the event of the distribution of Company property to any party hereto, the Company may (but need not necessarily) file an election, in accordance with Section 754 of the Code to cause the basis of the Company Property to be adjusted for Federal Income Tax purposes, as provided by Sections 734 and 743 of the Code.

ARTICLE XIII
Miscellaneous

A. Any notice or other communication under this Agreement shall be in writing and shall be considered given when mailed by registered or certified mail, return receipt requested, to the parties at the following addresses (or at such other address as a party shall have previously specified by notice to the others as the address to which shall be given to him):

1. If to the Company, to it in care of the Operating Managers at the address of the Company.
2. If to the Operating Managers, to them at the address of the Company.
3. If to any Member, to him at his address set forth on the books and records of the Company.

B. This Agreement contains a complete statement of all of the arrangements among the parties with respect to the Company and cannot be changed or terminated orally or in any manner other than by a written agreement executed by all of the Members. There are no representations, agreements, arrangements or understandings, oral or written, between or among the parties relating to the subject matter of this Agreement which are not fully expressed in this Agreement.

C. This Agreement shall be construed without regard to any presumption or other rule requiring construction against the party causing this Agreement to be drafted.

D. This Agreement is intended to be performed in accordance with, and only to the extent permitted by, all applicable laws, ordinances, rules and regulations of the jurisdiction in which the Company does business. If any provision of this Agreement, or the application thereof to any person or circumstance, shall for any reason and to any extent, be invalid or unenforceable, the remainder of this Agreement and the application of that provision to other persons or circumstances shall not be affected, but rather shall be enforced to the extent permitted by law.

E. Anything hereinbefore in this Agreement to the contrary notwithstanding, all references to the property of the company is deemed to include the Profits, Losses and Cash Flows of the Property.

F. Irrespective of the place of execution or performance, this Agreement shall be governed in accordance with the laws of the State of NY applicable to agreements made and to be performed in the State of NY.

G. The captions, headings and table of contents in this Agreement are solely for convenience of reference and shall not affect its interpretation.

H. This Agreement may be executed in any number of counterparts each of which shall be an original but all of which shall be deemed to constitute a single document.

I. Whenever the context so requires, the male gender when used herein shall be deemed to include female gender, the female gender shall be deemed to include the male gender, the singular shall be deemed to include the plural and the plural shall be deemed to include the singular.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement effective as of the day and year first above written.

SECTION IV: NEW REQUESTOR ELIGIBILITY INFORMATION
Complete this section only if adding new requestor(s). Attach additional pages if necessary.

If answering "yes" to any of the following questions, please provide additional information as an attachment. Please refer to ECL § 27-1407 for details.

	Y	N
1. Are any enforcement actions pending against the requestor regarding this site?	◯	◯
2. Is the requestor presently subject to an existing order for the investigation, removal or remediation relating to contamination at the site?	◯	◯
3. Is the requestor subject to an outstanding claim by the Spill Fund for the site? Any questions regarding whether a party is subject to a spill claim should be discussed with the Spill Fund Administrator.	◯	◯
4. Has the requestor been determined in an administrative, civil or criminal proceeding to be in violation of (i) any provision of the subject law; (ii) any order or determination; (iii) any regulation implementing ECL Article 27 Title 14; or (iv) any similar statute or regulation of the state or federal government? If so, provide additional information as an attachment.	◯	◯
5. Has the requestor previously been denied entry to the BCP? If so, include information relative to the application, such as site name, address, DEC site number, reason for denial, and any other relevant information.	◯	◯
6. Has the requestor been found in a civil proceeding to have committed a negligent or intentionally tortious act involving the handling, storing, treating, disposing or transporting or contaminants?	◯	◯
7. Has the requestor been convicted of a criminal offense (i) involving the handling, storing, treating, disposing or transporting of contaminants; or (ii) that involves a violent felony, fraud, bribery, perjury, theft, or offense against public administration (as that term is used in Article 195 of the Penal Law) under federal law or the laws of any state?	◯	◯
8. Has the requestor knowingly falsified statements or concealed material facts in any matter within the jurisdiction of the Department, or submitted a false statement or made use of or made a false statement in connection with any document or application submitted to the Department?	◯	◯

SECTION IV: NEW REQUESTOR ELIGIBILITY INFORMATION (continued)	Y	N
9. Is the requestor an individual or entity of the type set forth in ECL 27-1407.9(f) that committed an act or failed to act, and such act or failure to act could be the basis for denial of a BCP application?	○	○
10. Was the requestor's participation in any remedial program under DEC's oversight terminated by DEC or by a court for failure to substantially comply with an agreement or order?	○	○
11. Are there any unregistered bulk storage tanks on-site which require registration?	○	○

12. THE NEW REQUESTOR MUST CERTIFY THAT IT IS EITHER A PARTICIPANT OR VOLUNTEER IN ACCORDANCE WITH ECL § 27-1405(1) BY CHECKING ONE OF THE BOXES BELOW:

☐ PARTICIPANT	☐ VOLUNTEER
A requestor who either (1) was the owner of the site at the time of the disposal of contamination or (2) is otherwise a person responsible for the contamination, unless the liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the disposal of contamination.	A requestor other than a participant, including a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the disposal of a hazardous waste or discharge of petroleum. NOTE: By checking this box, a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site certifies that they have exercised appropriate care with respect to the hazardous waste found at the facility by taking reasonable steps to: (i) stop any continuing discharge; (ii) prevent any threatened future release; (iii) prevent or limit human, environmental or natural resource exposure to any previously released hazardous waste. **If a requestor's liability arises solely as a result of ownership, operation of or involvement with the site, they must submit a statement describing why they should be considered a volunteer – be specific as to the appropriate care taken.**

	N/A	Y	N
13. If the requestor is a volunteer, is a statement describing why the requestor should be considered a volunteer attached?	○	○	○

14. Requestor's relationship to the property (check all that apply):

☐ Prior Owner ☐ Current Owner ☐ Potential/Future Purchaser ☐ Other: _____

	N/A	Y	N
15. If the requestor is not the current site owner, proof of site access sufficient to complete the remediation must be submitted. Proof must show that the requestor will have access to the property before being added to the BCA and throughout the BCP project, including the ability to place an easement on the site. Is this proof attached?	○	○	○

SECTION V: PROPERTY DESCRIPTION AND REQUESTED CHANGES

Complete this section only if property is being added to or removed from the site, a lot merger or other change to site SBL(s) has occurred, or if modifying the site address for any reason.

1. Property information on current agreement (as modified by any previous amendments, if applicable):

ADDRESS: 147 West Tupper Street

CITY/TOWN: Buffalo | ZIP CODE: 14201

CURRENT PROPERTY INFORMATION | TOTAL ACREAGE OF CURRENT SITE: 0.73

PARCEL ADDRESS	SECTION	BLOCK	LOT	ACREAGE
See Attachment 1				

2. Requested change (check appropriate boxes below):

☑ a. Addition of property (may require additional citizen participation depending on the nature of the expansion – see instructions)

PARCELS ADDED: 157 West Tupper Street

PARCEL ADDRESS	SECTION	BLOCK	LOT	ACREAGE
157 West Tupper Street	111.29	4	26	.0496

TOTAL ACREAGE TO BE ADDED: 0.0496

☐ b. Reduction of property

PARCELS REMOVED:

PARCEL ADDRESS	SECTION	BLOCK	LOT	ACREAGE

TOTAL ACREAGE TO BE REMOVED: _____

☐ c. Change to SBL (e.g., lot merge, subdivision, address change)

NEW PROPERTY INFORMATION:

PARCEL ADDRESS	SECTION	BLOCK	LOT	ACREAGE

3. TOTAL REVISED SITE ACREAGE: ~0.78

4. For all changes requested in this section, documentation must be provided. Required attachments are listed in the application instructions. Is the required documentation attached?	Y	N
	◉	○

APPLICATION TO AMEND BROWNFIELD CLEANUP AGREEMENT AND AMENDMENT SUPPLEMENT QUESTIONS FOR SITE SEEKING TANGIBLE PROPERTY CREDITS IN NEW YORK CITY ONLY

Complete this section only if the site is located within the five counties comprising New York City and the requestor is seeking a determination of eligibility for tangible property credits. Provide supporting documentation as required. Refer to the application instructions for additional information.

	Y	N
1. Is the site located in Bronx, Kings, New York, Queens or Richmond County?	○	○
2. Is the requestor seeking a determination that the site is eligible for the tangible property credit component of the brownfield redevelopment tax credit?	○	○
3. Is at least 50% of the site area located within an environmental zone pursuant to Tax Law 21(6)? Please see DEC's website for more information.	○	○
4. Is the property upside down as defined below? **From ECL 27-1405(31):** "Upside down" shall mean a property where the projected and incurred cost of the investigation and remediation which is protective for the anticipated use of the property equals or exceeds seventy-five percent of its independent appraised value, as of the date of submission of the application for participation in the brownfield cleanup program, developed under the hypothetical condition that the property is not contaminated.	○	○
5. Is the project and affordable housing project as defined below? **From 6 NYCRR 375-3.2(a) as of August 12, 2016:** (a) "Affordable housing project" means, for purposes of this part, title fourteen of article twenty-seven of the environmental conservation law and section twenty-one of the tax law only, a project that is developed for residential use or mixed residential use that must include affordable residential rental units and/or affordable home ownership units. (1) Affordable residential rental projects under this subdivision must be subject to a federal, state, or local government housing agency's affordable housing program, or a local government's regulatory agreement or legally binding restriction, which defines (i) a percentage of the residential rental units in the affordable housing project to be dedicated to (ii) tenants at a defined maximum percentage of the area median income based on the occupants' household's annual gross income. (2) Affordable home ownership projects under this subdivision must be subject to a federal, state, or local government housing agency's affordable housing program, or a local government's regulatory agreement or legally binding restriction, which sets affordable units aside for homeowners at a defined maximum percentage of the area median income. (3) "Area median income" means, for purposes of this subdivision, the area median income for the primary metropolitan statistical area, or for the county if located outside a metropolitan statistical area, as determined by the United States Department of Housing and Urban Development, or its successor, for a family of four, as adjusted for family size.	○	○

APPLICATION SUPPLEMENT FOR NYC SITES (continued)	Y	N
6. Is the project a planned renewable energy facility site as defined below? **From ECL 27-1405(33) as of April 9, 2022:** "Renewable energy facility site" shall mean real property (a) this is used for a renewable energy system, as defined in section sixty-six-p of the public service law; or (b) any co-located system storing energy generated from such a renewable energy system prior to delivering it to the bulk transmission, sub-transmission, or distribution system. **From Public Service Law Article 4 Section 66-p as of April 23, 2021:** (b) "renewable energy systems" means systems that generate electricity or thermal energy through use of the following technologies: solar thermal, photovoltaics, on land and offshore wind, hydroelectric, geothermal electric, geothermal ground source heat, tidal energy, wave energy, ocean thermal, and fuel cells which do not utilize a fossil fuel resource in the process of generating electricity.	○	○
7. Is the site located within a disadvantaged community, within a designated Brownfield Opportunity Area, and meets the conformance determinations pursuant to subdivision ten of section nine-hundred-seventy-r of the general municipal law? **From ECL 75-0111 as of April 9, 2022:** (5) "Disadvantaged communities" means communities that bear the burdens of negative public health effects, environmental pollution, impacts of climate change, and possess certain socioeconomic criteria, or comprise high-concentrations of low- and moderate-income households, as identified pursuant to section 75-0111 of this article.	○	○

PART II. BROWNFIELD CLEANUP PROGRAM AMENDMENT	
EXISTING AGREEMENT INFORMATION	
BCP SITE NAME: 147 West Tupper Street Site	BCP SITE NUMBER: C915389
NAME OF CURRENT APPLICANT(S): 147 West Tupper LLC	
INDEX NUMBER OF AGREEMENT: C915389-11-22	DATE OF ORIGINAL AGREEMENT 11/21/2022

Declaration of Amendment:

By the requestor(s) and/or applicant(s) signature(s) below, and subsequent signature by the Department, the above application to amend the Brownfield Cleanup Agreement described above is hereby approved. This Amendment is made in accordance with and subject to all of the BCA and all applicable guidance, regulations and state laws applicable thereto. All other substantive and procedural terms of the Agreement will remain unchanged and in full force and effect regarding the parties to the Agreement.

