1.0 EXECUTIVE SUMMARY

The following details the findings of TurnKey relative to identifying RECs for the following properties (collectively referred to herein as the Site):

- Property 1 - 1609 Elmwood Avenue.
- Property 2 - 668 Amherst Street, 670 Amherst Street, 680 Amherst Street, 1624 Elmwood Avenue, 1628 Elmwood Avenue, 1634 Elmwood Avenue, 155 Marion Street.
- Property 3 - 111 Marion Street, 141 Marion Street, 666 Amherst Street.

1.1 General Information

TurnKey has performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM Practice E 1527-13 and the protocols required by the Client. This section summarizes the findings of the environmental professional relative to the Site. The reader is encouraged to read the entire report.

1.2 Site Description

The Site is located in a highly developed commercial and residential area of the City of Buffalo (see Figure 1). As shown on Figure 2, the Site consists of multiple parcels that were broken down by TurnKey into three distinct properties, as follows:

- Property 1 includes one structure (Building 1) currently occupied by CVS Pharmacy. Property 1 consists of one parcel totaling approximately 0.75-acres and is supplied with municipal sanitary sewer, electric, natural-gas and public water.
- Property 2 includes five structures (Buildings 2 through 6). Building 2 is a bowling alley, Building 3 is a sign shop, Building 4 is a residence, Building 5 is an automotive repair shop, Building 6 is a residence. Property 2 consists of seven parcels totaling approximately 1.59-acres and is supplied with municipal sanitary sewer, electric, natural-gas and public water.
- Property 3 includes three structures (Buildings 7 through 9). Building 7 is used for storage, Building 8 is used for storage of materials for theatre productions, and Building 9 is a residence. Property 3 consists of three parcels totaling approximately 1.45-acres and is supplied with municipal sanitary sewer, electric, natural-gas and public water.

The properties totaling approximately 3.8-acres are further described in the table below:

Property ID	Number	Street	Tax ID No.	Current Owner	Current Use
Property 1	1609	Elmwood Avenue	89.21-3-21	Voelker Edward W Trust	CVS Pharmacy
Property 2	680	Amherst Street	89.21-7-8	Am-Elm Realty, Inc.	Bowling Alley
	1624	Elmwood Avenue	89.21-7-7	Mark E Voelker	Vacant land/ parking lot
	1628	Elmwood Avenue	89.21-7-6.2	Labrador Building Systems, Inc.	NAS Sign Company
	1634	Elmwood Avenue	89.21-7-6.1	Labrador Building Systems, Inc.	Vacant Residential
	155	Marion Street	89.21-7-5	Labrador Building Systems, Inc.	Auto Repair
	670	Amherst Street	89.21-7-9	Labrador Building Systems, Inc.	Vacant land/ parking lot
	668	Amherst Street	89.21-7-10	Labrador Building Systems, Inc./ Voelker Bowling Inc.	Vacant residential
Property 3	141	Marion Street	89.21-7-4	Labrador Building Systems, Inc.	Commercial Storage
	111	Marion Street	89.21-7-1.1	Mark E Voelker	Storage
	666	Amherst Street	89.21-7-11	Labrador Building Systems, Inc.	Vacant residential

1.3 Data Gaps

The following data gaps[1] were identified in completion of this inquiry.

Type of Data Gap	Details of Data Gap	Sources Consulted	Significance
Historical Information	Historical information for the Site was not available at five-year intervals.	Previous studies, city directories, aerial photographs, Sanborn maps, and municipal information.	This data gap did not significantly limit TurnKey's ability to provide an opinion on RECs related to the Site.
Abstract of Title	The abstract of title was not available for review at the time of report preparation.	Current property owner (i.e., user of this report).	This data gap did not significantly limit TurnKey's ability to provide an opinion on RECs related to the Site.
Site Reconnaissance	Parked vehicles, stored materials/equipment, and dense vegetation hindered observations at the time of the Site reconnaissance.	Site reconnaissance	This data gap did not significantly limit TurnKey's ability to provide an opinion on RECs related to the Site.
Environmental Questionnaires	The current property owners did not provide the completed Environmental Questionnaires.	Current Property Owners	While the lack of a questionnaire would be considered a data gap, such did not significantly limit TurnKey's ability to provide an opinion on RECs related to the Site.

[1] A data gap is defined by 40 CFR 312.10 as "a lack of or inability to obtain information required by the standards and practices" of preparation of this document "despite good faith efforts by the environmental professional" or others to gather such information.

1.4 Environmental Report Summary

1.4.1 Summary of Site Reconnaissance Potential Concerns

The following potential environmental concerns were identified at the time of the Site reconnaissance:

Property 1

- No significant environmental concerns were noted in connection with Property 1 during the site visit; however, TurnKey is aware of the historic use of Property 1 as a dry cleaner.

Property 2

- Building 5 is currently used as an automotive repair operation with associated storage and use of hazardous/regulated materials.
- Automotive-related fluids including oils, paint, and antifreeze were noted in Building 5 in containers of five-gallons or less.
- Hazardous/regulated wastes are generated in connection with automotive repair operations at Building 5. According to the property owner, wastes generated on-Site include oils. The property owner indicated that the wastes are transported off-site by a local company. One unlabeled 55-gallon container was observed within Building 5; the container is reported by the site contact to contain waste oil.
- A floor drain was noted in the northern repair area and within the painting room of Building 5. The current property owner indicated that the floor drains discharge into the public sewer system.
- Black staining/spillage believed by TurnKey to be waste oil was noted to the concrete ground surfaces proximate to a floor drain within the northern repair area of Building 5.
- Additional black staining was observed on concrete floor surfaces within Building 2 proximate to ASTs within the basement. Some of the staining was noted proximate to cracks in the concrete floor. In addition, a floor drain was noted proximate to the staining.
- A petroleum odor was noted within the basement of Building 2 proximate to the fuel oil ASTs.
- An unknown concrete pit was noted within Building 5. No concerns (staining, odors, etc.) were noted within the concrete pit.

Property 3

- Two suspect fill ports and two proximate suspect vent pipes apparently associated with two existing USTs were observed by TurnKey east of Building 8.
- Two fuel oil ASTs were noted within the basement of Building 8. The presence of miscellaneous debris proximate to the ASTs hindered observations of ground surfaces proximate to the tanks. Two suspect vent pipes and two suspect fill pipes were noted protruding from east wall of Building 8; TurnKey suspects that these vent/fill pipes are associated with the basement ASTs.
- TurnKey observed evidence of fill materials in the area of railroad tracks on-Site at the time of the Site reconnaissance. In addition, the current tenant of Building 7 indicated that this area of the Site contains coal fill materials from former coal storage. TurnKey is also aware of former buildings at the Site, including former coal silos; round concrete areas on the northwestern portion of the Site are believed by TurnKey to be associated with the former coal silos.

General Site Conditions

- Large amounts of debris and stored materials were noted within Buildings 2, 3, 5, 6, 7, and 8. Specifically, electronic and household debris on the second floor of Building 2, stored materials in Building 3, automotive debris including tires and automotive parts in Building 5, household debris in Building 6, miscellaneous debris in Building 7, and stored materials and miscellaneous debris in Building 8.
- Adjacent properties are currently utilized for residential/commercial purposes, including gasoline station and automotive repair operations. Historic operations included a junk yard.

1.4.2 Summary of Historic Uses

Approximate Years	Reported or Suspected Use	Owner/Occupant
1916 to current	The Site has a history of mixed uses for residential, commercial and industrial purposes.	Past owners/occupants include: Property 1 – Thorough Dry Cleaners Property 2 – John Fliss Garage, Joesph Vallone auto repair, Yanik Bros Trucking, Joes Auto painting and collision, Michaels Dental Lab, M & K Precision Manufacturing, Wash & White Laundromat, Phils Auto Service Property 3 – JQ Clark Coal Company, Bear Ridge Coal Co., D J Stickney Coal Co

		Current Owners/ occupants: Property 1 – CVS Pharmacy, 1826 Elmwood, LLC Property 2 – Voelkers Bowling Center, NAS Sign Company, Maleks Collision, Labrador Building Systems, Inc. Property 3 – Mark E Voelker, Labrador Building Systems

Potential environmental concerns identified for each Property through review of historical sources are identified below, Areas of concern are shown on Figure 3.

Property 1

- Thorough Dry Cleaners occupied Property 1 from at least 1935 through at least 1955. This operation occupied a former building located on the southern portion of Property 1 (current parking lot).

Property 2

- Current/historic operations included automotive repair and/or a collision shop (at least 1930, at least 1946 through at least 1964 and 2008 to current), a trucking company (at least 1945 through at least 1992), an electrical equipment company (at least 1960), tool manufacturing (at least 1964), a machine shop (at least 1975 to at least 1992), refrigeration service (at least 1940) and a laundromat (at least 1970 to at least 1975). Municipal records indicate installation of presumed USTs at Property 2 in unknown locations. Specifically, one 1,000-gallon gas tank was installed in 1946 and an additional 1,000-gallon tank was installed in 1955. A portion of a railroad spur was on Property 2 in at least 1950.

Property 3

- Historic operations included coal companies with coal silos (at least 1935 through at least 1964) and warehousing (at least 1930 through at least 1955). A railroad spur bisected Property 3 in at least 1950. Municipal records indicate presumed USTs at Property 3. Specifically, one 500-gallon gasoline tanks was installed in 1929, one 550-gallon gasoline tanks was installed in 1937, a 2,000-gallon gasoline UST was used in 1954 and one 1,000-gallon UST was removed in 1965.

1.4.3 Summary of Previous Studies

One 5,000-gallon fuel oil UST and approximately 120 tons of petroleum-impacted soil were removed from Property 2 by others in July 2003 under NYSDEC Spill No. 0375107. Based on favorable confirmatory soil sample results, the NYSDEC reclassified the spill incident as "closed" indicating that no further work is required.

See Section 5.4.8 below for additional information relative to previous assessments.

1.4.4 Regulatory Information

Site Listings

Site Database Listings	Address/Name	Summary
PA Manifest, RCRA-LQG, NY Manifest, FINDS, ECHO	1625 Elmwood Avenue/CVS # 00609	Property 1 is listed as a RCRA large quantity generator under EPA ID: NYR000192146 and FINDS registry ID: 110045417642 with no violations found.
EDR Historic Cleaner	1611 Elmwood Avenue/ Thorough Cleaners	Property 1 was listed as a clothes presser and cleaner/ cleaner and dyer from at least 1935 through at least 1955. The occupant was identified as Thorough Dry Cleaners.
EDR Historic Auto	1630 Elmwood Ave/ Lawrence J Carburetor Co Auto Repair	Property 2 was identified as an automotive repair facility from 1930 through at least 1964.
EDR Historic Cleaner	1630 Elmwood Avenue/ Wash M White Laundromat	Property 2 was identified as a self-serve laundry facility from at 1964 through at least 1975. The occupant was identified as White Wash Laundromat.
NY UST, NY Spills	686 Amherst Street/ Voelker's Bowling Center	Property 2 is listed under PBS Id: 9-600762 with one UST listed. Tank number 1- a 5,000-gallon #2 fuel oil UST closed/ removed from the Site on May 22, 2003. Spill No. 0375107 took place on May 28, 2003 and involved contamination discovered while removing the 5,000-gallon fuel oil UST identified above. 160 tons of contaminated soil were removed and disposed of off-Site. The spill was listed as "closed" by the NYSDEC on July 29, 2003. Additional information relative to this spill incident is provided in Section 5.4.8.
EDR Historic Auto	155 Marion Street/ Phils Auto Service repair and service	Property 2 was listed as an automotive repair shop from 2004 through at least 2014 under Phil's Auto Service.

Adjacent Property Listings

Adjacent Database Listings	Address/Name	Summary
NY Spills	Amherst and Elmwood/ Old Sunoco station	Spill No. 8905408 took place on September 1, 1989 and involved a complaint of oil dumping. Upon investigation no spill was found and the spill was listed as "closed" by the NYSDEC on September 6, 1989.
NY Spills	Elmwood and Amherst/ National Fuel Gas	Spill No. 8810090 took place on March 27, 1989 and involved oily residue encountered while excavating for a natural-gas line. The spill was addressed and listed as "closed" by the NYSDEC on November 23, 1990.
EDR Historic Auto	19 Elmhurst Place/ Norm Manhardt Jr Collision	This adjacent property is listed as an automotive repair shop from 1960 through at least 1998.
NY LTanks, NY UST, NY Spills, EDR Historic Auto, RCRA Non-Gen, ICIS, FINDS, ECHO, NY Manifest	1602 Elmwood Avenue/ Joe's Service Center	This adjacent property was listed as a gasoline and oil service station from at least 1925 through at least 2012 and is currently and active PBS facility under id: 9-079677 with three active USTs and three closed/removed USTs. This property has multiple "closed" spill incidents. This property is also listed under EPA Id: NYD986908754
NY Spills	1602 Elmwood/ Sunoco Station	Spill No. 1807314 took place on September 21, 2018 and involved an overfill on a vehicle and is listed as "Inactive" by the NYSDEC on October 31, 2018.
EDR Historic Auto	1601 Elmwood Avenue/ Dicks NYE Park Service Gas Station	This adjacent property is listed as a gasoline and oil service station from 1935 through at least 1960.
EDR Historic Cleaner	646 Amherst Street/ Mc Manus Rug Cleaning Company	This adjacent property was listed as a EDR historic cleaner as a Carpet and upholstery cleaner from 1976 through at least 1980.
EDR Historic Cleaner	1595 Elmwood/ Castle Cleaners Inc.	This adjacent property was listed as an EDR historic cleaner as a cleaner and dyer from 1964 through at least 1970.

Numerous regulatory listings were identified for nearby properties located within the search radii. None of the listings associated with nearby properties suggested a specific environmental concern at the Site.

1.4.5 Other Findings

Historic operations at the Site, especially dry cleaner/laundry operations, are considered potential VECs. Further testing would be required to assess whether a VEC exists at the Site.

1.4.6 Interviews/Questionnaires

The City of Buffalo Building Inspector would not provide an interview.

The Environmental Questionnaire was not completed by the current property owner or owner's representative.

1.5 Report Findings

Where applicable for the Site, the following is a list of RECs, CRECs, HRECs, and de minimis conditions. Non-scope considerations are also provided.

RECs

Per ASTM E1527, a REC is the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

TurnKey's investigation revealed the following RECs in connection with the Site (See Figure 3):

Property 1

- Thorough Dry Cleaners, a presumed dry cleaning operation, occupied a former building on the southern portion of Property 1 (current asphalt parking lot area) from at least 1935 through at least 1955.

Property 2

- Current operations include automotive repair with the storage and use of hazardous/regulated materials. Historic operations have included automotive repair and/or a collision shop, a trucking company, an electrical equipment company, tool manufacturing, a machine shop, refrigeration service and laundry/laundromat facilities

with the potential for dry cleaning. In addition, a portion of a railroad spur was formerly located on-Site.

- Floor drains located within current repair areas and a paint room in Building 5 reportedly discharge into the municipal sanitary sewer system.
- Black staining/spillage was noted to concrete ground surfaces proximate to a floor drain within Building 5.
- Additional black staining was noted to concrete ground surfaces proximate to fuel oil ASTs within the basement of Building 2. Some of the staining was noted proximate to cracks in the concrete floor. In addition, a floor drain was noted proximate to the staining.
- A petroleum odor was noted within the basement of Building 2 proximate to the fuel oil ASTs.
- Municipal records indicate installation of presumed USTs at Property 2 in unknown locations. Specifically, one 1,000-gallon gas tank was installed in 1946 and an additional 1,000-gallon tank was installed in 1955.
- An unknown concrete pit was noted within Building 5. No concerns (staining, odors, etc.) were noted within the concrete pit.

Property 3

- Historic operations included coal companies with coal silos and warehousing. A railroad spur bisected Property 3 in at least 1950.
- Municipal records indicate presumed USTs at Property 3. Specifically, one 500-gallon gasoline tank was installed in 1929, one 550-gallon gasoline tanks was installed in 1937, a 2,000-gallon gasoline UST was used in 1954 and one 1,000-gallon UST was removed in 1965.
- Two suspect fill ports and two proximate suspect vent pipes presumed by TurnKey to be associated with two existing USTs were noted east of Building 8 in the current gravel parking lot.
- Two fuel oil ASTs were noted within the basement of Building 8. The presence of miscellaneous debris proximate to the ASTs hindered observations of ground surfaces proximate to the tanks. Two suspect vent pipes and two suspect fill pipes were noted protruding from east wall of Building 8; TurnKey suspects that these vent/fill pipes are associated with the basement ASTs.
- TurnKey observed evidence of fill materials in the area of railroad tracks on-Site at the time of the Site reconnaissance. In addition, the current tenant of Building 7 indicated that this area of the Site contains coal fill materials from former coal storage. Round

concrete areas observed by TurnKey on the northwestern portion of the Site are believed by TurnKey to be associated with the former coal silos.

Controlled RECs

Per ASTM E1527, a CREC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

TurnKey's ESA did not reveal CRECs for the Site.

Historic RECs

Per ASTM E1527, a HREC is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). For example, a spill that has been remediated to the satisfaction of the appropriate regulators would be considered a HREC.

TurnKey's investigation revealed the following HRECs for the Site:

- Spill No. 0375107 associated with removal of one 5,000-gallon fuel oil UST and impacted soil from Property 2 is considered a HREC as the spill has been addressed to the satisfaction of the NYSDEC and has a status of "closed."
- The "closed" and "inactive" spill incidents identified for adjacent/nearby properties are considered HRECs as such have been addressed to the satisfaction of the NYSDEC.

De-minimis Conditions

In accordance with ASTM E-1527, de-minimis conditions are conditions that generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de-minimis conditions are neither RECs nor CRECs.

TurnKey's investigation revealed the following de-minimis conditions for the Site:

- Miscellaneous debris and stored materials were noted throughout the Site in interior and exterior areas.

Non-Scope Considerations

Per ASTM E1527-13, non-scope considerations are described as ancillary observations during performance of the on-site investigation. Non-scope considerations are not considered RECs under ASTM E1527, but may represent health or environmental issues impacting the Site and/or property value.

TurnKey's investigation identified the following non-scope considerations:

- Based on the ages of the existing buildings, the potential for suspect ACMs and lead exists. Damaged suspect ACMs were observed during the site inspection. TurnKey understands that an asbestos survey is being completed by others as part of the clients due diligence. Asbestos and/or lead, if present, should be properly handled as part of future renovation/demolition activities.
- Suspected black mold was observed on walls and ceilings within Buildings 2, 4, 6, 7, 8 and 9. Musty odors were also noted by TurnKey.
- No wetland or flood zone areas were identified on-site or adjacent to the Site.
- Research in the area of the Site completed by the New York State Department of Health - Bureau of Environmental Radiation Protection (Radon) suggests an average basement radon concentration of 1.14 pCi/L in the area of the Site, which is below the USEPA action level of 4.0 pCi/L. As such, radon is not anticipated to be a concern.

1.6 Opinion

Due to the RECs detailed above, a site-wide Phase II Environmental Investigation is warranted to assess subsurface soil and groundwater conditions at the Site. Regardless of whether a Phase II is completed, NYSDEC regulations require proper removal of inactive/abandoned USTs and ASTs; the two suspect USTs noted east of Building 8 (Property 3) and the ASTs noted in the basements of Building 2 (Property 2) and Building 8 (Property 3) should be removed properly in accordance with applicable local, state and federal regulations. In addition, any materials remaining on-Site that are not intended for future use should be removed and properly disposed off-site.

2.0 INTRODUCTION

2.1 Purpose

The primary purpose of this assessment was to provide Benderson Development Company, LLC with sufficient information about the potential environmental risks associated with the Site.

A secondary purpose of this study was to document the inquiry of the environmental professional for all appropriate inquiries for the Site. Specifically, this document is intended to provide the "all appropriate inquiries" for the purposes of CERCLA Section 101(35)(B). Such is applicable to persons seeking to qualify for: (i) the innocent landowner defense pursuant to CERCLA Sections 101(35) and 107(b)(3); (ii) the bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 107(r); and (iii) the contiguous property owner liability protection pursuant to CERCLA Section 107(q). This report was not intended as part of the Site characterization and assessment with use of a grant awarded under CERCLA Section 104(k)(2)(B). More specifically, the scope is intended to identify conditions indicative of releases or threatened releases of hazardous substances in, on, or at the Site.

