## EXECUTIVE SUMMARY

---

LaBella Associates, D.P.C. (LaBella) has been contracted by Avalon Development, LLC to perform a Phase I Environmental Site Assessment (ESA) report for Mixed-Use Property property, 743-749 Main Street, Buffalo, Erie County, New York (hereinafter referred to as the “Subject Property”).

This assessment was prepared according to the ASTM E1527-13/21 as a portion of the User's requirements in the All Appropriate Inquiries process and to satisfy the due diligence requirements set for Avalon Development, LLC.

The Subject Property is further described as follows:

<b>Subject Property Name</b>	Mixed-Use Property
<b>Subject Property Address</b>	743-749 Main Street, Buffalo, Erie County, New York
<b>Subject Property Acreage (approximate)</b>	0.31
<b>Parcel ID(s)</b>	111.30-3-5
<b>Current Owner</b>	Nathan Associates LLC
<b>Current Subject Property Use/ Development</b>	Costume Shop, vacant commercial units and apartments
<b>Public Thoroughfares and Access/Egress</b>	Main Street to the west, Washington Street to the east
<b>Exterior Areas</b>	Paved sidewalk
<b>Surrounding Area</b>	Urban
<b>Subject Property Utilities</b>	
<b>Electric Source</b>	National Grid
<b>Natural Gas Source (if provided)</b>	National Fuel
<b>Potable Water Source</b>	Public
<b>Sanitary Wastewater Disposal</b>	Public
<b>Non-Sanitary Wastewater Disposal</b>	N/A

Based on LaBella's review of historical records, the history of the Subject Property is summarized as follows:

Time Period	Apparent Use/Development
In or before 1899 through at least 1899	Undeveloped
1900 through present	Developed with the existing structure, used as various storefronts, jewelry manufacturing, radio/electronics company, offices, and residential use, The eastern portion was used as a garage with a gasoline UST in at least 1925 and as an automotive repair facility from at least 1946 to at least 1955

Based on the results of this assessment, the following RECs have been identified in connection with the Subject Property:

- The eastern portion of the subject structure was identified as a garage with a gasoline UST in the adjacent roadway in at least 1925 and as an auto repair facility from at least 1946 to 1955. Although the UST was in the adjacent roadway, the associated piping and dispenser would likely have been located within the boundaries of the Subject Property.
- The NY Spill (#0175129) listed for the north adjacent property involved the discovery of contaminated soil in 2001 while removing a UST and associated piping; this spill is classified as closed by NYSDEC. Although this spill is classified as closed, there was residual contamination remaining under buildings and no groundwater sampling or vapor study was conducted. Based on this information and the upgradient location relative to the Subject Property, this spill is considered a REC.

Based on the results of this assessment, no CRECs have been identified in connection with the Subject Property.

Based on the results of this assessment, no HRECs have been identified in connection with the Subject Property.

Based on the results of this assessment, no de minimis conditions have been identified in connection with the Subject Property.

Based on the results of this assessment, no significant data gaps have been identified in connection with the Subject Property.

- The Subject Property currently includes a retail storefront and has historically included residential and commercial operations. While hazardous materials and/or petroleum products may have been used/stored in association with these operations, they are not considered to pose an environmental concern at this time.
- The Site Building is currently heated with natural gas. Given the age of the structure, there is the potential for previous heating systems to have been in use on-site. However, there were no records or evidence identified to suggest an on-site concern relative to historical heating systems at this time

**Based on the findings of this assessment, further investigation appears warranted at this time.**

## 1.0 INTRODUCTION

---

LaBella has been contracted by Avalon Development, LLC to perform a Phase I Environmental Site Assessment report for the Mixed-Use Property property, 743-749 Main Street, Buffalo, Erie County, New York.

The findings of this report are based upon an assessment of the condition of the Subject Property within the Scope of Work and objective described below as of the date of the site observations and documentation review. This assessment was prepared according to the ASTM Standard Practices E1527-13/21 as a portion of the User's requirements in the All Appropriate Inquiries process and to satisfy the due diligence requirements set for Avalon Development, LLC. The information contained in this report is considered privileged and confidential and is intended solely for the use of the parties listed on the cover of this report, as it applies to the Subject Property.

### 1.1 Purpose

This investigation was requested to identify, to the extent feasible, RECs in connection with the Subject Property, including the identification of conditions indicative of releases and threatened releases of hazardous substances and petroleum products on, or in the vicinity of the Subject Property. This Phase I ESA report was conducted in conformance with the Scope and Limitations of ASTM Standard Practice E1527-13/21.

The performance of ASTM Standard Practices E1527-13/21 is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs and the potential liability for contamination to be present in connection with the Subject Property recognizing reasonable limits of time and cost. It is also intended to satisfy one of the requirements to satisfy "all appropriate inquiry" as defined by 42 U.S.C §9601(35)(B), for the purposes of qualifying for innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA Liability. The User should understand that this practice does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for landowner liability protections; including (1) the continuing obligation not to impede the integrity and effectiveness of activity and use limitations, (2) the duty to take reasonable steps to prevent releases, or (3) the duty to comply with legally required release reporting obligations.

The objective of this Phase I ESA was to determine the following, using our professional judgment, by means of the Scope of Work hereafter described:

1. A general description of the Subject Property.
2. The current and historical usage of the Subject Property and adjoining properties.
3. Whether RECs exist or have the potential to exist at in, on, or at the Subject Property.
4. Whether Subject Property conditions suggest further evaluation based on the presence or probable presence of RECs.

5. Provide information which may assist the Client in evaluating the fair market value of the Subject Property.

A REC is defined by ASTM as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

A Controlled REC is defined by ASTM as a recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

A Historical REC is defined by ASTM as a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

A de minimis condition is defined by ASTM as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.

The term “data gap” means a lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.). A significant data gap is one that affects the ability of the environmental professional to identify a REC.

The term “data failure” means the failure to achieve the historical research objective as specified in ASTM E-1527-13/21 even after reviewing the standard historical resources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Migration refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

An Environmental Professional is a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors defined in the ASTM Standard Practice E1527-13/21 and §312.20 of 40 CFR §312. Specifically, an Environmental Professional is defined as a person having one of the following qualifications; (1) A state- or tribal-issued certification or license and three years of relevant, full-time work experience; (2) A bachelor's degree or higher in science or engineering and five years of relevant, full-time work experience; or, (3) 10 years of relevant, full-time work experience.

## **1.2 Scope of Work**

This Phase I Environmental Site Assessment has been prepared in accordance with ASTM E1527-13/21, which has been devised to address the site assessment portion for 40 CFR 312 - Innocent Landowners, Standards for Conducting All Appropriate Inquiries. The Scope of Work performed in this assessment is intended to identify RECs, CRECs, HRECs, de minimis conditions, and Significant Data Gaps through the following tasks:

1. Review of information provided by the User related to environmental cleanup liens; specialized knowledge or experience regarding the Subject Property; the relationship of the purchase price to the fair market value of the property, if the property were not contaminated; and, commonly known or reasonably available information about the Subject Property.
2. Review of local, state, and federal environmental records.
3. Review of historical sources of information to identify the use of the Subject Property dating back to 1940 or first Subject Property development, whichever is earlier.
4. Review of physical and geological settings.
5. Interviews with current and past owners, operators, and occupants to evaluate the potential for environmental contamination to be present at the Subject Property.
6. Inspection of the Subject Property and adjacent properties (from public roadways and the Subject Property boundaries), to the extent possible, to visually identify areas of concern.
7. The preparation of this report documenting all appropriate inquiries.

The work for this report has been performed in accordance with generally accepted environmental engineering practices for this region. The conclusions and recommendations of this report are based upon the opinion and judgment of an Environmental Professional and are dependent upon LaBella's knowledge, the information supplied during the interviews, and data and information solicited from governmental agencies. LaBella makes no other warranty or representation, either expressed or implied, nor is one intended to be included as part of its services, proposals, contracts, or reports.

In addition, LaBella cannot provide guarantees, certifications, or warranties that the Subject Property is or is not free of contamination without a subsurface investigation involving drilling, vapor analysis, laboratory soil analysis, groundwater monitoring well installation, and laboratory groundwater analysis. Even with such a program, the data and samples from any given soil boring or monitoring

well will indicate conditions that apply only at that particular location, and such conditions may not necessarily apply to the general Subject Property as a whole.

### 1.2.1 Significant Assumptions

Significant assumptions made in the performance of this Phase I ESA are as follows:

- Regional groundwater flow follows major topographic gradients.
- Representations made during interviews are accurate.

### 1.3 Data Gaps

LaBella encountered the following data gaps through the completion of this Phase I Environmental Site Assessment:

Nature of Data Gap	Details/Description	Data Sources Consulted
Limitations to Site Inspection <sup>1</sup>	Observations were limited due to stored materials. LaBella inspected representative portions of the structure.	N/A
Historical Use	Historical uses were not obtained for each five year period.	Aerial photographs, Sanborn maps, city directories, municipal records
Regulatory Records Review	LaBella has yet to receive complete responses from all regulatory information requests.	Outstanding responses from NYSDOH and NYSDEC
Interviews	LaBella has not been able to identify and/or contact any historical owners, operators, or occupants.	Current owners, municipal, and/or User-provided records to identify historical ownership information.
Any data gaps determined by the Environmental Professional to be significant are further discussed within the Findings and Opinions section of this report. <sup>1</sup> See Limitations and Exceptions of Assessment below for additional limitations of the site visit.		

#### **1.4 Limitations and Exceptions of Assessment**

ASTM E1527-13/21 expressly recognized the fact that no ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. LaBella's work is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the Subject Property, and its Scope of Work reflects recognition of the reasonable limits of time and cost.

The work for this report has been performed in accordance with the master service agreement signed with Avalon Development, LLC. The conclusion and recommendations of this report are based upon LaBella's opinion and judgment, and are necessarily dependent on information supplied by the individuals, entities, and agencies contacted through the course of this assessment. LaBella makes no other warranty or representation, either expressed or implied, nor is one intended to be included as part of its services, proposals, contracts, or reports.

The actual presence of asbestos, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, endangered species, indoor air quality, mold, substances not defined as hazardous substances, cultural and historical resources, archeological resources, ecological resources, industrial hygiene, health and safety, biological agents, and/or high voltage power lines, are not included in the Scope of Work of this assessment unless agreed to by Avalon Development, LLC and LaBella; in such a case, these additional services/ASTM Non-Scope Considerations are discussed in Section 8.0 below. Should Avalon Development, LLC desire any of these additional services, such can be completed by LaBella under separate cover; however, they are not included in the Scope of Work of the Phase I ESA.

The site reconnaissance was limited to visual observations of accessible areas only. No attempt was made to observe conditions in spaces not generally accessible, including but not limited to:

1. Entering crawlspaces and attics
2. Walking on roofs
3. Viewing the interior of pipe chases or plenum
4. Viewing spaces concealed by walls, floors, ceilings, interior finishes, etc.
5. Viewing areas inaccessible due to topographic features or locked doors, obscured by snow cover, vegetative growth, vehicles, etc.

The site reconnaissance was also limited to visual observations within the perimeter of the Subject Property and other accessible areas only. At the time of the site reconnaissance, a representative portion of the Subject Property and common areas were visually inspected.

#### **1.5 Reliance**

Avalon Development, LLC may rely upon the findings of this report and should be aware of the agreed upon Scope of Work and the limitations associated with this Scope of Work.

## 2.0 SUBJECT PROPERTY AND VICINITY DESCRIPTION

The Subject Property is summarized in the tables below. Property boundaries for the purpose of this assessment were determined based on provided survey mapping and/or tax maps obtained through municipal sources. Subject Property Location and Tax Parcel maps for the Subject Property are located in the [Site Maps](#) Appendix.

<b>Subject Property Name</b>	Mixed-Use Property
<b>Subject Property Address</b>	743-749 Main Street, Buffalo, Erie County, New York
<b>Subject Property Acreage (approximate)</b>	0.31
<b>Parcel ID(s)</b>	111.30-3-5
<b>Current Owner</b>	Nathan Associates LLC
<b>Current Subject Property Use/ Development</b>	Costume Shop, vacant commercial units and apartments
<b>Public Thoroughfares and Access/Egress</b>	Main Street to the west, Washington Street to the east
<b>Exterior Areas</b>	Paved sidewalk
<b>Surrounding Area</b>	Urban
<b>Subject Property Utilities</b>	
<b>Electric Source</b>	National Grid
<b>Natural Gas Source (if provided)</b>	National Fuel
<b>Potable Water Source</b>	Public
<b>Sanitary Wastewater Disposal</b>	Public
<b>Non-Sanitary Wastewater Disposal</b>	N/A

### 2.1 Building Summary

Structure(s) located on the Subject Property are summarized in the following table:

<b>Building Name</b>	743-749 Main Street
<b>Square Footage</b>	32,868
<b>Foundation Type</b>	Full basement in western portion; no basement in eastern portion
<b>Number of Stories</b>	One

<b>Construction Date</b>	1900
<b>Heating/Cooling Source</b>	Natural gas
<b>Current Use</b>	Costume shop, storage, vacant commercial space, vacant apartment units

## **2.2 Physical and Hydrogeological Setting**

Based on a review of provided records, the following information was obtained regarding the physical and hydrogeological setting of the Subject Property:

<b>Topography</b>	Generally level
<b>Elevation (feet above mean sea level)</b>	~630
<b>Subject Property Water Bodies</b>	None
<b>Nearest Water Body</b>	Lake Erie is approximately 1.06 miles to the southwest
<b>Apparent Groundwater Flow</b>	South
<b>Soil Map Unit(s)</b>	Urban land: areas that have been so altered or obscured by urban works and structures that identification of the soils is not feasible. Areas are mainly in the closely built-up parts of the city.
<b>Geological Information</b>	Onondaga and Bois Blanc Limestones, primarily limestone and sandstone

Refer to Figure 1 for a copy of the Subject Property Location/Topographic Map. Copies of the soil and geological maps and associated descriptions are summarized in the ERIS Physical Setting Report included in the [Hydrogeologic Information](#) Appendix. Groundwater flow was determined based on interpretation of the USGS topographic map and/or provided previous studies.

### 3.0 USER-PROVIDED INFORMATION

In accordance with the ASTM E1527-13/21, a “User” is defined as the party seeking to complete an environmental site assessment of the property. If the user is aware of any specialized knowledge or experience that is material to RECs in connection with the Subject Property, it is the user’s responsibility to communicate any information based on such specialized knowledge or experience to the Environmental Professional. The User Questionnaire was completed by Alan Dewart, Purchasing Agent. A copy of the User Questionnaire is included in the [User Provided Information](#) Appendix.

ASTM Standard Practice E1527-13/21 User Questionnaire Questions	Reported by User
<b>Land Title Records</b>	
Are land title records available for review?	The User answered this question with an "unknown" response.
<b>Environmental Liens or Activity Use Limitations</b>	
Did a search of <i>recorded land title records</i> identify any environmental liens filed or recorded against the <i>property</i> under federal, tribal, state or local law?	The User answered this question with an "unknown" response.
Did a search of <i>recorded land title records</i> identify any AULs, such as <i>engineering controls</i> , land use restrictions or <i>institutional controls</i> that are in place at the <i>property</i> and/or have been filed or recorded against the <i>property</i> under federal, tribal, state or local law?	The User answered this question with an "unknown" response.
<b>Specialized Knowledge</b>	
Does the <i>User</i> of this <i>ESA</i> have any specialized knowledge or experience related to the <i>property</i> or nearby properties? For example, is the <i>User</i> involved in the same line of business as the current or former <i>occupants</i> of the <i>property</i> or an <i>adjacent property</i> so that the <i>User</i> would have specialized knowledge of the chemicals and processes used by this type of business?	The User reported that the purchaser owns five contiguous properties to the south of 743 Main Street.
<b>Commonly Known or Reasonably Ascertainable Information</b>	
Is the <i>User</i> aware of commonly known or <i>reasonably ascertainable</i> information about the <i>property</i> that would help identify conditions indicative of releases or threatened releases?	The User answered this question with an "unknown" response.

ASTM Standard Practice E1527-13/21 User Questionnaire Questions	Reported by User
Based on the <i>User's</i> knowledge and experience related to the <i>property</i> are there any <i>obvious</i> indicators that point to the presence or likely presence of releases at the <i>property</i> ?	Based on the <i>User's</i> knowledge and experiences related to the Subject Property, the <i>User</i> of this ESA is not aware of obvious indicators that point to the presence or likely presence of contamination at the Subject Property.
<b>Valuation Reduction for Environmental Issues</b>	
Does the purchase price being paid for the <i>property</i> reasonably reflect the fair market value of the <i>property</i> ?	The <i>User</i> did not report a below fair market value.
If the <i>User</i> concluded that there is a difference, has the <i>User</i> considered whether the lower purchase price is because contamination is known or believed to be present at the <i>property</i> ?	N/A

### 3.1 Reason For Performing Phase I ESA

According to ASTM 1527-13/21, either the *User* shall make known to the Environmental Professional the reason why the *User* wants to have the Phase I ESA performed or, if the *User* does not identify the purpose of the Phase I ESA, the Environmental Professional shall assume the purpose is to qualify for the Landowner Liability Protections under the Brownfields Amendments. The *User* indicated that the Phase I ESA is being conducted as part of a potential purchase.

## 4.0 SITE RECONNAISSANCE

---

LaBella conducted a site reconnaissance of the Subject Property and observation of adjacent properties from the Subject Property boundaries and public roadways, to the extent possible, to visually identify areas of concern. The site reconnaissance was conducted on September 7, 2022 by Allison Leet, Environmental Analyst with LaBella. At the time of the site reconnaissance, LaBella was accompanied by Ashok Kapoor, owner.

Observations discussed in this Section are noted on [Figure 3](#). Copies of the field notes taken during the site visit are included in the [Site Reconnaissance Worksheet](#) Appendix. Representative photographs of the Subject Property at the time of the site reconnaissance are included in the [Site Photographs](#) Appendix.

At the time of the site reconnaissance, a representative portion of the business, vacant spaces, and common areas were visually inspected. In addition, visual observations were limited at the time of the site visit due to stored materials. Additional site visit limitations are discussed in [Section 1.4](#).

### ***Past Uses of Subject Property***

The vacant spaces appeared to be former apartment units and retail spaces.

### ***Hazardous Substances and Petroleum Products***

No apparent hazardous substances or petroleum products were observed on the Subject Property.

### ***Unidentified Substance Containers***

There were no unidentified substance containers (e.g., unlabeled drums or totes) observed at the time of the site reconnaissance.

### ***Storage Tanks***

No apparent indications of aboveground or underground storage tanks (e.g., fill ports, vent pipes, access ways) were observed at the Subject Property at the time of the site visit.

### ***Solid, Hazardous, and/or Regulated Wastes***

The following wastes were noted, stored, or generated on the Subject Property:

<b>Material</b>	<b>Source/Process</b>	<b>Storage Location/Quantity</b>	<b>Transporter/Hauler</b>
General refuse/ recyclables	Residential and/or commercial operations	Cans/In front of the building facing Main Street	Modern

In addition, building materials were noted in areas of the subject structure associated with poor building conditions.

While not identified at the time of the site reconnaissance, the User should be aware that given the urban nature of the Subject Property location, there is the potential for fill material to be present on the Subject Property. Fill material generated as part of Subject Property redevelopment/ construction activities may be subject to chemical testing and/or proper handling requirements which may impact the overall project budget.

### ***Odors***

No apparent strong, pungent, or noxious odors were observed at the Subject Property at the time of the site reconnaissance.

### ***Standing Water/ Pools of Liquid***

No apparent pools, sumps, or standing water containing liquids likely to be hazardous substances or petroleum products were observed at the Subject Property at the time of the site visit.

### ***PCB-Containing Equipment***

No apparent PCB-containing equipment was observed at the time of the site reconnaissance.

### ***Stains and Corrosion***

No apparent stains or corrosion were observed at the time of the site reconnaissance.

### ***Stressed Vegetation***

No apparent stressed vegetation was observed at the time of the site reconnaissance.

### ***Drains and Sumps***

Although not noted at the time of the site inspection, the property owner stated that floor drains are located on the lower level of the subject structure. The floor drains reportedly discharge to the public sewer system.

### ***Wastewater***

Non-sanitary wastewater does not appear to be generated or discharged at the Subject Property.

### ***Septic Systems and/or Cesspools***

No apparent indications of septic systems or cesspools were observed at the time of the site reconnaissance or are reported to be located on the Subject Property.

### ***Wells***

No apparent potable, monitoring, irrigation, dry, or injection wells were observed at the time of the site reconnaissance or are reported to be located on the Subject Property.

### ***Additional Information***

There was no evidence of other potential concerns identified at the time of the site reconnaissance.

### ***Adjacent Property Use***

The Subject Property is bordered by the following properties:

<b>Direction</b>	<b>Current Use/Occupant</b>	<b>Apparent Past Use</b>	<b>Potential Concerns Visible During Site Visit</b>
<b>North</b>	Parking lot, commercial building (753 Main Street)	Same	None
<b>East</b>	Eastman Machine Co. and parking lot 775 Washington Street)	Same	None
<b>South</b>	Vacant commercial space (739 Main Street)	Commercial	None
<b>West</b>	Schmidt's Auto Body and Glass Shop (736-752 Main Street)	Same	None

Refer to [Regulatory Information](#) below for additional information regarding the north, south and west adjacent properties.

#### **4.1 Site Reconnaissance Summary of Findings**

Observations made by LaBella during the site reconnaissance did not identify conditions indicative of the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property.

## 5.0 SUBJECT PROPERTY HISTORY AND USE

LaBella attempted to review reasonably ascertainable and readily available standard sources of historical information as defined by the ASTM E1527-13/21 in order to identify all obvious uses of the Subject Property back to the first developed use or 1940, whichever is earlier (i.e., the historical research objective according to ASTM). Uses of the properties adjacent to the Subject Property are identified in this report only to the extent that this information was revealed in the course of researching the Subject Property itself and were determined at the discretion of the Environmental Professional. As such, LaBella reviewed only as many of these sources as necessary to achieve the historical research objective. Data failures and data gaps are identified, defined, and evaluated for their significance in [Section 1.3](#) of this report.

Additional/historical addresses of the Subject Property were identified through the review of historical sources as 743-749 Main Street and 744-748 Washington Street; these addresses were searched as part of the City Directory review discussed below.

### 5.1 Sanborn Fire Insurance Maps

The apparent historical use of the Subject Property and surrounding area, as depicted by the Sanborn maps, is summarized in the table below. A copy of the Sanborn maps is included in the [Historical Information](#) Appendix.

Year	Location	Occupant/Development
1889, 1899	Subject Property	Undeveloped
	Surrounding Area	Undeveloped to the north and south, residential to the west, Sacred Heart Convent to the east
1925	Subject Property	Developed with the existing structure used as storefronts on Main Street and a garage on Washington Street; a gasoline UST was noted in the roadway adjacent to 744 Washington Street
	Surrounding Area	Auto sales and garage to the south; filling station with one gas tank to the north; auto sales and storefronts to the west; Sacred Heart Convent to the east
1951	Subject Property	Developed with the existing structure used as light manufacturing and storefronts along Main Street and an auto repair facility along Washington Street

Year	Location	Occupant/Development
	Surrounding Area	Storefronts, photoshop, and blueprinting facility with one gas UST to the south; filling station with four gas tanks to the north; restaurant and storefronts to the west; Stella Niagara School to the east
1981, 1986	Subject Property	Developed with the existing structure used as storefronts/ commercial along Main Street and a radio equipment warehouse along Washington Street
	Surrounding Area	Filling station/commercial building to the north; commercial building and blueprinting to the south; parking lot to the east; storefronts/commercial and a restaurant to the west

The following adjacent property uses of potential concern were identified:

- The north adjacent property addressed as 749 Main Street was identified as a filling station from at least 1925 to at least 1981. In addition, one gasoline UST was depicted on the south adjacent property in at least 1951.

## 5.2 City Directories

City Directory research was completed by ERIS.

Identified occupants associated with the Subject Property are detailed in the table below. Copies of street directories are included in the [Historical Information](#) Appendix.

Year	Occupant Listings
1930	743 Main Street - Thos Rick (bicycles) 745 Main Street - Peerless Pants Co., Alf Ring Manufacturing Co., Becker Quality Ring Manufacturing Co., Emil Luccl (tailor) 747 Main Street - Aberdeen Golf Course 749 Main Street - Simon Electric Co.
1935	743 Main Street - Thos Rick (bicycles) 745 Main Street - Alf Ring Manufacturing Co., Becker Jewelry Manufacturing, Reliable Tailors, Buffalo Waiters Alliance Local 196, Buffalo Waiters Club 747-749 Main Street - Heywood-Wakefield Co. (salesroom) 746 Washington Street - Heywood-Wakefield Co. (receiving department)

Review of the city directories indicated that properties surrounding the Subject Property were historically utilized for industrial, commercial, educational, religious, and residential purposes. The following adjacent property uses of potential concern were identified:

- The west adjacent property addressed as 746 Main Street was identified as a dry cleaner from at least 1955 to at least 1976.
- The west adjacent property addressed as 740 Main Street was identified as an automotive repair or auto body repair shop from at least 1930 to at least 1985.
- The east adjacent property at 779 Washington Street was listed as Eastman Machine Company from at least 1930 to at least 2020.

### 5.3 Aerial Photographs

The table below outlines observations of the Subject Property and surrounding area obtained from the review of aerial photographs. Copies of aerial photographs are included in the [Historical Information](#) Appendix.

Year	Location	Development
1959, 1966, 1974, 1995, 2005, 2009, 2015, 2019	Subject Property	Appeared to be developed with the existing structure
	Surrounding Area	Urban development, parking lots

The following adjacent property uses of potential concern were identified.

- The north adjacent property appeared to include a pump island (related to gasoline station use) from at least 1959 to at least 1974.

#### **5.4 Topographic Maps**

As sufficient information was obtained through a review of Sanborn maps, city directories, aerial photographs, and municipal records, topographic maps were not reviewed as part of this assessment.

#### **5.5 Municipal Records**

LaBella obtained municipal records from the City of Buffalo on September 1, 2022. In addition, limited assessment information was obtained from the Landmax Data Systems, Inc. website. The following information was obtained from these records. Copies of municipal records are included in the [Municipal Information](#) Appendix.

	<b>Findings/Details</b>
Parcel ID(s)	111.30-3-5
Subject Property Size (acres)	0.31
Current Owner	Nathan Associates LLC
Former Owners	Eric Chaffee, Schwalenberg
Square Footage of Building(s)/Date(s) of Construction	32,868/1900
Provided Utilities	All public

According to a letter from the City of Buffalo, there were no demolition/construction permits or tank records for 743 Main Street. LaBella reviewed records for the Subject Property at the City of Buffalo municipal offices; no records of concern were identified.

#### **5.6 Recorded Land Title Records**

According to the ASTM Standard Practice E1527-13/21, “the user should either engage a title company or title professional to undertake a review of reasonably ascertainable land title records and lien records for environmental liens or activity and use limitations currently recorded against or relating to the property or to negotiate such an engagement of a title company or title professional as an addition to the Scope of Work to be performed by the Environmental Professional.”

Title records were not provided to LaBella for review.

#### **5.7 Additional Sources**

No additional historical sources were reviewed.

## 5.8 Review of Previous Reports

No previous environmental reports were provided to LaBella for review. LaBella reviewed a Phase I ESA report for the property identified as XXX, addressed as XXX, prepared by XXX, dated XXXX. Based on the contents of that report, the subject property consisted of acres and was developed with XXX buildings. The subject property was utilized as a XXX describe findings of previous report. A copy of the report is included within Appendix 8.

## 5.9 Historical Summary of Findings

Based on LaBella's review of historical sources, the history of the Subject Property is as follows:

Time Period	Apparent Use/Development
In or before 1899 through at least 1899	Undeveloped
1900 through present	Developed with the existing structure, used as various storefronts, jewelry manufacturing, radio/electronics company, offices, and residential use, The eastern portion was used as a garage with a gasoline UST in at least 1925 and as an automotive repair facility from at least 1946 to at least 1955

Based on LaBella's review of historical information, the adjacent properties were historically utilized for commercial, educational, religious, and residential purposes. Adjacent properties of concern included a north adjacent gasoline station, an east adjacent machine shop, and west adjacent dry cleaner and auto repair facilities, Refer to Section 6.1.2 for adjacent property regulatory listings. There were no regulatory listings for the former dry cleaner at 746 Main Street; however, 746 Main Street is located topographically cross-gradient and across divided Main Street from the Subject Property.

LaBella's historical research identified the following conditions indicative of the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property:

- The eastern portion of the subject structure was identified as a garage with a gasoline UST in the adjacent roadway in at least 1925 and as an auto repair facility from at least 1946 to 1955.

## 6.0 REGULATORY INFORMATION

Federal, state, and tribal environmental regulatory information was provided by ERIS, an independent research firm, which completed an ASTM-compliant regulatory records search. This search was completed to ASTM-defined search distances; however, it should be noted that the distances searched may have been modified based on LaBella's experience due to the geology or nature of the area, as permitted under ASTM E-1527-13/21. Additionally, ERIS conducted a search of supplemental Federal, state, tribal, and local databases to augment the ASTM-specified search; any relevant listings from these supplemental searches are summarized in the following sections. The ERIS report, dated August 31, 2022 is included in the [Regulatory Information](#) Appendix.

The review of regulatory information was completed to evaluate the potential for environmental impact to the Subject Property, including contaminant migration from off-Subject Property locations. This evaluation included a review of regulatory records along with geologic/hydrogeologic information, topographical information, and/or distance relative to the Subject Property.

### 6.1 Regulatory Report Summary

A complete list of the databases reviewed is included within the ERIS report. Below is a summary of the identified listings within their respective search distance:

#### *Regulatory Report Summary*

Database	Search Radius	Target Property	Within 0.12mi	0.12mi to 0.25mi	0.25mi to 0.50mi	0.50mi to 1.00mi	Total

#### 6.1.1 Subject Property Listings

No regulatory listings associated with the Subject Property were identified.

#### 6.1.2 Adjacent Property Listings

The following regulatory listings associated with adjacent properties were identified:

##### Uniform Name Makers Inc., 742 Washington Street (south)

- LST Facility: Spill # 0551547 involved the discovery of contaminated soil while removing a fuel oil UST and is classified as closed by the NYSDEC. Contamination was below STARS limits and soil was disposed of in drums.

##### Schmidt's Auto Body & Glass, 555 Pearl Street (west)

- RCRA (ID No. NYD982279259) Non-Generator with one violation that was resolved
- Manifest listing associated with the RCRA generator listing

##### Dependable Cab, 757 Main Street (northwest)

- NY Spill listing: Spill # 9802624 involved a report of oil and grease on an asphalt parking lot; only minor staining was noted and the spill was classified as closed by NYSDEC.

Due to the nature and/or status of the listings, there does not appear to be a REC for the Subject Property in association with the adjacent regulatory listings at this time.

##### Moped Repair Shop, 753 Main Street (north)

- NY Spill listing: Spill # 0175129 involved the discovery of contaminated soil in 2001 while removing a UST and associated piping; this spill is classified as closed by NYSDEC. Although this spill is classified as closed, there was residual contamination remaining under buildings and no groundwater sampling was conducted. Based on this information and the upgradient location relative to the Subject Property, this spill is considered a REC.

### 6.1.3 Additional Listings

Based on distance, none of the other sites listed within the database report are considered likely to have current or former releases of hazardous substances and/or petroleum products with the potential to migrate to the Subject Property.

### 6.1.4 Unmappable Listings

Unmapped facilities were identified within the ERIS report. The specific location of these listings could not be determined due to incomplete or inaccurate address information. Based on the limited address information available for the listings, they do not appear to be associated with the Subject Property or adjacent properties.

## 6.2 Enforcement Action/Permitted Activities/Institutional Controls

No recorded enforcement actions or institutional controls were identified for the Subject Property during this Phase I ESA.

Provided information indicates that the Subject Property is not subject to environmental permit activities.

## 6.3 Regulatory Agency File and Records Review

The purpose of the regulatory file review is to obtain sufficient information to assist the Environmental Professional in determining if a recognized environmental condition, controlled recognized environmental condition, historical recognized environmental condition, de minimis condition, or significant data gap exists at the Subject Property in connection with the identified listings. Regulatory listings identified in the database report for the Subject Property and adjacent properties were evaluated in order to determine the need for a regulatory file review. Based on this evaluation, the following was concluded:

- As sufficient information was included within the ERIS report, no file review was warranted.

## 6.4 Regulatory Information Summary

Labella's review of regulatory information identified the following conditions indicative of the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property.

- The NY Spill (#0175129) listed for the north adjacent property involved the discovery of contaminated soil in 2001 while removing a UST and associated piping; this spill is classified as closed by NYSDEC. Although this spill is classified as closed, there was residual contamination remaining under buildings and no groundwater sampling was conducted.

Based on this information and the upgradient location relative to the Subject Property, this spill is considered a REC.