Nothing contained herein constitutes a waiver by the Department or the State of New York of any rights held in accordance with the Agreement or any applicable state and/or federal law or a release for any party from obligations held under the Agreement or those same laws.

STATEMENT OF CERTIFICATION AND SIGNATURES: NEW REQUESTOR

Complete the appropriate section (individual or entity) below only if this Amendment adds a new requestor. Attach additional pages as needed.

(Individual)

I hereby affirm that the information provided on this form and its attachments is true and complete to the best of my knowledge and belief. I am aware that any false statement made herein is punishable as a Class A misdemeanor pursuant to section 210.45 of the Penal Law. My signature below constitutes the requisite approval for the amendment to the BCA Application, which will be effective upon signature by the Department.

Date: _____ Signature: _____

Print Name: _____

(Entity)

I hereby affirm that I am _____(title) of _____(entity); that I am authorized by that entity to make this application; that this application was prepared by me or under my supervision and direction; and that information provided on this form and its attachments is true and complete to the best of my knowledge and belief. I am aware that any false statement made herein is punishable as a Class A misdemeanor pursuant to Section 210.45 of the Penal Law.

_____ signature below constitutes the requisite approval for the amendment to the BCA Application, which will be effective upon signature by the Department.

Date: _____ Signature: _____

Print Name: _____

STATEMENT OF CERTIFICATION AND SIGNATURES: EXISTING APPLICANT(S)
An authorized representative of each applicant must complete and sign the appropriate section (individual or entity) below. Attach additional pages as needed.

(Individual)

I hereby affirm that I am a party to the Brownfield Cleanup Agreement and/or Application referenced in Section I above and that I am aware of this Application for an Amendment to that Agreement and/or Application. My signature below constitutes the requisite approval for the amendment to the BCA Application, which will be effective upon signature by the Department.

Date: _____ Signature: _____

Print Name: _____

(Entity)

I hereby affirm that I am Manager (title) of 147 West Tupper LLC (entity) which is a party to the Brownfield Cleanup Agreement and/or Application referenced in Section I above and that I am aware of this Application for an Amendment to that Agreement and/or Application. Christopher Wan signature below constitutes the requisite approval for the amendment to the BCA Application, which will be effective upon signature by the Department.

Date: 03/15/2023 Signature: _____

Print Name: Christopher Wan

PLEASE SEE THE FOLLOWING PAGE FOR SUBMITTAL INSTRUCTIONS

REMAINDER OF THIS AMENDMENT WILL BE COMPLETED SOLELY BY THE DEPARTMENT

Status of Agreement:

☐ PARTICIPANT A requestor who either (1) was the owner of the site at the time of the disposal of contamination or (2) is otherwise a person responsible for the contamination, unless the liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the disposal of contamination.	☒ VOLUNTEER A requestor other than a participant, including a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the contamination.

Effective Date of the Original Agreement: 11/25/22

Signature by the Department:

DATED: 4/6/23

NEW YORK STATE DEPARTMENT OF
ENVIRONMENTAL CONSERVATION

By: _____

Janet Brown, Assistant Director
Division of Environmental Remediation

Site Code: C915389

NEW YORK STATE | Department of Environmental Conservation

BROWNFIELD CLEANUP PROGRAM (BCP) APPLICATION TO AMEND BROWNFIELD CLEANUP AGREEMENT AND AMENDMENT

Please refer to the attached instructions for guidance on completing this application.

Submission of a full BCP application will be required should this application be determined to be a major amendment. If the amendment seeks to add or subtract more than an insignificant acreage of property to the BCA, applicants are encouraged to consult with the DEC project team prior to submitting this application.

PART I. BROWNFIELD CLEANUP AGREEMENT AMENDMENT APPLICATION

1. Check the appropriate box(es) below based on the nature of the amendment modification(s) requested:

☐ Amendment to modify the existing BCA (check one or more boxes below):

- ☐ Add applicant(s)
- ☐ Substitute applicant(s)
- ☐ Remove applicant(s)
- ☐ Change in name of applicant(s)

☐ Amendment to reflect a transfer of title to all or part of the brownfield site:

a. A copy of the recorded deed must be provided. Is this attached? Yes ◯ No ◯

b. ☐ Change in ownership ☐ Additional owner (such as a beneficial owner)

c. Pursuant to 6 NYCRR Part 375-1.11(d), a Change of Use form should have been submitted prior to a transfer of ownership. If this has not yet been submitted, include the form with this application. Is this form attached? Yes ◯ No ◯ Submitted on: _____

☐ Amendment to modify description of the property(ies) listed in the existing BCA

☑ Amendment to expand or reduce property boundaries of the property(ies) listed in the existing BCA

☐ Sites in Bronx, Kings, New York, Queens or Richmond Counties ONLY: amendment to request determination that the site is eligible for tangible property credit component of the brownfield redevelopment tax credit.

☐ Other (explain in detail below)

2. REQUIRED: Please provide a brief narrative describing the specific requests included in this amendment:

Add 167 West Tupper Street to the existing BCA Site #C915389

SECTION I: CURRENT AGREEMENT INFORMATION *This section must be completed in full. Attach additional pages as necessary.*

SECTION IV: NEW REQUESTOR ELIGIBILITY INFORMATION
Complete this section only if adding new requestor(s). Attach additional pages if necessary.

If answering "yes" to any of the following questions, please provide additional information as an attachment. Please refer to ECL § 27-1407 for details.

	Y	N
1. Are any enforcement actions pending against the requestor regarding this site?	◯	◯
2. Is the requestor presently subject to an existing order for the investigation, removal or remediation relating to contamination at the site?	◯	◯
3. Is the requestor subject to an outstanding claim by the Spill Fund for the site? Any questions regarding whether a party is subject to a spill claim should be discussed with the Spill Fund Administrator.	◯	◯
4. Has the requestor been determined in an administrative, civil or criminal proceeding to be in violation of (i) any provision of the subject law; (ii) any order or determination; (iii) any regulation implementing ECL Article 27 Title 14; or (iv) any similar statute or regulation of the state or federal government? If so, provide additional information as an attachment.	◯	◯
5. Has the requestor previously been denied entry to the BCP? If so, include information relative to the application, such as site name, address, DEC site number, reason for denial, and any other relevant information.	◯	◯
6. Has the requestor been found in a civil proceeding to have committed a negligent or intentionally tortious act involving the handling, storing, treating, disposing or transporting or contaminants?	◯	◯
7. Has the requestor been convicted of a criminal offense (i) involving the handling, storing, treating, disposing or transporting of contaminants; or (ii) that involves a violent felony, fraud, bribery, perjury, theft, or offense against public administration (as that term is used in Article 195 of the Penal Law) under federal law or the laws of any state?	◯	◯
8. Has the requestor knowingly falsified statements or concealed material facts in any matter within the jurisdiction of the Department, or submitted a false statement or made use of or made a false statement in connection with any document or application submitted to the Department?	◯	◯

Site Code: C915389

SECTION IV: NEW REQUESTOR ELIGIBILITY INFORMATION (continued)	Y	N
9. Is the requestor an individual or entity of the type set forth in ECL 27-1407.9(f) that committed an act or failed to act, and such act or failure to act could be the basis for denial of a BCP application?	◯	◯
10. Was the requestor's participation in any remedial program under DEC's oversight terminated by DEC or by a court for failure to substantially comply with an agreement or order?	◯	◯
11. Are there any unregistered bulk storage tanks on-site which require registration?	◯	◯

12. THE NEW REQUESTOR MUST CERTIFY THAT IT IS EITHER A PARTICIPANT OR VOLUNTEER IN ACCORDANCE WITH ECL § 27-1405(1) BY CHECKING ONE OF THE BOXES BELOW:

☐ PARTICIPANT

A requestor who either (1) was the owner of the site at the time of the disposal of contamination or (2) is otherwise a person responsible for the contamination, unless the liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the disposal of contamination.

☐ VOLUNTEER

A requestor other than a participant, including a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the disposal of a hazardous waste or discharge of petroleum.

NOTE: By checking this box, a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site certifies that they have exercised appropriate care with respect to the hazardous waste found at the facility by taking reasonable steps to: (i) stop any continuing discharge; (ii) prevent any threatened future release; (iii) prevent or limit human, environmental or natural resource exposure to any previously released hazardous waste.

If a requestor's liability arises solely as a result of ownership, operation of or involvement with the site, they must submit a statement describing why they should be considered a volunteer – be specific as to the appropriate care taken.

	N/A	Y	N
13. If the requestor is a volunteer, is a statement describing why the requestor should be considered a volunteer attached?	◯	◯	◯

14. Requestor's relationship to the property (check all that apply):

☐ Prior Owner ☐ Current Owner ☐ Potential/Future Purchaser ☐ Other: _____

	N/A	Y	N
15. If the requestor is not the current site owner, proof of site access sufficient to complete the remediation must be submitted. Proof must show that the requestor will have access to the property before being added to the BCA and throughout the BCP project, including the ability to place an easement on the site. Is this proof attached?	◯	◯	◯

Site Code: C915389

SECTION V: PROPERTY DESCRIPTION AND REQUESTED CHANGES

Complete this section only if property is being added to or removed from the site, a lot merger or other change to site SBL(s) has occurred, or if modifying the site address for any reason.

1. Property information on current agreement (as modified by any previous amendments, if applicable):

ADDRESS: 147 West Tupper Street

APPLICATION TO AMEND BROWNFIELD CLEANUP AGREEMENT AND AMENDMENT SUPPLEMENT QUESTIONS FOR SITE SEEKING TANGIBLE PROPERTY CREDITS IN NEW YORK CITY ONLY

Complete this section only if the site is located within the five counties comprising New York City and the requestor is seeking a determination of eligibility for tangible property credits. Provide supporting documentation as required. Refer to the application instructions for additional information.