2.2 Scope of Work

The scope of work is intended to identify RECs at the Site, including the following tasks:

A) Review of information provided by the User of this Report regarding commonly known or reasonably available information about the Site.
B) Interviews with past and present owners, operators and occupants (if available).
C) Review of historical sources of information documenting the Site's use.
D) Review of Federal, State, tribal and local government records.
E) A visual inspection of the Site and adjoining properties (to the extent possible).
F) Preparation of this written report.

2.3 Significant Assumptions

No significant assumptions were made during completion of this study other than as identified Section 2.4.

2.4 Limitations and Exceptions

2.4.1 Limitations

To the extent of our knowledge, the information contained in this Report is true and accurate. TurnKey personnel have exercised due diligence in the compilation of the information contained herein appropriate to environmental professionals engaged in investigations of this nature. TurnKey makes no guarantees regarding the accuracy of information gained from other sources.

This Phase I ESA is based on current and historical information reviewed by TurnKey and their Site inspection. This Report is not to be considered an environmental audit of the Site or a complete environmental investigation of the Site. Further, the purpose of this assessment is not to proclaim a property is devoid of environmental impact but rather to identify RECs, as defined above.

This Phase I ESA makes no warranties nor implies any liability regarding:

1. Site specific practices and/or disposal methods of the past or future owners.
2. Adjacent property owners, their environmental practices and/or impact of such properties and practices on the subject property other than observed from the subject property.
3. Unreported spills.
4. Practices, waste disposal, environmental concerns and/or modifications to waste site indexes after the date on this Report.
5. Site groundwater or soil conditions.
6. Accuracy or completeness of information supplied to TurnKey by others.
7. Environmental conditions in areas not practically or safely accessible.
8. Accuracy of previous studies (if any) provided to TurnKey.

This Report is also subject to any and all limitations defined within ASTM E1527-13. This includes, but is not limited to, the limitation that this Report is intended to identify environmental conditions at a specific time and is only valid for a period of six months from the date of issuance.

The principles defined within ASTM E1527-13, and followed within this study, include the following.

- This practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property.
- All appropriate inquiry does not mean an exhaustive assessment of a clean property. One of the purposes of this practice is to identify a balance between limiting costs/time and the reduction of uncertainty about unknown conditions.
- The level of inquiry is variable and depends on the type of property, risk level of the user and information developed in the course of the inquiry.
- Subsequent environmental assessments should not be used as standards to evaluate the appropriateness of prior inquiries based on hindsight, new information or new techniques.

2.4.2 User Responsibilities

The following information is the responsibility of the user and not of the environmental professional. This information may be provided by the user to the environmental professional for use in the final opinion of the all appropriate inquiry. If the information is not provided by the user, the environmental professional's ability to render such an opinion may be hindered and identified as a data gap.

- Searches for environmental cleanup liens against the subject property that are filed or recorded under any Federal, State, tribal, or local law, as required by 40 CFR Section 312.25.
- Assessments of any specialized knowledge or experience on the part of the landowner, as required by 40 CFR Section 312.28.
- An assessment of the relationship of the purchase price to the fair market value of the subject property, if the property was not contaminated, as required by 40 CFR Section 312.29.
- An assessment of commonly known or reasonably ascertainable information about the subject property, as required by 40 CFR Section 312.30.

2.4.3 User Protections

Persons claiming the liability protections under CERCLA must meet the statutory requirements of one of the following landowner liability protections. [It should be noted that the user must also satisfy certain continuing obligations outside the scope of this Phase I Environmental Assessment, as required by CERCLA].

- The innocent landowner defense pursuant to CERCLA Sections 101(35) and 107(b)(3).
- The bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 107(r).
- The contiguous property owner liability protection pursuant to CERCLA Section 107(q).

2.5 Deviations

There were no deviations from the ASTM 1527-13 standard during the completion of this study except that a regulatory file review was not completed. Specifically, while a NYSDEC file review would typically be required under the ASTM standard for Site and adjacent property regulatory listings, such was not completed by TurnKey as: regulatory listings were not identified; completion of the file review was not anticipated to provide new or significant information; or records were not considered reasonably ascertainable in the timeframe of the report deliverable.

2.6 Special Terms and Conditions

The work was completed in accordance with the executed Master Professional Services Agreement between Benderson Development Company, LLC and TurnKey.

2.7 Reliance, Certification, and Declaration

This report was prepared for the exclusive use of Benderson Development Company their respective affiliates and subsidiaries, and all successors and assigns thereof. Any other use, or using this Report in a fashion in which it was not intended, is at the sole risk of the user. Reliance may only be granted upon written consent and is subject to those same terms and conditions as expressed in the executed Master Professional Services Agreement between Benderson Development Company, LLC and TurnKey..

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the Site. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

3.0 SITE/VICINITY DESCRIPTION

3.1 Location and Legal Description

The Site is located in the City of Buffalo and consists of eleven (11) individual tax parcels legally described as Parcel Nos. 89.21-3-21, 89.21-7-8, 89.21-7-7, 89.21-7-6.2, 89.21-7-6.1, 89.21-7-5, 89.21-7-4, 89.21-7-1.1, 89.21-7-9, 89.21-7-10, and 89.21-7-11.

3.2 Activity/Use Limitations

TurnKey is not aware of any institutional controls or activity/use limitations imposed against the referenced Site.

3.3 Site and Vicinity Description

The Site is located in a highly developed commercial and residential area of the City of Buffalo (see Figure 1). As shown on Figure 2, the Site consists of multiple parcels that were broken down by TurnKey into three distinct properties, as follows:

- Property 1 addressed as 1609 Elmwood Avenue includes one structure (Building 1) currently occupied by CVS Pharmacy. Property 1 consists of one parcel totaling approximately 0.75-acres and is supplied with municipal sanitary sewer, electric, natural-gas and public water.
- Property 2 addressed as 680 Amherst Street, 670 Amherst Street, 668 Amherst Street, 1624 Elmwood Avenue, 1628 Elmwood Avenue, 1634 Elmwood Avenue, and 155 Marion Street includes five structures (Buildings 2 through 6). Building 2 is a bowling alley, Building 3 is a Sign shop, Building 4 is a residence, Building 5 is an automotive repair shop, Building 6 is a residence. Property 2 consists of seven parcels totaling approximately 1.59-acres and is supplied with municipal sanitary sewer, electric, natural-gas and public water.
- Property 3 addressed as 111 Marion Street, 141 Marion Street, and 666 Amherst Street includes three structures (Buildings 7 through 9). Building 7 is used for storage, Building 8 is used for storage of materials for theatre productions, and Building 9 is a residence. The property consists of three parcels totaling approximately 1.45-acres and is supplied with municipal sanitary sewer, electric, natural-gas and public water.

The Site is further described in the table below:

General Site Information	
Site Addresses	1609, 1624, 1628, and 1634 Elmwood Avenue, 680, 670, 668 and 666 Amherst Street, 155, 111, and 141 Marion Street
Municipality, County, State	Buffalo, Erie County, New York
Current Site Use	Commercial and residential
Fronting Streets	Elmwood, Amherst, and Marion
Site Size	Approx. 3.79-acres (per municipal information)
Site Topography	Generally level at grade
General Site Elevation (feet above mean sea level)	600
Nearest Water Body	Scajaquada Creek located approx. .39 miles south of the Site
Improvements	Asphalt paved areas, green areas, trees, and landscaping

3.4 Current Use of Property

The Site, as further described below, is currently used for commercial and residential purposes.

Property ID	Number	Street	Tax ID No.	Current Owner	Current Use
Property 1	1609	Elmwood Avenue	89.21-3-21	Voelker Edward W Trust	CVS Pharmacy
Property 2	680	Amherst Street	89.21-7-8	Am-Elm Realty, Inc.	Bowling Alley
	1624	Elmwood Avenue	89.21-7-7	Mark E Voelker	Vacant land/ parking lot
	1628	Elmwood Avenue	89.21-7-6.2	Labrador Building Systems, Inc.	NAS Sign Company
	1634	Elmwood Avenue	89.21-7-6.1	Labrador Building Systems, Inc.	Vacant Residential
	155	Marion Street	89.21-7-5	Labrador Building Systems, Inc.	Auto Repair
	670	Amherst Street	89.21-7-9	Labrador Building Systems, Inc.	Vacant land/ parking lot
	668	Amherst Street	89.21-7-10	Labrador Building Systems, Inc./ Voelker Bowling Inc.	Vacant residential
Property 3	141	Marion Street	89.21-7-4	Labrador Building Systems, Inc.	Commercial Storage
	111	Marion Street	89.21-7-1.1	Mark E Voelker	Storage
	666	Amherst Street	89.21-7-11	Labrador Building Systems, Inc.	Vacant residential

3.5 Description of Structures and Other Improvements

On-Site Building and Improvements Summary	
PROPERTY 1	
Building Number	Building 1
Square Footage (approximate)	9,740 (per municipal information)
Building Identification/Use	CVS Pharmacy
No. of Stories	1
Basement	None
Roof Type	Flat
Building Envelope	Poured concrete, concrete block, Steel and wood
Building Siding	Brick, painted concrete block
Heating System	Roof mounted forced air
Building Construction Date	1942 (per municipal information)

Utilities Provided	Natural-gas, public water, municipal sanitary sewer and electric
PROPERTY 2	
Building Number	Building 2
Square Footage (approximate)	29,844 (per municipal information)
Building Identification/Use	Bowling Alley/ Apartments
No. of Stories	2
Basement	Partial
Roof Type	Flat
Building Envelope	Poured concrete, concrete block, stone, Steel and wood
Building Siding	Brick, painted concrete block
Heating System	Natural gas fired boiler, former fuel oil
Building Construction Date	1892 (per municipal information)
Utilities Provided	Natural-gas, public water, municipal sanitary sewer and electric
Building Number	Building 3
Square Footage (approximate)	7,040 (per municipal information)
Building Identification/Use	Sign manufacturing
No. of Stories	1
Basement	None
Roof Type	Flat
Building Envelope	Poured concrete, concrete block, Steel and wood
Building Siding	Brick, painted concrete block
Heating System	Natural gas/ electric radiant heaters
Building Construction Date	1940 (per municipal information)
Utilities Provided	Natural-gas, public water, municipal sanitary sewer and electric
Building Number	Building 4
Square Footage (approximate)	2,719 (per municipal information)
Building Identification/Use	Vacant Residential
No. of Stories	2
Basement	None
Roof Type	Peaked
Building Envelope	Poured concrete, concrete block, Steel and wood
Building Siding	vinyl
Heating System	Natural gas forced air
Building Construction Date	1935 (per municipal information)
Utilities Provided	Natural-gas, public water, municipal sanitary sewer and electric
Building Number	Building 5
Square Footage (approximate)	3360 (per municipal information)
Building Identification/Use	Auto Repair
No. of Stories	1
Basement	None
Roof Type	Flat
Building Envelope	Poured concrete, concrete block, Steel and wood
Building Siding	Brick, painted concrete block
Heating System	Natural gas/ electric forced air
Building Construction Date	1955(per municipal information)
Utilities Provided	Access to Natural-gas, public water, municipal sanitary sewer and electric
Building Number	Building 6
Square Footage (approximate)	2,944 (per municipal information)

Building Identification/Use	Vacant commercial/ residential
No. of Stories	2
Basement	Full
Roof Type	Peaked
Building Envelope	Poured concrete, concrete block, Steel and wood
Building Siding	Vinyl
Heating System	Natural gas forced air
Building Construction Date	1925(per municipal information)
Utilities Provided	Natural-gas, public water, municipal sanitary sewer and electric
PROPERTY 3	
Building Number	Building 7
Square Footage (approximate)	2,380 (per municipal information)
Building Identification/Use	Storage
No. of Stories	2
Basement	Full
Roof Type	Peaked
Building Envelope	Poured concrete, concrete block, Steel and wood
Building Siding	wood
Heating System	None
Building Construction Date	1920 (per municipal information)
Utilities Provided	Access to Natural-gas, public water, municipal sanitary sewer and electric
Building Number	Building 8
Square Footage (approximate)	14,388 (per municipal information)
Building Identification/Use	Commercial Storage
No. of Stories	2
Basement	Full
Roof Type	Flat
Building Envelope	Poured concrete, concrete block, Steel and wood
Building Siding	Brick, painted concrete block
Heating System	None, former fuel oil heat
Building Construction Date	1929 (per municipal information)
Utilities Provided	Access to Natural-gas, public water, municipal sanitary sewer and electric
Building Number	Building 9
Square Footage (approximate)	2,288 (per municipal information)
Building Identification/Use	Vacant residential
No. of Stories	2
Basement	Full
Roof Type	Peaked
Building Envelope	Poured concrete, concrete block, Steel and wood
Building Siding	Vinyl
Heating System	Natural gas forced air
Building Construction Date	1910 (per municipal information)
Utilities Provided	Natural-gas, public water, municipal sanitary sewer and electric

3.6 Adjoining Property Information

The adjacent properties were visually inspected from the Site at the time of the Site reconnaissance. The surrounding property uses include the following:

Direction	Current Use	Apparent Past Use	Comments/Concerns
North	Residential	Residential/ commercial	Adjacent operations such as gasoline stations could result in impacts to the environment; however, none of the regulatory listings suggest a specific environmental concern at the Site.
South:	Gasoline station, residential, commercial	Residential/ commercial	
East:	Residential/ commercial tattoo shop	Residential/ commercial	
West:	Vacant land, residential	Railroad	

4.0 USER PROVIDED INFORMATION

The User Questionnaire was not provided to TurnKey for this project.

5.0 RECORDS REVIEW

5.1 Standard Environmental Records Sources

Federal and state environmental regulatory information provided by Environmental EDR was reviewed at the radii defined in 40 CFR 312.26 (see Appendix A). Any sites unplottable by EDR were also reviewed, to the extent practical based on the site name and address, to assess whether they are also present within their appropriate radii. Any relevant listings such as those for the Site or any adjacent sites are included in the following table. Refer to Appendix A for complete acronym definitions.

Site Listings

Site Database Listings	Address/Name	Summary
PA Manifest, RCRA-LQG, NY Manifest, FINDS, ECHO	1625 Elmwood Avenue/CVS # 00609	Property 1 is listed as a RCRA large quantity generator under EPA ID: NYR000192146 and FINDS registry ID: 110045417642 with no violations found.
EDR Historic Cleaner	1611 Elmwood Avenue/ Thorough Cleaners	Property 1 was listed as a clothes presser and cleaner/ cleaner and dyer from at least 1935 through at least 1955. The occupant was identified as Thorough Dry Cleaners.
EDR Historic Auto	1630 Elmwood Ave/ Lawrence J Carburetor Co Auto Repair	Property 2 was identified as a automotive repair facility from 1930 through at least 1964.
EDR Historic Cleaner	1630 Elmwood Avenue/ Wash M White Laundromat	Property 2 was identified as a self-serve laundry facility from at 1964 through at least 1975. The occupant was identified as White Wash Laundromat.
NY UST, NY Spills	686 Amherst Street/ Voelker's Bowling Center	Property 2 is listed under PBS Id: 9-600762 with one UST listed: Tank number 1- a 5,000-gallon #2 fuel oil UST closed/ removed from the Site on May 22, 2003. Spill No. 0375107 took place on May 28, 2003 and involved contamination discovered while removing the 5,000-gallon fuel oil UST identified above. Over 100 tons of contaminated soil were removed and disposed of off-Site. The spill was listed as "closed" by the NYSDEC on July 29, 2003. Additional information relative to this spill incident is provided in Section 5.4.8.

EDR Historic Auto	155 Marion Street/ Phils Auto Service repair and service	Property 2 was listed as an automotive repair shop from 2004 through at least 2014 under Phil's Auto Service.

Adjacent Property Listings

Adjacent Database Listings	Address/Name	Summary
NY Spills	Amherst and Elmwood/ Old Sunoco station	Spill No. 8905408 took place on September 1, 1989 and involved a complaint of oil dumping. Upon investigation no spill was found and the spill was listed as "closed" by the NYSDEC on September 6, 1989.
NY Spills	Elmwood and Amherst/ National Fuel Gas	Spill No. 8810090 too k place on March 27, 1989 and involved oily residue encountered while excavating for a natural-gas line. The spill was addressed and listed as "closed" by the NYSDEC on November 23, 1990.
EDR Historic Auto	19 Elmhurst Place/ Norm Manhardt Jr Collision	This adjacent property is listed as an automotive repair shop from 1960 through at least 1998.
NY LTanks, NY UST, NY Spills, EDR Historic Auto, RCRA Non-Gen, ICIS, FINDS, ECHO, NY Manifest	1602 Elmwood Avenue/ Joe's Service Center	This adjacent property was listed as a gasoline and oil service station from at least 1925 through at least 2012 and is currently and active PBS facility under id: 9-079677 with three active USTs and three closed/removed USTs. This property has multiple "closed" spill incidents. This property is also listed under EPA Id: NYD986908754
NY Spills	1602 Elmwood/ Sunoco Station	Spill No. 1807314 took place on September 21, 2018 and involved an overfill on a vehicle and is listed as "Inactive" by the NYSDEC on October 31, 2018.
EDR Historic Auto	1601 Elmwood Avenue/ Dicks NYE Park Service Gas Station	This adjacent property is listed as a gasoline and oil service station from 1935 through at least 1960.
EDR Historic Cleaner	646 Amherst Street/ Mc Manus Rug Cleaning Company	This adjacent property was listed as a EDR historic cleaner as a Carpet and upholstery cleaner from 1976 through at least 1980.
EDR Historic Cleaner	1595 Elmwood/ Castle Cleaners Inc.	This adjacent property was listed as an EDR historic cleaner as a cleaner and dyer from 1964 through at least 1970.

Nearby Properties

Additional regulatory listings were identified for nearby properties. Brief summaries of the relevant listings are provided in the table below.

Nearby Database Listings	Address/Name	Summary
NY Spills, Inst Control, VCP	601 Amherst Street/ Morrison Industries	This nearby VCP Site is classified as complete by the NYSDEC.
Manifest, FINDS, Brownfields, RCRA Non-gen	255 Great Arrow Ave/ Great Arrow Industrial Park	This nearby Brownfield Site number: C915220 is classified as "No further action" by the NYSDEC.
Brownfields	1695, 1721, 1723 Elmwood Avenue/ Pierce Arrow	This nearby brownfield site number C915308 is listed as "Active" by the NYSDEC.
NY Spills and LTANKS	Several properties	The remaining spill incidents identified within the search radii for nearby properties are classified as "inactive" or "closed" by the NYSDEC.
Numerous Database Listings	Various properties	The numerous remaining regulatory listings were reviewed by TurnKey and none of the information suggested a specific environmental concern at the Site; see below for additional information.

In addition to the nearby properties listed above, several additional sites located proximate to the Site are listed on one or more environmental databases. However based on TurnKey's review, each of these additional sites falls in one or more of the following categories:

- It is listed on databases that indicate a potential for, but not an actual documented current or historical release (e.g., RCRA small quantity generator or large quantity generator; registered chemical bulk storage or petroleum bulk storage sites). As such, these sites are not considered to pose a REC at the Site due to absence of a documented release.
- It is located greater than one-eighth mile from the Site, and is not considered a REC based on the distance from the Site.
- It is present at a location that is not expected to pose potential for impact on the Site due to topography and likely groundwater flow direction, and is not considered a REC based on unlikelihood for impacts associated with migration of contaminants onto the Site.

The discussion included above regarding adjacent and surrounding properties is based on information supplied to TurnKey as well as observations of nearby properties at the time of the Site reconnaissance. Further study would be required to positively confirm whether the Site has been impacted by nearby properties. It is also important to note that the environmental history and status of nearby properties, real or perceived, can affect the valuation of the target property.

5.2 Additional Environmental Record Sources

To augment the information provided by EDR, a FOIA request was forwarded to the NYSDEC on May 1, 2019 for information concerning the Site (see Appendix B). All responses have yet to be received from the NYSDEC. Should the NYSDEC provide additional information for the Site which identifies a currently unknown REC, an addendum to this report will be issued.

TurnKey also completed a search on the NYSDEC website of readily available records for the Site, including an Environmental Site Database Search for spills, remedial sites and bulk storage facilities. A search of the USEPA Envirofacts website was also completed. The information obtained from the on-line research and the NYSDEC FOIA response appeared generally consistent with the Site regulatory listings summarized above.