## 7.0 INTERVIEWS

---

Interviews were completed with representatives of the owner/operator of the Subject Property, Subject Property occupants, neighbors, and/or former owners/operators, to the extent possible, to further assess Subject Property operations and/or potential environmental concerns.

Additional information was obtained through federal, state, tribal, and/or local agencies or via the submission of Records Requests, as documented below.

### **7.1 Owner/Subject Property Representative**

Ashok Kapoor, owner, completed a questionnaire related to the Subject Property on September 7, 2022. According to the questionnaire:

- The Subject Property is currently used as storage and by DC Theatricks (costume shop and manufacturing).
- Former uses included a jeweler, bike shop, residential, dance hall, skating rink, produce market, and storage.
- Fuel oil has not been used on-site to his knowledge.

The questionnaire is included in the [Owner/Operator Questionnaire](#) Appendix.

### **7.2 Current Occupants**

See [Section 7.1](#) above.

### **7.3 Former Owners/Operators/Occupants**

No past owners/occupants were contacted because no contact information was provided through available municipal records or through a focused online search.

### **7.4 Neighbors**

The Subject Property is not an abandoned property; therefore, interviews with the neighboring property owners were not conducted.

### **7.5 Local Government Official**

A FOIL request was submitted to the City of Buffalo, Rhonda Zloty on August 30, 2022 requesting copies of building department, assessment, and fire marshal records on file for the Subject Property. A response was received on September 1, 2022; relevant records are discussed in Section 5.5 above. A copy of the FOIL request and the records obtained from the City of Buffalo. Research was also

conducted at the City of Buffalo municipal offices. FOIAs and documentation are included in the [Municipal Information](#) Appendix.

#### **7.6 State Regulator**

A FOIL request was submitted to the NYSDEC on September 9, 2022.

As of the date of this report submission, a complete response has not been received from the NYSDEC. A copy of the FOIL request is included in the [Municipal Information](#) Appendix.

#### **7.7 State and/or County Health Department**

A FOIL request was submitted to the NYSDOH on August 30, 2022.

As of the date of this report submission, a response has not been received from the NYSDOH. A copy of the FOIL request is included in the [Municipal Information](#) Appendix.

#### **7.8 Summary of Interviews**

LaBella's interviews and/or review of provided records did not identify conditions indicative of the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property.

## **8.0 ADDITIONAL SERVICES/ASTM NON-SCOPE CONSIDERATIONS**

---

No additional services were provided or agreed upon as part of this assessment.

## 9.0 FINDINGS AND OPINIONS

---

The Subject Property, 743-749 Main Street, Buffalo, New York, includes 0.31-acres of land and is developed with a costume shop and vacant commercial and residential spaces. The subject property has previously always been mixed commercial and residential.

Based on the results of this assessment, the following RECs have been identified in connection with the Subject Property:

- The eastern portion of the subject structure was identified as a garage with a gasoline UST in the adjacent roadway in at least 1925 and as an auto repair facility from at least 1946 to 1955. Although the UST was in the adjacent roadway, the associated piping and dispenser would likely have been located within the boundaries of the Subject Property.
- The NY Spill (#0175129) listed for the north adjacent property involved the discovery of contaminated soil in 2001 while removing a UST and associated piping; this spill is classified as closed by NYSDEC. Although this spill is classified as closed, there was residual contamination remaining under buildings and no groundwater sampling or vapor study was conducted. Based on this information and the upgradient location relative to the Subject Property, this spill is considered a REC.

Based on the results of this assessment, no CRECs have been identified in connection with the Subject Property.

Based on the results of this assessment, no HRECs have been identified in connection with the Subject Property.

Based on the results of this assessment, no de minimis conditions have been identified in connection with the Subject Property.

Based on the results of this assessment, no significant data gaps have been identified in connection with the Subject Property.

- The Subject Property currently includes a retail storefront and has historically included residential and commercial operations. While hazardous materials and/or petroleum products may have been used/stored in association with these operations, they are not considered to pose an environmental concern at this time.
- The Site Building is currently heated with natural gas. Given the age of the structure, there is the potential for previous heating systems to have been in use on-site. However, there were

no records or evidence identified to suggest an on-site concern relative to historical heating systems at this time

## **9.1 Recommendations**

**Based on the findings of this assessment, further investigation appears warranted at this time.**

## 10.0 CONCLUSIONS

---

LaBella has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13/21 for 743-749 Main Street, Buffalo, New York, the Subject Property. Any exceptions to, or deletions from, this practice are described in [Section 1.4](#) of this report.

This assessment has revealed the following recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the Subject Property:

- Past on-site automotive repair operations and associated gasoline UST
- Adjacent up-gradient spill

This report constitutes the findings and recommendations of LaBella's investigation conducted for the Subject Property as written and reviewed by the following personnel:

Allison Leet  
Environmental Analyst

Mary Beth Facklam  
Phase I Technical Reviewer

## 11.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. § 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Mary Beth Facklam  
Phase I Technical Reviewer  
*Environmental Professional*

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

### Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

**Geologic Units**

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

## Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

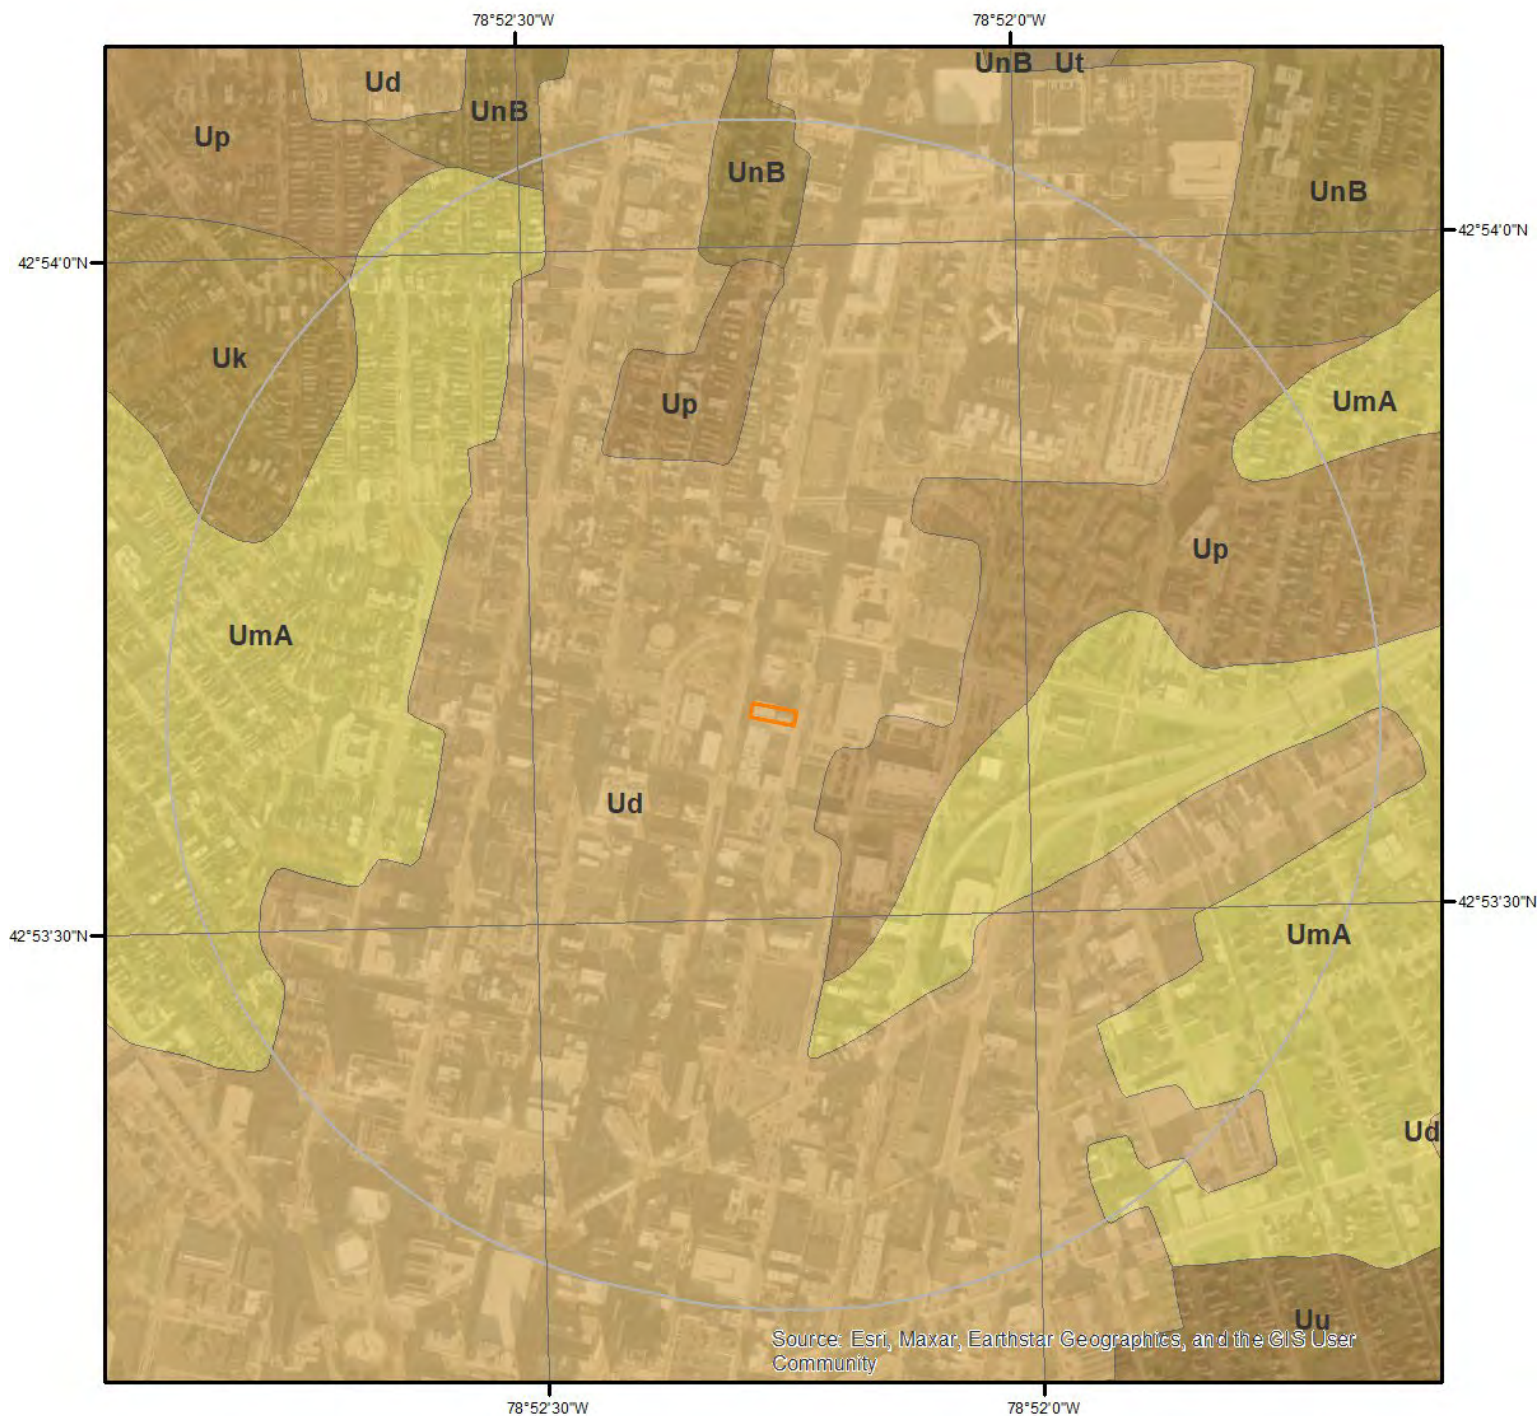

---

### Geologic Unit Dob

Unit Name:	Onondaga and Bois Blanc Limestones
Unit Age:	Middle Devonian
Primary Rock Type:	limestone
Secondary Rock Type:	sandstone
Unit Description:	Onondaga and Bois Blanc Limestones - In New York: Onondaga Limestone-Seneca, Morehouse (cherty), and Clarence Limestone Members, Edgecliff cherty Limestone Member, local coral bioherms; Bois Blanc Limestone-sandy, thin, discontinuous. In Ontario: Dundee Limestone; Lucas Formation-dolostone, limestone (Anderdon); Amherstburg Formation-limestone, dolostone, sandstone (Sylvania); Bois Blanc Formation-dolostone, limestone, sandstone (Springvale).

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

## Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

---

### Map Unit Ud (75.24%)

Map Unit Name: Urban land

No more attributes available for this map unit

#### Component Description:

Minor map unit components are excluded from this report.

Map Unit: Ud - Urban land

Component: Urban land (80%)

Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Odessa (5%)

Generated brief soil descriptions are created for major soil components. The Odessa soil is a minor component.

Component: Udorthents (5%)

Generated brief soil descriptions are created for major soil components. The Udorthents soil is a minor component.

Component: Mardin (5%)

Generated brief soil descriptions are created for major soil components. The Mardin soil is a minor component.

Component: Getzville (5%)

Generated brief soil descriptions are created for major soil components. The Getzville soil is a minor component.

---

### Map Unit Uk (0.62%)

Map Unit Name: Urban land-Claverack complex

Bedrock Depth - Min: null

Watertable Depth - Annual Min: 54cm

Drainage Class - Dominant: null

Hydrologic Group - Dominant: null

Major components are printed below

Claverack(30%)

horizon H1(0cm to 25cm) Loamy fine sand

horizon H2(25cm to 89cm) Loamy fine sand

horizon H3(89cm to 152cm) Clay

#### Component Description:

Minor map unit components are excluded from this report.

Map Unit: Uk - Urban land-Claverack complex

Component: Urban land (60%)

Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Claverack (30%)

The Claverack component makes up 30 percent of the map unit. Slopes are 0 to 3 percent. This component is on proglacial lake plains. The parent material consists of sandy glaciolacustrine deposits, derived primarily from non-calcareous sandstone or granite, that overlie clayey glaciolacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water

## Soil Information

saturation is at 21 inches during January, February, March, April, May, November, December. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 2w. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 1 percent.

Component: Varysburg (3%)

Generated brief soil descriptions are created for major soil components. The Varysburg soil is a minor component.

Component: Cosad (3%)

Generated brief soil descriptions are created for major soil components. The Cosad soil is a minor component.

Component: Udorthents (2%)

Generated brief soil descriptions are created for major soil components. The Udorthents soil is a minor component.

Component: Cheektowaga (2%)

Generated brief soil descriptions are created for major soil components. The Cheektowaga soil is a minor component.

---

### Map Unit UmA (20.96%)

Map Unit Name: Urban land-Collamer complex, 1 to 6 percent slopes

Bedrock Depth - Min: null

Watertable Depth - Annual Min: 54cm

Drainage Class - Dominant: null

Hydrologic Group - Dominant: null

Major components are printed below

Collamer(30%)

horizon H1(0cm to 25cm) Silt loam

horizon H2(25cm to 38cm) Silt loam

horizon H3(38cm to 81cm) Silty clay loam

horizon H4(81cm to 152cm) Stratified silt loam to very fine sand to silty clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: UmA - Urban land-Collamer complex, 1 to 6 percent slopes

Component: Urban land (60%)

Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Collamer (30%)

The Collamer component makes up 30 percent of the map unit. Slopes are 0 to 6 percent. This component is on proglacial lake plains. The parent material consists of silty and clayey glaciolacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 21 inches during March, April, May. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria.

Component: Udorthents (3%)

Generated brief soil descriptions are created for major soil components. The Udorthents soil is a minor component.

Component: Niagara (3%)

Generated brief soil descriptions are created for major soil components. The Niagara soil is a minor component.

Component: Canandaigua (2%)

Generated brief soil descriptions are created for major soil components. The Canandaigua soil is a minor component.

Component: Williamson (2%)

Generated brief soil descriptions are created for major soil components. The Williamson soil is a minor component.

## Soil Information

### Map Unit UnB (1.32%)

Map Unit Name:	Urban land-Colonie complex, 3 to 6 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	null
Hydrologic Group - Dominant:	null

Major components are printed below

#### Colonie(25%)

horizon H1(0cm to 18cm)	Loamy fine sand
horizon H2(18cm to 152cm)	Fine sand
horizon H3(152cm to 178cm)	Fine sand

#### Component Description:

Minor map unit components are excluded from this report.

Map Unit: UnB - Urban land-Colonie complex, 3 to 6 percent slopes

Component: Urban land (60%)

Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Colonie (25%)

The Colonie component makes up 25 percent of the map unit. Slopes are 3 to 6 percent. This component is on proglacial deltas, proglacial beach ridges. The parent material consists of sandy glaciofluvial or eolian deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 2s. This soil does not meet hydric criteria.

Component: Arkport (5%)

Generated brief soil descriptions are created for major soil components. The Arkport soil is a minor component.

Component: Alton (5%)

Generated brief soil descriptions are created for major soil components. The Alton soil is a minor component.

Component: Udorthents (3%)

Generated brief soil descriptions are created for major soil components. The Udorthents soil is a minor component.

Component: Halsey (2%)

Generated brief soil descriptions are created for major soil components. The Halsey soil is a minor component.

---

### Map Unit Up (1.87%)

Map Unit Name:	Urban land-Galen complex
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	54cm
Drainage Class - Dominant:	null
Hydrologic Group - Dominant:	null

Major components are printed below

#### Galen(25%)

horizon H1(0cm to 20cm)	Very fine sandy loam
horizon H2(20cm to 61cm)	Loamy fine sand
horizon H3(61cm to 91cm)	Loamy fine sand
horizon H4(91cm to 152cm)	Stratified fine sand to very fine sand

#### Component Description:

Minor map unit components are excluded from this report.

## Soil Information

Map Unit: Up - Urban land-Galen complex

Component: Urban land (60%)

Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Galen (25%)

The Galen component makes up 25 percent of the map unit. Slopes are 0 to 3 percent. This component is on proglacial deltas on lake plains. The parent material consists of deltaic deposits with a high content of fine and very fine sand. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 21 inches during March, April, May. Organic matter content in the surface horizon is about 3 percent. Nonirrigated land capability classification is 2w. This soil does not meet hydric criteria.

Component: Elnora (5%)

Generated brief soil descriptions are created for major soil components. The Elnora soil is a minor component.

Component: Udorthents (5%)

Generated brief soil descriptions are created for major soil components. The Udorthents soil is a minor component.

Component: Lamson (3%)

Generated brief soil descriptions are created for major soil components. The Lamson soil is a minor component.

Component: Minoa (2%)

Generated brief soil descriptions are created for major soil components. The Minoa soil is a minor component.

## Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *ERIE* County: **1**

*Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L*

*Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L*

*Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L*

---

### Federal Area Radon Information for *ERIE* County

No Measures/Homes:	4671
Geometric Mean:	14.2
Arithmetic Mean:	4.4
Median:	1.1
Standard Deviation:	1.3
Maximum:	371.9
% >4 pCi/L:	18
% >20 pCi/L:	4
Notes on Data Table:	Table 1. Screening indoor radon data compiled by the New York State Department of Health. Data represent 1-7 day charcoal canister measurements from the lowest level of each home tested.

## Federal Sources

### FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

### Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

### Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

### Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

### Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

### Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

### U.S. Fish & Wildlife Service Wetland Data

US WETLAND

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

### USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

### USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

### USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

### Wells from NWIS

FED USGS

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well,

## Appendix

Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

### **State Sources**

#### **Oil and Gas Wells**

**OGW**

The Division of Mineral Resources maintains a data management system on wells regulated under the Oil, Gas and Solution Mining Law (OGSML). To assist the Division in the regulation of wells subject to the OGSML, a database of the wells was created in the early 1980's and significantly upgraded in 1998 by the adoption of the Risk Based Data Management System. This system provides information on well ownership, well owners and operators, registered driller, pluggers and companies that provide financial security instruments.

#### **Regulatory Freshwater Wetlands**

**WETLAND**

The Regulatory Freshwater Wetlands data are a set of ARC/INFO coverages composed of polygonal and linear features. Coverages are based on official New York State Freshwater Wetlands Maps as described in Article 24-0301 of the Environmental Conservation Law. Coverages are not, however, a legal substitute for the official maps. Coverages are available on a county basis for all areas of New York State outside the Adirondack Park. This dataset is provided by New York State Department of Environmental Conservation.

#### **Underground Injection Control Wells**

**UIC**

A well permit is required from the Division of Mineral Resources for any brine disposal well deeper than 500 feet. This includes any operation to drill, deepen, plug back or convert a well. Regardless of well depth, the NYSDEC Division of Water must be contacted for a determination of whether a SPDES permit is necessary to operate any brine disposal well.

#### **Water Wells Database**

**WATER WELLS**

The New York State Department of Environmental Conservation (DEC) Bureau of Water Resource Management works to protect, manage, and conserve New York State's groundwater and surface water supply sources, develop management strategies to enhance and protect these waters, and protect both the groundwater and surface water quality in the New York City Watershed and other major watersheds. This dataset does not include information on wells located in Nassau, Suffolk, Kings, and Queens counties.

## Liability Notice

**Reliance on information in Report:** The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# User Provided Information

## USER QUESTIONNAIRE

Project No. \_\_\_\_\_ Date: 8/23/22  
 Site Name/ Address: 743 Main Street, Buffalo  
 Site Contact (to arrange site visit/conduct Site owner interview): Name: Ashok Kapoor  
 Phone Number: 716-930-0059 Email Address: ashok.kapoor13@gmail.com

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by or on behalf of EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the *Environmental Professional*. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

User (Print Name): ALAN DEWART  
 Title: Purchaser's Agent  
 Signature: Alan Dewart

Information regarding these questions was obtained from the following parties (if applicable): \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

Purpose of this Assessment: ☐ Selling the property ☒ Purchasing the property ☐ Construction loan  
☐ Re-financing the property ☐ Other (explain): \_\_\_\_\_

### 1. Title Records

Land title records (or judicial records where appropriate, see Note 1 below) are filed under federal, tribal, state or local law and should be reviewed to identify environmental liens or activity and use limitations (AULs), if any, that are currently recorded or filed against the property. Are land title records available for review? ☐ No ☐ Yes (If yes, please provide.) ☒ Unknown

**Note 1** – In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases, judicial records must be searched for environmental liens and AULs.

### 2. Environmental liens that are filed or recorded against the property (40 CFR 312.25)

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

☐ No ☐ Yes ☒ Unknown

Based on review of readily available information: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

### 3. Activity and land use restrictions (AULs) that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi))

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law?

☐ No ☐ Yes ☒ Unknown

Based on review of readily available information: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

4.

**Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)**

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or and *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ No☒ Yes☐ Unknown

Based on review of readily available information:

Purchaser owns five contiguous  
properties to the south of 743 Main St.

5.

**Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29)**

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

☐ No☒ Yes☐ Unknown☐ N/A- there is no transfer of ownership

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

☐ No☐ Yes☐ Unknown

Based on review of readily available information:

6.

**Commonly known or reasonably ascertainable information about the *property* (40 CFR 312.30)**

Are you aware of any commonly known or reasonably ascertainable information about the *property* that could help the *Environmental Professional* to identify conditions indicative of releases or threatened releases? For example:

(a) Do you know of the past uses of the *property*?☐ No☐ Yes☒ Unknown

Based on review of readily available information:

(b) Do you know of specific chemicals that are present or once were present at the *property*?☐ No☐ Yes☒ Unknown

Based on review of readily available information:

(c) Do you know of spills or other chemical releases that have taken place at the *property*?☐ No☐ Yes☒ Unknown

Based on review of readily available information:

(d) Do you know of any environmental cleanups that have taken place at the *property*?☐ No☐ Yes☒ Unknown

Based on review of readily available information:

7. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

Based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of releases at that *property*?

☒ No ☐ Yes ☐ Unknown

Based on review of readily available information: \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_

Please provide attachments if necessary to explain any answers to the above questions.

# Site Reconnaissance Worksheet

### Site Reconnaissance Worksheet

RE: CITY DIRECTORY RESEARCH  
743-749 main st buffalo ny  
Buffalo, NY 14203

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

**Search Criteria:**

733-753 of Main Street  
731-810 of Washington Street

**Search Notes:**

# Owner/Operator Questionnaire

Project No. 2223692 Date of Interview: 9-7-2022 Conducted by: \_\_\_\_\_

Address (tax # if undeveloped): 743-749 Main Street, Buffalo, NY 14202

Interviewee & Relationship to Site: Owner/ Partner/GM How long affiliated with Site: 19+ years

Title/Position/Relationship to Site: ☒ Owner ☐ Owner Representative ☐ Former Owner ☐ Occupant  
☐ Former Occupant ☐ Neighbor ☐ Purchaser ☒ Seller ☐ Real estate agent  
☐ Property Manager ☐ Other (explain): \_\_\_\_\_

Additional Contacts: \_\_\_\_\_

1. What is the purpose of this assessment? ☒ Selling the property ☐ Purchasing the property  
☐ Construction loan ☐ Re-financing the property ☐ Other (explain): \_\_\_\_\_

2. Do you have a PROPERTY SURVEY MAP or OTHER MAPPING of the Site available?

☒ No ☐ Yes ☐ Unknown (if Yes, please provide if possible)

attorney - Amber Bhargava

3. Number of building(s): Two  
Acreage of Site: Total 66' X 197'

Total sq. ft. of building(s):  
☐ Unknown ☐ NA

1: 66' X 100' 4 floors  
2: 66' X 97' 1 floor - rear

Building #1/location:	Sq. ft.	Construction Date:
Building #2/location:	Sq. ft.	Construction Date: <u>1914</u>
Building #3/location:	Sq. ft.	Construction Date:
Building #4/location:	Sq. ft.	Construction Date:

4. What is the CURRENT USE(S) of the Site (and/or Site Buildings if applicable) and DATES, if known? ☐ Unknown

#1 Mercantile - DC Theatrics  
Costume shop + manufacturing  
#2 Storage

5. What are the PAST USE(S) of the Site (and/or Site Buildings if applicable) and DATES of occupancy, if known? ☐ Unknown

#1: Costume shop, Jewellers, Bike shop, residential Rental  
#2: Dance Hall, Skating Rink, Produce Market, storage

6. Have any buildings been BURNED or DEMOLISHED on the Site? ☒ No ☐ Yes ☐ Unknown  
Explain: \_\_\_\_\_

Was the Debris:

Burned on Site ☐ No ☐ Yes ☐ Unknown

Removed from Site ☐ No ☐ Yes ☐ Unknown

Explain: \_\_\_\_\_

Buried on Site ☐ No ☐ Yes ☐ Unknown

Has the Site ever been developed with a residential structure? ☐ No

☒ Yes ☐ Unknown

upper floors  
and mercantile - Business +  
manufacturing costumes,  
Bike sale + repairs

7. Is the SITE or any ADJOINING PROPERTY CURRENTLY or PREVIOUSLY utilized as any of the following?  
Dry Cleaning Facility ☒ No ☐ Yes ☐ Unknown ☐ Site ☐ Adjoining Property to the \_\_\_\_\_  
Dates and Explain:

X-ray or Film Developing ☒ No ☐ Yes ☐ Unknown ☐ Site ☐ Adjoining Property to the \_\_\_\_\_  
Dates and Explain:

Is there a Metal Recovery System in Place? ☒ No ☐ Yes ☐ Unknown *Recycling by city*  
Explain:

Car Repair Shop: ☒ No ☐ Yes ☐ Unknown ☐ Site ☐ Adjoining Property to the \_\_\_\_\_  
Dates and Explain:

Paint/Body Shop: ☒ No ☐ Yes ☐ Unknown ☐ Site ☐ Adjoining Property to the \_\_\_\_\_  
Dates and Explain:

- 5.

Are there any LEAK DETECTION DEVICES in place? ☐ No ☐ Yes ☐ Unknown

Explain:

NA

Have any TANKS been: ☐ Unknown ☒ No

Date(s):

☐ REMOVED from the Site

Explain:

Location:

☐ CLOSED in place at the Site

Explain:

Location:

NO to my knowledge

Is **Documentation/Closure Reports /Analytical Data** Available? ☐ No ☐ Yes ☐ Unknown NA  
(Please provide copy)

Has any CONTAMINATION been identified or REMEDIATION been required at the Site; related to CURRENT OR PRIOR TANKS?

☒ No ☐ Yes ☐ Unknown

Explain:

Has any CONTAMINATION been identified or REMEDIATION been required at a neighboring property; related to CURRENT OR PRIOR TANKS? ☒ No ☐ Yes ☐ Unknown

Explain:

21. What type of CHEMICALS are CURRENTLY or have PREVIOUSLY been STORED or UTILIZED on Site? NA

**Type:** \_\_\_\_\_ **Usage:** \_\_\_\_\_ **Storage Container/Capacity:** \_\_\_\_\_ **Disposal Method:** \_\_\_\_\_

Are MSDS sheets readily available for these chemicals? ☐ No ☐ Yes ☐ Unknown (if Yes, please provide copies)

22. Have there been any SPILLS, UNPERMITTED DISCHARGES, or RELEASES of HAZARDOUS or CONTAMINATED MATERIALS or PETROLEUM PRODUCTS at or in the vicinity of the Site? ☒ No ☐ Yes ☐ Unknown

**What?** \_\_\_\_\_ **When?** \_\_\_\_\_ **Location:** \_\_\_\_\_

23. Are you AWARE if the SITE is listed as any of the following -Check all that Apply: ☒ No  
(please provide information for 'yes' responses)

Regulatory Listing:

Explain:

- ☐ National Priority or Delisted Priority List
- ☐ CERLCIS Site
- ☐ CERCLIS NFRAP Site
- ☐ RCRA Generator Facility
- ☐ RCRA Treatment/Storage/Disposal Facility

- ☐ State or Local Landfill
- ☐ National Response Site
- ☐ NYSDEC Spill Site
- ☐ Hazardous Waste Disposal Site
- ☐ Brownfield or Voluntary Cleanup Site
- ☐ Institutional or Environmental Control Site
- ☐ Hazardous Substance Site

24. To the best of your knowledge, do you have any FEDERAL, STATE, or LOCAL PERMITS for the following?  
☒ None ☐ Air Emissions ☐ SPDES (waste water discharge)  
 Explain:
25. Has the Site ever been the subject of an ENFORCEMENT ACTION by any FEDERAL, STATE, or LOCAL agency regarding ENVIRONMENTAL ISSUES? ☒ No ☐ Yes ☐ Unknown  
 Explain and provide DATES and any Documentation:
26. Is the Site presently under any FEDERAL, STATE, or LOCAL CONSENT ORDERS, DECREES, or CAUSE of ACTION?  
☒ No ☐ Yes ☐ Unknown  
 Explain and provide DATES and any Documentation:
27. Are you aware of any ENVIRONMENTAL LIENS on the Site? ☒ No ☐ Yes ☐ Unknown  
 Explain:
28. Are you aware of any LAND USE or ACTIVITY LIMITATIONS that are in place on the Site or have been FILED or RECORDED in a registry? ☒ No ☐ Yes ☐ Unknown  
 Explain:
29. Are you aware of any KNOWLEDGE or INDICATORS related to the Site that point to the PRESENCE or LIKELY PRESENCE of CONTAMINATION? ☒ No ☐ Yes ☐ Unknown  
 Explain:
30. Are you aware if the PURCHASE PRICE of this Site reasonably reflects the fair market value of the property?  
☐ No ☐ Yes ☒ Unknown ☐ NA (Site is not being sold at this time)  
 Explain:
31. Has there ever been PREVIOUS Phase I Environmental Site Assessments or environmental audits performed for the Site?  
☐ No ☐ Yes ☐ Unknown (if Yes, please provide copies if possible)  
 If yes, by Whom? *M&T Bank required for mortgage date? 2002 or 2003*  
 Concerns identified: ☒ No ☐ Yes ☐ Unknown  
 Explain:
32. Is the ABSTRACT OF TITLE for the Site available? ☐ No ☒ Yes ☐ Unknown *attorney*  
 (If Yes, please provide if possible or provide name and contact information for attorney that may have report)
33. Do you have any additional information or specialized knowledge or experience regarding the Site?  
☒ No ☐ Yes ☐ Unknown  
 Explain:
34. Do you have any information related to the future use of the Site? ☒ No ☐ Yes ☐ Unknown  
 Explain:

35. Has the Site ever been utilized agriculturally? ☐ No ☐ Yes ☒ Unknown  
If so, when?:  
Explain:

## FREEDOM OF INFORMATION LAW RECORDS REQUEST FORM

Under the provisions of Article 6, Sections 84 -90, of the New York State Public Officers Law entitled, the FREEDOM OF INFORMATION LAW (FOIL), I hereby request the records or portions thereof that I have reasonably described in Part "B" of this form.

### PART A - APPLICANT INFORMATION

1. Name of Applicant: \_\_\_\_\_
2. Company Name: \_\_\_\_\_
3. Type of Business:
  - ☐ Government Entity
  - ☐ Law Firm
  - ☐ Media
  - ☐ Other \_\_\_\_\_
4. Address: \_\_\_\_\_ City: \_\_\_\_\_ State: \_\_\_\_\_ Zip Code: \_\_\_\_\_
5. Telephone Number: \_\_\_\_\_ Fax Number: \_\_\_\_\_
6. E-Mail: \_\_\_\_\_

### PART B – INFORMATION REQUESTED

Describe the records that you are requesting in the space provided below. Please include as much detail as possible such as the respective department having possession of the records, dates, titles, or any other information that may assist us in locating the record(s) you are seeking.