	Y	N
1. Is the site located in Bronx, Kings, New York, Queens or Richmond County?	○	◉
2. Is the requestor seeking a determination that the site is eligible for the tangible property credit component of the brownfield redevelopment tax credit? NA	○	○
3. Is at least 50% of the site area located within an environmental zone pursuant to Tax Law 21(6)? Please see DEC's website for more information.	○	◉
4. Is the property upside down as defined below? NA **From ECL 27-1405(31):** "Upside down" shall mean a property where the projected and incurred cost of the investigation and remediation which is protective for the anticipated use of the property equals or exceeds seventy-five percent of its independent appraised value, as of the date of submission of the application for participation in the brownfield cleanup program, developed under the hypothetical condition that the property is not contaminated.	○	○
5. Is the project and affordable housing project as defined below? **From 6 NYCRR 375-3.2(a) as of August 12, 2016:** (a) "Affordable housing project" means, for purposes of this part, title fourteen of article twenty-seven of the environmental conservation law and section twenty-one of the tax law only, a project that is developed for residential use or mixed residential use that must include affordable residential rental units and/or affordable home ownership units. (1) Affordable residential rental projects under this subdivision must be subject to a federal, state, or local government housing agency's affordable housing program, or a local government's regulatory agreement or legally binding restriction, which defines (i) a percentage of the residential rental units in the affordable housing project to be dedicated to (ii) tenants at a defined maximum percentage of the area median income based on the occupants' household's annual gross income. (2) Affordable home ownership projects under this subdivision must be subject to a federal, state, or local government housing agency's affordable housing program, or a local government's regulatory agreement or legally binding restriction, which sets affordable units aside for homeowners at a defined maximum percentage of the area median income. (3) "Area median income" means, for purposes of this subdivision, the area median income for the primary metropolitan statistical area, or for the county if located outside a metropolitan statistical area, as determined by the United States Department of Housing and Urban Development, or its successor, for a family of four, as adjusted for family size.	○	◉

APPLICATION SUPPLEMENT FOR NYC SITES (continued)	Y	N
6. Is the project a planned renewable energy facility site as defined below? **From ECL 27-1405(33) as of April 9, 2022:** "Renewable energy facility site" shall mean real property (a) this is used for a renewable energy system, as defined in section sixty-six-p of the public service law; or (b) any co-located system storing energy generated from such a renewable energy system prior to delivering it to the bulk transmission, sub-transmission, or distribution system. **From Public Service Law Article 4 Section 66-p as of April 23, 2021:** (b) "renewable energy systems" means systems that generate electricity or thermal energy through use of the following technologies: solar thermal, photovoltaics, on land and offshore wind, hydroelectric, geothermal electric, geothermal ground source heat, tidal energy, wave energy, ocean thermal, and fuel cells which do not utilize a fossil fuel resource in the process of generating electricity.	○	◉
7. Is the site located within a disadvantaged community, within a designated Brownfield Opportunity Area, and meets the conformance determinations pursuant to subdivision ten of section nine-hundred-seventy-r of the general municipal law? **From ECL 75-0111 as of April 9, 2022:** (5) "Disadvantaged communities" means communities that bear the burdens of negative public health effects, environmental pollution, impacts of climate change, and possess certain socioeconomic criteria, or comprise high-concentrations of low- and moderate-income households, as identified pursuant to section 75-0111 of this article.	○	◉

PART II. BROWNFIELD CLEANUP PROGRAM AMENDMENT	
EXISTING AGREEMENT INFORMATION	
BCP SITE NAME: 147 West Tupper Street Site	BCP SITE NUMBER: C915389
NAME OF CURRENT APPLICANT(S): 147 West Tupper LLC	
INDEX NUMBER OF AGREEMENT: C915389-11-22	DATE OF ORIGINAL AGREEMENT 11/21/2022

Declaration of Amendment:

By the requestor(s) and/or applicant(s) signature(s) below, and subsequent signature by the Department, the above application to amend the Brownfield Cleanup Agreement described above is hereby approved. This Amendment is made in accordance with and subject to all of the BCA and all applicable guidance, regulations and state laws applicable thereto. All other substantive and procedural terms of the Agreement will remain unchanged and in full force and effect regarding the parties to the Agreement.

Nothing contained herein constitutes a waiver by the Department or the State of New York of any rights held in accordance with the Agreement or any applicable state and/or federal law or a release for any party from obligations held under the Agreement or those same laws.

STATEMENT OF CERTIFICATION AND SIGNATURES: NEW REQUESTOR

Complete the appropriate section (individual or entity) below only if this Amendment adds a new requestor. Attach additional pages as needed.

(Individual)

I hereby affirm that the information provided on this form and its attachments is true and complete to the best of my knowledge and belief. I am aware that any false statement made herein is punishable as a Class A misdemeanor pursuant to section 210.45 of the Penal Law. My signature below constitutes the requisite approval for the amendment to the BCA Application, which will be effective upon signature by the Department.

Date: _____ Signature: _____

Print Name: _____

(Entity)

I hereby affirm that I am _____(title) of _____(entity); that I am authorized by that entity to make this application; that this application was prepared by me or under my supervision and direction; and that information provided on this form and its attachments is true and complete to the best of my knowledge and belief. I am aware that any false statement made herein is punishable as a Class A misdemeanor pursuant to Section 210.45 of the Penal Law.

_____ signature below constitutes the requisite approval for the amendment to the BCA Application, which will be effective upon signature by the Department.

Date: _____ Signature: _____

Print Name: _____

Site Code: C915389

STATEMENT OF CERTIFICATION AND SIGNATURES: EXISTING APPLICANT(S)
An authorized representative of each applicant must complete and sign the appropriate section (individual or entity) below. Attach additional pages as needed.

(Individual)

I hereby affirm that I am a party to the Brownfield Cleanup Agreement and/or Application referenced in Section I above and that I am aware of this Application for an Amendment to that Agreement and/or Application. My signature below constitutes the requisite approval for the amendment to the BCA Application, which will be effective upon signature by the Department.

Date: _____ Signature: _____

Print Name: _____

(Entity)

I hereby affirm that I am Manager (title) of 147 West Tupper LLC (entity) which is a party to the Brownfield Cleanup Agreement and/or Application referenced in Section I above and that I am aware of this Application for an Amendment to that Agreement and/or Application. Christopher Wan signature below constitutes the requisite approval for the amendment to the BCA Application, which will be effective upon signature by the Department.

Date: 08/20/2024 Signature: _____

Print Name: Christopher Wan

PLEASE SEE THE FOLLOWING PAGE FOR SUBMITTAL INSTRUCTIONS

REMAINDER OF THIS AMENDMENT WILL BE COMPLETED SOLELY BY THE DEPARTMENT

Status of Agreement:

☐ PARTICIPANT A requestor who either (1) was the owner of the site at the time of the disposal of contamination or (2) is otherwise a person responsible for the contamination, unless the liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the disposal of contamination.	☑ VOLUNTEER A requestor other than a participant, including a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the contamination.

Effective Date of the Original Agreement: 11/21/2022

Signature by the Department:

THIS PROPERTY IS SUBJECT TO AN ENVIRONMENTAL EASEMENT HELD BY THE NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION PURSUANT TO TITLE 36 OF ARTICLE 71 OF THE NEW YORK ENVIRONMENTAL CONSERVATION LAW. THE ENGINEERING AND INSTITUTIONAL CONTROLS FOR THIS EASEMENT ARE SET FORTH IN MORE DETAIL IN THE SITE MANAGEMENT PLAN (SMP). A COPY OF THE SMP MUST BE OBTAINED BY ANY PARTY WITH AN INTEREST IN THE PROPERTY. THE SMP CAN BE OBTAINED FROM NYS DEPARTMENT OF ENVIRONMENTAL CONSERVATION, DIVISION OF ENVIRONMENTAL REMEDIATION, SITE CONTROL SECTION, 625 BROADWAY, ALBANY, NY 12233 OR AT DERWEB@DEC.NY.GOV

THE UNDERGROUND UTILITIES SHOWN HAVE BEEN LOCATED FROM FIELD SURVEY INFORMATION AND EXISTING RECORD DRAWINGS PROVIDED TO THE SURVEYOR. THE SURVEYOR MAKES NO GUARANTEE THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. ADDITIONAL BURIED UTILITIES/STRUCTURES MAY BE ENCOUNTERED. NO EXCAVATIONS WERE MADE DURING THE PROGRESS OF THIS SURVEY TO SUBSTANTIATE BURIED UTILITIES AND STRUCTURES. THE SURVEYOR FURTHER DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED, ALTHOUGH HE DOES CERTIFY THAT THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM INFORMATION AVAILABLE. BEFORE EXCAVATIONS ARE BEGUN, THE APPROPRIATE AGENCIES SHOULD BE CONTACTED FOR VERIFICATION OF UTILITY TYPE AND FOR FIELD LOCATIONS.

Containing 36,917.94 square feet or 0.848 Acres of land more or less.

APPENDIX B

Community Air Monitoring Program Results

Community Air Monitoring Plan Summary Report
147 West Tupper Street Site
BCP Site No. C915389
Buffalo, New York

Summary of Activities Performed:

- Demo and Remedial Activities

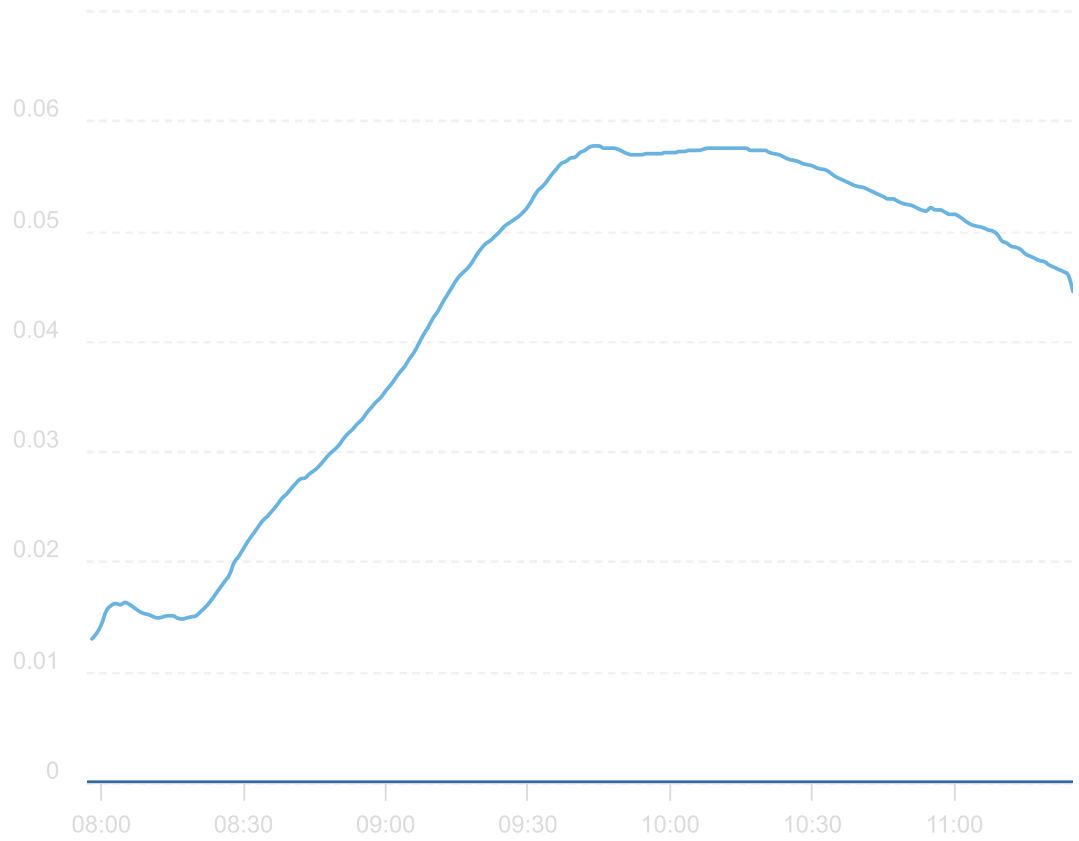
Real Time Community Air Monitoring Work Performed:

CAMP data was collected on the following days:

- 10/3/2024
- 10/28/2024-10/29/2024
- 11/11/2024-11/15/2024
- 11/18/2024-11/22-2024
- 11/25/2024-11/27/2024
- 12/2/2024-12/4/2024
- 12/6/2024
- 12/9/2024-12/11/2024
- 12/13/2024
- 12/16/2024-12/20/2024
- 12/30/2024-12/31/2024
- 1/2/2025
- 1/6/2025
- 1/15/2025-1/17/2025
- 1/23/2025-1/24/2025
- 1/27/2025-1/31/2024
- 2/3/2025-2/4/2025
- 2/6/2025-2/7/2025
- 4/2/2025

Community Air Monitoring Program Results:

Attached monitoring results generally conformed to the Community Air Monitoring perimeter particulate requirement (i.e., <150 ug/m^3) and the organic vapor requirement (i.e., <5 ppm) during Remedial Activities, with the following exceptions:



- On 12/13/2024, 12/17/2024, 12/18/2024, 12/20/2024, 12/23/2024, and 1/28/2025 there was a device malfunction and only VOC measurements were collected from CAMP station #5.
- On 1/29/2025, 1/30/2025, 1/31/2025, 2/3/2025, and 2/4/2025 there was a device malfunction and only VOC measurements were collected from CAMP station #7.
- On 1/16/2025 and 1/27/2025 there was a device malfunction and only VOC measurements were collected from CAMP station #8.
- On 11/11/2024 and 11/26/2024 a brief spike in dust particulates occurred at CAMP station #8 due to demolition related activities occurring on-site.
- On 4/2/2025 there was a device malfunction and only dust measurements were collected from CAMP station #5.