5.3 Physical Setting Sources

Figure 1 shows the Site on an undated USGS Topographic Map, Buffalo Quadrangle. The Site is located in a highly developed residential and commercial area. Due to extensive development in the area of the Site, individual structures are not shown on the map. The Site is located approximately 600 feet above mean sea level.

Groundwater flow is likely to the south toward the Scjacquada creek or consistent with topography in the area of the Site. Local groundwater flow, however, may be influenced by subsurface features, such as excavations, utilities, and localized fill-conditions.

5.4 Historical Use

The historical use of the Site has been researched through review of previous studies, historic Sanborn maps, historic aerial photographs, municipal records, historic topographic maps, and/or other reasonably obtainable documents. The following sections summarize TurnKey's research.

5.4.1 Historic Aerial Photographs

Historical aerial photographs serve to reveal former topography, buildings, structures and man-made works such as canals, lagoons and railroads that may have been altered or may no longer be in existence. Historical aerial photographs were obtained online through

http://historicaerials.com/ for additional historical information relative to the Site and surrounding area. It should be noted that visual observations were limited on some aerial photographs due to poor quality.

YEAR	OBSERVATIONS
1959, 1963, 1966	
Site	Property 1 – The Site appears to be developed with the existing building. Property 2 – The Site appears to be developed with the existing buildings. Property 3 – The Site appears to be developed with the existing buildings. A portion of the adjacent railroad appears to bisect the Site.
North	Residential/ commercial
South	Residential/ commercial
East	Residential/ commercial
West	Railroad
1995, 2002, 2005, 2006, 2008, 2009, 2011, 2013	
Site	Property 1 – The Site appears to be developed with the existing building. Property 2 – The Site appears to be developed with the existing buildings. Property 3 – The Site appears to be developed with the existing buildings.
North	Residential/ commercial
South	Residential/ commercial
East	Residential/ commercial
West	Former railroad

5.4.2 Historical Sanborn Maps

Sanborn maps serve to reveal former buildings, building uses, and man-made works such as canals, lagoons and railroads that may have been altered or may no longer be in existence. Historic addresses identified for the Site were identified as 1609, 1611, 1620-1634 Elmwood, 666-706 Amherst and 139-155 Marion. The following table summarizes the maps. Appendix C includes copies of the Sanborn Maps provided by EDR.

YEAR	OBSERVATIONS
1916	
Site	Property 1 – This property appears to be developed with two former structures consisting of a private garage and a commercial building with storefronts and a drug store. Property 2 – This property is developed with 9 former buildings including seven commercial buildings (saloons and storefronts) and at least one residence.

	Property 3 – The majority of the property appears to be vacant land. A former residential building is located on the southern portion of the property.
North	Junkyard, Residential
South	Residential
East	Residential
West	Railroad
1935	
Site	Property 1 – developed with two former commercial buildings used as storefronts and a hotel. In addition, two private garages appear on-Site. Properties 2 and 3 appear generally consistent with above.
North	Junkyard, saloon, residential
South	Gasoline filling station with five gasoline tanks, residential
East	Residential
West	Railroad tracks
1950	
Site	Property 1 – This property appears to be developed with two former structures consisting of a private garage and commercial buildings (restaurants and storefronts). Property 2 – This property is developed with 10 buildings including a bowling alley, restaurant, automotive repair operation, and a private garage. In addition, a portion of a railroad spur is located on the western portion of the Site. Property 3 – This property appears to be occupied by J.Q Clark Coal Company with three coal silos and a railroad spur bisecting the property. The H.J Heinz Warehouse is located on the northeastern portion of the property, and a residence on the southern portion of the property.
North	Residential
South	Filling station, Residential
East	Residential
West	Railroad
1981	
Site	Property 1 – No coverage, likely similar to 1986 (see below). Property 2 – This property is developed with 5 buildings in their existing locations including a bowling alley, a machine shop, a private garage, and a commercial building on the southern portion of the property. Property 3 – This property appears to be developed with the existing buildings and is utilized for parking on the northwestern portion of the property along with a small commercial structure with an office. A wholesale drug warehouse is located on the

	northeastern portion of the property and a residence is located along the southern portion of the property.
North	Pipe supply warehouse, residential
South	Filling station, residential
East	No coverage
West	Railroad
1986	
Site	Property 1 – Appears to be developed with the existing building. Property 2 – This property is developed with 5 buildings in their existing locations including a bowling alley, a machine shop, a transportation building, a private garage, and a commercial building on the southern portion of the property. Property 3 – Appears generally consistent with 1981.
North	Pipe supply warehouse, hotel, residential
South	Filling station, residential, commercial
East	Residential/ commercial
West	Railroad

5.4.3 Historical City Directories

Historic city directories, dated between 1925 and 2014, were reviewed (generally in five-year intervals) through an EDR database search for additional information regarding the Site. Operations of potential environmental concern are shown in bold in the table below. Appendix D includes a copy of the abstract report.

Year	Listing(s)
1925	**Property 1 –** Residential **Property 2 –** Residential, Blazewski Jos soft drinks **Property 3 –** Residential
1930	**Property 1 –** Derr Chas W drugs, Rodwick Ada Rest **Property 2 –** Kaczmarek Thaddeus restr, Blazewski Jos soft drinks, Residential, **Dooley Eug F auto repair** **Property 3 – 111 31 Clarke J Q Coal Co Inc**, 141 47 Heinz H J Co food, residential
1935	**Property 1 –** Donovan Edw W drugs, **Thorough Dry Cleaners,** Elmhurst Diner **Property 2 –** Vacant store, Cyckiwicz Felix fruits **Property 3 – Clarke J Q Coal Co Inc,** Heinz H J Co food products
1940	**Property 1 –** Donovan Edw W drugs, **Thorough Dry Cleaners,** Elmhurst Diner

	Property 2 – Refrigeration Service Co, Residential, Feliz Sykes Fruits, Heller Fred beer garden, **John Fliss Garage** **Property 3 – Clarke J Q Coal Co Inc,** Heinz H J Co food products, residential
1946	**Property 1 –** Caswell Wesley E restr, Rettke Harry W Rest. **Property 2 –** Vacant store, Residential, Napora Thaddeus W heating contr, Voelkers Bowling Alleys, **Vallone Jos R Auto Repair** **Property 3 – Clarke J Q Coal Co Inc,** Heinz H J Co food products, **Bear ridge coal Co**
1950	**Property 1 –** Lozinsky Kath restr, **Thorough Cleaners,** Rettke Harry W Rest. **Property 2 – Yanik Bros Trucking Co, Master Craft Wood Awning Co,** Napora Thaddeus W heating contr, Naporas Restr, Residential, Voelkers Bowling Alleys, **Vallone Jos R Auto Repair** **Property 3 – Clarke J Q Coal Co Inc,** Heinz H J Co food products
1955	**Property 1 – Thorough Cleaners,** Rettke Harry W Rest. **Property 2 – Yanik Bros Trucking Co,** Sams Barber Shop, Napora Thaddeus W heating contr, Residential, Voelkers Bowling Alleys, Frawley Earl T rest, **Joes auto painting & collision service, Lawrence J C Carburator co auto repair** **Property 3 – Clarke J Q Coal Co,** Heinz H J Co food products
1960	**Property 1 –** Loblaw inc. gro **Property 2 – Yanik Bros Trucking Co, Michaels Dental Lab,** Sams Barber Shop, Voelkers Bowling Alley, Voelkers Bar restr, **Panel troll inc electrical equipment** **Property 3 – Stickney D J Co coal, Clark J Q Coal Co,** Allied Home Owners Assn of Western NY Inc, Lloyd Whol Druggists Inc
1964	**Property 1 –** Loblaw inc. gro **Property 2 – Yanik Bros Trucking Co, Michaels Dental Lab,** Sams Barber Shop, **No Tarp Roofing Co Inc,** Voelkers Bowling Alleys, Voelkers Bar restr, **Joes auto repair, Marion precision MFG corp tool manufacturers** **Property 3 –** Stickney DJ Co htg contrs, Home Owners Assn of Western N Y Inc, Lloyds Whol Druggists Inc
1970	**Property 1 –** TOPS Am Wood Gro **Property 2 – Yanik Bros Trucking Co., Michaels Dental Laboratory,** Johns Elmwood Avenue Barber Shop, Voelkers Bowling Alleys, Voelkers Bar restr, **Wash M White Laundromat** **Property 3 – Walted Inc. Building Supply,** Lloyds Wholesale Druggist, Inc.
1975	**Property 1 –** Elmwood clothing factory outlet

	Property 2 – Yanik Bros Trucking Co, Michaels Dental Laboratory, Gordons Driving School, Voelkers Bowling Alleys, Voelkers Bar restr, Angies restaurant, **Wash M White Laundromat, M & K Industries machine shop** **Property 3 –** Lloyds Wholesale Druggists Inc.
1980	**Property 1 –** Spectrum Night club **Property 2 – Yanik Bros Trucking Co, M & K Industries Addn Space, Calvert Distillers Whse** Voelkers Lanes, Voelkers Bar restr, **M & K Industries machine shop** **Property 3 – Walted Corp bld sup,** Lloyds Wholesale Druggists Inc
1985	**Property 1 –** CVS Pharmacy **Property 2 – Yanik Bros Trucking Co, Iseman Enterprises research,** Voelkers Lanes Bowling alley, Voelkers Bar restr, M & K Industries roller skate sales and service **Property 3 –** Waited Corp bid sup 873 12 Z**,** Lloyds Wholesale Druggists Inc
1992	**Property 1 –** CVS Pharmacy **Property 2 – Yanik Brothers Trucking Co, Iseman Enterprises research & dev, Studio 601 Inc clo mfg,** Voelkers Bowling Center bowling alley, Voelkers Bar restr, **M & K Industries machine shop** **Property 3 –** Lloyds Wholesale Druggists Inc
1998	**Property 1 –** CVS Pharmacy **Property 2 – Neon Art Signs by Strada, NAS Quick Sign, Printers Express,** Voelkers Bowling Center **Property 3 –** Walted Contracting Corp**.,** Ark Wholesale nondurable gds,
2008	**Property 1 –** CVS Pharmacy **Property 2 – Phils Auto Service (auto rpr & serv), Maleks Collision (auto body rpr),** Strada business serv, Paul Strada Ice Sculpture, **NAS Quick Signs,** Voelkers Bowling Center **Property 3 –** No Listing
2010	**Property 1 –** CVS Pharmacy, Inc **Property 2 – Phil's Auto Service, Maleks Collision Inc., NAS Quick Sign, Inc.,** Ice Sculptures by Paul Strada, Voelkers Bowling Inc. **Property 3 –** Residential
2014	**Property 1 –** CVS Pharmacy, Inc **Property 2 – Phil's Auto Service, Maleks Collision Inc., NAS Quick Sign Inc.,** Ice Sculptures by Paul Strada, Voelkers Bowling Inc. **Property 3 –** Residential

5.4.4 Historical Topographic Maps

Due to the nature of the Site and other historical sources reviewed, topographic maps were not reviewed for the Site.

5.4.5 Municipal Records

Records readily available at the City of Buffalo municipal offices (Assessor, Building and Fire Departments) as well as records available online from the Erie County GIS were reviewed for additional information relative to the Site. TurnKey also researched historic addresses identified for the Site through review of Sanborn maps. Note that a FOIL was submitted to the City of Buffalo as required to access their records. The following summarizes municipal records provided to TurnKey at the time of this assessment; copies of the pertinent records are included in Appendix E.

- The Site, Tax ID Nos. 89.21-3-21, 89.21-7-8, 89.21-7-7, 89.21-7-6.2, 89.21-7-6.1, 89.21-7-5, 89.21-7-4, 89.21-7-1.1, 89.21-7-9, 89.21-7-10, and 89.21-7-11., measures approximately 3.79-acres and is currently owned by Voelker Edward W Trust, Am-Elm Realty, Inc., Voelker Bowling Inc., Labrador Building Systems, Inc., and Mark E Voelker.
- Past owners were identified as M&K Industries, J.Q Clark Coal Company, Gulf Oil Corp, Yanik Bros, Voelkers Bowling Alley.
- The Site is supplied with and has access to natural-gas, municipal sanitary sewer, public water and electric.
- See section 3.5 for building information.

The following records associated with possible environmental concerns appear to involve the Site:

- Property 1:
    - 1913 – 1609 Elmwood- 1 steel frame auto barn
- Property 2:
    - 1945 – 155 Marion- Construct concrete block building for truck garage.
    - 1946 – 155 Marion- Place & Use 1-1,000-gallon steel tank for gasoline storage-private.
    - 1955 – 155 Marion- 1,000-gallon underground storage tank installed.

- 1955– 680 Amherst- Alter rear mason bowling alleys, erect incinerator.

- Property 3:
  - 1925 – 111-117 Marion- 2 story frame coal office.
  - 1928 – 111 Marion- Frame coal storage.
  - 1929 – 111-139 Marion- 500-gallon gasoline tank.
  - 1937- 141 Marion- Place steel gasoline tank 550-gallons.
  - 1950- 116-130 Marion- Use lot for storage of coal.
  - 1954- 141 Marion- Place, use 1-2,000 gal steel tank for gasoline storage.
  - 1965 – 111 Marion Street- remove 1 1,000-gallon UST – a map identifies the tank as being located south of the one story shed located at 111 Marion Street.
  - 1967 – Demolish to grade 3 1-story coal storage tanks/silos.

The Buffalo Building Inspector would not provide TurnKey with an interview relative to the Site.

5.4.6 Site History Provided by Site Contact

According to the site contact (Matt Bert), the Site is currently and has historically been used for commercial and residential purposes. The Site contact also indicated that all floor drains discharge to the municipal sewer.

Section 7.1 includes additional information provided by the Site contact.

5.4.7 Abstract of Title

Abstract of Title information was not provided to TurnKey.

5.4.8 Previous Assessments

The following document related to Spill No. 0375107 was provided to TurnKey. "Tank Closure Report, Voelker's Bowling Center, 686 Amherst Street, Buffalo, NY, Spill No. 0375107," completed by LCS, for Voelker's Bowling Center, dated July 2003. This report pertains to removal of one 5,000-gallon No. 2 fuel oil UST and petroleum-impacted soil from Property 2. The tank was noted by LCS to be in poor condition at the time of its removal.

Approximately 120 tons of petroleum-impacted soil were removed and disposed of off-site at the Town of Tonawanda Landfill. VOCs and SVOCs in confirmatory soil samples collected from the sidewalls (four) and bottom (one) were either not detected at concentrations above laboratory detection limits or concentrations were below NYSDEC guidance values.

The NYSDEC issued a letter to LCS on August 20, 2003 indicating that based on the analytical results for the excavation samples, Spill No. 0375107 was reclassified as "closed" with no further work required.

The Tank Closure Report and NYSDEC spill reclassification letter are provided in Appendix F.

5.4.9 Summary of Historic Uses

Approximate Years	Reported or Suspected Use	Owner/Occupant
1916 to current	The Site has a history of mixed uses for residential, commercial and industrial purposes. Areas of environmental concern are shown on Figure 3.	Past owners/occupants include: Property 1 – Thorough Dry Cleaners Property 2 – John Fliss Garage, Joesph Vallone auto repair, Yanik Bros Trucking, Joes Auto painting and collision, Michaels Dental Lab, M & K Precision Manufacturing, Wash & White Laundromat, Phils Auto Service Property 3 – JQ Clark Coal Company, Bear Ridge Coal Co., D J Stickney Coal Co Current Owners/ occupants: Property 1 – CVS Pharmacy, 1826 Elmwood, LLC Property 2 – Voelkers Bowling Center, NAS Sign Company, Maleks Collision, Labrador Building Systems, Inc. Property 3 – Mark E Voelker, Labrador Building Systems

5.5 Environmental Liens

TurnKey is not aware of any formal environmental liens, enforcement action, civil, judicial or administrative enforcement cases in connection with the Site.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A visual review of the Site was completed to document Site conditions and identify potential RECs. The presence of parked vehicles, stored materials/equipment, and dense vegetation hindered observations of ground surfaces at the time of the Site reconnaissance.

6.2 General Site Setting

Mr. Nick Suraci of TurnKey performed the Site reconnaissance on April 29, 2019. TurnKey was accompanied by Matt Bert of Voelker Bowling reportedly associated with the Site for approximately 20 years.

Appendix G includes photographs taken during the Site reconnaissance.

6.3 Site Visit Findings

6.3.1 Current On-Site Operations

Nine structures are present on the Site Building 1 is occupied by CVS, a Pharmacy, Building 2 is occupied by Voelker Bowling a bowling alley, Building 3 is occupied by NAS Sign Company a Sign manufacturing company, Building 4 is a vacant residence, Building 5 is an automotive repair facility, Building 6 is a vacant mixed use building, Building 7 is a commercial building used for storage, Building 8 is a warehouse used for commercial storage of theatre supplies, and Building 9 is a vacant residential building. Each building is identified on Figure 2.

6.3.2 Storage Tanks

Property 1 – None observed.

Property 2 – Two fuel oil ASTs were noted within the basement of Building 2. Black staining was noted to the concrete floor adjacent to the ASTs. The concrete floor was observed by TurnKey to be cracked. In addition, a floor drain was noted proximate to the staining.

Property 3 – Two fuel oil ASTs were noted within the basement of Building 8. The presence of miscellaneous debris proximate to the ASTs hindered observations of ground surfaces proximate to the tanks. Two suspect vent pipes and two suspect fill pipes were noted protruding from east wall of Building 8; TurnKey suspects that these vent/fill pipes are associated with the basement ASTs.

Two suspect fill ports and two proximate suspect vent pipes apparently associated with two existing USTs were noted east of Building 8. Such are presumed by TurnKey to be fuel oil USTs.

6.3.3 Hazardous or Regulated Materials

General cleaning/maintenance materials are stored and utilized on-Site. No concerns (staining, odors, etc.) were noted proximate to these materials at the time of the site visit.

Automotive-related fluids including oils, paint, and antifreeze were noted in Building 5 in containers of five-gallons or less.

Multiple containers of paint were noted within Building 3 in containers of five-gallons or less.

General maintenance and gardening materials were noted in containers of five-gallons or less.

6.3.4 Solid, Hazardous or Regulated Wastes

Hazardous/regulated wastes are generated in connection with automotive repair operations at Building 5. According to the property owner, wastes generated on-site include oils. The property owner indicated that the wastes are transported off-site by a local company.

One unlabeled 55-gallon container was observed within Building 5; the container is reported by the site contact to contain waste oil.

Solid waste generated from residential and commercial uses are stored in bins that are collected by the City of Buffalo and Waste Management.

6.3.5 Miscellaneous Debris/Stored Materials

Large amounts of debris and stored materials were noted within Buildings 2, 3, 5, 6, 7, and 8. Specifically, electronic and household debris on the second floor of Building 2, stored

materials in Building 3, automotive debris including tires and automotive parts in Building 5, household debris in Building 6, miscellaneous debris in building 7, and stored materials and miscellaneous debris in Building 8.

6.3.6 Fill

TurnKey observed evidence of fill materials in the area of railroad tracks on-Site at the time of the Site reconnaissance. In addition, the current tenant of Building 7 indicated that this area of the Site contains coal fill materials from former coal storage. TurnKey is also aware of former buildings at the Site, including former coal silos, thus it is possible that fill materials from unknown origins were brought to the Site.

6.3.7 Suspected Former Building Foundation

Round concrete on the northwestern portion of the Site is believed by TurnKey to be associated with a former structure foundation. According to the current tenant of Building 7 these round concrete foundations are from former coal silos. No concerns (staining, odors, etc.) were noted proximate to the suspected former structure foundation.

6.3.8 Staining/Spillage and Pools of Liquid

Black staining/spillage believed by TurnKey to be waste oil was noted to the concrete ground surface proximate to a floor drain within Building 5.

Additional staining was observed on concrete floor surfaces within Building 2 proximate to ASTs within the basement. Some of the staining was noted proximate to cracks in the concrete floor.

6.3.9 Stressed and/or Dead Vegetation

None observed.

6.3.10 Odors

A petroleum odor was noted within the basement of Building 2 proximate to the fuel oil ASTs. Musty odors were noted within buildings 2, 4, and 7.