---

---

---

---

---

---

---

---

---

---

## PART C – METHODS OF REVIEW

- ☐ I would like to schedule a time to review the records that I am requesting. I understand that access to the requested records will be provided in accordance with Section 87 of New York State Public Officers Law. I understand that copies may not be immediately available.
- ☐ I would like the requested documents mailed to me. I understand that access to the requested records will be provided in accordance with Public Officers Law §87. I understand that any fees associated with my obtaining copies of the requested records must be received by the City before the records are disclosed.
- ☐ I would like the requested records sent to the following e-mail address: \_\_\_\_\_

## PART D – FEES

Should you desire copies of records, fees shall apply in accordance with Section 87(1) of the Public Officers Law. Advanced payment is required before records will be released. Please make check or money orders payable to the **City of Buffalo**.

**FEES FOR PHOTOCOPIES:** *Pages up to 9" x 14" are \$.25 ea. or the actual cost of reproducing any other record.*

The fee for reproducing a record may include the actual cost of the storage device or media; actual cost for engaging outside professional service to reproduce record; hourly salary for employee time used in reproducing the record.

## PART E – SUBMISSION OF REQUEST

After you have reasonably described the records you wish to inspect or obtain, please sign this form and return it to the appropriate City department that maintains the records you seek. Requests may be sent via electronic mail, regular US mail, or hand delivery.

I hereby affirm that the information I have provided on this request form is correct.

**RE- Freedom of Information Act Request (FOIA): 743 Main**

Dear Allison,

The Department of Permit & Inspection Services has performed an electronic search of the records and files within the department that pertain to the above-mentioned address.

**The department's findings are as follows:**

- There are no Demolition/Construction permits on file
- There are no Tank installation/removal permits on file
- Contact the NYSDEC regarding environmental concerns

Please be advised that the electronic search may not have produced all departmental records for the aforementioned address. If you wish to conduct a physical search of our records, please contact our office to schedule an appointment.

If you have questions or comments concerning this matter, please feel free to contact our office at (716) 851-4921.

Very truly yours,

Ron Draffin, Senior Clerk

FOIL #: 22-08-517  
RE: 743-749 Main Street, Buffalo, NY

Dear Allison Leet:

This will acknowledge receipt of your request for records under the Freedom of Information Law (FOIL), received by this office on August 30, 2022.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

A determination as to whether your request is granted or denied will be reached in approximately 20 business days or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble, and review documents that may be responsive to your request.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

A handwritten signature in black ink, appearing to read "Rosemarie Hewig". The signature is fluid and cursive, with a large initial "R" and "H".

RE: 739-745 Main Street  
Roof Fire - May 17, 1982

Dear Mr. Clark:

The above-referenced fire was a series of scattered smoldering punk-like embers. First Battalion Chief John Foy was unable to pinpoint a source of ignition and left the cause undetermined. He requested a review of the material involved by the Fire Prevention Bureau.

Members of the bureau obtained a sample of the material and did contact a local distributor of this type of material and a manufacturer's representative. The material is composed of wood pulp, paper and glue and appears to be similar to backer board wood shakes. As far as can be determined, it has little insulating value and is not fire-retarded. It will burn. We do not understand why this material was used to repair a leaking roof.

Our review did not disclose any new information as to the source of ignition, and the cause will remain undetermined.

Due to the circumstances of the fire, we believe it would be in the best interest of fire safety if this material were completely removed before a new roof is installed.

Sincerely yours,

Charles T. Laudico, Lieutenant

Joseph E. Hynes, Chief

CITY OF BUFFALO  
INTER DEPARTMENTAL CORRESPONDENCE

To Mr. Jack Friedline, Senior Deputy Date November 29, 1983  
Commissioner of Public Works Subject Empire State Ballet - 745 Main  
From Mr. Walter J. Przepasniak, Director of Street \_\_\_\_\_  
Program Management

Dear Jack,

The Department of Community Development, along with Public Works, Fire Inspection, Inspections and Licenses, met with representatives of the Finance Committee regarding the Empire State Ballet, 745 Main Street.

In order for us to investigate sources for additional funding, we will need a cost budget. Could you have Mr. Edward Lindsay of your staff prepare a cost estimate for the eight (8) items indicated on the enclosed letter.

If you have any questions on this matter, feel free to contact me.  
Again, thanking you in advance.

## EMPIRE STATE BALLET

745 MAIN STREET  
BUFFALO, N.Y. 14203

March 3  
~~November 9~~, 1983 716/ 856-8311

MEMO TO: Councilman Eugene M. Fahey  
FROM: Harry Ferris; Empire State Ballet  
RE: CDBG Proposal

### SUPPLEMENTAL CDBG FUNDS NEEDED TO COMPLETE DEVELOPMENT PROJECT

Approved  
MAY 3, 1983  
\$12,000

The Empire State Ballet urgently requires funds to complete the physical development of the Theatre District Dance/Theatre Studio & Rehearsal Complex; entitled: DANCE WORKS.

Work on this project is more than half complete as a result of a 7th year CDBG allocation totaling \$28,000; however, critical components of the facility are incomplete despite a most economical application of the prior funding. An additional \$15,000 is now needed to:

1. CONSTRUCT FIRE RATED WALL FOR EXIT CORRIDOR WHICH WILL ENCLOSE SCENERY/COSTUME WORKSHOP AREA.
2. COMPLETE PLUMBING HOOK-UP OF SHOWERS.
3. INSTALL HEATING SYSTEM AND CIRCULATORY FANS.
4. COMPLETE WEATHERIZATION OF WINDOWS.
5. COMPLETE STAIR WELL AND HALL ENTRANCE.
6. INSTALL NEON SIGN AND EXTERIOR AWNING TO CREATE A VISABLE ATTRACTION OF "DANCE WORKS" FROM MAIN STREET.

7. FIRE DETECTION SYSTEM

8. ENCLOSED FIRE EXIT

These additional components are critical to the effectiveness of the entire project. Upon their completion, the project can perform its role as a community wide center for the PERFORMING ARTS and a CATALYST to the DOWNTOWN RENAISSANCE.

Sincerely,  
Harry Ferris

Harry Ferris, President, Empire State Ballet Theatre District

March 5, 2003

Re: 745 Main St.

Monday March 3, 2003 Chief Stasio and I inspected 745 Main St. due to a call that people were living on the second and third floors of a commercial building. Upon inspection, we found that there were people living on the second floor in two apartments/work studios. The third floor looked the same, only to find out later that it is unoccupied at this time.

We met with the current building owner (Dale? from Buffalo Big Prints) and told him the situation, and told him to evict the tenants. He (Dale?) agreed and said he would comply. He also notified us that the building was sold and he is just waiting to close the deal.

Wednesday March 5, 2003 I received a call from the son of the future owner, who has a working relationship with at least one of the tenants. His name is Rohit Kapoor (c) 903-0333. He said the projected plans for the building are to make it commercial office space and possibly living space on the third floor. He said the occupants don't live there, they just stay overnight if working on a project into the late hours of night and was also concerned how evicting the tenants would affect purchasing the building. My response was that the tenants should immediately remove all bedding, mattresses, or anything that resembled those things that would indicate the space was being used as an apartment, then the occupants could continue to use the space for working.

re

BU-87

CITY OF BUFFALO  
INTER DEPARTMENTAL CORRESPONDENCE

To Robert A. O'Hara  
Director of Buildings  
From Chester Pawarski, Lieutenant  
Bureau of Fire Prevention

Date March 7, 1983  
Subject 743-747 Main Street

743-747 MAIN

A review of the above-noted premises' building plans that were referred to this Bureau revealed that the following items were not detailed.

1. A fire detection system will be required as per the Fire Safety of Public Assembly.
2. The fire escape is noted on the plan as a required second means of egress. The present fire escape terminates at the first floor roof level and requires a person to cross over the roof to the balanced staircase.

This condition is not acceptable and must be corrected to have continuous travel.

Approval will be withheld until plans have been revised to include the above.

Sincerely,

Chester Pawarski, Lieutenant  
BUREAU OF FIRE PREVENTION  
Buffalo Fire Department

Mr. Kenneth Saltzman  
Studio Arena Theatre  
710 Main Street  
Buffalo, New York 14202

RE: 743-747 Main Street

Dear Sir:

An inspection of the above-noted premises revealed that the 2nd floor is being leased by Studio Arena Theatre for the purpose of teaching dramatics. A research of our files indicates that a use permit was never issued by the Permit Office for Public Assembly occupancy.

It was also noted that the 2nd means of egress, which is a fire escape, does not conform to code requirements - the path of travel is not continuous to grade and is in need of immediate repairs.

To continue use of this building, you are requested to file plans with your application for a use permit in Room 301 City Hall within 10 days.

Yours truly,

Chester Pawarski, Lieutenant

Buffalo, New York 14202

Dear Lieutenant Pawarski:

In response to your letter of February 25 addressed to our House Management Intern, Ken Saltzman:

1. The leased area of 743-747 Main Street is being used not for the teaching of dramatics, but for a rehearsal hall. Our staff are the only persons admitted to rehearsal, therefore the hall is not a public assembly area. Would you please advise me as to whether we need a permit for this area.
2. As for repair of the fire escape, should this be addressed to the landlord, Mr. Gerry Abelson, Purchase Radio, 747 Main Street?
3. Future correspondence about building and safety can be addressed to me, Cathy Rogers, Front of House Director, or to my superior, Carol Kolis, Associate Managing Director. Ken Saltzman is an intern, and will not be able to handle these requests directly.

We are very concerned about fire safety in all of our facilities, and we look forward to hearing from you about the need for a permit in 743-747 Main Street.

Sincerely,

  
Cathy Rogers, Front of House Director

**Caller Remark:**

"SOIL BORINGS DONE DURING PHASE II SITE ASSESSMENT INDICATED THAT SOIL CONTAMINATION WAS PRESENT. "

**DEC Remark:**

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was FG 6/5/01 SPOKE TO NATURE'S WAY, RUSS SAVAGE, WHO SAID HE WILL SUBMIT THE PHASE II WHEN IT IS COMPLETED. THEY HAVE TO DETERMINE EXTENT OF CONTAMINATION OFF SITE WITHIN A WEEK AND THE REPORT WILL BE SUBMITTED. 7/12/01 NATURE'S WAY SAID THEY WILL PROVIDE A COPY OF THE PHASE II WITHIN THE NEXT SEVERAL DAYS. HE SAID THEY PLAN ON REMOVING THE SOIL TO CLEAN. 8/15/01 MET WITH NATURE'S WAY WHO SAID THAT THEY WILL PROVIDE THE PHASE II ASAP. THEY PLAN ON REMOVING THE SOIL IN SEPTEMBER. 8/23/01 RECD NATURE'S WAY SUBSURFACE INVESTIGATION REPORT FOR THE SITE. SOIL SAMPLES COLLECTED EXCEED TAGM VALUES. 10/29/01: MF S/I/TONY, NW, REMOVING LOADING IT OUT FOR DISPOSAL. SOIL IS BEING REMOVED TO THE FOUNDATIONS OF BOTH BUILDINGS. NO GW ENCOUNTERED, SOIL HAS A PETROLEUM ODOR. A 1K GASOLINE ALSO FOUND & REMOVED. THERE ARE DISPENSING LINES GOING TOWARD MAIN ST. TOLD TONY TO REMOVE ALL EQUIPMENT & PIPING ASSOCIATED WITH USTS. EXCAVATION BY ELLICOTT ST BEING BACKFILLED. TONY TOLD ME SAMPLES WERE TAKEN. 10/30/01: MF S/I 7 AM, NO ONE ON SITE. EXCAVATION CONTINUING ALONG PIPING TRENCH. T/C RUSS SAVAGE, TOLD HIM ALL PIPING MUST BE REMOVED & LINE TRENCH SAMPLED. 10/30/01:SAC TELECON MIKE STEFFAN, OWNER OF PROPERTY AND BUSINESS NEXT DOOR TO TANK PULL, MR. STEFFAN HAD CALLED LAST WEEK ALSO TO COMPLAIN ABOUT ODORS AND TO INQUIRE OF DEC'S INVOLVEMENT, SAC TALKED TO HIM THEN AND ANSWERED QUESTIONS HE HAD, MR. STEFFAN CALLED AGAIN TO COMPLAIN ABOUT THE ODORS, HE SAID THEY WERE SO BAD YESTERDAY THAT THEY HAD TO SEND PEOPLE HOME EARLY AT 3 PM, SAC TOLD HIM DEC INSPECTED SITE ON 10/26 & 10/28 AND THAT THIS SITUATION CAN ARISE DURING A TANK REMOVAL/CLEANUP, SAC ALSO TOLD HIM ABOUT THE INSPECTION AND SAMPLING REQUIREMENTS FOR A CLEANUP, MR. STEFFAN SAID HE HAD EXPERIENCE WITH CLEANUPS AND DID UNDERSTAND THIS, HE SAID THAT THE PID METER REGISTERED 1600 ppm FOR AIR WHEN STANDING NEXT TO THE EXCAVATION. 11/01/01: FG CONTACTED NATURE'S WAY. ALL WORK HAS REPORTEDLY BEEN COMPLETED. MF WAS ON-SITE TO OVERSEE REMOVAL OF A UST. THEY WILL SUBMIT DISPOSAL RECEIPTS AND ANALYTICAL RESULTS FOR EXCAVATION. 11/05/01: MF RECEIVED CC OF 11/2/01 LETTER FROM M STEFFAN'S TO CIMINELLI COMPLAINING OF LOST BUSINESS & STRONG ODORS FROM TANK EXCAVATION SOIL REMOVAL. 02/13/02: MF FOR FG, NW SUBMITTED THE CLOSURE REPORT FOR THE EXCAVATION WORK COMPLETED. THE DISPOSAL RECEIPTS WERE INCLUDED. THE EXCAVATION ANALYTICAL RESULTS WERE ALL BELOW TAGM VALUES. FOUR SAMPLING LOCATIONS ARE ABOVE STARS, SAMPLE 25, 26, 34, SAMPLE 33, SAMPLE 24, & SAMPLE 27. ALL OF THESE LOCATIONS ARE UNDER BUILDINGS & INACCESSABLE. THE SITE CAN BE CLOSED WITH NO FURTHER WORK REQUIRED."

"SOIL CONTAMINATION SEVERAL HOLES IN TANK "

**DEC Remark:**

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SAC 11/30/99: SAC TELECON DAVE HUTTON OF TYREE ORGANIZATION, THE WORK ON THAT SITE HAS NOT BEGUN YET. 12/08/99: SAC TELECON DAVE HUTTON, HE SAID HE SUBMITTED SAMPLES TO KANTI TECHNOLOGIES TO ANALYZE FOR CHARACTERIZING THE WASTE FOR DISPOSAL, UNFORTUNATELY KANTI TECHNOLOGIES WENT OUT OF BUSINESS BEFORE MR. HUTTON RECEIVED THE RESULTS SO HE RESAMPLED THE LOCATION AND SUBMITTED THE SAMPLES TO

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	----------------------	-----------	---------------------	-------------------	------	----

WASTESTREAM TECHNOLOGY, HE EXPECTS THE RESULTS BY THE END OF THE WEEK SO WORK CAN BEGIN NEXT WEEK. 12/16/99: SAC TELECON FROM DAVID HUTTON, THEY WILL BE EXCAVATING THE SITE THIS AFTERNOON. 12/16/99: SAC TELECON FROM DAVE HUTTON, THEY WILL BE EXCAVATING SOIL LATER THIS MORNING SINCE THEY ARE RUNNING AHEAD OF SCHEDULE 12/16/99: SAC SITE INSPECTION, MET LEWIS GELINAS OF TYREE CORP, WORK HAS NOT BEGUN YET, MR. GELINAS ANTICIPATES THAT THE EXCAVATION WILL BEGIN THIS AFTERNOON AFTER LUNCH, TANK THAT WAS REMOVED WAS 550 GALLON TANK. 12/16/99: SAC SITE INSPECTION, FOUND UNMANNED BACKHOE, PILE OF STONE, DOES NOT APPEAR THAT ANY WORK HAS BEEN DONE. 12/16/99: SAC TELECON FROM DAVE HUTTON, DUE TO WEATHER CONDITIONS TRUCK FROM CID COULD NOT GET TO THE SITE, WORK WILL BEGIN EARLY TOMORROW. 12/17/99: SAC TELECON FG, SAC REQUESTED INSPECTION, FG WILL HAVE SOMEONE FOLLOW UP. 12/17/99: SAC TELECON FROM DAVE HUTTON, THEY HAVE EXCAVATED NINE FEET INTO SANDY MATERIAL, MR. HUTTON REQUESTED AN INSPECTION SINCE DUE TO PROXIMITY TO THE BUILDING AND THE UTILITY LINES THEY MAY NOT BE ABLE TO EXCAVATE MUCH FURTHER, RECEIVED LATER MESSAGE FROM FG WHO INSPECTED SITE, MATERIAL APPEARS TO BE NATURAL SAND AND CLAY HAS NOT BEEN FOUND OR REACHED, EXCAVATION WAS ABOUT 11.5 FEET, THEY WILL REMOVE AS MUCH MATERIAL THAT IS ABLE TO BE REMOVED AND IS BEING TRANSPORTED TO CID LANDFILL (DIG AND HAUL), BUT FURTHER EXCAVATION WILL BE LIMITED BECAUSE OF BUILDING, UTILITY LINES AND THE DRIVEWAY, CONTAMINATION APPEARS TO BE RUNNING UNDER THE BUILDING AND THE STREET, SAMPLES WILL BE TAKEN ONCE EXCAVATION HAS BEEN COMPLETED, ED PORTER WITH R&D ENGINEERING WAS AT THE SITE. 06/02/00: SAC RECEIVED TANK CLOSURE REPORT INCLUDING DISPOSAL RECEIPTS AND CONFIRMATORY SAMPLE RESULTS, ALL PARAMETERS FOR ALL SAMPLES WERE BELOW STARS GUIDANCE VALUES, HOWEVER DUE TO NUISANCE CHARACTERISTICS OBSERVED DURING THE REMOVAL, WILL GIVE AN INACTIVE STATUS TO THE SITE, DRAFTED INACTIVE LETTER."

**Caller Remark:**

"CALLER DEMOLISHING BUILDING. THERE WAS A 500 GALLON ABOVEGROUND FUEL OIL TANK IN BASEMENT OF BUILDING. DURING DEMOLITION TANK WAS DAMAGED AND OIL SPILLED. TENANTS IN BUILDING NEXT DOOR NOW COMPLAINING OF FUEL OIL ODORS. "

**DEC Remark:**

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SAC 05/12/99: FG SITE INSPECTION. MET JOHN WARGO, CONTRACTOR WHO WAS DEMOLISHING BUILDING. FUEL OIL ODOR PRESENT AT THE EXCAVATION WHERE THE 275 GALLON TANK WAS SITTING IN THE BASEMENT OF THE NOW DEMOLISHED BUILDING. FUEL OIL ODOR IN LOVULLO INSURANCE AGENCY IN BASEMENT AND FILE ROOM AT THE TOP OF THE BASEMENT STAIRS. WARGO WAS TO USE SPRAY TO ELIMINATE ODOR AT INSURANCE OFFICE AND VENT THE ODORS OUT OF THE EXCAVATION. FUEL REMAINED IN THE PARTIALLY CRUSHED TANK AND WARGO SAID THEY WILL REUSE IT IN THEIR BURNER. FG SITE INSPECTION, LATER THAT AFTERNOON, THE ODOR IN THE BUILDING DISSIPATED. WARGO DUG OUT THE CONCRETE FLOOR WHERE THE TANK WAS SITTING WHICH IS ADJACENT TO THE LOVULLO BASEMENT. THIS AREA IS BEING AERATED TO ALLOW ANY ODORS TO DISCHARGE OUT FROM UNDER THE LOVULLO BASEMENT. I TOLD WARGO TO MONITOR & CALL ME IF ODORS ARE PRESENT AT LOVULLO'S TOMORROW. TOLD HIM I WOULD REINSPECT ON 5/14/99. WARGO REMOVED APPROXIMATELY 20 YARDS OF FUEL OIL CONTAMINATED SOIL FROM UNDER THE BASEMENT FLOOR HE REMOVED. THE SOIL IS STAGED ON SITE AND WILL BE DISPOSED AT MODERN LANDFILL. 05/14/99: FG SITE INSPECTION. LOVULLO'S HAD NO FUEL OIL ODORS. SOIL IS STAGED ON SITE. MINOR ODOR PRESENT AT EXCAVATION. EXCAVATION TO BE LEFT OPEN. 05/27/99: FG SITE INSPECTION. SOIL FROM FUEL OIL SPILL IN A ROLLOFF ON SITE. A 6000 GALLON UST WAS DISCOVERED ON SITE. IT HAS PRODUCT IN IT THAT WILL BE PUMPED OUT. THE TANK WILL THEN BE PULLED AND SAMPLES WILL BE COLLECTED FOR 8021 & 8270. REMNANTS OF WHAT LOOKS LIKE A FORMER GAS STATION AT THE CORNER OF WASHINGTON AND TUPPER WERE FOUND. CONTAMINATED SOIL WAS DISCOVERED AS WELL AS A FORMER ISLAND. A 24 FEET BRICK LINED WELL WAS ALSO FOUND. THERE WAS WATER IN IT. KEN KELLER WITH ARRIC AND DARRYL NICTER WERE ON SITE. THEY SAID THEY WANT TO DISPOSE OF THE SOIL AT THE FORMER GAS STATION. THEY NEED TO RECEIVE APPROVAL FROM THE CITY OF BUFFALO TO BEGIN THE WORK. 05/28/99: FG TELECON WITH JOHN WARGO, WARGO ENTERPRISES. HE SAID THAT THE GENERAL CONTRACTOR, NICTER TOLD HIM THERE WAS A FUEL OIL TANK IN THE BUILDING BUT THAT IT WAS EMPTY. MR. WARGO AGREED THAT THE DEMOLITION CAUSED THE FUEL STORAGE TANK TO LEAK. MR. WARGO SAID THAT THE CITY OF BUFFALO OWNS THE PROPERTY. MR. WARGO CLEANED UP THE SPILL. HE WILL BE TAKING EXCAVATION SAMPLES FOR 8021 & 8270 TODAY AND HAVE THEM ANALYZED BY CHOPRA LEE. FG TELECON TO MR. JOHN FLOSS WITH THE FLOSS AGENCY, INC. PO BOX 370, E. AMHERST, NY 14051. FAX 688-2172 HE WANTS A COPY OF THE SPILL REPORT AND WOULD LIKE TO GET A COPY OF ANY LETTERS THAT ARE SENT OUT. 06/09/99: SAC TELECON MUFFETT MAUCHE OF FOIT/ALBERT ASSOCIATES, MS. MAUCHE WAS HIRED BY THE CITY OF BUFFALO AS AN ENVIRONMENTAL CONTRACTOR TO BE SURE EVERYTHING IS DONE AS REQUIRED, SHE CONTACTED RMC BECAUSE THAT WAS THE NAME SHE WAS GIVEN AS TO WAS HANDLING THE SPILL, SAC SPOKE TO JFO WHO SAID FG WAS THE PERSON HANDLING THIS FILE, MS. MAUCHE INDICATED THAT THERE WERE TWO SEPARATE AREAS OF CONCERN ON-SITE, A 6,000 GALLON TANK AND AN AREA AWAY FROM THE TANK WHERE THERE WAS PETROLEUM CONTAMINATION WHICH APPEARED UNRELATED TO THE TANK, SAC CHECKED THE HISTORY NOTES ON THE FILE AND CONFIRMED FG WAS AWARE OF THIS AND THAT SHE REQUIRED REMEDIATION AND SAMPLING OF BOTH AREAS, SAC FAXED A COPY OF THE NOTES TO MS. MAUCHE, SAC ASKED MS. MAUCHE WHEN WORK ON-SITE WOULD BEGIN AND SHE INDICATED NEXT WEEK, SAC REQUESTED NOTIFICATION WHEN WORK WOULD BEGIN & POSSIBLY A WORK SCHEDULE, MS. MAUCHE AGREED TO PROVIDE A WORK SCHEDULE TO DEC, AFTER THE TELECON ENDED, FG'S PHONE RANG AND SAC HEARD MESSAGE LEFT BY KEN KELLER OF ARRIC CONSTRUCTION, MR. KELLER SAID THE TANK WOULD BE PULLED TOMORROW, SAC CALLED MS. MAUCHE BACK REGARDING THIS PHONE MESSAGE, MS. MAUCHE SAID SHE TOLD ARRIC IT WAS OK TO EMPTY THE TANK BUT DID NOT BELIEVE TANK WOULD BE REMOVED TOMORROW, SHE WILL FOLLOW UP WITH MR. KELLER TO DISCUSS THE PROPOSED SCHEDULE AND NOTIFY DEC WHEN THE WORK WILL BEGIN. 06/09/99: SAC MET KEN KELLER, ARRIC & TELECON WITH MUFFETT MAUCHE - FOIT/ALBERT, TANK WILL BE REMOVED TOMORROW, THEY WILL NOTIFY DEC WHEN THEY ARE READY FOR INSPECTION, MR. KELLER COMPLETED TANK CLOSURE REPORT, SAC LEFT COPY IN A.S.'s IN-BASKET. 06/10/99: SAC TELECON FROM KEN KELLER - ARRIC, THAT TANK WAS REMOVED AND IT DID HAVE HOLES AND THEY HIT IN HIS TERMS A GUSHER SAC SITE INSPECTION, MET KEN KELLER, MUFFETT MAUCHE AND CHRISTEN LABRUNA FROM FOIT/ALBERT, KEN POZKALSKI, BUFFALO FIRE DEPT, & 2 REPRESENTATIVES FROM NICTER, ASSUMING MAIN STREET RUNS EAST TO WEST, OBSERVED PRODUCT COLLECTING IN THE SOUTHWEST CORNER OF THE EXCAVATION, ACCORDING TO MS. LABRUNA THIS WAS ON THE OPPOSITE SIDES FROM WHERE THE HOLES WERE IN THE TANK AND THEY ARE NOT CERTAIN WHETHER THE TANK IS THE SOURCE OF THE PRODUCT, TANK WAS STAGED NEXT TO THE HOLE AND THEY ARE IN THE PROCESS OF CUTTING IT OPEN FOR CLEANING, SAC DISCUSSED OPTIONS WITH MS. MAUCHE & KRISTIN, THEY MUST DETERMINE THE EXTENT OF CONTAMINATION AND ADDRESS IT BY EITHER BORING OR THEY COULD ATTEMPT DIG TO CLEAN, SPEAKING WITH DARRYL NICTER OF NICTER CONSTRUCTION - THEY HAVE DRIVEN CAISSONS FOR THE NEW BUILDING ON THE NORTH SIDE OF THE SITE TO 25 FT AND HAVE NOT FOUND ANY PRODUCT. 06/10/99: SAC TELECON MUFFETT MAUCHE, MS. MAUCHE SAID THAT THEY DID A QUICK SANBORN MAP SEARCH AND NO OTHER TANKS WERE INDICATED TO BE AT THE SITE, THEY WILL BEGIN EXCAVATING TOMORROW AND TRY TO DIG TO CLEAN, THEY WILL EITHER START ON THE CORNER AREA AND WORK BACK OR CONTINUE TO EXCAVATE AROUND THE TANK EXCAVATION, SAMPLES WERE TAKEN PREVIOUSLY TO CHARACTERIZE THE CONTAMINATED SOIL SO THEY WILL BE EXCAVATING THE SOIL INTO TRUCKS AND TRANSPORTING IT TO THE LANDFILL. 06/15/99: SAC SITE INSPECTION, MET DARRYL NICTER OF NICTER CONSTRUCTION, NO FURTHER EXCAVATION HAS BEEN COMPLETED AROUND THE TANK, THIN LAYER OF PRODUCT STILL REMAINS IN THE SOUTHWEST CORNER OF EXCAVATION, ROCK WAS THROWN INTO THE EXCAVATION AND PRODUCT LAYER BROKE UP AND WATER LAYER WAS OBSERVED, ODORS WERE APPARENT FROM THE PRODUCT, PRODUCT APPEARS TO BE EITHER A FUEL OIL OR WASTE LUBE OIL, EXCAVATION OF THE EAST TUPPER AND WASHINGTON STS. CORNER WAS COMPLETED, EXCAVATION WAS TO A DEPTH OF ABOUT THREE FEET, THE EXCAVATION WAS FIELD SCREENED & SAMPLES WERE TAKEN, SAC TOOK A COUPLE OF HANDFULS FROM THE BOTTOM AND OBSERVED NO ODORS, AREA AT THE CORNER WAS DARKENED AND APPEARED STAINED BUT AGAIN A FEW HANDFULS OF SOIL WERE TAKEN AND NO ODORS WERE APPARENT.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

06/15/99: SAC TELECON MUFFETT MAUCHE, FOIT-ALBERT, THEY ARE GOING TO BEGIN EXCAVATING AROUND THE TANK REMOVAL EXCAVATION TOMORROW, 6/16/99, AND TRY TO DIG TO REMOVE THE CONTAMINATED MATERIAL, IF THE WORK DOES NOT BEGIN TOMORROW THEN THEY WILL START THURSDAY 6/17/99, CONTAMINATED SOIL REMOVED FROM THE CORNER HAS BEEN TRANSPORTED OFF-SITE TO THE LANDFILL, THEY DID SCREEN THE AREA AND CONFIRMATORY SAMPLES HAVE BEEN TAKEN. 06/16/99: SAC SITE INSPECTION, MET CHRISTEN LABRUNA, FOIT-ALBERT, THEY ARE EXCAVATING AROUND THE FORMER TANK LOCATION, MS. LABRUNA SAID THAT THERE WAS A CONCRETE PAD THAT WAS REMOVED WHERE THE PRODUCT HAD POOLED UNDERNEATH, THEY ARE IN THE PROCESS OF CLEANING THE AREA, NO ADDITIONAL PRODUCT WAS OBSERVED TO BE POOLING IN THE EXCAVATION, SOIL APPEARS TO BE SANDY AND SILTY BUT SAC OBSERVED A CLAY LAYER IN THE EXCAVATION, MS. LABRUNA WILL CONTACT DEC FOR INSPECTION ONCE THEY BELIEVE ALL CONTAMINATION HAS BEEN REMOVED. 06/16/99: SAC TELECON MUFFETT MAUCHE, THEY HAVE EXCAVATED ALL CONTAMINATED MATERIAL AND HAVE SAMPLED THE EXCAVATION, THE EXCAVATION WILL REMAIN OPEN FOR THE NEXT FEW DAYS. 06/17/99: SAC SITE INSPECTION, DARRYL NICTER FROM NICTER CONSTRUCTION AT SITE, EXCAVATION OPEN, BROWN SANDY MATERIAL NOTED ON SIDES AND WHAT APPEARED TO BE CLAY ON BOTTOM IN ONE SECTION, NO ODORS OR STAINING OBSERVED, CONTAMINATED SOIL STAGED ON AND COVERED W/PLASTIC. 06/21/99: FG SITE INSPECTION. SOIL STAGED ON SITE. EXCAVATION IS COMPLETE. 06/22/99: SAC RECEIVED FAXED COPY OF EXCAVATION RESULTS FOR BOTH THE CORNER AREA AND THE TANK AREA FROM CHRISTEN LABRUNA, FOIT-ALBERT, ALL PARAMETERS ARE BELOW STARS GUIDANCE VALUES, SAC NOTIFIED MS. LABRUNA THAT RESULTS ARE BELOW STARS GUIDANCE VALUES AND THAT NO FURTHER EXCAVATION IS REQUIRED IN THESE AREAS. 08/24/99: SAC RECEIVED DISPOSAL RECEIPTS FROM FOIT-ALBERT FOR THE CONTAMINATED SOIL FOUND AT THE CORNER OF EAST TUPPER AVE & WASHINGTON AVE WHERE THE FORMER GASOLINE STATION WAS AND FOR THE TANK THAT WAS REMOVED IN THE MIDDLE OF THE PROPERTY. 02/14/00: SAC SENT LETTER TO THE CITY REQUIRING SAMPLE RESULTS AND DISPOSAL RECEIPTS BY 3/31/00, SENT COPY OF LETTER TO JOHN WARGO. 02/17/00: SAC TELECON JOHN WARGO, MR. WARGO SAID HE SENT THE REQUESTED INFORMATION TWICE TO NICTER CONSTRUCTION AFTER BEING TOLD THE CITY COULD NOT FIND THE FIRST COPY SENT, MR. WARGO SAID TO CALL HIM IF THE INFORMATION DOES NOT GET SENT TO SAC SOON, MR. WARGO'S CELL PHONE NUMBER IS 553-3642, HIS FAX NUMBER IS 759-6415. 03/06/00: SAC RECEIVED FAX FROM JOHN WARGO - WARGO ENTERPRISES WHICH INCLUDED WASTE PROFILING DOCUMENTATION AND DISPOSAL RECEIPTS SAC TELECON JOHN WARGO TO SEE IF HE HAS THE CONFIRMATORY SAMPLE RESULTS, MR. WARGO BELIEVES A SAMPLE WAS TAKEN BY RON FORSTER WITH MODERN DISPOSAL, HE WILL FOLLOW UP W/MR. FORSTER AND GET BACK TO SAC. 01/10/01: SAC REVIEW FILE, SAC SPOKE TO JOHN WARGO MONTHS AGO, MR. WARGO CHECKED HIS RECORDS AND COULD NOT FIND CONFIRMATORY SAMPLE RESULTS FOR THE AREA WHERE THE TANK WAS CRUSHED, THEREFORE HE DOES NOT BELIEVE A CONFIRMATORY SAMPLE WAS TAKEN IN THIS AREA, SAC CHECKED FILE AND SECRETARY YELLOW COPY FILE AND COULD NOT FIND LETTER REQUIRING THE SAMPLING THEREFORE IT APPEARS IT WAS NOT WRITTEN, SAC SPOKE TO FG WHO WAS FOLLOWING UP ON THIS SPILL AT THE TIME, FG INSPECTED AND FOUND THE AREA WAS CLEANED UP, SHE BELIEVED IT WAS A SURFACE SPILL SO DID NOT SEE THE NEED TO REQUIRE CONFIRMATORY SAMPLE IN THIS AREA, THEREFORE NO FURTHER WORK REQUIRED."