Fact Sheets

Public Notice
Fact Sheet

The New York State Department of Environmental Conservation (DEC) has received a Brownfield Cleanup Program (BCP) application and Draft Remedial Investigation Work Plan from 147 West Tupper LLC for a site known as 147 West Tupper Street Site, site ID #C915389. This site is located in the City of Buffalo, within the County of Erie, and is located at 147 West Tupper Street.

Access the application, Draft Remedial Investigation Work Plan, and other relevant documents online through the DECinfo Locator: https://www.dec.ny.gov/data/DecDocs/C915389/. The documents are also available at the document repository located at Buffalo & Erie County Public Library, 1 Lafayette Square, Buffalo, NY 14203.

There are several ways to comment on BCP applications and work plans. Comments can be submitted to the site Project Manager, Benjamin McPherson, at NYS Dept. of Environmental Conservation, 700 Delaware Avenue, Buffalo, NY 14209; via email at Benjamin.McPherson@dec.ny.gov or by calling (716) 851-7220. All comments must be submitted by **September 23, 2022.**

Site information can be viewed by entering the site ID noted above at: http://www.dec.ny.gov/cfmx/extapps/derexternal/index.cfm?pageid=3

We would also encourage those interested in receiving information on future activities at this site or any other site to sign up to DEC's Contaminated Sites Email List at: http://www.dec.ny.gov/chemical/61092.html

What is the Brownfield Cleanup Program?

New York's Brownfield Cleanup Program (BCP) is designed is to encourage private-sector cleanups of brownfields and to promote their redevelopment as a means to revitalize economically blighted communities. The BCP is an alternative to "greenfield" (land not previously developed or contaminated) development and is intended to remove some of the barriers to, and provide tax incentives for, the redevelopment of brownfields. Since its inception (2003), the BCP has catalyzed the cleanup of more than 500 contaminated sites statewide and incentivized redevelopment. There are more than 550 active sites in the BCP.

Additional information on the State's Brownfield program is available at DEC's website: http://www.dec.ny.gov/chemical/8450.html

SITE No. C915389
NYSDEC REGION 9

November 2023

Remedy Proposed for Brownfield Site Contamination; Public Comment Period Announced

The public is invited to comment on a proposed remedy being reviewed by the New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), to address contamination related to the 147 West Tupper Street Site ("site") located at 147 West Tupper Street, Buffalo, Erie County. Please see the map for the site location.

Based on the findings of the investigation, NYSDEC in consultation with the New York State Department of Health (NYSDOH) has determined that the site does not pose a significant threat to public health or the environment. This decision is based on the nature of the existing contaminants identified at the site and the limited potential for off-site migration of contaminants.

How to Comment: NYSDEC is accepting written comments about the proposed remedy, outlined in the "Remedial Investigation/Alternatives Analysis Report (RI/AAR)" for 45 days, from **November 1, 2023 through December 15, 2023**.

- Access the RI/AAR and other project documents online through the DECinfo Locator: https://www.dec.ny.gov/data/DecDocs/C915389/.
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

Draft Remedial Work Plan: The proposed Unrestricted Use remedy consists of:

- Demolition of on-site buildings to access underlying soil and fill exceeding the unrestricted soil cleanup objectives;
- Investigation of potential impacts below Building 1 after demolition is completed;
- Excavation and off-site disposal of soil and fill exceeding the unrestricted soil cleanup objectives from about 1 to 8 feet below surface grade across the majority of the site;
- Collecting and analyzing end-point soil samples and post-remedial groundwater samples to evaluate the effectiveness of the remedy;
- Importing clean material that meets the established Soil Cleanup Objectives for use as backfill; and
- Implementing a Health and Safety Plan and Community Air Monitoring Plan during all ground intrusive activities.

Where to Find Information

Access project documents through the DECinfo Locator https://www.dec.ny.gov/data/DecDocs/C915389/ and at these location(s):

Buffalo & Erie County Public Library Central Library

www.dec.ny.gov/chemical/8450.html

BROWNFIELD CLEANUP PROGRAM

The proposed remedy was developed by 147 West Tupper LLC ("applicant") after performing a detailed investigation of the site under New York's Brownfield Cleanup Program (BCP). The RI/AAR, which describes the results of the site investigation and proposed remedy is available for review at the locations identified on Page 1.

Next Steps: NYSDEC will consider public comments, revise the cleanup plan as necessary, and issue a final Decision Document. NYSDOH must concur with the proposed remedy. After approval, the proposed remedy becomes the selected remedy. The applicant(s) may then design and perform the cleanup action to address the site contamination, with oversight by NYSDEC and NYSDOH.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The 0.779-acre site and is located on the west side of Elmwood Avenue in a highly developed mixed use residential and commercial area of the City of Buffalo. The site is generally bordered by residential properties to the north and west. An elementary school is directly south of the site across West Tupper Street. The site is currently developed with various residential, apartment, and commercial buildings. Previously, the site had been used as an auto repair facility, laundry facilities, light manufacturing, and as apartments/houses. None of the existing buildings are currently occupied.

The planned development for the site is mixed-use, with commercial spaces on the ground floors and apartment units above.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C915389) at:
https://www.dec.ny.gov/cfmx/extapps/derexternal/index.cfm?pageid=3

Summary of the Investigation: The primary contaminants of concern are semi-volatile organic compounds (SVOCs), and metals. Several chlorinated volatile organic compounds (VOCs) were detected in one groundwater well prior to the site entering the BCP, but were not detected during the investigation. Further investigation of this area will be completed during remedy implementation to confirm whether or not VOCs are present.

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:
https://www.dec.ny.gov/chemical/8450.html

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.

APPENDIX D

NYSDEC and Other Agency Approvals

DECISION DOCUMENT

147 West Tupper Street Site
Brownfield Cleanup Program
Buffalo, Erie County
Site No. C915389
January 2024

Prepared by
Division of Environmental Remediation
New York State Department of Environmental Conservation

DECLARATION STATEMENT - DECISION DOCUMENT

147 West Tupper Street Site
Brownfield Cleanup Program
Buffalo, Erie County
Site No. C915389
January 2024

Statement of Purpose and Basis

This document presents the remedy for the 147 West Tupper Street Site a brownfield cleanup site. The remedial program was chosen in accordance with the New York State Environmental Conservation Law and Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York (6 NYCRR) Part 375.

This decision is based on the Administrative Record of the New York State Department of Environmental Conservation (NYSDEC) for the 147 West Tupper Street Site and the public's input to the proposed remedy presented by NYSDEC.

Description of Selected Remedy

The elements of the selected remedy are as follows:

1. Remedial Design

A remedial design program will be implemented to provide the details necessary for the construction, operation, optimization, maintenance, and monitoring of the remedial program. Green remediation principles and techniques will be implemented to the extent feasible in the design, implementation, and site management of the remedy as per DER-31. The major green remediation components are as follows:

- Considering the environmental impacts of treatment technologies and remedy stewardship over the long term;
- Reducing direct and indirect greenhouse gases and other emissions;
- Increasing energy efficiency and minimizing use of non-renewable energy;
- Conserving and efficiently managing resources and materials;
- Reducing waste, increasing recycling and increasing reuse of materials which would otherwise be considered a waste;
- Maximizing habitat value and creating habitat when possible;
- Fostering green and healthy communities and working landscapes which balance ecological, economic and social goals;
- Integrating the remedy with the end use where possible and encouraging green and sustainable re-development; and
- Additionally, to incorporate green remediation principles and techniques to the extent feasible in the future development at this site, any future on-site buildings shall be constructed, at

a minimum, to meet the 2020 Energy Conservation Construction Code of New York (or most recent edition) to improve energy efficiency as an element of construction.

As part of the remedial design program, to evaluate the remedy with respect to green and sustainable remediation principles, an environmental footprint analysis will be completed. The environmental footprint analysis will be completed using an accepted environmental footprint analysis calculator, such as SEFA (Spreadsheets for Environmental Footprint Analysis, USEPA), SiteWise(TM) (available in the Sustainable Remediation Forum [SURF] library) or similar Department accepted tool. Water consumption, greenhouse gas emissions, renewable and non-renewable energy use, waste reduction and material use will be estimated, and goals for the project related to these green and sustainable remediation metrics, as well as for minimizing community impacts, protecting habitats and natural and cultural resources, and promoting environmental justice, will be incorporated into the remedial design program, as appropriate. The project design specifications will include detailed requirements to achieve the green and sustainable remediation goals. Further, progress with respect to green and sustainable remediation metrics will be tracked during implementation of the remedial action and reported in the Final Engineering Report (FER), including a comparison to the goals established during the remedial design program.

Additionally, the remedial design program will include a climate change vulnerability assessment, to evaluate the impact of climate change on the project site and the proposed remedy. Potential vulnerabilities associated with extreme weather events (e.g., hurricanes, lightning, heat stress and drought), flooding, and sea level rise will be identified, and the remedial design program will incorporate measures to minimize the impact of climate change on potential identified vulnerabilities.

2. Excavation

The existing on-site buildings will be demolished and materials which cannot be beneficially reused on-site will be taken off-site for proper disposal in order to implement the remedy. Excavation and off-site disposal of all on-site soils which exceed unrestricted SCOs, as defined by 6 NYCRR Part 375-6.8, or soil that creates a nuisance condition, as defined in Commissioner Policy CP-51 Section G, will be completed. Approximately 12,100 tons of soil meeting these criteria will be excavated. Collection and analysis of confirmation samples at the remedial excavation extents will be used to verify that SCOs for the site have been achieved. If confirmation sampling indicates that SCOs were not achieved at the stated remedial extent, further remedial excavation may be necessary.

To ensure proper handling and disposal of excavated material, waste characterization sampling will be completed for all identified contaminated site material. Waste characterization sampling will be performed exclusively for the purposes of off-site disposal in a manner suitable to receiving facilities and in conformance with applicable laws, rules, and regulations.

Clean fill meeting the requirements of 6 NYCRR Part 375-6.7(d) will be brought in as needed to replace the excavated soil and establish the designed grades at the site.

3. Building 1 Investigation

Further investigation and remediation (if necessary) beneath Building 1 will be completed after it is demolished, or as the subsurface is otherwise made accessible. The nature and extent of contamination in areas where access was previously limited or unavailable will be immediately and thoroughly investigated pursuant to a plan approved by the Department.

Declaration

The remedy conforms with promulgated standards and criteria that are directly applicable, or that are relevant and appropriate and takes into consideration Department guidance, as appropriate. The remedy is protective of public health and the environment.

Date	Michael Cruden, Director Remedial Bureau E

DECISION DOCUMENT

147 West Tupper Street Site
Buffalo, Erie County
Site No. C915389
January 2024

SECTION 1: SUMMARY AND PURPOSE

The New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), has selected a remedy for the above referenced site. The disposal of contaminants at the site has resulted in threats to public health and the environment that would be addressed by the remedy. The disposal or release of contaminants at this site, as more fully described in this document, has contaminated various environmental media. Contaminants include hazardous waste and/or petroleum.

The New York State Brownfield Cleanup Program (BCP) is a voluntary program. The goal of the BCP is to enhance private-sector cleanups of brownfields and to reduce development pressure on "greenfields." A brownfield site is real property, where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance, based on the reasonably anticipated use of the property.

NYSDEC has issued this document in accordance with the requirements of New York State Environmental Conservation Law and 6 NYCRR Part 375. This document is a summary of the information that can be found in the site-related reports and documents.