6.3.11 Unidentified Substance Containers

None observed.

6.3.12 Heating/Cooling

Natural-gas fired forced air heating/cooling systems are currently used on-Site. However, TurnKey is aware of former fuel oil heat being used on Buildings 2, 5, and 8.

6.3.13 Wastewaters

The Site is currently connected to the municipal sanitary sewer system.

6.3.14 Potable Water Supply/Wells

The Site is serviced by the municipal water supply.

6.3.15 Drains and Sumps

A floor drain was noted in the northern repair area and within the painting room of Building 5. The current property owner indicated that the floor drains discharge into the public sewer system.

Storm drains were observed in parking lot areas are also believed by TurnKey to discharge into the storm sewer system.

6.3.16 Air Emissions

Ansul hood systems were noted in kitchen areas. No other process exhaust systems were noted on-Site at the time of the site inspection.

6.3.17 Pits, Ponds and Lagoons

A Concrete pit was noted within building 5. No concerns (staining, odors, etc.) were noted within the concrete pit.

6.3.18 Septic System

None observed.

6.3.19 PCBs

Utility-owned pole-mounted transformers, were noted along property borders. A stepdown transformer was noted along in the basement of Building 2. No concerns (staining, odors, etc.) were noted proximate to the transformers at the time of the Site visit.

6.3.20 Previous Intrusive Work

No evidence of previous intrusive work was observed at the time of the Site reconnaissance. However, TurnKey is aware of at least one UST having been closed/removed from the Site.

6.3.21 Adjacent Property Use

Adjacent properties are currently utilized for residential/commercial purposes, including gasoline station and automotive repair operations. No concerns (staining, odors, obvious spills, etc.) were noted on-Site in connection with current adjacent operations.

6.4 Summary of Site Reconnaissance Potential Concerns

The following potential environmental concerns were identified at the time of the Site reconnaissance:

Property 1

- No significant environmental concerns were noted in connection with Property 1 during the site visit; however, TurnKey is aware of the historic use of Property 1 as a dry cleaner.

Property 2

- Building 5 is currently used as an automotive repair operation with associated storage and use of hazardous/regulated materials.
- Automotive-related fluids including oils, paint, and antifreeze were noted in Building 5 in containers of five-gallons or less.
- Hazardous/regulated wastes are generated in connection with automotive repair operations at Building 5. According to the property owner, wastes generated on-site include oils. The property owner indicated that the wastes are transported off-site by a local company. One unlabeled 55-gallon container was observed within Building 5; the container is reported by the site contact to contain waste oil.

- A floor drain was noted in the northern repair area and within the painting room of Building 5. The current property owner indicated that the floor drains discharge into the public sewer system.
- Black staining/spillage believed by TurnKey to be waste oil was noted to the concrete ground surface proximate to a floor drain within Building 5.
- Additional staining was observed on concrete floor surfaces within Building 2 proximate to two ASTs within the basement. Some of the staining was noted proximate to cracks in the concrete floor. In addition, a floor drain was noted proximate to the staining.
- A petroleum odor was noted within the basement of Building 2 proximate to the fuel oil ASTs. Musty odors were noted within Buildings 2 and 4.
- An unknown concrete pit was noted within Building 5. No concerns (staining, odors, etc.) were noted within the concrete pit.

Property 3

- Two suspect fill ports and two proximate suspect vent pipes apparently associated with two existing USTs were noted east of Building 8.
- Two fuel oil ASTs were noted within the basement of Building 8. The presence of miscellaneous debris proximate to the ASTs hindered observations of ground surfaces proximate to the tanks. Two suspect vent pipes and two suspect fill pipes were noted protruding from east wall of Building 8; TurnKey suspects that these vent/fill pipes are associated with the basement ASTs.
- TurnKey observed evidence of fill materials in the area of railroad tracks on-Site at the time of the Site reconnaissance. In addition, the current tenant of Building 7 indicated that this area of the Site contains coal fill materials from former coal storage. TurnKey is also aware of former buildings at the Site, including former coal silos; round concrete areas on the northwestern portion of the Site are believed by TurnKey to be associated with the former coal silos.
- Musty odors were noted in Building 7.

General Site Conditions

- Large amounts of debris and stored materials were noted within Buildings 2, 3, 5, 6, 7, and 8. Specifically, electronic and household debris on the second floor of Building 2, stored materials in Building 3, automotive debris including tires and automotive parts in Building 5, household debris in Building 6, miscellaneous debris in Building 7, and stored materials and miscellaneous debris in Building 8.

- Adjacent properties are currently utilized for residential/commercial purposes, including gasoline station and automotive repair operations. No concerns (staining, odors, obvious spills, etc.) were noted on-Site in connection with current adjacent operations.

7.0 INTERVIEWS

7.1 Site Owner

TurnKey's Environmental Questionnaire was not completed by the current property owner. The lack of a questionnaire is considered a data gap.

7.2 Municipal Interview

As indicated above, the City of Buffalo Building Inspectors would not provide interviews relative to the Site.

7.3 Former Site Owner/Operator

Former owners/operators were not interviewed as part of this assessment.

8.0 OTHER ENVIRONMENTAL CONSIDERATIONS

Other environmental considerations are discussed below. Such include non-scope considerations, described under ASTM E1527-13 as ancillary conditions that are typically outside the standard Phase I scope of practice. Non-scope considerations, such as asbestos, lead, radon, wetlands and mold, are not considered RECs under ASTM E1527-13, but may represent health or environmental issues impacting the Site and/or property value.

8.1 Asbestos

Based on the ages of the existing buildings, the potential for asbestos exists. Suspect ACMs including, but not limited to, drywall/plaster, pipe wrap, floor tile and ceiling tile were noted at the time of the site visit. Asbestos could also be present in roofing materials. Some significantly damaged materials were noted throughout Buildings 2, 4, 6,7,8, and 9. TurnKey is aware of an asbestos survey being completed at the Site.

8.2 Lead Paint, Pipes and Soldering

Based on the age of the existing building, the potential for lead-based paint exists. Peeling/chipping paint was observed on the within Buildings 2, 4, 6, 7, 8, and 9.

Based on the age of the existing building, lead pipes and soldering may be present.

8.3 Radon

Research in the area of the Site completed by the New York State Department of Health - Bureau of Environmental Radiation Protection (Radon) suggests an average basement radon concentration of 1.14 pCi/L in the area of the Site, which is below the USEPA action level of 4.0 pCi/L. As such, radon is not anticipated to be a concern.

8.4 Wetlands and Flood Zones

The EDR regulatory database includes general information on wetlands and flood zones. No wetland or flood zone areas were identified on-site or adjacent to the Site.

8.5 Microbial Contamination (Mold)

Suspected black mold was observed on walls and ceilings within Buildings 2, 4, 6, 7, 8 and 9.

8.6 Vapor Encroachment Conditions

This assessment included review of the regulatory database discussed in Section 6.1 in relation to the ASTM E2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

If soil or groundwater is contaminated with a volatile compound such as gasoline or solvents, that contaminant can migrate through the soil pore space and end up in the air inside of buildings, especially within basement areas. Soil vapors do not necessarily migrate along groundwater flow paths; they can also move up hydraulic gradients and can extend beyond a groundwater plume. The ASTM standard named this a VEC, which is a more recent environmental concern and there have been a significant number of sites where vapor intrusion has been discovered. The state and federal environmental regulators have "reopened" numerous spill and waste sites in order to assess whether vapor encroachment is a concern.

Historic operations at the Site, especially dry cleaner/laundry operations, are considered potential VECs. Further testing would be required to assess whether a VEC exists at the Site.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/11/2019 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
BUFFALO WEAVING & BE Site ID: 0204460 EPA Id: NYD002111375	***260 CHANDLER STREET***	***NW 1/8 - 1/4 (0.156 mi.)***	***O70***	***163***
UNIVERSAL PRECISION Site ID: 0206421 EPA Id: NYC200400570	215 CHANDLER STREET	NW 1/8 - 1/4 (0.165 mi.)	P74	177

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/11/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4

RCRA-LQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/12/2018 has revealed that there are 5 NY SHWS sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 23 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
IROQUOIS GAS/WESTWOO	SCAJAQUADA CREEK, UP	SW 1/2 - 1 (0.843 mi.)	127	528
IROQUOIS GAS/WESTWOO	DART STREET	SW 1/2 - 1 (0.891 mi.)	128	528

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was JFO 05/29/03 JFO ON SITE NO ONE AVAILABLE. THE HOLE IS PARTIALLY BACKFILLED. K & T PUMP REMOVED THE TANK AND SAMPLED THE HOLE. THE SOIL IS STAGED ALONGSIDE THE HOLE AND COVERED WITH PLASTIC. N, S, E, W & BOTTOM SAMPLES WERE COLLECTED AND WILL BE ANALYZED FOR 8260 AND 8270 STARS. 05/30/03 JFO CALL FROM DOUG REID. THE SAMPLE RESULTS INDICATE THE HOLE IS CLEAN. THEY WILL SUBMIT THE RESULTS. THE SOIL WILL BE DISPOSED IN 2-3 WEEKS. HE WILL ALSO SUBMIT THE RECEIPTS. 07/18/03 JFO RECEIVED THE CLOSURE REPORT FROM LCS. THE SAMPLE RESULTS INDICATE A CLEAN CLOSURE. THE DISPOSAL RECEIPTS FOR 111.39 TONS OF SOIL WERE ATTACHED. NO FURTHER ACTION REQUIRED. CLOSED 08/20/03 JFO REC'D A MESSAGE FROM DOUG REID OF LCS REQUESTING A CLOSURE LETTER. LETTER SENT."
Remarks:	"WHILE REMOVING A 5,000 GALLON HEATING OIL TANK CONTAMINATION WAS DISCOVERED. APPROX. 160 TONS OF SOIL HAS BEEN REMOVED. DOUG HAS COLLECTED THE SAMPLES."

FINDS:

Registry ID: 110013301373

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "10/05/18 TDJ SPOKE WITH AMANDA WHO STATED THAT SHE WAS COVERED WITH GASOLINE AND NOTIFIED GAS STATION OWNER. HE CLOSED ISLAND AND PLACED SPEEDY DRY ON ASPHALT. AMANDA FILLED AT ANOTHER ISLAND AND WAS REEKING OF GASOLINE. ANOTHER DRIVER ASKED IF SHE WAS OK AND SHE WENT TO SPEAK WITH OWNER. HE DID NOT ASSIST NOR AGREE TO REIMBURSE ANY PART OF HER LOSS OF GASOLINE PURCHASED NOR CLEANING OF HER CLOTHING. SPILL WAS NOT CALLED INTO DEC BUT WAS OF THE AMOUNT less than 5 GALLONS. WILL SPEAK WITH STATION OWNER. 10/10/18 TDJ WENT TO LOCATION WHERE I SPOKE WITH OWNER. SUPPOSEDLY AMANDA PUT PUMP INTO VEHICLE AND STEPPED AWAY TO USE CELL PHONE. PUMP WAS SET TO PUMP A PRE-PAID AMOUNT AND AS IT HIT THE FULL MARK IT KEPT PUMPING. SHE SUPPSOEDLY STEPPED INTO THE GASOLINE AND MAY HAVE SPLASHED SOME ON CLOTHING. OWNER FOUD A PROBLEM WITH PUMP WHICH WAS FIXED. HE SUPPOSEDLY OFFERED TO HAVE HER CLOTHES CLEANED AND PAY BILL. SHE SUPPOSEDLY DID NOT AGREE TO THIS AND WENT ON TO YOGA CLASS WHERE SHE WAS DENIED DUE TO SMELL. OWNER GAVE HER THEIR ATTORNET NUMBER AFTER SHE DID NOT AGREE TO TERMS OF REPIRATIONS. SMALL SPILL WAS CLEANED TO SATISFACTION OF DEC SITE MANAGER. NO FURTHER ACTION FILE CLOSED TO ELECTRONIC ONLY"
Remarks: "Caller stated that as she began to fill vehicle with gasoline it
began spraying her from crack in line or leak in joint of faucet."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FG 05/05/97: MNP SITE INSPECTION, MET CHARLIE BURKE OF NFG AND CHESTER N., GAS STATION OWNER. NFG'S CONTRACTOR OPENED AN EXCAVATION IN FRONT OF CHESTER N'S GAS STATION, NOTED A GASOLINE ODOR IN THE SOIL & A SHEEN ON THE WATER. THE EXCAVATION ONLY TWELVE FEET FROM GASOLINE PUMP ISLAND. A 1,000 GALLON TANK FAILED A TIGHTNESS TEST SEVERAL YEARS AGO ACCORDING TO MR. N., TANK EMPTIED, BUT NOT PERMANENTLY CLOSED. ALSO, TWO OTHER TANKS REMAIN IN SERVICE, BUT OVERDUE FOR TESTING SINCE 1/95. NO OTHER GAS STATIONS IN AREA. I ASKED MR. N. TO STOP PUMPING GAS UNTIL THE TWO TANKS IN SERVICE ARE TESTED. HE REFUSED TO STOP PUMPING GAS. HE AGREED TO CONTACT A TANK TESTER & CALL ME BACK TOMORROW. I TOLD HIM DEC CAN DO THE TESTING IF HE IS UNABLE. I ALSO TOLD HIM WE MUST FIND OUT THE SOURCE OF THE CONTAMINATION REGARDLESS OF THE TANK TESTING. I COLLECTED A SOIL SAMPLE FROM THE EXCAVATION AT 2:45 PM. CHESTER & I CHECKED THE ABANDONED TANK WITH A STICK & FOUND 13 OF WATER & 1 OF GASOLINE. I SUGGESTED WE DIG UP AROUND THE ABANDONED TANK TO CHECK FOR CONTAMINATION, OTHERWISE SOME KIND OF SUBSURFACE INVESTIGATION MUST BE DONE. 09/26/97: FG TELECON WASTE STREAM WHO ASKED FOR THE PIN & SPILL NUMBER FOR THIS SITE. SHE SAID SHE HAS HAD THE ANALYTICAL DATA AVAILABLE FOR FOUR MONTHS BUT HAS NOT RELEASED IT BECAUSE SHE DID NOT HAVE THE BILLING INFORMATION. 10/02/97: MNP RECEIVED ANALYTICAL RESULTS FROM WASTE STREAM. THE SAMPLE COLLECTED FROM THE NATIONAL FUEL GAS EXCAVATION SHOWED THE PRESENCE OF GASOLINE AND ELEVATED STARS LEVELS FOR 8021. 12/09/97: MNP SENT LETTER REQUESTING THAT MR. NIEDZIALOWSKI COMPLETE THE SITE WORK OR ALLOW NYSDEC TO DO IT WAS SENT WITH A RESPONSE DUE ON 12/17/97 01/08/98: MNP TELECON FROM MR. NIEDZIALOWSKI IN RESPONSE TO THE ROE LETTER SENT TO HIM. HE SAID THAT MPH CONSTRUCTION IS INTERESTED IN PURCHASING HIS PROPERTY. HE WILL LET ME KNOW THE PROGRESS OF THE TRANSACTION WITHIN 30 DAYS. 07/08/98: FG SENT LETTER REQUESTING THAT MR. NIEDZIALOWSKI COMPLETE THE SITE WORK OR ALLOW NYSDEC TO DO IT, DUE DATE OF 7/24/98. 07/16/98: MNP TELECON FROM CHESTER N. IN RESPONSE TO THE DEC RIGHT OF ENTRY LETTER. HE SAID HE IS SELLING THE PROPERTY AND WOULD LIKE SOME ADDITIONAL TIME SO THAT HE CAN SELL THE PROPERTY. HE SAID THAT THE BUILDING AND UST'S ARE ON THE RAILROAD RIGHT OF WAY PROPERTY AND HE RECENTLY PURCHASED THE PROPERTY FROM THE RAILROAD. LAST WEEK THE RR CLEARED OFF THE PROPERTY AND REMOVED THE RAIL. HE RECENTLY, IN APRIL, HAD TO CLOSE DOWN BECAUSE OF THE CONSTRUCTION ON AMHERST. HE SAID AN ENGINEER TOOK TESTS AND SAID THE CONTAMINATION IS NOT GASOLINE BUT WOULD NOT GIVE DEC THOSE DOCUMENTS. I TOLD HIM THAT HE IS RESPONSIBLE FOR REMEDIATION ON THE SITE. HE SAID HE WILL NOT DO ANYTHING AND IS HOPING TO SELL THE PROPERTY. HE IS ASKING $110,000 AND WILL ALLOW $10,000 FOR UST REMOVAL. 12/10/98: FG SENT LETTER REQUESTING THAT MR. NIEDZIALOWSKI COMPLETE THE SITE WORK OR ALLOW NYSDEC TO DO IT, DUE DATE OF 1/8/99. 08/06/99: FG SENT LETTER REQUESTING THAT MR. NIEDZIALOWSKI COMPLETE THE SITE WORK OR ALLOW NYSDEC TO DO IT, DUE

FORMER GAS STATION (Continued) **S106722184**

DATE OF 08/27/99. 02/15/00: FG SITE INSPECTION. THE STATION IS CLOSED. NO ACTIVITY AT THE SITE. 10/16/00: RNL FILE REVIEW FOR ISR, DID INTERIM ISR, RECOMMEND LEGAL ACTION FOR SITE ACCESS 1/24/01 FG SPOKE TO RICHARD JAGER WITH METRO 873-5404, VOICE MAIL 743-6946. HE LISTED THE PROPERTY. THEY ARE ASKING $120,000. THEY HAD AN INTERESTED PARTY BUT THEY WOULD NOT BUY IT UNTIL ALL THE ENVIRONMENTAL PROBLEMS WERE TAKEN CARE OF. MR. JAGER WAS NOT AWARE THAT THERE WAS DOCUMENTATION THAT THERE WAS CONTAMINATION IN THE GROUND. HE THOUGHT THAT THEY ONLY NEEDED TO REMOVE THE USTS. HE RECOMMENDED THAT I SPEAK WITH ELAINE PESSECOW, MR. NIEDZIALOWSKI'S DAUGHTER 446-1373 REGARDING THE NECESSARY WORK ON THE SITE. HE ALSO SAID THAT MR. NIEDZIALOWSKI'S WIFE LIVES IN TONAWANDA ON CRESTHILL 834-9035. I PHONED MS PESSECOW AND LEFT A MESSAGE TO HAVE HER RETURN THE CALL. 1/26/01 FG SPOKE TO MS. PESSECOW. SHE WAS UNAWARE OF THE SPILL AT THE SITE AND ASKED FOR A COPY OF THE FILE. SHE SAID THAT THEY WERE PLANNING ON REMOVING THE UST'S FROM THE SITE AND HAD SPOKEN TO ELMWOOD TANK, JOE SALM. I WILL SEND HER A COPY OF THE FILE. 2/2/01 ELAINE PESSECOW CALLED AND SAID SHE WILL HAVE HER MOTHER SIGN THE RIGHT OF ENTRY TO ALLOW NYSDEC TO COMPLETE THE SITE WORK. SHE SAID THERE IS NO TITLE FOR THE PROPERTY. SHE SAID THE DEED INDICATES CONRAIL WILL BE RESPONSIBLE FOR REMEDIATION. SHE SAID SHE WILL SEND A COPY OF THIS TO ME. SHE ALSO SAID THAT SIMON OIL WAS THE LAST COMPANY TO DELIVER GASOLINE TO THE STATION. 2/2/01 NOTIFIED NATURE'S WAY OF THE NEED FOR WORK ON THE SITE. THEY WILL BE ABLE TO REMOVE THE UST'S ON 2/12/01. 2/2/01 JAMES CARROLL, CHEVRON PRODUCTS COMPANY 2300 WINDY RIDGE PARKWAY, SUITE 800 SOUTH, ATLANTA, GEORGIA 30339 - PHONE 770-984-3192, FAX 770-984-4107, CALLED. I GAVE HIM THE PROPERTY ADDRESS AND TOLD HIM WE WILL SEND HIM A POTENTIALLY RESPONSIBLE PARTY LETTER. HE SAID HE WILL BEGIN SEARCHING HIS RECORDS FOR INFORMATION ON THIS SITE. 2/22/01 RECD THE SIGNED RIGHT OF ENTRY FORM AND A COPY OF THE DEED WHICH STATES THAT GRANTEE SHALL BE RESPONSIBLE AFTER THE DATE OF THIS DEED FOR ANY REMEDIATION ARISING FROM THE EXISTENCE OR PRESENCE OF ANY CONTAMINATION IN, ON OR ABOUT THE PREMISES, INCLUDING WITHOUT LIMITATION, ANY HAZARDOUS SUBSTANCES, EXCEPT AS SPECIFICALLY PROVIDED OTHERWISE IN SUBSECTION A(II) BELOW. CONRAIL WAS THE GRANTEE. 3/16/01 SPOKE TO ELAINE PESSECOW WHO SAID THAT SIMON OIL HAD THE CONTRACT TO SUPPLY FUEL FROM 1982 THROUGH 1992. SHE HAS SOME PAPERWORK THAT INDICATES THIS. AFTER 1992, THE SUPPLIER WAS REID. PRIOR TO 1982, THE PROPERTY WAS A GULF STATION, NAMED CHET'S GULF STATION. SHE REMEMBERS GOING TO A GULF PICNIC WHERE GULF GAVE HER FATHER AN AWARD FOR 25 YEARS OF SERVICE. SHE HAS SOME LETTERS THAT WERE HER FATHERS ASSOCIATED WITH THE BUSINESS. SHE WILL SEND A COPY TO THIS OFFICE OF ALL THAT SHE HAS. 3/16/01 I CALLED JAMES CARROLL WITH CHEVRON WHO SAID THAT HE LOCATED A GULF STATION AT THE CORNER OF ELMWOOD AND AMHERST BUT IT WAS A DIFFERENT OPERATOR. I TOLD HIM THAT THE STATION WAS A GULF STATION PRIOR TO 1982. HE SAID HE WILL GET THE INFORMATION THAT HE COLLECTED TO ME. 3/23/01 MARSHALL WILLIAMS WITH CSX CALLED AND SAID THAT THEY OWNED THE PROPERTY BUT SOLD IT IN 1976. HE HAS ASSIGNED THIS SITE TO PAUL KRZANSKI WITH THE REMEDIATION GROUP WHO WILL BE IN TOUCH WITH ME. MARSHALL'S NUMBER IS 904-633-4529. 4/6/01 HOWARD FRANK, ATTY FOR REAL ESTATE TRANSACTION, 858-8033 CALLED AND INDICATED THAT THERE IS A POTENTIAL PURCHASER FOR THE PROPERTY. HE WANTED TO KNOW THE TIME FRAME FOR REMEDIATION. I TOLD HIM I WOULD SPEAK WITH BOTH CHEVRON AND CSX AND GET BACK WITH HIM. 4/6/01 LEFT A MESSAGE FOR JAMES CARROL WITH CHEVRON TO RETURN MY CALL. 4/9/01 LEFT A MESSAGE FOR PAUL KURZANSKI 904-359-3100 WITH CSX TO RETURN MY CALL. 4/11/01 PAUL KURZANSKI WITH CSX CALLED. HE SAID HE WILL RESPOND