**Caller Remark:**

"Soil sample results indicate contaminated soil. Cleanup is pending."

**DEC Remark:**

"9/24/21 FG spoke to Andrew Benkelman. A subsurface investigation has been completed and petroleum contamination was identified. This impacted soil will be excavated on 10/4/21. The SSI will be provided as well as the workplan 9/27/21 From: Benkleman, Andrew Sent: Monday, September 27, 2021 9:09 AM To: Gallego, Francine (DEC) Cc: Zebrowski, Adam ; Rob Banks Subject: 2213120: Petroleum Impacted Soil Removal: 538 Pearl St, Buffalo, NY - Spill #2106053 Francine, I hope you had a nice weekend. As per our conversation on Friday, attached are the figure depicting the soil boring locations at the 538 Pearl Street Site, the summary table for the soil sample analytical results, and the scope of work for the petroleum impacted soil removal oversight. We collected a waste characterization sample and have submitted the analytical results for disposal approval to the Tonawanda Landfill. We are assuming we will have disposal approval this week and will begin the removal activities on Monday October 4, 2021. Let me know if you have any questions. Thanks Andrew Benkleman LaBella Associates - Project Manager 716-768-3184 direct 716-551-6281 office 300 Pearl Street, Suite 130 Buffalo, NY 14202 9/29/21 From: Benkleman, Andrew Sent: Tuesday, September 28, 2021 4:56 PM To: Gallego, Francine (DEC) Subject: RE: [Ext] RE: 2213120: Petroleum Impacted Soil Removal: 538 Pearl St, Buffalo, NY - Spill #2106053 Francine, Attached are the soil boring logs. Additionally, attached is the groundwater analytical summary table. The soil borings proximate the Site Building were advanced to investigation the historically use of the Site Building for automotive repair. The borings within the Site Building were advanced proximate floor drains. Soil borings 26-31 & 35-37 were advanced to investigation a former gasoline filling station. Soil borings 33 & 34 were advanced to investigate a former automotive repair building. Thanks Andrew Benkleman LaBella Associates - Project Manager 716-768-3184 direct 716-551-6281 office 10/4/21 FG site inspection. Labella was on site. Two usts were discovered and removed. Two loads of petroleum contaminated soil was removed and disposed. Excavation samples were collected. A report will be provided. 12/27/21 From: Benkleman, Andrew Sent: Monday, December 27, 2021 3:28 PM To: Gallego, Francine (DEC) Cc: Zebrowski, Adam ; Rob Banks ; Alan Dewart ; Bill Paladino Subject: 2213120: Impacted Soil Removal: 538 Pearl St, Buffalo, NY Spill #2106053 Francine, On behalf of Pearl Franklin Holdings, LLC, please see the attached Underground Storage Tank Closure Report for your review associated with NYSDEC Spill #2106053. As you know, during the excavation of previously identified impacted soil two orphaned underground storage tanks (USTs) were identified at the Site. The USTs and associated impacted soil were removed and disposed of off-Site. Post-excavation confirmatory soil samples from the excavation were all below NYSDEC Commissioner's Policy 51 Soil Cleanup Guidance levels. Based on the remediation completed and the confirmatory sample results, we respectfully request that Spill #2106053 be assigned a closed status. Let me know if you have any questions. Have a great New Year. Andrew Benkleman LaBella Associates - Project Manager 716-768-3184 direct 716-551-6281 office 300 Pearl Street, Suite 130 Buffalo, NY 14202 labellapc.com 12/27/21 Labella provided the closure report for the site. Two 1000 gal usts were removed along with petroleum contamination. The disposal receipts were provided. The excavation analytical results were all below CP51 levels for both 8260 and 8270 STARS list."

#### **Caller Remark:**

"Soil samples for gas station showed petroleum contamination. There are USTs on this property. Cleanup is pending."

#### **DEC Remark:**

"02/06/13 TDJ RECEIVED LCS, INC. GEOPHISICAL AND SUBSURFACE SOIL AND GW REPORT. 02/12/13 TDJ REVIEWED REPORT AND FOUND MAJOR ANOMALIES EXIST IN PARKING AREA WHICH COULD BE UST'S FROM YEARS PAST. RECOMENDATIONS FROM LCS, INC FOR FURTHER INVESTIGATION WAS AGREED UPON AND A LETTER STATING THE SAME WAS SENT TO UNILAND DEVELOPMENT. 04/28/14 TDJ RECEIVED ADDITIONAL REPORT SHOWING TEST PITS AND BORING PERFORMED WHERE ANOMALIES EXISTED. LOW PID AND ANALYTICAL RESULTS WERE FOUND IN THIS AREA. DUE TO THE AREA OF THE ANOMALIES AS A PARKING AREA FOR THE BUSINESS A FUTURE SITE PLAN WAS DEVELOPED FOR ANY WORK THAT MAY BE INITIATED IN THE FUTURE. THE SITE WILL BE CLOSED AS INACTIVE. NO FURTHER ACTION FILE CLOSED AS INACTIVE. "

<b>Site Name:</b>		Former Trico Plant				
<b>Site Name (Web):</b>		Former Trico Plant				
<b>Site name (GIS):</b>		Former Trico Plant				
<b>Site Class Desc (Web):</b>		Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).				
<b>Site Class Desc:</b>						
<b>Assess DOH:</b>		Measures are in place to address contact with residual groundwater and soil contaminants. As the site is currently vacant, no contact with contaminants in the concrete slab of the parking structure are expected. Volatile organic compounds in the contaminated groundwater or contaminated soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. While the building is unoccupied, no contact with site contaminants in indoor air is expected. However, a subslab depressurization systems (systems that ventilate/remove the air beneath the building) will be installed in onsite building prior to occupancy to prevent the indoor air quality from being affected by the contamination in soil vapor beneath the building.				
<b>Description:</b>						
Location: The Former Trico Plant site is an approximately 2.11-acre site located in a densely developed urban area at 791 Washington Street in the City of Buffalo, Erie County. The property is bounded by commercial and residential properties to the north, Ellicott Street and a parking lot to the east, Goodell Street and Eastman Machine Company to the south and Washington Street and commercial and residential properties to the west. Site Features: The site consists of a complex of five industrial buildings, totaling 617,627 square feet, and a small portion of former Burton Street. Current Zoning and Land Use: The site is zoned for commercial use and is currently vacant. Past Use of the Site: The oldest of the five buildings was constructed circa 1890 as a portion of the Christian Weyand Brewery which operated at the site until the enactment of prohibition. The building was purchased in 1920 by Trico Products Corporation for the manufacturing of windshield wipers for the automotive industry. The remaining buildings were constructed from 1920 to 1954. The Trico Products Corporation operated at the site until 1990. Operations included electroplating, smelting, die-casting, rubber extrusion and metal fabrication. Site Geology and Hydrogeology: The site primarily consists of a building. Below the concrete building slab, there is a 2-3 inch layer of fill material consisting of black fine to coarse sand with ash. This is underlain with native soils generally consisting of a varying thickness and alternating layers of reddish-brown sandy lean clays and sandy silts to depths of 40 feet below the building floor. The bedrock consists of Onondaga Formation which has an approximate thickness of 110 to 160 feet. The depth to groundwater below the building basement floor is approximately 1.65 feet. Regional groundwater flow is estimated west toward Lake Erie.						
<b>Assessment:</b>						
Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs), including tetrachloroethene, trichloroethene, dichloroethenes, and vinyl chloride, PCBs, metals, including arsenic, barium, and mercury and polycyclic aromatic hydrocarbons (PAHs) in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil is being managed under a Site Management Plan.

## Assess DOH:

Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

Measures are in place to address contact with residual groundwater and soil contaminants. As the site is currently vacant, no contact with contaminants in the concrete slab of the parking structure are expected. Volatile organic compounds in the contaminated groundwater or contaminated soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. While the building is unoccupied, no contact with site contaminants in indoor air is expected. However, a subslab depressurization systems (systems that ventilate/remove the air beneath the building) will be installed in onsite building prior to occupancy to prevent the indoor air quality from being affected by the contamination in soil vapor beneath the building.

## Description:

**Location:** The Former Trico Plant site is an approximately 2.11-acre site located in a densely developed urban area at 791 Washington Street in the City of Buffalo, Erie County. The property is bounded by commercial and residential properties to the north, Ellicott Street and a parking lot to the east, Goodell Street and Eastman Machine Company to the south and Washington Street and commercial and residential properties to the west. **Site Features:** The site consists of a complex of five industrial buildings, totaling 617,627 square feet, and a small portion of former Burton Street. **Current Zoning and Land Use:** The site is zoned for commercial use and is currently vacant. **Past Use of the Site:** The oldest of the five buildings was constructed circa 1890 as a portion of the Christian Weyand Brewery which operated at the site until the enactment of prohibition. The building was purchased in 1920 by Trico Products Corporation for the manufacturing of windshield wipers for the automotive industry. The remaining buildings were constructed from 1920 to 1954. The Trico Products Corporation operated at the site until 1990. Operations included electroplating, smelting, die-casting, rubber extrusion and metal fabrication. **Site Geology and Hydrogeology:** The site primarily consists of a building. Below the concrete building slab, there is a 2-3 inch layer of fill material consisting of black fine to course sand with ash. This is underlain with native soils generally consisting of a varying thickness and alternating layers of reddish-brown sandy lean clays and sandy silts to depths of 40 feet below the building floor. The bedrock consists of Onondaga Formation which has an approximate thickness of 110 to 160 feet. The depth to groundwater below the building basement floor is

<b>Assess DOH:</b>	Measures are in place to address contact with residual groundwater and soil contaminants. As the site is currently vacant, no contact with contaminants in the concrete slab of the parking structure are expected. Volatile organic compounds in the contaminated groundwater or contaminated soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. While the building is unoccupied, no contact with site contaminants in indoor air is expected. However, a subslab depressurization systems (systems that ventilate/remove the air beneath the building) will be installed in onsite building prior to occupancy to prevent the indoor air quality from being affected by the contamination in soil vapor beneath the building.		
<b>Site Class Desc (Web):</b>	Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).		
<b>Site Class Desc:</b>			
<b>Description:</b>			

Location: The Former Trico Plant site is an approximately 2.11-acre site located in a densely developed urban area at 791 Washington Street in the City of Buffalo, Erie County. The property is bounded by commercial and residential properties to the north, Ellicott Street and a parking lot to the east, Goodell Street and Eastman Machine Company to the south and Washington Street and commercial and residential properties to the west. Site Features: The site consists of a complex of five industrial buildings, totaling 617,627 square feet, and a small portion of former Burton Street. Current Zoning and Land Use: The site is zoned for commercial use and is currently vacant. Past Use of the Site: The oldest of the five buildings was constructed circa 1890 as a portion of the Christian Weyand Brewery which operated at the site until the enactment of prohibition. The building was

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

purchased in 1920 by Trico Products Corporation for the manufacturing of windshield wipers for the automotive industry. The remaining buildings were constructed from 1920 to 1954. The Trico Products Corporation operated at the site until 1990. Operations included electroplating, smelting, die-casting, rubber extrusion and metal fabrication. Site Geology and Hydrogeology: The site primarily consists of a building. Below the concrete building slab, there is a 2-3 inch layer of fill material consisting of black fine to coarse sand with ash. This is underlain with native soils generally consisting of a varying thickness and alternating layers of reddish-brown sandy lean clays and sandy silts to depths of 40 feet below the building floor. The bedrock consists of Onondaga Formation which has an approximate thickness of 110 to 160 feet. The depth to groundwater below the building basement floor is approximately 1.65 feet. Regional groundwater flow is estimated west toward Lake Erie.

#### **Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs), including tetrachloroethene, trichloroethene, dichloroethenes, and vinyl chloride, PCBs, metals, including arsenic, barium, and mercury and polycyclic aromatic hydrocarbons (PAHs) in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil is being managed under a Site Management Plan.

**Caller Remark:**

"Several explosions have caused lead and PCBs to be released to air. The quantity is unknown because it is unsafe to approach."

**DEC Remark:**

"04/12/15 TDJ CONTACTED LISA WHEN SPILL NOTIFICATION WAS REPORTED. THE SITUATION INVOLVED A FIRE IN UNDERGROUND TRANSMISSION LINES. PRESSURE FROM THE FIRE CREATED PRESSURE WHICH BLEW MANHOLE COVERS INTO THE AIR. AT THE TIME OF THE CALL NO PETROLEUM WAS LEAKING NOR DID SHE EXPECT IT TO. THE PRESENCE OF CONTAMINANTS IN THE FIRE SOOT WAS THE MAIN CONCERN ENVIRONMENTALLY. ONCE THE FIRE WAS ELIMINATED BY THE BUFFALO FIRE DEPT. THE MAIN CONCERN WAS FOR STRUCTURAL AND ROADWAY STRESS CRACKS. 04/13/15 TDJ CONTACTED LISA WHO STATED THAT OP-TECH CLEANED THE SOOT FROM MANHOLE AREAS AND CHECKED WITH RESIDENTS IN IMMEDIATE AREA BUT NO SOOT WAS FOUND ON BUILDINGS NOR CARS. TESTING IS BEING PERFORMED ON CABLE FROM TRANSMISSION LINES TO SEE IF THEY CONTAINED PCB PETROLEUM INGREDIENTS. CLEANUP IS COMPLETE FOR THE TIME. 04/20/15 TDJ LISA CONTACTED AND STATED NO PCB CONTAMINATION WAS FOUND. SMALL AMOUNT OF MATERIAL WAS SENT TO NATIONAL GRID OFFICE FOR DISPOSAL. NO FURTHER ACTION FILE CLOSED TO ELECTRONIC ONLY "

<b>Hazardous Waste Code:</b>	F008
<b>Waste Code Description:</b>	PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
<b>Hazardous Waste Code:</b>	P001
<b>Waste Code Description:</b>	2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
<b>Hazardous Waste Code:</b>	P030
<b>Waste Code Description:</b>	CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED
<b>Hazardous Waste Code:</b>	P106
<b>Waste Code Description:</b>	SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)
<b>Hazardous Waste Code:</b>	U044
<b>Waste Code Description:</b>	CHLOROFORM (OR) METHANE, TRICHLORO-
<b>Hazardous Waste Code:</b>	U112
<b>Waste Code Description:</b>	ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)
<b>Hazardous Waste Code:</b>	U144
<b>Waste Code Description:</b>	ACETIC ACID, LEAD(2+) SALT (OR) LEAD ACETATE
<b>Hazardous Waste Code:</b>	U159
<b>Waste Code Description:</b>	2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)
<b>Hazardous Waste Code:</b>	U211
<b>Waste Code Description:</b>	CARBON TETRACHLORIDE (OR) METHANE, TETRACHLORO-
<b>Hazardous Waste Code:</b>	U220
<b>Waste Code Description:</b>	BENZENE, METHYL- (OR) TOLUENE
<b>Hazardous Waste Code:</b>	U228
<b>Waste Code Description:</b>	ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE
<b>Hazardous Waste Code:</b>	B002
<b>Waste Code Description:</b>	Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.
<b>Hazardous Waste Code:</b>	B005
<b>Waste Code Description:</b>	PCB articles, other than transformers, that contain 500 ppm or greater of PCBs, excluding small capacitors.
<b>Hazardous Waste Code:</b>	F009
<b>Waste Code Description:</b>	SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
<b>Hazardous Waste Code:</b>	P029
<b>Waste Code Description:</b>	COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)
<b>Hazardous Waste Code:</b>	P098
<b>Waste Code Description:</b>	POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)
<b>Hazardous Waste Code:</b>	P121
<b>Waste Code Description:</b>	ZINC CYANIDE (OR) ZINC CYANIDE ZN(CN)2

#### Waste Code Details

Hazardous Waste Code: D001  
 Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: F001  
 Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F008  
 Waste Code Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

#### Hazardous Waste Handler Details

Sequence No: 2  
 Receive Date: 20020320  
 Handler Name: CENTURY CENTRE I  
 Federal Waste Generator Code: 1  
 Generator Code Description: Large Quantity Generator  
 Source Type: Notification

#### Waste Code Details

Hazardous Waste Code: F006  
 Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: F009  
 Waste Code Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Hazardous Waste Code: P098  
 Waste Code Description: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

Hazardous Waste Code: U002  
 Waste Code Description: 2-PROPANONE (I) (OR) ACETONE (I)

Hazardous Waste Code: U144  
 Waste Code Description: ACETIC ACID, LEAD(2+) SALT (OR) LEAD ACETATE

Hazardous Waste Code: U220  
 Waste Code Description: BENZENE, METHYL- (OR) TOLUENE

Hazardous Waste Code: U213  
 Waste Code Description: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>

<b>Site Name:</b>	Century Centre I					
<b>Site Name (Web):</b>	Century Centre I					
<b>Site Name (GIS):</b>	Century Centre I					
<b>Site Class Desc:</b>						
<b>Site Class Desc (Web):</b>	No Further Action at this Time: Sites are given a classification of "N" when:					

- a. the investigation and evaluation of a Class P site results in a determination that contamination at the site does not warrant placing the site on the Registry or it is being addressed under a brownfield program;
- b. a site was in a brownfield program (BCP, ERP or VCP) or other non-Registry program, remediation was not completed, and the site did not otherwise qualify for listing on the Registry. As an example, this occurs when a volunteer begins a brownfield project and then for economic or other reasons, determines they cannot complete the work and the brownfield project is terminated. If the contamination at the brownfield site qualifies it for placement on the Registry, the Department acts to do so. If the site re-enters a brownfield program, it can be reclassified to Class A (active) to indicate that work has recommenced;
- c. a site was identified simply as the location(s) where a drum(s) or other discrete waste was at one time present and subsequently removed by DEC or others and, based on the resulting conditions, no need for additional work was apparent; or
- d. an application to the BCP, ERP or VCP was submitted, and was then withdrawn or terminated before any actions were taken to investigate or remediate the site.
- Assess DOH:** As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

#### Description:

Site Location and Features: The Century Centre I site, better known as Trico Products Corporation's Plant No. 1, is located at 817 Washington Street, Buffalo, Erie County, New York. It consists of several interconnected, multistory buildings covering 1-1/2 blocks. Manufacturing operations are carried out in the block bordered by Burton, Ellicott, Goodell, and Washington Streets. Historical Uses: Trico manufactured windshield wiper components and assemblies in three plants in Buffalo; Plant No. 1 primarily manufactured components, including wiper arms, rubber blades and linkage systems. Plant No. 1 also made air pressure systems for heavy vehicles. Operations generating hazardous waste included: (1) plastic molding, (2) die casting (zinc alloy), and (3) metal finishing operations. Wastes included spent trichloroethene, ignitable solvents, Parcure Salt, asbestos (from pipe insulation renovation), spent solvents from degreasing, metal and cyanide-bearing sludges, and discarded PCB containing electrical components. The hazardous waste storage area was established by Trico Products Corporation in 1980 at Plant No. 1 for indoor storage of drummed hazardous waste. It was located on the first floor of a multi-story concrete and brick construction building, and was utilized to store spent solvent wastes and sludge wastes. Operations at the facility ceased in 1998 when the company moved its operations out west. Currently the build is undergoing renovation. The building was listed on the National Register of Historic Places in 2001.

#### Assessment:

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs), including tetrachloroethene, trichloroethene, dichloroethenes, and vinyl chloride, PCBs, metals, including arsenic, barium, and mercury and polycyclic aromatic hydrocarbons (PAHs) in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil is being managed under a Site Management Plan. The certificate of completion for C915281 was issued in December 2019. The following activities took place during remedial action at C915281: 1) Removal and off-site disposal of approximately 171 tons of paint debris generated from hydro-blasting, 6 drums of various oils, and 51 oil-filled electrical equipment units. Additional removal actions included: • Removal and off-site disposal of 140,000 gallons of water and 10,682 tons of sludge from sub-basement and 7 drums of sediment from onsite sumps and sewer. • Removal and off-site disposal of crawl space sediments. • Removal of approximately 90 tons of asbestos. • Removal and off-site disposal of hydraulic lift parts, hydraulic oils and stained concrete. • Removal and off-site disposal of soil and concrete contaminated with polychlorinated bi-phenyls (PCBs). 2)

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Development of a Site Management Plan (SMP) for long-term management of residual contamination as required by the Environmental Easement, including plans for: (1) institutional and engineering controls (IC/ECs); (2) soil/fill management; (3) monitoring; and (4) reporting. 3) Recording of an Environmental Easement as an IC to prevent future exposure to any contamination remaining at the site and to ensure implementation of the SMP.

### Manifest Information

#### Waste Code(s):

F001: (Generic) The following spent halogenated solvents used in degreasing: tetrachloroethylene, trichloroethylene, methylene chloride, 1,1, 1-trichloroethane, carbon tetrachloride, and chlorinated fluorocarbons; all spent solvent mixtures/blends used in degreasing containing, before use, total of 10 percent or more (by volume) of one or more of the above halogenated solvents or those solvents listed in F002, F004 and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (T)

#### Waste Received By Year:

1982: 450 Gallons; 200 Gallons; 770 Gallons  
1983: 100 Gallons; 400 Gallons; 100 Gallons

<b>Site name (GIS):</b>	8 St. Louis Place		
<b>Site Class Desc (Web):</b>	Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State		

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

**Site Class Desc:**

**Assess DOH:**

People will not come into contact with site-related soil contamination because soil removal actions have been completed across the entire site footprint and no contamination remains. People are not drinking contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil), may move into structures and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of structures, is referred to as soil vapor intrusion. Environmental sampling indicates that vapor intrusion is not a concern for on- and off-site structures.

**Assessment:**

The Remedial Investigation (RI) was conducted in 2021 and included sampling of surface soil, subsurface soil/fill, groundwater, and soil vapor. The data collected during the RI identified metals, semi-volatile organic compounds (SVOCs), pesticides and polychlorinated biphenyls (PCBs) above unrestricted soil clean up objectives (USCOs). Surface Soils: Surface soils were sampled from 0-2 inches bgs and analyzed for SVOCs, metals, PCBs, herbicides/pesticides and emergent contaminants. No exceedances of USCOs were identified for herbicides/pesticides or PCBs. SVOCs detected in surface soil samples included benzo(a)anthracene at concentrations up to 36 parts per million (ppm) (USCO 1.0 ppm), benzo(a)pyrene up to 36 ppm (USCO 1.0 ppm) benzo(b)fluoranthene up to 40 ppm (USCO 1.0 ppm), benzo(k)fluoranthene up to 23 ppm (USCO 0.8 ppm), chrysene up to 39 ppm (USCO 1.0 ppm), dibenzo(a,h)anthracene up to 6.6 ppm (USCO 0.33 ppm) and indeno(1,2,3-cd)pyrene up to 21 ppm (USCO 0.5 ppm). Metals detected in surface soil samples included lead at concentrations up to 3,080 ppm (USCO 63 ppm), mercury up to 0.71 ppm (USCO 0.18 ppm) and zinc up to 467 ppm (USCO 109 ppm). The emergent contaminant perfluorooctanesulfonic acid (PFOS) was detected in surface soil samples at concentrations up to 1.6 parts per billion (ppb) (unrestricted use guidance value 0.88 ppb). Subsurface Soils: Subsurface samples were analyzed for VOCs, SVOCs, metals, herbicides/pesticides, PCBs and emergent contaminants. No exceedances of USCOs for VOCs, or emergent contaminants were identified in these samples. SVOCs detected in subsurface soil included benzo(a)anthracene at concentrations up to 3.9 ppm (USCO 1.0 ppm), benzo(a)pyrene up to 3.9 ppm (USCO 1.0 ppm), benzo(b)fluoranthene up to 4.3 ppm (USCO 1.0 ppm), benzo(k)fluoranthene up to 2.5 ppm (USCO 0.8 ppm), chrysene up to 4.0 ppm (USCO 1.0 ppm) dibenzo(a,h)anthracene up to 0.69 ppm (USCO 0.33 ppm) and indeno(1,2,3-cd)pyrene up to 2.3 ppm (USCO 0.5 ppm). Metals detected in subsurface soil included arsenic at concentrations up to 15.7 ppm (USCO 13 ppm), lead up to 1,800 ppm (USCO 63 ppm), mercury up to 1.1 ppm (USCO 0.18 ppm) and zinc up to 529 ppm (USCO 109 ppm). Pesticides/herbicides detected in subsurface soil included 4,4-DDD at concentrations up to 0.18 ppm (USCO 0.0033 ppm), 4,4-DDE up to 0.011 ppm (USCO 0.0033 ppm), 4,4-DDT up to 0.62 ppm (USCO 0.0033 ppm) and dieldrin up to 0.12 ppm (USCO 0.005 ppm). Total PCBs detected in subsurface soil were identified at concentrations up to 2.6 ppm (USCO 2.6 ppm). Groundwater: Groundwater samples were analyzed for VOCs, SVOCs, metals, pesticides/herbicides, PCBs, and emergent contaminants. Samples were evaluated against the NYS Groundwater Quality Standards (GWQS). No exceedances of GWQS for VOCs, SVOCs, herbicides/pesticides or PCBs were identified. Metals detected above GWQS included iron at concentrations up to 2,600 ppm (GWQS 300 ppm), magnesium up to 73,900 ppm (GWQS 35,000 ppm) and sodium up to 288,000 ppm (GWQS 20,000). These metals are naturally occurring minerals and are not considered contaminants of concern for this site. Emergent contaminants were detected in one monitoring well during the initial groundwater monitoring event. Perfluorooctanoic acid (PFOA) was detected up to 14.0 parts per trillion (ppt) (NYSDEC threshold criteria: 10 ppt). Following the PFOA detection, an additional groundwater sample was collected from the well exhibiting the exceedance, which resulted in all PFAS below guidance thresholds. Soil Vapor: Soil vapor studies included the collection and testing of soil vapor samples from several locations within the site boundary. Samples were analyzed for VOCs. Soil vapor sampling results did not indicate a level of concern for potential soil vapor intrusion.

**Description:**

Location: The 8 St. Louis Place site is an approximately 0.20-acre site located in a highly developed residential/commercial area at 8 St. Louis Place in the City of Buffalo, Erie County. Site Features: The site is currently vacant and improved with an asphalt parking lot. Current Zoning and Land Use: The site is zoned for residential use and is currently used as a parking lot. The site is bordered by residential properties to the north, south and west and by commercial property to the east. Past Use of the Site: The site was historically developed with buildings including residences/apartments, private garages and/or out-buildings beginning in at least 1889. The site has been used as a parking lot since approximately 1986. Site Geology and Hydrogeology: The site is located within the Lake Erie-Niagara River major drainage basin, which is typified by little topographic relief that gently slopes westward towards Lake Erie and the Niagara River, except in the immediate vicinity of major drainage ways. According to the United States Department of Agriculture (USDA) Web soil survey, site soils are characterized as Urban Land (Ud). Soils characterized as urban land (Ud) are covered by asphalt, concrete, buildings, or other impervious structures, typical of an urban environment. Previous investigations have identified the site geology as non-native black granular fill with ash and fragments of brick, asphalt, stone and metal from the ground surface or below asphalt to approximately six feet below ground surface (bgs). Fill materials are underlain by native brown, dry, medium to coarse sand up to six feet bgs. Based on the findings of the RI, groundwater was encountered ranging from 21 feet bgs to 23 feet bgs. Regional groundwater is anticipated to flow in a westerly direction towards Lake Erie. However, local groundwater flow may be influenced by subsurface features, such as excavations, utilities, and localized fill-conditions. A site location map is attached as Figure 1.

**Caller Remark:**

"CALLER STATES THAT YESTERDAY A CONSTRUCTION TRUCH BROKE A HYDRAULIC HOSE SPILLING HYDRAULIC OIL IN FRONT OF THEIR BUILDING...NOT YET CLEANED UP."