SECTION 2: CITIZEN PARTICIPATION

NYSDEC seeks input from the community on all remedies. A public comment period was held, during which the public was encouraged to submit comment on the proposed remedy. All comments on the remedy received during the comment period were considered by NYSDEC in selecting a remedy for the site. Site-related reports and documents were made available for review by the public at the following document repository:

DECInfo Locator - Web Application
https://gisservices.dec.ny.gov/gis/dil/index.html?rs=C915389

Buffalo & Erie County Public Library
Attn: April Tompkins
1 Lafayette Square
Buffalo, NY 14203
Phone: 716-858-7129

Receive Site Citizen Participation Information By Email

Please note that NYSDEC's Division of Environmental Remediation (DER) is "going paperless" relative to citizen participation information. The ultimate goal is to distribute citizen participation information about contaminated sites electronically by way of county email listservs. Information will be distributed for all sites that are being investigated and cleaned up in a particular county under the State Superfund Program, Environmental Restoration Program, Brownfield Cleanup Program and Resource Conservation and Recovery Act Program. We encourage the public to sign up for one or more county listservs at http://www.dec.ny.gov/chemical/61092.html

SECTION 3: SITE DESCRIPTION AND HISTORY

Location: The 0.779-acre 147 West Tupper Street Site is located on the west side of Elmwood Avenue in a highly developed mixed use residential and commercial area of the City of Buffalo, Erie County. The site is bordered by Trinity Place and residential properties to the north, Elmwood Avenue to the east, West Tupper Street to the south, and residential properties to the west.

Site Features: The site consists of a vacant former automotive repair structure, four vacant residential buildings, and a vacant mixed-use building with commercial and residential spaces. The ground surface surrounding the buildings is a mix of asphalt pavement, gravel, and vegetated soil.

Zoning and Land Use: The site is zoned N-2R which is defined as Residential: areas adjoining more intensive mixed-use center, generally defined by compact residential blocks, which occasionally include small mixed-use buildings. The entire site is vacant.

The land uses surrounding the site consist of residential properties to the north and west, commercial properties to the east, and a bilingual elementary school to the south.

Past Use of the Site: Based on historic records and previous investigations, the site was primarily used for residential and commercial purposes, including automotive repair, dental equipment service/manufacturing, storefronts, a restaurant, a union hall, and a beauty salon.

Site Geology and Hydrogeology: Surficial soil at the site consist of urban fill up to eight feet below ground surface (fbgs). Underlying the fill material are alternating layers of native sandy lean clay, lean clay, and fine sand to at least 20 fbgs. Bedrock was not encountered.

Groundwater is present in both the fill and native soil, from 4 to 11 fbgs. Groundwater flow is to the south or southwest.

A site location map is attached as Figure 1.

SECTION 4: LAND USE AND PHYSICAL SETTING

NYSDEC may consider the current, intended, and reasonably anticipated future land use of the site and its surroundings when evaluating a remedy for soil remediation. For this site, alternatives (or an alternative) that restrict(s) the use of the site to restricted-residential use (which allows for commercial use and industrial use) as described in Part 375-1.8(g) were/was evaluated in addition to an alternative which would allow for unrestricted use of the site.

A comparison of the results of the Remedial Investigation (RI) to the appropriate standards, criteria and guidance values (SCGs) for the identified land use and the unrestricted use SCGs for the site contaminants is available in the RI Report.

SECTION 5: ENFORCEMENT STATUS

The Applicant(s) under the Brownfield Cleanup Agreement is a/are Volunteer(s). The Applicant(s) does/do not have an obligation to address off-site contamination. However, NYSDEC has determined that this site does not pose a significant threat to public health or the environment; accordingly, no enforcement actions are necessary.

SECTION 6: SITE CONTAMINATION

6.1: Summary of the Remedial Investigation

A remedial investigation (RI) serves as the mechanism for collecting data to:

- characterize site conditions;
- determine the nature of the contamination; and
- assess risk to human health and the environment.

The RI is intended to identify the nature (or type) of contamination which may be present at a site and the extent of that contamination in the environment on the site, or leaving the site. The RI reports on data gathered to determine if the soil, groundwater, soil vapor, indoor air, surface water or sediments may have been contaminated. Monitoring wells are installed to assess groundwater and soil borings or test pits are installed to sample soil and/or waste(s) identified. If other natural resources are present, such as surface water bodies or wetlands, the water and sediment may be sampled as well. Based on the presence of contaminants in soil and groundwater, soil vapor will also be sampled for the presence of contamination. Data collected in the RI influence the development of remedial alternatives. The RI report is available for review in the site document repository and the results are summarized in section 6.3.

The analytical data collected on this site includes data for:

- groundwater
- soil
- soil vapor
- indoor air
- sub-slab vapor

6.1.1: Standards, Criteria, and Guidance (SCGs)

The remedy must conform to promulgated standards and criteria that are directly applicable or that are relevant and appropriate. The selection of a remedy must also take into consideration guidance, as appropriate. Standards, Criteria and Guidance are hereafter called SCGs.

To determine whether the contaminants identified in various media are present at levels of concern, the data from the RI were compared to media-specific SCGs. NYSDEC has developed SCGs for groundwater, surface water, sediments, and soil. The NYSDOH has developed SCGs for drinking water and soil vapor intrusion. For a full listing of all SCGs see: http://www.dec.ny.gov/regulations/61794.html

6.1.2: RI Results

The data have identified contaminants of concern. A "contaminant of concern" is a contaminant that is sufficiently present in frequency and concentration in the environment to require evaluation for remedial action. Not all contaminants identified on the property are contaminants of concern. The nature and extent of contamination and environmental media requiring action are summarized below. Additionally, the RI Report contains a full discussion of the data. The contaminant(s) of concern identified at this site is/are:

indeno(1,2,3-cd)pyrene	alpha-BHC
benzo(b)fluoranthene	trichloroethene (TCE)
benzo(k)fluoranthene	cis-1,2-dichloroethene
chrysene	tetrachloroethene (PCE)
benzo(a)pyrene	DDT
dibenz[a,h]anthracene	DDD
benzo(a)anthracene	DDE
lead	nickel
manganese	zinc
mercury	copper
arsenic	acetone
barium	dieldrin

The contaminant(s) of concern exceed the applicable SCGs for:

- groundwater
- soil

6.2: Interim Remedial Measures

An interim remedial measure (IRM) is conducted at a site when a source of contamination or exposure pathway can be effectively addressed before issuance of the Decision Document.

There were no IRMs performed at this site during the RI.

6.3: Summary of Environmental Assessment

This section summarizes the assessment of existing and potential future environmental impacts presented by the site. Environmental impacts may include existing and potential future exposure pathways to fish and wildlife receptors, wetlands, groundwater resources, and surface water. The RI report presents a detailed discussion of any existing and potential impacts from the site to fish and wildlife receptors.

Nature and Extent of Contamination:

Soil and groundwater samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), pesticides, and per- and polyfluoroalkyl substances (PFAS). Soil vapor, sub-slab soil vapor, and indoor air samples were analyzed for VOCs. Based on investigations conducted to date, the primary contaminants of concern are SVOCs, pesticides, and metals in soil; and metals and pesticides in groundwater. Several chlorinated VOCs were detected in one groundwater well during the Phase II investigation but were not detected during the RI. Data from the Phase II submitted with the BCP application has also been utilized to determine the nature and extent of contamination at the site.

Surface Soil: Eight samples were collected across the entire site from 0 to 2 inches below the vegetative cover and analyzed at a variable frequency for SVOCs, metals, pesticides, herbicides, PCBs, and PFAS. Seven samples were collected across the entire site from 0 to 6 inches below the vegetative cover and analyzed for VOCs. No VOCs, herbicides, or PCBs were detected at levels exceeding unrestricted soil cleanup objectives (USCOs). No PFAS were detected at levels exceeding current guidance values for unrestricted use. The following compounds were detected exceeding USCOs in surface soil in at least one location:

- Indeno(1,2,3-c,d)pyrene (up to 5.6 parts per million (ppm), USCO 0.5 ppm);
- Benzo(b)fluoranthene (up to 12 ppm, USCO 1 ppm);
- Benzo(k)fluoranthene (up to 5.1 ppm, USCO 0.8 ppm);
- Chrysene (up to 9.2 ppm, USCO 1 ppm);
- Benzo(a)pyrene (up to 9.1 ppm, USCO 1 ppm);
- Dibenz(a,h)anthracene (up to 1.8 ppm, USCO 0.33 ppm);
- Benzo(a)anthracene (up to 7.9 ppm, USCO 1 ppm);
- Lead (up to 1300 ppm, USCO 63 ppm);
- Nickel (up to 36.3 ppm, USCO 30 ppm);
- Manganese (up to 7400 ppm, USCO 1600 ppm);
- Mercury (up to 1.7 ppm, USCO 0.81 ppm);
- Arsenic (up to 16.6 ppm, USCO 13 ppm);
- Copper (up to 59.2 ppm, USCO 50 ppm);
- Zinc (up to 497 ppm, USCO 109 ppm);
- p,p'-Dichlorodiphenyltrichloroethane (DDT) (up to 25 ppm, USCO 3.3 ppm);
- p,p'-Dichlorodiphenyldichloroethane (DDD) (up to 5.3 ppm, USCO 3.3 ppm);
- p,p'-Dichlorodiphenyldichloroethylene (DDE) (up to 47 ppm, USCO 3.3 ppm);
- Dieldrin (up to 59 ppm, USCO 5 ppm).

Investigation results do not indicate that site contaminants have migrated off-site in surface soil.

Subsurface Soil: Samples were collected from thirty-three locations at depths ranging from 1 to 12 fbgs and analyzed at a variable frequency for VOCs, SVOCs, metals, pesticides, herbicides, PCBs, and PFAS. No herbicides, or PCBs were detected at levels exceeding USCOs. No PFAS were detected at levels exceeding current guidance values for unrestricted use. The following compounds were detected exceeding their USCOs in subsurface soil in at least one location:

- Acetone (up to 59 ppm, USCO 50 ppm);
- Indeno(1,2,3-c,d)pyrene (up to 15 ppm, USCO 0.5 ppm);
- Benzo(b)fluoranthene (up to 27 ppm, USCO 1 ppm);
- Benzo(k)fluoranthene (up to 11 ppm, USCO 0.8 ppm);
- Chrysene (up to 26 ppm, USCO 1 ppm);
- Benzo(a)pyrene (up to 23 ppm, USCO 1 ppm);
- Dibenz(a,h)anthracene (up to 5.2 ppm, USCO 0.33 ppm);
- Benzo(a)anthracene (up to 30 ppm, USCO 1 ppm);
- Lead (up to 1950 ppm, USCO 400 ppm);
- Mercury (up to 8.8 ppm, USCO 0.81 ppm);
- Arsenic (up to 38.4 ppm, USCO 13 ppm);
- Barium (up to 527 ppm, USCO 350 ppm);
- Copper (up to 143 ppm, USCO 50 ppm);
- Zinc (up to 633 ppm, USCO 109 ppm);
- Dichlorodiphenyldichloroethane [DDD] (up to 5.5 ppm, USCO 3.3 ppm); and
- Dichlorodiphenyldichloroethylene [DDE] (up to 6.4 ppm, USCO 3.3 ppm);

In addition to the analytical results above, petroleum contamination may be present below Building 1 based on the observation of petroleum staining and odors (nuisance conditions) during the completion of several soil borings.

Investigation results do not indicate that site contaminants have migrated off-site in subsurface soil.

Groundwater: Samples were collected from seven monitoring wells screened at depths between 10 and 20 fbgs. The wells were analyzed at a variable frequency for VOCs, SVOCs, metals, pesticides, herbicides, PCBs, and PFAS. Dissolved metals were analyzed for at one well due to high turbidity in the sample. There were no SVOCs, herbicides, or PCBs detected above groundwater quality standards (GWQS).

During the Phase II Investigation the following compounds were detected in a temporary monitoring well installed below Building 1 exceeding GWQS:

- Tetrachloroethene (up to 6.1 parts per billion (ppb), GWQS 5 ppb);
- Trichloroethene (up to 200 ppb, GWQS 5 ppb); and
- Cis-1,2-dichloroethene (up to 110 ppb, GWQS 5 ppb).