FORMER GAS STATION (Continued) **S106722184**

WITHIN THE NEXT TWO WEEKS REGARDING WHETHER OR NOT THEY WILL COMPLETE THE INVESTIGATION AND REMEDIATION. 4/25/01 JAMES CARROLL WITH CHEVRON CALLED REQUESTING AN EXTENSION OF TIME TO RESPOND TO THE NYSDEC LTR REQUESTING THAT CHEVRON COMPLETE THE SITE WORK. HE IS CURRENTLY HAVING A CONSULTANT CONDUCT RESEARCH ON THE SITE. HE ALSO WANTED TO KNOW WHAT NEEDS TO BE DONE ON SITE. 5/16/01 JAMES CARROLL WITH CHEVRON CALLED AND SAID HE WILL PROVIDE HIS RESPONSE BY JUNE 15, 2001. HE HAS HIRED BBL TO COMPLETE A BACKGROUND SEARCH ON THE PROPERTY. 5/17/01 RECD A RESPONSE FROM CSX INDICATING THAT THEY ARE NOT A DISCHARGER OR A RESPONSIBLE PARTY AT THE SITE. 6/21/01 MARY NIEDZIALOWSKI CALLED ASKING ABOUT A CHEVRON RESPONSE. I TOLD HER THERE HAS BEEN NO RESPONSE YET. I CALLED JAMES CARROLL WITH CHEVRON AND LEFT A MESSAGE FOR HIM TO RETURN THE CALL. 6/26/01 RECEIVED NO CALL BACK FROM CHEVRON. SPOKE TO MARY NIEDZIALOWSKI WHO SAID IT WAS OK FOR NYSDEC TO START THE SITE WORK. 6/28/01 FG MET NATURE'S WAY ON SITE, RUSS SAVAGE AND TOM WOELFLE. NATURE'S WAY TO COMPLETE SUBSURFACE BORINGS ON SITE TODAY TO COLLECT A SAMPLE FOR DISPOSAL PURPOSES AND TO DETERMINE THE EXTENT. THEY WILL REMOVE THE UST'S AND THE CONTAMINATION AS SOON AS THEY HAVE APPROVAL AT THE LANDFILL. THERE IS FUEL AND WATER IN THE UST'S ON SITE THAT WILL HAVE TO BE DISPOSED. 7/11/01 FG SITE INSPECTION. MET NATURE'S WAY ON SITE. PULLED ONE UST OUT OF GROUND. TWO ADDITIONAL UST'S TO BE REMOVED. CONTAMINATION IN THE UST EXCAVATION WAS PRESENT. WORK WILL CONTINUE. 7/13/01 FG SITE INSPECTION. DAN WIK, TOM WOELFLE ON SITE FOR NATURE'S WAY. CONTAMINATED SOIL FROM UST EXCAVATION BEING LOADED FOR DISPOSAL. NATIONAL FUEL ON SITE UNCOVERING THE GAS LINE ON THE PROPERTY. EXCAVATION TO CONTINUE IN FRONT OF BUILDING ON MONDAY 7/16/01. 7/16/01 DAN WIK FROM NATURE'S WAY CALLED AND SAID THAT HE DISCOVERED TWO ADDITIONAL PRODUCT LINES THAT HEAD UNDER THE BUILDING. HE BELIEVES THERE ARE ADDITIONAL TANKS UNDER THE BUILDING. HE FOUND ANOTHER PRODUCT LINE IN THE UST EXCAVATION ON THE WEST SIDE OF THE BUILDING AND BELIEVES THIS GOES TO A WASTE OIL TANK BEHIND THE BUILDING. MRS. NIEDZIALOWSKI SPOKE TO ME ALSO. SHE SAID SHE IS NOT THAT CONCERNED ABOUT THE BUILDING. SHE WANTS TO SPEAK TO HER DAUGHTER AND SON IN LAW FIRST BEFORE WE TAKE IT DOWN. SHE WANTS TO MEET ME ON SITE ON TUESDAY OR FRIDAY THIS WEEK. 7/17/01 FG SITE INSPECTION. NATURE'S WAY ON SITE. EXCAVATION COMPLETE. CONTAMINATION REMAINS AT THE FRONT ALONG THE STREET AND UNDER THE BUILDING. SAMPLES IN THE EXCAVATION HAVE BEEN COLLECTED AND WILL BE ANALYZED FOR 8021 STARS. THE EXCAVATION IS BEING BACKFILLED. MRS. NIEDZIALOWSKI WANTS TO MEET ON SITE ON FRIDAY AT 2PM TO DISCUSS WHETHER OR NOT THE BUILDING NEEDS TO BE KNOCKED DOWN. NATURE'S WAY EXCAVATED BEHIND THE BUILDING TO CHECK IF THE PRODUCT LINES THEY DISCOVERED UNDER THE BUILDING LEAD THERE. THEY DID NOT FIND PRODUCT LINES OR UST'S OR CONTAMINATION. 7/20/01 FG SITE INSPECTION. MET R. SAVAGE WITH NATURE'S WAY AND THE PROPERTY OWNER, MARY NIEDZIALOWSKI AND HER DAUGHTER - ELAINE PESSECOW AND HER SON IN LAW. WE EXPLAINED THAT CONTAMINATION RUNS UNDER THE BUILDING AND IT NEEDS TO BE REMOVED. THEY CONSENTED THAT THE BUILDING BE TAKEN DOWN. WE ALSO EXPLAINED THAT CONTAMINATION RUNS INTO THE STREET AND WE WOULD HAVE TO GEOPROBE TO DETERMINE THE EXTENT. NATURE'S WAY SAID THEY COULD COMPLETE THE ASBESTOS SURVEY AND GET THE DEMOLITION PERMIT NEXT WEEK AND TAKE THE STRUCTURE DOWN AND REMOVE THE CONTAMINATION THE FOLLOWING WEEK. 7/23/01 RECD THE EXCAVATION SAMPLING RESULTS FOR 8021 STARS: BOTTOM FLOOR COMP. EAST TANK PIT ND NORTH WALL COMP. EAST TANK PIT ND EAST WALL COMP. EAST TANK PIT ND SOUTH WALL COMP. EAST TANK PIT ND WEST WALL COMP. EAST TANK PIT ND FRONT EXCAVATION SO. TOLD HER I WILL LOOK AT FILE. 10/19/01: MF T/C ELAINE PESSECOW 446-1373, DAUGHER OF RP. WANTS TO SELL PROPERTY, TOLD HER ITS OK WITH US. SHE WANTS A LETTER STATING THE AG WILL GO AFTER CHEVERON. TOLD HER WE PRESENT ALL INFO TO AG & THEY WILL DETERMINE WHO GETS INVOICED. 10/22/01: MF PROCESSED NW $17771.45 PAY PACKAGE FOR 7/27-9/11 SITE WORK. REMOVING UST, CONTAMINATED SOIL, SAMPLE ETC. 11/30/01: MF PROCESSED NW $7235.84 PAY PACKAGE FOR 10/23-11/13 SOIL & CONTAMINATED WATER DISPOSAL, REPORT WRITTING, WATER DISPOSAL COST & $3493.12 FOR SOIL DISPOSAL. ALSO RECEIVED SOIL DISPOSAL DOCUMENTATION. 01/18/02: MF RETURN ELAINE PESSECOW'S T/C. LEFT MESSAGE 716-446-1373. 02/04/02: MF T/C ELAINE PESSECOW, GAVE HER SPILL UPDATE. 02/11/02: MF T/C JIM RHOADES, 874-2527 INTERESTED IN BUYING PROPERTY. WANTS TO KNOW PATICULARS OF SITE THAT I DON'T KNOW. WILL HAVE FG CONTACT HIM. 03/07/02: MF FOR FG NW SUBMITTED THE SITE REMEDIATION REPORT. IT INCLUDED ALL DISPOSAL RECEIPTS & EXCAVATION ANALYTICAL RESULTS. 5 UST'S WERE REMOVED FROM THE SITE, 3-2K GALLON UST'S, 1-5K GALLON UST & 1 WASTE OIL UST & LIFT. 1096.41 TONS OF CONTAMINATED SOIL WERE DISPOSED OAT THE WASTE MANAGEMENT CHAFFEE LANDFILL. THE WASTE OIL UST LIQUID (250 GALLONS) WERE DISPOSED AT INDUSTRIAL OIL. THE DISPOSAL ANALYTICAL SHOWED THE CONTAMINATED SOIL TO BE NON-HAZ. THE EXCAVATION ANALYTICAL RESULTS ARE ALL BELOW TAGM'S EXCEPT FOR THE SOUTHERN BOUNDRY OF THE FRONT EXCAVATION, ALONG THE AMHERST ST R-O-W WHICH EXCEEDED GUIDENCE VALUES FOR MTBE & BENZENE & THE WEST WALL OF THE WASTE OIL TANK PIT EXCAVATION, WHICH REPORTED 3 PAH'S (8270) ANALYTES. THIS SITE CAN BE

FORMER GAS STATION (Continued) **S106722184**

MADE INACTIVE & NO FURTHER WORK WILL BE REQUIRED. 03/20/02: MF PROCESSED NW PP#5 FOR REPORT WRITING. INVOICE #01-049-6, 2/18/02 - 2/25/02, $557.40. 04/19/02: MF FOR FG 'I' LETTER TO MARY NIEDZIALOWSKI, PROPERTY OWNER. 6/28/02: JAA T/C MATT BAKUS, ARCADIS, (716) 452-7826, EXT. 17. HE WAS FOLLOWING UP FXG LETTER OF 3/27/02 RECOMMEDING RAIL AND BALLAST BE REMOVED. HOW MUCH RAIL IS INVOLVED, WHAT ARE SAMPLING REQUIRMENTS FOR BALLAST PRIOR TO REMOVAL? I WILL RESEARCH AND CALL BACK. 7/5/02: JAA T/C MARY NIEDZIALOWSKI (834-9035), RETURNING HER CALL OF JULY 1. SHE WAS UPSET ABOUT DEMAND LETTER FROM AG. SHE IS BETTER NOW, SINCE HER DAUGHTER SPOKE TO AG, AND IS SENDING DOCUMENTS SHOWING THEY ARE NOT RESPONSIBLE FOR CLEANUP. SHE WANTS TO SELL THE PROPERTY, AS SOMEONE IS INTERESTED. I SUGGESTED SHE RETAIN AN ATTORNEY, AS AG REPRESENTS STATE'S INTERESTS, AND NOT HERS. SHE CAN'T AFFORD AN ATTORNEY. SHE MAY HAVE HER DAUGHTER CALL ME. 7/5/02: JAA T/C MATT BAKUS, ARCADIS, AFTER SPEAKING TO MARK HANS. NOT SURE HOW MUCH RAIL IS INVOLVED. RAILS SHOULD BE RECYCLED, TIES AND BALLAST WOULD HAVE TO BE CHARACTERISED PRIOR TO DISPOSAL. I GAVE HIM MRS. MARY NIEDZIALOWSKI'S PH # REGARDING LENGTH OF RAIL, AND GAVE HIM MARK HANS' NAME REGARDING ADDITIONAL DISPOSAL QUESTIONS."

Remarks: "while digging trench for pipeline work,national fuel encountered gasoline on groundwater-this info per fax reg 9"

FINDS:

Registry ID: 110004338707

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was RJJ 3/27/2002: RJJ AT SITE AT 1100...MEET WITH RON FRENCH,CITY OF BUFFALO WATER DEPT.#851-5719,THEY WERE REPLACING A FIRE HYDRANT IN FRONT OF 325 GROTE ST. AND OBSERVED STRONG PETROLEUM ODORS AND REMOVED ABOUT 1/2 DUMP TRUCK OF CONTAMINATED SOIL...ALSO, THE WATER IN THE EXCAVATION HAD A SHEEN ON IT...I TOLD THE RON FRENCH THAT DEC WILL HAVE TO INVESTIGATE THE PETROLEUM PROBLEM AND I WILL HIRE OUR CONTRACTOR...IN THE MEANTIME,THEY WILL BACKFILL THE EXCAVATION AND STOP WORK UNTIL WE FIND THE SOURCE/RP...HIRED NATURE'S WAY TO INVESTIGATE AND REMEDIATE... 4/3/2002: RJJ AT SITE WITH NATURE'S WAY AT 0900...THEY WILL GEO-PROBE THE AREA ALL AROUND THE FIRE HYDRANT TO

325 GROTE STREET (Continued) **S106002160**

SEE HOW FAR THE CONTAMINATION TRAVELED AND KEEP ME INFORMED. 4/4/2002: RECEIVED THE BORING LOG MAP AND OVM TABLE ON THE SITE...IT SHOWS THAT MOST OF THE CONTAMINATION IS WHERE THE WATER DEPT. DUG THEIR EXCAVATION AND A SMALL AMOUNT IS UNDER THE SIDEWALK...I WILL DISCUSS THIS WITH THE WATER DEPT. AND NATURE'S WAY. 4/5/2002: AFTER DISCUSSING THIS WITH BOTH BUFFALO WATER DEPT. AND NATURE'S WAY,WE WILL HAVE NATURE'S WAY EXCAVATE THE CONTAMINATED SOIL UNDER THE SIDEWALK AND THEN BUFFALO WATER WILL BACKFILL THE EXCAVATION AFTER THEY REPAIR THE FIRE HYDRANT,THEN NATURE'S WAY WILL REPAIR THE SIDEWALK. 4/19/2002: RECEIVED THE ANALYTICAL REPORT FROM NATURE'S WAY FOR THE LANDFILL CHARACTERIZATION...IT INDICATES THAT GASOLINE WAS DETECTED,AND HAD A NEGATIVE FLASHPOINT. 4/25/2002: RECEIVED A PAYMENT PACKAGE FROM LOSIER LABS FOR THE AMOUNT OF $181.13 FOR THE LANDFILL CHARACTERIZATION TESTS...AND ALSO RECEIVED A PAYMENT PACKAGE FROM NATURE'S WAY FOR THE AMOUNT OF $1,202.69 FOR THE GEO-PROBE INVESTIGATION. 5/8/2002: RJJ AT SITE AT 0900...NATURE'S WAY AND THE BUFFALO WATER DEPT.,ARE AT THE SITE EXCAVATING THE AREA AND THE CONTAMINATED SOIL...AFTER ALL THE SOIL IS REMOVED,THE WATER DEPT. WILL REPAIR THE FIRE HYDRANT,THEN BACKFILL...NATURE'S WAY WILL DIG TO CLEAN AND TAKE WALL/FLOOR SAMPLES,THEN RETURN TO REPAIR THE SIDEWALK...RJJ AT SITE AT 1400...THE WATER DEPT. HAS INSTALLED THE NEW FIRE HYDRANT AND NATURE'S WAY IS BACKFILLING THE EXCAVATION...THEY WILL RETURN TOMORROW TO START REBUILDING THE SIDEWALK. 5/15/2002: NATURE'S WAY HAS STARTED TO REBUILD THE SIDEWALK AND WILL CONTINUE TOMORROW. 5/16/2002: RJJ AT SITE AT 1300...NATURE'S WAY HAS POURED THE CONCRETE IN THE SIDEWALK AND WILL SPREAD ASPHALT BINDER ON THE SHOULDER. 5/28/2002: RECEIVED THE ANALYTICAL RESULTS FROM LOZIER LABS ON THE CONFIRMATORY WALL/FLOOR SAMPLES IN THE EXCAVATION...ALL THE REULTS ARE BELOW OUR 'STARS' GUIDANCE VALUES. 5/29/2002: RECEIVED A PAYMENT PACKAGE FROM NATURE'S WAY FOR THE AMOUNT OF $7,202.01 FOR ALL THE WORK AT THE SITE INCLUDING THE DISPOSAL OF THE CONTAMINATED SOIL. 6/11/2002: RECEIVED A PAYMENT PACKAGE FROM LOZIER LABS FOR THE AMOUNT OF $896.80 FOR THE CONFIRMATORY SAMPLING IN THE EXCAVATION...AFTER THIS PAPERWORK COMES BACK,I WILL BE ABLE TO CLOSE OUT THIS SPILL. 6/12/2002: ALL THE PAPERWORK IS NOW IN,AND THE SPILL HAS BEEN CLEANED UP AND PROPERLY DISPOSED OF...NO FURTHER ACTION NEEDED...SPILL CLOSED OUT. 7/10/2002: RECEIVED A PAYMENT PACKAGE FROM NATURE'S WAY FOR THE AMOUNT OF $243.45 FOR WORK WHICH WAS NOT PREVIOUS BILLED."

Remarks: "CALLER SAID THAT CITY EXCAVATED SOIL THAT MAYBE PETROLEUM CONTAMINATED. IS STAGING MAT'L ON PLASTIC AND IS COVERING. WOULD LIKE SOMEONE FROM SPILLS TO VISIT SITE AND ADVISE CITY WHAT TO DO."