**DEC Remark:**

"04/12/06 JFO ON SITE MET WITH BILL AND SCOTT BOTH WITH FREY THE WHEELMAN. THEY SAID THE SPILL OCCURRED AT APPROX 1PM YESTERDAY AND NOBODY CAME TO CLEAN IT UP. TODAY BILL CONTACTED THE CITY OF BUFFALO STREETS DEPT AND THEY SHOWED UP AND SPREAD SPEEDY DRY ON THE SPILL AREA. I CALLED AND SPOKE WITH TOM ADAMY WITH BURKE CONSTRUCTION, THE OWNER OF THE EQUIPMENT. 5540 SW BLVD IN HAMBURG, 818-5581. HE SAID A CLEANUP CREW WILL BE ON SITE IN 10 MINUTES. JEFF MONTAGUE THE FORMAN FOR BURKE CONST SHOWED UP WITH A CREW AND BEGAN SPREADING SPEEDY DRY. JEFF SAID THE ORIGINAL SPILL HAPPENED YESTERDAY ON THE EAST SIDE OF THE STREET. THE SPILL ON THE WEST SIDE OF THE STREET OCCURRED THIS MORNING WHEN THE EQUIPMENT WAS PICKED UP BY THE REPAIR COMPANY (SKYWORKS). I WILL VISIT SITE LATER TODAY. JFO ON SITE MET WITH JEFF. HIS CREW IS SWEEPING UP THE SPEEDY DRY AND PLACING IT IN PLASTIC BAGS. THE SPILL AREA LOOKS GOOD. THEY WILL DISPOSE OF THE SPEEDY DRY IN THEIR DUMPSTER. NO FURTHER ACTION REQUIRED BY SPILLS. CLOSED"

#### **Caller Remark:**

"Contamination found while removing 4k gas and 2k diesel USTS"

#### **DEC Remark:**

"05/20/13 FG SITE INSPECTED FOR NATURES WAY TANK REMOVAL. WATER WAS ENCOUNTERED WHICH WAS COLLECTED INTP FRAC TANK. SOIL WAS BEING DIRECT HAULED OFF SITE FOR DISPOSAL. 05/24/13 TDJ WAS CONTACTED TO INSPECT PIT WHICH HAD THREE CLEAN SIDES AND ONE SIDE WITH LIGHT CONTAMINATION LEFT AROUND GAS SUPPLY LINE. WORK WAS FINISHED FOR WEEK AND WOULD CONTINUE ON WEEK OF MAY 27. PEA GRAVEL WAS PLACED AROUND SUPPLY LINE SO IT WOULD NOT BREAK OVER WEEKEND. 05/29/13 TDJ WAS CONTACTED BY NATURES WAY TO INSPECT FINAL PIT WORK. NO VISUAL NOR ODORS OF PETROLEUM WERE PRESENT. ALL SAMPLES WERE COLLECTED FOR CONFIRM RESULTS. FILL WAS TO BE PLACED AS SOON AS POSSIBLE DUE TO CAVING IN OF SIDE WALLS. 7/16/13 FG LEFT A MESSAGE FOR NATURES WAY TO PROVIDE THE CLOSURE REPORT FOR THE SITE. 8/16/13 C&S ENGINEERS PROVIDED THE CLOSURE REPORT FOR THE SITE. ON 5/20/11, THE 4000 GALLON DIESEL AND 2500 GALLON GASOLINE USTS WERE REMOVED AND CLEANED BY NATURE'S WAY. 531.49 TONS OF SOIL ALONG WITH 15678.1 GALLONS OF PETROLEUM IMPACTED

**Caller Remark:**

"possible contamination found while during a standpipe for foundation with stage expansion project "

**DEC Remark:**

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SAC 02/20/98: SAC SITE INSPECTION, MET JOE MANNARINO (CIMMINELLI-COWPER), MARK LIPUMA & DOUG REED (NIAGARA FRONTIER CONSULTING SERVICES NFCS), FOUND CONTAMINATION WHILE DRIVING A STANDPIPE FOR A FOUNDATION FOR THE SHEA'S STAGE EXPANSION PROJECT, APPEARS TO BE OLD #6 FUEL OIL, NFCS DID PHASE I ON PROPERTY WHICH WAS OLD GREYHOUND BUS TERMINAL, NO TANKS WERE REPORTED, NO TANK FOUND DURING THIS WORK BUT GLOBS OF OLD PRODUCT FOUND ON GW, NFCS WILL PERFORM GEOPROBE STUDY TO INCLUDE 10 BORINGS DOWN TO DEPTH OF 30 FT, SPLIT SPOON SAMPLING WILL TAKE PLACE EVERY 4 FT WITH ANALYTICAL TO BE DONE EVERY 8 FT., ALTHOUGH IT IS #6 FUEL OIL PID METER WILL BE USED. GW SAMPLE WAS TAKEN AND RESULTS DID NOT INDICATE A PROBLEM PER NFCS, SAC DID NOT SEE RESULTS, AN ADDITIONAL GW SAMPLE WILL BE TAKEN, WORK SHOULD BEGIN TOMORROW, SATURDAY 2/21/98. REPORT SHOULD BE SUBMITTED AT EARLIEST ON THURSDAY 2/26/98. 02/27/98: SAC AND PJB MEETING JOE MANNARINO (CIMINELLI-COWPER), MARK LIPUMA & DOUG REED, NFCS, THEY HAVE NOT RECEIVED ALL ANALYTICAL DATA AND NO QA/QC DATA HAS BEEN MADE AVAILABLE YET, THEY ARE MEETING WITH LAB TO RESOLVE ISSUES, ALSO TOOK SAMPLES TO ANOTHER LABORATORY, RESULTS THAT WERE VIEWED HAD A EXCEEDED GUIDANCE VALUES FOR BENZENE ON A LOW-LEVEL, AGREED THAT SHEET PILINGS CAN BE DRIVEN INTO THE GROUND IN THE MEANTIME WHILE WAITING FOR THE RESULTS AND THE REPORT, RESULTS FROM THE SECOND LABORATORY SHOULD BE IN BY THURSDAY AND REPORT SHOULD BE AVAILABLE BY THEN. 03/09/98: SAC RECEIVED SITE INVESTIGATION REPORT, DISCUSSED WITH RNL, GW STANDARDS EXCEEDED ON A LOW-LEVEL FOR NAPHTHALENE ONLY, I STATUS CAN BE GRANTED PER RNL, SOIL EXCAVATION RECOMMENDATIONS NEED TO BE CHANGED SINCE IF STARS VALUES ARE EXCEEDED THAN SOIL IS CONSIDERED SOLID WASTE, WILL MEET TOMORROW WITH NFCS AND CIMINELLI. 03/10/98: SAC AND PJB MET MARK LIPUMA, DOUG REED, AND JOE MANNARINO, REQUESTED IF BIO-TREATMENT COULD BE DONE AT LTV SITE ON SOUTHPARK NEAR HYDROPONIC TOMATO GREENHOUSE, SINCE THIS PROPERTY IS NOT OWNED BY THE CITY THEN THIS WOULD NOT BE ALLOWED PER PJB, EITHER SOIL WOULD HAVE TO BE DISPOSED AT A PERMITTED LANDFILL OR BIOTREATED AT AN ALTERNATIVE SITE, HOWEVER A WORK PLAN WOULD NEED TO BE PROVIDED FOR DEC APPROVAL PREVIOUS TO ANY DIGGING OF SOIL ON-SITE AND REMOVAL OFF-SITE NFCS AND CIMINELLI WOULD SPEAK TO THE CITY TO GET AN ALTERNATIVE SITE AND WORKPLAN IN PLACE IN CASE THEY WISH TO BIO-TREAT, NFCS WILL CHANGE THEIR RECOMMENDATIONS FOR SOIL EXCAVATION BASED ON STARS RESULTS, THEY WILL SUBMIT AMENDED RECOMMENDATIONS TO DEC FOR APPROVAL. IT WAS RE-ITERATED THAT ANY SOIL WITH ODORS WOULD EITHER HAVE TO BE DISPOSED AT A LANDFILL OR BIOTREATED. 03/12/98: CIMINELLI AND NFCS PROPOSED HEWITT ROBBINS SITE FOR BIOTREAT, SAC DISCUSS WITH PJB AND CAMERON O'CONNOR (NYSDOH), DUE TO RESIDENCE AND HOSPITAL NEARBY THERE IS POTENTIAL DOWNFALL WITH SITE, HANNA FURNACE SITE WAS RECOMMENDED BY BOTH PJB AND MR. O'CONNOR, SAC RELAYED MESSAGE TO MARK LIPUMA & JOE MANNARINO, AGREED THAT HANNA FURNACE WOULD BE THE SITE OF BIOCELL. 03/13/98: SAC MET MARK LIPUMA, DOUG REED, AND JOE MANNARINO, SUBMITTED WORKPLAN FOR BIO-REMEDIATION, SAC TOLD THEM WE WOULD REVIEW AND GET BACK TO THEM WITH COMMENTS, HANNA FURNACE SITE IS OKAY TO CLEAR FOR BIO-CELL. RECEIVED REVISED RECOMMENDATIONS BASED ON STARS. 03/16/98: SAC REVIEWED BIOTREATMENT PLAN WITH RNL, PASSIVE AERATION THROUGH WIND DRIVEN FANS AND PERFORATED PIPING WOULD REQUIRE SAMPLING AT DISCHARGES DUE TO POINT SOURCES AND USUALLY AN ELECTRIC BLOWER TO SUPPLY OXYGEN IS REQUIRED, TILLING AROUND PIPING WOULD BE LABOR INTENSIVE AND COVERING PILE COULD SLOW BIOTREATMENT PROCESS, ALSO COVER WOULD BE DIFFICULT TO REMOVE FOR TILLING. 03/17/98: SAC AND RNL MET MARK LIPUMA, DOUG REED, AND JOE MANNARINO, NFCS PROPOSED DIGGING SITE UP, STAGING MATERIAL ON HANNA FURNACE SITE, SOIL WOULD BE SEPARATED INTO TWO PILES, SOIL THAT WAS OBVIOUSLY CONTAMINATED AND SOIL THAT IS SUSPECTED TO BE CONTAMINATED, SUSPECT PILE WILL BE SAMPLED AT A LATER DATE FOR CONFIRMATION SAMPLING TO BE PROPOSED LATER, THIS WILL VOID REVISED RECOMMENDATION PROPOSAL SUBMITTED 3/13/98 BY NFCS, BIOCELL WILL THEN BE BUILT TO TREAT SOILS ALSO DISCUSSED WAS AMENDMENTS TO TREATMENT CELL WITH THE ELIMINATION OF THE FANS AND PERFORATED PIPING, A PLAN WILL BE SUBMITTED IN 60 DAYS AS AGREED, AFTER REVIEWING PLAN WITH RNL, PLAN IS OK PER RNL, LETTER WILL BE SENT TO CONFIRM MEETING. 03/19/98: SAC TELECON DOUG REED, APPROXIMATELY 350 CUBIC YARDS OF SOIL THAT IS BELIEVED TO BE NON-CONTAMINATED HAS BEEN TAKEN TO HANNA FURNACE THAT WILL BE RESAMPLED, THE NUMBER OF SAMPLES TAKEN ARE WHAT IS CALLED FOR IN STARS. 03/20/98: SAC SENT LETTER OUTLINING AGREEMENT OF 3/17/98 MEETING 03/20/98: SAC TELECON MARK LIPUMA, THEY FINISHED EXCAVATION IN AREA A & B AND REQUESTED INSPECTION, SAC INSPECTED, EXCAVATION WAS SAND AND CLAY, CLAY WAS RED AND SAND WAS LT. BROWN WITH NO DISCOLORATION, SLIGHT ODORS WERE APPARENT IN SOME AREAS, EXCAVATION WAS DOWN APPROXIMATELY 15 FEET, PID METER READINGS AT THE BOTTOM WERE 6-9 ppm, NO FURTHER EXCAVATION WILL BE REQUIRED IN THIS AREA. 03/25/98: SAC TELECON JOE MANNARINO, EXCAVATION IN AREA A WAS EXTENDED DOWN TO 18 FEET WHICH WAS REMOVED TO HANNA FURNACE SITE. 04/08/98: SAC MEETING WITH MARK LIPUMA AND DOUG REID, SAMPLING SOIL PILE RESULTS AND WASTE PROFILE REPORTS & CHARACTERIZATION RESULTS WERE RECEIVED, A CHANGE MAY HAPPEN, ALL EXCAVATED SOIL WILL BE DISPOSED AT CID LANDFILL, POTENTIALLY ALL SOIL COULD BE EXCAVATED AND DISPOSED WITHIN A MONTH. 05/20/98: RNL SITE INSPECTION OF HANNA FURNACE SITE, ALL SOIL HAS BEEN REMOVED. 05/20/98: SAC TELECON JOE MANNARINO, HE INDICATED SOIL HAS BEEN TAKEN TO CID LANDFILL, HE STILL NEEDS TO REMOVE ADDITIONAL SOIL FROM THE SITE, HE WILL SUBMIT DISPOSAL RECEIPTS ONCE ALL SOIL HAS BEEN

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

DISPOSED. 05/21/98: SAC SITE INSPECTION, MET JOE MANNARINO, 3/4 OF SITE EXCAVATION HAS BEEN COMPLETED, FOUNDATIONS HAVE BEEN POURED FOR BUILDING. 05/21/99: SAC DISCUSSED SITE WITH RNL, JOE MANNARINO CALLED TO NOTIFY RNL THAT TANK WAS FOUND & DUE TO ITS LOCATION NEXT TO A FOUNDATION REQUESTED THAT THE TANK BE CLOSED IN PLACE, RNL SAID THAT WAS OKAY BUT SAMPLE SHOULD BE TAKEN, MR. MANNARINO WILL NOTIFY RNL WHEN WORK WILL BEGIN. 05/11/99: RNL TELECON MARK LIPUMA, THEY HAVE BEGUN WORK ON CLOSING TANK, RNL SENT JFO TO INSPECT. 05/11/99: JFO INSPECT SITE, MET MARK LIPUMA OF LCS AND JOE SALM OF ELMWOOD TANK, DISCOVERED 5000 GALLON FUEL OIL TANK, ELMWOOD TANK CLEANED INSIDE & COLLECTED SAMPLES FROM BELOW TANK BOTTOM, THEY WANT TO CLOSE IN PLACE TOMORROW, SAMPLE RESULTS WON'T BE BACK FOR 2 DAYS, SAMPLES LOOKED TO BE CLEAN SAND, JFO TOLD MR. LIPUMA SAC WILL GET IN TOUCH WITH HIM IN THE MORNING ABOUT FILLING TANK. 05/12/99: SAC TELECON MARK LIPUMA, SAMPLE WAS TAKEN FROM BOTTOM AFTER HOLE WAS CUT IN BOTTOM OF THE TANK AND NO CONTAMINATION OBSERVED, ELMWOOD CLEANED THE TANK AND TANK WAS IN GOOD CONDITION WITH 200 GALLONS OF PRODUCT BEING REMOVED, MR. LIPUMA BELIEVED TANK CONTAINED #6 FUEL OIL AT ONE TIME AND A LIGHTER OIL PROBABLY #2 FUEL OIL AFTER, MR. LIPUMA ALSO SAID BASED ON HIS OBSERVATIONS THAT SINCE TANK WAS IN GOOD CONDITION AND STILL HOLDING PRODUCT AND THAT SAMPLE THAT WAS RETRIEVED FROM BELOW TANK BOTTOM WAS NOT OBSERVED TO BE CONTAMINATED THAT CONTAMINATION THAT WAS FOUND PROBABLY DID NOT COME FROM THIS TANK AND MORE LIKELY CAME FROM ANOTHER TANK THAT WAS AT ONE TIME ON SITE BUT HAS SINCE BEEN REMOVED PRIOR TO THIS PROJECT, TANK SCHEDULED TO BE CLOSED NEXT TUESDAY - 5/18/99 SAC REQUESTED SITE DRAWING WITH INDICATION OF LOCATION OF THE TANK, MR. LIPUMA SAID HE WOULD PROVIDE THIS ALONG WITH ANALYTICAL DATA AS PART OF TANK CLOSURE REPORT. 05/18/99: SAC RECEIVED FAXED COPY FROM MARK LIPUMA OF ANALYTICAL RESULTS FROM SAMPLE TAKEN BELOW THE TANK THAT WAS FOUND, ALL PARAMETERS ARE BELOW STARS GUIDANCE VALUES AND ONLY PARAMETER DETECTED IS NAPHTHALENE AT A LEVEL OF 8.7 ug/kg, SAC TELECON MARK LIPUMA, THEY WILL BE FILLING TANK IN PLACE USING FLOWABLE FILL TOMORROW. 06/09/99: SAC RECEIVED TANK CLOSURE REPORT 08/23/99: SAC TELECON ALLISON MACKENZIE, CIMINELLI-COWPER, JOE MANNARINO IS ON VACATION, MS. MACKENZIE WILL SEND INVOICES WITH TRUCKING LOGS TO SAC. 08/25/99: SAC RECEIVED TRUCKING LOGS/INVOICES FOR DISPOSAL OF CONTAMINATED SOIL AT CID, DRAFTED I LETTER."

MONITORING REPORTS 10/11/90 FOR 04/90 TO 07/90, OIL STILL FOUND IN MW'S, DISCHARGE WATER TO BSA SAMPLED AND OK, TEXACO TO CONTINUE OPERATION. 01/24/91: RNL LETTER 01/24/91, REQUESTED ON SITE MEETING; RNL TELECON FROM CONTRACTOR, WILL CALL ME NEXT TIME ON SITE FOR WELL MONITORING. 06/02/91: RNL REC. APRIL MONITORING REPORT 06/02/91, PRODUCT FOUND IN G1 AND G2, A1, B1 AND B3 ALSO AFFECTED, AIR OK, DISCHARGE OK (BUT STILL NO MEETING ON SITE). 07/25/91: RNL AND TED SITE INSP. 07/25/91, MET DAN KEENE OF GT, GASOLINE STILL BEING FOUND IN MW'S, NO FUMES IN BASEMENT, WILL NEED ENHANCED REMEDIATION FOR GROUNDWATER, NRL TO CONTACT RP. 09/28/93: RNL - SVES TO BE OPERATIONAL BY 10/93. WALLS TO BE SAMPLED, CATALYTIC CONVERTER TO BE INSTALLED. 03/31/94: SVE OPERATIONAL SINCE 11/9/94. 12/31/94: SVES OPERATIONAL; RW OPERATIONAL. PRODUCT REMAINS ON GW. 07/18/95: Groundwater Technology Inc. (GTI) completed 20 soil borings to determine extent of residual contamination. 08/14/95: RECIEVED JUNE, 1995, REPORT FROM GROUNDWATER TECHNOLOGY, SVES AND P&T OPERATIONAL, PRODUCT

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
					ONLY IN G-01, HIGH BTEX IN A-01, B-01, B-03, AND G-02. 08/30/95: RECIEVED JULY, 1995, REPORT FROM GROUNDWATER TECHNOLOGY, SVES AND P&T OPERATIONAL, NO PRODUCT IN ANY WELLS, HIGH BTEX IN A-01, B-01, B-03, G-01, AND G-02. 08/31/95: Recieved Environmental Assessment Report from GTI., based on 07/18/95 soil borings GTI estimated remedial excavation wou1d require removal of 344 cubic yards of soil. 09/25/95: RECEIVED WORK PROPOSAL DATED 09/19/95 FROM TEXACO, SOIL PROBE DONE 07/18/95, PLAN TO REMOVE CONTAMINATED SOIL. 10/20/95: RECEIVED AUGUST, 1995, REPORT FROM GROUNDWATER TECHNOLOGY, JULY SAMPLE RESULTS INDICATED HIGH BTEX IN A-01, B-01, B-03 AND VERY HIGH IN G-01, TWO GALLONS RECOVERED 11/27/95: RECEIVED SEPTEMBER, 1995, REPORT FROM GROUNDWATER TECHNOLOGY, SAMPLED RW1 EFFLUENT - 9.3 PPB BTEX, RECOVERED 1.5 GALLONS 01/05/96: RECEIVED OCTOBER-NOVEMBER, 1995, REPORT FROM GROUNDWATER TECHNOLOGY, SAMPLED SVES EFFLUENT 30 PPMV (C1 TO C10) AND 37 PPMV (C9 TO C10), REMOVED 2,066.91 TONS OF PETROLEUM CONTAMINATED SOIL DURING 10-11/95, DURING 11/95 STARTED SVES 02/15/96: RECEIVED REPORT ON EXCAVATION/VES WELL PROJECT FROM GROUNDWATER TECHNOLOGY, WORK DONE FROM 10/30/95 TO 11/03/95, REMOVED 2066.91 TONS OF SOIL and approximately 3,0000 gal. of water. ANGLED SVE WELL (VEP-11)INSTALLED near northwest corner of BUILDING (northeast corner of excavation). HIGH post excavation soil sample results. Total STARS volatile analytes via EPA Method 8021; Northwest Corner 463 ppm, South wall 11.6 ppm, west wall 618.5 ppm and Southwest wall 161.6 ppm. 02/26/96: RECEIVED FINAL REPORT ON SOIL EXCAVATION AND VES WELL INSTALLATION, duplicate of report received 2/15/96. 05/08/96: Received 5/3/96 SVES air effluent sample results. samples analyzed via EPA Method TO3, BTEX and Misc. Aliphatics and Aromatics were BQL. 05/30/96: TED gave temporary approval to GTI TO shut down SVES IN RESPONSE TO 5/29/96 noise complaint from neighboring resident. 06/04/96: WELLS MW6 AND MW7 INSTALLED 06/20/96: DEC letter to Texaco requesting SVES be turned on long enough to obtain air effluent sample for analysis via EPA Method TO3. Requested clarification on MW-6 & MW-7 construction details. 07/01/96: RECEIVED LETTER FROM WRIGHT ENVIRONMENTAL, with enclosed revised logs for MW6 AND MW7. MW6 AND MW7 to be sampled during next quarterly sample round. 07/31/96: RECEIVED 2nd QUARTER 1996 SMR. WELLS MW-6 & VEP-1 6/19/96 SAMPLE RESULTS 4660 & 24,700 ppb TOTAL BTEX RESPECTIVELY. WELLS B-02, B-05 & G-03 BQL. WELL MW-7 27.2 ppb TOTAL BTEX. SHORT TERM VES TEST CONDUCTED. AIR EFF. sampled 6/26/96, BQL FOR TOTAL BTEX. 08/15/96: DEC SENT LETTER APPROVING SHUT DOWN OF SVES, based on 5/3/96 & 6/26/96 SVES air effluent sample results. REQUESTED REMEDIATION AT WELLS MW-6 & VEP-1. 09/12/96: RECEIVED REMEDIAL WORKPLAN. ORC SOCK TO BE INSTALLED IN MW-6 & NUTRIENT & HYDROGEN PEROXIDE INJECTION IN VEP-1. TO MONITOR D.O. SAMPLE & RE-EVALUATE AT END OF SIX MONTHS TREATMENT. 09/18/96: DEC SENT LETTER APPROVING CAP. REQUESTED CURRENT STATUS OF NEGOTIATIONS FOR SITE ACCESS WITH OWNER. 10/21/96: R. E. WRIGHT ENVIRON., LETTER FROM TEXACO TO OWNER WITH ACCESS REQUEST & SETTLEMENT OFFER SENT IN LAST 2 WEEKS. NO REPLY RECEIVED TO DATE. 10/29/96: TELECON W/ ED GILBERT. FAXED COPY OF SPILL REPORT FORM. HE IS STILL NEGOTIATING W/ TEXACO. PLANS ON TALKING W/ THEM NEXT WEEK. 01/06/97: TELECON W/ ED GILBERT. SENDING REPLY TO TEXACO SHORTLY, WILL CALL DEC AFTER REPLY GOES OUT. 04/02/98: Received letter from SAIC, site access granted Texaco in late 1997. Attached quarterly gw monitoring report prepared by GTI dated 3/18/98. 8/20/98: Letter from SAIC, attached 2nd quarter 1998 gw monitoring report prepared by GTI. Letter requested site reclassified inactive, no further action required. 9/18/98: DEC letter to Jennifer Bothwell (Equiva Services, LLC), noted site could not be reclassified inactive based on contaminant levels in VEP-1, requested remedial activities be initiated in area of VEP-1. Approved decommissioning of wells G-03 & B-02 and vapor extraction points VEP-6, VEP-9 and VEP-10. Requested dates on which GTI performed bioremedial activities. 11/25/98: Received workplan dated 11/23/98, hydrogen peroxide treatment VEP-1 and plan to decommission wells G-03 & B-02 and vapor extraction points VEP-6, VEP-9 and VEP-10 as approved by DEC on 9/18/98. 1/6/99: DEC sent letter approving workplan dated 11/23/98. 02/19/99: 125 gallons of 7% hydrogen peroxide treatment performed on VEP-1. Wells G-03 & B-02 and vapor extraction points VEP-6, VEP-9 and VEP-10 closed. 03/19/99: 125 gallons of 7% hydrogen peroxide treatment performed on VEP-1. 8/11/99: Received letters dated 5/14/99 & 7/8/99 with updated status report, wells G-03 & B-02 and vapor extraction points VEP-6, VEP-9 and VEP-10 closed on 2/12/98. Two 7% hydrogen peroxide treatments, 125 gallons each,(2/19/99 & 3/19/99) performed on VEP-1. VEP-1 sampled immediately prior to 3/19/99 hydrogen peroxide treatment, Total BTEX 32,570 ppb. Received 5/12/99 sample results for VEP-1, total BTEX 29,298 ppb. 8/11/99: DEC sent letter to Jennifer Bothwell (Equiva Services, LLC) requesting alternative treatment plan. 10/26/99: DEC sent letter to Jennifer Bothwell noting no response to DEC 8/11/99 letter, requested written response by 11/12/99. 11/5/99: DEC received work plan to install additional borings to delineate contamination in vicinity of VEP-1 and perform six 4-hour dual phase vapor extraction (DPVE) treatments on VEP-1. 11/15/99: DEC sent letter approving plan, noted petroleum contaminated soil which could not be removed had been observed along northeast edge of parking lot during the Fall 1995 excavation work. 08/15/00: DEC received report for subsurface investigation around VEP-1. On 12/6/99 seven geoprobe borings were advanced around VEP-1. Total STARS volatile analytes from 8-9 foot soil interval ranged from 1,721 ppm at SB-5 (north of VEP-1) to 11 ppm at SB-7 (southeast of VEP-1). Total STARS volatile concentrations in groundwater ranged from 11,733 ppb at SB-5 (north of VEP-1) to 8,221 ppb at SB-7. Five 4-hour Dual Phase Vacuum Extraction (DPVE) events and one 5-hour DPVE event utilizing well VEP-1, each two weeks apart (beginning 12/7/99 and ending 2/21/00), were completed using a vacuum truck. An estimated 12 pounds of vapor phase hydrocarbons were recovered and 2,372 gal. water extracted during the six DPVE events. 01/02/01: DEC sent letter noting that based on investigations performed to date contaminant source appeared to be located north of VEP-1. Requested additional site investigation and remediation. 01/04/01: DEC informed property sold to Plaza One Group, 2558 Delaware Ave., Buffalo, NY. 02/07/01: Site transferred from SAIC to Groundwater and Environmental Services (GES). 02/22/01: DEC received work plan from GES to add surfactant to VEP-1, install 2 addition MWs and sample wells. 03/02/01: DEC telecon with GES, requested revisions to work plan. 06/12/01: DEC received revised work plan from GES. 07/19-20/2001: Two monitoring wells (MW-8 and MW-9) were installed. In addition, VEP-1 was developed with a surge block prior to sampling. The surfactant BioSolve® was added to enhance the cleaning and redevelopment of VEP-1. Soil samples from MW-8 and MW-9 ranged from 274,690 to 2,231 ug/kg total STARS VOC analytes, respectively. Groundwater results ranged from 5,833 to 15,526 ug/L total STARS VOC analytes in wells MW-8 and MW-9, respectively. Total STARS VOCs in VEP-1 was 17,185 ug/L. 03/27/02: DEC telephone message to Chevron Products Company (CPC) requesting site status. 05/10/02: DEC notified by Blasland, Bouck & Lee (BBL) that environmental site management transferred from Texaco to Chevron Products Company (CPC) as result of merger of the two companies. BBL now assisting CPC with site environmental activities. 05/31/02: DEC letter to W. D. Howard (CPC) requesting site status and submittal of remedial proposal and site monitoring. 06/18/02: DEC received site investigation work plan from BBL. 08/08/02: DEC meeting with BBL. Reviewed files and inspected site. Met with property owner and discussed site investigation drilling work. 09-10/02: BBL conducted additional site assessment activities which included installing seven soil borings and six temporary well points for the collection of soil and groundwater samples. Four of the seven soil borings were installed inside the existing building (two under the northern addition and two under the southern addition). The remaining three soil borings were installed around the building perimeter west, east, and north of the existing building. Three temporary wells points were installed inside the building and three were installed outside the building. 04/11/03: BBL submitted report titled, Additional Site Assessment Report dated March 2003 that presented results of Sept.-Oct. 2002 investigation. Based on a review of analytical results, the total NYSDEC STARS list for VOCs soil concentration analytical results ranged from 141.5 micrograms per kilogram ug/kg at WP-5 to 300,670 ug/kg at WP-IB. Groundwater samples were collected on October 9, 2002 from existing monitoring wells MW-6, MW-7, MW-8, MW-9, and the newly installed well points WP-IB, WP-2, WP-3, WP-4, WP-5, and WP-6 approximately one week after well point installation and development. Total NYSDEC STARS list for VOCs ranged from 1.6 ug/l at WP-6 to 15,526 ug/l at MW-9. Based on the additional assessment, the remaining petroleum impacts are mostly in saturated soil 6 to 12 feet below grade beneath the on-site building. The remaining petroleum hydrocarbon in the saturated soils is from at least two separate sources. One source contains elevated benzene and is found in monitoring wells outside the building	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

along the southwest corner of the building including VEP-1, MW-8 and MW-9. The other source(es) are located beneath the building in the northwestern and south western portions of the building (WP-4 and WP-1) at the two former UST locations. The two areas could be contiguous or from a single source beneath the building because, both areas beneath the building exhibit low benzene concentrations. Based on the results of this site assessment and the remedial alternatives assessment, BBL proposed that a bench scale study be implemented to further evaluate soil treatment via an oxidant with either sodium or potassium permanganate. BBL proposed to properly abandoned well points WP-1B, WP-4, and WP-6 inside the building to mitigate these wells acting as a potential petroleum vapor migration pathway. 05/09/03: DEC letter to W. D.Howard (Chevron) approving decommissioning well points WP-1B, WP-4, and WP-6 inside the building however requested groundwater samples for analysis of NYSDEC STARS List for VOCs be collected from all site wells (MW-6 through MW-9, VEP-1, WP-2, WP-3, WP-5, B2, B4, and B5) prior to decommissioning WP-1B, WP-4, and WP-6. Requested submittal of a work plan for implementation of a bench scale and/or pilot study to further asses and design an effective remedial system. 05/03: SAIC began conducting quarterly groundwater sampling events at the site. During the May quarterly sampling event, SAIC abandoned temporary monitoring well points WP-1B, WP-4, and WP-6, which were located inside the existing site office building. 03/04/04: DEC letter to W. D.Howard (Chevron) requesting remediation be re-initiated at the site. Noted prior January 2, 2001, May 31, 2002 and May 9, 2003 DEC letters requesting remediation be re-initiated at the site. 05/04: SAIC installed a new monitoring well point (WP-7) and initiated an in-situ bioremediation pilot test at the site. A bioamendment solution consisting of urea and magnesium peroxide was injected into monitoring well MW-9, and monitoring wells WP-7 and MW-8 were monitored to evaluate the performance of the pilot test through the third quarterly sampling event of 2005. Results of the pilot test suggest that the introduction of bioamendments into the subsurface at MW-9 was effective in reducing the concentration of BTEX constituents in groundwater during the pilot test period; however, microbial counts were variable and ranged from 0 to 210,000 colony forming units per milliliter (cfu/mL). A reduction in concentrations of BTEX constituents of approximately 99% was observed in injection well MW-9. However, a 60% concentration increase of BTEX constituents was observed in downgradient well MW-8. 08/02/06: SAIC, performed 1st round sub-slab vapor sampling in on-site building. Two sub slab vapor probes were installed inside the building, one each in the offices of Avon and Nurse Finders, VMP-3 and VMP-4, respectively. 04/17/07: SAIC, performed 2nd round sub-slab vapor sampling in on-site building. 06/19-20/07: SAIC performed the second quarter 2007 groundwater sampling event. 08/23/07: SAIC submitted Second Quarter 2007 Buffalo SMR which included the results of the 1st and 2nd rounds of sub-slab vapor sampling. Samples were analyzed by EPA method TO-15. Benzene concentrations in the 8/2/06 sub-slab vapor samples ranged from non detect to 0.37 parts per billion (ppb). Benzene concentrations in the 4/17/07 samples ranged from 0.068 to 0.095 ppb (estimated). 09/09/09: Nonaqueous phase liquid was detected in monitoring well B-4. Upon further investigation of the well, it was determined that employees from a nearby restaurant had placed used kitchen cooking grease into this well. Personnel from the restaurant informed SAIC employees at the time of the sampling event that they thought that the well was a drain. This incident was reported to the NYSDEC on September 4, 2009. 03/23-24/11: SAIC performed the first quarter groundwater sampling event. 04/07/11: Well B-4 was decommissioned and a new down-gradient compliance monitoring well, MW-10, was installed in the parking lot situated to the south of the adjacent building at 427 Delaware Avenue. This well is a shallow monitoring well that will be used to delineate dissolved phase impacts down-gradient. 08/30-31/11: SAIC performed the third quarter groundwater sampling event. Groundwater was purged and sampled from nine monitoring wells during the March 2013 monitoring event (MW-6, MW-7, MW-8, MW-9, MW-10, VEP-1, WP-2, WP-3, and WP-5). Monitoring well WP-7 has an obstruction in the bottom of the well and was not gauged or sampled during the current event. Sample results for BTEX ranged from non-detect at WP-3 and WP-5 to 8290 ppb at VEP-1. 9/26-30/11: Two-phase vapor and groundwater extraction events performed at the site between September 26, 2011 and September 30, 2011. The two-phase events focused on wells VEP-1 and MW-8. Approximately 7,860 gallons of groundwater extracted over 36 hours, average combined extraction rate of roughly 3.5 gallons per minute (gpm). Based on the data collected by SAIC, the five events resulted in a combined mass removal of 9.48 pounds of hydrocarbons. In general, vapor concentrations were relatively low, in large part due to the hydrogeologic conditions and low vacuum influence. Despite efforts made to maximize and optimize mass removal rates by varying applied vacuum and stinger depths in the wells, the overall mass removal rate was low. Mass removal may have been influenced by the large amount of water generated by the wells, which made it difficult to drawdown the water column in each well and expose the entire smear zone soils. 11/03/11: SAIC performed the forth quarter groundwater sampling event. Groundwater was purged and sampled from nine monitoring wells during the March 2013 monitoring event (MW-6, MW-7, MW-8, MW-9, MW-10, VEP-1, WP-2, WP-3, and WP-5). Monitoring well WP-7 has an obstruction in the bottom of the well and was not gauged or sampled during the current event. Sample results for BTEX ranged from 1 ppb at Wp-3 and WP-5 to 5830 ppb at VEP-1. Based on the groundwater analytical results, subsequent to the two-phase extraction events, benzene concentrations decreased by 85% in MW-8 and 42% in VEP-1 when compared to the August 2011 data. BTEX concentrations decreased by 82% in well MW-8 and 49% in well VEP-1 when compared to the August 2011 data. 03/14/12: SAIC performed the first quarter groundwater sampling event. Groundwater was purged and sampled from nine monitoring wells during the March 2013 monitoring event (MW-6, MW-7, MW-8, MW-9, MW-10, VEP-1, WP-2, WP-3, and WP-5). Monitoring well WP-7 has an obstruction in the bottom of the well and was not gauged or sampled during the current event. Sample results for BTEX ranged from non-detect at WP-5 to 6440 ppb at VEP-1. 06/28/12: SAIC performed the second quarter groundwater sampling event. Groundwater was purged and sampled from nine monitoring wells during the March 2013 monitoring event (MW-6, MW-7, MW-8, MW-9, MW-10, VEP-1, WP-2, WP-3, and WP-5). Monitoring well WP-7 has an obstruction in the bottom of the well and was not gauged or sampled during the current event. Sample results for BTEX ranged from 1 ppb at WP-3 and WP-5 to 9310 ppb at VEP-1. 08/22/12: SAIC performed the third quarter groundwater sampling event. Groundwater was purged and sampled from nine monitoring wells during the March 2013 monitoring event (MW-6, MW-7, MW-8, MW-9, MW-10, VEP-1, WP-2, WP-3, and WP-5). Monitoring well WP-7 has an obstruction in the bottom of the well and was not gauged or sampled during the current event. Sample results for BTEX ranged from non-detect at WP-3 and WP-5 to 8290 ppb at VEP-1. 12/6/12: SAIC performed the forth quarter groundwater sampling event. Groundwater was purged and sampled from nine monitoring wells during the March 2013 monitoring event (MW-6, MW-7, MW-8, MW-9, MW-10, VEP-1, WP-2, WP-3, and WP-5). Monitoring well WP-7 has an obstruction in the bottom of the well and was not gauged or sampled during the current event. Sample results for BTEX ranged from non-detect at Wp-3 and WP-5 to 6780 ppb at VEP-1. 03/12-13/13: SAIC performed the first quarter groundwater sampling event. Groundwater was purged and sampled from nine monitoring wells during the March 2013 monitoring event (MW-6, MW-7, MW-8, MW-9, MW-10, VEP-1, WP-2, WP-3, and WP-5). Monitoring well WP-7 has an obstruction in the bottom of the well and was not gauged or sampled during the current event. Sample results for BTEX ranged from non-detect at WP-5 to 6860 ppb at VEP-1. 05/21-22/13: SAIC performed the second quarter groundwater sampling event. Concentrations exceeded Standards for STARS list compounds in groundwater analyzed from seven of the eight monitoring wells sampled(MW-6, MW-7, MW-8, MW-9, VEP-1,WP-2, and WP-3). Sample results for BTEX ranged from 2.1 ppb at MW-10 to 9140 ppb at VEP-1. 08/14/13: DEC site meeting with Steve Visocky new SAIC project manager, Rich O'Keefe (SAIC)and Martin Ocampo new Chevron project manager. SAIC technicians on-site conducting quarterly sampling. Discussed site history and remaining petro impacts beneath bldg. and adjacent to south side of bldg. Discussed SAIC proposal to conduct groundwater flow/contamination transport modeling to determine if impacted groundwater would reach the nearest down-gradient receptor. DEC noted that repeated monitoring events had already demonstrated that the groundwater plume was stable. NYS DOH currently reviewing 2007 sub-slab vapor sampling results to determine if further work required beneath bldg. Remaining issues to be addressed prior to site closure included petro impacts adjacent to south side of bldg., development of soils management plan and MW decommissioning. Noted apparent vent pipe along side south side of bldg. (near southwest bldg. corner) required further investigation. Agreed that future GW sampling could be reduced from quarterly to biannually. 08/20/13: Received DOH evaluation of 2007 sub-slab vapor sampling results. As of the date of the sampling, m and p-xylene barely exceeded DOH 90th percentile numbers. All the other compounds well below 90th percentile numbers. No need for further

