#### **EXECUTIVE SUMMARY**

Ravi Engineering & Land Surveying, P.C. (RE&LS) performed this Phase I Environmental Site Assessment (ESA) in general accordance with the scope and limitations of ASTM E1527-21 and the November 1, 2005 United States Environmental Protection Agency (USEPA) regulations for "Conducting All Appropriate Inquiries" (CAAI), for Wendel WD Architecture, Engineering, Surveying & Landscape Architecture, P.C (Wendel) and Buffalo Urban Development Corporation (BUDC). Assignment of this document can be made only with the written permission of RE&LS.

#### Site Description

The subject site is an approximately 2.63-acre parcel on the south side of Northland Avenue in the City of Buffalo, New York (the "Site"). It is developed with an approximately 40,768 square foot (sq. ft.) building of block and brick construction, built in 1953. It is improved with an approximately 24,000 sq. ft. asphalt parking lot to the east, and an approximately 13,800 sq. ft. concrete paved lot to the west of the Site building. The Site is owned by BUDC.

The Site was reportedly developed in 1953 in association with the Niagara Machine & Tool metal fabricating plant historically located on the eastern adjacent property at 683 Northland Avenue. It operated as a metal fabricating plant under the name Clearing Niagara, and has been vacant since operations ceased in 1992. Notable features of the building includes furnaces for metal fabricating machinery has been removed from the Site building. Historic use of the Site for manufacturing is a recognized environmental conditions (RECs).

The Site inspection (reconnaissance) conducted on February 1, 2024 also identified several RECs in connection with the Site. Several drums, oil staining on the wood block flooring, an apparent manhole with a welded cover, an aboveground storage tank (AST) (contents unknown), at least one floor drain, and a sump were observed in the subject building.

A review of available historic documentation, including Sanborn maps, aerial photographs, and street directories indicates that the Site and adjacent properties were historically utilized for manufacturing of machinery and sheet metal, household and automotive polish, liquid and cement, electric control panels, and/or printed circuit boards.

### Phase II ESA; 631, 683, 741, and 777 Northland Avenue (Fisher Associates, September 2015)

RE&LS reviewed Fisher's Phase II ESA conducted in 2015. The results of this Phase II ESA indicate that soil contamination near the south end of the Site building and southeastern portion of the Site exceed NYCRR Part 375-6.8 Commercial and Industrial Use Soil Cleanup Objectives (SCOs) for semi-volatile organic compounds (SVOCs) and metals. Polychlorinated biphenyls (PCBs) were detected in samples collected from the wood block flooring.

#### Adjacent Properties Descriptions

A review of historical documentation and regulatory databases has identified two adjacent properties of concern.

#### Vibratech, Inc. Site (formerly Houdaille Industries)

This facility is located on the northern adjacent property at 537 East Delvan Avenue, and was historically used for industrial purposes dating back to 1927. It is identified on the Superfund Enterprise Management System (SEMS), State Hazardous Waste Sites (SHWS), and Vapor Reopened databases. Operations included degreaser use and storage with several 10,000 to 12,000-gallon underground storage tanks (USTs) and ASTs, and an open hole bedrock well that was potentially used for disposal. Contaminants of concern at this property include petroleum products, and chlorinated volatile organic compounds (cVOCs), including trichloroethane (TCE).

#### Western NY Workforce Training Center

This facility is located on the eastern adjacent property addressed as 665 & 683 Northland Avenue, and is identified on the New York (NY) Brownfields database. The property was historically used as a machine and tool works facility beginning in 1911, and used hydraulic, electrical, and industrial equipment that led to the contamination of the property. The contamination included SVOCs, PCBs, and metals in soil, and TCE in soil vapor. Hydraulic oil was also identified in the bedrock.

Remedial actions have successfully achieved SCOs for Commercial use. However, residual contamination remains in soil, bedrock, and soil vapor. The property is being managed under a Site Management Plan (SMP). As the use of the property is restricted by the SMP, the residual contamination is considered a controlled recognized environmental condition (CREC) as defined in Section 1.1 of this report. Soil, groundwater and soil vapor at the Site have the potential to be adversely impacted from historic operations at this property.

#### **Business Environmental Risks**

RE&LS conducted a Hazardous Materials Inspection of the Site building to identify the presence of asbestos containing materials (ACM), lead-based paint (LBP), and materials containing PCBs. The findings of the Hazardous Materials Survey will be submitted under separate cover.

#### **Conclusion**

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice El527-21 of the subject property at 631 Northland Avenue in the City of Buffalo, New York. Any exceptions to, or deletions from, this practice are described in Section 11 of this report. This assessment has revealed <u>no</u> RECs, CRECs, or significant data gaps in connection with the Site **except for the following:** 

- 1. Historic usage of the Site for metal fabricating, and the potential for releases of cutting oils, hydraulic oils, other petroleum products, and degreasing agents
- 2. Analytical data from a 2015 Phase II ESA investigation identifying hazardous concentrations of SVOCs in soil
- 3. Floor drains, a sump, and an apparent manhole with a welded cover in the Site building, and the potential for improper disposal of degreasers and other contaminants
- 4. A railroad spur on the Site, and the potential for petroleum and chemical spills during the transfer of shipments

2 PRIVILEGED AND CONFIDENTIAL

- 5. The potential for petroleum releases in association with the AST, and the potential for unidentified orphan USTs to be present on the Site
- 6. The potential for groundwater and soil vapor impacts at the Site from historic industrial uses of the adjacent properties, specifically in association with the CREC on the eastern adjacent property and the former Houdaille Industries property on the northern adjacent property.

#### Additional Investigation and Recommendations

Based on this Phase I ESA, additional investigation is warranted. We recommend performing a Phase II ESA/Site Characterization Investigation to evaluate the extent of contamination identified in Fisher's Phase II ESA, and the presence of unidentified contamination at the Site.

#### **1.0 INTRODUCTION**

#### 1.1 <u>Purpose</u>

The purpose of the Phase I ESA is to perform an "All Appropriate Inquiry" (AAI) into the previous ownership and uses of the property as defined in Title 42 of the United States Code (USC), Section 9601(35)(B).

The Phase I ESA is performed to characterize the Site with respect to RECs in connection with the property, including the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and petroleum products.

A Recognized Environmental Condition (REC) is defined by ASTM E1527-21 as the presence or likely presence of *hazardous substances* or *petroleum products* on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the property or into the ground, groundwater, or surface water of the property, even under conditions that are in compliance with the laws.

A Historical Recognized Environmental Condition (HREC) is defined by ASTM E1527-21 as A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been address to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority without subjecting the property to any required controls (e.g. property use restriction, AULS, institutional controls, or engineering controls), at the time the Phase I ESA is conducted (e.g. if there has been a change in the regulatory criteria).

A Controlled Recognized Environmental Condition (CREC) is defined by ASTM E1527-21 as A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The term REC is not intended to include de minimis conditions that generally do not present a threat to public health or the environment, and that would not be the subject of an enforcement action if brought to the attention of the appropriate regulatory agencies.

#### 1.2 <u>Scope of Services</u>

The scope of the Phase I ESA is limited to a review of the following sources of information.

- A) A review of permits, reports, and other records to identify:
  - past and on-going releases of possible environmental contaminants (i.e., hazardous and non-hazardous materials);
  - proximity to sensitive receptors;
  - past and current aboveground storage tanks (ASTs) and underground storage tanks (USTs) including location, size, age, construction material and contents;
  - hazardous materials/hazardous waste management, storage and disposal practices;
  - industrial wastewater discharge practices;
  - elevated radon levels of potential concern; and
  - other information as required by ASTM E1527-21 and EPA 40 CFR Part 312.
- B) Historic Sanborn Maps, aerial photographs, and street directories which may reflect prior uses of the subject property and which are reasonably obtainable through state or local government agencies.
- C) Reasonably obtainable federal, state, and local government records of: listed hazardous/solid waste sites, spill reports, underground and bulk storage tank facilities, hazardous waste treatment, storage and disposal (TSD) handler and generator records and recorded environmental complaints as provided by Environmental Data Resources, Inc. (EDR).
- D) A visual Site reconnaissance of the subject property and all facilities and improvements on the subject property. The Site reconnaissance will include a visual inspection, interviews of the owner, knowledgeable personnel, and such other persons as required by ASTM E1527-21 and EPA 40 CFR Part 312.

E) To augment that information, Freedom of Information Law (FOIL) requests were sent to the New York State Department of Environmental Conservation (NYSDEC), Erie County, and the City of Buffalo for information relative to the Site.

#### 1.3 <u>Significant Assumptions</u>

This report is prepared with <u>no</u> significant assumptions. RE&LS reserves the right to revise this report based upon any pertinent information concerning the subject property that may be forthcoming from these agencies.

#### 1.4 Limitations and Exceptions

Wendel WD Architecture, Engineering, Surveying & Landscape Architecture, P.C (Wendel) retained RE&LS to perform this work per the Notice to Proceed dated January 26, 2024.

RE&LS represents only that it provides services in accordance with generally accepted practices. No other representation, expressed or implied, is included or intended as part of its services, proposals, contracts or reports.

RE&LS cannot provide guarantees, certifications or warranties that the property is or is not free of environmental impairment without a Phase II Environmental Site Assessments investigation involving collection and laboratory analysis of environmental samples. Even with such a program, the data and samples from any given soil boring or monitoring well will indicate conditions that apply only at that particular location, and such conditions may not necessarily apply to the general Site as a whole.

#### 1.5 Special Terms and Conditions

RE&LS has performed this work in general accordance with the ASTM E1527-21 Standard Practice for ESAs, the November 1, 2005 USEPA regulations for CAAI.

#### 1.6 <u>User Reliance</u>

This report is prepared exclusively for Wendel and BUDC. This report is not for the use of, nor may it be relied upon by any other person or entity, for any purpose without the advance written consent of RE&LS.

#### 2.0 SITE DESCRIPTION

#### 2.1 Location and Legal Description

The Site is developed with a vacant warehouse on an approximately 2.63-acre parcel on the south side of Northland Avenue in the City of Buffalo, New York. It is owned by BUDC, and is currently used for storage of construction building materials.

The Site is listed as City of Buffalo tax identification number 101.21-5-1.21.

RE&LS was not provided with a legal description of the subject Site when this Phase I ESA was prepared.

#### 2.2 <u>Site and Vicinity General Characteristics</u>

The Site is developed with a vacant warehouse that was historically used as a metal fabrication facility. It is surrounded by a mix of industrial, commercial, and residential properties.

#### 2.3 Descriptions of Structures, Roads, Other Improvements on the Site

The Site is developed with an approximately 40,768 sq. ft. building of block and brick construction, built in 1953. It is improved with an approximately 24,000 sq. ft. asphalt parking lot to the east, and an approximately 13,800 sq. ft. concrete paved lot to the west of the subject building. A CSX railroad corridor bounds the Site to the south.

#### 2.4 <u>Geologic, hydro geologic, hydrologic and topographic conditions of the property;</u> <u>and of the surrounding area</u>

Bedrock beneath the Site is composed of a Middle Devonian stratified sequence. Surficial deposits are mapped as "urban land." Based on surficial topography, the regional groundwater flow direction beneath the Site is presumed to be towards Lake Erie to the southwest.

#### 2.5 <u>Current and Historic Uses of the Site</u>

The Site was reportedly developed in 1953 in association with the Niagara Machine & Tool metal fabricating plant historically located on the eastern adjacent property at 683 Northland Avenue. It was operated under the name Clearing Niagara until approximately 1992, and is currently vacant.

#### 2.6 <u>Current Uses of the Adjacent Properties</u>

Uses of the adjacent properties includes the following:

North:	Parking lot		
Northeast	Vacant lot/power transfer station		
East	Northland Central complex including ReTech Systems, Northland Workforce Training Center, Buffalo Manufacturing Works, Rodriguez Construction Group, Alfred State College, Insyte Consulting, Garwood Medical Devices, Bank on Buffalo, SUNY Erie, NY Power Authority, and SparkCharge (683 Northland Avenue)		
South	CSX, Inc. railroad corridor		
West	Vacant commercial building (597 Northland Avenue)		
Northwest	Vacant manufacturing building (612 Northland Avenue)		

#### 3.0 USER PROVIDED INFORMATION

A User Questionnaire was completed by BUDC Representative, Angelo Rhodes II. The completed questionnaire is included in Appendix 3.

#### 3.1 <u>Title Records</u>

RE&LS reviewed Stewart Title Insurance Company Policy No. O-8911-000680022 for 644, 664, 631, 688, 690, 698 and 741 Northland Avenue, and 126 and 128 Dutton Street in the City of Buffalo, New York. Based on our review of the title report, no environmental liens or activity and use limitations, per Section 6.2 of ASTM E1527-21, were identified as being recorded against the Site.

#### 3.2 Environmental Liens or Activity and Use Limitations

Mr. Rhodes stated that there are <u>no</u> liens or activity and use limitations due to environmental conditions relative to the Site (Appendix 3).

#### 3.3 Specialized Knowledge

Mr. Rhodes stated that the Site was historically used as a machine and tool works facility.

#### 3.4 Valuation Reduction for Environmental Issues

Mr. Rhodes stated that the Site was purchased by BUDC as is.

#### 3.5 Commonly Known or Reasonably Ascertainable Information

Mr. Rhodes referred to a previous Phase I and II ESAs completed by Fisher Associates in 2015 (refer to Section 5.8.5).

#### 3.6 Degree of Obviousness of the Presence of Contamination

Mr. Rhodes stated that the potential for contamination exists due to the Site's relationship with the other properties located nearby where contamination was previously identified.

#### 3.7 <u>Reason for Performing Phase I Environmental Site Assessment</u>

This Phase I ESA was performed to update a Phase I ESA performed in 2015.

#### 4.0 SITE RECONNAISSANCE

Lynn Zicari and Whitney McAlpin of RE&LS conducted the Site reconnaissance on February 1, 2024 to identify potential RECs associated with the subject property.

#### 4.1 <u>Methodology and Limiting Conditions</u>

The Site reconnaissance was performed by conducting a Site walkover of the building exterior and perimeter, and a walk-through of the Site building interior. An assessment of structural conditions and hazardous materials was conducted under a separate scope of work.

All areas within the Site building were accessed during the Site reconnaissance; however, snow cover on the eastern and southern parking lots, and storage of building materials within the subject building limited observations of floor and ground surfaces. In addition, RE&LS was not able to enter a blast furnace on the west side of the building exterior; a hatch opening allowed a limited visual inspection that indicated that the furnace was empty.

RE&LS was limited to the degree of accuracy of information provided by the EDR database report, readily available historic information, and information obtained by Site contacts and local and state agencies.

#### 4.2 **Observations**

#### 4.2.1 Source of potable water on the property

The Site is serviced by municipal water.

#### 4.2.2 Sewage disposal system on the property (type and age)

The Site is serviced by the municipal sewer system.

### 4.2.3 Any wastewater (including stormwater) discharges into a drain, ditch or stream on the property and on adjacent property

Storm drains were observed on the northern portion of the Site and in the parking lot on the eastern portion of the Site. They reportedly discharge to the public sewer system.

### 4.2.4 Sources of any noxious odors, any pools of liquid, or any standing surface water on the subject property or adjacent properties

At the time of the Site inspection, petroleum odors were observed throughout the Site building.

## 4.2.5 All drains and any pits, cisterns, cesspools or similar receptacles where liquids drain, collect or are stored (e.g., sumps) on the subject property or adjacent properties

A floor drain, a large sump and floor pit with standing water, and an apparent manhole with a welded cover were observed in the Site building. The floor drain and sump reportedly discharge to the public sewer system. No information regarding the construction or discharge location of the manhole structure could be obtained.

# 4.2.6 Pits, ponds and lagoons (open pools) likely to contain hazardous substance or petroleum products, particularly if used in connection with waste disposal or waste treatment on the subject property and on adjacent properties)

A sand pit located in the northwestern corner of the Site building was observed covered by pallets of building materials, therefore no observations could be made regarding the appearance of the contents of the pit.

### 4.2.7 Current and past uses likely to indicate or known to have resulted in RECs on the property or adjacent properties

The Site is developed with a large industrial building that features furnaces for metal fabrication, a sandblaster, several overhead cranes, and a railroad spur. Several drums were also observed in the building.

The northern and eastern adjacent properties currently are utilized as parking lots. A large chimney stack was observed on the northern adjacent property addressed as 537 Delvan Avenue, and appears to be all that is left of the historical industrial building on that property. The western and northwestern adjacent properties are developed with vacant industrial buildings.

### 4.2.8 Current and past uses of the subject property and adjacent properties involving petroleum products and/or hazardous materials

With the exception of the overhead cranes, most of the historic metal fabricating machinery has been removed from the Site building. Oil staining from cutting oils and leaky machinery was observed on the wood block flooring. An AST (contents unknown) was noted at the western perimeter of the building exterior.

### 4.2.9 All ASTs and USTs, including contents, capacity and age. Identify visible vent pipes; fill pipes, and access ways

An AST was noted on the western exterior of the Site building. No ASTs or USTs were noted on any of the adjacent properties at the time of the Site inspection. However, regulatory records include an AST and USTs historically located on the eastern adjacent property (refer to Section 5.2).

### 4.2.10 Contents of any drums and other containers on the subject property or adjacent properties

Several 55-gallon drums were found throughout the subject property. Five drums inside the Site building contained a material that appeared to be soil. One of the drums was labeled "Boiler Water Treatment".

### 4.2.11 Any dry wells, irrigation wells, injection wells, abandoned wells, monitoring wells, supply wells, or other wells

Three groundwater monitoring wells were observed in the parking lot on the eastern and southeastern portions of the Site. One of the wells was installed in conjunction with a Phase II ESA performed in 2015 by Fisher Associates (refer to Section 5.8.5). No information was obtained for the other two wells as of the date of this report.

### 4.2.12 Electrical or hydraulic equipment likely to contain polychlorinated biphenyls (PCBs)

Historical use of the Site as a metal-fabricating facility, and the presence of cranes within the building indicate usage of cutting, lubricating and hydraulic oils, and the potential for leaks and spills. Based on the construction date of the Site building, and the 1979 ban on the production of PCB-containing products in the United States, these oils potentially contained PCBs.

A pad-mounted transformer was observed in the parking lot adjacent to the Northland Avenue right-of-way. No leaks, stains, or spills were observed in the vicinity of the transformer. However, the transformer oil may also contain PCBs. The transformer is owned by Niagara Mohawk Power Corporation. As the owner of the transformer, it is responsible for the proper operation, maintenance, repair and disposal of the transformer and its contents. If a spill occurs, it is responsible for remediation of the spill.

#### 4.2.13 Stained soil or pavement

None observed

#### 4.2.14 Stressed vegetation

None observed

#### 4.2.15 Any solid waste disposal on Site

Miscellaneous solid waste including oil-covered wood block flooring, fire brick, construction and demolition debris, and miscellaneous solid waste was observed on the interior and exterior of the Site.

#### 4.2.16 Any unnatural grading or fill of unknown origin

None observed

### 4.2.17 The type of heating, ventilation, and air conditioning (HVAC) system and fuel source

The Site building is not currently heated. It was reportedly historically heated with steam generated from boilers located at 683 Northland Avenue.

#### 4.2.18 Any stains or corrosion on floors, walls or ceilings

The floor in the Site building is constructed of wood blocks overlying concrete. The wood blocks appeared to be stained from cutting oils, hydraulic oils, and/or other petroleum products.

#### 5.0 **RECORDS REVIEW**

RE&LS obtained the EDR Radius Map Report dated January 30, 2024 using the ASTM-specified search distances relative to the Site (Appendix 5).

#### 5.1 <u>Federal Government Records</u>

#### **National Priorities List (NPL)**

There are no NPL facilities identified within 1.0 mile of the Site.

#### **Delisted NPL**

There are no Delisted NPL facilities identified within 1.0 mile of the Site.

#### Superfund Enterprise Management System (SEMS)

There are two (2) SEMS facilities identified within 0.5 mile of the Site. One of these facilities is identified as *Vibratech* at 537 East Delvan Avenue, located on the northern adjacent property. Based on distance and elevation, as well as the historical use of this facility for manufacturing, this facility is of potential concern relative to the Site.

#### **SEMS-Archive**

There is one (1) SEMS-Archive facility identified within 0.5 mile of the Site. An archived facility is one at which USEPA has determined that assessment has been completed and no further remedial action is planned. It does not appear to be of environmental concern relative to the Site.

#### **Corrective Actions (CORRACTS)**

There is one (1) CORRACTS facility identified within 1.0 mile of the Site. Based on the distance from the Site, it is not likely that this facility will have an adverse environmental impact on the Site.

#### <u>Resource Conservation and Recovery Act Information System–Transporters,</u> <u>Storage and Disposal Facilities (RCRA - TSDF)</u>

There are no RCRA-TSDF identified within 0.5 mile of the Site.

#### <u>RCRA – Large Quantity Generator (LQG), Small Quantity Generator (SQG), Very</u> <u>Small Quantity Generator (VSQG), and Non-Generators (Non-Gen)</u>

There are no RCRA-listed LQG, SQG, or VSQG facilities identified on the Site or the adjacent properties.

There are three (3) RCRA-listed Non-Gen facilities identified on the eastern and northwestern adjacent properties. These facilities are required to provide information concerning their activities to state environmental agencies, which in turn provide the information to regional and national USEPA offices. These facilities are not identified on the EPA corrective action list, or NYSDEC spills list. It is not expected that activities at these facilities will have an adverse environmental impact upon the Site.

#### Federal Institutional Control/Engineering Control (IC/EC) Sites

The Site is not identified on the IC/EC database.

#### **Emergency Response Notification System (ERNS)**

The Site is not identified on the ERNS database.

#### 5.2 <u>State Government Records</u>

#### State Hazardous Waste Sites (SHWS)

There are seven SHWS within 1.0 mile of the Site. A review of the location and distance of these SHWS indicates that one facility, *Vibratech, Inc*. (formerly *Houdaille Industries*), located at 537 East Delavan Street, has the potential to negatively impact groundwater and indoor air at the Site. *Vibratech, Inc*. is located on the northern adjacent property, and was historically used for industrial purposes dating back to 1927. Operations included degreaser use and storage with several 10,000 gallon or greater USTs and ASTs, and an open hole bedrock well that was potentially used for disposal. Contaminants of concern at this facility include petroleum products, and TCE and other cVOCs.

#### Solid Waste Facilities/Landfills (SWF/LF)

A search of SWF/LF within 0.5 mile identified three (3) facilities that are >0.2 mile the Site. Based on distance and the apparent groundwater flow direction, it is not likely that either of these facilities will have an adverse environmental impact on the Site.

#### Leaking Storage Tanks (LTANKS)

There are twenty-two (22) LTANK within 0.5 mile of the Site. Based on distance and/or the apparent groundwater flow direction, it is not likely that any of them will have an adverse environmental impact on the Site.

#### <u>Registered Petroleum Bulk Storage (PBS) including Aboveground Storage Tanks</u> (AST) and Underground Storage Tanks (UST)

Western NY Workforce Training Center, located at the eastern adjacent property addressed as 683 Northland Avenue, is identified in the PBS database. The listing includes one (1) closed-removed 6,000 gallon AST, and nine (9) closed-removed USTs ranging between 1,000 and 23,380 gallons. Based on the closed-removed status of the tanks, and the lack of NYDEC spills associated with the property, it is not likely that these tanks will have an adverse environmental impact on the Site.

#### State Institutional Control/Engineering Control (IC/EC)

The Site is <u>not</u> identified on the NYS IC/EC registry.

#### Voluntary Cleanup Program (VCP)

There are <u>no</u> VCP facilities within 0.5 mile of the Site.

#### NY Brownfields

There are four (4) NY Brownfields within 0.5 mile of the Site. One (1) facility, *Western NY Workforce Training Center*, is located on the eastern adjacent property addressed as 665 & 683 Northland Avenue. The property was historically used as a machine and tool works facility beginning in 1911, and used hydraulic, electrical, and industrial equipment that led to the contamination of the property. The contamination included SVOCs, PCBs, and metals in the soil, and TCE in soil vapor. Hydraulic oil was also identified in bedrock.

Remedial actions have successfully achieved SCOs for Commercial use. However, residual contamination remains in soil, bedrock, and soil vapor, and the property is being managed under a SMP. As the use of the property is restricted by the SMP, the residual contamination is considered a CREC as defined in Section 1.1 of this report. Soil, groundwater and soil vapor at the Site have the potential to be adversely impacted from historic operations at this property.

#### **Environmental Restoration Program (ERP)**

There is one (1) ERP facility identified within 0.5 mile of the Site. Based on distance and elevation, it is not likely that this property will have an adverse environmental impact on the Site.

#### 5.3 Additional Environmental Record Sources

#### **US Brownfields**

There is one (1) US Brownfield within 0.5 mile of the Site. Based on distance and elevation, it is not likely that this property will have an adverse environmental impact on the Site.

#### SW Tire

There is one (1) SW Tire facility within 0.5 mile of the Site. Based on distance, it is not likely that this property will have an adverse environmental impact on the Site.

#### **NYSDEC Spills**

There are five (5) NYSDEC Spills within 0.125 mile of the Site. All have been closed by the NYSDEC with no further action required. Two (2) of the spills occurred on adjacent properties:

- Spill No. 1402816 was reported at 601 Northland Avenue, the western adjacent property, after approximately twelve (12) 55-gallon burnt and bulging drums were observed in the location of a former commercial building. The drums were found to be empty or containing water. They were removed from the property, and the spill was closed by the NYSDEC with no further action required.
- Spill No. 9601211 was reported at 602 Northland Avenue, the northwestern adjacent property, after it was reported that a hose from a powder coating line was discharging to a catch basin. The property was inspected, and the hose was found under the sewer grate. No additional information was available. The spill was closed by the NYSDEC.

Based on the information provided, it is not likely that these spills will have an adverse environmental impact on the Site.

#### Formerly Used Defense Sites (FUDS)

There are three (3) FUDS within 0.5 mile of the Site. Based on distance, it is not likely that these facilities will have an adverse environmental impact on the Site.

#### Formerly Utilized Sites Remedial Action Program (FUSRAP)

There is one (1) FUSRAP facility identified within 0.5 mile of the Site. Based on distance and elevation, it is not likely that this property will have an adverse environmental impact on the Site.

### <u>PFAS (Per- and Polyfluoroalkyl Substances) ECHO (Enforcement and Compliance History Online)</u>

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. The United States Environmental Protection Agency (EPA) has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

According to EDR, there are two (2) PFAS ECHO facilities within 0.5 mile of the Site. One (1) of these facilities is located at 711 Northland Avenue, approximately 0.14 mile east of the Site.

#### NYS CERCLIS Equivalent Sites (HSWDS)

There is one (1) HSWDS within 0.5 mile of the Site. Based on the distance from the Site, it is not likely that this property will have an adverse environmental impact on the Site.

#### NY Manifest/Manifest

There are sixteen (16) NY Manifest facilities within 0.5 mile of the Site. Three Manifest listings are associated with the Site and/or adjacent properties, and are included here to document historic use of contaminants that could potentially impact the Site:

Clearing Niagara, addressed as 637-697 Northland Avenue, is listed in the Manifest database as EPA ID NYD002101442. EDR identifies this as the Site. However, according to the City of Buffalo Assessor, the Site has been addressed as 631 Northland Avenue since it was first developed. Operations reportedly ceased at the Site in 1992, and several of the Manifest documents are dated after 1992. This listing appears to be associated with the eastern adjacent property. The following materials were reportedly generated:

- 1989: 217 pounds of ignitable wastes
- 1991: 172 pounds of ignitable wastes, and 172 pounds tetrachloroethylene
- 1992: 172 pounds of ignitable wastes
- 1993: 31 gallons of ignitable wastes
- 1995: 840 pounds of spent halogenated wastes including xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexane, and methanol
- 1998: 1,050 pounds spent halogenated wastes
- 2001: 5,000 pounds and 110 gallons of ignitable wastes, and 12,500 pounds of spent halogenated

683 Northland Avenue, is located on the eastern adjacent property. This property, identified as EPA ID NYR000232587, generated 35,776 kilograms of PCB wastes including contaminated soil, solids, sludges, clothing, rags and dredge material in 2017 that was transported off-site to a landfill for disposal.

15 PRIVILEGED AND CONFIDENTIAL Buffalo Powder Coating, addressed as Northland Avenue, is located on the northwestern adjacent property. This property, identified as EPA ID NYR0000563684, generated 4,800 pounds of cadmium between 1994 and 1995 that was transported off-site to a landfill for disposal.

#### PA Manifest

There are two (2) PA Manifest facilities within 0.5 mile of the Site. Based on the distance from the Site, is not likely that these facilities will have an adverse environmental impact on the Site.

#### Vapor Reopened

There is one (1) Vapor Reopened facility located on the northern adjacent property, addressed as 537 East Delavan Avenue. Based on the proximity of this property to the Site, there is the potential that soil vapor beneath the Site has been adversely impacted from historic use of this property.

#### 5.5 <u>Orphan Sites</u>

The following orphan sites were identified by EDR:

- 664-690 Northland Avenue is identified on the NY SHWS, and is located at 664, 688 and 690 Northland Avenue, approximately 160 feet to the northeast of the Site.
- OTIS Elevator is identified on the NY SHWS, and is located at Grider Street, at least 0.3 mile to the east of the Site.
- NYS Thruway Exit 52 is identified on the NY SHWS, and is located at Exit 52 (Walden Avenue) Interchange, approximately 3.5 miles to the southeast of the Site.
- CMS Associates, Inc. is identified on the NY Vapor Reopened, and is located at 210 French Road, approximately 5.7 miles to the southeast of the Site.

Based on the distance from the Site, the orphan site addressed as 664-690 Northland Avenue is of potential environmental concern relative to the Site.