Site Code:	56809
Site Description:	Location: This site is located at 601 Amherst Street in an urban location in the City of Buffalo, Erie County, New York. The property was formerly the location of an industrial park known as Campus Industries which had one large building (380,000 sf) housing a number of commercial and industrial businesses on 17 acres. Site Features: The site is located on the south side of Amherst Street between Bush Street and Elmwood Avenue in the City of Buffalo. Property use adjacent to the site includes; residential housing (east and north), small retail and light industrial buildings (north and west), and a school (east). South of the subject property there is a park that is located on the banks of Scajaquada Creek. Current Zoning/Use(s): The 601 Amherst Street Site is currently zoned for commercial use as a large retail food store. Historical Use(s): Historically the property was used for the disposal of ash and cinders from various sources as fill material. The property has been used for industrial and commercial businesses since the 1920's. In 1997 Wegmans Food Markets purchased the property and entered the State's Voluntary Cleanup Program to undertake the necessary investigation and remediation of

MORRISON INDUSTRIES (Continued) **S103570877**

the property. Remediation consisted of the removal of transformers containing PCB oil, three underground storage tanks (petroleum), one above ground storage tank (paint wastes), and the excavation and disposal of 345 tons of contaminated soil (solvents, ash). Deed restrictions were filed in 1997 and a final engineering report was submitted in 1997. Sampling of groundwater was conducted in 1998 - 2000. An assignable release and covenant not to sue was issued by DEC in 2001. No further action is required at this site. The site was developed as a supermarket in 1997-98. Site Geology and Hydrogeology: The site is covered with a layer of fill material ranging in thickness from five to greater than sixteen feet. The fill appears to increase in thickness from north to south. The fill composition ranges from silty soil to sand mixed with cinders and inert material such as glass and metal. The Scajaquada Creek flows southwest from the site and discharges to the Niagara River which is located approximately one mile to the west.

Env Problem: Nature and Extent of Contamination: Prior to Remediation: The three underground storage tanks, nine PCB transformers and asbestos insulation were the most significant potential environmental threats. The soil sample results indicated that volatile organic compounds (VOC's) were present beneath the site. In addition to the VOC's associated with petroleum related residuals, acetone was also detected in one soil sample. The groundwater sample analysis results indicated that acetone, ethylbenzene, and m,p-xylene were present in the groundwater. Post-Remediation: Remediation of the site removed contaminants that posed a threat to the environment. Groundwater sampling has shown that the groundwater has not been impacted by the industrial operations.

Health Problem: The site has been remediated and is now the location of a Wegman's Supermarket. The area is served by the City of Buffalo public water supply. Therefore, there are no current health concerns regarding this site.

DEC Memo:	"03/11/13 TDJ CONTACTED PETER GORTON FOR SCHEDULE OF EXCAVATION WORK. HE WILL CONTACT OUR OFFICE WHEN WORK WILL BEGIN. 3/20/13 TDJ WORK BEGAN ON EXCAVATING TANK WHICH IS IN ALLEY BETWEEN TWO WAREHOUSES. NO.6 OIL WAS FOUND IN SOIL WHERE A FUEL LINE LED INTO BUILDING. SOIL WAS REMOVED AND STAGED ON PLASTIC. OIL WAS BEING HEATED TO TRY TO PUMP OUT FOR TANK REMOVAL. COLD WEATHER WILL SLOW PROCESS AND ALTERNATIVE REMOVAL TECHNIQUE MAY BE USED. NOCO IS SCHEDULED TO DO THE TANK PUMPING. JUSTIN IS THE TODD COMPANY SITE MANAGER AT (716)465-7970. 3/21/13 TDJ UST WAS HEATED AND NOCO BEGAN PUMPING #6 OIL OUT TO VAC TRUCK. TANK WILL BE TOTALLY EMPTIED AND CLEANED WITH CLEAN OIL BEFORE IT IS PULLED. cONFIRM. SAMPLES WILL BE COLLECTED AND ANY STAINED SOIL REMOVED WILL BE DISPOSED PROPERLY. 4/15/13 TDJ RECEIVED FINAL REPORT FOR TANK REMOVAL. ALL SOIL DISPOSAL IFORMATION AND CONFIRMATORY SAMPLING RESULTS WERE INCLUDED. ALL SAMPLES TAKEN WERE WELL BELOW CP-51 LIMITS FOR EXCAVATED SOILS. SOIL WAS ALSO DISPOSED OF PROPERLY. SITE CLEANUP WAS TO SATISFACTION OF DEC SITE MANAGER. LETTER SENT FOR NO FURTHER ACTION TO MR.MANGANO. NO FURTHER ACTION FILE CLOSED"
Remarks:	"phase I completed then a phaseII on the eastern side. Title search indicated there was a 10000 gallon tank on the western side. Test pits revealed an ust - fuel oil ust. odor present in the soils surrounding the tank along with oily soil. Will go back to pull ust out. Panamerican is working for mr. mangano. Property may be considered for brownfield with a potential developer of Rocco Termini."

DEC Memo:	"RMC NOTIFIED JIM OVERHOLDT, BSA. 1/19/11 FG SITE INSPECTION. MET JIM HYZY AND VERN COURTEMANCHE WITH WASTE STREAM. THE #5 FUEL OIL TANK VALVE FAILED AND SPILLED FUEL FOR SEVERAL HOURS. THE STATIONERY ENGINEER MR. COURTEMANCHE ESTIMATED THAT 50 GALLONS WERE SPILLED ONTO THE FLOOR AND OVER A FLOOR DRAIN THAT LEADS TO THE SANITARY SEWER. THEY ESTIMATE 2 GALLONS LOST TO THE SEWER. THEY WERE IN THE PROCESS OF CLEANING THE SPILL UP USING ABSORBENT AND THEN PLACING IN BAGS.

WEATHERPANEL INC (Continued) **1000158988**

THEY PLAN TO DISPOSE OF THE MATERIAL AT THE NOCO BIOCELL AND WILL WASH THE FLOOR DOWN WITH THEIR OWN BIODEGRADING MATERIAL. THEY WILL PROVIDE A DISPOSAL RECEIPT FOR THE DEBRIS AND WILL FIX THE VALVE. 3/21/11 FG SPOKE TO JIM HYZY WITH WASTE STREAM. HE SAID HE HAD TO ANALYZE ADDITIONAL SAMPLE FOR THE LANDFILL WHICH DELAYED THE DISPOSAL. THEY WILL PROVIDE THE DISPOSAL RECEIPT WITHIN THE NEXT TWO WEEKS. 5/2/11 DISPOSAL RECEIPTS RECEIVED. SPILL CLOSED."

Remarks: "Boiler gasket failure. 5 oil lost. 200 gallons lost clean up underway. some in sewer system."

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions,

WEATHERPANEL INC (Continued) **1000158988**

and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"6/14/16 FG CONTACTED JOHN DUNN CASPERTHEFRIENDLY@OUTLOOK.COM ASKING FOR THE EXACT LOCATION OF THE UST. From: John Dunn [mailto:casperthefriendly@outlook.com] Sent: Tuesday, June 14, 2016 11:33 AM To: Gallego, Francine (DEC) Subject: Re: Toxic Land It is near the dumpster on west side of the alley behind the main building on Elmwood Avenue. Many of us parked back there and were concerned because it was only covered with soil for some time and the smell was quite strong. I was transfered to another location within a year, but believe the asphalt patch will be visible. Thank you. J. Dunn 6/15/16 LETTER SENT TO PIERCE ARROW HOLDING LLC 948 45TH ST, BROOKLYN NY 11219 SBL 78.77-2-6 REQUESTING A RESPONSE BY 6/29/16. 11/30/16 CHAD

PIERCE ARROW BUILDING (Continued) **S118705546**

STANISZEWSKI, NYSDEC INDICATED THAT THIS SITE SHOULD BE ACCEPTED INTO THE BCP WITHIN THE NEXT TWO MONTHS. 4/6/17 THE SITE HAS BEEN ACCEPTED INTO THE BCP WITH SITE NUMBER C915308. NO FURTHER ACTION BY SPILLS IS NECESSARY. THE SITE IS CLOSED."

Remarks: "To whom it may concern, November of 2011 at 1685 Elmwood Ave. in the rear of the Pierce Arrow Building in Buffalo New York a 100+ year old fuel oil tank was excavated & removed by the then Building manager Harold Birch. This was done on a Sunday and executed without a permit. The tank broke on removal, spilling an untold amount of rancid, potentially hazardous oil into hole. For several days the basement and first floor reeked of the oil, causing nausea, headaches, and watery eyes. To our knowledge this was never addressed and no clean up was ever done. The tank in question is apparently still on the grounds hidden in an adjacent building along the tracks because apparently no scrap yard would take it due to it's toxicity. This was told to me by Mr. Birch. Pierce Arrow is slated for renovations in the months to come and will repurposed into mixed use including residential spaces. Although we left the building for fear of our health, I urge the EPA to look into this further as the health and safety of many potential tenants could be at risk when the project is completed. Thank You John Dunn"

BROWNFIELDS:

Program:	BCP
Site Code:	385897
Acres:	6.5
HW Code:	C915220
SWIS:	1502
Town:	Buffalo (c)
Record Added Date:	08/15/2007
Record Updated Date:	02/19/2013
Update By:	MLDOSTER
Site Description:	The former Pierce Arrow Manufacturing Facility was accepted into the Brownfield Cleanup Program, effective December 11, 2007. This site is located in an Urban area in the City of Buffalo, Erie County. The site is approximately 1/2-mile north of Scajaquada Creek and Buffalo State College. The main features of this 6.5 acre site include two

GREAT ARROW INDUSTRIAL PARK (Continued) **1000304546**

large former manufacturing buildings (Buildings A and C), an open area historically used for rail spurs and a coal storage area, and a small courtyard containing (2) USTs. The site was historically used for the manufacture of the Pierce Arrow Automobile between 1916 and 1939. Since that time the site has been utilized for warehousing, including chemical drum storage. As of 2008 the majority of the site was vacant (one area used for boat storage). Surrounding buildings immediately to the west, south and east of the site are utilized for warehousing, manufacturing and/or office space. Immediately to the north of the site lies several vacant buildings and a rail corridor. The nearest residential areas is located approximately 300 feet south of the site. Historic automobile manufacturing and various chemical warehousing operations appear to have led to site contamination. Following remediation of the site, a robust development plan was proposed to renovate existing buildings within, and adjacent, to the BCP site. The plan included the creation of student housing for Buffalo State College, residential apartments, commercial businesses and a hotel. A remedial investigation work plan was approved but never implemented due to the cancellation of the development project. The Brownfield Cleanup Agreement was terminated as of 7/3/09. The site was referred to Division of Spill Response to address existing petroleum contamination (Spill No. 0405957)

Env Problem: Prior investigations at the site include: 1. A Phase I Environmental Site Assessment was conducted in 2004. Site reconnaissance and historic records identified multiple 'areas of potential concern' due to heavy manufacturing, chemical storage, surface staining, USTs, coal storage, rail spurs, etc. 2. A limited phase II subsurface soil investigation was completed in August 2004. The phase II investigation focused on areas of concern outlined in the phase I report. Soil samples exceeded restricted residential and commercial soil cleanup objectives for PAHs and metals. No groundwater data has been collected to date. Additional suspected contaminates include VOCs which may be impacting the soil and/or soil gas. The site does not pose a significant threat to the environment.

FINDS:

Registry ID: 110004403958

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

BUFFALO REFINISHING SERVICES (Continued) **1000227752**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was JFO 02/24/03 JFO ON SITE NO ONE AVAILABLE. THE BUILDING IS LOCKED UP. I WILL CONTACT THE OWNER BY PHONE. 2/25/03:SAC TELECON ROBIN PHARR, ATTORNEY FOR PHARGO, MS. PHARR RECEIVED JFO'S PHONE MESSAGE REGARDING THE TANK OVERFILL AND WAS RETURNING HIS CALL, SHE IS NOW THE REPRESENTATIVE FOR THE SITE SINCE IT WAS SHUTDOWN ABOUT A MONTH AGO, MS. PHARR SAID THAT THERE HAVE BEEN NO DELIVERIES FOR 2 MONTHS, HER PHONE NO. 887-9888, MS. PHARR WALKED THE SITE AND DID NOT OBSERVE ANY OIL SPILLAGE, SINCE PLANT HAS BEEN SHUT DOWN SHE SUSPECTS IT MAY BE A DISGRUNTLED FORMER EMPLOYEE, SHE SAID THE GATE IS LOCKED AND THERE IS SOMEONE AT THE SITE FOR SECURITY PURPOSES, SHE SAID THAT TO CONTACT HER IF INSPECTION IS NEEDED.A 03/11/03 JFO CALL TO MS PHARR. SHE SAID THAT BUFFALO ECONOMIC RENAISSANCE CORP (BERC) HAS TAKEN OVER THE SITE. I TRIED TO CALL BERC SEVERAL TIMES. THERE IS NO ANSWER. 05/09/03 JFO REC'D MESSAGE FROM KATHY BRENNEN INDICATING THAT THIS SITE CAN BE CLOSED. KEVIN MATHIAS OF EPA IS APPARENTLY HANDLING THIS SITE SINCE THE FIRE UNDER AN EMERGENCY PERMIT. NO FURTHER ACTION REQUIRED BY SPILLS. ALSO THERE IS ANOTHER SPILL OPENED FOR THIS SITE, SPILL #0300561. THIS SPILL IS BEING HANDLED BY MIKE FRANKS. CLOSED"
Remarks:	"Dennis Young of BSA rec'd a complaint that an employee of Buffalo Belting overfilled 2-10,000 gallon #6 fuel oil storage tanks. The oil went to the floor drain. The sewers have been checked by BSA and they

BUFFALO PHARGO LLC (Continued) **U003316538**

found no product. Note: Bflo Belting went out of business approx 3 weeks ago."

DEC Memo:	"03/02/05 JFO ON SITE MET WITH ECO PHELPS. THE MATERIAL HAS BEEN LEFT ON A PALLET AND SHRINK WRAPPED. THE PRODUCT IS MADE BY CHESTERTON INC IN MASS. THE PRODUCT IS NOT LEAKING. WE CHECKED A COUPLE OF COMPANIES IN THE AREA AND THEY SAID IT HAS BEEN THERE FOR A COUPLE OF MONTHS. MIKE PHELPS CONTACTED THE CHESTERTON AND THEY WILL TRY TO FIND OUT WHO THEY SOLD IT TO. 03/07/05 JFO CALLED LINDA L0NETTE OF CHESTERTON. SHE SAID ACCORDING TO THE LOT NUMBERS THE PRODUCT WAS MADE IN 1994 AND SINCE THEN SOME OF THE DISTRIBUTERS HAVE GONE OUT OF BUSINESS. SHE WILL CHECK TO SEE IF THE COMPANY WILL DISPOSE OF THE PRODUCT. SHE WILL GET BACK TO ME. 03/16/05 JFO CALL TO LINDA LORNETTE. THEY WILL

BUFFALO PHARGO LLC (Continued) **U003316538**

MAKE ARRANGEMENTS TO PICKUP THE MATERIAL. WHEN THEY GET A DATE THEY WILL CONTACT ME. I VISITED THE SITE AND FOUND THE CONTAINERS NOT TO BE LEAKING. I COVERED THE MATERIAL WITH PLASTIC AND WRAPPED CAUTION TAPE AROUND THE CONTAINERS. 03/18/05 JFO CALL FROM LINDA LORETTE. THEY HAVE CONSULTED WITH THEIR ATTORNEY AND WILL NOT BE DISPOSING OF THE MATERIAL. THEY WILL STILL TRY TO FIND THE COMPANY THAT PURCHASED THE PRODUCT. 03/23/05 JFO HIRED OP-TECH TO DISPOSE OF THE MATERIAL. THEY WILL OVERPACK. 03/28/05 JFO ON SITE THE MATERIAL HAS BEEN OVERPACKED TO 3 DRUMS. 2 HAZ AND 1 NON-HAZ. 04/18/05 JFO REC'D PP FOR OVERPACKING THE MATERIAL. $477.82. SUBMITTED TO FG. 04/28/05 JFO CALL TO LINDA SCOTT OF OP-TECH. THE 3 DRUMS HAVE BEEN DISPOSED. RECEIPTS TO FOLLOW. 06/10/05 JFO RECEIVED THE DISPOSAL RECEIPTS ALONG WITH A PAYMENT PACKAGE FOR $467.50. ENTERED PAY PACK INFORMATION ON COMPUTER AND SUBMITTED TO FG. 09/20/05 JFO REVIEWED FILE. SPILL IS COMPLETE. NO FURTHER ACTION REQUIRED. CLOSED 02/14/06: MF FINAL ISR SUBMITTED"

Remarks: "ECO ROGERS SAID THE CONTAINERS ARE NOT LEAKING BUT WERE DUMPED DURING THE NIGHT."

FINDS:

Registry ID: 110004338752

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Description:	Location: The Pierce Arrow Site is a 2.85 acre site located in an urban area in the City of Buffalo at the intersection of Elmwood Avenue and Great Arrow Avenue and bounded to the north by Conrail

PIERCE ARROW (Continued) **S118950512**

Railroad. Site Features: The site is relatively flat and includes three unoccupied buildings surrounded by a small parking lot and a private driveway. Current Zoning and Land Use: The site is currently inactive, and is zoned for commercial and industrial use. The surrounding parcels are currently used for a combination of residential, commercial, and light industrial uses. The nearest residential area is 500 feet to the south. Past Use of the Site: Until 1938 the site was used for administrative and manufacture/testing of automobile engines. Prior uses that appear to have led to site contamination include automobile testing/manufacturing, aboveground and underground storage tanks used for oil and gasoline, coal storage, tool and die manufacturing, cleaning compound manufacturing, garage, brazing, heat treatment, machine shop, and dry cleaning. Site Geology and Hydrogeology: The Site contains 1-2 foot of urban fill underlain by native clay. Depth to groundwater is unknown.

Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

FINDS:

Registry ID: 110001593035

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110009465006

. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F010
. Waste name: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F011
. Waste name: SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.

. Waste code: F012
. Waste name: QUENCHING WASTEWATER TREATMENT SLUDGES FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

. Waste code: F020
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- OR TETRACHLOROPHENOL OR OF INTERMEDIATES USED TO PRODUCE THEIR PESTICIDE DERIVATIVES. (THIS LISTING DOES NOT INCLUDE WASTES FROM THE PRODUCTION OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

. Waste code: F021
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF PENTACHLOROPHENOL, OR OF INTERMEDIATES USED TO PRODUCE DERIVATIVES.

. Waste code: F022
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENES UNDER ALKALINE CONDITIONS.

. Waste code: F023
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE

BIOSAN DISPOSAL (Continued) **1018159077**

PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- AND TETRACHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE WASTES FROM EQUIPMENT USED ONLY FOR THE PRODUCTION OR USE OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

. Waste code: F024
. Waste name: PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)

. Waste code: F025
. Waste name: CONDENSED LIGHT ENDS, SPENT FILTERS AND FILTER AIDS, AND SPENT DESICCANT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION.

. Waste code: F026
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENE UNDER ALKALINE CONDITIONS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: F028
. Waste name: RESIDUES RESULTING FROM THE INCINERATION OR THERMAL TREATMENT OF SOIL CONTAMINATED WITH EPA HAZARDOUS WASTE NOS. F020, F021, F022, F023, F026, AND F027.

. Waste code: F032
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

. Waste code: F034

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F035
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F037
. Waste name: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F038
. Waste name: PETROLEUM REFINERY SECONDARY (EMULSIFIED) OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE AND/OR FLOAT GENERATED FROM THE PHYSICAL AND/OR CHEMICAL SEPARATION OF OIL/WATER/SOLIDS IN PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH WASTES INCLUDE, BUT ARE NOT LIMITED TO, ALL SLUDGES AND FLOATS GENERATED IN INDUCED AIR FLOTATION (IAF) UNITS, TANKS AND IMPOUNDMENTS, AND ALL SLUDGES GENERATED IN DAF UNITS. SLUDGES GENERATED IN STORMWATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND F037, K048, AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F039
. Waste name: LEACHATE RESULTING FROM THE TREATMENT, STORAGE, OR DISPOSAL OF WASTES CLASSIFIED BY MORE THAN ONE WASTE CODE UNDER SUBPART D, OR FROM A MIXTURE OF WASTES CLASSIFIED UNDER SUBPARTS C AND D OF THIS PART. (LEACHATE RESULTING FROM THE MANAGEMENT OF ONE OR MORE OF THE FOLLOWING EPA HAZARDOUS WASTES AND NO OTHER HAZARDOUS WASTES RETAINS ITS HAZARDOUS WASTE CODE(S): F020, F021, F022, F023, F026, F027, AND/OR F028.)

. Waste code: K001
. Waste name: BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste code: K002

. Waste name: OVEN RESIDUE FROM THE PRODUCTION OF CHROME OXIDE GREEN PIGMENTS.