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

sampling. 09/10/13: DEC telecon w/ Steve Visocky (SAIC) to discuss 8/14/13 meeting. Noted no additional sub-slab sampling or additional remedial work required beneath bldg. Steve said SAIC would be submitting plan to address soil contamination outside bldg. footprint and decommissioning of MWs. 11/27/13: DEC received third quarter SMR for groundwater sampling conducted on 8/14/13. Concentrations exceeded Standards for STARS list compounds in groundwater analyzed from seven of the eight monitoring wells sampled (MW-6, MW-7, MW-8, MW-9, VEP-1, WP-2, and WP-3). Sample results for BTEX ranged from 2.35 ppb at MW-10 to 8520 ppb at VEP-1. Groundwater sampling frequency to be reduced from quarterly to semiannual sampling. Next groundwater sampling event is scheduled for the first half of 2014. Planning for probable source area soil excavation near VEP-1 has begun. Excavation tentatively scheduled for the first quarter of 2014 in early Spring weather permitting. 12/30/13: DEC sent email noting reduction in submission of SMRs from from quarterly to semi-annually to coincide with the previously agreed upon reduction in groundwater sampling from quarterly to semi-annually is acceptable to the NYSDEC. Requested date for work plan submission for probable source area soil excavation work. 05/01/14: Received April 30, 2014 Excavation Workplan Design Tasks letter from Leidos Consulting. They plan to do two borings in proposed excavation area to collect geotechnical soils data and analytical data for landfill disposal of soils. Will also look for potential UST adjacent to bldg (via geophysical survey and air knife) and conduct utility stakeout. Called Steve Visocky, work tentatively planned for week of May 12th. Steve agreed to notify me of actual start date when closer to beginning work. 06/17/14: DEC sent email Martin Ocampo (CEMC) cc: Steve Visocky & Richard O'Keefe (Leidos) requesting status of the excavation workplan design tasks and excavation work plan ? Received reply back from Rich O'Keefe, they completed geophysical work yesterday working on sample collection today. Sent reply to O'Keefe, Steve Visocky was to notify me in advance of work so I could inspect, not sure I could make it out today. 07/01/14: TED telecon with Steve Visocky, noted they had completed geophysical work, baildown/pumping test in MW-8 and had attempted soil sampling but hit refusal at 4 feet. they plan to go back out and attempt resample to 12 feet to collect geotechnical soils data and analytical data. Steve agreed to notify me in advance of date. Steve agreed to send letter report of work completed. Steve asked for copy of NYSDEC RP letter to Texaco. He also mentioned new Chevron manager assigned to site. Sent email to Steve with attached copy of NYSDEC RP letter to Texaco. Requested contact info for new Chevron manager. 08/11/14: Received Update of Remediation Work Plan Design Tasks. Following tasks completed: 1. full suite geophysical survey was completed; 2. an attempt to advance geotechnical borings; 3. a bail down test on MW-8; 4. Leidos engaged a local subject matter expert to review the condition of the on-site and offsite buildings, which included obtaining drawings and inspecting the foundation and basement information about the buildings. Geophysical survey inconclusive though did identify some linear anomalies possibly related to the vent lines that are on the side of the building and the former underground remedial system lines. Attempted to advance two borings in the eastern and western portions of the VEP-1 area using a hand auger. Both borings encountered refusal at approximately 4 ft bgs on building debris (e.g. concrete, bricks, etc.). A third boring was attempted approximately 10 ft due west and encountered refusal at a similar depth. Based on results of bail down test it was determined a plan to handle water generated from a potential excavation would be required. The on-site building consists of a slab and foundation and does not have a basement. The offsite building to south was constructed in 1892 and has a basement. Received first half SMR Jan. - June 2014. Leidos performed the first semi-annual groundwater sampling on 5/12/14. Groundwater sampled from seven monitoring wells (MW-6, MW-7, MW-8, MW-9, VEP-1, WP-2, and WP-3). Concentrations exceeding the NYSAWQS for STARS (gasoline) list compounds were detected in wells MW-6, MW-7, MW-8, MW-9, VEP-1, and WP-2. A decreasing trend in the benzene and BTEX concentrations over time is evident in all site wells including VEP-1. Total BTEX concentrations ranged from 2.6 ppb in WP-3 to 6,070 ppb in VEP-1. VEP-1 BTEX concentrations have decreased an order of magnitude over time. 10/10/14: DEC teleconference with Matthew Thompson (Chevron) and Richard O'Keefe (Leidos). Due to structural concerns of the buildings and the continued downward trend in groundwater contaminant concentrations they did not want to proceed with excavation in area of VEP-1. Agreed to re-evaluate and consider closing site inactive. 11/14/14: Based upon structural limitations preventing further remedial excavation and continued decreasing trend in the benzene and BTEX concentrations over time site re-classified inactive. Inactive letter sent to Matthew Thompson (Chevron). Requested wells decommissioned in accordance with the New York State Department of Environmental Conservation (NYSDEC) Commissioner Policy CP-43: Groundwater Monitoring Well Decommissioning Policy. Requested work plan and schedule for decommissioning the wells. Noted documentation of the well decommissioning work must be submitted to this office within 30 days of its completion. Noted Texaco may be held responsible for any petroleum impacted soil left in place or generated during future site excavations from the contaminated area. Current property owner, Ron Alsheimer, copied on letter."

**Receive Date:** 20120302  
**Handler Name:** NATIONAL GRID VAULT 4-74 DELAWARE AVE  
**Federal Waste Generator Code:** 1  
**Generator Code Description:** Large Quantity Generator  
**Source Type:** Annual/Biennial Report update with Notification

#### Waste Code Details

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

<b>Hazardous Waste Code:</b>	B002
<b>Waste Code Description:</b>	Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.
<b>Hazardous Waste Code:</b>	B007
<b>Waste Code Description:</b>	Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

<b>Site Class Desc (Web):</b>	Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State					

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

**Site Class Desc:**

**Assess DOH:**

Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.

**Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in soil and groundwater is being managed under a Site Management Plan.

**Description:**

Location: The 432 Pearl Street site is an approximately 0.70-acre site located in an urban area at 432 Pearl Street and 267 Franklin Street in the City of Buffalo, Erie County. The site consists of two non-contiguous parcels which are separated by Asbury Alley. Site Features: The 432 Pearl Street parcel is a paved commercial parking lot. The 267 Franklin Street parcel contains an occupied apartment building with a paved parking lot for the tenants. Current Zoning and Land Use: The site is zoned DO - Downtown Opportunity, which includes residential, office, limited retail, restaurant, hotel and entertainment uses. The surrounding parcels are currently used for commercial uses including surface parking, restaurants and entertainment venues. Past Use of the Site: Since the late 1800s the site has been utilized mostly for residential purposes and parking. Records indicate limited commercial use on both parcels. Site Geology and Hydrogeology: Overburden: Near surface soil at the site consists of 2 to 5 feet of urban fill underlain by a 40 to 45 foot thick layer of sandy deposits inter-bedded with silty clay lenses underlain by a thin (1 to 2 foot thick) layer of glacial till over bedrock. Limestone bedrock was encountered about 52 feet below the surface. Unconfined shallow groundwater was encountered within the native soils at depths of approximately 10 to 12 feet below ground surface. Because of a silty clay soil lens within the sandy soil profile at a depth of approximately 25 to 30 feet below ground surface, the site has a defined shallow and deep groundwater zone. Site groundwater flows in a south/southwest direction. Regional groundwater appears to flow west/southwest toward Lake Erie and confluence of the Buffalo River.

<b>Assess DOH:</b>	Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.		

**Site Class Desc (Web):** Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

#### **Site Class Desc:** **Description:**

Location: The 432 Pearl Street site is an approximately 0.70-acre site located in an urban area at 432 Pearl Street and 267 Franklin Street in the City of Buffalo, Erie County. The site consists of two non-contiguous parcels which are separated by Asbury Alley. Site Features: The 432 Pearl Street parcel is a paved commercial parking lot. The 267 Franklin Street parcel contains an occupied apartment building with a paved parking lot for the tenants. Current Zoning and Land Use: The site is zoned DO - Downtown Opportunity, which includes residential, office, limited retail, restaurant, hotel and entertainment uses. The surrounding parcels are currently used for commercial uses including surface parking, restaurants and entertainment venues. Past Use of the Site: Since the late 1800s the site has been utilized mostly for residential purposes and parking. Records indicate limited commercial use on both parcels. Site Geology and Hydrogeology: Overburden: Near surface soil at the site consists of 2 to 5 feet of urban fill underlain by a 40 to 45 foot thick layer of sandy deposits inter-bedded with silty clay lenses underlain by a thin (1 to 2 foot thick) layer of glacial till over bedrock. Limestone bedrock was encountered about 52 feet below the surface. Unconfined shallow groundwater was encountered within the native soils at depths of approximately 10 to 12 feet below ground surface. Because of a silty clay soil lens within the sandy soil profile at a depth of approximately 25 to 30 feet below ground surface, the site has a defined shallow and deep groundwater zone. Site groundwater flows in a south/southwest direction. Regional groundwater

----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

appears to flow west/southwest toward Lake Erie and confluence of the Buffalo River.

#### **Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in soil and groundwater is being managed under a Site Management Plan.

Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).   <b>Site Class Desc:</b>  <b>Assess DOH:</b> Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.   <b>Description:</b> </div> <div> <b>Site Code (Web):</b> C915208  <b>Site Class (Web):</b> C  <b>Address 1 (Web):</b> 275 Franklin Street  <b>Address 2 (Web):</b>  <b>Locality (Web):</b> Buffalo  <b>ZIP Code (Web):</b> 14202  <b>County (Web):</b> Erie  <b>X Coord (Web):</b> -78.874438000  <b>Y Coord (Web):</b> 42.891738000  <b>Latitude (Web):</b>  <b>Longitude (Web):</b>  <b>Program:</b> BCP  <b>Address1 (GIS):</b> 275 Franklin Street  <b>Address2 (GIS):</b>  <b>Locality (GIS):</b> Buffalo  <b>Zipcode (GIS):</b> 14202  <b>County (GIS):</b> Erie  <b>Program (GIS):</b> BCP </div> </div>						

Location: The 275 Franklin Street Site is an approximately 0.26-acre site located in an urban area at 275 Franklin Street in the City of Buffalo, Erie County. The site is comprised of two parcels, one identified as 275-277 Franklin Street and the other as 279 Franklin Street. Site Features: The site is entirely paved with asphalt. Current Zoning and Land Use: The site is located in the Downtown Opportunity (DO) zoning district which allows residential, office, limited retail, restaurant, hotel and entertainment uses. The surrounding parcels are currently used for a combination of commercial uses including surface parking, restaurant and entertainment. Past Use Of The Site: The parcel addressed 279 Franklin Street was used for residential

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

purposes from the late 1800s through the 1950s, and as a parking lot from the early 1980s to present. Previous use of the lot does not reveal any recognized environmental concerns. The parcel addressed 275-277 Franklin Street contained a residence in the late 1800s. By the 1950s, the residence was replaced with a commercial building used by a dry cleaning business from approximately 1951 through the early 2000s. The building on the parcel was demolished in 2004 by the applicant. The building area of the parcel was subsequently paved over and is currently being used as a commercial surface parking lot. Site Geology and Hydrogeology: Near surface soil at the site consists of 2 to 5 feet of urban fill underlain by a 40 to 45 foot thick layer of sandy deposits inter-bedded with silty clay lenses underlain by a thin (1 to 2 foot thick) layer of glacial till over bedrock. Limestone bedrock was encountered about 52 feet below the surface. Unconfined shallow groundwater was encountered within the native soils at depths of approximately 10 to 12 feet below ground surface. Because of a silty clay soil lens within the sandy soil profile at a depth of approximately 25 to 30 feet below ground surface, the site has a defined shallow and deep groundwater zone. Site groundwater flows in a south/southwest direction. Regional groundwater appears to flow west/southwest toward Lake Erie.

#### **Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.

and RCRA Corrective action Program sites). This may be used for Manufactured Gas Plant sites or those being remediated under an EPA Cooperative Agreement.

**Site Class Desc:**

**Assess DOH:**

A health assessment will be provided when sufficient information becomes available for the area of concern.

**Description:**

Location: This site is the Off-Site area associated with Brownfield Cleanup Program (BCP) site C915208, located at 275-277 and 279 Franklin Street in the City of Buffalo, Erie County. The Off-Site area also adjoins BCP site C915237 located at 432 Pearl Street. The off-site area lies south/southwest of the associated 275 Franklin Street BCP site in an urban downtown commercial district. Known impacted off-site areas include a commercial business located at 265 Franklin Street, a portion of a commercial business located at 259 Delaware Avenue, and a commercial business located at 250 Franklin Street. Site Features: The Off-Site area consists of mixed use commercial buildings interspersed with paved parking areas. The commercial building are typical of tightly developed urban areas. There is a residential apartment building located at 267 Franklin Street. Current Zoning and Land Use: The Off-Site area is situated in the Downtown Opportunity (DO) zoning district which currently contains a mix of uses including apartments, restaurants, retail, entertainment, offices and parking. Past Use of the Site: Records indicate that in the late 1800s the area was predominantly closely spaced residential interspersed with commercial establishments. Since that time, redevelopment has resulted in less residential use and increased commercial uses typical of an urban downtown area. Site Geology and Hydrogeology: Overburden: The geology consists of a lake-laid sandy ridge deposit about 40 to 45 feet thick with several interbedded silty clay lenses below a thin (2 to 5 feet thick) soil/fill layer which is characteristic of urban fill common in the City of Buffalo. Glacial till deposits were not encountered at the site except for a thin layer (1 to 2 feet thick) above limestone bedrock. The site is situated over the Onondaga formation limestone. Limestone bedrock was encountered about 52 feet below the surface. Unconfined groundwater was encountered within the native soils at depths of approximately 10 to 12 feet below ground surface. Because of a silty clay soil lense within the sandy soil, the site has a defined shallow and deep groundwater horizon. Site groundwater flow gradient appears to flow in a south/southwest direction. Regional groundwater appears to flow west/southwest toward Lake Erie and confluence of the Buffalo River.

**Assessment:**

Known offsite areas impacted by groundwater contamination include a commercial business located at 265 Franklin Street, a portion of a commercial business located at 259 Delaware Avenue, and a commercial business located at 250 Franklin Street. Groundwater contamination data suggests that VOC contamination extends in a south/southwesterly direction from the 250 Franklin Street parcel. This area contains a tight mix of urban commercial buildings. POST-IRM: The DEC completed an off-site groundwater evaluation in 2009 which revealed that the PCE plume has migrated in a southwesterly direction across Franklin St. Contamination was found primarily in the shallow groundwater zone and is diminishing radially away from the source area. Off-Site area properties likely to be impacted from the 275 Franklin Street BCP site (C915208) will be situated south-southwest of that site. Investigation of offsite impacts to downgradient properties and structures at 250 Franklin St. revealed shallow groundwater zone contamination with chlorinated solvents commonly used by dry cleaners (tetrachloroethene [PERC, PCE]) over 3 parts per million (ppm). A vapor intrusion (VI) evaluation found vapor intrusion at levels requiring mitigation. A VI mitigation system was installed and post VI mitigation indoor air sampling confirmed the effectiveness of the installed VI mitigation system. POST BCP SITE REMEDIATION: Monitoring of off-site groundwater is ongoing to assess remaining chlorinated volatile compound (cVOC) contamination in offsite groundwater. Periodic groundwater monitoring results indicate a general lowering trend in cVOC levels.

Past Use Of The Site: The parcel addressed 279 Franklin Street was used for residential purposes from the late 1800s through the 1950s, and as a parking lot from the early 1980s to present. Previous use of the lot does not reveal any recognized environmental concerns. The parcel addressed 275-277 Franklin Street contained a residence in the late 1800s. By the 1950s, the residence was replaced with a commercial building used by a dry cleaning business from approximately 1951 through the early 2000s. The building on the parcel was demolished in 2004 by the applicant. The building area of the parcel was subsequently paved over and is currently being used as a commercial surface parking lot. Site Geology and Hydrogeology: Near surface soil at the site consists of 2 to 5 feet of urban fill underlain by a 40 to 45 foot thick layer of sandy deposits inter-bedded with silty clay lenses underlain by a thin (1 to 2 foot thick) layer of glacial till over bedrock. Limestone bedrock was encountered about 52 feet below the surface. Unconfined shallow groundwater was encountered within the native soils at depths of approximately 10 to 12 feet below ground surface. Because of a silty clay soil lens within the sandy soil profile at a depth of approximately 25 to 30 feet below ground surface, the site has a defined shallow and deep groundwater zone. Site groundwater flows in a south/southwest direction. Regional groundwater appears to flow west/southwest toward Lake Erie.

#### **Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.

#### Site Class Desc:

#### Description:

Location: The 275 Franklin Street Site is an approximately 0.26-acre site located in an urban area at 275 Franklin Street in the City of Buffalo, Erie County. The site is comprised of two parcels, one identified as 275-277 Franklin Street and the other as 279 Franklin Street. Site Features: The site is entirely paved with asphalt. Current Zoning and Land Use: The site is located in the Downtown Opportunity (DO) zoning district which allows residential, office, limited retail, restaurant, hotel and entertainment uses. The surrounding parcels are currently used for a combination of commercial uses including surface parking, restaurant and entertainment. Past Use Of The Site: The parcel addressed 279 Franklin Street was used for residential purposes from the late 1800s through the 1950s, and as a parking lot from the early 1980s to present. Previous use of the lot does not reveal any recognized environmental concerns. The parcel addressed 275-277 Franklin Street contained a residence in the late 1800s. By the 1950s, the residence was replaced with a commercial building used by a dry cleaning business from approximately 1951 through the early 2000s. The building on the parcel was demolished in 2004 by the applicant. The building area of the parcel was subsequently paved over and is currently being used as a commercial surface parking lot. Site Geology and Hydrogeology: Near surface soil at the site consists of 2 to 5 feet of urban fill underlain by a 40 to 45 foot thick layer of sandy deposits inter-bedded with silty clay lenses underlain by a thin (1 to 2 foot thick) layer of glacial till over bedrock. Limestone bedrock was encountered about 52 feet below the surface. Unconfined shallow groundwater was encountered within the native soils at depths of approximately 10 to 12 feet below ground surface. Because of a silty clay soil lens within the sandy soil profile at a depth of approximately 25 to 30 feet below ground surface, the site has a defined shallow and deep groundwater zone. Site groundwater flows in a south/southwest direction. Regional groundwater

appears to flow west/southwest toward Lake Erie.

#### Assessment:

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.

<b>Assess DOH:</b>	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.					

#### Description:

Location: The Ellicott and Oak Streets site is an approximately 1.269-acre site located in a highly developed commercial and residential area at 324, 328 and 334 North Oak Street and 441 Ellicott Street in the City of Buffalo, Erie County. The site is bordered by commercial properties to the north and south, Ellicott Street to the west, and North Oak Street to the east. Site Features: The site is developed with four buildings. Building 1, located at 334 North Oak Street, is a 35,937 square feet in size, Building 2 at 441 Ellicott Street is 9,348 square feet, Building 3 at 328 North Oak Street is 6,854 square feet and Building 4 at 324 North Oak Street is 10,800 square feet. Portions of the site that are not covered by buildings are currently vacant land that are either covered by asphalt paving, gravel, or vegetation. Zoning and Land Use: The site is zoned N-1C, mixed-use core and is currently used for equipment storage and a wholesale flower market. Several areas of the site are currently unoccupied. Proposed redevelopment includes a new residential structure at 334 North Oak Street. Past Use of the Site: The site was used for residential, commercial, and light industrial purposes from at least 1889 to the present. From at least 1889 until 1899, the southern portion of the site was occupied by a carpenter shop, elevators, a mill, flour storage, and warehousing and the northern portion was occupied by a furniture factory, residential properties, storefronts and saloons. From approximately 1925 to 1986, various operations utilized the southern portion of the site, including John Kamman Cold Storage, L.C. Wilson Packing Corporation, and Hygrade Food Products Corporation, and an auto storage and ignition service/garage existed on the northern portion of the site. An associated former gasoline tank is understood to have existed between 338 and 340 North Oak Street. Other operations at this time included furniture storage, a mattress manufacturer, two sausage factories, a restaurant, a printing operation, a pants manufacturer, at least two florists, and a wholesale radio and a television parts company. Stores, residences, and an office were also noted at the site during this time. A previous Phase II Environmental Investigation identified polycyclic aromatic hydrocarbons (PAHs) and metals in the soil/fill across the site. Site Geology and Hydrogeology: The site is located within the Erie-Ontario Lowlands, which is typified by little topographic relief, and gently slopes westward towards Lake Erie, except in the immediate vicinity of major drainage ways. The surficial geology of the Erie-Ontario Lowlands has developed from lacustrine deposits or till that may contain both limestone and shale. The overburden geology is generally described as urban fill consisting of cinders, ash, slag, wood, asphalt, concrete, glass, plastic, brick, metal, paint cans, and metal piping from the ground surface to depths ranging from 2 to 5 feet below ground surface (fbgs). Sandy lean clay was observed underlying the fill materials along the south end of the site and fine sand was observed underlying the fill along the north end. Subangular gravel was observed overlying the fill at the north end, and topsoil was observed in the southwestern portion of the site. Bedrock is comprised of a varying texture from coarse to very finely crystalline with a dark gray to tan color and chert and fossils within. The unit has an approximate thickness of 110 to 160 feet. Regional and local groundwater likely flows west towards Lake Erie. Local groundwater flow however may be influenced by subsurface features such as excavations, utilities, and localized fill conditions.

#### Assessment:

Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

<b>Site Name:</b>	250 Delaware Avenue Site					
<b>Site Name (Web):</b>	250 Delaware Avenue Site					
<b>Site name (GIS):</b>	250 Delaware Avenue Site					
<b>Site Class Desc (Web):</b>	Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).					
<b>Site Class Desc:</b>						
<b>Assess DOH:</b>	Remedial activities undertaken at the site have effectively reduced the potential for exposure to site-related contaminants in on-site areas. Some limited soil contamination exists at the property boundary but people are unlikely to contact it as it is at depth. People are not coming into contact with groundwater unless they dig greater than 10 feet below the ground surface. In addition, the City of Buffalo prohibits use of groundwater as a potable source and the area is served by a public water supply.					
<b>Description:</b>						

Location: The site is located at 250 Delaware Avenue in the City of Buffalo. The address for the BCP site parcel has been renumbered by the City to 250 Delaware Street. The site encompasses an area the length of a city block along the north side of West Chippewa Street extending from Delaware

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Avenue to South Elmwood Avenue. Site Features: The site is located in a highly developed urban area and is situated in a popular entertainment district. The site occupies approximately 1.96 acres in area on the north side of West Chippewa Street, and is bounded by South Elmwood Avenue to the west, Delaware Avenue to the east and commercial properties to the north. Local topography of the area is generally flat with a gentle slope toward the Buffalo River/Lake Erie typical of the Buffalo metro area. The site currently has no buildings, but steel framing and floor decking for a 12 story mixed use commercial use building has recently been completed. Current Zoning and Land Use: The site is zoned for commercial use in City of Buffalo Downtown Opportunity (DO) zone. Previous use and future use following redevelopment will be commercial. Past Use of the Site: The development history dates back to the late 1800s. The site and surrounding area was historically used for commercial and residential uses. The eastern portion of the site contained the Delaware Court building which was utilized as a mixed-use commercial building since its construction in 1925. An area behind the Delaware Court building used for surface parking was previously used for gasoline retail as early as the 1930s. Westward from the Delaware Court building, three residential structures occupied lots fronting Chippewa Street. These structures were eventually demolished. Two of the residential lots were subsequently used for surface parking. The remaining former residential lot at the corner of West Chippewa and South Elmwood was used as a retail gasoline filling station with a one story convenience store. The former residential lots and commercial use lots were eventually combined into a single parcel with the Delaware Court Building lot. Just north of this gasoline station, records show that the parking lot area contained another gasoline filling station for a period of time. A tire service operation was present on-site from approximately 1931 and 1936, and a service station was identified on the project site from 1982 and 1987 suggesting historic on-site automotive repair operations. Municipal records indicate the installation and removal of several underground storage tanks on this side of the project site. North of the former gasoline station, a former commercial building occupied the area fronting South Elmwood. This building was demolished in the mid-2000s. Prior to demolition, a locksmith occupied the building. Records for this building indicate several uses including a paint shop and a pipe/hardware shop. In 2003, the site owner at that time entered into stipulation agreement with the NYSDEC to investigate and remediate a petroleum spill discovered at the site. A petroleum recovery system was installed in 2003 and was operated until 2004. Approximately 4,300 gallons of petroleum product was extracted from the impacted area. Measures to treat groundwater impacted with dissolved petroleum contamination were implemented by the site previous owner in 2004 and 2006. Ongoing monitoring indicated continued dissolved phase petroleum impacts to groundwater. The site owner sold the site to the BCP applicant in 2012 and the site was admitted to the BCP in early 2013. The BCP applicant demolished the gas station/convenience store during early summer 2013. The Delaware Court Building was demolished during winter 2013-2014. The site is currently being redeveloped with the construction of a 12 story mixed commercial use building in the area formerly occupied by the Delaware Court Building and a 4 story parking ramp. Site Geology/Hydrogeology: Overburden: Following the recent interim remedial measure (IRM), the surficial site geology has been altered. The surface and upper zone in the former parking lot area consists of crushed limestone backfill of varying thickness. The petroleum excavation area was backfilled with crushed limestone ranging in depth from 15 to 20 feet in depth, and historic fill area contains crushed limestone from 2 to 6 feet in depth. Below the crushed limestone fill layer, native soils consists of mostly a fine sand with some interbedded thin lenses of a silty/clayey soil ranging from 41 to 46 feet in depth. The sandy soil layer progressively becomes siltier moving northward along the site. The predominantly sandy soil is likely a part of a lake-laid sandy ridge deposit that is unique in this locality of the city. The soil beneath the basement of former Delaware Court Building consists of the fine sandy soil. Bedrock: Limestone bedrock varies from 41 to 46 feet below ground surface. Hydrogeology: Unconfined groundwater was encountered within the native soils and recent backfill at depths of approximately 10 to 12 feet below ground surface. Site groundwater flow gradient appears to flow in a south/southwest direction. Regional groundwater likely flows west/southwest toward Lake Erie and confluence of the Buffalo River.

#### Assessment:

Pre IRM Remediation: Soil: Soil: Soil in the southwest section of the site was impacted by petroleum compounds significantly above unrestricted use levels. After several preceding remediation measures, the soil was still sufficiently contaminated to a depth of 15 to 18 feet below ground surface with petroleum such that it served as ongoing source of groundwater contamination from petroleum compounds and potential source of volatile petroleum compound soil vapors. The parking lot area of the site was underlain with impacted fill. The impacted fill was contaminated with several metals and semi-volatile organic compounds; however it did not pose an environmental or human health concern as it was contained beneath an asphalt pavement and was not mobile. Groundwater: Previous efforts to remediate the petroleum spill did not effectively remediate the site from petroleum compounds. Ongoing monitoring indicated continued high levels of dissolved petroleum impacts to groundwater significantly above water quality standards. Groundwater quality was not impacted elsewhere on the site by petroleum compounds or other contaminants of concern. Soil Vapor: The soil vapor assessment indicated petroleum vapors in areas beyond the petroleum impacted area. No DOH vapor matrix contaminants exceeded matric levels. Post-IRM Remediation Soil: Verification sampling of bottom and sidewalls was implemented to ensure project cleanup goals were achieved. With the exception of one bottom sample, the concentrations of contaminants remaining in the native soils were less than the unrestricted use SCOs. The bottom sample (bottom no. 15) was situated in a deeper section (18 feet) of the petroleum excavation area adjacent to the sheet piling, where an excavation depth limitation restricted additional excavation depth along the sheet piling. The sample was marginally above the unrestricted level for xylene (1.75 ppm total xylene vs. the 0.260 ppm unrestricted use SCO), but well below the residential use SCO (100 ppm). There is no evidence of offsite migration of contaminants of concern. Groundwater: A nominal level of benzene (210 ppb in MW-8) remains in an area previously heavily contaminated with petroleum. With the bulk removal of petroleum impacted soils at the site, it is expected that the benzene residual will continue to decrease due to natural attenuation. There is no evidence of significant off-site migration of impacted groundwater. Soil Vapor: The bulk removal of petroleum impacted soil has removed the source of petroleum volatile compounds and vapor intrusion concerns.

Data Source:						
Site Name:	Electric Tower					
Site Name (Web):	Electric Tower					
Site name (GIS):	Electric Tower					
Site Class Desc (Web):	No Further Action at this Time: Sites are given a classification of "N" when:					

- the investigation and evaluation of a Class P site results in a determination that contamination at the site does not warrant placing the site on the Registry or it is being addressed under a brownfield program;
- a site was in a brownfield program (BCP, ERP or VCP) or other non-Registry program, remediation was not completed, and the site did not otherwise qualify for listing on the Registry. As an example, this occurs when a volunteer begins a brownfield project and then for economic or other reasons, determines they cannot complete the work and the brownfield project is terminated. If the contamination at the brownfield site qualifies it for placement on the Registry, the Department acts to do so. If the site re-enters a brownfield program, it can be reclassified to Class A (active) to indicate that work has recommenced;
- a site was identified simply as the location(s) where a drum(s) or other discrete waste was at one time present and subsequently removed by DEC or others and, based on the resulting conditions, no need for additional work was apparent; or
- an application to the BCP, ERP or VCP was submitted, and was then withdrawn or terminated before any actions were taken to investigate or remediate the site.

**Site Class Desc:**  
**Assess DOH:**  
**Description:**

The site was a parking lot connected to an office building located at 535 Washington Street, City of Buffalo, Erie County, New York. The site is located in downtown Buffalo. Petroleum Bulk Storage (PBS) registration information currently consists of two, 275 gallon above ground storage tanks (AST) containing fuel oil, and one 800 gallon diesel fuel AST. Historically, three underground storage tanks (UST) were located beneath the parking area of the east side of the Electric Building. The three tanks were removed from the site nearly 10 years ago. During a previous Phase II investigation petroleum contaminated soil was detected in the location of the removed USTs. The open spill number for this site is 0311417. A cleanup was conducted in 2005. The spill was made inactive on June 29, 2005. The site was not accepted into the Brownfield Cleanup Program.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

#### Assessment:

The primary contaminants are petroleum contaminated soils which contain Volatile Organic Compounds (VOCs) and Semi-Volatile Organic Compound (SVOCs) that exceed guidance values. There is no evidence of off site migration of contaminants.

