### What is the Brownfield Cleanup Program?

New York's Brownfield Cleanup Program (BCP) is designed to encourage private-sector cleanups of brownfields and to promote their redevelopment as a means to revitalize economically blighted communities. The BCP is an alternative to "greenfield" (land not previously developed or contaminated) development and is intended to remove some of the barriers to, and provide tax incentives for, the redevelopment of brownfields. Since its inception (2003), the BCP has catalyzed the cleanup of more than 550 contaminated sites statewide and incentivized redevelopment. There are more than 650 active sites in the BCP.

Additional information on the State's Brownfield program is available at DEC's website: <https://nydecprod.prod.acquia-sites.com/environmental-protection/site-cleanup/brownfield-and-state-superfund-programs/brownfield>.