. Waste code: K009
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

. Waste code: K010
. Waste name: DISTILLATION SIDE CUTS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

. Waste code: K011
. Waste name: BOTTOM STREAM FROM THE WASTEWATER STRIPPER IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K013
. Waste name: BOTTOM STREAM FROM THE ACETONITRILE COLUMN IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K014
. Waste name: BOTTOMS FROM THE ACETONITRILE PURIFICATION COLUMN IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K015
. Waste name: STILL BOTTOMS FROM THE DISTILLATION OF BENZYL CHLORIDE.

. Waste code: K016
. Waste name: HEAVY ENDS OR DISTILLATION RESIDUES FROM THE PRODUCTION OF CARBON TETRACHLORIDE.

. Waste code: K017
. Waste name: HEAVY ENDS (STILL BOTTOMS) FROM THE PURIFICATION COLUMN IN THE PRODUCTION OF EPICHLOROHYDRIN.

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste code: K018
. Waste name: HEAVY ENDS FROM THE FRACTIONATION COLUMN IN ETHYL CHLORIDE PRODUCTION.

. Waste code: K019
. Waste name: HEAVY ENDS FROM THE DISTILLATION OF ETHYLENE DICHLORIDE IN ETHYLENE DICHLORIDE PRODUCTION.

. Waste code: K020
. Waste name: HEAVY ENDS FROM THE DISTILLATION OF VINYL CHLORIDE IN VINYL CHLORIDE MONOMER PRODUCTION.

. Waste code: K021
. Waste name: AQUEOUS SPENT ANTIMONY CATALYST WASTE FROM FLUOROMETHANE PRODUCTION.

. Waste code: K022
. Waste name: DISTILLATION BOTTOM TARS FROM THE PRODUCTION OF PHENOL/ACETONE FROM CUMENE.

. Waste code: K023
. Waste name: DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.

. Waste code: K024
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.

. Waste code: K025
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF NITROBENZENE BY THE NITRATION OF BENZENE.

. Waste code: K026
. Waste name: STRIPPING STILL TAILS FROM THE PRODUCTION OF METHYL ETHYL PYRIDINES.

. Waste code: K027
. Waste name: CENTRIFUGE AND DISTILLATION RESIDUES FROM TOLUENE DIISOCYANATE PRODUCTION.

. Waste code: K028
. Waste name: SPENT CATALYST FROM THE HYDROCHLORINATOR REACTOR IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K029
. Waste name: WASTE FROM THE PRODUCT STEAM STRIPPER IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K030
. Waste name: COLUMN BOTTOMS OR HEAVY ENDS FROM THE COMBINED PRODUCTION OF TRICHLOROETHYLENE AND PERCHLOROETHYLENE.

. Waste code: K031
. Waste name: BY-PRODUCT SALTS GENERATED IN THE PRODUCTION OF MSMA AND CACODYLIC ACID.

. Waste code: K032
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHLORDANE.

. Waste code: K033

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste name: WASTEWATER AND SCRUB WATER FROM THE CHLORINATION OF CYCLOPENTADIENE IN THE PRODUCTION OF CHLORDANE.

. Waste code: K034
. Waste name: FILTER SOLIDS FROM THE FILTRATION OF HEXACHLOROCYCLOPENTADIENE IN THE PRODUCTION OF CHLORDANE.

. Waste code: K035
. Waste name: WASTEWATER TREATMENT SLUDGES GENERATED IN THE PRODUCTION OF CREOSOTE.

. Waste code: K036
. Waste name: STILL BOTTOMS FROM TOLUENE RECLAMATION DISTILLATION IN THE PRODUCTION OF DISULFOTON.

. Waste code: K037
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE PRODUCTION OF DISULFOTON.

. Waste code: K038
. Waste name: WASTEWATER FROM THE WASHING AND STRIPPING OF PHORATE PRODUCTION.

. Waste code: K039
. Waste name: FILTER CAKE FROM THE FILTRATION OF DIETHYLPHOSPHORODITHIOIC ACID IN THE PRODUCTION OF PHORATE.

. Waste code: K040
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF PHORATE.

. Waste code: K041
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF TOXAPHENE.

. Waste code: K042
. Waste name: HEAVY ENDS OR DISTILLATION RESIDUES FROM THE DISTILLATION OF TETRACHLOROBENZENE IN THE PRODUCTION OF 2,4,5-T.

. Waste code: K043
. Waste name: 2,6-DICHLOROPHENOL WASTE FROM THE PRODUCTION OF 2,4-D.

. Waste code: K044
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING AND PROCESSING OF EXPLOSIVES.

. Waste code: K045
. Waste name: SPENT CARBON FROM THE TREATMENT OF WASTEWATER CONTAINING EXPLOSIVES.

. Waste code: K046
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING, FORMULATION, AND LOADING OF LEAD-BASED INITIATING COMPOUNDS.

. Waste code: K047
. Waste name: PINK/RED WATER FROM TNT OPERATIONS.

. Waste code: K048
. Waste name: DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K049
. Waste name: SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste code: K051
. Waste name: API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K052
. Waste name: TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K060
. Waste name: AMMONIA STILL LIME SLUDGE FROM COKING OPERATIONS.

. Waste code: K061
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM THE PRIMARY PRODUCTION OF STEEL IN ELECTRIC FURNACES.

. Waste code: K062
. Waste name: SPENT PICKLE LIQUOR FROM STEEL FINISHING OPERATIONS OF PLANTS THAT PRODUCE IRON OR STEEL.

. Waste code: K064
. Waste name: ACID PLANT BLOWDOWN SLURRY/SLUDGE RESULTING FROM THE THICKENING OF BLOWDOWN SLURRY FROM PRIMARY COPPER PRODUCTION.

. Waste code: K065
. Waste name: SURFACE IMPOUNDMENT SOLIDS CONTAINED IN AND DREDGED FROM SURFACE IMPOUNDMENTS AT PRIMARY LEAD SMELTING FACILITIES.

. Waste code: K066
. Waste name: SLUDGE FROM TREATMENT OF PROCESS WASTEWATER AND OR ACID PLANT BLOWDOWN FROM PRIMARY ZINC PRODUCTION.

. Waste code: K069
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

. Waste code: K071
. Waste name: BRINE PURIFICATION MUDS FROM THE MERCURY CELL PROCESS IN CHLORINE PRODUCTION, IN WHICH SEPARATELY PREPURIFIED BRINE IS NOT USED.

. Waste code: K073
. Waste name: CHLORINATED HYDROCARBON WASTE FROM THE PURIFICATION STEP OF THE DIAPHRAGM CELL PROCESS USING GRAPHITE ANODES IN CHLORINE PRODUCTION.

. Waste code: K083
. Waste name: DISTILLATION BOTTOMS FROM ANILINE PRODUCTION.

. Waste code: K084
. Waste name: WASTEWATER TREATMENT SLUDGES GENERATED DURING THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K085
. Waste name: DISTILLATION OR FRACTIONATION COLUMN BOTTOMS FROM THE PRODUCTION OF CHLOROBENZENES.

. Waste code: K086
. Waste name: SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER

BIOSAN DISPOSAL (Continued) **1018159077**

WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.

. Waste code: K087
. Waste name: DECANTER TANK TAR SLUDGE FROM COKING OPERATIONS.

. Waste code: K088
. Waste name: SPENT POTLINERS FROM PRIMARY ALUMINUM REDUCTION.

. Waste code: K090
. Waste name: EMISSION CONTROL DUST OR SLUDGE FROM FERROCHROMIUMSILICON PRODUCTION

. Waste code: K091
. Waste name: EMISSION CONTROL DUST OR SLUDGE FROM FERROCHROMIUM PRODUCTION

. Waste code: K093
. Waste name: DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.

. Waste code: K094
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.

. Waste code: K095
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K096
. Waste name: HEAVY ENDS FROM THE HEAVY ENDS COLUMN FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K097
. Waste name: VACUUM STRIPPER DISCHARGE FROM THE CHLORDANE CHLORINATOR IN THE PRODUCTION OF CHLORDANE.

. Waste code: K098
. Waste name: UNTREATED PROCESS WASTEWATER FROM THE PRODUCTION OF TOXAPHENE.

. Waste code: K099
. Waste name: UNTREATED WASTEWATER FROM THE PRODUCTION OF 2,4-D.

. Waste code: K100
. Waste name: WASTE LEACHING SOLUTION FROM ACID LEACHING OF EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

. Waste code: K101
. Waste name: DISTILLATION TAR RESIDUES FROM THE DISTILLATION OF ANILINE-BASED COMPOUNDS IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K102
. Waste name: RESIDUE FROM THE USE OF ACTIVATED CARBON FOR DECOLORIZATION IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K103
. Waste name: PROCESS RESIDUES FROM ANILINE EXTRACTION FROM THE PRODUCTION OF

BIOSAN DISPOSAL (Continued) **1018159077**

ANILINE.

. Waste code: K104
. Waste name: COMBINED WASTEWATERS GENERATED FROM NITROBENZENE/ANILINE PRODUCTION.

. Waste code: K105
. Waste name: SEPARATED AQUEOUS STREAM FROM THE REACTOR PRODUCT WASHING STEP IN THE PRODUCTION OF CHLOROBENZENES.

. Waste code: K106
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE MERCURY CELL PROCESS IN CHLORINE PRODUCTION.

. Waste code: K107
. Waste name: COLUMN BOTTOMS FROM PRODUCT SEPARATION FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE (UDMH) FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K108
. Waste name: CONDENSED COLUMN OVERHEADS FROM PRODUCT SEPARATION AND CONDENSED REACTOR VENT GASES FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K109
. Waste name: SPENT FILTER CARTRIDGES FROM PRODUCT PURIFICATION FROM THE PRODUCT OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K110
. Waste name: CONDENSED COLUMN OVERHEADS FROM INTERMEDIATE SEPARATION FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K111
. Waste name: PRODUCT WASHWATERS FROM THE PRODUCTION OF DINITROTOLUENE VIA NITRATION OF TOLUENE.

. Waste code: K112
. Waste name: REACTION BY-PRODUCT WATER FROM THE DRYING COLUMN IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K113
. Waste name: CONDENSED LIQUID LIGHT ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K114
. Waste name: VICINALS FROM THE PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K115
. Waste name: HEAVY ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K116
. Waste name: ORGANIC CONDENSATE FROM THE SOLVENT RECOVERY COLUMN IN THE PRODUCTION OF TOLUENE DIISOCYANATE VIA PHOSGENATION OF TOLUENEDIAMINE.

. Waste code: K117
. Waste name: WASTEWATER FROM THE REACTOR VENT GAS SCRUBBER IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste code: K118
. Waste name: SPENT ADSORBENT SOLIDS FROM PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

. Waste code: K123
. Waste name: PROCESS WASTEWATER (INCLUDING SUPERNATES, FILTRATES, AND WASHWATERS) FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K124
. Waste name: REACTOR VENT SCRUBBER WATER FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K125
. Waste name: FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K126
. Waste name: BAGHOUSE DUST AND FLOOR SWEEPINGS IN MILLING AND PACKAGING OPERATIONS FROM PRODUCTION OR FORMULATION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K131
. Waste name: WASTEWATER FROM THE REACTOR AND SPENT SULFURIC ACID FROM THE ACID DRYER FROM THE PRODUCTION OF METHYL BROMIDE.

. Waste code: K132
. Waste name: SPENT ABSORBENT AND WASTEWATER SEPARATOR SOLIDS FROM THE PRODUCTION OF METHYL BROMIDE.

. Waste code: K136
. Waste name: STILL BOTTOMS FROM THE PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

. Waste code: K140
. Waste name: K140

. Waste code: K141
. Waste name: PROCESS RESIDUES FROM THE RECOVERY OF COAL TAR, INCLUDING, BUT NOT LIMITED TO, TAR COLLECTING SUMP RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL. THIS LISTING DOES NOT INCLUDE K087 (DECANTER TANK SLUDGE FROM COKING OPERATIONS).

. Waste code: K142
. Waste name: TANK STORAGE RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR FROM THE RECOVERY OF COKE BY-PRODUCTS FROM COAL.

. Waste code: K143
. Waste name: PROCESS RESIDUES FROM THE RECOVERY OF LIGHT OIL, INCLUDING, BUT NOT LIMITED TO, THOSE GENERATED IN STILLS, DECANTERS, AND WASH OIL RECOVERY UNITS FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

. Waste code: K144
. Waste name: WASTEWATER SUMP RESIDUES FROM LIGHT OIL REFINING, INCLUDING, BUT NOT LIMITED TO, INTERCEPTING OR CONTAMINATION SUMP SLUDGES FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F004
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F010

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste name: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F011
. Waste name: SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.

. Waste code: F012
. Waste name: QUENCHING WASTEWATER TREATMENT SLUDGES FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

. Waste code: F020
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- OR TETRACHLOROPHENOL OR OF INTERMEDIATES USED TO PRODUCE THEIR PESTICIDE DERIVATIVES. (THIS LISTING DOES NOT INCLUDE WASTES FROM THE PRODUCTION OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

. Waste code: F021
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF PENTACHLOROPHENOL, OR OF INTERMEDIATES USED TO PRODUCE DERIVATIVES.

. Waste code: F022
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENES UNDER ALKALINE CONDITIONS.

. Waste code: F023
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- AND TETRACHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE WASTES FROM EQUIPMENT USED ONLY FOR THE PRODUCTION OR USE OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

. Waste code: F024
. Waste name: PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)

. Waste code: F025

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste name: CONDENSED LIGHT ENDS, SPENT FILTERS AND FILTER AIDS, AND SPENT DESICCANT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION.

. Waste code: F026
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENE UNDER ALKALINE CONDITIONS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: F028
. Waste name: RESIDUES RESULTING FROM THE INCINERATION OR THERMAL TREATMENT OF SOIL CONTAMINATED WITH EPA HAZARDOUS WASTE NOS. F020, F021, F022, F023, F026, AND F027.

. Waste code: F032
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

. Waste code: F034
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F035
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F037
. Waste name: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY

BIOSAN DISPOSAL (Continued) **1018159077**

COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F038
. Waste name: PETROLEUM REFINERY SECONDARY (EMULSIFIED) OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE AND/OR FLOAT GENERATED FROM THE PHYSICAL AND/OR CHEMICAL SEPARATION OF OIL/WATER/SOLIDS IN PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH WASTES INCLUDE, BUT ARE NOT LIMITED TO, ALL SLUDGES AND FLOATS GENERATED IN INDUCED AIR FLOTATION (IAF) UNITS, TANKS AND IMPOUNDMENTS, AND ALL SLUDGES GENERATED IN DAF UNITS. SLUDGES GENERATED IN STORMWATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND F037, K048, AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F039
. Waste name: LEACHATE RESULTING FROM THE TREATMENT, STORAGE, OR DISPOSAL OF WASTES CLASSIFIED BY MORE THAN ONE WASTE CODE UNDER SUBPART D, OR FROM A MIXTURE OF WASTES CLASSIFIED UNDER SUBPARTS C AND D OF THIS PART. (LEACHATE RESULTING FROM THE MANAGEMENT OF ONE OR MORE OF THE FOLLOWING EPA HAZARDOUS WASTES AND NO OTHER HAZARDOUS WASTES RETAINS ITS HAZARDOUS WASTE CODE(S): F020, F021, F022, F023, F026, F027, AND/OR F028.)

. Waste code: K001
. Waste name: BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: K002
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME YELLOW AND ORANGE PIGMENTS.

. Waste code: K003
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF MOLYBDATE ORANGE PIGMENTS.

. Waste code: K004
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF ZINC YELLOW PIGMENTS.

. Waste code: K005
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME GREEN PIGMENTS.

. Waste code: K006
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME OXIDE GREEN

BIOSAN DISPOSAL (Continued) **1018159077**

PIGMENTS (ANHYDROUS AND HYDRATED).

. Waste code: K007
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF IRON BLUE PIGMENTS.

. Waste code: K008
. Waste name: OVEN RESIDUE FROM THE PRODUCTION OF CHROME OXIDE GREEN PIGMENTS.

. Waste code: K009
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

. Waste code: K010
. Waste name: DISTILLATION SIDE CUTS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

. Waste code: K011
. Waste name: BOTTOM STREAM FROM THE WASTEWATER STRIPPER IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K013
. Waste name: BOTTOM STREAM FROM THE ACETONITRILE COLUMN IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K014
. Waste name: BOTTOMS FROM THE ACETONITRILE PURIFICATION COLUMN IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K015
. Waste name: STILL BOTTOMS FROM THE DISTILLATION OF BENZYL CHLORIDE.

. Waste code: K016
. Waste name: HEAVY ENDS OR DISTILLATION RESIDUES FROM THE PRODUCTION OF CARBON TETRACHLORIDE.

. Waste code: K017
. Waste name: HEAVY ENDS (STILL BOTTOMS) FROM THE PURIFICATION COLUMN IN THE PRODUCTION OF EPICHLOROHYDRIN.

. Waste code: K018
. Waste name: HEAVY ENDS FROM THE FRACTIONATION COLUMN IN ETHYL CHLORIDE PRODUCTION.

. Waste code: K019
. Waste name: HEAVY ENDS FROM THE DISTILLATION OF ETHYLENE DICHLORIDE IN ETHYLENE DICHLORIDE PRODUCTION.

. Waste code: K020
. Waste name: HEAVY ENDS FROM THE DISTILLATION OF VINYL CHLORIDE IN VINYL CHLORIDE MONOMER PRODUCTION.

. Waste code: K021
. Waste name: AQUEOUS SPENT ANTIMONY CATALYST WASTE FROM FLUOROMETHANE PRODUCTION.

. Waste code: K022
. Waste name: DISTILLATION BOTTOM TARS FROM THE PRODUCTION OF PHENOL/ACETONE FROM CUMENE.

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste code: K023
. Waste name: DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.

. Waste code: K024
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.

. Waste code: K025
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF NITROBENZENE BY THE NITRATION OF BENZENE.

. Waste code: K026
. Waste name: STRIPPING STILL TAILS FROM THE PRODUCTION OF METHYL ETHYL PYRIDINES.

. Waste code: K027
. Waste name: CENTRIFUGE AND DISTILLATION RESIDUES FROM TOLUENE DIISOCYANATE PRODUCTION.

. Waste code: K028
. Waste name: SPENT CATALYST FROM THE HYDROCHLORINATOR REACTOR IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K029
. Waste name: WASTE FROM THE PRODUCT STEAM STRIPPER IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K030
. Waste name: COLUMN BOTTOMS OR HEAVY ENDS FROM THE COMBINED PRODUCTION OF TRICHLOROETHYLENE AND PERCHLOROETHYLENE.

. Waste code: K031
. Waste name: BY-PRODUCT SALTS GENERATED IN THE PRODUCTION OF MSMA AND CACODYLIC ACID.

. Waste code: K032
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHLORDANE.

. Waste code: K033
. Waste name: WASTEWATER AND SCRUB WATER FROM THE CHLORINATION OF CYCLOPENTADIENE IN THE PRODUCTION OF CHLORDANE.

. Waste code: K034
. Waste name: FILTER SOLIDS FROM THE FILTRATION OF HEXACHLOROCYCLOPENTADIENE IN THE PRODUCTION OF CHLORDANE.

. Waste code: K035
. Waste name: WASTEWATER TREATMENT SLUDGES GENERATED IN THE PRODUCTION OF CREOSOTE.

. Waste code: K036
. Waste name: STILL BOTTOMS FROM TOLUENE RECLAMATION DISTILLATION IN THE PRODUCTION OF DISULFOTON.

. Waste code: K037
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE PRODUCTION OF DISULFOTON.

. Waste code: K038

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste name: WASTEWATER FROM THE WASHING AND STRIPPING OF PHORATE PRODUCTION.

. Waste code: K039
. Waste name: FILTER CAKE FROM THE FILTRATION OF DIETHYLPHOSPHORODITHIOIC ACID IN THE PRODUCTION OF PHORATE.

. Waste code: K040
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF PHORATE.

. Waste code: K041
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF TOXAPHENE.

. Waste code: K042
. Waste name: HEAVY ENDS OR DISTILLATION RESIDUES FROM THE DISTILLATION OF TETRACHLOROBENZENE IN THE PRODUCTION OF 2,4,5-T.