"08/02/06 JFO ON SITE SPOKE WITH A VERIZON EMPLOYEE. SITE CONTACT IS BILL TUCKER 838-2525 AND CELL IS 213-7933. THERE ARE 10 DRUMS ON SITE FOR DISPOSAL AND THE HOLE HAS BEEN BACKFILLED AND THE CONCRETE HAS BEEN POURED. THE SOIL RESULTS ARE BELOW STARS BUT THE GROUND WATER RESULTS ARE ABOVE STANDARDS BUT <1PPM TOTAL. DISCUSSED WITH SAC AND WE AGREED THAT THE SITE WILL BE INACTIVE. NO FURTHER ACTION REQUIRED AT THIS TIME. NEED RECEIPTS TO CLOSE. 08/04/06 JFO CALL TO GREG MYKA. LEFT A MESSAGE ON HIS V-MAIL REGARDING DISPOSAL RECEIPTS FOR THE DRUMS. 10/26/06 JFO RECEIVED THE CLOSURE REPORT WITH THE DISPOSAL RECEIPTS FOR THE 10 DRUMS. THE SITE WILL BE INACTIVE NO FURTHER ACTION REQUIRED AT THIS TIME. INACTIVE LETTER SENT. CLOSED"

satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

**Site Class Desc:**  
**Assess DOH:**

Persons who dig below the ground surface may come into contact with contaminants in subsurface soil. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system (system that ventilates/removes the air beneath the building) has been installed in the on-site building and will be evaluated to ensure that the system will prevent impacts to indoor air before the building is occupied. Sampling indicates soil vapor intrusion is not a concern for off-site buildings.

**Description:**

Location: The 73-79 W. Huron St. site is an approximately 0.609 acre site located at 73-79 W. Huron Street, City of Buffalo, Erie County. Site Features: The site consists of a six-story building, a two-story gymnasium built on piers, and an asphalt-paved parking lot. The building is a brick structure with a basement and basement sump. The parking lot located to the west of the building covers the remainder of the site. Current Zoning and Land Use: The site is located in the City's N-1D, Downtown/Regional Hub neighborhood zone which allows for restricted residential and commercial uses. Past Use of the Site: The building was constructed in the early 1900s as a horse stable and was later converted to a parking ramp. The southern end of the paved parking lot was once occupied by a gas station. Historical activities included the use of petroleum products in above ground drums and underground tanks. Immediately west of the site is another former gas station, which was remediated under the Department's Spill Response program (spill #1106834). Geology and Hydrogeology: Soils beneath the asphalt parking lot consist of general fill (i.e. bricks, metal, glass, etc.) co-mingled with fine sand to depths of 2 to 5 feet below ground surface (fbgs). Beneath the general fill and the basement of the building, the soil is a poorly graded sand and silty sand. Bedrock was not encountered during any of the site investigations, however, based on observations at other nearby sites, it is estimated that the limestone bedrock is approximately 40 fbgs. Groundwater is present at approximately 9 to 11 fbgs. Site groundwater flow direction is influenced by an active sump, located in the western half of the building's basement. Based on observations made during the remedial investigation, the sump pump operates continuously, creating a localized depression in the groundwater table, pulling groundwater from beneath the central portion of the parking lot eastward. Beyond the vicinity of this sump, in the southern end of the parking lot, groundwater flows in a southeast direction. Renovation work involved cracking the original basement floor to mitigate settlement and installing an overlying layer of stone and a new slab above the former floor, creating a vadose zone.

**Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum-related volatile organic compounds in the soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.

<b>Assess DOH:</b>	<p>Persons who dig below the ground surface may come into contact with contaminants in subsurface soil. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system (system that ventilates/removes the air beneath the building) has been installed in the on-site building and will be evaluated to ensure that the system will prevent impacts to indoor air before the building is occupied. Sampling indicates soil vapor intrusion is not a concern for off-site buildings.</p>					
<b>Site Class Desc (Web):</b>	<p>Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department.</p>					

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

**Site Class Desc:**  
**Description:**

Location: The 73-79 W. Huron St. site is an approximately 0.609 acre site located at 73-79 W. Huron Street, City of Buffalo, Erie County. Site Features: The site consists of a six-story building, a two-story gymnasium built on piers, and an asphalt-paved parking lot. The building is a brick structure with a basement and basement sump. The parking lot located to the west of the building covers the remainder of the site. Current Zoning and Land Use: The site is located in the City's N-1D, Downtown/Regional Hub neighborhood zone which allows for restricted residential and commercial uses. Past Use of the Site: The building was constructed in the early 1900s as a horse stable and was later converted to a parking ramp. The southern end of the paved parking lot was once occupied by a gas station. Historical activities included the use of petroleum products in above ground drums and underground tanks. Immediately west of the site is another former gas station, which was remediated under the Department's Spill Response program (spill #1106834). Geology and Hydrogeology: Soils beneath the asphalt parking lot consist of general fill (i.e. bricks, metal, glass, etc.) co-mingled with fine sand to depths of 2 to 5 feet below ground surface (fbgs). Beneath the general fill and the basement of the building, the soil is a poorly graded sand and silty sand. Bedrock was not encountered during any of the site investigations, however, based on observations at other nearby sites, it is estimated that the limestone bedrock is approximately 40 fbgs. Groundwater is present at approximately 9 to 11 fbgs. Site groundwater flow direction is influenced by an active sump, located in the western half of the building's basement. Based on observations made during the remedial investigation, the sump pump operates continuously, creating a localized depression in the groundwater table, pulling groundwater from beneath the central portion of the parking lot eastward. Beyond the vicinity of this sump, in the southern end of the parking lot, groundwater flows in a southeast direction. Renovation work involved cracking the original basement floor to mitigate settlement and installing an overlying layer of stone and a new slab above the former floor, creating a vadose zone.

**Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum-related volatile organic compounds in the soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.

Assess DOH:		Measures are in place to control the potential for coming in contact with residual subsurface soil and groundwater contamination remaining on the site.				
Description:						
Location: The Former Mobil Service Station 99-MST site is an approximately 1.72-acre site located at 1001 Main Street (formerly 979 Main Street) in the City of Buffalo, Erie County. The site is bordered by Goodrich Street to the north, High Street to the south, a parking lot to the east and Main Street with an underground subway corridor below to the west. Site Features: This site consists of two parcels and has a medical office building and associated parking which was constructed in 2015. Current Zoning and land Use: The site is zoned for commercial use. Land use in the surrounding area is characterized as urban mixed use, primarily commercial and community services. The community services include public and private medical and hospital facilities. Past Use of the Site: Exxon/Mobil and its predecessors operated a gas station on the site from approximately 1940 to 1982. The gas station building was demolished in 1982 and four underground storage tanks (USTs) were removed between 1981 and 2007. Other previous operations at the site included an auto repair shop, University at Buffalo medical and dental departments, a restaurant and a motel. Site Geology and Hydrogeology: Overburden soils in the area consist primarily of fill material at the ground surface. Geotechnical boring logs collected from the site in 2010 indicate that fill material such as sand, gravel and bricks varies in thickness from 2 to 10 feet across the site. Soil underlying the fill is comprised of						

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>

interbedded sands and silt that are brown to olive - brown in color. Overburden soils are underlain by the Onondaga Limestone (bedrock), which is at approximately 100 feet below ground surface. The groundwater is approx. 32 feet bgs and flows towards northeast.

#### **Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum hydrocarbons in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil and groundwater is being managed under a Site Management Plan. Note: Off-site contamination in the Main Street Right-of-Way, between the subway line and sheet piles along the site border, is being managed under Spill number 9500234.

Site Class Desc:						
Site Class Desc (Web):	Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).					
Assess DOH:	Measures are in place to control the potential for coming in contact with residual subsurface soil and groundwater contamination remaining on the site.					
Description:						
Location: The Former Mobil Service Station 99-MST site is an approximately 1.72-acre site located at 1001 Main Street (formerly 979 Main Street) in the City of Buffalo, Erie County. The site is bordered by Goodrich Street to the north, High Street to the south, a parking lot to the east and Main Street with an underground subway corridor below to the west. Site Features: This site consists of two parcels and has a medical office building and associated parking which was constructed in 2015. Current Zoning and land Use: The site is zoned for commercial use. Land use in the surrounding area is characterized as urban mixed use, primarily commercial and community services. The community services include public and private medical and hospital facilities. Past Use of the Site: Exxon/Mobil and its predecessors operated a gas station on the site from approximately 1940 to 1982. The gas station building was demolished in 1982 and four underground storage tanks (USTs) were removed between 1981 and 2007. Other previous operations at the site included an auto repair shop, University at Buffalo medical and dental departments, a restaurant and a motel. Site Geology and Hydrogeology: Overburden soils in the area consist primarily of fill material at the ground surface. Geotechnical boring logs collected from the site in 2010 indicate that fill material such as sand, gravel and bricks varies in thickness from 2 to 10 feet across the site. Soil underlying the fill is comprised of interbedded sands and silt that are brown to olive - brown in color. Overburden soils are underlain by the Onondaga Limestone (bedrock), which is at approximately 100 feet below ground surface. The groundwater is approx. 32 feet bgs and flows towards northeast.						
Assessment:						
Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum hydrocarbons in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil and groundwater is being managed under a Site Management Plan. Note: Off-site contamination in the Main Street Right-of-Way, between the subway line and sheet piles along the site border, is being managed under Spill number 9500234.

The community services include public and private medical and hospital facilities. Past Use of the Site: Exxon/Mobil and its predecessors operated a gas station on the site from approximately 1940 to 1982. The gas station building was demolished in 1982 and four underground storage tanks (USTs) were removed between 1981 and 2007. Other previous operations at the site included an auto repair shop, University at Buffalo medical and dental departments, a restaurant and a motel. Site Geology and Hydrogeology: Overburden soils in the area consist primarily of fill material at the ground surface. Geotechnical boring logs collected from the site in 2010 indicate that fill material such as sand, gravel and bricks varies in thickness from 2 to 10 feet across the site. Soil underlying the fill is comprised of interbedded sands and silt that are brown to olive - brown in color. Overburden soils are underlain by the Onondaga Limestone (bedrock), which is at approximately 100 feet below ground surface. The groundwater is approx. 32 feet bgs and flows towards northeast.

**Assessment:**

Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum hydrocarbons in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil and groundwater is being managed under a Site Management Plan. Note: Off-site contamination in the Main Street Right-of-Way, between the subway line and sheet piles along the site border, is being managed under Spill number 9500234.

#### **Caller Remark:**

"WHILE INSTALLING A CONDENSATE RETURN LINE, AN UNKNOWN ABANDONED UST WAS FOUND WITH WHAT APPEARS TO BE PETROEUM CONTAMINATION AROUND IT. TANK IS BETWEEN THE CURB AND THE SIDEWALK. DANFORTH IS DOING WORK FOR THE STEAMLINE. THEY ARE INTERVIEWING TONAWANDA TANK AND ELMWOOD TANK REGARDING REMOVAL OF THE TANK."

#### **Dec Remark:**

"10/24/6 SAC NOTIFIES PBS-BG THAT REGISTRATION OF TANK REQUIRED. 10/26/6 ON SITE W/ JOE, STEVE AND ANTHONY. UST TANK TOP UNCOVERED. MANHOLE OPENED, COULD SEE TANK WAS CLOSED IN PLACE W/SLURRY. MINOR FLUID W/STRONG PETROLEUM ODOR INSIDE. AREA FENCED FOR PROTECTION. THEY WILL CONTINUE W/UTILITY INSTALLATION. FEELS TANK BELONGS TO CITY SINCE TANK SITS INSIDE ROW. REQUESTED ABSTRACT/ DOCUMENTS REGARDING DISCOVERY OF TANK. 10/27/6 Nothing found in Sanborn search for tank history. Call PBS contacts, need updating. Requested SPCC plan identifying all tank locations. Called Buff Fire Dept on tank closures for this area. Joe Moslow researching records to see when Roswell knew of tank existence, when it was closed, by whom and if site assessment exists. 10/30/6 Ken-Buff Fire Dept (851-5707 x756) states nothing on file for Carlton, Michigan, Elm or old alley that was removed to build the parking garage. 11/3/6 City of Buff's contractor/Tom Forbes, Benchmark (864-1730) will do what has to be done w/tank. 11/16/6 Joe states City owns ROW where UST is. T/C with Darin Muglestein (843-5896) and Dennis Sutton. 11/17/6 MOSLOW FAXED URS TANK LOCATION MAP. 11/29/6 T/C W/JOE, RE RESEARCH FINDINGS? 11/30/6 TOM FORBES/ BENCHMARK FOR DAN KRUIZ OF CITY STATES THEY ARE PREPARED TO REMOVE TANK IF NO DATA IS

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

LOCATED. 12/1/6 JOE FOUND ABSTRACT, WAS A VACANT LOT IN 1964. MOSLOW FAXED TITLE INSURANCE ABSTRACT SHOWING OWNERSHIP HISTORY OF TANK LOCATION/ PROPERTY. 12/4/6 TOM FORBES BIDDING OUT REMOVAL OF UST. NO DATA FOUND AT CITY. 12/6/6 MOSLOW FAXED 5/20/94 LTR FROOM LEHRER MCGOVERN BOVIS INC/ RUSSELL PROGRAM MANAGEMENT STATING UST WAS DISCOVERED. CONTAMINATED SOIL FOUND W/ PETROLEUM ODORS. LTR STATES NFG LOCATED TANK DURING GAS LINE INSTALLATION. CONTACTED NFG TO SEE WHAT INFORMATION THEY HAD ON TANK AND END RESULT OF CONTAMINATED SOILS REMOVED AT THAT TIME. NYSOGS CALLED TO RESEARCH FOR SITE ASSESSMENT PAPERS. DOH CALLED TO LOCATE SITE ASSESSMENT INFO. ALL FOUR AGENCIES HAVE NO INFORMATION. CALL CITY FIRE DEPARTMENT AND DPW FOR ASSESSMENT INFO/ REGISTRATION OF TANK. KURT KRUMPA/OGS A CONTACT REGARDING INFO ON UST CLOSURE IN 90s. REFERRED TO MARTIN DEPAULO (518-473-9369). 12/8/6 LIER-MCGOVERN-BOGUS LTR STATES PREVIOUS OWNER DOH CONTRACTED CONDENSATE LINE PRIOR TO ROSWELL OWNERSHIP. OGS FOUND TANK, WORKED AROUND IT. ROBERT GREY-DOH STATED NATIONAL FUEL FOUND TANK, CONTAMINATED SOIL FOUND/STAGED. T/C W/MARTY OGS TO FOLLOWUP ON DATA THEY HAVE. CGM T/C W/JOE FOUND ABSTRACT, BACKUP TANK IDENTIFIED FROM LETTER RE: UTILITY INSTALLATION PROJECT IN MAY 1994. 12/18/6 TOM FORBES FOR CITY, ROSWELL NOR FIRE DEPARTMENT CAN FIND ANY INFO DESPITE DIRECTION FROM LETTER PROVIDED BY ROSWELL. MARTY DIPAULO RE: PROJECT NUMBER FOR 1994. 12/19/6 TANYA ALEXANDER, NATIONAL FUEL GAS REGARDING CARLTON TANK WORK. 2/9/7 FORBES/BENCHMARK WAITING ON DEC FINDING INFO FROM ROSWELL REGARDING TANK. HOPEFULLY SOMETHING WILL COME UP. CITY WILL DO WHAT MUST BE DONE. KEEP THEM POSTED. LEFT MESSAGE FOR DAN CRUISE OF CITY. LEFT MSG FOR UPDATE FROM MOSLOW. 2/12/7 MIKE TURRI. URS (856-5636) CALLED REGARDING MAP MOSLOW SENT OVER SHOWING TANK LOCATION. ONCE TANK UNCOVERED DURING CONDENSATE LINE INSTALLATION, JOE REQUESTED MAP SURVEY OF ITS LOCATION. 2/13/7 MOSLOW FOUND AND RESUBMITTED 1994 LETTER TO SAL CALANDRA FROM MS. KELLEY OF ROSWELL RELATED TO SPILL REPORTS #9402510 AND #9206876. BOTH SHOW EXISTENCE OF TANK OWNED BY CITY OF BUFFALO DUE TO LOCATION WITHIN ROW. CITY HIRED ELMWOOD TANK AND PIPE TO CLOSE IN PLACE. SITE ASSESSMENT SHOWED EXCEEDANCES AND THOSE SPILLS MADE INACTIVE. DUE TO LOW LEVEL EXCEEDANCES, INACCESSIBILITY OF TANK DUE TO SEVERAL UTILITIES SURROUNDING/TOUCHING TANK, DEPARTMENT STANCE REMAINS THE SAME; IF CITY WISHES TO, THEY MAY REMOVE BUT NOT REQUIRED TO DO SO. MOSLOW CONFIRMS PBS APPL UPDATED W/ CORRECT CONTACTS AND MISSING TANK INFORMATION. 5/14/7 INACTIVE CLOSURE LETTER SUBMITTED TO ROSWELL COPIED TO CITY OF BUFFALO AND THEIR CONTRACTOR-BENCHMARK. NO FURTHER ACTION REQUIRED AT THIS TIME. SHOULD THE CONTAMINATION BE EXPOSED IN THE FUTURE, SPILL WILL BE REOPENED, REMEDIATION MAY BE REQUIRED. "

<b>Site Name (Web):</b>	200 Delaware Ave Project					
<b>Site name (GIS):</b>	200 Delaware Ave Project					
<b>Site Class Desc (Web):</b>	No Further Action at this Time: Sites are given a classification of "N" when:					

- the investigation and evaluation of a Class P site results in a determination that contamination at the site does not warrant placing the site on the Registry or it is being addressed under a brownfield program;
- a site was in a brownfield program (BCP, ERP or VCP) or other non-Registry program, remediation was not completed, and the site did not otherwise qualify for listing on the Registry. As an example, this occurs when a volunteer begins a brownfield project and then for economic or other reasons, determines they cannot complete the work and the brownfield project is terminated. If the contamination at the brownfield site qualifies it for placement on the Registry, the Department acts to do so. If the site re-enters a brownfield program, it can be reclassified to Class A (active) to indicate that work has recommenced;
- a site was identified simply as the location(s) where a drum(s) or other discrete waste was at one time present and subsequently removed by DEC or others and, based on the resulting conditions, no need for additional work was apparent; or
- an application to the BCP, ERP or VCP was submitted, and was then withdrawn or terminated before any actions were taken to investigate or remediate the site.

**Site Class Desc:**  
**Assess DOH:**  
**Description:**

This BCP Application is for remediation and redevelopment of the 1.740-acre property located at 200 Delaware Avenue in the City of Buffalo, New York, Erie County. This property is a vacant 15-story building that was formerly used as the Dulski Federal Office Building. Known or suspected contaminants listed are petroleum, metals, PCBs and SVOCs. This BCP Application has been reviewed and the Department of Environmental Conservation has determined, based upon the information provided as part of the application, that the property does not meet the definition of a "brownfield site" as defined in Section 27-1405.2 of the Environmental Conservation Law (ECL). Pursuant to ECL Section 27-1407.8(a), the Department denied the application on 9/19/07.

**Assessment:**

A portion of the site contains petroleum contamination which will be addressed under the Spills Program (Site #0075500)

"CALLER SAID THAT THY HAD A #6 FUEL OIL SPILL(50 GAL),ALL IN THEIR SECONDARY CONTANIMENT AREA,BUT A SMALL AMOUNT GOT INTO THE SEWER,DUE TO THE RAIN...THEY HAVE PUT ABSORBANT BOOMS/PADS ALL OVER AND HAVE CONTAINED ABOUT 49 GALS."

**Dec Remark:**

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was FG 01/30/01: FG SITE INSPECTION. BUFFALO GENERAL WAS CLEANING UP SPILL WHEN I ARRIVED. IT WAS RAINING AND THEY HAD BUILT A DAM TO PREVENT THE SHEEN OFF THE PARKING LOT FROM ENTERING THE STORM DRAIN. THE CAUSE OF THE SPILL IS AN OVERFILL INTO CONTAINMENT. APPROXIMATELY 1 GALLON SPILLED OUT OF THE SECONDARY CONTAINMENT ONTO THE PARKING LOT. BUFFALO GENERAL HIRED THE ENVIRONMENTAL SERVICE GROUP TO COMPLETE THE CLEANUP AND DISPOSAL OF THE SPILLED MATERIAL. THEY WILL PUMP THE PRODUCT OUT OF THE SECONDARY CONTAINMENT. ESG IS EXPECTED TO BE ON SITE SHORTLY. 02/02/01: FG SPOKE TO DAVE MENDEL WITH THE ENVIRONMENTAL SERVICE GROUP. HE SAID BUFFALO GENERAL GENERATED 15 DRUMS OF DEBRIS, TWO OF THOSE ARE FUEL OIL RECOVERED, THE REST ARE PADS, BOOMS, SPEEDI DRY. ESG WILL BE HANDLING THE DISPOSAL OF THE MATERIAL AND WILL SEND ME A DISPOSAL RECEIPT. 02/27/01: FG RECEIVED DISPOSAL RECPT. NO FURTHER WORK IS REQUIRED. SITE CAN BE CLOSED."

<b>Site Class Desc:</b> This classification is assigned to a site that has been properly closed but that requires continued site management consisting of operation, maintenance and/or monitoring. Class 4 is appropriate for a site where remedial construction actions have been completed for all operable units, but the site has not necessarily been brought into compliance with standards, criteria, or guidance (e.g., a groundwater extraction and treatment system has been installed and is operating properly but groundwater standards have not been achieved yet). The Record of Decision should define the remedial action objectives that need to be achieved during site management. If a Certificate of Completion (CoC) is to be issued for a site, the CoC is issued concurrently with the reclassification.						
<b>Assess DOH:</b> This classification is assigned to a site that has been properly closed but that requires continued site management consisting of operation, maintenance and/or monitoring. Class 4 is appropriate for a site where remedial construction actions have been completed for all operable units, but the site has not necessarily been brought into compliance with standards, criteria, or guidance (e.g., a groundwater extraction and treatment system has been installed and is operating properly but groundwater standards have not been achieved yet). The Record of Decision should define the remedial action objectives that need to be achieved during site management. If a Certificate of Completion (CoC) is to be issued for a site, the CoC is issued concurrently with the reclassification.						
<b>Data Source:</b> Exposures via drinking water are not expected because homes in the area are served by public water and no known private wells exist in the immediate area. Direct contact exposure to site-related contaminants by community members is not expected because the remaining contaminants are located below a paved parking lot and public access to the site is restricted by security guards. A deed restriction is in place to control future digging on the site.						
<b>Description:</b>						

Location: The Osmose Wood Preserving site is an approximately 0.533-acre site located in a mixed commercial and residential area at 980 Ellicott Street in the City of Buffalo, Erie County. Site Features: The site contains multiple buildings and asphalt parking areas. Current Zoning and Land Use: This site is zoned for industrial manufacturing use and is currently unoccupied. Past Use of the Site: In 1989, underground storage tanks (USTs) at the site used for storage of creosote, No.2 Fuel Oil and other chemicals were found to be leaking. Soil surrounding the tanks was contaminated as a result. Site Geology and Hydrology: The site geology consists of approximately 60 feet of unconsolidated clay, silt, sand and gravel deposits, which is underlain by the Onondaga limestone bedrock. Fill mixed with silt and clay varies up to 5 feet below ground surface (fbgs), followed by low permeability silty clay from 7 to 12 fbgs. This is followed by highly permeable strata of sands and a mix of sands and gravel down to the bedrock. Depth to groundwater varies across the property and with the seasons. The groundwater at the site flows east toward Ellicott Street.

#### Assessment:

Remediation at the site is complete. Prior to remediation the primary contaminants of concern were polycyclic aromatic hydrocarbons (PAHs) and petroleum hydrocarbons in soil and groundwater. Remedial activities have successfully achieved soil cleanup objectives for commercial use. Residual contamination in soil and groundwater is being managed under a Site Management Plan.

Program (GIS):	HW	Site Class (GIS):	C
Site Class Desc (Web):	Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).		

Site Class Desc:  
 Assess DOH: Since the site is covered by asphalt or concrete, people will not come into contact with residual contamination in soil that remains along the sewer line or in groundwater unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling indicates soil vapor intrusion is not a concern.

Data Source:  
 Description:

Site Location: The Fourth Street MGP site is an approximately 6.92-acre site located in an urban area at 43 Carolina Street in the City of Buffalo, Erie County. The site is bounded by the Waterfront School and the National Fuel Gas Buffalo Service Station to the south, Fourth Street to the west, Pine Harbor Apartments to the east and athletic fields to the north. Lake Erie is about 1500 feet to the west and the I-190 Expressway is to the southwest. Site Features: Three water lines, a major sewer line and several other utility lines are located on the site. The National Fuel Gas property, located south of the site is also former Manufactured Gas Plant (MGP) site (see Site No. C915194). Current Zoning and Land use: The site is currently vacant and zoned for commercial use. Past Use of the Site: From 1870 to 1915 a manufactured gas plant operated at the site. The plant produced gas for heating and lighting by "heat-treating" coal and petroleum products. From 1934 to 1958 a portion of the property was used by the Greyhound Bus Company. Historical information and maps indicate that past businesses at the site utilized coal bins, sand piles, engine rooms and garages. The by-products from MGP operations included a dense, oily liquid known as coal tar, coke, ammonia and ash. Substantial amounts of coal tar typically escaped collection spilled or was disposed onto the land. Site Geology and Hydrogeology: Fill material is present over the entire site. The depth of fill varies from 4.5 to 14 feet and the fill consists of brick, cement, slag, coal, wood, silt, sand, and gravel. Below this fill material are sediment layers of glacial lake deposits consisting of clay, silt, gravel, and sand. Below the sediment layer is limestone bedrock which is found at an approximate depth of 22 feet below the ground surface. The general groundwater flow direction is towards Lake Erie, however, the hydrology on the south side of the school building is complex due to the building and the former Wilkeson Slip, one of several filled in boat slips connected to the Erie canal located at the property line of the school and National Fuel Gas. Groundwater was encountered between 4 to 6 feet below ground surface.

Assessment:  
 Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were benzene, toluene, xylenes, phenolic compounds and polycyclic aromatic hydrocarbons (PAHs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in soil and groundwater is being managed under a Site Management Plan.

### Detail(s)

#### **Description:**

Site Location: The 5-acre site is located on Fourth and Village Court streets in the City of Buffalo, NY. The site is bounded by the Waterfront School building and the National Fuel Gas Buffalo Service Station on the south, Fourth Street on the west, Pine Harbor Apartments on the east and athletic fields on the north. The site is located in a mixed residential, commercial, and recreational setting approximately 1500 feet east of the Lake Erie shoreline. The highway I-190 is located south west of the site immediately adjacent to Fourth Street. Site Features: Three water lines, over 100-year old major sewer line, and several other utility lines are located at the site. No drinking water wells are located in the vicinity of the site. It is noted that the National Fuel Gas property, located south of the site, is another former Manufactured Gas Plant site (see Site No. C915194). Current Zoning and Land use: The site is currently vacant and zoned as commercial. Past Use of the Site: From 1870 to approximately 1915 the Citizens Gas Works operated an MGP at the site property. This plant produced gas for heating and lighting by a(euro)(oe)heat-treatinga(euro) coal and petroleum products. From 1934 to 1958 a portion of the property was used by the Greyhound Bus Company. Historical information and maps indicate that historical businesses at the site contained coal bins, sand piles, engine rooms, garages, etc. The exact nature of the operation at the Citizens Gas Works is unknown, however, a typical MGP facility produced gas by either a carbonation or gasification process. The carbonation process heated coal in the absence of oxygen to produce primarily a methane and hydrogen gas mixture called coal gas. The gasification process infused steam through hot coal or coke, resulting in the formation of water gas, which consisted primarily of hydrogen and carbon dioxide. Water gas was often combined with a(euro)(oe)oil gasâ(euro) to increase its BTU content. The by-products from these operations included a dense, oily liquid known as a(euro)(oe)coal tarâ(euro) , coke, and ammonia. Large quantities of ash were also produced from the carbonation process. Substantial amounts of tar typically escaped collection and was spilled or disposed onto the land. It is believed that during demolition of the Citizens Gas Works facility, these wastes were covered with various fill materials. The site is currently owned by the Buffalo Urban Renewal Agency (BURA). The following remedial work was conducted at the site: 1991-1992 - The Buffalo Urban Renewal Agency (BURA) undertook an environmental assessment in preparation for a possible residential development. 1996 - NYSDOH conducted sampling of sump water and indoor air in the basement of the adjacent Waterfront School. 1996 - NYSDEC/NYSDOH sampled surface soils, subsurface soils, waste material and groundwater. Based upon the sampling that showed the presence of hazardous waste as defined in the 6NYCRR Part 371, the site was listed as a class 2 site in the Registry of Inactive Hazardous Waste Disposal Sites. 1998-2001 - BURA undertakes a remedial investigation and feasibility study (RI/FS) of the property. The RI/FS by the Buffalo Urban Renewal Agency was completed in 2001. A Record of Decision (ROD) was issued in 2001 requiring the removal of all contaminated tar materials from the site. The Remedial Action implemented by DEC consisted of source removal by excavation and off-site disposal and/or treatment began in 2005 and was completed in early 2006. The excavated areas were backfilled with clean fill and restored as a surface parking lot and driveways for the Waterfront School. At the request of the City of Buffalo the contaminated soil located adjacent and along the 100 year old sewer line was not removed because the excavation would cause damage to the sewer line. The deed restriction signed by the the City of Buffalo includes the restriction on any intrusive work along the sewer line in the future and groundwater restriction. Site Geology and Hydrogeology: In general, fill material is present over the entire site. The depth of fill varies from 4.5 to 14 feet. The fill consists of brick, cement, slag, coal, wood, silt, sand, and gravel. Below this fill material are sediment layers of glacial lake deposits consisting of clay, silt, gravel, and sand. Below the sediment layer is limestone bedrock which is found at an approximate depth of 22 feet below the ground surface. Precipitation onto the top of the land surfaces is collected by area sewers and is treated at the Buffalo Sewer Authority before being discharged into the Niagara River. In the site area, the general groundwater flow direction is towards Lake Erie, however, the hydrology on the south side of the school building is complex due to the building and the former Wilkeson Slip, one of the several boat slips connected to the Erie canal (which is completely filled in and is not visibly noticeable) located at the property line of the school and National Fuel Gas. The groundwater was encountered between 4 to 6 feet below ground surface.

#### **Assess ENV:**

Prior to Remediation: In 1992 the Buffalo Urban Renewal Agency (BURA), the current owner, planned to develop this property and contracted a site investigation. The investigation included the excavation of 29 test pits over the entire property, and installation of four monitoring wells. Black tar was found in one area of the property. Soil/tar and groundwater samples were tested during this phase of investigation. The soil/tar samples contained up to 3300 parts per million (ppm) or milligram per kilogram (mg/kg) of benzene, 3000 ppm of toluene, 2700 ppm of xylenes, 3000 ppm phenolic compounds,

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

and 53,000 ppm of PAHs. The well in the tar area exceeded groundwater standards for benzene, toluene, xylenes, PAHs, and phenolic compounds. In August 1996, NYSDEC/NYSDOH did additional testing. The results from this testing detected surface soil samples containing up to 420 ppm PAHs. The area where surficial contamination was found, was fenced-in by BURA. The tar material was found to be a hazardous waste as it failed TCLP for benzene. BTEX concentrations in groundwater samples ranged from non-detect to 1,987 parts per billion (ppb). Post Remediation: The remedial activities conducted in 2005-2006 at the site have removed all the hazardous waste and contaminated soil from the site. A small area of contaminated soil along the Swan Sewer line could not be excavated because of the structural concerns for the old brick sewer and is subject to an institutional control. The groundwater monitoring conducted for several years after the completion of remediation shows that the contamination in groundwater has declined significantly and has reached asymptotic levels. No further groundwater monitoring is required for the site.

### Assess DOH:

Since the site is covered by asphalt or concrete, people will not come into contact with residual contamination in soil that remains along the sewer line or in groundwater unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling indicates soil vapor intrusion is not a concern.

Describe the Site:

This is a former coal gas production site. Waste from the production facility was buried onsite. Based on investigations by the EPA (1992) and National Fuel, National Fuel developed a remedial plan, which was submitted to EPA. Upon approval by the EPA, National Fuel plans to implement the plan.

Describe the Threat:

The groundwater and soil are contaminated. The location of wells and water supply intakes is unknown.