These VOCs were not detected in groundwater during the RI, but additional sampling is needed to confirm these results. The naturally occurring metals iron, magnesium, manganese, and sodium were the only metals detected exceeding GWQS in unfiltered samples. The following compounds were detected at one location exceeding GWQS during the RI:

- Dichlorodiphenyltrichloroethane [DDT] (up to 0.34 ppb, GWQS 0.2 ppb); and
- Alpha-benzenehexachloride [alpha-BHC] (up to 0.02 ppb, GWQS 0.01 ppb).

Investigation results do not indicate that site contaminants have migrated off-site in groundwater.

Soil Vapor: Eight soil vapor probes were installed across the site and analyzed for VOCs. Probes were installed to 4 fbgs. Multiple VOCs were detected at all eight locations but were generally low in concentration. There are currently no standards for soil vapor.

Investigation results do not indicate that site contaminants have the potential to migrate off-site in soil vapor.

Sub-Slab Soil Vapor and Indoor Air: Four sub-slab soil vapor/indoor air sampling point pairs were installed in buildings across the site and analyzed for VOCs. Multiple VOCs were detected at all four locations but were generally low in concentration. All of the buildings sampled are vacant and planned for demolition prior to site redevelopment.

Investigation results do not indicate that site contaminants have the potential to cause off-site soil vapor intrusion.

6.4: Summary of Human Exposure Pathways

This human exposure assessment identifies ways in which people may be exposed to site-related contaminants. Chemicals can enter the body through three major pathways (breathing, touching or swallowing). This is referred to as *exposure.*

Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil), may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Sampling indicates soil vapor intrusion is not a concern for on- or off-site structures.

6.5: Summary of the Remediation Objectives

The objectives for the remedial program have been established through the remedy selection process stated in 6 NYCRR Part 375. The goal for the remedial program is to restore the site to pre-disposal conditions to the extent feasible. At a minimum, the remedy shall eliminate or mitigate all significant threats to public health and the environment presented by the

contamination identified at the site through the proper application of scientific and engineering principles.

The remedial action objectives for this site are:

Groundwater

RAOs for Public Health Protection

- Prevent ingestion of groundwater with contaminant levels exceeding drinking water standards.

RAOs for Environmental Protection

- Restore ground water aquifer to pre-disposal/pre-release conditions, to the extent practicable.
- Remove the source of ground or surface water contamination.

Soil

RAOs for Public Health Protection

- Prevent ingestion/direct contact with contaminated soil.
- Prevent inhalation of or exposure from contaminants volatilizing from contaminants in soil.

SECTION 7: ELEMENTS OF THE SELECTED REMEDY

The alternatives developed for the site and the evaluation of the remedial criteria are presented in the Alternative Analysis. The remedy is selected pursuant to the remedy selection criteria set forth in DER-10, Technical Guidance for Site Investigation and Remediation and 6 NYCRR Part 375.

The selected remedy is a Track 1: Unrestricted use remedy.

The selected remedy is referred to as the Track 1 Excavation remedy.

The elements of the selected remedy, as shown in Figure 2, are as follows:

1. Remedial Design

A remedial design program will be implemented to provide the details necessary for the construction, operation, optimization, maintenance, and monitoring of the remedial program. Green remediation principles and techniques will be implemented to the extent feasible in the design, implementation, and site management of the remedy as per DER-31. The major green remediation components are as follows:

- Considering the environmental impacts of treatment technologies and remedy stewardship over the long term;
- Reducing direct and indirect greenhouse gases and other emissions;
- Increasing energy efficiency and minimizing use of non-renewable energy;
- Conserving and efficiently managing resources and materials;

- Reducing waste, increasing recycling and increasing reuse of materials which would otherwise be considered a waste;
- Maximizing habitat value and creating habitat when possible;
- Fostering green and healthy communities and working landscapes which balance ecological, economic and social goals;
- Integrating the remedy with the end use where possible and encouraging green and sustainable re-development; and
- Additionally, to incorporate green remediation principles and techniques to the extent feasible in the future development at this site, any future on-site buildings shall be constructed, at a minimum, to meet the 2020 Energy Conservation Construction Code of New York (or most recent edition) to improve energy efficiency as an element of construction.

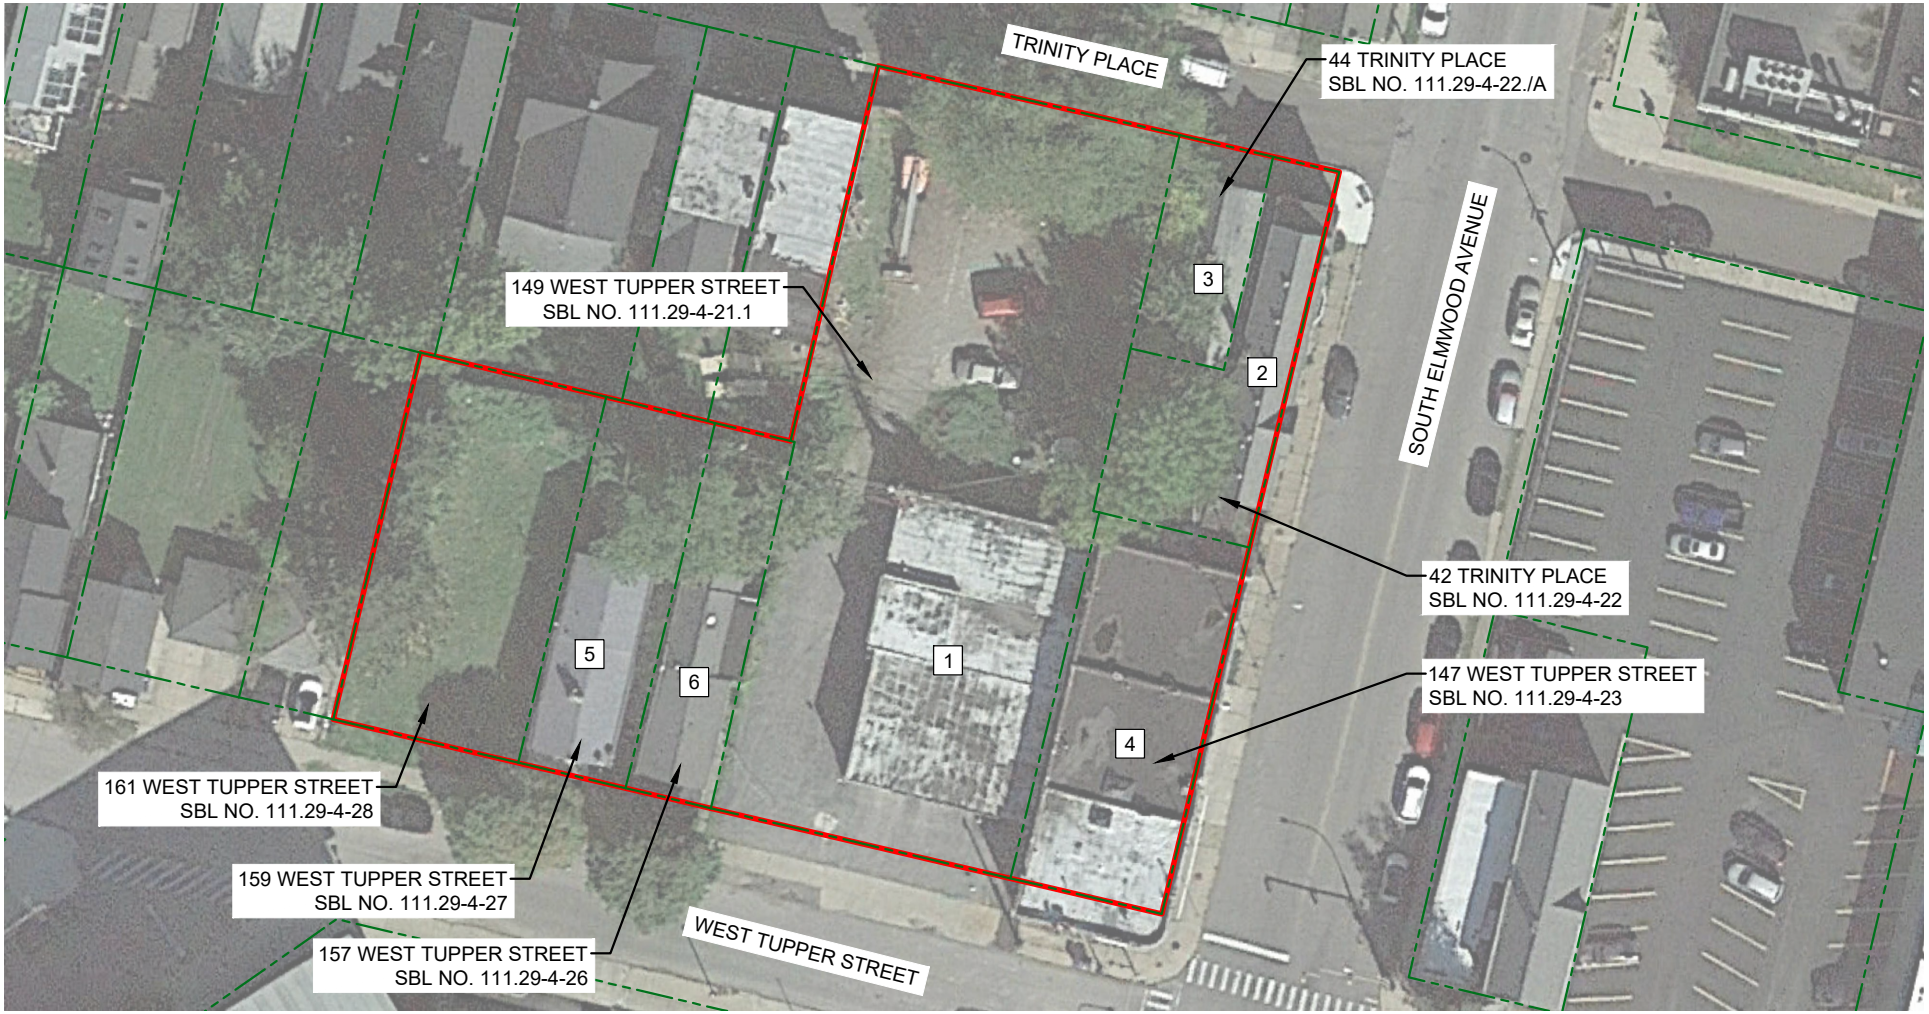
As part of the remedial design program, to evaluate the remedy with respect to green and sustainable remediation principles, an environmental footprint analysis will be completed. The environmental footprint analysis will be completed using an accepted environmental footprint analysis calculator, such as SEFA (Spreadsheets for Environmental Footprint Analysis, USEPA), SiteWise(TM) (available in the Sustainable Remediation Forum [SURF] library) or similar Department accepted tool. Water consumption, greenhouse gas emissions, renewable and non-renewable energy use, waste reduction and material use will be estimated, and goals for the project related to these green and sustainable remediation metrics, as well as for minimizing community impacts, protecting habitats and natural and cultural resources, and promoting environmental justice, will be incorporated into the remedial design program, as appropriate. The project design specifications will include detailed requirements to achieve the green and sustainable remediation goals. Further, progress with respect to green and sustainable remediation metrics will be tracked during implementation of the remedial action and reported in the Final Engineering Report (FER), including a comparison to the goals established during the remedial design program.

Additionally, the remedial design program will include a climate change vulnerability assessment, to evaluate the impact of climate change on the project site and the proposed remedy. Potential vulnerabilities associated with extreme weather events (e.g., hurricanes, lightning, heat stress and drought), flooding, and sea level rise will be identified, and the remedial design program will incorporate measures to minimize the impact of climate change on potential identified vulnerabilities.