#### 5.7 <u>Physical Setting Source(s)</u>

EDR references the current USGS 7.5 Minute Topographic Map (Appendix 5). Based on the surficial topography, the regional groundwater flow direction beneath the Site is presumed to be toward Lake Erie to the southwest. Bedrock beneath the Site is composed of a Middle Devonian stratified sequence, and surficial deposits are mapped as urban land.

#### 5.8 <u>Historic Use Information on the Site and the Adjacent Properties</u>

#### 5.8.1 Sanborn Maps

Year	Site	Adjacent Property Description
	Description	
1900	Unmapped	North – Unmapped Northeast - Unmapped East – Unmapped South – Railroad tracks West – C.H. Hosmer & Co. (grease, oil & bicycle sundries manufacturing) Northwest - Unmapped
1917	Undeveloped	North – Undeveloped Northeast – Residential dwellings East – Niagara Machine & Tool Works (sheet metal work machinery manufacturing) South – Railroad tracks West – Geo. A. Hosmer & The Buffalo Specialty (grease, oil & bicycle sundries manufacturing) Northwest – Residential dwelling
1939	Undeveloped	North – Boiler house with a fuel oil tank approximately 300 feet from the Site Northeast – Residential dwellings East – Niagara Machine & Tool Works (sheet metal work machinery manufacturing) South – Railroad tracks West – Liquid Veneer Corporation (household & automotive polish, liquid and cement manufacturing) Northwest – Heat treating building
1950	Undeveloped	North – Boiler house and pump house with a fuel oil tank and four 12,000-gallon oil tanks approximately 300 feet from the Site Northeast – Residential dwellings East – Niagara Machine & Tool Works (sheet metal work machinery manufacturing) South – Railroad tracks West – Houde Engineering Corporation Northwest – Heat treating building
1986	Developed with the current Site building, and labeled as a "factory building"	North – Boiler house and pump house with a fuel oil tank and four 12,000-gallon oil tanks approximately 300 feet from the Site Northeast – Switch house and transfer yard East – Niagara Machine & Tool Works (sheet metal work machinery manufacturing) South – Railroad tracks West – Houde Engineering Corporation Northwest – Heat treating building

Year	Site Description	Adjacent Property Description

#### 5.8.2 Aerial Photographs

#### 5.8.3 Street Directories

Street directories indicate that the Site was occupied by the following:

Year	Address	Occupant
1925-1992	637 and 643	Niagara Machine & Tool Works (Metal Fabricating
	Northland Avenue	Plant)

The adjacent properties were used for residential, commercial, and industrial purposes from 1925 until 2013, and included the following occupants of concern:

#### Northern adjacent property

Year	Address	Occupant
1975-1992	684 Northland Avenue	Niagara Machine & Tool Works parking lot

Eastern adjacent property

Year	Address	Occupant
1930-2001	681 Northland Avenue	Niagara Machine & Tool Works parking lot
1930-2001		Niagara Machine & Tool Works
2001	683 Northland Avenue	Clearing Niagara
2008-2013		Sweeney Steel Service Corporation
1964-1992	685 Northland Avenue	Niagara Machine & Tool Works parking lot
1950-1964	697 Northland Avenue	Niagara Machine & Tool Works

#### Western adjacent property

Year	Address Occupant		
1964		Sevens Frederick - division of Udylite Corporation	
1970	597 Northland	Stevens Durez - division of Hooker Chemical Foundry	
	Avenue	Materials	
1930-1940		Liquid Veneer Corporation (factory)	
1946-1955		Houde Engineering Corporation (warehouse)	
1960	601 Northland	Houdaille Industries Inc. (warehouse)	
1980-1985	Avenue	Neu-Lec Controls Inc. (maker of electric control panels)	
1992-2001		Service Manufacturing Group Incorporated (tri-electric	
		printed circuit boards/sheet metal work)	

Northwest adjacent property

Year	Address	Occupant
1935-1955	608 Northland Avenue	Houdi Engineering Corporation

#### 5.8.4 FOIL Responses

FOIL requests were sent to the NYSDEC, Erie County, and the City of Buffalo for information relative to the Site; however, no responses have been received as of the date of this report submission.

FOIL requests are provided in Appendix 6.

#### 5.8.5 Other Historic Sources

### Phase I ESA; Northland Avenue Properties, 631, 683, 741, and 777 Northland Avenue (Fisher Associates, October 2014, Revised January 2015)

RE&LS reviewed a Phase I ESA prepared by Fisher in 2014 for the Empire State Development Corporation. Fisher's Phase I ESA was conducted for the Site and\_three adjacent parcels, addressed as 683, 741 and 777 Northland Avenue. 683 Northland Avenue is referred to as the eastern adjacent property in this report. The report was prepared to evaluate whether current or historical activities on or near the subject property may have resulted in significant impacts by hazardous substances or petroleum products.

In their Phase I ESA, Fisher stated that the Site was formerly used as a machine and tool works facility. They observed an approximately 1,000-gallon AST on the western exterior of the Site building, and additional tanks were suspected to be present. Petroleum-based products and hazardous materials were observed on Site at the time of the reconnaissance.

Several RECs were identified in connection with the Northland Avenue Properties.

- There was potential for at least three (3) USTs of unknown size and contents to be present at the Site.
- One (1) approximately 1,000-gallon AST was observed on the western exterior of the Site building.
- Numerous 55-gallon drums containing xylene, antifreeze, hydraulic oil, motor oil, used oil and other contents were observed.
- The floors in the Site buildings are constructed of wooden block overlying concrete. The wooden blocks are stained from cutting oils, hydraulic oils, grease, and other possible petroleum products.
- Multiple piles of debris inside and outside of the Site building
- A Phase II ESA completed by Leader Professional Services, Inc. (Leader) in 2005 for the northeastern adjacent property, addressed as 644 Northland Avenue, and the eastern adjacent property, addressed as 683 Northland Avenue indicated that exceedances of NYSDEC SCOs from on-site sources were detected in subsurface samples and pit water samples.

Based on their findings, Fisher recommended performing a Phase II ESA to determine the extent of the contamination present at these properties.

### Phase II ESA; 631, 683, 741, and 777 Northland Avenue (Fisher Associates, September 2015)

The Phase II ESA was performed in May and June 2015 to address the RECs discussed above. Soil samples were collected across the four parcels, including 631 Northland Avenue. Samples of surface liquids and solids were collected from wood block flooring, the sand pit, the furnace pit, and the sump within the 631 Northland Avenue building. A groundwater sample was collected from a monitoring well (MW-1) installed at the southeastern corner of 631 Northland Avenue.

The results of the Phase II ESA indicate detections of metals and PCBs within the wood block flooring and sand pit. Soil borings near the south end of the Site building and southeastern portion of the Site had detections of SVOCs and metals in exceedance of the NYCRR Part 375-6 Commercial and Industrial Use SCOs.

Groundwater limitations for TCE and other cVOCs were exceeded in samples collected from monitor wells installed on the eastern adjacent properties; however, these analytes were not detected in on-site monitoring well, MW-1.

#### 5.8.6 Data Failure

FOIL responses from the NYSDEC, Erie County, and the City of Buffalo have not been received as of the date of this report. However, RE&LS does not consider this to be significant due to the historic use information obtained from the available historical documentation and from Fisher's Phase I and Phase II ESAs. It is not likely that additional information that may be forthcoming from these agencies would change the conclusions or opinions of this report.

The lack of FOIL responses is not considered to be a significant data gap. RE&LS reserves the right to revise this report based upon any pertinent information concerning the subject property that may be forthcoming from these agencies.

#### 6.0 INTERVIEWS

#### 6.1 Interview with Angelo Rhodes, BUDC Representative

According to Mr. Rhodes, the Site building was constructed in 1953 in association with the Niagara Machine & Tool metal fabricating plant located on the eastern adjacent property at 683 Northland Avenue, and was operated under the name Clearing Niagara. BUDC purchased the Site in 2014. He has no knowledge of any environmental liens or activity and use limitations at the Site. He had no information regarding the contents of the AST, the floor drain and sump discharge locations, or the contents of the abandoned drums inside the Site building.

#### 6.2 Interview with Property Manager/Broker, Tom Mancuso

According to Mr. Mancuso, the Site has been vacant since the metal fabricating operations ceased in 1992. He stated that the Site building was heated with steam generated from boilers located at 683 Northland Avenue. He had no information regarding the contents of the AST, floor drain and sump discharge locations, or the contents of the abandoned drums inside the Site building.

#### 6.3 <u>Interviews with Occupants</u>

N/A

#### 6.4 Interviews with Local Government Officials

RE&LS interviewed the City of Buffalo Chief Plumbing Inspector, Keith Ogden, regarding the floor drains and catch basins on the Site. He stated that, based on the age of the building, floor drains, sumps and catch basins discharge to the public sewer system.

#### 6.5 Interviews with Others

None

#### 7.0 BUSINESS ENVIRONMENTAL RISKS (BER)

**A Business Environmental Risk (BER)** is defined by ASTM E1527-21 as A risk which can have a material environmental or environmentally-driven impact on the business associated with the current planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

ASTM E1527-21 states that the following BERs are "non-scope considerations that persons may want to assess in connection with commercial real estate." This list of non-scope considerations is not intended to be all-inclusive.

#### 7.1 <u>Radon</u>

Radon, a naturally occurring, odorless, colorless, radioactive gas, is found throughout the country. Prolonged exposure to elevated indoor radon levels has been associated with increased risks of lung cancer.

NYSDOH conducted a basement radon survey across New York State. According to the results provided in the EDR Radius Map Report, an average level of 1.18 picocuries per liter of radon (pCi/L) was measured in the City of Buffalo. The USEPA has determined an annual average exposure of 4.0 pCi/L as a guidance level for corrective action.

Based on the above, radon does not appear to be of concern in the Site area. The actual indoor radon level can only be determined through sampling and analysis, not included in the scope of this Phase I ESA.

#### 7.2 <u>Hazardous Materials Inspection</u>

RE&LS conducted a Hazardous Materials Inspection of the Site building to identify the presence of ACM, LBP, and materials containing PCBs. The findings of the Hazardous Materials Survey will be submitted under separate cover.

#### 7.3 <u>Wetlands</u>

There are no mapped New York State (NYS) freshwater wetlands or National Wetland Inventory (NWI) wetlands on or adjacent to the Site.

#### 8.0 FINDINGS AND OPINIONS

The Site was reportedly developed in 1953 in association with the Niagara Machine & Tool plant located on the eastern adjacent property at 683 Northland Avenue. It was operated as a metal fabricating plant under the name Clearing Niagara, and has been vacant since operations ceased in 1992.

#### Site Reconnaissance Findings

During the Site inspection conducted on February 1, 2024, the Site building was observed to be a large, vacant industrial building used for storing construction building materials. Notable features of the building include furnaces for metal fabrication, a sandblaster, several overhead cranes, and a railroad spur. Historic use of the Site for manufacturing dating back to 1950 is a REC.

The Site reconnaissance identified numerous RECs in connections with the Site. Several drums, oil staining on the wood block flooring, an apparent manhole with a welded cover, an AST (contents unknown), at least one (1) floor drain, and a sump were observed in the Site building.

#### Historical Documentation and Records Review Findings

A review of available historic documentation, including Sanborn maps, aerial photographs, and street directories indicate that the Site and adjacent properties were historically utilized for manufacturing of machinery and sheet metal, household and automotive polish, liquid and cement, electric control panels, and/or printed circuit boards. Several adjacent properties of concern were identified.

#### Vibratech, Inc. Site (formerly Houdaille Industries)

This facility is located on the northern adjacent property at 537 East Delvan Avenue, and was historically used for manufacturing dating back to 1927. It is identified on the SEMS, SHWS, and Vapor Reopened databases. Operations included degreaser use and storage with several 10,000 to 12,000-gallon USTs and ASTs, and an open hole bedrock well that was potentially used for disposal. Contaminants of concern at this facility include petroleum products, and TCE and other cVOCs.

#### Western NY Workforce Training Center

This facility is located on the eastern adjacent property addressed as 665 & 683 Northland Avenue, and is identified on the NY Brownfields database. The property was historically used as a machine and tool works facility beginning in 1911, and used hydraulic, electrical, and industrial equipment that led to the contamination of the property. The contamination included SVOCs, PCBs, metals in soil, and TCE in soil vapor. Hydraulic oil was found to be present in bedrock.

683 Northland Avenue is also identified on the Manifest database as EPA ID NYR000232587. The listing indicates that 35,776 kilograms of PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material were generated and transported off-site to a landfill for disposal in 2017.

Remedial actions have successfully achieved SCOs for Commercial use. However, residual contamination remains in soil, bedrock, and soil vapor, and the property is being managed under a SMP. As the use of the property is restricted by the SMP, the residual contamination is considered a CREC as defined in Section 1.1 of this report. Soil, groundwater and soil vapor at the Site have the potential to be negatively impacted from historic operations at this property.

### Phase II ESA; 631, 683, 741, and 777 Northland Avenue (Fisher Associates, September 2015)

RE&LS reviewed Fisher's Phase II ESA conducted in 2015. The results of this Phase II ESA indicate SVOC and metal contamination exceeding NYCRR Part 375-6 Commercial and Industrial Use Soil Cleanup Objectives is present in soil at the south end of the Site building and southeastern portion of the Site. PCBs were detected in samples collected from wood block flooring.

#### 9.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21 for the property located at 631 Northland Avenue in the City of Buffalo, New York. Any exceptions to, or deletions from, this practice are described in Section 11 of this report. This assessment has revealed no RECs, CRECs, or significant data gaps in connection with the Site **except for the following:** 

- 1. Historic usage of the Site for metal fabricating, and the potential of releases of cutting oils, hydraulic oils, other petroleum products, and degreasing agents
- 2. Analytical data from a 2015 Phase II ESA investigation identifying hazardous concentrations of SVOCs in soil
- 3. Floor drains and a sump in the Site building, and the associated potential for improper disposal of degreasers and other contaminants
- 4. A railroad spur on the Site and the potential for petroleum and chemical spills during the transfer of shipments
- 5. The potential for petroleum releases in association with the AST present on the Site, and the potential for unidentified orphan USTs to be present on the Site
- 6. The potential for groundwater and soil vapor impacts at the Site from historic industrial uses of the adjacent properties, specifically in association with the CREC on the eastern adjacent property and the former Houdaille Industries facility on the northern adjacent property

#### **10.0 ADDITIONAL INVESTIGATION AND RECOMMENDATIONS**

Based on this Phase I ESA, additional investigation is warranted. We recommend performing a Phase II ESA/Site Characterization Investigation to evaluate the extent of contamination identified in Fisher's Phase II ESA and unidentified contamination at the Site.

#### **11.0 DEVIATIONS**

This report is prepared with no significant deviations from ASTM Standard E1527-21. No title documents were provided for review when this Phase I ESA was prepared. We recommend that an attorney determine that there are no environmental liens or deed restrictions in the Abstract of Title.

#### **12.0 DISCLAIMER**

RE&LS represents only that it provides services in accordance with generally accepted practices in the environmental audit field. No other representation, expressed or implied, is included or intended as part of its services, proposals, contracts or reports.

RE&LS cannot provide guarantees, certifications or warranties that the property is or is not free of environmental impairment without a Phase II ESA involving collection and laboratory analysis of environmental samples. Even with such a program, the data and samples from any given soil boring or monitoring well will indicate conditions that apply only at that particular location, and such conditions may not necessarily apply to the general Site as a whole.

#### **13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS**

One of the requirements of ASTM E1527-21 is that qualified Environmental Professionals (EP) work on the Phase I ESA and certify the findings and conclusions, therein. The EP must be knowledgeable, qualified and sufficiently experienced to conduct this type of investigation; certification, licensing, education and/or relevant experience are required.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in EPA 40 CFR Part 312.10.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the "all appropriate inquiries" in conformance with the standards and practices set forth in EPA 40 CFR Part 312.

#### 14.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

This Phase I ESA Report is certified to be prepared in general accordance with sound environmental practices and in conformance with the scope and limitations of ASTM Practice E1527-21.

Sincerely,

Whitney McAlpin Environmental Scientist

Lym Jiari

Lynn Zicari Sr. Environmental Scientist

Benjamin Reddy Environmental Department Manager

## **APPENDIX 3**

# **Environmental Questionnaire**

PRIVILEGED AND CONFIDENTIAL

Site address: 631 Northland Avenue, Buffalo, Erie County NY, Tax No. 101.21-5-1.21

#### **USER QUESTIONNAIRE**

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *user* should provide the following information to the *environmental professional*.

(1.) Are there any environmental liens that are filed or recorded against the *property*? No.

(2.) Are there any activity and use limitations that are in place on the *property* or that have been filed or recorded against the *property*, such as *engineering controls*, land use restrictions or *institutional controls*?

No.

(3.) Do you have any specialized knowledge or experience related to the property or the nearby properties?

No.

(4.) What is the relationship of the purchase price to the fair market value of the *property* if it were not contaminated?

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

The subject property was purchased by BUDC as is.

(5.) Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases?

Please refer to Fisher Associates Phase 1 and 2 Environmental Site Assessment (ESA

(a.) Do you know the past uses of the *property*?

Former machine and tool works facility.

- (b.) Do you know of specific chemicals that are present or once were present at the *property*? Only as noted in Fisher Associates ESA.
- (c.) Do you know of spills or other chemical releases that have taken place at the *property*? Only as noted in Fisher Associates ESA.
- (d.) Do you know of any environmental cleanups that have taken place at the *property*? Only as noted in Fisher Associates ESA.

(6.) What is the degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation?

The potential of contamination exists due to its relationship with other properties located

#### (7.) Additional questions:

a. What is the reason that the Phase I ESA is being performed (sale, purchase, etc.)? To update the previous Phase 1 ESA from 2015.

User (print name): Angelo Rhodes II
Signature: Anguli K. Willis II
Date: 2/22/2024

### **User Questionnaire**

Site address: 631 Northland Ave, Buffalo, Erie County NY, Tax No. 101.21-5-1.21

5. Please refer to Fisher Associates Phase 1 and 2 Environmental Site Assessment (ESA) Reports.

6. The potential of contamination exists due to its relationship with other properties located in the corridor such as the wooden block floors that are stained from cutting oils, hydraulic oils, grease, and other suspected petroleum products.

631 Northland Avenue 631 Northland Avenue Buffalo, NY 14211 EDR Inquiry # 7555240.3	Ravi Engineering & Land Surveying, P.C. 2110 South Clinton Ave Rochester, NY 14618 Contact: Lynn.zicari	EDR
The Combons Library has been as such as he	. FDD and many according the tennet mean why leasting as musical	d hu Deui Fasiassaira () Lead

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ravi Engineering & Land Surveying, P.C. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

### Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/19/2023 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

### Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

### Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

### Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/07/2023 has revealed that there are 7 NY SHWS sites within approximately 1 mile of the target property.

#### Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 09/27/2023 has revealed that there are 3 NY SWF/LF sites within approximately 0.5 miles of the target property.

### Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 01/24/2024 has revealed that there are 18 NY LTANKS sites within approximately 0.5 miles of the target property.

### Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 6 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 2 NY CBS AST sites within approximately 0.25 miles of the target property.

NY ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the NY ERP list, as provided by EDR, and dated 08/07/2023 has revealed that there is 1 NY ERP site within approximately 0.5 miles of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 08/15/2023 has revealed that there

is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

### **Records of Emergency Release Reports**

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 01/24/2024 has revealed that there are 5 NY Spills sites within approximately 0.125 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 14 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 09/23/2023 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

NY VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the NY VAPOR REOPENED list, as provided by EDR, and dated 01/01/2022 has revealed that there is 1 NY VAPOR REOPENED site within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 5 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 20 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

#### FINDS:

Registry ID: 110004318248

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

### WESTERN NEW YORK WORKFORCE TRAINING CENTER (Continued)

Site Description: Location: The Western New York Workforce Training Center is an 8.548-acre site located in an urban area at 683 Northland Avenue in the City of Buffalo, Erie County. The site is bounded by Northland Avenue to the north, a railroad spur to the south and commercial/industrial properties to the east and west. Site Features: The site is mostly flat and includes an approximately 235,000 square foot building complex. The building complex consists of a four-story office area along Northland Avenue, a series of connecting manufacturing spaces, and a detached one-story garage. Areas not covered by buildings are either paved or covered by grass and other small vegetation. Current Zoning and Land Use: The site and adjacent parcels are zoned for industrial use. The site is partially redeveloped as the WNY Workforce Training Center in the northern portion of the building, with a portion of the remaining building occupied by Buffalo Manufacturing Works. The surrounding area includes commercial, industrial, and residential uses. The nearest residential property is located approximately 175 feet north of the site. Past Use of the Site: The site was developed as a machine and tool works facility beginning in approximately 1911. The facility used hydraulic equipment, electrical equipment, and other industrial equipment that led to the present site contamination. The building has had several additions and upgrades since its initial construction. The property was most recently used for storage until it was purchased by the current owner in 2015. Site Geology and Hydrogeology: Site overburden contains native soil and fill material from the ground surface to depths of 2 to 12 feet below ground surface. The fill generally consists of silt, sand, and gravel with a mixture of crushed stone, yellow and red brick, coal, glass, slag, ash, metal fragments, and wood. Native soil, where present, typically consists of brown silty clay and is directly on top of bedrock. Limestone bedrock is present at depths ranging from 2 feet to 12 feet below ground surface. Groundwater was observed in bedrock at depths ranging from approximately 9 feet to 12 feet below ground surface. Groundwater flow is to the south and southwest. Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), and metals in soil and trichloroethylene in soil vapor. Additionally, petroleum product (hydraulic oil) is present in some areas of the on-site bedrock. Remedial actions have successfully achieved site specific soil cleanup objectives for commercial use. Residual contamination in the soil, bedrock, and soil vapor is being managed under a Site Management Plan Health Problem: Measures are in place to properly manage human exposures to residual site contaminants. Site Description:	Location: The Western New York Workforce Training Center is an
	8.548-acre site located in an urban area at 683 Northland Avenue in
	the City of Buffalo, Erie County. The site is bounded by Northland
	Avenue to the north, a railroad spur to the south and
	commercial/industrial properties to the east and west. Site Features:
	The site is mostly flat and includes an approximately 235,000 square
	foot building complex. The building complex consists of a four-story
	office area along Northland Avenue, a series of connecting
	manufacturing spaces, and a detached one-story garage. Areas not
	covered by buildings are either paved or covered by grass and other
	small vegetation. Current Zoning and Land Use: The site and adjace
	parcels are zoned for industrial use. The site is partially
	redeveloped as the WNY Workforce Training Center in the northern
	portion of the building, with a portion of the remaining building
	occupied by Buffalo Manufacturing Works. The surrounding area
	includes commercial, industrial, and residential uses. The nearest
	residential property is located approximately 175 feet north of the
	site. Past Use of the Site: The site was developed as a machine and
	tool works facility beginning in approximately 1911. The facility
	used hydraulic equipment, electrical equipment, and other industrial
	equipment that led to the present site contamination. The building
	has had several additions and upgrades since its initial
	construction. The property was most recently used for storage until
	it was purchased by the current owner in 2015. Site Geology and
	Hydrogeology: Site overburden contains native soil and fill material
	from the ground surface to depths of 2 to 12 feet below ground
	surface. The fill generally consists of silt, sand, and gravel with a
	mixture of crushed stone, vellow and red brick, coal, glass, slag,
	ash, metal fragments, and wood. Native soil, where present, typically
	aon, metal nugmento, and weed. Native soil, where present, typically
	consists of brown silty clay and is directly on top of bedrock.
	consists of brown silty clay and is directly on top of bedrock. Limestone bedrock is present at depths ranging from 2 feet to 12 fee

#### WESTERN NEW YORK WORKFORCE TRAINING CENTER (Continued) Name: WESTERN NEW YORK WORKFORCE TRAINING CENTER 665 AND 683 NORTHLAND AVENUE Address: BUFFALO, NY 14211 City,State,Zip: Site Code: 533504 Control Name: Ground Water Use Restriction HW Code: C915310 Control Code: 08 Control Type: INST Dt record added: 12/10/2018 Dt rec updated: 12/27/2018 Updated By: LSZINOMA Site Code: 533504 Site Description: Location: The Western New York Workforce Training Center is an 8.548-acre site located in an urban area at 683 Northland Avenue in the City of Buffalo, Erie County. The site is bounded by Northland Avenue to the north, a railroad spur to the south and commercial/industrial properties to the east and west. Site Features: The site is mostly flat and includes an approximately 235,000 square foot building complex. The building complex consists of a four-story office area along Northland Avenue, a series of connecting manufacturing spaces, and a detached one-story garage. Areas not covered by buildings are either paved or covered by grass and other small vegetation. Current Zoning and Land Use: The site and adjacent parcels are zoned for industrial use. The site is partially redeveloped as the WNY Workforce Training Center in the northern portion of the building, with a portion of the remaining building occupied by Buffalo Manufacturing Works. The surrounding area includes commercial, industrial, and residential uses. The nearest residential property is located approximately 175 feet north of the site. Past Use of the Site: The site was developed as a machine and tool works facility beginning in approximately 1911. The facility used hydraulic equipment, electrical equipment, and other industrial equipment that led to the present site contamination. The building has had several additions and upgrades since its initial construction. The property was most recently used for storage until it was purchased by the current owner in 2015. Site Geology and Hydrogeology: Site overburden contains native soil and fill material from the ground surface to depths of 2 to 12 feet below ground surface. The fill generally consists of silt, sand, and gravel with a mixture of crushed stone, yellow and red brick, coal, glass, slag, ash, metal fragments, and wood. Native soil, where present, typically consists of brown silty clay and is directly on top of bedrock. Limestone bedrock is present at depths ranging from 2 feet to 12 feet below ground surface. Groundwater was observed in bedrock at depths ranging from approximately 9 feet to 12 feet below ground surface. Groundwater flow is to the south and southwest. Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), and metals in soil and trichloroethylene in soil vapor. Additionally, petroleum product (hydraulic oil) is present in some areas of the on-site bedrock. Remedial actions have successfully achieved site specific soil cleanup objectives for commercial use. Residual contamination in the soil, bedrock, and soil vapor is being managed under a Site Management Plan

Health Problem: Measures are in place to properly manage human exposures to residual site contaminants.