#### Detail(s)

#### **Description:**

Location: This site is located at 249 West Genesee Street in Buffalo, Erie County. The site is located in an urban area, approximately 1,200 feet to the east of Lake Erie. Site Features: This site is comprised of two large office buildings, as well as paved and grassy areas. Current Zoning and Land Use: This site is currently zoned and used as a commercial office building. Past Use of the Site: This site was the location of a former Manufactured Gas Plant (MGP) which was operated by various companies from 1848 to 1948. The site was initially investigated by the owner - National Fuel Gas during the period 1989 to 2004. (Refer to Site #V00362). The investigation confirmed the presence of MGP wastes (containing benzene, toluene, ethylbenzene, xylenes, polycyclic aromatic hydrocarbons, total cyanides) in soil and groundwater at the site. In June 2005 a volunteer - Duke Realty - applied to the Brownfield Cleanup Program to remediate the site in preparation for building an office building. The site remediation consisted of excavation and off-site disposal of contaminated soils above the cleanup levels and backfilling with clean soil/material. Work began in Summer 2005 and was completed in early 2006. An environmental easement requiring a Site Management Plan was filed on September 7, 2006 in the Erie County Clerk's office. A Certificate of Completion was issued on November 30, 2006. The cleanup has resulted in the construction of an approximately 350,000 square foot HealthNow building by Duke Realty at the remediated site. Groundwater at the site is being monitored in accordance with the Site Management Plan, dated October 2, 2006. Site Geology and Hydrogeology: The site investigations prior to remedial action indicated that the Site was underlain by fill, soil, and bedrock. Groundwater was contained within the overburden materials at depths ranging from 2 to 8 feet below ground surface (bgs) as well as within fractures in the bedrock. Underlying the fill was a low-permeability alluvium unit comprised predominantly of fine sand to clayey silt throughout the majority of the Site. Nearly 75 percent of the site (by area) was excavated to bedrock completely removing all unconsolidated material from those areas. Bedrock was encountered below the alluvium at depths from 18 to 25 feet bgs. The first bedrock unit is dark gray fractured limestone. Groundwater was previously found between 2 to 8 feet bgs in the overburden materials. Groundwater elevation data from Site monitoring wells have suggested radial flow, away from the center of the Site with three major components of flow, one to the south, one to the east, and one to the north. The nature of the flow is more likely the result of anthropogenic influences; deep sewer lines to the north, south and east immediately adjacent to the property line and the buried Wilkeson slip to the north. However, the materials within the former slip were removed during the remedial activities conducted at the adjacent school site, low permeability fill was placed in the sewer and under the school, and therefore current and future groundwater movement across this area is

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

expected to vary from previous conditions.

#### Assess ENV:

Nature and Extent of Contamination: Prior to Remediation: Constituents identified in Site groundwater consisted primarily of BTEX and PAHs. Total BTEX concentrations ranged from 370 micrograms per liter (mcg/l) to 29,500 mcg/l. Total PAH concentrations in some wells ranged from 780 mcg/l to 14,500 mcg/l. Post Remediation: Currently, the groundwater is being monitored for BTEX and PAHs under the Site Management Plan, dated October 2, 2006. This property was impacted by the Former Buffalo Service Center. The site was remediated in 2005-06 and no longer poses a significant threat to the environment.

#### Assess DOH:

All contaminated soil and waste have been removed from the site. Groundwater beneath the site is contaminated, however, the area is served by public water so exposures via drinking water are not expected. Air samples taken within the Waterfront School in 1996 and 2002 did not detect site-related contaminants. A vapor intrusion mitigation system was installed in the Waterfront School.

<b>Acres:</b>	0.04	<b>Longitude:</b>	-78.883386

#### Detail(s)

#### Description:

Location: This site is a portion of the former Wilkeson Slip and consists of two operable units OU-2B and OU-2C. OU-2B is located within the former courtyard of the Waterfront School (north of the Former Buffalo Service Station site) and OU-2C is located beneath the southernmost section of the Waterfront School building (adjacent and contiguous to OU-2B). The site is located along the northern side of the Buffalo Service Station site (C915194). Site Features: A portion of the Waterfront School building covers the site. Current Zoning and Land Use: This site is currently zoned commercial and is part of the school. A large office building and parking ramp is located to the southeast. Past Use of the Site: This site was impacted by the wastes such as coal tar from the adjacent Former Buffalo Service Center (BSC). The BSC operated a manufactured gas plant from 1848 to 1948. The Waterfront School was built in 1970s. Site Geology and Hydrogeology: The site investigations indicated that the overburden at the site consisted of fill, sand, and silty clay. The bedrock was encountered at a depth 18 to 25 feet bgs. The slip was lined with timber on both sides. The groundwater flows towards the west.

#### Assess ENV:

Nature and Extent of Contamination [OU2B and OU2C]: Prior to Remediation: The Wilkeson Slip was contaminated with MGP related waste from the former Buffalo Service Station (C915194). The primary contaminants were BTEX, PAHs, and NAPL due to coal tar. The contamination was contained within the Slip. The concentrations of constituents of interest in fill and soil at the Site exceeded site specific action levels (SSALs). The concentrations for total BTEX in groundwater ranged from 370 to 29,500 ppb and for PAHs the concentrations ranged from 780 to 14,500 ppb. Interim Remedial Measure (IRM): In 2005, the contaminated soils were excavated to meet the SSALs or to the bedrock. The excavated areas were backfilled with flowable fill, clay, or other acceptable materials. Post Remediation: Remedial actions performed during IRM have successfully achieved soil cleanup objectives for commercial use. Currently only one groundwater monitoring well (MW-9) at the site is being monitored under the Site Management Plan for Former Buffalo Service Station (C915194). The concrete slab in the crawl space in the Waterfront School and the vapor mitigation system in the School are inspected annually under the 2014 OM&M Plan.

#### Assess DOH:

All contaminated soil and waste have been removed from the site. Groundwater beneath the site is contaminated, however, the area is served by public water so exposures via drinking water are not expected. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Measures are in place to control the potential inhalation of site contamination due to soil vapor intrusion for the on-site buildings.

**Nominated by:**

**Describe the Site:** The site was used for disposal of foundry sand with phenolic binders from Worthington Corp., along with incinerator ash.

**Describe the Threat:**

The potential for direct contact exposure to nearby residents and park users to soils contaminated with PAH's, PCB's, and several heavy metals exists. Restrictions to prohibit the future residential use of this is necessary.

#### **Caller Remark:**

"from boom truck. over the sewer. leads to Buffalo River. applied some absorbent, but not enough."

#### **DEC Remark:**

"10/17/21 FG spoke to Mike Nosbisch with the NFTA. He requested the Department's response to the scene. He said that Ferguson was on site doing work for the NFTA and a piece of equipment failed and a spill of 5 gal happened. Mr. Nosbisch is concerned that the cleanup completed by Ferguson is adequate and he is concerned that the release impacted the Buffalo River. FG site inspection. Ferguson was on site and had completed the cleanup. There was a stain on the road where the spill happened. No hydraulic oil made it to the storm sewer. Ferguson bagged up the speedi dry into a few bags which will be placed in the regular waste stream. No further action is possible. The site is closed."

**Caller Remark:**

"AST tank test failure. Product in containment dike. 2 to 3 inches. Slow leak. Call Preston to get on site"

**DEC Remark:**

"PBS # 9-088668 tank #33 failed. 3000 gallon AST #2 fuel oil. 05/10/19 CMM site investigation. Arrived on site, met with Preston, and visually inspected AST #33. Tank has slow leak somewhere underneath and the containment dike has several inches of product collecting. Containment dike appears to be intact and product has no routes to escape. The dike is mostly covered and should not capture much rainwater. Preston has put in work order for vac truck to remove product from tank and dike. Product removed from tank will be reused and product from dike will be disposed of properly. Preston will advise me when that work is being completed and provide me with disposal receipts. Communicated with PBS that Brian Foti will be in charge of submitting paper work for tank replacement. 05/13/19 CMM email from Preston Monkelban. Preston stated that product was transferred from tank #33 to tank #39 and to a 1000 gallon rental tank that arrived on site. No product remains in tank #33, however there is still several inches of product in containment that needs to be disposed of properly. Advised Preston to complete disposal as soon as possible. Work order has been submitted for new tank. Will check back when further work has been completed. 05/29/19 CMM received phone call from Preston. He stated that containment dike is being pumped out and waste is being disposed of properly. Will receive disposal receipts. 07/10/19 CMM email from Brian Foti. Drums picked up during regular waste run. No further action. Spill closed. "

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

### Standard Environmental Record Sources

#### Federal

##### Formerly Utilized Sites Remedial Action Program:

DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

**Government Publication Date:** Mar 4, 2017

##### National Priority List:

NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date:** May 25, 2022

##### National Priority List - Proposed:

PROPOSED NPL

Sites proposed - by the EPA, the state agency, or concerned citizens - for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date:** May 25, 2022

##### Deleted NPL:

DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date:** May 25, 2022

**SEMS List 8R Active Site Inventory:**

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date: Jun 30, 2022**

**Inventory of Open Dumps, June 1985:**

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date: Jun 1985**

**SEMS List 8R Archive Sites:**

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date: Jun 30, 2022**

**Comprehensive Environmental Response, Compensation and Liability Information System -**

CERCLIS

**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date: Oct 25, 2013**

**EPA Report on the Status of Open Dumps on Indian Lands:**

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date: Dec 31, 1998**

**CERCLIS - No Further Remedial Action Planned:**

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date: Oct 25, 2013**

**CERCLIS Liens:**

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

**Government Publication Date: Jan 30, 2014**

**RCRA CORRACTS-Corrective Action:**

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date: Jun 27, 2022**

**RCRA non-CORRACTS TSD Facilities:**[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date: Jun 27, 2022**

**RCRA Generator List:**[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Jun 27, 2022**

**RCRA Small Quantity Generators List:**[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Jun 27, 2022**

**RCRA Very Small Quantity Generators List:**[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date: Jun 27, 2022**

**RCRA Non-Generators:**[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Jun 27, 2022**

**RCRA Sites with Controls:**[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

**Government Publication Date: Jun 27, 2022**

**Federal Engineering Controls-ECs:**[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: May 25, 2022**

**Federal Institutional Controls- ICs:**[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date: May 25, 2022**

**Land Use Control Information System:**

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

**Government Publication Date:** Sep 1, 2006

**Institutional Control Boundaries at NPL sites:**

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

**Government Publication Date:** May 25, 2022

**Emergency Response Notification System:**

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1982-1986

**Emergency Response Notification System:**

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1987-1989

**Emergency Response Notification System:**

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

**Government Publication Date:** Jun 5, 2022

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date:** Aug 20, 2021

**FEMA Underground Storage Tank Listing:**

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date:** Dec 31, 2017

**Facility Response Plan:**

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date:** Dec 31, 2021

**Delisted Facility Response Plans:**

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date:** Dec 31, 2021

**Historical Gas Stations:****HIST GAS STATIONS**

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

**Government Publication Date:** Jul 1, 1930

**Petroleum Refineries:****REFN**

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date:** Feb 4, 2022

**Petroleum Product and Crude Oil Rail Terminals:****BULK TERMINAL**

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

**Government Publication Date:** Feb 4, 2022

**LIEN on Property:****SEMS LIEN**

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date:** Jun 30, 2022

**Superfund Decision Documents:****SUPERFUND ROD**

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date:** May 3, 2022

**State****Registry of Inactive Hazardous Waste Disposal Sites in New York State:****SHWS**

State-and tribal- equivalent CERCLIS. State Superfund Program (Inactive Hazardous Waste Disposal Site Remedial Program) (IHWDS) - Oversees the identification, investigation and cleanup of sites where consequential amounts of hazardous waste exist. These sites go through a process of investigation, evaluation, cleanup and monitoring that has several distinct stages. This list is made available by New York State Department of Environmental Conservation's State Superfund Program.

**Government Publication Date:** Jun 1, 2022

**Delisted Registry of Inactive Hazardous Waste Disposal Sites in New York:****DELISTED SHWS**

This database contains a Registry of Inactive Hazardous Waste Disposal sites which have been removed from New York Department of Environmental Conservation's Environmental Site Remediation database.

**Government Publication Date:** Jun 1, 2022

**Hazardous Substance Waste Disposal Sites:****HSWDS**

A list of sites included in Hazardous Substance Waste Disposal Site Study reports made available by the New York Department of Environmental Conservation Division of Hazardous Waste Remediation. Provides information regarding the evolving status of hazardous substance waste disposal sites in New York.

**Government Publication Date:** Oct 24, 2003

**Vapor Intrusion Legacy Site List:****VAPOR**

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion. This list is made available by Department of Environmental Conservation's Vapor Intrusion Legacy Site List. This database is state equivalent CERCLIS.

**Government Publication Date:** Dec 31, 2018

**Solid Waste Facilities and Landfills:**

SWF/LF

Solid Waste Information Management System (SWIMS) is an inventory containing active and inactive facilities throughout the state. This list is made available by Department of Environmental Conservation's Solid Waste Information Management System (SWIMS).

**Government Publication Date:** Dec 22, 2021

**Inactive Landfill Facilities:**

LANDFILL INACTIVE

List of inactive landfills in the State of New York. This data is made available by the New York State Department of Environmental Conservation (DEC). DEC notes that these are preliminary data and should not be regarded as a complete inventory of all landfills in the State, and also that site locations and attributes are preliminary and should not be relied upon without independent verification.

**Government Publication Date:** Nov 1, 2021

**Waste Tire Facilities:**

WASTE TIRE

This list of active Waste Tire Facilities is maintained by the New York State Department of Environmental Conservation. Waste tire storage facilities (WTSF) store waste tires or portions of waste tires. Most of these facilities require Part 360 permits, but under certain conditions a registration maybe available.

**Government Publication Date:** Apr 7, 2022

**Recycling Facilities:**

RECYCLING

The Department of Environmental Conservation (DEC), Division of Materials Management (DMM), Bureau of Permitting and Planning regulates solid waste management facilities in accordance with 6 NYCRR Part 360. Information pertaining to those facilities is maintained with the Division's Solid Waste Information Management System (SWIMS) database. The Facility List is a dataset related to solid waste management facilities operating in the state, and includes such information as facility location, contact names and associated information, waste types managed, and regulatory information.

**Government Publication Date:** Apr 7, 2022

**Leaking Storage Tanks:**

LST

This database contains records of chemical and petroleum spill incidents. They include leaking aboveground storage tanks or leaking underground storage tanks, with incidents of tank test failures, tank failures and tank overfill. This list is made available by New York State Department of Environmental Conservation's Spill Response Program.

**Government Publication Date:** Jun 16, 2022

**Delisted Leaking Storage Tanks:**

DELISTED LST

List of Leaking Storage Tank sites which has been removed from New York Department of Environmental Conservation's Spill Response Program

**Government Publication Date:** Jun 16, 2022

**Underground Storage Tanks- UST-Petroleum Bulk Storage (PBS):**

UST

Facilities within the Petroleum Bulk Storage (PBS) that have underground storage tanks. Underground petroleum storage facilities with a combined storage capacity over eleven hundred (1,100) gallons. This list is made available by New York Department of Environmental Conservation's Environmental Site Database Search.

**Government Publication Date:** Aug 22, 2022

**The Bulk Storage Program Database - AST:**

AST

Facilities within the Petroleum Bulk Storage (PBS) that have aboveground storage tanks. Aboveground petroleum storage facilities with a combined storage capacity over eleven hundred (1,100) gallons. This list is made available by New York State Department of Environmental conservation's Petroleum Bulk Storage (PBS) program.

**Government Publication Date:** Aug 22, 2022

**Petroleum Bulk Storage:**

TANKS

The Bulk Storage Program Database maintains the registrations of active and inactive bulk storage sites statewide. This database includes Petroleum Bulk Storage (PBS) tanks where no information is available on whether they are ASTs or USTs. This list is made available by Department of Environmental Conservation's Petroleum Bulk Storage (PBS) program.

**Government Publication Date:** Aug 22, 2022

**Major Oil Storage Facilities (MOSF):**

MOSF

In 1977, the New York State Legislature passed the "Oil Spill Prevention, Control and Compensation Act" (Article 12 of the Navigation Law). This law regulates all oil terminals and transport vessels operating in the waters of the State which have a storage capacity of 400,000 gallons or more. (Terminals and vessels with a capacity of 400,000 gallons or more are commonly referred to as major oil storage facilities or MOSFs). This list is made available by Department of Environmental Conservation's Major Oil Storage Facility (MOSF) Program.

**Government Publication Date:** Aug 22, 2022

**Chemical Bulk Storage (CBS):**

CBS

Facilities that store regulated hazardous substances in underground tanks. "Hazardous substance" means any substance listed as hazardous or acutely hazardous in 6 NYCRR Part 597 or a mixture thereof. This list is made available by Department of Environmental Conservation's Chemical Bulk Storage (CBS) Program.

**Government Publication Date:** Aug 22, 2022

**Delisted Storage Tanks:**

DELISTED TANKS

List of Storage Tank sites which has been removed from New York Department of Environmental Conservation's Environmental Site Database.

**Government Publication Date:** Aug 22, 2022

**Delisted County Records:**

DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

**Government Publication Date:** Jul 19, 2022

**Registry of Engineering Controls in New York State:**

ENG

Registry of Engineering Controls in New York State taken from the Environmental Site Remediation Database.

**Government Publication Date:** Jun 1, 2022

**Registry of Institutional Controls in New York State:**

INST

Registry of Institutional Controls in New York State taken from the Environmental Site Remediation Database.

**Government Publication Date:** Jun 1, 2022

**Voluntary Cleanup Agreements:**

VCP

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites. This list is made available by Department of Environmental Conservation's Voluntary Cleanup Program.

**Government Publication Date:** Jun 1, 2022

**Environmental Restoration Program Listing:**

ERP

Environmental Restoration Program - Provides municipalities with financial assistance for site investigation and remediation at eligible brownfield sites. In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (Bond Act). Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. This list is made available by Department of Environmental Conservation's Environmental Restoration Program.

**Government Publication Date:** Jun 1, 2022

**Brownfields Site List (Subset of Site Remediation):**

BROWNFIELDS

Brownfield Cleanup Program was developed to enhance private-sector cleanups of brownfields and to reduce development pressure on "Greenfields". A Brownfield site is real property, the redevelopment or reuse of which may be complicated by the presence or potential presence of a contaminant. Contaminants include hazardous waste and/or petroleum. This list is made available by Department of Environmental Conservation's Brownfield Cleanup Program.

**Government Publication Date:** Jun 1, 2022

**Tribal****Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands:**

INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 2, which includes New York and New Jersey. There are no LUST records in New York at this time.

**Government Publication Date:** Jan 28, 2016

**Underground Storage Tanks (USTs) on Indian Lands:**

INDIAN UST

USTs on Tribal/Indian Lands in Region 2, which includes New York and New Jersey.

**Government Publication Date:** Apr 04, 2016

**Delisted Tribal Leaking Storage Tanks:**

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

**Government Publication Date:** Apr 20, 2022

**Delisted Tribal Underground Storage Tanks:**

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

**Government Publication Date:** Apr 20, 2022

**County**

**No County databases were selected to be included in the search.**

**Additional Environmental Record Sources****Federal****Facility Registry Service/Facility Index:**

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

**Government Publication Date:** Nov 2, 2020

**Toxics Release Inventory (TRI) Program:**

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

**Government Publication Date:** Aug 24, 2021

**Perfluorinated Alkyl Substances (PFAS) Releases:**

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

**Government Publication Date:** Aug 24, 2021

**PFOA/PFOS Contaminated Sites:**

PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

**Government Publication Date:** Jul 18, 2022

**Perfluorinated Alkyl Substances (PFAS) Water Quality:**

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

**Government Publication Date:** Jul 20, 2020

**SSEHRI PFAS Contamination Sites:**

PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

**National Response Center PFAS Spills:**

ERNS PFAS

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

**Hazardous Materials Information Reporting System:**

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

**National Clandestine Drug Labs:**

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Apr 30, 2022

**Toxic Substances Control Act:**

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

**Hist TSCA:**

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

**FTTS Administrative Case Listing:**

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

**FTTS Inspection Case Listing:**

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

**Potentially Responsible Parties List:**

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: May 25, 2022

**State Coalition for Remediation of Drycleaners Listing:**

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

**Government Publication Date: Nov 08, 2017**

#### **Integrated Compliance Information System (ICIS):**

**ICIS**

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

**Government Publication Date: Apr 30, 2022**

#### **Drycleaner Facilities:**

**FED DRYCLEANERS**

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

**Government Publication Date: Jun 25, 2022**

#### **Delisted Drycleaner Facilities:**

**DELISTED FED DRY**

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

**Government Publication Date: Jun 25, 2022**

#### **Formerly Used Defense Sites:**

**FUDS**

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

**Government Publication Date: May 26, 2021**

#### **Former Military Nike Missile Sites:**

**FORMER NIKE**

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

**Government Publication Date: Dec 2, 1984**

#### **PHMSA Pipeline Safety Flagged Incidents:**

**PIPELINE INCIDENT**

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

**Government Publication Date: Jul 7, 2020**

#### **Material Licensing Tracking System (MLTS):**

**MLTS**

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Government Publication Date: May 11, 2021**

#### **Historic Material Licensing Tracking System (MLTS) sites:**

**HIST MLTS**

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

**Government Publication Date: Jan 31, 2010**

#### **Mines Master Index File:**

**MINES**

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

**Surface Mining Control and Reclamation Act Sites:**

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Feb 22, 2022

**Mineral Resource Data System:**

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

**Uranium Mill Tailings Radiation Control Act Sites:**

URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

**Alternative Fueling Stations:**

ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Aug 1, 2022

**Superfunds Consent Decrees:**

CONSENT DECREES

A list of Superfund consent decrees made available by the Department of Justice, Environment & Natural Resources Division (ENRD).

Government Publication Date: May 18, 2022

**Air Facility System:**

AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

**Registered Pesticide Establishments:**

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

**Polychlorinated Biphenyl (PCB) Transformers:**

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

**Polychlorinated Biphenyl (PCB) Notifiers:**

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

**Government Publication Date: Jul 28, 2022**

## **State**

### **Underground Injection Control Wells:**

[UIC](#)

A well permit is required from the Division of Mineral Resources for any brine disposal well deeper than 500 feet. This includes any operation to drill, deepen, plug back or convert a well. Regardless of well depth, the NYSDEC Division of Water must be contacted for a determination of whether a SPDES permit is necessary to operate any brine disposal well.

**Government Publication Date: Aug 6, 2018**

### **Manufactured Gas Plants:**

[MGP](#)

A list of former Manufactured Gas Plants (MGP) made available by the New York Department of Environmental Conservation (NYSDEC). From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel. Former MGP structures such as gas holders, tar separators, wells, and tanks were often susceptible to spills and leaks. As a result, these structures were a significant source of contamination from the release of tar and other toxic by-products.

**Government Publication Date: Oct 16, 2019**

### **Spill Incidents Database:**

[NY SPILLS](#)

Spill Incidents Database has records dating back to 1978. This database contains records of chemical and petroleum spill incidents. The DEC Spill Response program receives and compiles reports of hazardous material spills occurring anywhere in New York State. These reports are submitted through the Spill Hotline and other mechanisms, and entered by DEC spill response staff into the state's official data base of Spill Incidents Reports. This list is made available by New York State Department of Environmental Conservation's Spill Response Program.

**Government Publication Date: Jun 16, 2022**

### **PFAS Remedial Sites:**

[PFAS CONTAM](#)

List of sites being addressed under one of the New York Department of Environmental Conservation (DEC) Division of Environmental Remediation (DER)'s remedial programs, where the waste or contaminant of concern is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

**Government Publication Date: Jun 1, 2022**

### **Per- and Polyfluoroalkyl Substances (PFAS):**

[PFAS](#)

A list of sites surveyed by the New York Department of Environmental Conservation to determine locations that manufacture, use, store, or release into the environment materials containing Per- and Polyfluoroalkyl Substances (PFAS). Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Some PFAS are difficult to break down and persist in the environment that may cause harm to the public. This list is made available by the Department of Environmental Conservation of New York State.

**Government Publication Date: Jan 16, 2019**

### **Landfill Investigations PFAS Sampling Results:**

[PFAS LANDFILL](#)

A list of inactive landfill sites that have been investigated for Per- and Polyfluoroalkyl Substances (PFAS) in the state of New York made available by the New York State Department of Environmental Conservation.

**Government Publication Date: Jun 30, 2020**

### **Registered Dry Cleaner Facilities:**

[DRYCLEANERS](#)

The Division of Air Resources of the Department of Environmental Conservation (DEC) tracks all registered dry cleaner facilities.

**Government Publication Date: Aug 11, 2022**

### **Delisted Dry Cleaner Facilities:**

[DELISTED DRYCLEANERS](#)

Sites removed from the list of dry cleaner facilities registered with the Department of Environmental Conservation (DEC)'s Division of Air Resources.

**Government Publication Date: Aug 11, 2022**

### **Hazardous Waste Manifest - Facilities:**

[NY MANIFEST](#)

List of facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), with which no manifests are associated. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records.

**Government Publication Date: Jun 23, 2022**

**Receivers from Hazardous Waste Manifests:**

**REC MANIFEST**

List of receiver facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), which are identified as a receiver in associated manifests. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records. Hazardous Waste Code Descriptions are from NY Part 371.4 (6 CRR-NY 371.4) Identification and Listings of Hazardous Waste, unless otherwise noted.

**Government Publication Date: Jun 23, 2022**

**Generators from Hazardous Waste Manifests:**

**GEN MANIFEST**

List of generator facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), which are identified as a generator in associated manifests. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records. Hazardous Waste Code Descriptions are from NY Part 371.4 (6 CRR-NY 371.4) Identification and Listings of Hazardous Waste, unless otherwise noted.

**Government Publication Date: Jun 23, 2022**

**New York City E-Designated Sites:**

**E DESIGNATION**

A list of sites with an (E) Designation, described as a New York City (NYC) zoning map designation that indicates the presence of an environmental requirement pertaining to potential hazardous materials contamination, window/wall noise attenuation, or air quality impacts on a particular tax lot. The NYC Office of Environmental Remediation administers the E-Designation Environmental Review Program to avoid significant adverse impacts to human health or the environment through exposure to these hazards. The data is provided by the NYC Department of City Planning (DCP).

**Government Publication Date: Jul 1, 2022**

**Registered Cooling Towers:**

**COOLING TOWERS**

Locations of cooling towers registered with New York State, made available by the Center for Environmental Health. In August 2015, the New York State Department of Health released emergency regulations requiring the owners of cooling towers to register them with New York State. These data are self-reported by owners and/or property managers of cooling towers in service in New York State.

**Government Publication Date: Aug 2, 2022**

**Tier 2 Report:**

**TIER 2**

A list of Tier 2 facilities in the state of New York. This is a list of facilities which have reported hazardous substances provided by Homeland Security and Emergency Services.

**Government Publication Date: Mar 24, 2022**

**NY DEC Projects of Interest:**

**PROJECTS**

A list of permits for notable projects - permit applications that have received a lot of public attention - made available by the New York Department of Environmental Conservation (DEC).

**Government Publication Date: Nov 26, 2021**

**Air Permitted Facilities:**

**AIR PERMITS**

This list of issued state facility air permits is maintained by the New York State Department of Environmental Conservation. Owners or operators of emission sources that are subject to 6 NYCRR Subpart 201-5 must obtain a State facility permit. Draft permits are official versions of permits whose initial development is complete, public notice given, and made available for public review and comment. These permits are prepared by the Division of Air Resources regional staff of the New York Department of Environmental Conservation. Please note: An Issued permit is valid for a stated period of time. Modifications may be made to an issued permit for the remainder of the active permit.

**Government Publication Date: Dec 22, 2021**

**Liens Listing:**

**LIEN**

New York Environmental Protection and Spill Compensation Fund (Oil Spill Fund) places liens on properties that are sites of oil spills when the owners are responsible parties and fail to pay for cleanup. The Office of the State Comptroller provides this listing of liens information from the Oil Spill Fund.

**Government Publication Date: Oct 5, 2021**

**Tribal**

*No Tribal additional environmental record sources available for this State.*

**County**

*No County additional environmental record sources available for this State.*

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

# Qualifications

## ALLISON LEET

### Environmental Analyst

Allison is an Environmental Analyst working with the Due Diligence Program of Labella's Environmental Division. Ms. Leet is responsible for preparing Phase I Environmental Site Assessments (ESAs) and Transaction Screen ESAs technical reports, and completing other environmental due diligence reports.

#### **BE3 Corp. 19 Doat St Lead Clearances – Buffalo, NY**

Allison oversaw the lead clearance action at 19 Doat St in Buffalo, NY. She communicated effectively between the Lead Project Manager and the client, BE3 Corp., to relay passes and failures, and then to reschedule testing. She then compiled raw lead dust wipe data into a user-friendly report.

#### **Edgemere Development Rochester Housing Hazardous Materials Inspection Report – Rochester, NY**

Allison completed a 300+ page Hazardous Waste Materials Survey for Edgemere Development of four separate Rochester Housing Authority properties consisting of roughly 25 units each. The survey report consisted of asbestos, lead dust wipes, visual mold, universal waste, lead in water and radon findings. Completion of this inspection report strengthened Allison's knowledge of hazardous waste and their regulatory standards.

#### **Walnut Creek Middle School Mold Report – Fairview, PA**

Allison coordinated site visits to a Pennsylvania middle school for mold air and spore trap sampling of ten representative classrooms,

supported the mold inspector with pre-survey documents, assigned remediation recommendations and communicated the results to the client.

#### **Douglas Development Elmwood/ Bidwell Redevelopment Project – Buffalo, NY**

Allison assisted Douglas Development in the closeout of their environmental documentation for the Elmwood/Bidwell Redevelopment Project by providing asbestos clearance letters and asbestos air monitoring reports for 7 properties in the Buffalo area. She closely monitored the progress of the project and provided closeout documents in a timely manner while working closely with the project monitor.

#### **Belmont Housing Resources of WNY True Bethel Commons Housing and Community Renewal Tank Closure Project – Niagara Falls, NY**

This Housing and Community Renewal Project was supported by Allison's tank closure report as a closeout document for the project. She worked with ACS, Inc. to collect soil samples surrounding the tank, photos, an accurate map and produce a client-friendly report dictating closure of the tank.

**Town of Amherst Air Monitoring  
and Mold Inspection Contracts -  
Amherst, NY**

Ms. Leet prepared two two-year contracts with the Town of Amherst, NY for asbestos air monitoring and mold inspection. She solidified contact with the Town, wrote each proposal, and developed definitive relationships with her client, as well as developed the professional skills of RFP development and client relations.

**Phase I ESAs**

Allison has conducted numerous Environmental Site Assessments. Site assessments include evaluation of environmental liability associated with properties such as commercial properties, undeveloped land, natural gas regulator stations, and residential homes. Allison provides efficient analysis and has completed environmental assessments for the following groups:

- Lake Shore Savings Bank
- Chemung Canal Trust  
Company
- Timber Huron Properties
- M&T Bank
- OYA Solar

## MARY BETH FACKLAM

### Phase I ESA Technical Reviewer

Mary Beth is currently a Technical Reviewer for LaBella's Phase I Environmental Due Diligence department and is involved with the overall quality assurance/quality control of Phase I Environment Site Assessments (ESAs), Transactions Screens, and Records Search with Risk Assessment (RSRA) due diligence reports. Her duties include conducting senior reviews of due diligence reports, assisting the Phase I Program Manager with the oversight, training, and professional development of analysts, and working with clients to understand environmental issues.

#### PG

Professional Geologist, NY

#### EDUCATION

University of Rochester:  
Geology, Anthropology, BA

University of Buffalo: Science  
Education, MS

#### CERTIFICATIONS/ ORGANIZATIONS

Buffalo Association of  
Professional Geologists

NYS Council of Professional  
Geologists

### Environmental Due Diligence

Mary Beth has extensive experience in the Geology/Environment fields, including work on geotechnical, subsurface, and ESA investigations. She has conducted or overseen thousands of ESA projects across the country for banks, developers, and other users. In previous roles, Mary Beth developed a Due Diligence Department and oversaw the training and development of site inspectors and analysts.

Mary Beth is a member of ASTM and has worked on committees regarding the update of standards.

### Phase I ESAs

Mary Beth has conducted numerous Phase I ESAs and Transaction Screens on various properties including industrial, gasoline station, automotive dealerships, automotive repair facilities, dry cleaners, office buildings, retail structures, apartment buildings, and hospitals. These reports were completed for financial institutions, developers, attorneys, municipalities, and private individuals. Some of these projects included:

#### Former Foundry, Buffalo, NY

Prior to a pending real estate transaction, Mary Beth oversaw the completion of a Phase I ESA which identified environmental concerns related to historical operations and use of hazardous substances and petroleum products.

#### Commercial Plaza, Cheektowaga, NY

Prior to a property sale, Mary Beth oversaw the completion of a Phase I ESA on a property that included former automotive repair and dry cleaning operations. An evaluation was made regarding use of dry cleaning solvents and automotive fluids and the potential for an adverse impact to the property.

#### Automotive Dealership Portfolio – Jamestown, NY

In conjunction with a property refinance, Mary Beth oversaw the completion of Phase I ESAs for a commercial lender on a suite of automotive dealerships. The portfolio was evaluated based on the site inspection, historical research, regulatory records, and a review of previous investigation reports in order to determine the overall environmental risk relative to the pending transaction.

## Previous Reports

No Previous Environmental Reports were reviewed through the course of this assessment.