2. Excavation

The existing on-site buildings will be demolished and materials which cannot be beneficially reused on-site will be taken off-site for proper disposal in order to implement the remedy. Excavation and off-site disposal of all on-site soils which exceed unrestricted SCOs, as defined by 6 NYCRR Part 375-6.8, or soil that creates a nuisance condition, as defined in Commissioner Policy CP-51 Section G, will be completed. Approximately 12,100 tons of soil meeting these criteria will be excavated. Collection and analysis of confirmation samples at the remedial excavation extents will be used to verify that SCOs for the site have been achieved. If confirmation sampling indicates that SCOs were not achieved at the stated remedial extent, further remedial excavation may be necessary.

To ensure proper handling and disposal of excavated material, waste characterization sampling will be completed for all identified contaminated site material. Waste characterization sampling will be performed exclusively for the purposes of off-site disposal in a manner suitable to receiving facilities and in conformance with applicable laws, rules, and regulations.



Clean fill meeting the requirements of 6 NYCRR Part 375-6.7(d) will be brought in as needed to replace the excavated soil and establish the designed grades at the site.

3. Building 1 Investigation

Further investigation and remediation (if necessary) beneath Building 1 will be completed after it is demolished, or as the subsurface is otherwise made accessible. The nature and extent of contamination in areas where access was previously limited or unavailable will be immediately and thoroughly investigated pursuant to a plan approved by the Department.

Dear Chris Wan:

147 West Tupper Street Site, #C915389
Buffalo (C), Erie County
Remedial Action Work Plan

The New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), have received the revised *Remedial Action Report Work Plan* [May 2024] for the above referenced site, as submitted by Roux Environmental Engineering and Geology, D.P.C. Based on our review the revised document has addressed our previous comments and is acceptable to NYSDEC.

Please ensure that a copy of the final document is sent to the document repository and that NYSDEC is provided at least seven days advance notice of the start of work. If you wish to discuss this matter in more detail, feel free to contact me at 716-851-7220 or benjamin.mcpherson@dec.ny.gov.

Sincerely,

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e) and 6NYCRR Part 360.13. Use of this form is not a substitute for reading the applicable regulations and Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is: Unrestricted

Have Ecological Resources been identified? no

Is this soil originating from the site? no

How many cubic yards of soil will be imported/reused? >1000

If greater than 1000 cubic yards will be imported, enter volume to be imported: ~2,000

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone? yes

Does it contain less than 10%, by weight, material that passes a size 100 sieve? yes

Is this virgin material from a permitted mine or quarry? yes

Is this material recycled concrete or brick from a DEC registered processing facility? no

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

Non sampling required as the NYSDOT crushed gravel meets the exemption criteria (less than 10% passing the No.100 sieve). See the attached documentation from County Line Stone with gradation analysis.

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.4(e)5 (other material), no chemical testing needed.

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

As previously noted, no sampling required. See attached documentation.

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

County Line Stone Co., Inc.

Location where fill was obtained:

4515 Crittenden Road, Akron, NY

Identification of any state or local approvals as a fill source:

NYSDEC Mine ID 90093

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Commercial gravel/stone quarry

Provide a list of supporting documentation included with this request:

NYSDOT Item No. 703-02 clean crushed gravel

The information provided on this form is accurate and complete.

ALL SIZES OF CRUSHED STONE BITUMINOUS CONCRETE AGRICULTURAL LIME

January 9th, 2024

To whom it may concern,

This letter is to serve as notice that all of the aggregate produced and sold by County Line Stone Company in Akron, NY is free from any known contaminates or additives. Our Aggregate is produced by crushing the mineable virgin limestone from our Akron, NY Quarry. Water may be added to the product for dust control.

Regards,

Eric Lukowski, Quality Control Manager

Mike,

The Department has reviewed the Import Request submitted today to import approx.. 2,000 cubic yards of crushed gravel from County Line Stone Co. located on 4515 Crittenden Rd. in Akron, NY. Based on the information provided, the request is approved.

Please not that any additional imports to the site must be approved by the Department.

Veronica

NEW YORK STATE
DEPARTMENT OF ENVIRONMENTAL CONSERVATION

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e) and 6NYCRR Part 360.13. Use of this form is not a substitute for reading the applicable regulations and Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is: Unrestricted

Have Ecological Resources been identified? no

Is this soil originating from the site? no

How many cubic yards of soil will be imported/reused? >1000

If greater than 1000 cubic yards will be imported, enter volume to be imported: ~2000

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone? yes

Does it contain less than 10%, by weight, material that passes a size 100 sieve? yes

Is this virgin material from a permitted mine or quarry? yes

Is this material recycled concrete or brick from a DEC registered processing facility? no

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

No sampling requires as the NYSDOT crushed gravel meets the exemption criteria (less than 10% passing the No. 100 sieve). See the attached documentation from County Line Stone with gradation analysis.

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.4(e)5 (other material), no chemical testing needed.

Revised April 2023

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

As previously noted, no sampling required. See attached documentation.

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

County Line Stone Co., Inc.

Location where fill was obtained:

4515 Crittenden Road, Akron, NY

Identification of any state or local approvals as a fill source:

NYSDEC Mine ID 90093

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Commerical gravel/stone quarry

Provide a list of supporting documentation included with this request:

NYSDPTY Item No. 703-02 clean crushed gravel

The information provided on this form is accurate and complete.

Andrew,

Sorry for the late reply I have been out sick. Is more fill required for the building foundation?

The submitted Import Request to import ~2,000 cubic yards of crushed gravel from County Line Stone is approved.

Veronica

EPA CATEGORY 40 CFR 403
Expiration Date: April 21, 2026
Date Paid: April 22, 2025

BUFFALO SEWER AUTHORITY

TEMPORARY DISCHARGE PERMIT

Permittee: Roux Environmental Engineering and Geology DPC

Location Address: 2558 Hamburg Turnpike, Buffalo, New York 14218

The above-named Permittee is hereby approved to discharge **stormwater** to the BSA Wastewater Treatment Plant only, from:

147 West Tupper LLC
147 West Tupper Street, Buffalo, New York 14201

to the Buffalo Sewer Authority facilities in accordance with the Buffalo Sewer Authority Regulations, Article VI, Section 14, and subject to the following conditions:

ARTICLE 1 CONDITIONS OF ACCEPTANCE

The discharge of the approved waste by the Permittee shall be subject to the following conditions:

a. Times, Location & Rate

The following location is designated for discharge during the hours listed and subject to the limit for rate of discharge specified:

Location: **147 West Tupper Street, Buffalo, New York 14201**
(see attached site map)

Time Discharge is Permitted: **8:00am to 5:00pm**

Limit on Rate of Discharge: **60 gallons per minute,** Buffalo Sewer Authority Wastewater Treatment Plant only, **dry weather only.**

b. Operations

The Permittee shall maintain cleanliness, minimize odors, ensure necessary sediment control measures are in place and maintained and protect the Buffalo Sewer Authority facilities during the permittee's operations. The Permittee shall not permit any condition to arise which may pose a threat to public health or safety.

c. Samples and Analyses

The Buffalo Sewer Authority may from time to time, require the Permittee to sample and analyze its waste discharges. Such sampling and analyses shall be performed and results submitted by a New York State Dept. of Health certified laboratory. The analyses required shall be as specified by the Buffalo Sewer Authority, which also reserves the right, at its convenience, to sample wastes discharged by the Permittee.

d. Refusal to Discharge

The Buffalo Sewer Authority may refuse the Permittee permission to discharge wastes at any time and for any reason whatsoever, for the protection of sewer facilities against damage or flooding; to assure the proper operation and maintenance of said facilities; or to protect public health, safety or welfare.

e. Local Limits

Except as otherwise specified in this permit, the permit holder shall comply with all specific prohibitions, limits on pollutants or pollutant parameters set forth in the Buffalo Sewer Authority Sewer Use Regulations, as amended from time to time, and such prohibitions, limits and parameters shall be deemed pretreatment standards for purposes for the Clean Water Act.

ARTICLE 2 REGULATIONS

The Permittee must conform to all Buffalo Sewer Authority regulations and appropriate Federal, State and County Statutes, rules, mandates, directives, and orders concerning the collection, transportation, treatment and disposal of wastewaters.

ARTICLE 3 INSURANCE AND INDEMNIFICATION

The Permittee agrees to indemnify and hold harmless the Buffalo Sewer Authority and its agents and employees against any and all claims resulting from work performed under this permit. The permittee shall be solely responsible for any and all injury or damage to its employees or property arising from use of Buffalo Sewer Authority facilities under this permit.

In the event of any alteration, non-renewal or cancellation of these policies, at least (45) forty-five days advance notice shall be given to the Industrial Waste Section, Bird Island Treatment Plant, 90 West Ferry Street, Buffalo, New York 14213 - before such change shall be effective.