Name: Address: City,State,Zip: Site Code: HW Code: Control Code: Control Type: Date Record Added: Date Rec Updated: Updated By: Site Description:	WESTERN NEW YORK WORKFORCE TRAINING CENTER 665 AND 683 NORTHLAND AVENUE BUFFALO, NY 14211 533504 C915310 15 ENG 12/10/2018 12/27/2018 LSZINOMA Location: The Western New York Workforce Training Center is an 8.548-acre site located in an urban area at 683 Northland Avenue in the City of Buffalo, Erie County. The site is bounded by Northland Avenue to the north, a railroad spur to the south and commercial/industrial properties to the east and west. Site Features: The site is mostly flat and includes an approximately 235,000 square foot building complex. The building complex consists of a four-story office area along Northland Avenue, a series of connecting manufacturing spaces, and a detached one-story garage. Areas not covered by buildings are either paved or covered by grass and other small vegetation. Current Zoning and Land Use: The site and adjacent parcels are zoned for industrial use. The site is partially redeveloped as the WNY Workforce Training Center in the northern portion of the building, with a portion of the remaining building occupied by Buffalo Manufacturing Works. The surrounding area includes commercial, industrial, and residential uses. The nearest residential property is located approximately 175 feet north of the site. Past Use of the Site: The site was developed as a machine and tool works facility beginning in approximately 171. The facility used hydraulic equipment, electrical equipment, and other industrial equipment that led to the present site contamination. The building has had several additions and upgrades since its initial construction. The property was most recently used for storage until it was purchased by the current owner in 2015. Site Geology and Hydrogeology: Site overburden contains native soil and fill material from the ground surface to depths of 2 to 12 feet below ground surface. The fill generally consists of sit, sand, and gravel with a mixture of crushed stone, yellow and red brick, coal, glass, slag, ash, metal fragments, and wood. Native soil, where present, typicall
Env Problem:	Limestone bedrock is present at depths ranging from 2 feet to 12 feet below ground surface. Groundwater was observed in bedrock at depths ranging from approximately 9 feet to 12 feet below ground surface. Groundwater flow is to the south and southwest. Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), and metals in soil and trichloroethylene in soil vapor. Additionally, petroleum product (hydraulic oil) is present in some areas of the on-site bedrock. Remedial actions have successfully achieved site specific soil cleanup objectives for commercial use. Residual contamination in the soil, bedrock, and soil vapor is being managed under a Site Management Plan

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

WILL COMPLETE A SITE ASSESSMENT AND WOULD LIKE TO REMOVE THE USTS AND CONTAMINATION WHEN THEY DO ROAD CONSTRUCTION NEXT MAY TO AUGUST. 8/18/16 CORE ENVIRONMENTAL PROVIDED THE DOCUMENTATION IDENTIFYING THE USTS ON SITE. FG SPOKE TO ALISSA CROOKSHANK 204-8054 WITH CORE. FG TOLD HER THAT THE DEPARTMENT WILL REQUIRE A SITE ASSESSMENT NOW AND WILL ALLOW THE REMOVAL DURING ROAD WORK. CORE WILL PROVIDE THE ANALYTICAL FOR THE SITE. CORE PROVIDED THE TEST PIT ANALYTICAL. TP3, TP3-2 AND TP4 WERE THE LOCATIONS WHERE IMPACTS WERE IDENTIFIED AND THE SAMPLES FROM THESE LOCATIONS EXCEED CP51. FG NOTIFIED THE CITY THAT A SITE ASSESSMENT WOULD NEED TO BE COMPLETED TO DETERMINE THE EXTENT. 9/22/16 FG PHONE MEETING WITH CITY OF BUFFALO AND CORE ENVIRONMENTAL. BUDC IS NOT DOING THE ROADWORK ANY LONGER. THEY WILL PLAN TO DO AN ASSESSMENT AND GET ME A WORKPLAN. 12/8/16 CORE ENVIRONMENTAL SUBMITTED THE WORK PLAN FOR THE SITE. THEY PLAN TO COMPLETE 10 BORINGS SURROUNDING THE UST'S DISCOVERED. THEY WILL ANALYZE ONE SAMPLE PER BORING AND SUBMIT A REPORT OF FINDINGS. 12/16/16 THE CITY OF BUFFALO HAS SCHEDULED THE SUBSURFACE INVESTIGATION FOR JAN 4 & 5 2017. 3/10/17 CORE ENVIRONMENTAL SUBMITTED THE SUBSURFACE INVESTIGATION FOR THE SITE. AN UST AND PETROLEUM IMPACTED SOIL WAS DISCOVERED. THE REPORT IDENTIFIES THE AREA OF IMPACTS FOR REMOVAL. 3/17/17 CORE ENVIRONMENTAL SAID THAT THE CITY WILL GET IN TOUCH WITH THE DEPARTMENT REGARDING REMEDIATION OF THE SITE. THE CITY PROVIDED THE FOLLOWING EMAIL INDICATING WORK WILL BEGIN THIS SUMMER: From: Paananen, Jason A. [mailto:jpaananen@ch.ci.buffalo.ny.us] Sent: Friday, March 17, 2017 4:24 PM To: Gallego, Francine (DEC) Cc: Jennifer Michniewicz (JMichniewicz@ClarkPatterson.com); Bidell,John; Finn,Michael J.; sransbottom@coreenv.com; Alyssa Cruikshank Subject: RE: 1669 Fillmore Avenue Subsurface Investigation Francine, The City is estimating that work may commence at the beginning of June and be completed by the end of July. The timeframe for remediation will vary based on the bids, but work should be completed this Summer. I II keep you posted once we have a more definitive schedule. Let me know if you have any questions or comments. Thanks, Jason Paananen, AICP Director of Environmental Affairs City of Buffalo Mayor s Office of Strategic Planning 901 City Hall Buffalo, NY 14202 716-851-5406 7/11/17 The City of Buffalo provided an update: Good morning. Just following up with you from our conversation Friday. The City is currently in the process of preparing to transfer the land over to the Buffalo Urban Development Corporation. Once the land is transferred to them I will request a revised timeframe for the work. I still think it will occur this summer but I will provide you with more information once I know more. Thanks, Jason Paananen, AICP Director of Environmental Affairs City of Buffalo Mayor s Office of Strategic Planning 901 City Hall Buffalo, NY 14202 716-851-5406 1/19/18 FG requested an update from Jason Paanenan with the City of Buffalo. 1/22/18 Hi Francine, I am awaiting the Law Department s review of Vermont Street as the tanks were permitted to the previous owner of the property. Let me check with them on the status. I will follow-up with BUDC on the Fillmore property as they were supposed to be starting work on that once the real estate contract was completed with the City. There might have been an issue with the contract so let me see what the delay is. Thanks, Jason Paananen, AICP Director of Environmental Affairs City of Buffalo Mayor s Office of Strategic Planning 901 City Hall Buffalo, NY 14202 716-851-5406 2/2/18 Hi Francine, Sorry for the delay. In regards to 1669 Fillmore Avenue, BUDC is finalizing contracts between the City and the property should be transferred to

them in the next month as there was an issue with lot combinations as part of the Northland project. Once this happens they should begin work in early spring to remove the tank and contaminated soil. I will keep you posted as this progresses. Thanks, Jason Paananen, AICP Director of Environmental Affairs City of Buffalo Mayor s Office of Strategic Planning 901 City Hall Buffalo, NY 14202 716-851-5406 7/24/18 Hi Francine, I forwarded your request to Mike Finn at DPW on Friday so hopefully I will hear back this week. I know he had to run the options by his boss before a decision was made. I ll let you know once I receive an answer. Thanks, Jason Paananen, AICP Director of Environmental Affairs City of Buffalo Mayor s Office of Strategic Planning 901 City Hall Buffalo, NY 14202 716-851-5406 9/19/18 FG requested an update from Jason Paananen. 9/21/18 From: Peter Cammarata [mailto:pcammarata@buffalourbandevelopment.com] Sent: Thursday, September 20, 2018 4:48 PM To: Paananen, Jason A; Finn, Michael J ; Heffron, John ; 'John Heffron' Subject: RE: 449-451 Vermont St, 1669 Fillmore Jason: I don t know if my participation would be helpful at this point. The land swap where we would be acquiring 1669 is not imminent. BURA still has to acquire the properties (including 1669) from the City, before we can move forward with the swap. I can t provide any concrete timeline for Francine until we close on the property, although we do intend to move forward with any issues on the property quickly at that point. PMC Peter M. Cammarata President Buffalo Urban Development Corp. 95 Perry St., Suite 404 Buffalo, NY 14203 716-362-8361 pcammarata@buffalourbandevelopment.com 11/9/18 ROE letter sent to the City requesting access. Response is due 11/29/18 12/7/18 City of Buffalo, Finn indicated that BUDC will be completing the remediation once the real estate transfer is completed. 1/14/19 Peter Cammarata called and indicated the BUDC property transfer is expected to happen by March. As soon as it does, they plan to begin the remediation. They will keep the Department updated. 8/28/19 From: Peter Cammarata Sent: Wednesday, August 28, 2019 11:41 AM To: Gallego, Francine (DEC) Cc: dstebbins@buffalourbandevelopment.com Subject: RE: 1603929 1669 FILLMORE AVE, BUFFALO Hi Francine: From a meeting I attended this past Monday, I understand that the City of Buffalo Common Council will be dealing with the land sale this month. I am assuming we will be taking title to the property in October or November. PMC Peter M. Cammarata President Buffalo Urban Development Corp. 95 Perry St., Suite 404 Buffalo, NY 14203 716-362-8361 pcammarata@buffalourbandevelopment.com 4/28/20 From: Peter Cammarata Sent: Tuesday, April 28, 2020 7:12 AM To: Gallego, Francine (DEC) Subject: RE: Spill 1603929 1669 Fillmore Good morning .Francine. The property swap with the City has not taken place as of yet. BUDC completed both sides of the survey and title work at our cost to try to expedite things, but the transactions approval by the Common Council has been delayed by the current Covid-19 circumstances. As soon as a closing takes place, we are prepared to update our pending contract with LaBella. Our Board has already approved the transaction and the hiring of a consultant. I hope you are safe and healthy. PMC Peter M. Cammarata President Buffalo Urban Development Corp. 95 Perry St., Suite 404 Buffalo, NY 14203 716-362-8361 pcammarata@buffalourbandevelopment.com 1/20/21 Hi Francine: I hope you are safe and well. BUDC s land swap with the City of Buffalo, which did include 1669 Fillmore is 90% complete after three long vears. The deeds were signed on 11/24/20, and the transaction was closed and filed on 12/18/20. I am waiting for final confirmation

from the City s Tax and Assessment Department, which should come shortly. As you are aware, I have a price for the tank closure from LaBella from 2017. I have asked Rob Napieralski to update that price for me, so that I can discuss it with our Real Estate Committee at their February meeting. I am hoping that I do not have to rebid the project and can identify a funding source to advance things as soon as possible. PMC Peter M. Cammarata President Buffalo Urban Development Corp. 95 Perry St., Suite 404 Buffalo, NY 14203 716-362-8361 pcammarata@buffalourbandevelopment.com 3/23/21 I believe you are the Spill Engineer for this Site. I wanted to give you a heads up that we will be heading out to the Site to collect waste profile samples in preparation of UST and petroleum impacted soil removal anticipated to begin the week of April 12th. We will be on-Site Friday 3/26 to complete a few direct-push soil borings and collect a waste characterization sample. Let me know if you have any questions. Thanks Andrew Benkleman LaBella Associates - Project Manager 716-768-3184 direct 716-551-6281 office 300 Pearl Street, Suite 130 Buffalo, NY 14202 3/30/21 Peter, Please see the attached PBS Application and Pre-Work Notification for the removal of an approximately 500-gallon abandoned UST at the property addressed as 1669 Fillmore Ave, Buffalo, NY. The removal work is scheduled for the week of April 12th. There is a spill listing (#1603929) associated with the Site for the identification of subsurface impact during a previous Phase II Investigation. Let me know if you have any questions. Thanks Andrew Benkleman LaBella Associates - Project Manager 716-768-3184 direct 716-551-6281 office 300 Pearl Street, Suite 130 Buffalo, NY 14202 labellapc.com 4/13/21 FG site visit. Labella on site. Excavation was open and 5 usts had been uncovered. Product will be vacced out. The usts will be cleaned out and cut open. The petroleum impacted soils will then be excavated and disposed. Work is to continue through next week. 7/15/21 Labella provided the closure report for the site. From: Benkleman, Andrew Sent: Tuesday, July 13, 2021 1:14 PM To: Gallego, Francine (DEC) ; Reuben, Peter A (DEC) Cc: pcammarata@buffalourbandevelopment.com; ahall@buffalourbandevelopment.com; rnapieralski@labellapc.com Subject: 2211220: Petroleum Remediation: 1669 Fillmore Avenue, Buffalo, NY: NYSDEC Spill #16-03929 Francine and Peter, I hope you are both doing well. On behalf of NorDell II, LLC please use the link below to download the Underground Storage Tank (UST) Removals Report for 1669 Fillmore Avenue, Buffalo, NY for your review. As part of the UST removals, five USTs were encountered and removed along with approximately 3,830 gallons of product, water, tank bottoms, and rinsate, and approximately 484 tons of petroleum impacted soil. The analytical results for the confirmatory soil samples collected from the sidewalls and the floor of the excavation were all below NYSDEC CP-51 SCG. Based on the removal and proper disposal of the USTs and impacted soil from the Site and the results of the post-excavation confirmatory soil samples, we respectfully request the closure of Spill #16-03929 associated with the Site. Let me know if you have any comments or questions. Kindly respond to this email that you were able to successfully download the report. Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

Relative: Higher Actual: 652 ft.	SHWS: Name: Address: City,State,Zip: Program: Site Code: Classification: Region: Acres: HW Code: Record Add: Record Upd: Updated By: Site Description:	<ul> <li>VIBRATECH INC.</li> <li>537 EAST DELAVAN BUFFALO, NY 14211</li> <li>HW</li> <li>58140</li> <li>Significant threat to the public health or environment - action required.</li> <li>9</li> <li>10.522</li> <li>915165</li> <li>11/18/1999</li> <li>12/14/2022</li> <li>SFRADON</li> <li>Location: The Vibratech site is an approximately 10.522-acre site located in a mixed industrial/commercial/residential area at 537 East Delavan Avenue in the City of Buffalo, Erie County. Site Features: The main site features include one- and two-story brick and steel-frame buildings at the northern and southwestern ends of the site. In 2017, a significant portion of the site structures were demolished and removed by the current site owner (Buffalo Urban Development Corporation). Most of the Site area is now exposed concrete floor slabs, asphalt parking areas and access roads, and small grassy areas at the northern end of the site. Significant historic operational features at the site include the former degreaser storage room with three former 10,000-gallon undergrou storage tanks (USTs), four former 12,000-gallon fuel oil above-grou storage tanks (ASTs), and the deep sump. The deep sump is an approximate 9-inch diameter, formerly 202.5 feet deep, open-hole bedrock well initially used as a source of cooling water, but possibly later used for light industrial use. The buildings in the northern portion of the site are currently being renovated for reuse. The buildings in the southwestern portion of the site are being leased for storage/commercial use. The site is surrounded by residential, commercial and industrial properties. Past Use of the Site: The site was utilized by Houdaille Industries for the manufacture of vibration dampeners and rotary shock absorbers for truck and railroad industry from 1927 through the mid-1990s. Speci</li> </ul>	ind ind e v

operations at the plant included chip turning, assembly of components, heat treating and plating. Subsequent owners and occupants of the site include: British Arms, Buffalo Arms, Interstate Tires, Buffalo Powder Coatings, World Series of Sports Promotions, and Buffalo Salvage. Site Geology and Hydrology: The site is covered by buildings and asphalt underlain by sandy gravel fill containing ash and cinders to a depth of 1 to 7 feet below ground surface (fbgs). Natural soils identified below the fill consist of fine textured lake deposited sediment with a clayey-silt texture and/or glacial deposits extending to the top of bedrock located 2 to 12 fbgs. Bedrock is fractured and is typical of the Onondaga Limestone Formation. Depth to groundwater is generally 4 to 12 fbgs with flow to the south-southwest, influenced by near surface utilities and the Scajaguada Drain to the south. Env Problem: Nature and Extent of Contamination: Based on investigations completed to date, the primary contaminants of concern are: chlorinated solvents (trichloroethene [TCE] and 1,1,1-trichloroethane and their daughter products) and 1.4-dioxane in the southern two-thirds of the site; and free-phase petroleum products (oil) in the southwestern corner of the site. Solvent contaminated soil containing TCE was remediated along a former rail spur on the southern portion of the site in the mid-1990s. Groundwater concentrations of TCE initially decreased following this soil remediation action. However, chlorinated solvents concentrations subsequently rebounded and 1,4-dioxane and free-phase product were identified onsite. A removal action was undertaken by USEPA to remove asbestos and PCBs from light ballasts, capacitors and associated contamination throughout the facility. Additionally, mercury containing switches and lamps were removed and disposed. The removal action was complete on September 9, 2009. A supplemental investigation completed in 2010 identified additional TCE contamination in groundwater north of the previously impacted groundwater plume. Additional investigations are being performed to determine the nature and extent of this contamination. Subsurface petroleum products have been identified in multiple onsite monitoring wells in the southwestern portion of the site. A specific source of the petroleum has not been determined, however, it is likely the result of numerous spills and leakage over the life of the facility. Significant dissolved phase petroleum contamination has not been identified in the groundwater. An off-site soil vapor intrusion investigation (indoor air and subslab), completed in the spring of 2012, found no significant off-site impacts due to existing groundwater contamination. A re-evaluation is necessary if reuse of onsite buildings or new construction occurs. A soil gas survey completed in the fall of 2015 helped to identify potential source areas under the central eastern (former degreaser storage room) and southwest corner (deep sump) of the former main plant building requiring additional investigation/remediation. Health Problem: Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. No off-site soil impacts have been identified to-date. People are not expected to come into direct contact with contaminated groundwater unless they dig below the ground surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the

	,
	movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for the inhalation of site contaminants due to soil vapor intrusion in the on-site building. Sampling indicates soil vapor intrusion is not a concern for off-site buildings.

1956, TYPE F-100, DE-ION GRID OIL CIRCUIT BREAKER, 75 KV, SERIAL NUMBER 33Y6527. I ASKED IF I COULD TAKE PICTURES, PUGLEISE GRANTED ME PERMISSION, BUT ASKED ME TO STOP AFTER TAKING ONE PICTURE. HE WANTED TO CALL HIS LAWYER FIRST. I TOLD HIM WE WERE EXPECTING AN ECO TO ARRIVE SHORTLY. HE THEN ASKED HIS WORKERS TO LOCK THE OUTSIDE GATE TO THE FACILITY. WHILE WAITING I CONTACTED ECO RON BOSELLI BY RADIO & ADVISED HIM OF THE SITUATION. HE WAS ONLY 10 MINUTES AWAY. UPON RETURNING TO THE BUILDING MR. PUGLEISE WAS ON THE PHONE W/ HIS ATTORNEY - STEVEN COHEN. DETECTIVE MEGAN ALSO SPOKE W/ COHEN & ADVISED HIM OF THE NEED FOR COPERATION. ECO RON BUSELLI ARRIVED & OBTAINED INFO. FROM MR. PUGLEISE. I WAS THEN GRANTED PERMISSION TO TAKE PICTURES. THREE WESTINGHOUSE TRANSFORMERS SINGLE PHASE TYPE SL LOCATED IN THE TRANSFORMER ROOM WERE NUMBERED 11, 12, & 13. SERIAL NUMBERS FOR #11 - 3412518, #12 - 3412513, #13 - 3413725. I ADVISED MR. PUGLEISE OF THE HYDRAULIC OIL CLEANUP PROCEDURES, INCLUDING PROPER STAGING & DISPOSAL METHODS. I TOLD HIM DEC MAY REQUIRE PCB SAMPLING, DEPENDING WHAT INFO. WE GET FROM VIBRATECH. 12/12/97: MNP TELECON TO VIBRATECH. SPOKE W/ PAUL WILSON HE BELEIVED THAT THE PCB'S HAD BEEN TAKEN CARE OF, BUT WASN'T SURE. I TOLD HIM WE HAVE INFO. FROM THE PHASE1 REPORT INDICATED PCB'S IN SOME OF THE TRANSFORMERS, BUT NO DOCUMENTATION IN PHASE 2 NOR REMEDIATION FILES. WILSON SAID HE WILL LOOK FOR DOCUMENTATION, BUT MARIO PUGLEISE IS CURRENT OWNER & RESPONSIBLE FOR ANY PROBLEMS, EXCAEPT FOR ONGOING HAZ-WASTE MONITORING. 01/12/98: MNP TELECON WITH MR.PUGLEISE'S ATTORNEY, STEVEN COHEN. I TOLD HIM THAT MR.PUGLIESE DID NOT CLAIM THE CERTIFIED LETTER WE SENT NOR DID HE RETURN MY PHONE CALLS EITHER. MR.COHEN SAID HE WILL ACCEPT THE LETTER & COMPLY. I ALSO ADVISED HIM ABOUT THE TENTATIVE MEETING WITH ECO RON BOSELA ON WEDNESDAY 1/14/98. MR.COHEN DID NOT KNOW WHETHER HE COULD MAKE IT OR NOT, I GAVE HIM ECO BOSELA'S PHONE NUMBER. 2/03/98: JDC ON SITE W/ BECI INVESTIGATION AND MET W/ MR STEVEN COHEN WHO AUTHORIZED MY COLLECTION OF SAMPLES UNDER THE CURRENT COURT ORDER. COLLECTED SAMPLES FROM N.E. CORNER OF THE COMPLEX, WIPE SAMPLES OF FLOOR, TRANSFORMER ROOM AND CONCRETE PAD. 02/25/98: MNP REVIEWED WST 2/16/98 SAMPLE REPORT, NO PCB'S DETECTED FOR 1 OIL & 2 WIPE SAMPLES COLLECTED ON 2/3/98. 03/09/98: MNP REVIEWED WST PAYMENT PACKAGE FOR \$485.00 RECEIVED ON 3/5/98, PAYMENT APPROVED. 6/22/99 FG SITE INSPECTION. MET REVEREND HARRIS ON SITE. ONE 55 GALLON DRUM OF OIL & WATER (MOSTLY WATER) WAS FOUND IN THE BUILDING. REVEREND HARRIS IS IN THE PROCESS OF PURCHASING THE PROPERTY. HE WILL SEND IN A DISPOSAL RECEIPT. 3/2/00 RECD UNCLAIMED LTR TO PROPHET HARRIS BACK. CITY OF BUFFALO REAL PROPERTY INDICATED THAT THE OWNER OF THE PROPERTY IS: WORLD SERIES OF SPORTS NY, INC, C/O LORENZO & COHEN LAW OFFICES, SUITE 1400, STATLER TOWER, BUFFALO, NY 14202. SENT A LTR REQUESTING AN UPDATE ON THE REMEDIATION STATUS TO WORLD SERIES OF SPORTS. A RESPONSE IS DUE ON 3/24/00. 3/21/00 MARIO PUGLIESE CALLED AND REQUESTED THAT WE SEND HIM A COPY OF COMPANIES WHICH ACCEPT WASTE OIL FOR RECYCLING WHICH WE FAXED HIM AT (905)357-6383. 9/18/00 MAURICE MOORE WITH THE NYSDEC, INACTIVE HAZARDOUS WASTE PROGRAM SENT ME A NOTE THAT HE INSPECTED THE SITE ON 9/15/00 AND DISCOVERED OIL IN MW6. HE REFERRED THIS PROBLEM TO THE SPILLS GROUP. 9/21/00 LTRS SENT TO VIBRATECH AND MARIO PUGLIESE REQUESTING THAT THEY EITHER ALLOW NYSDEC TO COMPLETE THE SITE WORK OR DO IT THEMSELVES. A RESPONSE IS DUE 10/6/00. 9/28/00 BRYAN KEYT WITH BELL BOYD & LLOYD CALLED FOR VIBRATECH AND SAID THAT THEY WILL PROVIDE A RESPONSE BY 11/6/00. HIS PHONE NUMBER IS 312-807-4328. 10/2/00 BRYAN KEYT SENT A LETTER STATING THEY WILL PROVIDE A RESPONSE BY 11/6/00. 8/31/01 FG JFO MAURICE MOORE, NATURE'S WAY-RUSS SAVAGE &

JAMIE HALL SITE VISIT. MARIO PUGLIESE WAS NOT ON SITE BUT THE MAINTENANCE MAN WAS ON SITE AND SAID THAT THE SIDE DOOR WAS OPEN AND WE COULD GO IN. SEVERAL DRUMS WITH OIL WERE FOUND. THE FLOORING WAS ALL PILED UP. IT IS SOAKED WITH OIL. VIBRATECH WILL BE SAMPLING THE WELLS ON 9/6/01. NATURE'S WAY WILL BE ON SITE TO COLLECT SAMPLES AT THE SAME TIME. WATER IN THE BASEMENT HAD OIL ON IT. MR. PUGLIESE CALLED THE OFFICE PER SAL CALANDRA AT 10:15 INDICATING HE COULD NOT MEET US AT THE SITE. 09/06/01 JFO MET WITH DUSTIN STEINER, DAVID TYRAN AND JANE ALL FROM CRA AND RUSS SAVAGE OF NATURE'S WAY. THEY COLLECTED SAMPLES FROM THE 3 WELLS. RUSS GOT A SAMPLE FROM THE 1 WELL WITH THE OIL. HE WILL ANAYLZE FOR 310.13, 8021 AND 8270. RESULTS TO FOLLOW. THERE WAS A LAYER OF PRODUCT IN THE WELL. A SUBSURFACE INVESTIGATION WILL IS NECESSARY. 09/14/01 RCVD ABOVE-NOTED ANALYTICAL RESULTS FOR MW6. THE 310.13 INDICATES LUB OIL 8260 VINYL CHLORIDE 23.1 PPB 1,1-DICHLOROETHANE 99.9 PPB CTS-1,2-DICHLOROETHENE 96.5 PPB TETRACHLOROETHENE 10.8 PPB ALL OTHER COMPOUNDS ON THE 8260 AND ALL ON THE 8270 ARE less than DL 09/24/01: KAB/DALE GRAMZA, NATURE'S WAY/TELECON (1000 HRS) - MR. GRAMZA INDICATED THAT HE WAS AT THE PROPERTY TO DO SOME SAMPLING AND THAT THE LOCK ON THE GATE HAD BEEN CHANGED. ADVISED THAT I WOULD CALL HIM BACK. SPOKE TO JOE HOUSEBECK, DEC ATTY., WHO ADVISED THAT THERE WAS AN AGREEMENT THAT SITE COULD NOT BE ACCESSED UNLESS MR. PUGLIESSI IS PRESENT. KAB CONTACTED DALE GRAMZA AND ADVISED THAT FG IS ON INDEFINITE LEAVE AND THAT. PER OUR ATTORNEY, WORK ON THE PROPERTY SHOULD BE CEASED UNTIL FURTHER NOTICE. 09/24/01: JFO RETURNED TO OFFICE AND ADVISED THAT DALE GRAMZA HAD PAGED HIM AND WANTED TO GAIN ACCESS TO THE SITE. THAT CONVERSATION WAS AT APPROXIMATELY 12:00 P.M., 2 HOURS AFTER MR. GRAMZA HAD BEEN ADVISED THAT HE WAS NOT TO ENTER THE SITE UNTIL FURTHER NOTICE. 10/25/01 JFO REC'D PAYMENT REQUEST FOR WORK DONE 8/31/01 THRU 9/24/01. 687.41. SUBMITTED TO SAC. PJB INFORMED JFO THAT HE HAS RECEIVED A KEY FOR THE FENCE FROM MR PUGLIESE. HE WILL KEEP IT IN HIS DESK DRAWER. 11/16/01 JFO ON SITE MET WITH DALE GRAMZA AND HELPER. BOTH OF NATURE'S WAY. THEY WILL DO SOME SOIL BORINGS. JFO BACK ON SITE, THERE IS A CONCRETE SLAB APPROX 4' UNDER THE SLOPE OF THE DOCK. 12/07/01: MF FOR FG, NW SUBMITTED PROPOSAL FOR BEDROCK MW INSTALLATION. LETTER TO NW, NEED MORE DETAIL. RESPONSE BY 1/7/02. 01/18/02 JFO OPENED THE GATE FOR NATURE'S WAY. MET WITH DALE, LUI AND STEVE, ON SITE IS THE DRILL RIG AND A VAN. THEY WILL DRILL 4 ROCK WELLS OUTSIDE AND POSSIBLY 2 INSIDE. THEY WILL ALSO SAMPLE THE DRUM INSIDE AND INSPECT THE BASEMENT. JFO BACK ON SITE MET WITH DALE G LUI AND STEVE. THEY HAVE ONE WELL DRILLED. THEY FOUND ANOTHER DRUM INSIDE. DALE WILL SAMPLE THE DRUMS ON MONDAY (HOLIDAY) AND HE WILL ALSO SAMPLE THE WOOD BLOCKS ON TUESDAY. MAURICE MOORE OF DER SUGGESTS WE COLLECT 5 BLOCKS FROM THE 5 PILES. DALE WILL SAMPLE THE 5 LARGEST PILES (5 BLOCKS WILL BE ONE SAMPLE) ALSO HE WILL SUBMIT A SKETCH OF WHERE EACH PILE IS LOCATED. THERE IS ABOUT 1 1/2 FEET OF WATER IN THE BASEMENT. DALE WILL ENTER AND SEARCH FOR A SHEEN. I WILL RETURN AT 4:00 TO LOCK THE GATE. ALSO THEY INTEND TO WORK ON MLK DAY. I WILL UNLOCK THE GATE FOR THEM AT 7AM. JFO ON SITE AT 4PM. 1 WELL HAS BEEN INSTALLED, 01/21/02 JFO ON SITE TO UNLOCK THE GATE FOR NW. DALE AND STEVE ARRIVED AT 9AM THE DRILL RIG AND THE VAN. THEY WILL SAMPLE THE DRUMS AND INSTALL MORE WELLS. THEY WILL SAMPLE THE WOODEN BLOCKS TOMORROW. JFO BACK ON SITE 2 WELLS HAVE BEEN INSTALLED. I WILL BE BACK ON SITE IN THE MORNING TO UNLOCK THE GATE. 01/22/02 JFO ON SITE MET WITH DALE AND STEVE, ALSO ON SITE ARE THE DRILL RIG AND THE VAN. THEY ARE JUST FINISHING THE WELL INSIDE THE BLDG. DALE AND I SAMPLED THE 5 LARGEST PILES OF WOODEN BLOCKS. THERE IS CONCRETE, ELECTRICAL

JFO, MAURICE & JOE CCED ON THIS. 03/21/02: MF FOR FG CHRIS ZIOLKOWSKI 856-8517 CALLED & SAID HE IS PURCHASING THE PROPERTY. HE IS PURCHASING THE PROPERTY FROM SILENT PARTNER GROUP, LEE CARMEN, 1-800-766-6784. 04/29/02 JFO TO MEET NATURE'S WAY ON SITE TO REMOVE AND DISPOSE THE DRUM OF OILY WATER. 06/07/02: MF RECEIVED A LETTER FROM VIBRATECH INDICATING THEY WILL CONTINUE TO MONITOR. 12/12/02: JAA/FILE. ON 6/24 NATURE'S WAY PROVIDED REPORT ON ADDITIONAL FIELD WORK NEEDED TO COMPLETE SUBSURFACE INVESTIGATION. ON 10/11/02: MLD SPOKE TO JERVIS SLATER ABOUT SITE, 871-1396. HE WAS INTERESTED IN PURCHASING AT AUCTION. MLD INFORMED HIM OF VIBRATECH OBLIGATIONS TO MONITOR, AND REQUIREMENT FOR SPILL INVESTIGATION AND REMEDIATION. 12/24/02 FG SPOKE TO DALE GRAMZA WITH NATURE'S WAY. HE WILL PREPARE A REPORT OF BACKGROUND INFORMATION AND SURVEY THE SITE. A MAP WILL BE GENERATED AND DECISIONS ON ADDITIONAL FIELD WORK WILL BE MADE AFTER THIS. 1/8/03 FG SITE INSPECTION ALONG WITH DALE GRAMZA OF NATURE'S WAY. WE COLLECTED A PRODUCT SAMPLE FROM THE UST ON SITE TO BE ANALYZED FOR DOH 310-13. IT WAS TAKEN FROM 15,000 GALLON FUEL OIL REGISTERED UST FURTHEST NORTH. DALE HAD ALREADY TAKEN A SAMPLE FROM THE OTHER UST ON HIS LAST INSPECTION. THE REASON FOR THE SAMPLES IS TO TRY TO COMPARE PRODUCT WITH THE OIL FOUND IN THE WELLS THAT HAD BEEN INSTALLED IN BEDROCK BY NATURE'S WAY. DALE GRAMZA'S LAST INSPECTION REVEALED THAT TWO FEET OF PRODUCT IS PRESENT IN THESE WELLS. MR. GRAMZA BELIEVES THAT THE SOURCE MAY BE THESE UST'S. MET DAN TREDO ON SITE. HE IS PLACING JUNK VEHICLES IN THE BUILDING AND MAY BE DUMPING FLUIDS. ADDITIONAL BEDROCK WELLS WILL BE INSTALLED NEXT WEEK TO DETERMINE THE SOURCE OF THE NEWLY DISCOVERED PRODUCT IN THE WELLS. THIS WILL BE DONE ONCE THE OWNERS ARE CONTACTED. 01/20/03 JFO ON SITE MET WITH DALE G OF NATURE'S WAY. THEY ARE AT APPROX 8' ON THE FIRST WELL. NO PRODUCT YET. 01/23/03 JFO CALL FROM DALE GRAMZA OF NATURE'S WAY. THEY WILL NOT BE ON SITE TODAY OR TOMORROW. HE SAID WORK WILL RESUME ON MONDAY JAN 27. 1/28/03 FG SITE INSPECTION. NATURE'S WAY ON SITE CONTINUING BEDROCK WELLS. SO FAR, 5 WELLS HAVE BEEN INSTALLED. 4 OF THE WELLS SHOWED SIGNS OF PETROLEUM ON THE BEDROCK. ADDITIONAL WELLS WILL BE INSTALLED TO DETERMINE THE EXTENT OF THE CONTAMINATION. 2/4/03 RECD THE RESULTS FROM THE SAMPLE COLLECTED FROM THE OTHER UST ON SITE. THE RESULTS SHOW THAT FUEL OIL #2 IS PRESENT. 2/4/03 MARIO PUGLIESE REQUESTED THAT THIS OFFICE FAX HIM THE MOST RECENT LETTERS THAT WERE SENT TO HIM. THIS WAS DONE. 4/9/03 RECD GROUNDWATER SAMPLING RESULTS. MW1 SHOWED ND. MW4 SHOWED THAT LUBRICATING OIL IS PRESENT. MW8 SHOWED THAT LUBICATING OIL IS ALSO PRESENT. 4/24/03 RECD ANALYTICAL RESULTS FROM UST SAMPLES FOR PCB'S. NO PCB'S WERE DETECTED. 5/6/03 RECD ANALYTICAL RESULTS FROM LSL FOR MW1 - 8270, 8260 AND DOH310-13 ALL ND. MW4 -LUBRICATING OIL PRESENT. MW8 LUBRICATING OIL PRESENT. 11/21/03 RECD NATURE'S WAY REPORT OF FINDINGS. SUBMITTED A COPY TO VIBRATECH AND MARIO PUGLIESE REQUESTING REMEDIATION WITH A RESPONSE DUE BY 12/17/03. 1/20/04 FG SPOKE TO MARIO PUGLIESE, OWNER OF PROPERTY. HE RECEIVED OUR LETTERS AND IS RESPONDING BY THIS CALL. HE DOES NOT FEEL HE IS RESPONSIBLE FOR THE WORK THAT IS NECESSARY ON SITE AND WILL NOT SPEND ANY ADDITIONAL MONEY ON CLEANUP BECAUSE HE DOESN'T HAVE IT. HE REQUESTED THE NAME AND NUMBER OF VIBRATECH AND WILL CALL THEM. HE SAID HE HAD AN AGREEMENT WITH THEM PRIOR TO HIS PURCHASE OF THE PROPERTY. 1/20/04 FG

CALLED VIBRATECH AT 937-6600. THE NUMBER WAS TRANSFERRED TO HORSCHEL BROS IN SPRINGVILLE. THEY SAID THAT VIBRATECH IS IN BANKRUPTCY AND THE ATTORNEY FOR THE BANKRUPTCY IS RING. HE SAID VIBRATECH IS LIQUIDATED. 2/13/04 LETTER SENT TO MARIO PUGLIESE REQUESTING SITE ACCESS BECAUSE VIBRATECH IS BANKRUPT. RESPONSE IS DUE 3/16/04. 4/2/04 RECD ESTIMATE FOR UST REMOVAL FROM NATURE'S WAY AND FAXED TO MARIO PUGLIESI AT 519-686-0176. HE SAID HE WOULD CALL BACK. 4/13/04 FG SPOKE TO MARIO PUGLIESE WHO SAID THAT HE RECEIVED THE FAX OF THE COST ESTIMATE FOR THE UST REMOVALS AND HAS FORWARDED IT TO HIS CONTRACTOR. HE HAS NOT HEARD BACK FROM HIS CONTRACTOR WITH A PRICE. HE WILL NOTIFY THIS OFFICE BY THE END OF THIS WEEK,4/16/04 WHETHER OR NOT HE WILL COMPLETE THE WORK OR ALLOW NYSDEC TO COMPLETE THE WORK. 4/22/04 FG SPOKE TO MARIO PUGLIESE, 905-932-4412 WHO SAID THAT HE WILL GET BACK TO ME BY 4/30/04 WITH A COMMITTMENT FROM HIS CONTRACTOR, DNL CONSTRUCTION, FROM PA AS TO WHEN THEY WILL COMPLETE THE UST REMOVAL. 6/23/04 RECD A RESPONSE TO AN RP LETTER TO IDEX. THEY INDICATE THEY ARE NOT RESPONSIBLE. THEY STATE THEY MERELY OWNED STOCK IN VIBRATECH. 7/15/04 MR. PUGLIESE HAS NOT RESPONDED TO LEGAL'S REQUEST FOR ACTION ON THE PBS/UST ISSUE. LEGAL HAS REQUESTED THAT I WAIT FOR THAT ACTION TO BE RESOLVED BEFORE I PROCEED WITH ANYTHING ON THE SPILLS SIDE. 6/9/05 SPILL SITE REFERRED TO THE LONG TERM REMEDIATION GROUP. SPILL SITE IS CLOSED. SPILL FILE GIVEN TO LONG TERM. 06/17/06 (CRS) Marty Doster and myself met on-site with Kevin Mathies and Joe Consentino (both with EPA). EPA was completing a walk through of the building to determine if hazardous materials may exists within the building. Joe Consentino outlined the following potential issues in a follow-up e-mail: On site observations indicate a need to conduct a comprehensive sampling investigation to confirm or dispel the presence of hazardous waste and/or hazardous substances at the site. Substances believed present include; mercury (switches, bulbs and vapor lamps), asbestos (pipe and boiler wrap), petroleum hydrocarbons, oils and greases, PCB ballast on old fluorescent lights and possible peeling lead paint. Several drums(55 gallon) and smaller containers were located throughout the site buildings will require sampling. In addition, wooden block floors, sumps and drains appear heavily contaminated and need to be investigated. 06/08/06 RMC/FILE. SITE ACTIVE UNDER CHAD STANISZEWSKI. 06/08/06 (CRS) Unrestricted site access granted by Mario Pugliese's attorney, Steven Cohen, in a letter to the AG dated May 7, 2006. DEC received notification that access was granted in a letter from the AG's office dated May 22, 2006. 06/15/06 (CRS) Cut existing EPA chains on two access gates and placed a new lock on the chains (in addition to the EPA locks which already existed). DEC now has access to the site via two gates: the eastern most gate on E. Delevan and the eastern most gate on Northland Drive. 06/19/06 (CRS) Met on-site with Gary House and Brian Hutzler of OpTech Environmental Services to access removal of the two fuel oil tanks on the east side of the building. Approximately 2-3 feet of product in each tank. Bottom of tanks appear to be approximately 10-12 feet below ground. Also, informed Op-Tech that we would like product removed from all existing wells that currently contain product ((6) wells total MW6, MW1-02, MW3-02, MW4-02, MW5-02 and MW8-03). OpTech indicated they should be able to mobilize in a couple of weeks. 08/04/06 - 08/10/06 (CRS) Optech on-site to clean the two underground No. 6 fuel oil tanks. The fuel oil in each tank was removed with a vac. truck (the oil in the southern tank was heated with a boiler/enclosed steam pipe for (3) days to thin the oil prior to removal). The tanks were swept with No. 2 fuel oil to remove

#### S102176404

residual oil on the tank walls, pressure washed and wiped with adsorbent pads. The tanks were cleaned in place. The northern tank was excavated and removed from the ground. The sand bedding around the tank was generally not visually impacted, however, when the bedding material was removed from the excavation, oil began seeping out of the bedrock. It is not believed that the oil seeping from the bedrock originated from the north tank. The tank was in good condition with no holes observed. Additional investigation is necessary. Testing on the oil leaking from the bedrock identified the oil as #6 fuel. The southern tank was not removed due to its proximity to a smoke stack. Optech was concerned that removal of the tank may undermine the stability of the stack. The south tank was left in place, empty. 02/14/14 (CRS) Site continues to be investigated under the Superfund program to address historic TCE contamination. Additional spills investigation of on-site oil anticipated following Superfund work. 6/9/16 NO FURTHER WORK WILL TAKE PLACE UNDER THIS SPILL. ALL WORK IS BEING CONDUCTED UNDER THE HAZARDOUS WASTE SITE 915165. ALL FOLLOWUP WILL BE UNDER THAT SITE NUMBER. THIS SPILL IS CLOSED WITH NO FURTHER WORK REQUIRE. Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies. ICIS-Air (AIR) AIR is the modernization of the Air Facility System

(AFS) into the Integrated Compliance Information System (ICIS). AIR

FINDS 1016099182 ECHO N/A PFAS ECHO

Database(s)

EDR ID Number **EPA ID Number** 

#### **BUFLOVAK LLC** (Continued)

contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Update By:	AECAPRIO
Site Description:	Site Location: The 14.53-acre Buffalo Foundry & Machine Park of
	Innovation site is located at 750 East Ferry Street in the City of
	Buffalo, Erie County. It is near the intersection of Fillmore Avenue
	and East Ferry Street and approximately 3 miles south of Erie County
	Medical Center (ECMC). Site Features: The main site features include
	several abandoned industrial buildings of varying sizes estimated to
	be built between 1902 and 1920. Asphalt surfaces exist to the east of
	the buildings and there are approximately three acres of grassy and/or unpaved areas to the west and east of the buildings. A portion
	of Scajaquada Creek runs below ground from east to west beneath the
	main buildings in a concrete tunnel known as the Scajaquada Creek
	Drain. Current Zoning and Land Use: The municipal zoning designatio
	for the site is D-IH (Heavy Industrial). The surrounding parcels are
	used for a combination of heavy and light industrial, commercial,
	residential, and utility/rail corridors. The nearest residential
	areas are 80 ft to the south along Winchester Avenue and immediately
	across Fillmore Avenue to the west. Portions of the former
	manufacturing buildings are leased to third parties for the storage
	of various supplies/products/equipment. One of the smaller buildings
	is currently used as a laboratory for Buflovak. A portion of the
	largest building is used by Habitat for Humanity to assemble

	pre-engineered modular homes. Past Use of Site: The site has been used for manufacturing since before 1900. The Buffalo Foundry & Machine Co. (BF&MC) dates back to 1845, and began manufacturing a product line of steam hammers, impregnators, and vacuum dryers. Over time the company grew to specialize in the production of industrial evaporators used in the food and chemical industry. In 1945, BF&MC was sold to Blaw Knox Food and Chemical Equipment, which operated it as the Buflovak division. Over the next 50 years of continuous operation, the company went through at least seven different ownership groups until being purchased by Hebeler Group in 2016. It has been historically reported that some of the northern portion of the site was used as a city dump. It is also known from historical topographic maps that a portion of Scajaquada Creek was an open channel before the site was developed. The type and quality of material used to fill the former channel is unknown. Site Geology and Hydrogeology: The property is situated on fill material over clayey silts on Onondaga Limestone bedrock. Sand and gravel have also been observed from soil borings and are thought to be associated with the buried Scajaquada Creek. Fill consists primarily of black ash, cinders, and foundry sands, with trace slag, coal, brick, and iron filings. Groundwater was encountered in site borings and is considered to be influenced by the Scajaquada Creek Drain, which was constructed by the City of Buffalo and consists of brick and concrete. Groundwater flow is directed from east to west by Scajaquada Creek Drain and the estimated dimensions are 33-feet in width by 15-feet in height. The drain is set in bedrock at approximately 11-feet below ground surface. Groundwater flow outside of the Scajaquada Creek Drain influence is expected to be to the west.	it
Env Problem:	Not reported Based on the information included in the BCP application, the primary contaminants of concern are polycyclic aromatic hydrocarbons (PAHs) in soil. A full remedial investigation is needed to characterize the	
Health Problem:	nature and extent of contamination. Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

#### SECONDARY SERVICES INC (Continued)

Spiller Name: MICHAEL ARNO Spiller Company: 757 EAST FERRY INC. 757 EAST FERRY STREET Spiller Address: Spiller County: 001 Spiller Contact: CRAIG SLATER Spiller Phone: (716) 853-1616 Spiller Extention: Not reported DEC Region: q DER Facility ID: 146488 DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was FG 3/3/97 REQUESTED THAT ANGELA DEMERLE SEND A COPY OF THE PHASE II ASSESSMENT. SHE AGREED AND SAID THAT THE OWNER IS LOOKING FOR BIDS TO COMPLETE THE REMOVAL OF 2 UST'S & ASSOCIATED CONTAMINATION. 3/11/97 SPOKE TO CRAIG SLATER. REQUESTED A COPY OF THE PHASE II AGAIN. HE SAID HE WILL PUT IT IN THE MAIL TOMORROW. HE WAS UNSURE AS TO WHO THE OWNER OF THE PROPERTY WAS. HE SAID TO SEND LETTERS TO CAMAIR. 3/12/97 SPOKE TO M. ARNO. HE SAID THAT 757 E FERRY INC. OWNS THE PROPERTY AND HE IS THE PRESIDENT OF THAT COMPANY. HE IS HIRING HORIZON ENVRL TO REMOVE UST'S. HE SAID THEY HAVE ALREADY UNCOVERED THE UST'S AND WILL DISPOSE OF THE WATERS AT THE BSA. HE HAS ALREADY OBTAINED A PERMIT FROM BSA FOR THIS ACTIVITY. HE WILL COLLECT SAMPLES FROM THE EXCAVATION FOR ANALYSIS. 3/12/97 LETTER SENT REQUESTING SITE CLEANUP & UST REMOVAL AS WELL AS EXCAVATION SAMPLE COLLECTION. RESPONSE DUE 4/4/97 3/19/97 RECEIVED PHASE II REPORT FOR THE SITE. TANK WATERS ARE ABOVE STARS. 3/24/97 SITE VISIT. MET MICHAEL ARNO. HE SHOWED ME LOCATION OF USTS ON SITE. HE IS WAITING FOR BSA TO APPROVE THE DISCHARGE OF THE WATERS TO THE SEWER. HE EXPECTS TO START WORK IN APPROX 2 WEEKS. 4/8/97 MR. ARNO CALLED STATING THAT WORK IS TO BEGIN SOME TIME THIS WEEK. HE WILL LET ME KNOW WHEN THEY START. HE JUST RECEIVED APPROVAL TO DISCHARGE TO BSA. 4/21/97 MR. ARNO SAID THAT HE WILL DISCHARGE WATER IN USTS AT 9GPM PER THE BSA PERMIT. HE HAS 40,000 GAL OF WATER TO DISCHARGE. HE WILL REMOVE UST'S BY 4/30/97 AND WILL CONTACT ME WHEN HE DOES. 6/6/97 SPOKE TO MIKE ARNO WHO SAID HIS PUMP BROKE SO HE HAS NOT COMPLETED REMOVING WATERS FROM THE UST. HE WILL HAVE THE PUMP REPAIRED AND START WORK BY MONDAY 6/9/97. I TOLD HIM TO CALL AND LET ME KNOW. HE AGREED. 07/01/97: MNP TELECON WITH MIKE ARNO. HE CONFIRMED TANK PULL WAS SCHEDULED FOR 7/9/97, BUT HE ASKED IF TANKS COULD BE FILLED WITH CONCRETE. I SAID OK PROVIDING THE TANKS ARE CLEANED OUT & NO CONTAMINATION PRESENT. SAMPLING UNDER & AROUND THE TANK MUST BE DONE TO CONFIRM NO CONTAMINATION. HE MUST CALL BEFORE PROCEEDING WITH TANK CLOSURE FOR DEC INSPECTION. 7/1/97 JFO SITE VISIT. FOUND CONTAMINATION WHILE UNCOVERING THE TOP OF THE UST'S. SOIL STOCKPILED ON SITE. ADDITIONAL SOIL TO BE REMOVED. UST REMOVAL TO TAKE PLACE ON 7/9/97. 07/09/97: MNP TELECON WITH MR. ARNO. TANK PULL CANCELLED FOR THIS WEEK. I ASKED HIM TO CONTACT FRANCINE GALLEGO WITH NEW DATE. 7/14/97 PHIL BADAME WITH HORIZON CALLED & SAID THAT ANALYTICAL IS BELOW STARS FOR THE EXCAVATION SAMPLES AS WELL AS THE CONTAMINATED SOIL SAMPLES. HE SAID THAT THE UST'S WON'T BE REMOVED AND THE SAMPLES ARE FROM AROUND THE BOTTOM AND ALONG THE SIDES BUT A HOLE WAS NOT CUT THROUGH THE BOTTOM OF THE UST. MR. BADAME SAID HE GOT APPROVAL FOR THIS FROM SOMEONE ELSE IN THIS OFFICE BUT HE DID NOT SAY WHO. HIS INFORMATION ON WHAT WAS TO BE USED IN THE TANKS FOR FILL WAS CONFUSING. I TOLD HIM TO PROVIDE DATA. HE SAID THAT HE MAY START BACKFILLING TODAY. SITE VISIT. EXCAVATION STILL OPEN. USTS HAD BEEN CUT OPEN. NO ONE ON SITE. CALLED MR. BADAME & LEFT A MESSAGE FOR HIM TO RETURN CALL TO CLARIFY ISSUES, 8/21/97 ALL RESULTS SUBMITTED AND SHOW THAT LEVELS ARE BELOW STARS FOR THE SOIL

SECONDARY SERVICES INC (Co	ntinued) 1001222861
Remarks:	PILE AND THE EXCAVATION. THE TANKS WERE CLOSED IN PLACE AND BACKFILLED. NO FURTHER WORK REQUIRED. SITE CAN BE CLOSED. CONTAMINATION AND 2 UST'S (20K) DISCOVERED DURING PHASE II INVESTIGATION

#### S100119838

NEGOTIATING WITH MR BRIER TO PURCHASE THE PROPERTY WITH CLEANUP CONDITIONS. TO DATE THEY HAVE BEEN DOING SOME SITE RESTORATION. JDC EXPLAINED CURRENT SITE STATUS WITH CLEANUP REQUIREMENTS. RECOMMENDED THEY DO TANK TESTING AND SITE SURVEY TO DETERMINE CONTAMINATION EXTENT BASED ON CURRENT SITE DATA. THEY WILL CONTINUE NEGOTIATIONS W/ MR BREIER AND ADVISE DEC OF PURCHASE STATUS. 12/2/96: JDC TELCON W/ MR GMAL AHMED, HE STATED THAT HIS ATTORNEY HAS SENT PURCHASE PROPOSAL TO MR BRIER. BASIC ELEMENTS ARE THAT MR BRIER WILL HOLD MORTGAGE WITH AN ADJUSTMENT IN THE TOTAL PURCHASE PRICE FORE CLEANUP COSTS. MR AHMED STATED THAT HE AND HIS ASSOCIATE, MR GALAB WOULD INITIATE SITE REMEDIATION REQUIREMENTS AS STATED IN PREVIOUS CORRESPONDANCE TO MR BRIER IF PROPOSAL IS ACCEPTED. HE WILL NOTIFY 12/5/96: DRAFTED SHORT ORDER CONSENT AGAINST MR JAMES BRIER. 3/29/97: JDC RESUBMITTED LEGAL SHORT ORDER CONSENT, INITIAL WAS NOT PROCESSED. 11/19/02:AES, SAC INSPECT SITE, 2 MONITORING WELLS FOUND ON-SITE AND A NEW PUMP ISLAND CANOPY WAS INSTALLED, MR. HAROLD GEIGER CAME TO THE SITE, SAC TOLD HIM ABOUT OPEN SPILL, MR. GEIGER SAID HE WAS UNAWARE OF SPILL, SAC TOLD HIM SITE ASSESSMENT IS REQUIRED, WILL FOLLOW UP W/LETTER REQUIRING SITE ASSESSMENT IN A MONTH OR SITE WILL BE REFERRED TO LEGAL DEPARTMENT. 11/21/02:SAC DISCUSS SITE W/PJB, PJB REQUESTED WELLS BE SAMPLED FIRST TO DETERMINE IF PRODUCT REMAINS IN WELL AND TO HAVE WELLS SAMPLED AND ANALYZED, BASED ON RESULTS FURTHER WORK MAYBE REQUIRED. IF NO SAMPLING TAKES PLACE THEN SITE WILL BE REFERED TO LEGAL AFFAIRS. 11/22/02:DRAFTED LETTER REQUIRING SAMPLING AND ANALYZING OF THE WELLS, RESULTS MUST BE RECEIVED BY JANUARY 15, 2003 OR WE REFER SITE TO LEGAL AFFAIRS. 12/17/02:SAC TELECON HAROLD GEIGER, MR. GEIGER SAID THAT HE IS GOING TO CONTACT UPSTATE LABORAOTRIES TO TAKE SAMPLES, HE AGREED TO CONTACT SAC WHEN SAMPLES WILL BE TAKEN AND HE WILL BE PRESENT ALSO. 1/14/03:SAC INSPECT SITE, MET W/HAROLD GEIGER AND SCOTT OVERHOFF - HAZARD EVALUATIONS WHO WAS HIRED TO SAMPLE THE WELLS, BOTH WELLS DID NOT HAVE SEPARATE PHASE PRODUCT. WATER IN BOTH WELLS DID HAVE INTERMITTENT VERY SLIGHT STRINGY SHEEN, WELL NEAREST THE KEROSENE TANK HAD STRONG STALE/SEWER TYPE ODORS, NO ODORS OBSERVED IN WELL NEAREST THE CORNER. 2/17/03:SAC TELECON SCOTT OVERHOFF - HAZARD EVALUATIONS, MR. OVERHOFF RECEIVED ANALYTICAL RESULTS FROM SAMPLING AND IS WAITING FOR APPROVAL FROM MR. GEIGER TO SEND THEM INTO TO DEC, SAC TELECON HAROLD GEIGER, MR. GEIGER WAS UNAWARE THAT SAMPLE RESULTS WERE NOT SENT TO DEC AND WILL CALL HAZARD EVALUATIONS TO APPROVE HAVING THE RESULTS SENT TO DEC. SAC DRAFTED LETTER REQUIRING RESULTS BY 2/28/03. 2/18/03:SAC TELECON SCOTT OVERHOFF, HE SPOKE TO MR. GEIGER AND HE WILL BE SENDING IN A COPY OF THE RESULTS FROM THE WELL SAMPLING. 2/20/03: RECEIVED COPY OF RESULTS FROM WELL SAMPLING, THE RESULTS OF THE SOUTH WELL ARE ABOVE GROUNDWATER STANDARDS AND THE TOTAL 8260 STARS PARAMETERS ARE ALMOST 11000 ppb WITH A TOLUENE CONCENTRATION OF 9700 ppb, DRAFTED LETTER REQUIRING WORKPLAN BY 4/15/03. 4/2/03:SAC MET W/HAROLD GEIGER, MR. GEIGER REQUESTED THAT HE ONLY TREAT THE WELL, SAC AGREED TO ALLOW THIS AS A FIRST APPROACH, MR. GEIGER WILL CONTACT SCOTT OVERHOFF TO DEVELOP WORKPLAN AND DO THE WORK. 4/16/03:RECEIVED WORKPLAN FROM ENSOL TO BIOTREAT THE WELLS ON-SITE THROUGH FOUR INJECTIONS. 8/27/03:RECEIVED FIELD REPORTS FOR THE BIOTREATMENT OF THE WELLS. 10/30/03: RECEIVED RESULTS OF SAMPLING AFTER BIO-TREATMENT, LEVELS IN WELLS HAVE DECREASED, NORTH WELL HAD LEVEL OF 3.07 ug/I FOR VOLATILES AND 29.2 ug/I FOR MTBE, SOUTH WELL LEVEL WAS ND AND 3.04 ug/I FOR MTBE. 11/10/03:DRAFTED LETTER REQUIRING ADDITIONAL SAMPLING OF WELLS NEXT SPRING, 4/22/04: RECEIVED SECOND ROUND OF WELL SAMPLING. 5/10/04:REVIEWED 2ND ROUND OF SAMPLING, RESULTS WERE BELOW GW

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

MET WITH JERRY MILNE - EISENBACH & PETER PARAGON - ALASKAN. 1 15K #6 OIL TANK EMPTIED & CLEANED IN PLACE, WATER ENTERING BOTTOM OF TANK. WARMING 2ND #6 OIL TANK, TO BE CLEANED IN PLACE. BLACK OILY SOIL BETWEEN 2 PARTIALLY EXPOSED TANKS. 1 OF 2 CHLORINATED SOLVENT TANKS REMOVED & CLEANED, THEY NOTICED SOLVENT ODOR WHILE REMOVING. OTHER SOLVENT TANK PARTIALLY EXPOSED. NOTE: THEY HAVE INSTALLED 6 2 MW'S ON SITE. MILNE TOLD ME THEY DETECTED PCB'S, ETC. IN MW CLOSEST TO SOLVENT TANKS. I ASKED FOR DAVE COMENALE TO CALL ME NEXT WEEK & ADVISE WHEN READY TO PULL REMAINING TANKS, 12/12/95: MNP TELECON WITH DAVE COMENALE - EISENBACH, PLAN TO PUMP WATER OUT FROM TANKS. I GAVE HIM DISPOSAL & TREATMENT OPTIONS. TO PULL TANKS NEXT WEEK. HE WILL NOTIFY ME FOR INSP. BEFORE BACKFILLING. ALSO, MW SAMPLE RESULTS SENT TO DEC, BUT HAD TO CHECK TO FIND OUT WHO. 12/12/95: RECEIVED FAX OF LETTER TO MARTIN DOSTER, INDICATING INVESTIGATION REPORT ATTACHED FOR REVIEW. 12/15/95: MNP DISCUSSED WITH MARTY DOSTER. HE RECEIVED PRELIMINARY INVESTIGATON REPORT INDICATING MINOR CONTAMINANTS AT SITE. DOSTER GAVE ME REPORT TO REVIEW. 12/22/95: MNP REVIEW OF 7/19/94 EISENBACH INVESTIGATION REPORT. LOW PPB EXCEEDANCES OF STARS MEMO #1 & TCE IN MW'S & SOIL BORINGS. 01/02/96: MNP TELECON WITH DAVE COMENALE - EISENBACH. PLAN TO REMOVE OIL & SOLVENT TANKS BY END OF NEXT WEEK. I ASKED FOR ADVANCE NOTIFICATION FOR DEC INSP. BEFORE BACKFILLING. WE DISCUSSED SAMPLING OF OIL & SOLVENT TANK PITS. HE WILL FAX SAMPLING PLAN WITH TANK WATER SAMPLING RESULTS. TO SEND LETTER. 01/03/96: MNP & MARTY DOSTER DISCUSSION. NO DHWR INVOLVEMENT NEEDED AT THIS TIME. DSM TO FOLLOWUP, TO LET DOSTER KNOW ABOUT ANY SIGNIFICANT HAZ-WASTE CONTAMINANTS. 01/08/96: MNP TELECON WITH DAVE COMENALE - EISENBACH. TANKS TO BE REMOVED 1/10/96. TO CALL WHEN READY TO INSP. COMENALE WILL SEND HIS SAMPLING PLAN ASAP. 01/16/96: MNP INSPECTION, MET WITH JERRY MILNE - EISENBACH & LARRY SCHIAVONNE - CITY OF BUFFALO. ALL 4 TANKS REMOVED. SMALL PILE OF OI CONTAMINATED SOIL STAGED ON PLASTIC. CONTAMINATED SOIL & APPROX. 1 FOOT OF WATER WITH SHEEN IN #6 TANK PIT. OIL PRODUCT SEEPING IN FROM SIDES. CONTAMINATED WATER & SOIL MUST BE REMOVED. NOTE - CONCRETE PAD ON BOTTOM OF TANK PIT: PAD MUST BE REMOVED, BUT NOT UNTIL WATER IS PUMPED OUT. ALSO, CHECKED SOLVENT