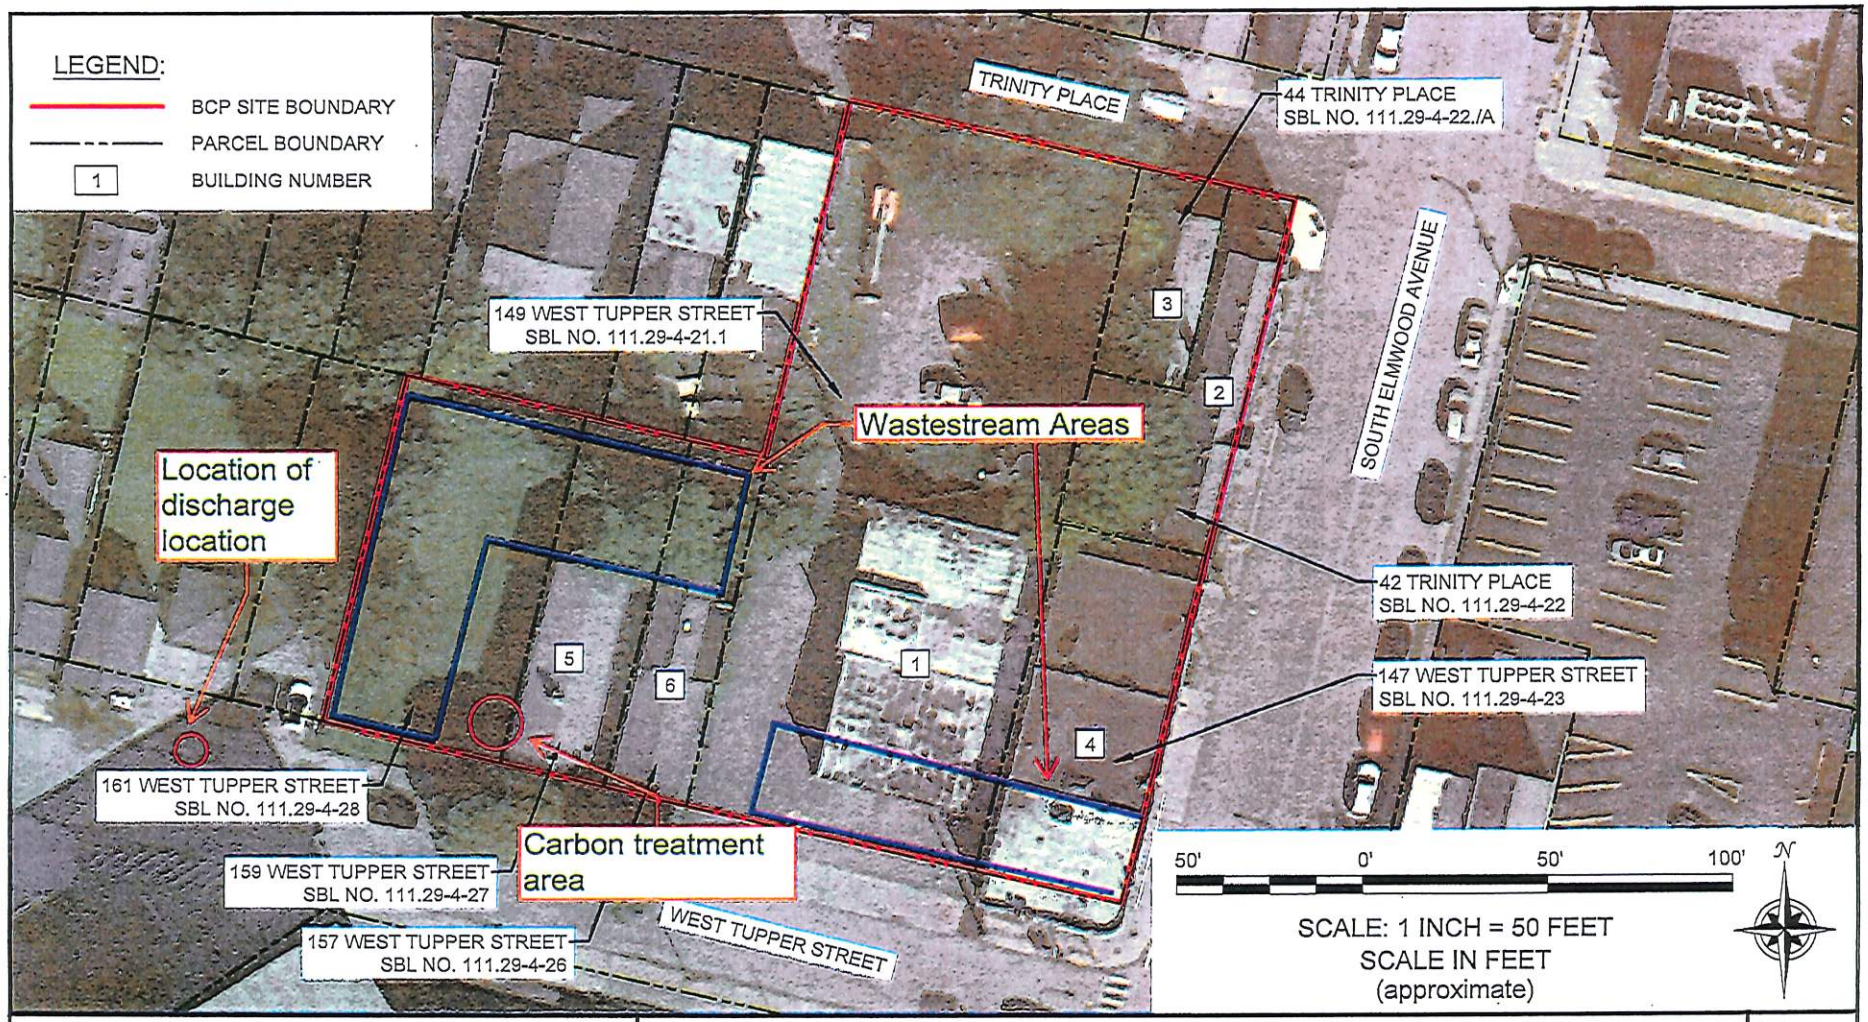
ARTICLE 4 TERMINATION FOR VIOLATION OF AGREEMENT

In the event of a violation of any of the terms and conditions of this permit by the Permittee or upon the failure to pay the charges herein specified, the Buffalo Sewer Authority shall terminate the permit by service of notice of termination by registered mail at the Permittee's office address as set forth above.

ARTICLE 5 PERMITTEE APPROVAL

Official: Michael A. Lesakowski (Print Name) Title: Vice President (Print)

Signature: _____ Date: 4/22/2025



ARTICLE 6 BUFFALO SEWER AUTHORITY APPROVAL

700 Delaware Avenue
Buffalo, NY 14209

Re: 147 West Tupper Street BCP Site (NYSDEC Site No. 915389)
Request to Export Clean Soil Off-Site

Dear Ms. Kreutzer,

On behalf of 147 West Tupper LLC, we are requesting approval for the transport and relocation of non-impacted native soils to an off-Site location.

Removal of contaminated soil/fill material was completed in accordance with the approved work plan to meet New York State Department of Environmental Conservation (NYSDEC) Track 1 Unrestricted Cleanup Objectives (USCOs). A copy of the post-excavation soil samples has been provided under separate cover. Upon commencement of redevelopment activities, the clean native soils will be excavated from the area of future subgrade parking garage, with an anticipated volume of approximately 4,000 cubic yards. The site contractor will transport the clean native soil to an off-site commercial property.

The proposed placement area (Site) is located at 4412 Walden Avenue, Lancaster, New York. The clean soil will be used under a commercial building slab and asphalt parking.

Please contact us if you have any questions.

Sincerely,

ROUX ENVIRONMENTAL ENGINEERING AND GEOLOGY, D.P.C.

Michael Lesakowski
Principal Scientist

Remember to attach Laboratory Analytical Report (and/or Material Safety Data Sheet) including Chain of Custody and required parameters provided for this profile.

Special Waste Profile

VI. Certification

I hereby certify that I have knowledge about the waste material being offered for disposal ("Waste") and have the requisite authority to bind the Generator to the information contained in this Special Waste Profile ("Profile"). I further certify that to the best of my knowledge and belief, the information contained herein is a true, complete and accurate description of the Waste and all known or suspected hazards have been disclosed. All Analytical Results/Safety Data Sheets submitted are truthful and complete and are representative of the Waste.

I further certify that by utilizing this Profile, neither myself nor any other employee or representative of the company identified below ("Company") will deliver for disposal or attempt to deliver for disposal any Waste that: (i) is classified as toxic waste, hazardous waste or infectious waste; (ii) that does not conform to this Profile; or (iii) that this Disposal Facility is prohibiting from accepting by law. I shall immediately give written notice of any change or condition pertaining to the Waste not provided herein. Our Company hereby agrees to fully indemnify this Disposal Facility against any damages resulting from this Profile or Certification being inaccurate or untrue.

I understand that by attaching an electronic signature, I am signing this document and Company consents to complete this transaction and receive all related communications electronically, and agrees this document will be binding as though it had been physically signed. A printout of this Profile may be accepted with the same authority as the original.

Third Party Signature Authorization For Special Waste Disposal

REPUBLIC SERVICES

Date: October 23, 2024

Profile Number:

For office use only.

This Authorization is only valid for 3 years from the above date.

To Whom It May Concern:

Please be advised that the following company/individual has been appointed to work as our agent for purposes of managing waste materials that we may generate.

Name of Waste: Urban soil/fill

Michael A. Lesakowski
Name of Authorized Agent

Authorized Agent for 147 West Tupper LLC
Title

Roux Environmental Engineering & Geology, D.P.C.
Name of Company

716-856-0599
Telephone Number

The above broker/individual is authorized to act as our authorized agent for the following purposes:

- ☑ Complete and sign Special Waste Profile
- ☑ Complete and sign Special Waste Profile-Recertification
- ☑ Authorize amendments to Special Waste Profile
- ☑ Sign contracts to dispose and/or transport material
- ☑ Sign certifications necessary to comply with landfill requirements
- ☑ Sign manifests to initiate shipment to disposal facilities

I hereby certify that I have the requisite authority to grant agency authority on the behalf of Company to the Authorized Agent identified on this Third Party Signature Authorization form ("Authorization"). Our Authorized Agent will notify Company prior to taking any of the actions authorized above and will provide Company with copies of any documents bearing Company's name.

I understand that by attaching an electronic signature, I am signing this document and Company consents to complete this transaction and receive all related communications electronically, and agrees this document will be binding as though it had been physically signed. A printout of this Authorization may be accepted with the same authority as the original.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
^5-	Linear Range Check (LRC) is outside acceptance limits, low biased.
F1	MS and/or MSD recovery exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Job ID: 480-223955-1 Eurofins Buffalo

Job Narrative
480-223955-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 10/3/2024 12:30 PM. Unless otherwise noted below, the samples arrived in good condition. The temperature of the cooler at receipt time was 13.8°C.

GC/MS VOA
Method 8260C - TCLP: The following samples were diluted due to the nature of the TCLP matrix: WC-1 (480-223955-1), WC-2 (480-223955-2), WC-3 (480-223955-3), WC-4 (480-223955-4), WC-5 (480-223955-5), WC-6 (480-223955-6), WC-7 (480-223955-7), WC-8 (480-223955-8), WC-9 (480-223955-9) and (LB 480-727268/1-A). Elevated reporting limits (RLs) are provided.

Method 8260C - TCLP: The continuing calibration verification (CCV) associated with batch 480-727413 recovered above the upper control limit for Vinyl Chloride. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-1 (480-223955-1), WC-2 (480-223955-2), WC-3 (480-223955-3), WC-4 (480-223955-4), WC-5 (480-223955-5), WC-6 (480-223955-6), WC-7 (480-223955-7), WC-8 (480-223955-8) and WC-9 (480-223955-9).

Method 8260C - TCLP: Due to the coelution of Ethyl Acetate with 2-Butanone in the full spike solution, these analytes exceeded control limits in the laboratory control sample (LCS) and/or laboratory control sample duplicate (LCSD) associated with batch 480-727413 . The following samples were affected : WC-1 (480-223955-1), WC-2 (480-223955-2), WC-3 (480-223955-3), WC-4 (480-223955-4), WC-5 (480-223955-5), WC-6 (480-223955-6), WC-7 (480-223955-7), WC-8 (480-223955-8) and WC-9 (480-223955-9).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
Method 6010D - TCLP: The linear range check (LRC) standard recovery associated with 480-727563 is outside the acceptance criteria for the following analytes: TCLP Silver. The concentration of these analyte(s) in the sample(s) are below the highest standard of the calibration curve; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

This Detection Summary does not include radiochemical test results.

Eurofins Buffalo

Detection Summary

Client: Roux Environmental Engineering and Geology DPC
Job ID: 480-223955-1
Project/Site: 147 West Tupper Street Site

Client Sample ID: WC-8
Lab Sample ID: 480-223955-8

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
Barium	0.67	J	1.0	0.10	mg/L	1		6010D	TCLP
Cadmium	0.0036		0.0020	0.00050	mg/L	1		6010D	TCLP
Lead	0.059		0.020	0.0030	mg/L	1		6010D	TCLP

Client Sample ID: WC-9
Lab Sample ID: 480-223955-9

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
Barium	0.35	J	1.0	0.10	mg/L	1		6010D	TCLP
Cadmium	0.0041		0.0020	0.00050	mg/L	1		6010D	TCLP
Lead	0.40		0.020	0.0030	mg/L	1		6010D	TCLP

This Detection Summary does not include radiochemical test results.

Client Sample ID: WC-1

Accreditation/Certification Summary

Client: Roux Environmental Engineering and Geology DPC
Job ID: 480-223955-1
Project/Site: 147 West Tupper Street Site

Laboratory: Eurofins Buffalo

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New York	NELAP	10026	03-31-25

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
7470A	7470A	Solid	Mercury
Moisture		Solid	Percent Moisture
Moisture		Solid	Percent Solids

Method Summary

480-223955 Chain of Custody

Possible Hazard Identification
☐ Non-Hazard ☐ Flammable ☐ Skin Irritant ☐ Poison B ☑ Unknown ☐ Radiological

Sample Disposal (A fee may be assessed if samples are retained longer than 1 month)
☐ Return To Client ☑ Disposal By Lab ☐ Archive For _____ Months

Deliverable Requested: I, II, III, IV, Other (specify)

Login Sample Receipt Checklist

Client: Roux Environmental Engineering and Geology DPC

Job Number: 480-223955-1

Login Number: 223955
List Number: 1
Creator: Stapleton, Kaitlyn

List Source: Eurofins Buffalo

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	13.8 IR#SC ice
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time (Excluding tests with immediate HTs)..	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	N/A	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Sampling Company provided.	True	Roux Environmental
Samples received within 48 hours of sampling.	True	
Samples requiring field filtration have been filtered in the field.	True	
Chlorine Residual checked.	N/A