TANK PIT, WATER CLEAR, NO VISIBLE CONTAMINATION OR ODOR. 01/16/96: MNP TELECON WITH DAVID COMENALE - EISENBACH. DISCUSSED WATER & CONTAMINATED SOIL REMOVAL & SAMPLING REQUIREMENTS, STILL NEED SAMPLING PLAN FOR SOLVENT TANK PIT. 01/17/96: MNP TELECON WITH DAVID COMENALE - EISENBACH. DISCUSSED WATER SAMPLING & DISPOSAL OPTIONS RECOMMENDED WATER REMOVAL PRIOR TO ADDITIONAL EXCAVATION OR REMOVAL OF CONCRETE PAD. 01/24/96: MNP TELECON TO DAVID COMENALE - EISENBACH. NOT IN, LEFT MESSAGE TO RETURN CALL. 01/24/96: MNP TELECON WITH DAVID COMENALE - EISENBACH. HE SAMPLED WATER IN #6 TANK PIT TO OBTAIN APPROVAL FROM BSA TO DISCHARGE INTO SEWER, EXPECTS RESULTS TODAY. PLAN TO PUMP OUT WATER & CONTINUE CLEANUP NEXT WEEK. HE AGREED TO NOTIFY ME IN ADVANCE TO ARRANGE INSP. PRIOR TO ANY BACKFILLING. HE IS ALSO WAITING FOR RESULTS FROM HIS LAB ON THE METHANAL & KETONE TO DETERMINE WHAT SAMPLING TO DO ON SOLVENT TANK PIT. TO FAX ME SAMPLING PLAN. 01/30/96: PROPOSED SOLVENT SAMPLE PLAN & 4/27/95 SAMPLE RESULTS OF SOLVENT TANKS. SOME EXCEEDANCES OF STARS MEMO #1 & HIGH TPH NOTED, ESPECIALLY IN NORTH TANK. TO SAMPLE BOTH SOLVENT TANK PITS FOR EPA METHODS 8021 STARS MEMO #1, 8260 VOLATILES, KETONES & METHANOL. TO SAMPLE SIDES & BOTTOM OF EACH PIT ALONG WITH A SEPARATE GW SAMPLE 02/02/96: MNP TELECON WITH DAVID COMENALE - EISENBACH. TO COMPLETE CONTRACT CITY THIS WEEK & PLAN TO DO TANK PIT EXCAVATION & SAMPLING WEEK OF 2/12/96. HE WILL CALL AT LEAST 2 DAYS PRIOR WITH FIRM SCHEDULE. 03/21/96: MNP TELECON WITH TONY C. - EISENBACH. DAVID COMENALE NO LONGER WITH COMPANY, TONY DID NOT KNOW WHO WAS IN CHARGE OF PROJECT. HE WILL HAVE SOMEONE CALL ME. 03/22/96:MNP TELECON WITH JACK EISENBACH - EISENBACH. HE IS NOW HANDLING THIS PROJECT PERSONALLY. ADDITIONAL SOIL & WATER SAMPLES HAVE BEEN COLLECTED. HE WILL SEND ME A LETTER WITH A WORK SCHEDULE EARLY NEXT WEEK. 04/11/96: RECEIVED LETTER FROM JACK EISENBACH. THEY COLLECTED SOIL & WATER SAMPLES LAST WEEK, INCLUDING THE TANK PIT. SOME ADDITIONAL EXCAVATION WAS DONE ON THE EAST END OF THE SITE. EXPECT SAMPLE RESULTS IN ONE WEEK. TO FORWARD SAMPLE RESULTS WITH ACTION PLAN FOR DEC REVIEW WITHIN 2-3 WEEKS. 04/30/96: RECEIVED JACK EISENBACH REPORT CONTAINING 3/21/96 SAMPLES. 05/06/96: MNP REVIEW OF JACK EISENBACH REPORT. SAMPLES ANALYZED FOR TOTAL HEAVY METALS, PCB'S, HALOGENATED VOLATILES, AROMATIC VOLATILES, PETROLEUM PRODUCTS, & SEMIVOLATILES. NORTH & SOUTH TANK PITS MEET STARS #1. FUEL OIL TANK PIT BOTTOM EXCEEDS STARS #1 & DETECTED TRICHLOROETHENE AT 800 PPB. ALSO MW'S 1,2,4,6,7 MEET STARS #1 CRITERIA. FUEL OIL TANK PIT NEEDS REMEDIATION. 05/15/96: MNP INSPECTION, MET WITH ERIC DOUSHARM - JEE & ALASKAN OIL REMEDIATION. OVER 200 CU YDS OIL CONTAMINATED SOIL EXCAVATED SO FAR. OIL FILM & SHEEN ON WATER IN EXCAVATION. UNABLE TO CHECK BOTTOM OF EXCAVATION. WORK STILL UNDERWAY. THEY STOPPED PUMPING WATER WHEN OIL APPEARED EARLIER TODAY. THE OILY WATER MUST BE PUMPED OUT TO CHECK EXCAVATION & DETERMINE IF CONCRETE SLAB MUST BE REMOVED. TO DISCUSS IN MEETING AT CITY HALL TOMORROW. JEE TO CALL ME WHEN READY FOR ANOTHER INSP. 05/17/96: MNP INSPECTION, MET WITH ERIC DOUSHARM - JEE. THEY ALREADY EXCAVATED ABOUT 500 TONS PETROLEUM CONTAMINATED SOIL. SHEEN ON WATER IN EXCAVATION. ONLY 3,000 GALS. WATER PUMPED INTO VAC TRUCK. DECANTED 1 HR BEFORE DISCHARGING TO BSA SEWER SYSTEM. THEY HAVE REMOVED CONCRETE PAD FROM BOTTOM OF EXCAVATION. VISIBLE CLEAN CLAY BELOW. 2 COMPOSITE SIDE SAMPLES COLLECTED, BUT NEED NORTH SIDE SAMPLED YET. ALSO, I REQUESTED 2 WATER SAMPLES. NEED TO ANALYZE FOR EPA 8021 & 8270, STARS #1 & DOH 310-13. I RECOMMENDED PUMPING MORE WATER BEFORE COLLECTING WATER SAMPLES. I REQUESTED NO BACKFILLING OF EXCAVATION UNTIL DEC REVIEWS SAMPLE RESULTS. 06/18/96: RECEIVED FAX COPY OF SAMPLE RESULTS FROM JEE.

# S100560418

06/19/96: RECEIVED NOTE ATTACHED TO FAX COPY OF ABOVE SAMPLE RESULTS FROM MARTY DOSTER - DHWR. INDICATED HIGH LEVELS. 06/27/96: MNP REVIEWED CES 6/17/96 SAMPLE REPORT. SIDE SAMPLE EXCEEDED STARS #1 FOR EPA METHODS 8021 & 8270; INDIVIDUAL LEVELS BETWEEN 35-500 PPB FOR SEMI-VOLATILES & 180-1570 PPB FOR VOLATILES. BOTTOM OF PIT SAMPLES BELOW STARS #1 LIMITS. MORE CLEANUP NEEDED. 07/01/96: MNP TELECON WITH DAVID BABOWITZ - JEE. EXCAVATION BACKFILLED BEFORE GROUNDWATER SAMPLES WERE COLLECTED. I REMINDED HIM DEC REQUESTED EXCAVATION REMAIN OPEN. WE DISCUSSED HIGH SAMPLE RESULTS FOR SIDE SAMPLE. NEED REMEDIATION PLAN TO ADDRESS REMAINING CONTAMINATION IN SOIL & GW. 09/16/96: RECEIVED REMEDIATION PLAN FROM JES. THEY PLAN TO EXCAVATE REMAINING CONTAMINATION AT THE SITE. 09/23/96: MNP TELECON W/ DAVID BABOWITZ - JEE. DISCUSSED REMEDIATION PLAN TO EXCAVATE ADDITIONAL CONTAMINATION AT THE SITE. I RECOMMENDED TEST PITS AROUND ORIGINAL TANK PIT PRIOR TO REMEDIATION, SO THEY CAN DETERMINE EXTENT OF GROUNDWATER & SOIL CONTAMINATION. I ALSO REQUESTED A WORK SCHEDULE SO I CAN INSPECT SITE BEFORE ANY BACKFILLING. HE WILL ADVISE JACK EISENBACH OF MY RECOMMENDATIONS. WE ALSO SETUP UP A MEETING WITH JACK EISENBACH IN OUR OFFICE ON 9/26/96 AT 1:00PM. 10/08/96: MNP TELECON WITH DAVID BABOWITZ - JEE. TO EXCAVATE TEST PITS ON 10/10/96. I WILL MEET MARK RUNKE - JEE ON SITE AT 10:00 AM. 10/10/96: MNP INSPECTION & MEETING WITH MARK RUNKE - JEE. 3 TEST PITS DUG OUTSIDE ORIGINAL TANK PIT. TP#1 - RED CLAY, NO VISIBLE CONTAMINATION; TP#2 - OIL CONTAMINATED SOIL & DEBRIS, SHEEN ON WATER; TP#3 - CONCRETE DEBIS, NO VISIBLE SHEEN; TP#4 - DEBRIS DOWN TO 4 FT. THEN CLAY, NO VISIBLE CONTAMINATION. RUNKE TO SEND REPORT WITH CLEANUP RECOMENDATIONS. (SEE SKETCH) 12/18/96: MNP INSPECTION, NO CHANGE SINCE OCTOBER. NO MORE CLEANUP DONE YET. 01/06/97: MNP TELECON WITH MARK RUNKE - JEE EXCAVATIONS RESAMPLED RECENTLY, PLAN TO VAC OIL/WATER & EXCAVATE CONTAMINATED SOIL WEEK OF 1/13/97. 01/09/97: RECEIVED LETTER FROM RUNKE - JEE. WORK TO BEGIN WEEK OF 1/13/97, TO NOTIFY IN ADVANCE WHAT DAY WORK WILL BEGIN. 01/10/97: MNP TELECON WITH MARK RUNKE - JEE. TO START DIGGING ON 1/14/97, I WILL TRY TO INSPECT THAT AFTERNOON OR 1/15/97 IN AM. 01/10/97: RECEIVED FAX INDICATING WORK STARTING 1/14/97 AT 7:00 AM. 01/24/97: MNP TELECON WITH DAVID BABOWITZ - JEE. HE RECEIVED SAMPLE RESULTS FROM CES. ALL SOIL SAMPLES OK, BUT MINOR EXCEEDANCES IN GW. HE WILL FAX COPY OF SAMPLE REPORT FOR MY REVIEW. 01/24/97: RECEIVED FAX OF CES 1/24/97 SAMPLE REPORT. SOIL SAMPLES MEET STARS #1, BUT 1,2.4 TRIMETHYLBENZENE & NAPTHALENE EXCEEDS NYSDEC STANDARDS IN BOTH GW SAMPLES. 01/29/97: MNP TELECON WITH DAVID BABOWITZ - JEE. WE DISCUSSED GW SAMPLE RESULTS, 1,2,4 TRIMETHYLBENZENE & NAPTHALENE EXCEEDS NYSDEC STANDARDS. DEC CAN MAKE SITE INACTIVE, BUT CITY WANTS JEE TO MEET DEC CLSURE REQUIREMENTS. BABOWITZ PROPOSED PUMPING OUT REMAINING WATER INTO BSA (USING PERMIT), THEN RESAMPLE. IF GW SAMPLE RESULTS MEET DEC LIMITS SITE CAN BE CLOSED. I AGREED WITH PROPOSAL & WILL SEND A LETTER TO CITY WITH CC TO JEE. 03/13/97: MNP INSPECTION, MET WITH MARK RUNKE & DAVID BABOWITZ - JEE. REMAINING CONTAMINATED SOIL BEING HAULED OFF SITE. WATER BEING PUMPED FROM EXCAVATION FOR OVER 5 HOURS. ESTIMATE 12 WATER LEVEL DROP. LESS THAN HALF OF WATER REMOVED. JEE TO CONTINUE PUMPING THEN COLLECT WATER SAMPLE AT END OF DAY. DEC CLOSURE DECISION WILL BE BASED ON SAMPLE RESULTS IF VOLUME OF WATER PUMPED IS CONSIDERED TO BE REPRESENTATIVE. WE ALSO CHECKED CLOSEST MW'S, NO SHEENS OR ODORS NOTED. 03/20/97: RECEIVED COPY OF LETTER TO CITY HALL SUMMARIZING STATUS OF PROJECT. 03/26/97: RECEIVED LETTER & CES 3/21/97 SAMPLE REPORT. THE 2 SAMPLES COLLECTED FROM THE EXCAVATION ON 3/13/97 WERE ANALYZED FOR EPA METHODS 8021 & 8270, STARS #1. BOTH

Lower Actual: 639 ft.	Name: Address: City,State,Zip: Site Code: Program: HW Code: Site Class: Class N: SWIS: Region: Town: Acres: Record Added: Record Updated: Updated By: Site Description:	EAST FERRY STREET 858 E. FERRY STREET BUFFALO (C), NY 14211- 57197 ERP B00007 N N 1502 9 Buffalo (c) 3.000 10/28/2003 02/19/2013 MLDOSTER Location: The 858 East Ferry Street site is a 3.32 acre property located in the City of Buffalo. The site is located in an urban area. Site Features: The site is currently a vacant lot. The site is situated on the north side of East Ferry Street and is zoned as commercial/industrial. The site is bordered on the north by a New York Central Railroad embankment and industrial property occupied by International Extruded Products. The True Bethel Baptist Church is located opposite of the site, on the south side of East Ferry Street. TNT Used Autos, a small used car lot, is located to the west of the		
		site. The adjacent properties west of the site are currently zoned commercial/industrial. Current Zoning/Use(s): This site is currently vacant and zoned for industrial use. Historical Use(s): At the adjacent property to the west of 858 E. Ferry Street, now occupied by the used auto lot, the 1939 Sanborn map showed that a Michael Heymar Company operated a zinc and lead smelting and refining facility. Two buildings were once located on the Heyman property; the west building was the foundry and blast furnace, and the east building, nearest the 858 E. Ferry Street site, housed the metal casting facility. A 1958 aerial photo shows a path leading from the Heyman property to the central part of the East Ferry Street site. The location of the Heyman facility adjacent to the site and the path leading onto the site support the past disposal of lead-contaminated ash in this location. Under the Environmental Restoration Program (ERP), the City of Buffalo completed an investigation in 1997-1998. The results from this investigation showed significant lead contamination in soil. Based on the results of this investigation, a ROD was signed by NYSDEC in March 1999. The selected remedy included the excavation off-site disposal of hazardous waste and contaminated soil. The ROD also stated that the remedy would be deferred until further investigation is conducted to the west of the site. Since extensive off-site investigation and completed remediation of the site under

### **EAST FERRY STREET (Continued)**

Env Problem:

the State Superfund program. The site is currently considered as a single operable unit. An additional investigation was completed in 2001 by the NYSDEC at adjacent properties and the results indicated that the soil is contaminated with lead on adjacent properties. The March 1999 ROD was amended in August 2005 based on a significant increase in volume of lead contaminated soil. The amended remedy included the excavation of surface and subsurface contaminated soil from the site and disposal to a permitted landfill to achieve a clean up goal for unrestricted future use and the excavation of contaminated soil from off-site properties and disposal to a permitted landfill to achieve a clean up goal for industrial/commercial use which is consistent with the current zoning. The remedial design of the amended remedy was completed in February 2006. The remedial action completed in 2007 at the site and off-site properties removed the lead-contaminated soils from surface and subsurface. The excavated soils were treated on-site and disposed appropriately in an off-site landfill. Since the contaminated soils were removed the groundwater contamination was expected to decrease. After the successful completion of the remedial action at the site, a groundwater sampling event was conducted in May 2009. The results indicated that the on-site wells did not show lead contamination above groundwater standards, which was consistent with the sampling event during the investigation. Therefore, the site can be delisted and groundwater at the site need not be monitored in the future. Currently public water supply is available in this area. Operable Units: Site Geology and Hydrogeology: The overburden deposits in the region have been mapped as lake silts and clays. The thickness of the overburden at the study area varies from approximately 8.4 feet to 17.5 feet. Beneath the overburden deposits, the bedrock consists of the Middle Devonian age Onondaga Limestone. The primary hydrogeologic unit identified beneath the study area is the unconfined watertable aguifer present in the limestone of the Onondaga Formation. However, groundwater is present in the overburden and is found primarily in the ash type fill material and in the backfilled excavation of the Scajaquada Creek Drain. The water in the overburden is reportedly connected to the bedrock groundwater. Groundwater generally flows toward the Scajaguada Creek Drain. Nature and Extent of Contamination: Based on the results from investigations conducted at the site the lead-contaminated soils found at the on-site and off-site areas were located near and over the top of the covered Scajaquada Creek drain. The highest concentration of total lead detected in the surface soil was 11,500 ppm, which was found beneath a pile of gray ash. The concentrations found in the subsurface soil were as high as 28,500 ppm lead. There was a potential for the contamination from the soil to migrate to Creek Drain and the groundwater. During the investigation groundwater samples were collected from the site and off-site. Total lead was detected at a concentration of 400 g/l in the groundwater sample collected from the well located on the 856 East Ferry Street property. The sample from this well was the only sample that reported lead concentrations exceeding the NYSDEC groundwater standard. The remaining groundwater samples analyzed have detected total lead at or below groundwater standard. As stated in the amended Record of Decision (ROD), the remedial action completed in 2007 at the on-site and off-site properties removed lead contaminated soils from surface and subsurface to a clean up goal of 400 ppm of lead at the site and 1000 ppm of lead at off-site properties. As stated in the amended

event during the investigation. Therefore, the site can be delisted and groundwater at the site need not be monitored in the future. Currently public water supply is available in this area. The process of delisting the site has been completed. The site will be designated as 'C' which refers to as completed remediation. No monitoring or institutional controls are required. Site Geology and Hydrogeology: The overburden deposits in the region have been mapped as lake silts and clays. The thickness of the overburden at the study area varies from approximately 8.4 feet to 17.5 feet. Beneath the overburden deposits, the bedrock consists of the Middle Devonian age Onondaga Limestone. The primary hydrogeologic unit identified beneath the study area is the unconfined watertable aguifer present in the limestone of the Onondaga Formation. However, groundwater is present in the overburden and is found primarily in the ash type fill material and in the backfilled excavation of the Scajaquada Creek Drain. The water in the overburden is reportedly connected to the bedrock groundwater. Groundwater generally flows toward the Scajaguada Creek Drain. Env Problem: Nature and Extent of Contamination: Prior to Remediation: Based on the results from investigations conducted at the site the lead-contaminated soils found at the on-site and off-site areas were located near and over the top of the covered Scajaguada Creek drain. The highest concentration of total lead detected in the surface soil was 11,500 ppm, which was found beneath a pile of gray ash. The concentrations found in the subsurface soil were as high as 28,500 ppm lead. There was a potential for the contamination from the soil to migrate to Creek Drain and the groundwater. During the investigation groundwater samples were collected from the site and off-site. Total lead was detected at a concentration of 400 g/l in the groundwater sample collected from the well located on the 856 East Ferry Street property. The sample from this well was the only sample that reported lead concentrations exceeding the NYSDEC groundwater standard. The remaining groundwater samples analyzed have detected total lead at or below groundwater standard. Post-Remediation: As stated in the amended Record of Decision (ROD), the remedial action completed in 2007 at the on-site and off-site properties removed lead contaminated soils from surface and subsurface to a clean up goal of 400 ppm of lead at the site and 1000 ppm of lead at off-site properties. As stated in the amended ROD, the goal of remediating the site to unrestricted future was achieved by implementing the remedy. After the successful completion of the remedial action at the site, a groundwater sampling event was conducted in May 2009. The results indicated that the on-site wells did not show lead contamination above groundwater standards, which was consistent with the sampling event during the investigation. Therefore, groundwater at the site need not be monitored in the future. Currently public water supply is available in this area. Currently the site declassified as 'C" indicating that the remediation is completed at the site and no future monitoring of the site is required. Health Problem: No human exposure to contamination from this site is expected since contaminated soil is either removed or covered and public water serves the area. DEC Memo:	spill to soil
Remarks:	11/20/12 TDJ SPOKE WITH CALLER WHO STATED WORK BEING DONE ON PROJECT
Remarks.	EXPOSED POSSIBLE HYDRAULIC OIL SPILL TO SURFACE. REMEDIAL WORK HAD
	BEEN COMPLETED ON THIS SITE PLACING ALL CLEAN FILL AT THIS SPOT.
	CONTAMINATED SOIL WILL BE STAGED AND DISPOSED. 01/31/13 TDJ RECEIVED
	REPORT SHOWING CONFIRMATORY SAMPLING COMPLETED DURING THE
	CONSTRUCTION PROJECT AT THE SITE. RESULTS SHOWED NUMBERS BELOW CP-51
	LIMITS FOR VOLATILE AND SEMI-VOLATILES EXCEPT FOR THE SOUTH WALL.
	ADDITIONAL SOIL WAS REMOVED AND THE SIDE WAS RESAMPLED. THE RESULTS
	SHOWED ND FOR ALL ANALYTES AFTER THE ADDITIONAL WORK. DISPOSAL
	RECEIPTS WERE ALSO INCLUDED WITH THE REPORT. WORK WAS COMPLETED TO
	THE SATISFACTION OF THE PM OF DEC. LETTER WILL BE SENT FOR NO FURTHER
	WORK REQUIRED FOR THIS SPILL. NO FURTHER ACTION FILE CLOSED

### Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Env Problem:

#### S127750702

during previous investigations in the site overburden. Groundwater is present in the underlying bedrock at the site and flows to the west. Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), herbicides/pesticides, and per- and polyfluoroalkyl substances (PFAS). Soil vapor was analyzed for VOCs. The primary contaminants of concern are VOCs, SVOCs, herbicides/pesticides and emerging contaminants above unrestricted soil cleanup objectives (USCOs) as follows. Surface Soils: Surface soils were sampled from 0-2 inches below ground surface (bgs) and analyzed for SVOCs, metals, PCBs, herbicides/pesticides, and emerging contaminants. SVOCs detected in surface soil samples included benzo(a)anthracene at concentrations up to 8 parts per million (ppm) (USCO 1 ppm), benzo(a)pyrene at concentrations up to 8.4 ppm (USCO 1.0 ppm); benzo(b)fluoranthene at concentrations up to 9.6 ppm (USCO 1 ppm); benzo(k)fluoranthene at concentrations up to 3.7 ppm (USCO 0.8 ppm); chrysene at concentrations up to 7 ppm (USCO 1 ppm); dibenzo(a,h)anthracene at concentrations up to 1.3 ppm (USCO 0.33 ppm); and indeno(1,2,3-cd)pyrene at concentrations up to 4.4 ppm (USCO 0.5 ppm). Metals detected in surface soil samples included lead at concentrations up to 105 ppm (USCO 63 ppm); mercury at concentrations up to 0.2 ppm (USCO 0.18 ppm); chromium at concentrations up to 72.3 ppm (USCO 30 ppm); copper at concentrations up to 74 ppm (USCO 50 ppm); nickel at concentrations up to 205 ppm (USCO 30 ppm); and zinc at concentrations up to 144 ppm (USCO 109 ppm). PCBs were detected at concentrations up to 0.23 ppm (USCO 0.1 ppm) USCOs. Perfluorooctanesulfonic acid (PFOS) was detected in surface soil at concentrations up to 3.1 ppb (unrestricted use guidance value 0.88 parts per billion [ppb]). PFOA was not detected. Pesticides and herbicides detected in surface soil samples include 4,4'-DDE at concentrations up to 0.01 ppm (USCO 0.0033 ppm) and 4,4'-DDT at concentrations up to 0.015 ppm (USCO 0.0033 ppm). Data does not indicate any off-site impacts in surface soil emanating from the site. Subsurface soils: Subsurface soils were sampled from 2 inches to 3 feet bgs and analyzed for volatile organic compounds (VOCs), SVOCs, metals, herbicides/pesticides, PCBs and emerging contaminants. There were no exceedances of USCOs for VOCs identified in these samples. SVOCs detected in subsurface soils include benzo(a)anthracene at concentrations up to 41 ppm (USCO 1 ppm); benzo(a)pyrene at concentrations up to 40 ppm (USCO 1 ppm); benzo(b)fluoranthene at concentrations up to 49 ppm (USCO 1 ppm); benzo(k)fluoranthene at concentrations up to 19 ppm (USCO 0.8 ppm); chrysene at concentrations up to 41 ppm (USCO 1 ppm); dibenzo(a,h)anthracene at concentrations up to 6 ppm (USCO 0.33 ppm); and indeno(1,2,3-cd)pyrene at concentrations up to 17 ppm (USCO 0.5 ppm). Metals detected in subsurface soils include arsenic at concentrations up to 30.3 ppm (USCO 13 ppm); barium at concentrations up to 958 ppm (USCO 350 ppm); chromium at concentrations up to 224 ppm (USCO 30 ppm); copper at concentrations up to 141 ppm (USCO 50 ppm); lead at concentrations up to 2,570 ppm (USCO 63 ppm); mercury at concentrations up to 0.52 ppm (USCO 0.18 ppm); nickel at concentrations up to 300 ppm (USCO 30 ppm); and zinc at concentrations up to 315 ppm (USCO 109 ppm). PCBs were detected in subsurface soils in concentrations up to 3.5 ppm (USCO 0.1 ppm). Pesticides and herbicides detected in subsurface soils include 4.4'-DDD at concentrations up to 0.016 ppm (USCO 0.0033 ppm): 4,4'-DDE at concentrations up to 0.021 ppm (USCO 0.0033 ppm);

### S127750702

. OLIVE SENIOR MANOR SITE (Cont	nued) S127750702
	<ul> <li>4,4'-DDT at concentrations up to 0.07 ppm (0.0033 ppm); and dieldrin at concentrations up to 0.0065 ppm (USCO 0.005 ppm).</li> <li>Perfluorooctanoic acid (PFOA) was detected at concentrations up to 1 ppb (unrestricted use guidance value 0.66 ppb), and PFOS was detected at concentrations up to 11 ppb (unrestricted use guidance value 0.88 ppb). Groundwater: Groundwater samples were analyzed for VOCs, SVOCs, metals, pesticides/herbicides, PCBs, and emergent contaminants.</li> <li>Samples were evaluated against the NYS Groundwater Quality Standards (GWQS). No exceedances of GWQS for SVOCs, herbicides, or PCBs were identified. VOCs detected in groundwater include</li> <li>cis-1,2-dichloroethene at concentrations up to 40 ppb (GWQS 5 ppb) and trichloroethene at concentrations up to 210 ppb (GWQS 5 ppb).</li> <li>Metals detected in groundwater include antimony at concentrations up to 6.8 ppb (GWQS 3 ppb); cobalt at concentrations up to 11 ppb (GWQS 5 ppb); and sodium at concentrations up to 39,200 ppb (GWQS 20,000 ppb). Samples were filtered due to turbidity; therefore, cobalt and antimony concentrations are not representative of stable groundwater sonditions on site. Elevated sodium concentration in groundwater is likely due to road salt. The pesticide beta-BHC was detected in groundwater at a concentration of 0.026 ppb (GWQS 0.01 ppb). PFOA was detected at concentrations up to 390 ppt (guidance value 6.7 ppt) and PFOS at concentrations up to 390 ppt (guidance value 2.7 ppt). Data does not indicate any off-site impacts in groundwater emanating from the site. The potential for the migration of VOCs and PFAS from an adjacent offsite source onto the site will be explored in the PDI. Soil Vapor: Soil vapor studies included the collection and testing of soil vapor samples from three locations within the planned footprint of the building to be constructed on the site. Samples were analyzed for VOCs. VOCs detected in soil vapor on site include tetrachloroethene (PCE) at concentrations up to 0.71 micrograms per cubi</li></ul>
Health Problem:	People will not come into contact with contaminated soil or groundwater unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. However, future development on-site will be evaluated for soil vapor intrusion. A separate off-site and upgradient investigation is ongoing and will provide more information as to potential exposure
	via upgradient sources.

### MT. OLIVE SENIOR MANOR SITE 703 EAST DELAVAN AVENUE BUFFALO, NY 14215 618622 C915377 BCP A 9 1.300 04/30/2021 05/10/2023 UNKNOWN AECAPRIO Location: The Mt. Olive Senior Mano

Location: The Mt. Olive Senior Manor site is an approximately 1.3-acre site located in a highly developed urban area at 703 East Delavan Avenue in the City of Buffalo, Erie County. The other portion of the 2.63-acre parcel at 703 East Delevan Avenue is not part of the BCP site. The site is at the southeast corner of East Delavan and Sheridan Avenues. It is bordered by the remaining portion of 703 East Delavan to the north, commercial and industrial properties to the south, an industrial property to the west and Sheridan Avenue to the east. Site Features: The site consists of a grass covered athletic field and a small portion of an adjacent asphalt parking lot to the north. Zoning and Land Use: The current zoning for the Site is N-3R (Residential), defined as moderately compact residential blocks, which occasionally include small mixed-use buildings. The site is currently a grass covered athletic field. The redevelopment plan for the site is a 3-story affordable housing development for seniors, consistent with the zoning assigned to the site. Past Use of the Site: The 703 East Delavan parcel which includes this site has historically been developed with a church building, an associated parking lot and an athletic field. Historic fuel oil and gasoline storage tanks were identified in close proximity to the site along with historic automobile repair and rug/furniture cleaning, possibly with dry-cleaning operations, which were identified adjacent to the site. Site Geology and Hydrogeology: Previous investigation identified the site geology as primarily vegetative topsoil cover over varying types of fill materials ranging in depth from 3 inches to 2 feet below ground surface (fbgs) underlain by silty sand and/or fine sand in some locations. The site is situated over the Onondaga Formation. The Onondaga Formation is comprised of a limestone of varying texture, from coarse to very finely crystalline, with a dark gray to tan color and chert and fossils within. The unit has an approximate thickness of 150 feet. The depth to bedrock was identified at approximately 2 to 6 fbgs. The site is located within the Lake Erie-Niagara River major drainage basin, which is typified by little topographic relief that gently slopes westward towards Lake Erie and the Niagara River, except in the immediate vicinity of major drainage ways. Regionally, groundwater is expected to flow westerly

MT. OLIVE SENIOR MANOR SITE (	ontinued) S12775070	2
	towards the Niagara River. Locally, groundwater was not encountered during previous investigations in the site overburden. Groundwater is present in the underlying bedrock at the site and flows to the west.	
Summary:	People will not come into contact with contaminated soil or groundwater unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. However, future development on-site will be evaluated for soil vapor intrusion. A separate off-site and upgradient investigation is ongoing and will provide more information as to potential exposure via upgradient sources.	
Summary:	Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), herbicides/pesticides, and per- and polyfluoroalkyl substances (PFAS). Soil vapor was analyzed for VOCs. The primary contaminants of concern are VOCs, SVOCs, herbicides/pesticides and emerging contaminants above unrestricted soil cleanup objectives (USCOs) as follows. Surface Soils: Surface soils were sampled from 0-2 inches below ground surface (bgs) and analyzed for SVOCs, metals, PCBs, herbicides/pesticides, and emerging contaminants. SVOCs detected in surface soil samples included benzo(a)anthracene at concentrations up to 8 parts per million (ppm) (USCO 1 ppm), benzo(a)pyrene at concentrations up to 9.6 ppm (USCO 1.0 ppm); benzo(k)fluoranthene at concentrations up to 3.7 ppm (USCO 0.8 ppm); chrysene at concentrations up to 1.3 ppm (USCO 0.8 ppm); chrysene at concentrations up to 1.3 ppm (USCO 0.3 ppm); benzo(k)fluoranthene at concentrations up to 4.4 ppm (USCO 0.5 ppm). Metals detected in surface soil samples included lead at concentrations up to 105 ppm (USCO 0.18 ppm); chrysene at concentrations up to 1.3 ppm (USCO 1.9 ppm). Metals detected in surface soil samples included lead at concentrations up to 0.2 ppm (USCO 0.19 ppm); chrysene at concentrations up to 0.20 ppm (USCO 0.19 ppm). PCBs were detected at concentrations up to 0.20 ppm (USCO 0.19 ppm). PCBs were detected at concentrations up to 0.20 ppm (USCO 0.19 ppm). PCBs were detected at concentrations up to 0.23 ppm (USCO 0.19 ppm). PCBs were detected in surface soil samples include 4.4-DDT at concentrations up to 0.115 ppm (USCO 0.0033 ppm) and 4.4'-DDT at concentrations up to 0.015 ppm (USCO 0.0033 ppm). Data does not indicate any off-site impacts in surface soil emanating from the site. Subsurface soils: Subsurface soils were sampled from 2 inches to 3 feet bgs and analyzed for volatile organic compounds (VOCs), SVOCs, metals, herbicides/pesticides, PCBs and emerging contaminants. There were n

benzo(a)pyrene at concentrations up to 40 ppm (USCO 1 ppm); benzo(b)fluoranthene at concentrations up to 49 ppm (USCO 1 ppm); benzo(k)fluoranthene at concentrations up to 19 ppm (USCO 0.8 ppm); chrysene at concentrations up to 41 ppm (USCO 1 ppm); dibenzo(a,h)anthracene at concentrations up to 6 ppm (USCO 0.33 ppm); and indeno(1,2,3-cd)pyrene at concentrations up to 17 ppm (USCO 0.5 ppm). Metals detected in subsurface soils include arsenic at concentrations up to 30.3 ppm (USCO 13 ppm); barium at concentrations up to 958 ppm (USCO 350 ppm); chromium at concentrations up to 224 ppm (USCO 30 ppm); copper at concentrations up to 141 ppm (USCO 50 ppm); lead at concentrations up to 2,570 ppm (USCO 63 ppm); mercury at concentrations up to 0.52 ppm (USCO 0.18 ppm); nickel at concentrations up to 300 ppm (USCO 30 ppm); and zinc at concentrations up to 315 ppm (USCO 109 ppm). PCBs were detected in subsurface soils in concentrations up to 3.5 ppm (USCO 0.1 ppm). Pesticides and herbicides detected in subsurface soils include 4,4'-DDD at concentrations up to 0.016 ppm (USCO 0.0033 ppm); 4,4'-DDE at concentrations up to 0.021 ppm (USCO 0.0033 ppm); 4,4'-DDT at concentrations up to 0.07 ppm (0.0033 ppm); and dieldrin at concentrations up to 0.0065 ppm (USCO 0.005 ppm). Perfluorooctanoic acid (PFOA) was detected at concentrations up to 1 ppb (unrestricted use guidance value 0.66 ppb), and PFOS was detected at concentrations up to 11 ppb (unrestricted use guidance value 0.88 ppb). Groundwater: Groundwater samples were analyzed for VOCs, SVOCs, metals, pesticides/herbicides, PCBs, and emergent contaminants. Samples were evaluated against the NYS Groundwater Quality Standards (GWQS). No exceedances of GWQS for SVOCs, herbicides, or PCBs were identified. VOCs detected in groundwater include cis-1,2-dichloroethene at concentrations up to 40 ppb (GWQS 5 ppb) and trichloroethene at concentrations up to 210 ppb (GWQS 5 ppb). Metals detected in groundwater include antimony at concentrations up to 6.8 ppb (GWQS 3 ppb); cobalt at concentrations up to 11 ppb (GWQS 5 ppb); and sodium at concentrations up to 39,200 ppb (GWQS 20,000 ppb). Samples were filtered due to turbidity; therefore, cobalt and antimony concentrations are not representative of stable groundwater conditions on site. Elevated sodium concentration in groundwater is likely due to road salt. The pesticide beta-BHC was detected in groundwater at a concentration of 0.026 ppb (GWQS 0.01 ppb). PFOA was detected at concentrations up to 75 ppt (guidance value 6.7 ppt) and PFOS at concentrations up to 390 ppt (guidance value 2.7 ppt) . Data does not indicate any off-site impacts in groundwater emanating from the site. The potential for the migration of VOCs and PFAS from an adjacent offsite source onto the site will be explored in the PDI. Soil Vapor: Soil vapor studies included the collection and testing of soil vapor samples from three locations within the planned footprint of the building to be constructed on the site. Samples were analyzed for VOCs. VOCs detected in soil vapor on site include tetrachloroethene (PCE) at concentration of 3.2 micrograms per cubic meter and trichloroethene (TCE) at concentrations up to 0.71 micrograms per cubic meter.

#### CURTISS WRIGHT CORPORATION (Continued)

#### 1000413812

W/GARY KLAWINSKI - GZA, MR. KLAWINSKI SHOWED RESULTS OF ADDITIONAL GEOPROBE STUDY THAT WAS DONE AS A RESULT OF SUBSURFACE INVESTIGATION WORK THAT WAS COMPLETED LAST YEAR, DISCUSSED PROJECT, SAC TO REVIEW REPORTS AND DISCUSS W/RNL, REQUIREMENTS BASED ON REPORTS. 6/21/99:SAC DISCUSS SITE W/RNL, TANK 4 AREA - (2)- 11,250 GALLON FUEL OIL TANKS REQUESTED TO BE CLOSED IN PLACE, TEST PIT SAMPLE RESULTS FROM RIGHT NEXT TO THE TANKS USING TCLP 8021 & 8270 TO ANALYZE SAMPLES SHOW ONLY PARAMETER ABOVE STARS IS BENZENE AT 1.4 ppb, THEREFORE TANKS CAN BE CLOSED IN PLACE AND NO FURTHER WORK REQUIRED IN AREA, TANK 5 AREA -(1) - 350 GALLON GASOLINE TANK, CONTAMINATED SOIL AROUND THE TANK WILL BE REMOVED AND SINCE TANK WAS INSTALLED INTO THE BEDROCK ONLY SIDE WALL SAMPLES WILL BE REQUIRED, TANK 1 AREA - FORMER LOCATION OF (1) - 200 GALLON GASOLINE TANK, CONTAMINATED SOIL IN THE AREA MUST BE REMOVED, AND ONCE THE CONTAMINATED SOIL HAS BEEN REMOVED THEY MUST SAMPLE THE SOIL TO CONFIRM THE CLEANUP AND INSTALL A WELL AT THE SITE TO MAKE SURE GW NO LONGER AFFECTED, ADDITIONAL WORK IS REQUIRED AROUND THE TANK 2 AREA BECAUSE OF THE OIL DROPLETS FOUND IN THE WELL INSTALLED FROM GP-3 AND FOR THE TANK 3 AREA MORE WORK IS REQUIRED BASED ON THE SOIL LEVELS FOUND FROM GP-22. 6/22/99:SAC MET W/GARY KLAWINSKI - GZA, BILL SCHMIDT AND JAMES THARP - WYMAN GORDON, DISCUSSED REQUIREMENTS FOR THE SITE, TANK AREAS 1, 4, & 5 DISCUSSED AND AGREED UPON AS STATED IN ABOVE HISTORY NOTE DATED 6/21/99, TANK 2 & 3 AREA DISCUSSED. SAC STATED BASED ON DISCUSSIONS W/RNL THAT MORE WORK IS REQUIRED IN THESE AREAS, MR. KLAWINSKI SAID IT WILLL BE IMPOSSIBLE TO EXCAVATE IN THIS AREA DUE TO THE PRESENCE OF THE TRANSFORMERS AND THE UTILITY LINES AT THIS LOCATION, FOR THE OIL DROPLETS FOUND IN GP-3 THEY PROPOSED TO BAIL THE WELL TO SEE IF THEY COULD REMOVE THE PRODUCT FROM THE WELL IN THIS MANNER, SAC INDICATED THAT WAS OK TO TRY FIRST, ALSO ALTHOUGH IT IS ALWAYS RECOMMENDED TO REMOVE UNDERGROUND STORAGE TANKS, THE (2) 20,000 GALLON FUEL OIL TANKS WHICH WERE FILLED BUT THE FILLED MATERIAL HAD NOW SETTLED COULD BE FILLED AGAIN BUT THE CONTAMINATION WOULD HAVE TO BE ADDRESSED. FOR GP-22 A TCLP SAMPLE COULD BE TAKEN TO ADDRESS THIS AREA, IT WAS AGREED THAT SAC WOULD SEND A LETTER REQUESTING A WORKPLAN BY JULY 30TH. 6/24/99:SAC REVIEWED REPORTS AGAIN AND FOUND THAT TP-2 ANALYTICAL RESULTS HAD ELEVATED LEVELS THAT WERE NOT DISCUSSED W/RNL OR AT THE MEETING, SAC TELECON GARY KLAWINSKI - GZA REGARDING THESE LEVELS, IT WAS AGREED THAT THE RESAMPLING OF GP-22 AREA AND REANALYZED USING TCLP METHOD SHOULD BE POSTPONED UNTIL A MEETING WAS SETUP TO FURTHER EVALUATE THE AREA, TENTATIVELY SET UP A MEETING FOR 7/2/99. 7/2/99:RNL, SAC MET WITH GARY KLAWINSKI - GZA, BILL SCHMIDT & TOM NICHOLS - WYMAN GORDON, INSPECTED TANK AREA 1, 2 & 3, RNL REQUIRES FURTHER WORK IN TANK 3 AREA BASED ON SAMPLE RESULT LEVELS, DISCUSSED REMEDIAL OPTION FOR TANK 3 AREA WHICH IS TP-2 & GP-22 AREA, MR. GLAWINSKI SAID THEY WILL PROBABLY TRY TO INTRODUCE OXYGEN RELEASING COMPOUNDS TO THE AREA TO REMEDIATE THIS AREA, THEY WILL STILL SUBMIT A WORKPLAN BY JULY 31ST. 7/6/99:SAC DRAFTED LETTER REQUIRING WORKPLAN BY 7/31/99. 7/19/99:RECEIVED WORKPLAN FROM GZA. 7/26/99:DRAFTED COMMENT LETTER TO BILL SCHMIDT - WYMAN GORDON, INC., REQUIRING GROUNDWATER SAMPLED AT TANK AREA NO.1, TANK AREA 5 MUST HAVE SIDE WALLS SAMPLED IN THE OVERBURDEN, AND A BORING LOCATION MAP FOR THE ORC INJECTION POINTS AT AREA TP-2 & GP-22. 7/28/99:RECEIVED A FAXED COPY OF THE BORING LOCATION MAP FOR ORC INJECTION. 8/24/99:SAC INSPECT SITE AND MET W/GARY KLAWINSKI, JASON KELLY, & DAN TROY - GZA, TANK 5 AREA HAD TANK REMOVED, CONTAMINATED SOIL WAS STAGED ON SITE, SMALL AMOUNT OF WATER NOTED W/SLIGHT SHEEN. THEY WILL PUMP THE WATER. INTO THE BIO CELL, HAND DIG OUT THE REMAINING AREAS OF CONTAMINATION

#### CURTISS WRIGHT CORPORATION (Continued)

#### 1000413812

TAKE SIDE WALL SAMPLES AND INSTALL WELL, TANK 4 AREA AND THE TANK 2 AREA WERE BEING FILLED IN WITH FLOWABLE FILL, TANK 1 AREA WAS EXCAVATED, THEY DID NOT WANT TO DIG INTO THE ROAD BECAUSE THE ROAD HAD 8 INCHES TO 1 FOOT OF REINFORCED CONCRETE, THEY ARE GOING TO CONTINUE TO EXCAVATE THE AREA, ONCE COMPLETED THEY AREA GOING TO TAKE SAMPLES AND INSTALL A WELL, THEY MAY NOT BE ABLE TO SAMPLE THE BOTTOM SINCE THEY ARE SO CLOSE TO EXCAVATING TO BEDROCK, THEY WILL ALSO PLACE ORCs INTO THE EXCAVATION TO TRY AND REMOVE ANY RESIDUAL CONTAMINATION THAT REMAINS, THE EXCAVATION HAD SOME GROUNDWATER WITH SHEEN, THEY ARE IN THE PROCESS OF SETTING UP THE BIOCELL, THEY INJECTED THE ORCs PREVIOUSLY IN THE GP-22/TP-2/TANK 3 AREA, PER MR. KLAWINSKI THEY STARTED TO BAIL THE WELL GP-3 TO REMOVE THE OIL DROPLETS OF PRODUCT SINCE THE INITIAL MEETING AND THIS PROCEDURE HAS BEEN ONGOING, THE AMOUNT OF OIL RECOVERED HAS DECREASED WITH THE BAILINGS, THEY HAVE FIVE DAY TURNAROUND FOR THE ANALYTICAL RESULTS AND ARE USING PARADIGM LABS FOR ALL ANALYSES, THEY WILL ISSUE THE REPORT ON TEH COMPLETED WORK IN THE NEXT FEW WEEKS. THEY ARE NOT GOING TO SAMPLE THE GP-22/TP-2/TANK 3 FOR AT LEAST A FEW MONTHS SO THIS WILL NOT BE PART OF THE REPORT. 11/18/99:RNL, SAC MET W/GARY KLAWINSKI - GZA, BILL SCHMIDT AND JIM THARPE, IXP - WYMAN GORDON, MR. KLAWINSKI WILL SUBMIT A PROGRESS REPORT AND INCLUDE AN EXPOSURE ASSESSMENT BASED ON THE WORK DONE. 2/3/00:SAC TELECON GARY KLAWINSKI - THEY HAVE TAKEN THE AIR SAMPLES AND THE SOIL GAS SURVEY SAMPLES AND ARE WAITING FOR THE RESULTS, WILL BE SENDING A REPORT TO DEC IN THE NEXT FEW WEEKS. 7/5/01:SAC MET W/GARY KLAWINSKI TO DISCUSS SITE, MR. KLAWINSKI HAS DONE ADDITIONAL SAMPLING AND WILL SUBMIT A REPORT NEXT WEEK AND REQUEST NO FURTHER ACTION ON SITE. 10/11/01:RECEIVED REMEDIAL ACTION CLOSURE REPORT FROM GZA, OUTLINING ALL WORK THAT WAS DONE INCLUDING ALL REPORTS THAT WERE PUT TOGETHER. 10/?/01:SAC REVIEWED CLOSURE REPORT W/DKK, ALTHOUGH TAGM 4046 GUIDANCE VALUES WERE EXCEEDED AT TANK AREA 1 AND TANK AREA 3 (GP-22), NO FURTHER WORK WILL BE REQUIRED SINCE THE SITE WILL REMAIN INDUSTRIAL. FURTHER EXCAVATION OF THE SOIL WOULD NOT BE FEASIBLE DUE TO ON-SITE STRUCTURES AND UTILITIES, THERE IS NOT SIGNIFICANT CONTAMINANT MIGRATION VIA THE GROUNDWATER, THERE APPEARS TO BE NO CONTAMINATION THAT HAS MIGRATED TO SOIL OFF-SITE, BASED ON THE SAMPLE RESULTS BIOTREATMENT OF THE SOIL HAS BEEN COMPLETED AND IT WILL BE USED ON-SITE AS FILL (PENDING AN INSPECTION OF THE SOIL IN THE BIOCELL), SITE WILL BE GIVEN INACTIVE STATUS. 11/19/01:SAC INSPECT BIOCELL W/GARY KLAWINSKI - GZA AND BILL SCHMIDT - WYMAN GORDON/IXP, LARGE AMOUNT OF VEGETATION GROWING OUT OF SOIL IN BIOCELL, PER MR. KLAWINSKI SOIL WAS NOT TILLED BUT TURNED USING AN EXCAVATOR, SAC EXAMINED 4 TO 5 SOIL SAMPLES ABOUT 1 FT INTO THE CELL, NO ODORS WERE APPARENT IN THE SAMPLES TAKEN. 11/21/01:DRAFTED I LETTER. GROUNDWATER CONTAMINATION FOUND DOWN GRADIENT FROM FORMER TANK REMOVAL EXCAVATION.(SPILL #9309900)

Site Code: 482726 HW Code: C915279 Control Code: 15 Control Type: ENG Date Record Added: 11/15/2019 Date Rec Updated: 02/05/2021 Updated By: MEKUCZKA Site Description: Site Location: The 1827 Fillmore Avenue site is an approximately 17.1-acre site located in an urban area at 1827 Fillmore Ave in the City of Buffalo, Erie County. It is bounded by the Kensington Expressway (Route 33) and Buffalo Public School #84 to the north, Erie County Medical Center (ECMC) to the east, Buffalo Public School #89 to the south and Fillmore Avenue to the west. Site Features: The site is mainly vacant land with green areas, asphalt-paved parking lots and roadways. The entire site is enclosed by fence. A portion of the site is used as parking for ECMC. Current Zoning and Land Use: The site is zoned D-C Flex Commercial and is vacant except for a portion of the site being used for parking. Past Use of the Site: From at least 1917 the site was part of a stone guarry which encompassed the entire site and portions of adjacent properties to the east and south. Between the 1940s and the 1950s, the stone quarry was backfilled with sand, gravel, cinders, ash, asphalt, broken concrete, brick, metal debris, wood, glass and ceramics. The Kensington Heights Towers complex was constructed on-site in 1958. The complex consisted of six, seven-story brick apartment buildings, open space, and on-site parking. The site has been vacant since the 1980s. From 2009 to 2014, asbestos was removed from the apartment buildings and by 2018, all six buildings had been demolished. The site contamination is largely attributed to the waste fill materials used to backfill the stone quarry. Site Geology and Hydrogeology: The fill materials extend from the surface to the top of bedrock, varying in depths from 3 to 24 feet. Two soil mounds are located on-site, consisting mainly of topsoil, sandy clay and minimal fill. Groundwater was encountered within the fill material in the central and eastern portions of the site, at depths of approximately 14 to 18 feet, typically within a layer of ash. No groundwater was encountered within the fill in the western portion of the site. Bedrock wells installed in the western portion of the site found groundwater at depths of approximately 20 feet. Groundwater flows in a westerly direction. Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were metals, including arsenic, barium, cadmium, copper, lead, mercury, manganese and sodium, and semi-volatile organic compounds (SVOCs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in soil and groundwater is being managed under a Site Management Plan. Health Problem: Measures are in place to control the potential for coming in contact with residual contamination remaining at the site.

Site Description: Site Location: The 1827 Fillmore Avenue site is an approximately 17.1-acre site located in an urban area at 1827 Fillmore Ave in the City of Buffalo, Erie County. It is bounded by the Kensington Expressway (Route 33) and Buffalo Public School #84 to the north, Erie County Medical Center (ECMC) to the east, Buffalo Public School #89 to the south and Fillmore Avenue to the west. Site Features: The site is mainly vacant land with green areas, asphalt-paved parking lots and roadways. The entire site is enclosed by fence. A portion of the site is used as parking for ECMC. Current Zoning and Land Use: The site is zoned D-C Flex Commercial and is vacant except for a portion of the site being used for parking. Past Use of the Site: From at least 1917 the site was part of a stone quarry which encompassed the entire site and portions of adjacent properties to the east and south. Between the 1940s and the 1950s, the stone guarry was backfilled with sand, gravel, cinders, ash, asphalt, broken concrete, brick, metal debris, wood, glass and ceramics. The Kensington Heights Towers complex was constructed on-site in 1958. The complex consisted of six, seven-story brick apartment buildings, open space, and on-site parking. The site has been vacant since the 1980s. From 2009 to 2014, asbestos was removed from the apartment buildings and by 2018, all six buildings had been demolished. The site contamination is largely attributed to the waste fill materials used to backfill the stone guarry. Site Geology and Hydrogeology: The fill materials extend from the surface to the top of bedrock, varying in depths from 3 to 24 feet. Two soil mounds are located on-site, consisting mainly of topsoil, sandy clay and minimal fill. Groundwater was encountered within the fill material in the central and eastern portions of the site, at depths of approximately 14 to 18 feet, typically within a layer of ash. No groundwater was encountered

	(
	within the fill in the western portion of the site. Bedrock wells
	installed in the western portion of the site found groundwater at
	depths of approximately 20 feet. Groundwater flows in a westerly
	direction.
Env Problem:	Remediation at the site is complete. Prior to remediation, the
	primary contaminants of concern were metals, including arsenic,
	barium, cadmium, copper, lead, mercury, manganese and sodium, and
	semi-volatile organic compounds (SVOCs) in soil and groundwater.
	Remedial actions have successfully achieved soil cleanup objectives
	for commercial use. Residual contamination in soil and groundwater is being managed under a Site Management Plan.
Health Problem:	Measures are in place to control the potential for coming in contact
Health Floblen.	with residual contamination remaining at the site.

BUFFALO, NY 14214 482726 Site Management Plan C915279 32 INST 02/05/2021 MEKUCZKA 482726

Site Location: The 1827 Fillmore Avenue site is an approximately 17.1-acre site located in an urban area at 1827 Fillmore Ave in the City of Buffalo, Erie County. It is bounded by the Kensington Expressway (Route 33) and Buffalo Public School #84 to the north, Erie County Medical Center (ECMC) to the east, Buffalo Public School #89 to the south and Fillmore Avenue to the west. Site Features: The site is mainly vacant land with green areas, asphalt-paved parking lots and roadways. The entire site is enclosed by fence. A portion of the site is used as parking for ECMC. Current Zoning and Land Use: The site is zoned D-C Flex Commercial and is vacant except for a portion of the site being used for parking. Past Use of the Site: From at least 1917 the site was part of a stone quarry which encompassed the entire site and portions of adjacent properties to the east and south. Between the 1940s and the 1950s, the stone quarry was backfilled with sand, gravel, cinders, ash, asphalt, broken concrete, brick, metal debris, wood, glass and ceramics. The Kensington Heights Towers complex was constructed on-site in 1958. The complex consisted of six, seven-story brick apartment buildings, open space, and on-site parking. The site has been vacant since the 1980s. From 2009 to 2014, asbestos was removed from the apartment buildings and by 2018, all six buildings had been demolished. The site contamination is largely attributed to the waste fill materials used to backfill the stone quarry. Site Geology and Hydrogeology: The fill materials extend from the surface to the top of bedrock, varving in depths from 3 to 24 feet. Two soil mounds are located on-site,

The site contamination is largely attributed to the waste fill materials used to backfill the stone quarry. Site Geology and Hydrogeology: The fill materials extend from the surface to the top of bedrock, varying in depths from 3 to 24 feet. Two soil mounds are located on-site, consisting mainly of topsoil, sandy clay and minimal fill. Groundwater was encountered within the fill material in the central and eastern portions of the site, at depths of approximately 14 to 18 feet, typically within a layer of ash. No groundwater was encountered within the fill in the western portion of the site. Bedrock wells installed in the western portion of the site found groundwater at depths of approximately 20 feet. Groundwater flows in a westerly direction. Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were metals, including arsenic, barium, cadmium, copper, lead, mercury, manganese and sodium, and semi-volatile organic compounds (SVOCs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in soil and groundwater is being managed under a Site Management Plan. Health Problem: Measures are in place to control the potential for coming in contact with residual contamination remaining at the site. 	the site is used as parking for ECMC. Current Zoning and Land Use: The site is zoned D-C Flex Commercial and is vacant except for a portion of the site being used for parking. Past Use of the Site: From at least 1917 the site was part of a stone quarry which encompassed the entire site and portions of adjacent properties to the east and south. Between the 1940s and the 1950s, the stone quarry was backfilled with sand, gravel, cinders, ash, asphalt, broken concrete, brick, metal debris, wood, glass and ceramics. The Kensington Heights Towers complex was constructed on-site in 1958. The complex consisted of six, seven-story brick apartment buildings, open space, and on-site parking. The site has been vacant since the 1980s. From 2009 to 2014, asbestos was removed from the apartment buildings and by 2018, all six buildings had been demolished. The site contamination is largely attributed to the waste fill materials used to backfill the stone quarry. Site Geology and Hydrogeology: The fill materials extend from the surface to the top of bedrock, varying in depths from 3 to 24 feet. Two soil mounds are located on-site, consisting mainly of topsoil, sandy clay and minimal fill. Groundwater was encountered within the fill material in the central and eastern portions of the site, at depths of approximately 14 to 18 feet, typically within a layer of ash. HW Code: Record Add: Record Upd: Updated By: Site Description:	915151 11/18/1999 10/31/2022 AECAPRIO Location: The 318 Urban Street site is an approximately 2.468-acre site located in a mixed residential/industrial area at 318 Urban
	Street in the City of Buffalo, Erie County. The site is bounded by residential homes to the north, Urban Street to the south, apartments and a playground to the east, and railroad tracks to the west. A public school is located diagonally across Urban Street to the southeast. Site Features: The site contains a brick/block high bay industrial building. Asphalt pavement borders the northern, eastern and western sides of the building. The remainder of the site is
	covered in turf grass. The entire parcel is secured with a chain link fence and driveway gate. The western side of the site is bounded by an elevated grade developed for the rail corridor. Current Zoning and Land Use: The site is zoned for Light Industrial use. Past Use of the Site: General Electric Corporation (GE) owned and operated the site from 1921 to 1968. GE used the building as a service shop to repair
	electrical equipment and transformers and to machine parts. A transformer pit was used for operations which included draining oil from transformers. Pyramid Steel Corporation (a.k.a. Sweeney Steel Service, Corp.) purchased the site in 1985 and used the building as a machine shop and warehouse for steel fabrication and supply. Pyramid vacated the property in the early 2000s. Several industrial tenants
	have used the building and site intermittently since that time. Site Geology and Hydrogeology: The surface soils consist primarily of poorly drained silts and clays. Based on the USGS topographic map, there are no surface water bodies within a one-mile radius of the site. The nearest surface water body shown on the map is Scajaguada
	Creek, which is one and one-half miles northwest of the site. Storm water runoff enters on-site catch basins and is directed through storm drains to a publicly owned combined storm and sanitary sewer on French Street. During normal flow conditions, the flow is discharged to the publicly-owned treatment works (POTW) on Squaw Island. During heavy storms, the combined sewer overflow discharges directly to
Env Problem:	Scajaquada Creek. Remediation at the site is complete. Prior to remediation the primary contaminants of concern were PCBs in soil, groundwater and sewer sediments. Remedial activities have successfully achieved soil cleanup objectives for industrial use. Residual contamination in soil, groundwater and sewer sediments is being managed under a Site
Health Problem:	Management Plan. Since the site is covered by asphalt, buildings, and clean backfill, people will not come in contact with site related soil or groundwater contamination that remains unless they dig below the surface. Groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water
	from a different source not affected by this contamination. While the remaining extent of volatile organic compounds in soil is limited at the site, there is a process by which volatile organic compounds in soil may move into the soil vapor (air spaces within the soil), and in turn may move into overlying buildings and affect the indoor air
	quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Under current conditions and use of the site, soil vapor intrusion is not a concern, however, if use of the

The site is bounded by residential homes to the north, Urban Street to the south, apartments and a playground to the east, and railroad tracks to the west. A public school is located diagonally across Urban Street to the southeast. Site Features: The site contains a brick/block high bay industrial building. Asphalt pavement borders the northern, eastern and western sides of the building. The remainder of the site is covered in turf grass. The entire parcel is secured with a chain link fence and driveway gate. The western side of the site is bounded by an elevated grade developed for the rail corridor. Current Zoning and Land Use: The site is zoned for Light Industrial use. Past Use of the Site: General Electric Corporation (GE) owned and operated the site from 1921 to 1968. GE used the building as a service shop to repair electrical equipment and transformers and to machine parts. A transformer pit was used for operations which included draining oil from transformers. Pyramid Steel Corporation (a.k.a. Sweeney Steel Service, Corp.) purchased the site in 1985 and used the building as a

EDR ID Number Database(s)

# GENERAL ELECTRIC - FORMER SHOP (Continued)

<b>Faul Droblem</b>	machine shop and warehouse for steel fabrication and supply. Pyramid vacated the property in the early 2000s. Several industrial tenants have used the building and site intermittently since that time. Site Geology and Hydrogeology: The surface soils consist primarily of poorly drained silts and clays. Based on the USGS topographic map, there are no surface water bodies within a one-mile radius of the site. The nearest surface water body shown on the map is Scajaquada Creek, which is one and one-half miles northwest of the site. Storm water runoff enters on-site catch basins and is directed through storm drains to a publicly owned combined storm and sanitary sewer on French Street. During normal flow conditions, the flow is discharged to the publicly-owned treatment works (POTW) on Squaw Island. During heavy storms, the combined sewer overflow discharges directly to Scajaquada Creek.
Env Problem:	Remediation at the site is complete. Prior to remediation the primary contaminants of concern were PCBs in soil, groundwater and sewer sediments. Remedial activities have successfully achieved soil cleanup objectives for industrial use. Residual contamination in soil, groundwater and sewer sediments is being managed under a Site Management Plan.
Health Problem:	Since the site is covered by asphalt, buildings, and clean backfill, people will not come in contact with site related soil or groundwater contamination that remains unless they dig below the surface. Groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. While the remaining extent of volatile organic compounds in soil is limited at the site, there is a process by which volatile organic compounds in soil may move into the soil vapor (air spaces within the soil), and in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Under current conditions and use of the site, soil vapor intrusion is not a concern, however, if use of the site changes from industrial use, the potential for soil vapor intrusion to occur will be evaluated.

The site is bounded by residential homes to the north, Urban Street to the south, apartments and a playground to the east, and railroad tracks to the west. A public school is located diagonally across Urban Street to the southeast. Site Features: The site contains a brick/block high bay industrial building. Asphalt pavement borders the northern, eastern and western sides of the building. The remainder of the site is covered in turf grass. The entire parcel is secured with a chain link fence and driveway gate. The western side of the site is bounded by an elevated grade developed for the rail corridor. Current Zoning and Land Use: The site is zoned for Light Industrial use. Past Use of the Site: General Electric Corporation (GE) owned and operated the site from 1921 to 1968. GE used the building as a service shop to repair electrical equipment and transformers and to machine parts. A

transformer pit was used for operations which included draining oil from transformers. Pyramid Steel Corporation (a.k.a. Sweeney Steel Service, Corp.) purchased the site in 1985 and used the building as a machine shop and warehouse for steel fabrication and supply. Pyramid vacated the property in the early 2000s. Several industrial tenants have used the building and site intermittently since that time. Site Geology and Hydrogeology: The surface soils consist primarily of poorly drained silts and clays. Based on the USGS topographic map, there are no surface water bodies within a one-mile radius of the site. The nearest surface water body shown on the map is Scajaquada Creek, which is one and one-half miles northwest of the site. Storm water runoff enters on-site catch basins and is directed through storm drains to a publicly owned combined storm and sanitary sewer on French Street. During normal flow conditions, the flow is discharged to the publicly-owned treatment works (POTW) on Squaw Island. During heavy storms, the combined sewer overflow discharges directly to Scaiaguada Creek. Env Problem: Remediation at the site is complete. Prior to remediation the primary contaminants of concern were PCBs in soil, groundwater and sewer sediments. Remedial activities have successfully achieved soil cleanup objectives for industrial use. Residual contamination in soil, groundwater and sewer sediments is being managed under a Site Management Plan. Health Problem: Since the site is covered by asphalt, buildings, and clean backfill, people will not come in contact with site related soil or groundwater contamination that remains unless they dig below the surface. Groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. While the remaining extent of volatile organic compounds in soil is limited at the site, there is a process by which volatile organic compounds in soil may move into the soil vapor (air spaces within the soil), and in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Under current conditions and use of the site, soil vapor intrusion is not a concern, however, if use of the site changes from industrial use, the potential for soil vapor intrusion to occur will be evaluated. 	· · · ·
Health Problem:	contaminants of concern were polychlorinated biphenyls (PCBs) in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination is soil and groundwater is being managed under a Site Management Plan. The majority of soil is covered with pavement and buildings and contact with any potentially contaminated soil is not likely. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination.

Hazardous Waste Summary:			
Waste Code: Waste Description:	D000 Not Defined		
Waste Code: Waste Description:	D001 Ignitable Waste		

D002

EDR ID Number EPA ID Number

Database(s)

Waste Description:	Corrosive Waste
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D019
Waste Description:	Carbon Tetrachloride
Waste Code:	D027
Waste Description:	1,4-Dichlorobenzene
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing:
	Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated
	Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing
	Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of
	One Or More Of The Above Halogenated Solvents Or Those Solvents Liste In F002, F004, And F005; And Still Bottoms From The Recovery Of These
	Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene,
	Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane,
	Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2,
	Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before
	Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And
	F005; And Still Bottoms From The Recovery Of These Spent Solvents And
	Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl
	Alcohol, Cyclohexanone, And Methanol; All Spent Solvent
	Mixtures/Blends Containing, Before Use, Only The Above Spent
	Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated
	Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or
	More Of Those Solvents Listed In F001, F002, F004, And F005; And Still

	Mixtures.
Waste Code: Waste Description:	F005 The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code: Waste Description:	LABP Labp
	·
Waste Code: Waste Description:	NONE None
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)
Waste Code:	U075
Waste Description:	Dichlorodifluoromethane (Or) Methane, Dichlorodifluoro-
Waste Code:	
Waste Description:	Methanol (I) (Or) Methyl Alcohol (I)
Waste Code:	U159 2 Butenene (III) (Or) Methyd Ethyd Ketene (Melk) (III)
Waste Description:	2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)
Waste Code:	U211
Waste Description:	Carbon Tetrachloride (Or) Methane, Tetrachloro-
Waste Code:	U239
Waste Description:	Benzene, Dimethyl- (I,T) (Or) Xylene (I)

SHWS: Name: Address: City,State,Zip: Program: Site Code: Classification: Region: Acres: HW Code: Record Add: Record Upd: Updated By: Site Description:	AMERICAN AXLE PLANT 1001 EAST DELAVAN AVENUE BUFFALO, NY 14215 HW 346870 Significant threat to the public health or environment - action required. 9 2.653 915196 06/01/2005 09/22/2022 AECAPRIO Location: The American Axle Plant site is a 2.654-acre portion of former manufacturing facility located in an urban area at 1001 Ea Delavan Avenue in the City of Buffalo, Erie County. The site is na the intersection of East Delavan and Cornwall Avenues. Site Fea The site is a portion of a former automobile drivetrain manufactur facility. The former plant complex also includes plant facilities located on non-contiguous parcels at 1057 East Delavan (3.43 at and at 320 Scajacuada Street (8.31 acre Saginaw Site - 915152) adjoining parcel contains plant facilities consisting of on-grade structures and paved surfacing. The surface water body nearest site is the Scajaquada Creek Drain. There is a portion of a 5x9 for oval combined sewer which runs beneath the site. The sewer is constructed from brick and serves as a combined sewer for the ES Sewer Authority (BSA) sewer system. Several of the existing plan building were constructed over the 5x9 sewer. Numerous sewer connect to the 5x9 oval sewer beneath the facility. The fx9 oval sewer empties into the BSA Scajaquada Interceptor (interceptor) of the site, which flows west to the BSA Wastewater Treatment Facility. A combined sewer overflow relief point, referred to by the BSA as Sewer Patrol Point (SPP) 337, is present at the junction of the 5x9 oval sewer and a vertical shaft leading to the BSA interceptor. There is also a groundwater recovery and treatment system is in operation on the site. Current Zoning and Land User site is zoned industrial and is not in active use. The nearest residence is approximately 700 feet west of the site. Past Use of Site: The former manufacturing facility was operated by General Motors from the 1920s to 1994. Initially, automobiles were assem and later automobile drivetrain components were manufactured, site	ast ear itures: ing cres) . The the bot Buffalo nt laterals south e of The the the abled, The d

American Axle ceased its manufacturing operations at this facility in 2008 and sold the property including this site and adjoining parcels to East Delavan Property, LLC (EDP) in September 2008. The 2.654-acre site was subdivided from the larger plant complex in 2017. A portion of the 1001 East Delevan parcel is occupied by a sister entity of EDP and several other tenants. Site investigations began in 1991 after the discovery of a petroleum spill in the former B-26 coolant pit, which contained metal working oil contaminated with polychlorinated biphenyls (PCBs). Initial investigations were centered around the B-26 cooling pit. Site Geology: The overburden ranges from 6.5 to 20.7 feet and consists of fill, clay and till units above bedrock. Fill: The fill layer thickness varies between 0.2 feet to 15.5 feet and is composed of reworked soil, crushed concrete, gravel, foundry slag, crushed brick, cinders, wood, and metal and glass fragments. The southern end of the 1001 East Delavan and 320 Scajaquada Street parcels previously contained a free flowing creek (Scajaquada Creek) before being filled and relocated as a tunnel south of the site along Scajaguada Street (referred to as the Scajaguada Creek Drain). Clay: The clay layer consists of gray or black silt/clay in the upper horizon and red-brown clay in the lower horizon. The average thickness of the upper silt/clay is 2.4 feet and the average thickness of the red-brown clay is 8.5 feet. Till: The till is intermittently present overlying the bedrock. The average thickness of the till is 1.4 feet. Bedrock: The average depth to bedrock beneath the site is approximately 15.8 feet below ground surface. The bedrock consists of light to dark gray cherty limestone (Onondaga Limestone). Site Hydrogeology: Subsurface features beneath the 1001 East Delavan manufacturing plant influence groundwater flow, especially in the fill and upper clay layers. The primary influencing features are the 5X9 oval combined sewer and the former B-26 coolant pit. The groundwater/oil collection system installed in 2019 further depresses shallow groundwater around the 5x9 sewer. Nature and Extent of Contamination: Based upon data from the November 2006 Remedial Investigation (RI) Report, the primary contaminant at the site is polychlorinated biphenyl (PCB) contaminated oil in the vicinity of the B-26 coolant pit and the surrounding area where the 5X9 oval sewer passes under the site. The draft June 2009 Supplemental RI concluded that adjoining areas beyond the defined site are also contaminated with PCB contaminated oil. The contamination at the site resulted from spills of hydraulic oils and heat transfer fluids containing PCBs which were used at the plant during plant operations. Petroleum Oil Characterization: A number of groundwater wells contained separate phase oil and varied by geologic unit. Fill Unit: Oil was noted in approximately 26 of the 107 borings installed for environmental investigations initiated in 1994. Oil was present in 13 out of 30 fill wells, with thickness ranging from 0.01 to 5.66 feet. Most of the wells containing oil are located east of the 5x9 sewer and south of the B-26 Coolant Pit. The greatest volume of oil found was in wells CP 14, M-1, M-3. The estimated volume of recoverable oil in the fill unit is 50,000 to 110,000 gallons. Clay Unit: Oil was present in 23 out of 40 wells sampled, with thickness from 0.01 to 12.83 feet. MW-400 showed the greatest amount of product. The estimated volume of recoverable oil in clay unit is 1000 gallons. Bedrock Unit: Oil was present in 9 out of 18 wells, with thickness ranging from 0.01 to 4.07 feet. PCB Characterization: The PCB Aroclor 1248 was detected most frequently at the site. followed by Aroclor 1242. Aroclors 1254 and 1260 were detected in a limited

#### S104497613

EDR ID Number Database(s) EPA ID Number

#### SUBSTATION 7 - 2ND FLOOR OF THE POWERHOUSE (Continued)

number of samples and PCB concentrations also vary by geologic unit. PCBs in Soil: The characterization summary of PCBs in subsurface soils at the site is as follows: PCBs are present in subsurface soils, consisting of fill, at up to 64 parts per million (ppm) and in native clay at up to 50 ppm, exceeding the NYSDEC soil cleanup objective; PCBs found in subsurface soils occur in the same areas where oil is observed in the subsurface soils; and No PCBs were found in till. PCBs in Groundwater: The fill and clay wells showing the greatest volumes of oil do not necessarily show highest levels of PCBs. PCB results, by respective geologic unit wells, are as follows: Fill Unit Wells: PCBs were detected in oil samples from 10 of 11 wells sampled. PCB concentrations varied from 2.17 ppm in MW 401 to 3,850 ppm in CP 28. Clay Unit Wells: PCBs were detected in all 19 clay wells sampled. The concentrations ranged from 4.4 ppm in MW 2A to 440,000 ppm in MW 406. Well CP 17A showed 3,620 ppm PCBs. Another source area may be around GP 12 where PCBs were detected at 840 ppm. Bedrock Unit Wells: Six bedrock wells sampled showed presence of PCBs varying from 2.8 ppm in CP 27B to 4,350 ppm in CP 23B to 12,000 ppm in CP 16B. Based on the PCB concentrations in groundwater and soil and groundwater gradient, it does not appear that PCBs are migrating from the site. However, PCB contaminated oil was determined to be seeping into the 5x9 oval sewer that traverses the site and former automotive parts manufacturing complex. Samples, including wipe samples, seeping oil and wall scrapings indicated the following: Water samples from downgradient manholes showed PCBs up to 0.785 parts per billion (ppb). Samples from laterals to the oval sewer revealed PCB levels up to 2.31 ppb and a water sample from a sewer clean-out revealed PCBs up to 68 ppb; Oil was found in laterals connected to the oval sewer with PCB levels up to 4.7 ppm. Concentrations of PCBs in standing oil in the oval sewer ranged from 440 ppm to 1,500 ppm; and Samples of oil stains on the oval sewer wall indicated PCBs levels ranging from 95 ppm to 565 ppm. The B-26 Coolant Pit Interim Remedial Measure (IRM) was implemented in 1991 to begin recovery of the PCB contaminated oil from soil and groundwater around the B-26 coolant pit. Operation of the oil recovery system for the B-26 coolant pit is ongoing. An IRM to collect groundwater/oil in areas where measurable levels of oil were detected and intercept groundwater/oil from potentially seeping into the 5x9 sewer was implemented in 2019. The collected oil is separated from the influent and the groundwater is treated through the B-26 coolant pit groundwater treatment system prior to discharge to the BSA sewer. Further site assessment and evaluation of long term remedial action measures to address site contamination is underway (2022). Assessment to be determined by DOH at a later date. #### S104497613

10/15/97:RECEIVED AMERICAN AXLE & MFG.'S REPORT ON THE BAY AA-1 PROJECT INCLUDING SITE DIAGRAM AND DISPOSAL RECEIPTS, LETTER REQUESTED THAT THIS SPILL BE KEPT SEPARATE FROM 9400483, THEREFORE NEW SPILL NO. IS 9708298, ALL DOCUMENTATION REGARDING THIS FILE WILL BE UNDER 9708289. 3/12/98:SAC TELECON BARBARA SULLIVAN-BLASLAND, BOUCK, & LEE, WORK IS CONTINUING THIS SPRING AT PLANT, SO PHASE III REPORT WILL NOT BE COMING IN NEAR FUTURE. MS.SULLIVAN'S PHONE NUMBER IS 561-750-3733 & PETER SPENSE IN THE ROCHESTER OFFICE IS (716)292-6715. 12/7/99:SAC CALLED BARBARA SULLIVAN BUT SHE WAS NOT THERE, LEFT MESSAGE FOR A CALL BACK. 12/8/99:SAC TELECON BARBARA SULLIVAN, MS. SULLIVAN SAID THE REPORT HAS BEEN COMPLETED AND WAS SENT TO GM A COUPLE OF MONTHS AGO AND THEY ARE WAITING FOR GM'S APPROVAL TO RELEASE THE REPORT, THEY WILL BE MEETING W/MARK NAPOLITAN AROUND THE END OF THE MONTH AND WILL DISCUSS THIS WITH HIM THEN. 12/18/00:SAC CALLED MARK NAPOLITAN AND BARBARA SULLIVAN AND LEFT MESSAGE FOR A CALLBACK. 12/21/00: RECEIVED CALLBACK FROM MARK NAPOLITAN, MR. NAPOLITAN LEFT MESSAGE FOR A CALLBACK, SAC CALLED MR. NAPOLITAN BACK AND LEFT ANOTHER MESSAGE FOR A CALLBACK. 1/10/01:SAC CALLED MARK NAPOLITAN, LEFT MESSAGE FOR A CALLBACK. 1/10/01:SAC CALLED BARBARA SULLIVAN, MS. SULLIVAN IS STILL WORKING ON THE REPORT, SHE BELIEVES IT WILL BE DONE THIS WEEK AND SHE WILL SEND IT OFF TO MR. NAPOLITAN FOR HIS REVIEW, SAC SAID THE LAST TIME HE SPOKE TO MS. SULLIVAN HE WAS TOLD THAT REPORT HAD BEEN FINALIZED. MS. SULLIVAN SAID THAT THERE WAS A PROBLEM WITH THE ON-SITE SEWER SYSTEM FOR OIL AND GREASE AND THAT THEY HAD TO INVESTIGATE THE PROBLEM AND THEY NEEDED TO INCLUDE THIS INTO THE REPORT. 1/30/01:SENT NO RESPONSE LETTER TO MARK NAPOLITAN, REQUIRE COPY OF REPORT BY 3/30/01. 3/27/01:SAC RECEIVED PHONE MESSAGE FROM KATHY GALANTI - CONESTOGA ROVERS, THEY ARE WORKING W/BBL AND WILL BE SUBMITTING THE REPORT THIS MONDAY 4/3/01. 9/15/03:SAC TELECON CAROL BARRON - CONESTOGA ROVERS (297-6150), THEY SCRAPED ANOTHER SAMPLE FROM THE SEWER THIS PAST FRIDAY, THEY RETESTED THE WATER FROM MW-406. THEY WILL BE DOING ADDITIONAL INVESTIGATION AROUND MW-406 ALONG WITH THE PROPOSED WORK IN THE REPORT NEXT MONTH AND HOPE TO BE COMPLETED BY THANKSGIVING, THEY ARE ATTEMPTING TO SET UP MEETING W/BSA SOON BUT THEY SPOKE TO JIM OVERHOLT W/BSA AND HE REQUESTED IT BE DELAYED UNTIL NEW DIRECTOR IS UP TO SPEED ON PROJECT. 8/3/04:SAC TELECON KATHY GALANTI - CONESTOGA ROVERS. THEY HAVE FOUND A POOL OF OIL IN COMBINED SEWER LATERAL THAT WAS ANALYZED AND FOUND TO HAVE 1300 ppm OF PCBs. THE LATERAL IS NOT CONNECTED TO A KNOWN SOURCE. THEY WILL BE INSPECTING SEWER NEXT WEEK AND WILL BE RESAMPLING TO CONFIRM RESULTS. SINCE THERE IS NO APPARENT SOURCE FOR THE OIL, IT APPEARS THAT THE OIL HAS INFILTRATED THE SEWER. ONCE INVESTIGATION OF SOURCE HAS BEEN COMPLETED, THEY WILL PLUG THIS LINE. BSA HAS BEEN NOTIFIED OF THIS FINDING. 8/11/04:RECEIVED e-MAIL FROM DKK INSTRUCTING TO TRANSFER SITE TO LONG TERM REMEDIAL GROUP FOR FURTHER FOLLOWUP. SPILL CLOSED OUT, FILE GIVEN TO JASPAL WALIA.

BUFFALO, NY 14215 HW 58414 Site is properly closed - requires continued management. 9 7.248 915152 11/18/1999 07/24/2023 AECAPRIO Location: The Saginaw-Buffalo site is an approximately 7.248-rat site, located in an urban area, at 320 Scajaquada Street in the O of Buffalo, Erie County. The site consists of the former Parking L #4 of the inactive manufacturing facility. Site Features: The site consists of a paved parking area. It is surrounded by industrial a residential properties. An electrical substation borders the site to the east. Current Zoning and Land Use: This site is zoned for industrial use. Past Use of the Site: Scajaquada Creek originally flowed through the southern portion of the site. The creek was rerouted through an underground concrete conduit, below what Scajaquada Street, in the mid 1920s. The former creek bed and adjacent low-lying areas were subsequently used for the dispos- ash by the City of Buffalo. A concrete plantor (GM) purchased sex parcels in the mid 1960s and constructed Parking Lot #4. The si sold to American Axle Manufacturing in 1994, along with the mat facility west of the railroad right-of-way. In November 1994, American Axle Manufacturing began construction of a parts coa facility on the northern third of Parking Lot #4. Operations at the facility ceased in December 2007. The property was sold to Eas Delavan Property, LLC in October 2008. During a spill cleanup or industrial oil in 1989 excavated soil was found to contain polychlorinated biphenyls (PCBs). Site Geology and Hydrogeolog bedding material underneath the asphalt pavement is approximp foot deep. Below the bedding material is a layer of ash/slag type black or brown fill intermixed with other materials which varies in thickness from 2 to 7 feet across the site. Below this fill is a thin layer of black organic silt up to one foot in thickness. The thickness of the silty clay layer below the black organic silt range from 10 to 12 feet. This is underlain by Onondaga limestone bee whic	City Lot and b is now al of cof reral te was in ting t f gy: The ately one b s drock ). The be dwater

## SAGINAW - BUFFALO (Continued)

-			0.201
	Env Problem:	west-northwest. Remediation of the site is complete. Prior to remediation, the primary contaminants of concern were polychlorinated biphenyls (PCBs)	
		and lead in soil, groundwater and sewer sediments. Remedial actions have successfully achieved soil cleanup objectives for industrial	
		use. Residual contamination in soil and groundwater is being managed under a Site Management Plan.	
	Health Problem:	There is little potential for exposure to contaminated soils because	
		access to the site is restricted and the contaminated soils are covered by a paved parking lot. The existing deed restriction	
		prevents use of the site property for purposes other than industrial	
		uses, thereby preventing the use of groundwater for drinking. The	
		area is served by public water so exposures via drinking water are not expected. The remedy which included the removal of contaminated	
		soils, maintenance of existing pavement, and deed restrictions will	
	_	reduce the potential for exposure to site-related contaminants.

UF	FALO CITY OF - D	IARSENOL KINGSLEY PK (Continued)
		02/10/2023 AECAPRIO
	Site Description:	Location: The Diarsenol Co., Kingsley Park site is an approximately 2.216-acre site located in a residential neighborhood on Kingsley Street in the City of Buffalo, Erie County. Site Features: The site is a flat, grass covered lot with no buildings. Fencing surrounds much of the site. Current Zoning and Land Use: The site is currently a park owned by the City of Buffalo. Past Use of the Site: The Diarsenol Company occupied the property on Kingsley Street adjacent to the site starting in about 1900. Diarsenol manufactured medications containing arsenic at their facility from the early 1900s until the 1940s. They reportedly used this site for disposal of waste materials from their plant. The site was occupied by various owners from the 1940s until 1967, when it was acquired by the City of Buffalo. The site has been used as a public park and playground since 1972. Site Geology and Hydrology: The Site is currently covered with topsoil overlying clean fill and native clay. Minimal shallow-goundwater contamination is still present in an area proximal to the groundwater collection system.
	Env Problem:	Remediation at the Site is complete. Prior to remediation, the primary contaminant of concern was arsenic in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in soil and groundwater is being managed under a Site Management Plan.
	Health Problem:	Remedial activities to address soil contamination conducted at the site and at some nearby off-site properties have effectively reduced the potential for exposure to site-related contaminants. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination.

Site Features: The site is a flat, grass covered lot with no buildings. Fencing surrounds much of the site. Current Zoning and Land Use: The site is currently a park owned by the City of Buffalo. Past Use of the Site: The Diarsenol Company occupied the property on Kingsley Street adjacent to the site starting in about 1900. Diarsenol manufactured medications containing arsenic at their facility from the early 1900s until the 1940s. They reportedly used this site for disposal of waste materials from their plant. The site was occupied by various owners from the 1940s until 1967, when it was acquired by the City of Buffalo. The site has been used as a public park and playground since 1972. Site Geology and Hydrology: The Site is currently covered with topsoil overlying clean fill and native clay. Minimal shallow-goundwater contamination is still present in an area proximal to the groundwater collection system. Env Problem: Remediation at the Site is complete. Prior to remediation, the primary contaminant of concern was arsenic in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in soil and groundwater is being managed under a Site Management Plan. Health Problem: Remedial activities to address soil contamination conducted at the site and at some nearby off-site properties have effectively reduced the potential for exposure to site-related contaminants. People are

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/26/2023 Date Data Arrived at EDR: 01/02/2024 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 01/02/2024 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/26/2023 Date Data Arrived at EDR: 01/02/2024 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 01/02/2024 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

## Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/26/2023 Date Data Arrived at EDR: 01/02/2024 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 01/02/2024 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

## Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023 Date Data Arrived at EDR: 12/20/2023 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 35 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 12/20/2023 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/02/2024 Next Scheduled EDR Contact: 04/22/2024 Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

## Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (212) 637-3660 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

#### Lists of Federal RCRA generators

## RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (212) 637-3660 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (212) 637-3660 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

#### State and tribal institutional control / engineering control registries

## ENV RES DECL: Environmental Restrictive Declarations

The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution.

Date of Government Version: 03/21/2023 Date Data Arrived at EDR: 06/20/2023 Date Made Active in Reports: 09/12/2023 Number of Days to Update: 84 Source: New York City Department of City Planning Telephone: 212-720-3300 Last EDR Contact: 12/14/2023 Next Scheduled EDR Contact: 03/25/2024 Data Release Frequency: Varies

## RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

### Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

#### ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

Date of Government Version: 08/07/2023 Date Data Arrived at EDR: 08/08/2023 Date Made Active in Reports: 10/24/2023 Number of Days to Update: 77 Source: Department of Environmental Conservation Telephone: 518-402-9622 Last EDR Contact: 11/07/2023 Next Scheduled EDR Contact: 02/19/2024 Data Release Frequency: Quarterly

## ADDITIONAL ENVIRONMENTAL RECORDS

## Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 01/29/2024 Next Scheduled EDR Contact: 05/13/2024 Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 11/03/2023 Next Scheduled EDR Contact: 02/12/2024 Data Release Frequency: Varies

#### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2020 Date Data Arrived at EDR: 06/14/2022 Date Made Active in Reports: 03/24/2023 Number of Days to Update: 283 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/14/2023 Next Scheduled EDR Contact: 03/25/2024 Data Release Frequency: Every 4 Years

### TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2021 Date Data Arrived at EDR: 08/18/2023 Date Made Active in Reports: 11/07/2023 Number of Days to Update: 81 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 11/13/2023 Next Scheduled EDR Contact: 02/26/2024 Data Release Frequency: Annually

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 10/19/2023 Date Data Arrived at EDR: 10/20/2023 Date Made Active in Reports: 01/16/2024 Number of Days to Update: 88 Source: EPA Telephone: 202-564-4203 Last EDR Contact: 01/17/2024 Next Scheduled EDR Contact: 04/29/2024 Data Release Frequency: Annually

#### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019 Date Data Arrived at EDR: 07/01/2019 Date Made Active in Reports: 09/23/2019 Number of Days to Update: 84 Source: Environmental Protection Agency Telephone: 202-343-9775 Last EDR Contact: 12/19/2023 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40 Source: Environmental Protection Agency Telephone: 202-564-2501 Last EDR Contact: 12/17/2007 Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

#### LEAD SMELTER 2: Lead Smelter Sites

A list of several hundred sites in the U.S. where secondary lead smelting was done from 1931and 1964. These sites may pose a threat to public health through ingestion or inhalation of contaminated soil or dust

Date of Government Version: 04/05/2001 Date Data Arrived at EDR: 10/27/2010 Date Made Active in Reports: 12/02/2010 Number of Days to Update: 36 Source: American Journal of Public Health Telephone: 703-305-6451 Last EDR Contact: 12/02/2009 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

Date of Government Version: 12/28/2023 Date Data Arrived at EDR: 12/28/2023 Date Made Active in Reports: 01/04/2024 Number of Days to Update: 7 Source: Environmental Protection Agency Telephone: 202-272-0167 Last EDR Contact: 12/28/2023 Next Scheduled EDR Contact: 04/15/2024 Data Release Frequency: Varies

### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

Date of Government Version: 06/24/2020 Date Data Arrived at EDR: 03/17/2021 Date Made Active in Reports: 11/08/2022 Number of Days to Update: 601 Source: Department of Health & Human Services Telephone: 202-741-5770 Last EDR Contact: 01/22/2024 Next Scheduled EDR Contact: 05/06/2024 Data Release Frequency: Varies

### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

#### PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

#### PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

#### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

#### PFAS 3: PFAS Environmental Site Remediation List

Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Fluoropolymer coatings are blends of resins and lubricants used in products such as water-repellent clothing, furniture, adhesives, paint and varnish, food packaging, heat-resistant non-stick cooking surfaces and insulation of electrical wires. Chemicals in this group include perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS).

Date of Government Version: 08/07/2023 Date Data Arrived at EDR: 08/08/2023 Date Made Active in Reports: 10/24/2023 Number of Days to Update: 77 Source: Department of Environmental Conservation Telephone: 518-402-9759 Last EDR Contact: 11/07/2023 Next Scheduled EDR Contact: 02/19/2024 Data Release Frequency: Varies

### PFAS: PFAS Contamination Site Location Listing

DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received.

### E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

## Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for hazardous waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 07/31/2021 Date Data Arrived at EDR: 01/05/2023 Date Made Active in Reports: 03/24/2023 Number of Days to Update: 78 Source: Department of Environmental Conservation Telephone: 518-402-8712 Last EDR Contact: 11/29/2023 Next Scheduled EDR Contact: 03/18/2024 Data Release Frequency: Varies

### HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

#### NYC LEAD: Lead-based Paint Testing Results

The results of the inspections for all classrooms serving students under six in applicable buildings. Identifies all classrooms, whether there was observation of peeling paint, and if there was, standard response protocol was followed.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 11/02/2023 Date Made Active in Reports: 01/29/2024 Number of Days to Update: 88 Source: New York City Department of Education Telephone: 212-374-5141 Last EDR Contact: 11/02/2023 Next Scheduled EDR Contact: 02/12/2024 Data Release Frequency: Varies

#### NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City?s Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

#### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are

comparable across all states.

Private Schools

# **GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM**

### TARGET PROPERTY ADDRESS

631 NORTHLAND AVENUE 631 NORTHLAND AVENUE BUFFALO, NY 14211

## TARGET PROPERTY COORDINATES

Latitude (North):	42.91832 - 42° 55' 5.95"
Longitude (West):	78.836317 - 78° 50' 10.74''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	676599.8
UTM Y (Meters):	4753801.0
Elevation:	640 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	14122104 BUFFALO NE, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

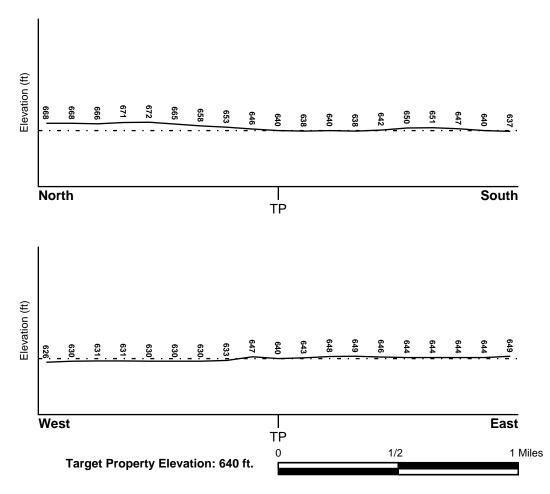

## **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3602300005B	FEMA Q3 Flood data
Additional Panels in search area:	FEMA Source Type
3602300015B	FEMA Q3 Flood data
NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property BUFFALO NE	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:		
Search Radius:	1.25 miles	
Status:	Not found	

## **AQUIFLOW**®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

## **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

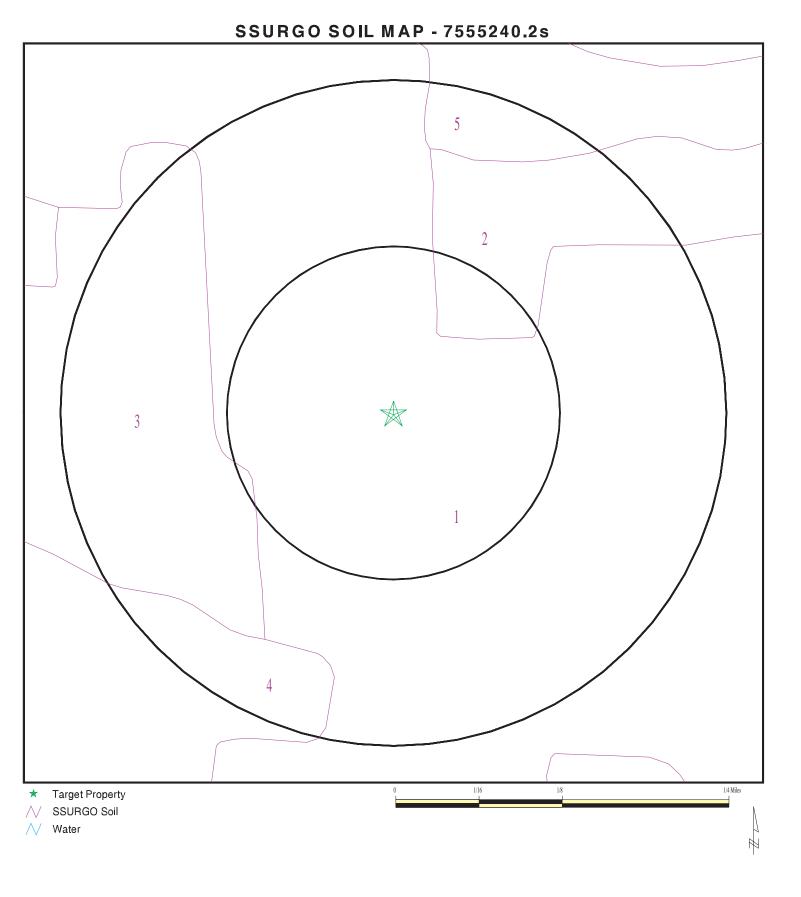

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## **ROCK STRATIGRAPHIC UNIT**

## GEOLOGIC AGE IDENTIFICATION

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	Urban land
Soil Surface Texture: Hydrologic Group:	Not reported
Soil Drainage Class: Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches
No. Lover Information evolution	

No Layer Information available.

Soil Map ID: 2	
Soil Component Name:	Urban
Soil Surface Texture: Hydrologic Group:	Not reported
Soil Drainage Class: Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 77 inches
Depth to Watertable Min:	> 66 inches
No Layer Information available.	

Soil Map ID: 3	
Soil Component Name:	Udorthents
Soil Surface Texture: Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Moderately well drained

Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 137 inches
No Layer Information available.	

Soil Map ID: 4	
Soil Component Name:	Urban
Soil Surface Texture: Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 54 inches
No Layer Information available.	

Soil Map ID: 5	
Soil Component Name:	Urban
Soil Surface Texture: Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 38 inches
Depth to Watertable Min:	> 0 inches
No Layer Information available.	

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

### **GEOLOGIC INFORMATION**

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# **FOIL Requests & Responses**

PRIVILEGED AND CONFIDENTIAL

## **Holley Chamberlin**

From: Sent: To: Subject: New York DEC FOIL Center <newyorkdec@govqa.us> Wednesday, January 31, 2024 12:39 PM Holley Chamberlin FOIL Request :: W126313-013124

Dear Holley:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 1/31/2024 and given the reference number FOIL #W126313-013124 for tracking purposes. You may expect the Department's response to your request no later than 2/29/2024.

Record Requested: Please forward me environmental records the property addressed as 631 Northland Avenue in the City of Buffalo, Tax ID#140200101.21-5-1.21, owned by 631 Northland LLC. Please include the following records: • spills releases (please include spill reports and associated records/mapping/reports) • petroleum bulk storage (PBS) including underground storage tanks (USTs) • health or environmental violations • wetlands • consent order • permits • hazardous waste activity

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Click here to login to the FOIL Center.

New York State Department of Environmental Conservation, Record Access Office

Track the issue status and respond at: <u>https://newyorkdec.govqa.us/WEBAPP//\_rs/RequestEdit.aspx?rid=126313</u>

# **ERIE COUNTY CLERK's OFFICE** Freedom of Information Law Application For Access to Public Records

# Instructions: Complete this form and return, by mail, email, or deliver in-person, to the FOIL Officer at the Erie County Clerk's Office, 92 Franklin Street Buffalo, NY 14202 or ECCOFOIL@erie.gov

\*\*\*To request information maintained by an independent office within Erie County Government (i.e., Board of Elections, County Executive, Comptroller, District Attorney, Legislature, and Sheriff) you must contact that office directly on how to submit a FOIL request. \*\*\*

The Erie County Clerk's Office will respond within 5 days of receipt of your request to acknowledge receipt and / or make the record available for review. Many records are already available for review in the Clerk's Office at the public computers or, if the record sought is a court record, by going online to

<u>https://iapps.courts.state.ny.us/nyscef/HomePage</u>. If the record is not available within five days of receipt of such request, you will be advised of the approximate date when such record may be made available or when such request may be granted or denied.

In accordance with the Public Officers Law and the statutory authority granted under the New York Civil Practice Law and Rules, the Clerk's Office may charge \$0.65 per page with a minimum fee of \$1.30 as well as other charges associated with the cost of reproducing a record. Payment MUST be made at time of pick-up. If mailing is requested, please provide a self-addressed postage paid envelope.

I hereby apply to [ ] inspect or obtain [ ] a hard copy [ X ] an electronic copy of the following records under the provisions of the Freedom of Information Law (please include as much detail about the records as you can, including relevant dates, names, descriptions, ect): \_\_\_\_\_\_

<u>Please forward me environmental records the property addressed as 631 Northland Avenue in the City of</u> Buffalo, Tax ID#140200101.21-5-1.21, owned by 631 Northland LLC. Please include the following records: Liens/deed restrictions, chemical and/or petroleum spills/releases, underground storage tanks, health or environmental violations, wetlands, consent order, permits, hazardous waste activity, and waste disposal

### **CERTIFICATIONS**

OSHA 40 hour HAZWOPER OSHA 10 Hour Construction Safety Course NYSDOH Certified Asbestos Inspector

Ms. McAlpin has over eleven years of experience performing Phase I and II Environmental Site Assessments (ESAs). She has conducted ESAs on numerous property types including private, commercial, industrial and manufacturing facilities, warehouses, gasoline filling stations, automobile service and repair facilities, office buildings, apartment complexes, restaurants, and vacant or undeveloped properties.

### PROJECTS

**Old Upper Mountain Road, Lockport, NY** - RE&LS provided environmental inspections and on-site construction administrative tasks for the Old Upper Mountain Road Site in Lockport, NYSDEC Site No. 932112. RE&LS provided a full-time Air Monitoring Technician (AMT) that was onsite daily for the duration of the project to provide air and fugitive dust monitoring. The AMT also provided daily weather, and creek stage monitoring, and assisted the Sampling Technician with the collection of samples for fill characterization, water treatment system efficacy, and usability of imported soils. Quality Assurance services and assistance with the Green Remediation Plan were included.

**690 Portland Avenue NYSDEC Brownfield Cleanup, Rochester, NY -** This project site is the former JML Optical property at 690 Portland Avenue in the city of Rochester, NY. RE&LS was asked to investigate the cleanup of the trichloroethylene (TCE)-contaminated project for the city. Decades of the operation of JML Optical resulted in a TCE plume in groundwater migrating away from the former JML building, impacting the residential properties to the west. The investigation included the installation of overburden and bedrock monitoring wells, and sampling soil, and groundwater. Soil vapors were also sampled in conformance with the NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York. Based on these results, NYSDEC requested that we install a deeper bedrock well. RE&LS installed and sampled the deeper well by "packer testing" to segregate the zones of contaminated bedrock groundwater. RE&LS completed the Remedial Investigation (RI) in compliance with the BCP. Several Interim Remedial Measures dealing with the dense non-aqueous phase liquid (DNAPL) cleanup of TCE were performed. This included the installation of sub-slab depressurization systems (SSDS) in three residential properties along Portland Avenue to address TCE vapor encroachment, as well as source removal of approximately two drums of hazardous TCE-contaminated sump sediments from inside of the former JML building.

**Finger Lakes Area Counseling & Recovery Agency, Clifton Springs, Ontario County, NY -** The Finger Lakes Area Counseling and Recovery Agency (FLACRA) is a multi-county residential and outpatient substance abuse treatment agency serving individuals and families in the Finger Lakes. A NEPA screening was conducted to construct a new building on currently undeveloped land located. The new building is an 11,500 square foot (sq. ft.) and houses administrative offices, multiple programs, staff and an Opioid Crisis Center. RE&LS provided a Phase I Environmental Site Assessment for the environmental screening necessary to complete the Environmental Report documenting preliminary compliance with National Environmental Policy Act (NEPA). The Environmental Report was required to secure funding through the United States Department of Agricultural (USDA) for the proposed construction of the Administration Building

### City of Rochester, Phase II Environmental Site Assessment, 101-113 Franklin Street, 106 Pleasant Street, Rochester, New York

The Site consisted of two City-owned parcels of undeveloped land ("parking lot") and ("vacant commercial land"). The City regarded the Site as a future mixed-use development site that could include apartments or townhouses. The site has a 140 year history of residential and commercial use and a Sanborn Map that depicted three gasoline tanks on the northern part of the Site. In addition, the site has documented history of a printing shop, automobile repair facility, welding shop, dry cleaning facility, photographic facility, and metal foundry buildings over the properties long history. RE&LS environmental services included: soil test borings and installation of groundwater monitoring wells; toxicity characteristic leaching procedure (TCLP) sampling of soil or fill materials; water level measurements and survey of monitoring well evaluations; GPS recording of Phase II ESA; Preliminary Geotechnical investigation point locations; characterization and disposal of investigation-derived waste; and a Preliminary Geotechnical. (2019)

Rochester Central School District School, No. 6 Dag Hammarskjold Elementary School Phase I & Limited Phase II ESA, City of Rochester - RE&LS performed a Phase I and Limited Phase II ESA to investigate petroleum odors encountered during a geotechnical survey of the Site. Whitney assisted with the Phase I and provided field work, drilling oversight, soil screening, and collected soil and groundwater samples to investigate Site conditions. Whitney assisted with the oversight during an EM Survey to investigate suspect and potential underground storage tanks, and and prepared the Remedial Action Plan to delineate and remediate the spill. (2018)

**First Buffalo River Marina Capital Improvements, Buffalo, NY -** The Erie Canal Harbor Development Corporation retained RE&LS as part of a design team to provide master planning, environmental review, site management plan, design, permitting, bidding, and construction administration and inspection services related to the capital improvement of the First Buffalo River Marina. RE&LS reviewed a previous Phase I ESA. RE&LS recommend collecting surficial soil samples across the Site. We also recommended a radiological survey across the Site to investigate for radioactive slag. Whitney performed a Historical records review. (2018)

111 West Shore Boulevard, Newark, NY (drycleaner) – Phase II Whitney conducted a Phase I and Limited Phase II Environmental Site Assessment (ESA) in the Town of Newark, New York, in conformance with the NYSDOH soil vapor intrusion protocols. The project also included indoor air sampling. The Site was used as a dry cleaning facility from 1989 until 2016. (2018)

**136 Barberry Terrace, Rochester, New York – Phase II** Whitney prepared a Phase II ESA to address potential vapor intrusion conditions. Based on the construction date of the subject building and the presence of LBP (lead-based paints), surficial soil was potentially contaminated with lead. She collected one composite soil sample from beneath the dripline of the subject building. Numerous VOCs indicative of contamination from a petroleum spill, an auto body repair shop and/or manufacturing operations were detected in the sub-slab and indoor air samples. (2018)

**129 Fernwood Avenue, Rochester, NY – Phase II** Whitney prepared a Phase I ESA report and concluded that vapor encroachment was a potential concern. She supervised a Phase II ESA including surficial soil sampling for lead, groundwater sampling using a geoprobe and installation of a temporary groundwater monitoring well.

**Speedy's Cleaners, 3130 Monroe Ave, Rochester, NY**– Whitney performed field sampling for soil vapor intrusion via the placement of Summa air canisters at this brownfield site. The field sampling was required to perform a series of sub-slab differential pressure measurements to determine soil vapor intrusion mitigation system coverage and efficiency. She also provided oversight for the installation of improvements to a sub slab depressurization system.

Environmental Oversight of Reef Vessel Preparations New York State Canal Corporation, Environmental Oversight Reliable Vessel, Phoenix NY RE&LS conducted Environmental Oversight activities for vessel preparation of the Reliable located in Phoenix, New York. RE&LS provided guidance to the contractor with the goal of meeting the remediation requirements as provided by the NYS Department of Environmental Conservation and the USEPA document titled "National Guidance: Best Management Practices for Preparing Vessels Intended to Create Artificial Reefs." RE&LS ensured all materials were properly removed and disposed of in accordance with all best management practices, applicable federal and state rules and regulations. RE&LS also provided environmental monitoring services on this project. (2019)

**Inactive Hazardous Waste Disposal Site—Rochester NY -** As part of a refinance, RE&LS was retained to conduct a Phase I ESA at a City of Rochester property. The facility was formerly listed as an inactive hazardous waste disposal site, based on its 90 year history as an aluminum and sheet metal manufacturing facility. Multiple investigations completed at the property identified chlorinated solvent impacts on site soils and groundwater. Ms. McAlpin was responsible for conducting the Phase I ESA in accordance with ASTM standards and assisted in the client's assessment of current environmental risk.

**Buffalo Outer Harbor State Park, Buffalo, NY** RE&LS was responsible for the Asbestos and Hazardous Materials survey and sampling, inspection, and testing for PCB caulks. This included a room-by-room investigation of all interior and exterior spaces within ten buildings. Sampling was performed in accordance with AHERA regulations, 40 CFR Part 763.86 and 763.87 and NYS Code Rule 56. As part of this project, Whitney performed surficial and subsurface soil sampling using a geoprobe for VOCs, metals and soil health analysis. She also measured soil compaction using a penetrometer. (2019-2020)

### Transportation

RE&LS provided environmental screenings on these transportation projects. Services included determination of the NEPA and SEQR classifications, as well as the evaluation of potential impacts on: general ecology and endangered species, ground water, surface water, state and federal wetlands, floodplains, navigable waterways, historic resources, hazardous waste, asbestos, noise, air quality, energy, farmland, visual impacts and critical environmental areas. Whitney assisted in gathering information and preparation of reports for environmental screenings on the following

**Inactive Hazardous Waste Disposal Site—Rochester NY -** As part of a refinance, Ms. McAlpin was retained to conduct a Phase I ESA at a City of Rochester property. The facility was formerly listed as an inactive hazardous waste disposal site, based on its 90 year history as an aluminum and sheet metal manufacturing facility. Multiple investigations completed at the property identified chlorinated solvent impacts on site soils and groundwater. Ms. McAlpin was responsible for conducting the Phase I ESA in accordance with ASTM standards and assisted in the client's assessment of current environmental risk.

NYSDOH Certified Asbestos Inspector NYSDOH Certified Air Project Monitor 40 Hour HAZWOPER 10 Hour Construction Safety Course NYSDEC Erosion and Sediment Control Qualified Inspector Wetland Delineation & Regional Supplement Training

### **PROFESSIONAL EXPERIENCE**

Lynn is an environmental professional with over ten years of experience performing Phase I Environmental Site Assessments, Phase II investigations, air project monitoring, Hazardous Materials Inspections, and remedial plans, soil gas surveys, underground storage tank closures, Brownfield Cleanup Program remedial investigations, and NYSDEC Electronic Data Deliverable (EDD) preparation. She is a dedicated environmental professional proficient in environmental chemistry analytical techniques, and Geographical Information Systems.

### PROJECTS

**690 Portland Avenue NYSDEC Brownfield Cleanup, Rochester, NY** -This project site is the Former JML Optical property at 690 Portland Avenue in the City of Rochester, NY. RE&LS conducted the remedial investigation of this trichloroethylene (TCE)-contaminated property. Decades of the operation of Former JML Optical resulted in a TCE plume in groundwater migrating away from the site, impacting the residential properties to the west. The investigation included the installation of overburden and bedrock monitoring wells, and soil and groundwater sampling for contaminants of concern and PFAS analytes.. Soil vapors were sampled in conformance with the NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York. Based on these results, NYSDEC requested that a deeper bedrock well was installed. RE&LS installed and sampled the deeper well by "packer testing" to segregate the zones of contaminated bedrock groundwater. RE&LS completed the Remedial Investigation (RI) in compliance with NYSDEC DER-10 regulations. Several Interim Remedial Measures were performed. This included the installation of sub-slab depressurization systems (SSDS) in three residential properties along Portland Avenue to address TCE vapor encroachment, as well as source removal of approximately two drums of hazardous TCE-contaminated sump sediments from inside of the former JML building.

University at Albany, Class Lab Renovation Phase VI, Albany, New York - The Class Lab Renovation Phase VI included the renovation of labs and classroom space within the Biology and Chemistry Buildings on the Uptown Campus of the University of Albany. RE&LS provided Inspection and Design Services for the Project as well as Project Monitoring and Air Sampling during construction. The Project included the removal of asbestos-containing, PCB-containing and lead-containing materials over the course of several phases lasting over a 1-year period. RE&LS's Project Monitor was instrumental in identifying disturbed vermiculite insulation during construction prior to further demolition activities assisted in preventing a much larger incidental disturbance. RE&LS collected over 1,000 air samples during the abatement and provided visual inspections for over twenty-five work areas.

**Lyell Ave, Rochester, NY** –RE&LS performed Phase I & II Environmental Site Assessments for Edward N. Annechino/Josephine Annechino Trust and Knauf Shaw LLP. The subject site was a nearly half-acre lot with a brick building at the southeast corner of the Lyell Avenue and Mt. Read Boulevard intersection in the City of Rochester, New York. The site was originally opened as a gas station in 1921 and operated as a gas station and auto center by a series of owners until the 2000s. RE&LS conducted an initial site inspection of the historic pump islands, on-site brick building, UST pads and vent pipes south of the building, indicative of an historic waste oil tank, and the fuel oil tank.

Rome Waterfront Village Infrastructure Improvements, Rome, NY - The Rome Waterfront Village project was intended to foster the revitalization of the area between South James Street and Erie Boulevard north of the Erie Canal as well as improve public access to the canal. The development included the construction of a bulkhead and dock system within the Erie Canal as well as public walkways, seating areas, utility infrastructure, and stormwater management practices. Lynn performed Phase I ESA's to investigate the potential impact of several properties in the Rome Waterfront Village Infrastructure Improvement project. The Phase I Environmental Site Assessment (ESA's) where on each of the two Sites within the Rome Waterfront Village project area. Lynn also provided a third party review on the historical documents of the sites.

**City of Rochester, Bull's Head Brownfield Opportunity Area (BOA), Rochester, NY** – This project included community participation, research, analysis, and planning activities necessary to conduct and prepare a BOA Nomination Study Report of the area referred to as the Bull's Head neighborhood which was defined as approximately 188 acres of land that centers on the intersections of Brown Street, West Main Street, Genesee Street, Chili Avenue and West Avenue in the City of Rochester. RE&LS provided a detailed description and analysis of existing conditions, opportunities, and reuse potential for properties located in the BOA with an emphasis on the identification and reuse potential of strategic sites. RE&LS also provided the initial environmental conditions screening of parcels within the project site to identify potential brownfield sites.

**Oswego Canal Corridor BOA Step 3 Oswego, NY** - This consists of a 1,345 acre area on the City's waterfront characterized by 49 identified brownfield, vacant, and underutilized sites. The primary community revitalization objectives include creating a vibrant sustainable mixed use redevelopment district that enhances the City's historic downtown and port, providing access to the City's waterfront areas, supporting targeted industry growth, and complementing adjacent residential neighborhoods. Lynn performed two (2) Phase I ESAs to investigate the potential impact of several properties in the Oswego Canal Corridor BOA project area.

African American Cultural Center, Buffalo, NY - RE&LS was retained by the Buffalo Urban Renewal Agency for environmental consultant services for Phase I & Phase II Environmental Site Investigations for ten (10) properties located on Glenwood Avenue, Masten Avenue, and East Utica Street in the City of Buffalo. RE&LS's responsibilities included a visual inspection for suspect asbestos containing materials, suspect lead-based paint, mercury containing lights, switches and PCB ballasts, and possible mold contamination due to water intrusion. Survey responsibilities included a boundary survey and test boring locations at all properties.

**5 & 15 Flint Street Brownfield Remedial Investigation, Rochester, NY** - RE&LS has completed the Remedial Investigation for the New York State Department of Environmental Conservation Brownfield Cleanup Program (BCP) for the 5 & 15 Flint Street sites in Rochester, New York; this site is contiguous at the north side of the City of Rochester Vacuum Oil BCP. Lynn provided field work, drilling oversight, well development, soil vapor pathway sampling and analysis, collected water quality parameters, and screened for volatile organic compounds using a photo-ionization detector (PID). The groundwater collection method used was a low flow purging and sampling method with a bladder pump. In addition, Lynn prepared both the EDD and the RIR.

1440 Empire Boulevard Brownfield Remediation, Rochester, NY - The Site was an approximately 4.5-acre parcel on Empire Boulevard, it was proposed for a 358-unit apartment complex. Lynn was the lead on-site consultant during remedial activities to ensure that all work within the limits of the BCP was performed in accordance with the Remedial Action Work Plan (RAWP). Lynn sampled imported soils to ensure that soils met the NYSDEC criteria for soils used in the soil cover system, performed CAMP air monitoring (Community Air Monitoring Program) to ensure that contaminated soils were not migrating off-site. Lynn prepared the Final Engineering Report (FER) and the Electronic Data Deliverable (EDD). RE&LS continues to provide CAMP monitoring whenever the cap is breeched, as well as soil sampling of imported soils under the SMP.

**10 Chapin Street Brownfield Remedial Action, Rochester, NY** - RE&LS was hired to conduct the remediation of this former manufacturing site. Lynn prepared the Draft Remedial Action Work Plan.

**37 Bittner Street, Rochester, NY** - 37 Bittner Street is the parking lot at the north side of the Kirstein Building. It is proposed for development as a 93,200 sq. ft. 6-story apartment building with an underground parking garage. The parking lot at 37 Bittner Street was historically used as a public gas station with documented petroleum contamination in the underlying soils and groundwater. RE&LS obtained NYSDEC approval to perform a Brownfield Cleanup Program (BCP) to further define the nature and extent of potential on-site impacts resulting from historical operations at the site. The results of this investigation were used to evaluate remedial actions required to render the site suitable for development. Lynn provided groundwater sampling and underground storage tank (UST) closure assistance.

Rochester Central School District School No. 6 Dag Hammarskjold Elementary School Phase I & Limited Phase II ESA, City of Rochester - RE&LS performed a Phase I and Limited Phase II ESA to investigate petroleum odors encountered during a geotechnical survey of the site. Lynn performed the Phase I and provided field work, drilling oversight, soil screening, and collected soil and groundwater samples to investigate Site conditions. Based on the results of the Phase II, a petroleum spill was reported to the NYSDEC. Subsequent to the results of the Limited Phase II ESA, Lynn provided oversight during an EM Survey to investigate suspect and potential underground storage tanks, and conducted a subsurface investigation to delineate and remediate the spill, and prepared the Remedial Action Plan.

**New Police Station, Niagara Falls State Park, Niagara Falls, NY** - RE&LS provided Environmental and Permitting services for this term contract for the Rehabilitation and Improvement of various facilities at the Niagara Falls State Park. As part of this contract, RE&LS provided a Phase I Environmental Site Assessment (ESA) at the proposed new Police Station site along the Gorge Rim south of the existing Discovery Center. Findings from the Phase I ESA led to a Phase II test pit investigation, sampling, and radiological survey. Lynn was responsible for the Phase II radiological survey, soil sampling and vapor screening.

**Richland Estates Phase I ESA, Greece, NY** - RE&LS conducted a Site inspection for this residential development of eight lots in the Town of Greece, New York. Lynn performed the investigation, and prepared the Phase I ESA report in accordance with ASTM 1527-13.

### **EDUCATION**

History, B.A. – SUNY Brockport (2006) Political Science, B.A. – SUNY Brockport (2006

### **PROFESSIONAL CERTIFICATIONS**

NYS Asbestos Project Monitor/Air Technician NYS Asbestos Project Designer/Management Planner NYS Asbestos Inspector NYS Asbestos Project Designer USEPA Lead Risk Assessor/Inspector NYS Mold Assessor Certification OSHA 10 Hour OSHA 40 Hour HAZWOPER Aerial Lift Operator

**Benjamin Reddy** has over 16 years of experience of professional consulting in all tacets of environmental related projects. His specialty and area of expertise in asbestos, lead and PCB abatement, regulatory compliance, radon studies, environmental and hazardous waste assessments provides clients with comprehensive solutions. His experience has consisted of site investigations, collection of asbestos and hazardous waste materials for analytical (bulk and air) testing, development of contract plans, specifications, and construction cost estimates for remediation projects, and development of hazardous and asbestos management plans, contractor oversight and report generation.

### PROJECTS

Town of Ontario Library Renovations, Ontario, NY - RE&LS was retained by Town of Ontario to conduct a Limited Pre-Renovation Asbestos Survey/Inspection at Ontario Public Library. Certified Asbestos Inspectors assessed interior spaces for suspect asbestos-containing building materials that may be impacted by the proposed renovation project to determine the presence, location, quantity, and condition of asbestos-containing materials (ACMs). The Survey/Inspection was conducted to support the proposed ADA Accessibility Upgrades and general refurbishment renovation project at Ontario Public Library. RE&LS conducted the Survey/Inspection and provided the Hazardous Materials Inspection Report.

**Old Upper Mountain Rd., Lewiston, NY -** RE&LS provided environmental inspections and on-site construction administrative tasks for the Old Upper Mountain Road Site in Lockport, NYSDEC Site No. 932112. RE&LS provided a full-time Air Monitoring Technician (AMT) that was onsite daily for the duration of the project to provide air and fugitive dust monitoring. The AMT also provided daily weather, and creek stage monitoring, and assisted the Sampling Technician with the collection of samples for fill characterization, water treatment system efficacy, and usability of imported soils. Quality Assurance services and assistance with the Green Remediation Plan were included.

**Wyoming Bus Facility Project, Wyoming County, NY -** RE&LS performed a Pre-Renovation Asbestos Inspection, Lead Paint Survey, and PCB Caulk Survey for buildings at the Wyoming County Bus Facility. Following the inspection RE&LS created construction documents, abatement design documents and specifications for the removal of hazardous material. This project is currently in the design phase. It is anticipated that RE&LS performed the project/air monitoring services when abatement occurs.

Niagara Falls State Park Orin Lehman Visitor Center and Administration Building, Niagara Falls, NY - RE&LS conducted a Pre-Demolition Hazardous Materials Inspection consisting of a Pre-Demolition Asbestos Survey/Inspection, Pre-Demolition Polychlorinated Biphenyl (PCB) Caulk Survey, and Pre-Demolition Lead Paint Survey was completed at Niagara Falls State Park Orin Lehman Visitor Center. RE&LS provide a report of the results of the inspection/survey. RE&LS prepared Asbestos Abatement Design documents, including, plans and specifications for the renovation project and provided Construction Administration Services throughout the execution of the renovation.

**Buffalo Outer Harbor – Terminal A, Buffalo, NY -** RE&LS provided a Visual Assessment and Limited Asbestos Survey/Inspection for suspect asbestos-containing materials (ACMs) and the overall condition of the building materials of select areas in the building in Terminal A at Buffalo Outer Harbor. Based on the condition and presence of asbestos-containing materials and lead-based paint in the specific areas in Terminal A, RE&LS performed bulk sampling of suspect materials that were included in the report and provided safety recommendations for remediation 2021

**SUNY Delhi, Upgrade Building Management Systems– Various Buildings, Delhi, NY -** RE&LS conducted a Pre-Renovation Asbestos Survey/Inspection and Lead Paint Survey have been completed at ten campus buildings at SUNY Delhi. RE&LS provided the results in a report for each of the buildings to be impacted by the proposed renovation. RE&LS prepared Asbestos Abatement Design documents, including, plans and specifications for the renovation project and provided Construction Administration Services throughout the execution of the renovation.

**Browncroft Community Church, Rochester, NY** - The Church was planning major updates and renovations throughout the facility. RE&LS was retained by the Church to perform a hazardous material survey, creation of design documents and specifications, and provide project and air monitoring services as required by 12 NYCRR Part 56. The project involved replacement of all exterior windows, debris clean-up, floor tile removal and pipe insulation removal throughout. RE&LS worked closely with the architect, general contractor and abatement contractor to ensure that all work was completed in a timely and efficient manner.