. Waste code: K043
. Waste name: 2,6-DICHLOROPHENOL WASTE FROM THE PRODUCTION OF 2,4-D.

. Waste code: K044
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING AND PROCESSING OF EXPLOSIVES.

. Waste code: K045
. Waste name: SPENT CARBON FROM THE TREATMENT OF WASTEWATER CONTAINING EXPLOSIVES.

. Waste code: K046
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING, FORMULATION, AND LOADING OF LEAD-BASED INITIATING COMPOUNDS.

. Waste code: K047
. Waste name: PINK/RED WATER FROM TNT OPERATIONS.

. Waste code: K048
. Waste name: DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K049
. Waste name: SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K050
. Waste name: HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K051
. Waste name: API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K052
. Waste name: TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K060
. Waste name: AMMONIA STILL LIME SLUDGE FROM COKING OPERATIONS.

. Waste code: K061
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM THE PRIMARY PRODUCTION OF STEEL IN ELECTRIC FURNACES.

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste code: K062
. Waste name: SPENT PICKLE LIQUOR FROM STEEL FINISHING OPERATIONS OF PLANTS THAT PRODUCE IRON OR STEEL.

. Waste code: K064
. Waste name: ACID PLANT BLOWDOWN SLURRY/SLUDGE RESULTING FROM THE THICKENING OF BLOWDOWN SLURRY FROM PRIMARY COPPER PRODUCTION.

. Waste code: K065
. Waste name: SURFACE IMPOUNDMENT SOLIDS CONTAINED IN AND DREDGED FROM SURFACE IMPOUNDMENTS AT PRIMARY LEAD SMELTING FACILITIES.

. Waste code: K066
. Waste name: SLUDGE FROM TREATMENT OF PROCESS WASTEWATER AND OR ACID PLANT BLOWDOWN FROM PRIMARY ZINC PRODUCTION.

. Waste code: K069
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

. Waste code: K071
. Waste name: BRINE PURIFICATION MUDS FROM THE MERCURY CELL PROCESS IN CHLORINE PRODUCTION, IN WHICH SEPARATELY PREPURIFIED BRINE IS NOT USED.

. Waste code: K073
. Waste name: CHLORINATED HYDROCARBON WASTE FROM THE PURIFICATION STEP OF THE DIAPHRAGM CELL PROCESS USING GRAPHITE ANODES IN CHLORINE PRODUCTION.

. Waste code: K083
. Waste name: DISTILLATION BOTTOMS FROM ANILINE PRODUCTION.

. Waste code: K084
. Waste name: WASTEWATER TREATMENT SLUDGES GENERATED DURING THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K085
. Waste name: DISTILLATION OR FRACTIONATION COLUMN BOTTOMS FROM THE PRODUCTION OF CHLOROBENZENES.

. Waste code: K086
. Waste name: SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.

. Waste code: K087
. Waste name: DECANTER TANK TAR SLUDGE FROM COKING OPERATIONS.

. Waste code: K088
. Waste name: SPENT POTLINERS FROM PRIMARY ALUMINUM REDUCTION.

. Waste code: K090
. Waste name: EMISSION CONTROL DUST OR SLUDGE FROM FERROCHROMIUMSILICON PRODUCTION

. Waste code: K091
. Waste name: EMISSION CONTROL DUST OR SLUDGE FROM FERROCHROMIUM PRODUCTION

. Waste code: K093

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste name: DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.

. Waste code: K096
. Waste name: HEAVY ENDS FROM THE HEAVY ENDS COLUMN FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K097
. Waste name: VACUUM STRIPPER DISCHARGE FROM THE CHLORDANE CHLORINATOR IN THE PRODUCTION OF CHLORDANE.

. Waste code: K098
. Waste name: UNTREATED PROCESS WASTEWATER FROM THE PRODUCTION OF TOXAPHENE.

. Waste code: K099
. Waste name: UNTREATED WASTEWATER FROM THE PRODUCTION OF 2,4-D.

. Waste code: K100
. Waste name: WASTE LEACHING SOLUTION FROM ACID LEACHING OF EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

. Waste code: K101
. Waste name: DISTILLATION TAR RESIDUES FROM THE DISTILLATION OF ANILINE-BASED COMPOUNDS IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K102
. Waste name: RESIDUE FROM THE USE OF ACTIVATED CARBON FOR DECOLORIZATION IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K103
. Waste name: PROCESS RESIDUES FROM ANILINE EXTRACTION FROM THE PRODUCTION OF ANILINE.

. Waste code: K104
. Waste name: COMBINED WASTEWATERS GENERATED FROM NITROBENZENE/ANILINE PRODUCTION.

. Waste code: K105
. Waste name: SEPARATED AQUEOUS STREAM FROM THE REACTOR PRODUCT WASHING STEP IN THE PRODUCTION OF CHLOROBENZENES.

. Waste code: K106
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE MERCURY CELL PROCESS IN CHLORINE PRODUCTION.

. Waste code: K107
. Waste name: COLUMN BOTTOMS FROM PRODUCT SEPARATION FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE (UDMH) FROM CARBOXYLIC ACID HYDRAZIDES.

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste code: K108
. Waste name: CONDENSED COLUMN OVERHEADS FROM PRODUCT SEPARATION AND CONDENSED REACTOR VENT GASES FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K109
. Waste name: SPENT FILTER CARTRIDGES FROM PRODUCT PURIFICATION FROM THE PRODUCT OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K110
. Waste name: CONDENSED COLUMN OVERHEADS FROM INTERMEDIATE SEPARATION FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K111
. Waste name: PRODUCT WASHWATERS FROM THE PRODUCTION OF DINITROTOLUENE VIA NITRATION OF TOLUENE.

. Waste code: K112
. Waste name: REACTION BY-PRODUCT WATER FROM THE DRYING COLUMN IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K113
. Waste name: CONDENSED LIQUID LIGHT ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K114
. Waste name: VICINALS FROM THE PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K115
. Waste name: HEAVY ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K116
. Waste name: ORGANIC CONDENSATE FROM THE SOLVENT RECOVERY COLUMN IN THE PRODUCTION OF TOLUENE DIISOCYANATE VIA PHOSGENATION OF TOLUENEDIAMINE.

. Waste code: K117
. Waste name: WASTEWATER FROM THE REACTOR VENT GAS SCRUBBER IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

. Waste code: K118
. Waste name: SPENT ADSORBENT SOLIDS FROM PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

. Waste code: K123
. Waste name: PROCESS WASTEWATER (INCLUDING SUPERNATES, FILTRATES, AND WASHWATERS) FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K124
. Waste name: REACTOR VENT SCRUBBER WATER FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K125
. Waste name: FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

BIOSAN DISPOSAL (Continued) **1018159077**

. Waste code: K126
. Waste name: BAGHOUSE DUST AND FLOOR SWEEPINGS IN MILLING AND PACKAGING OPERATIONS FROM PRODUCTION OR FORMULATION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K131
. Waste name: WASTEWATER FROM THE REACTOR AND SPENT SULFURIC ACID FROM THE ACID DRYER FROM THE PRODUCTION OF METHYL BROMIDE.

. Waste code: K132
. Waste name: SPENT ABSORBENT AND WASTEWATER SEPARATOR SOLIDS FROM THE PRODUCTION OF METHYL BROMIDE.

. Waste code: K136
. Waste name: STILL BOTTOMS FROM THE PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

. Waste code: K140
. Waste name: K140

. Waste code: K141
. Waste name: PROCESS RESIDUES FROM THE RECOVERY OF COAL TAR, INCLUDING, BUT NOT LIMITED TO, TAR COLLECTING SUMP RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL. THIS LISTING DOES NOT INCLUDE K087 (DECANTER TANK SLUDGE FROM COKING OPERATIONS).

. Waste code: K142
. Waste name: TANK STORAGE RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR FROM THE RECOVERY OF COKE BY-PRODUCTS FROM COAL.

. Waste code: K143
. Waste name: PROCESS RESIDUES FROM THE RECOVERY OF LIGHT OIL, INCLUDING, BUT NOT LIMITED TO, THOSE GENERATED IN STILLS, DECANTERS, AND WASH OIL RECOVERY UNITS FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

. Waste code: K144
. Waste name: WASTEWATER SUMP RESIDUES FROM LIGHT OIL REFINING, INCLUDING, BUT NOT LIMITED TO, INTERCEPTING OR CONTAMINATION SUMP SLUDGES FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

. Waste code: K145
. Waste name: RESIDUES FROM NAPHTHALENE COLLECTION AND RECOVERY OPERATIONS FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

. Waste code: K147
. Waste name: TAR STORAGE RESIDUES FROM COAL TAR REFINING.

. Waste code: K148
. Waste name: RESIDUES FROM COAL TAR DISTILLATION, INCLUDING, BUT NOT LIMITED TO, STILL BOTTOMS.

. Waste code: K149
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, RING-CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS. [THIS WASTE DOES

BIOSAN DISPOSAL (Continued) **1018159077**

NOT INCLUDE STILL BOTTOMS FROM THE DISTILLATION OF BENZOYL CHLORIDE]

. Waste code: K150
. Waste name: ORGANIC RESIDULES EXCLUDING SPENT CARBON ADSORBENT, FROM THE SPENT CHLORINE GAS AND HYDROCHLORIC ACID RECOVERY PROCESSES ASSOCIATED WITH THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

. Waste code: K151
. Waste name: WASTEWATER TREATMENT SLUDGES, EXCLUDING NEUTRALIZATION AND BIOLOGICAL SLUDGES, GENERATED DURING THE TREATMENT OF WASTEWATERS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

. Waste code: K156
. Waste name: ORGANIC WASTE (INCLUDING HEAVY ENDS, STILL BOTTOMS, LIGHT ENDS, SPENT SOLVENTS, FILTRATES, AND DECANTATES) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K157
. Waste name: WASTEWATERS (INCLUDING SCRUBBER WATERS, CONDENSER WATERS, WASHWATERS, AND SEPARATION WATERS) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K158
. Waste name: BAG HOUSE DUSTS AND FILTER/SEPARATION SOLIDS FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K159
. Waste name: ORGANICS FROM THE TREATMENT OF THIOCARBAMATE WASTES.

. Waste code: K160
. Waste name: K160

. Waste code: K161
. Waste name: PURIFICATION SOLIDS (INCLUDING FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS), BAG HOUSE DUST AND FLOOR SWEEPINGS FROM THE PRODUCTION OF DITHIOCARBAMATE ACIDS AND THEIR SALTS. (THIS LISTING DOES NOT INCLUDE K125 OR K126).

. Waste code: K169
. Waste name: CRUDE OIL STORAGE TANK SEDIMENT FROM PETROLEUM REFINING OPERATIONS

. Waste code: K170
. Waste name: CLARIFIED SLURRY OIL TANK SEDIMENT AND/OR IN-LINE FILTER/SEPARATION SOLIDS FROM PETROLEUM REFINING OPERATIONS

. Waste code: K171
. Waste name: SPENT HYDROTREATING CATALYST FROM PETROLEUM REFINING OPERATIONS,INCLUDING GUARD BEDS USED TO DESULFURIZE FEEDS TO OTHER CATALYTIC REACTORS (THIS LISTING DOES NOT INCLUDE INERT SUPPORT MEDIA)

. Waste code: K172
. Waste name: SPENT HYDROREFINING CATALYST FROM PETROLEUM REFINING OPERATIONS, INCLUDING GUARD BEDS USED TO DESULFURIZE FEEDS TO OTHER CATALYTIC REACTORS (THIS LISTING DOES NOT INCLUDE INERT SUPPORT MEDIA)

FINDS:

Registry ID: 110004318998

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110009483095

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110014387831

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Update By:	ALLOPES
Site Description:	Location The Site address is 157 Great Arrow Avenue, Buffalo, New York, 14207. The Site is land-locked with no frontage on Great Arrow Avenue or any other street. Rather, it is an internal portion of the larger former Pierce Arrow motor car manufacturing facility. Located in an urban setting, the site is bounded as follows: North: by Conrail railroad property; East: by vacant land of the Tapestry Charter School; South: by Buildings G and I of the Pierce Arrow Manufacturing facility; West: by Building C of the former Pierce Arrow Manufacturing facility. Site Features The single prominent site feature is a long four-story building known as Building D of the former Pierce Arrow facility. Building D is approximately 400 feet long (east/west) and 60 feet wide (north/south). Building D is currently vacant and abandoned. North and south of Building D are large open areas that are mostly covered with asphalt pavement. A raised berm of soil/fill is present along the entire northern wooded site boundary. A long narrow (north/south) arm of the site projects southward from the western end of Building D and occupies an asphalt

157 GREAT ARROW AVENUE (Continued) **S121933775**

covered corridor between Buildings C and E. The total parcel size is 4.36 acres, with approximately 0.65 acres covered by Building D and the remaining 3.71 acres consisting of open space. Current Zoning and Land Use Under the City of Buffalo Green Code (passed on April 3, 2017) the site parcel is depicted as zoned N-1S for Secondary Employment Centers. The land use of the Site is listed as commercial but it is currently vacant. Land uses of surrounding parcels include: Rail to the north; Vacant land to the east; Commercial to the south and west; The parcel that is surrounded by the Site on three sides is listed as industrial use. The nearest residential lot is approximately 365 feet to the south on Elmhurst Place. Past Use of the Site The Site is part of the former Pierce Arrow Automotive Facility at which cars were manufactured from approximately 1906 to 1938. The subject site contains one large building, Building D. Several smaller storage buildings once occupied areas to the north and south of Building D, however over the years these other buildings have all been removed, leaving just Building D on the present 4.32-acre Site. Building D was built in 1916 and has four stories reportedly used for the following purposes: First Floor: warehousing, shipping, and receiving; Second Floor: machine shop; Third Floor: machine shop; and Fourth Floor: tin shop. Building D was built slab floor on grade with no basement, however a raised loading dock adjoins the entire northern and eastern exterior walls of the building. The loading dock is hollow and within it exists significant solid waste debris including auto tires. Site Geology and Hydrogeology The following description of site geology and hydrogeology was based on the findings from 33 environmental soil borings (20 by LCS and 13 by GZA) advanced on Site to date. Borings were drilled to a depth of 8 feet at most locations. Three borings located near the former boiler along the east side of Building C, were advanced to a depth of 12 feet. Weathered asphalt pavement covers nearly the entire Site exterior of Building D. Beneath this asphalt pavement a layer of urban fill material was encountered at all drilling locations. The fill layer is described as sand and gravel with traces of anthropogenic material including wood, brick, glass, and ash. Evidence of slag was not noted at any of the 33 on-Site boring locations. Thickness of the fill ranged from 0.5 feet to 13 feet, with most borings encountering fill at thicknesses ranging between 0.5 and 5.0 feet. Fill material was not observed beneath Building D. Beneath the fill layer at all drilling locations, a native silty clay soil was encountered. The silty clay was described as brown native silty clay with traces of gravel and sand. The silty clay was reported directly beneath the Building D concrete floor. The silty clay was the deepest geologic layer observed at the boring locations which attained a maximum depth of 12 feet bgs. Bedrock was not encountered. Groundwater was encountered in 8 of 33 borings drilled on the Site. Where encountered, the depth to groundwater ranged from 1.5 and 12 feet bgs with most showings of water at the 4.0 to 6.0 foot depth range. The discontinuous presence of groundwater indicates that where present it is perched and not indicative of an aquifer.

Env Problem: Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was JFO 07/31/02 JFO ON SITE MET WITH JOE COVENY AND PETER HITCHCOCK BOTH OF ELMWOOD TANK. THEY ARE REMOVING 2 10K #6 FO TANKS. THERE IS COMTAM IN THE PIT. THEY WILL DIG TO CLEAN IF POSSIBLE. THE SOIL IS BEING STAGED ON SITE ON PLASTIC. THE PIPING THAT LEADS FROM THE TANKS TO THE BOILER IS DOUBLE WALLED AND RUNS UNDER A CONCRETE RAMP. THE PIPING IS DRAINED AND WILL BE LEFT IN PLACE. I WILL CHECK BACK TOMORROW. 08/01/02 JFO ON SITE MET WITH JOE AND PETER. THE TANKS ARE OUT OF THE GROUND. THE HOLE LOOKS OK. THE FLOOR OF THE EXCAVATION IS A CLEAN CONCRETE PAD. THERE WILL BE NO BOTTOM SAMPLE RESULT. SAMPLES FROM THE 4 SIDEWALLS WERE COLLECTED AND WILL BE ANALYZED FOR 8021 & 8270. RESULTS AND RECEIPTS TO FOLLOW. 09/25/02 JFO RECEIVED THE CLOSURE REPORT FROM PETER HITCHCOCK OF ELMWOOD TANK. ANALYTICAL RESULTS ARE BELOW DETECTION AND THE DISPOSAL RECEIPTS FOR 301 TONS OF CONTAM SOIL ARE ATTACHED. NO FURTHER ACTION REQUIRED. CLOSED"
Remarks:	"CALLER SAID THAT DURING TANK REMOVAL, EXCAVATED SOIL WAS OBSERVED TO BE STAINED. ELMWOOD TANK IS STAGING CONTAMINATED SOIL ON PLASTIC. "

Date Record Added: 11/10/2017
Date Rec Updated: 12/27/2017
Updated By: JSWALIA
Site Description: Location: The 2.35 acre site consists of two contiguous parcels (155-157 Chandler Street) in the City of Buffalo. The site is bound to the north by Chandler Street, to the west by Manton Place, to the south by Grote Street and to the east by residential properties. The property is located within a mixed industrial, commercial, and residential area. Site Features: The 155 Chandler parcel is improved with one 65,000 square foot building which surrounds a large 22,000 square foot brick and gravel courtyard. The 157 Chandler parcel is a vacant gravel lot. Current Zoning and Land Use: The site properties are currently zoned light industrial and they are vacant. Past Uses of the Site: The site has been used for operations such as machining, gas manufacturing and other manufacturing since the early 1900s. The structure was originally constructed in 1907 and utilized as a factory occupied by Linde Air Products until the early 1950s. Bell Aircraft Corporation was located at the site in the early/mid 1950s. In 1958, the building was purchased by Donald Rosen and utilized for G & R Machinery (machine shop) from approximately 1959 through at least the 1990s. The property was owned by Donald Rosen from 1958 through 1990, and by Irving Rosen from 1990 through 2005. The site was purchased by Ontario Equipment Co. in 2005 and R& M Leasing, LLC in 2017. Site Geology and Hydrogeology: The overburden soils encountered at the site consist of approximately 2 to 4 feet of granular and cohesive fill material. Silty clay lies below the fill material. A perched groundwater condition is present at the fill/native interceptor at three to four feet below ground surface. Groundwater was not encountered within the silty clay. The shallow regional groundwater flows in a southwesterly direction toward Scajaquada Creek located approximately 0.35 miles south and toward the Niagara River located approximately 1.25 miles west of the Site.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were polychlorinated biphenyls (PCBs) and lead in soil and chlorinated volatile organic compounds in sub-slab and indoor air. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use and a vapor mitigation system has been installed. Residual contamination in the soil and monitoring of the vapor mitigation system is being managed under a Site Management Plan
Health Problem: Direct contact with contaminants in the soil is unlikely because contaminated soil was excavated and disposed of off-site. People are

PIERCE ARROW BUSINESS CENTER (Continued) **S120706191**

not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system (systems that ventilate/remove the air beneath the building) has been installed beneath a portion of the on-site building to prevent the indoor air quality from being affected by the contamination in the soil vapor beneath the building. However, additional evaluations are necessary to determine if there is a potential for soil vapor intrusion within the remaining portions of the building. Sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 535657
Site Description: Location: The 2.35 acre site consists of two contiguous parcels (155-157 Chandler Street) in the City of Buffalo. The site is bound to the north by Chandler Street, to the west by Manton Place, to the south by Grote Street and to the east by residential properties. The property is located within a mixed industrial, commercial, and residential area. Site Features: The 155 Chandler parcel is improved with one 65,000 square foot building which surrounds a large 22,000 square foot brick and gravel courtyard. The 157 Chandler parcel is a vacant gravel lot. Current Zoning and Land Use: The site properties are currently zoned light industrial and they are vacant. Past Uses of the Site: The site has been used for operations such as machining, gas manufacturing and other manufacturing since the early 1900s. The structure was originally constructed in 1907 and utilized as a factory occupied by Linde Air Products until the early 1950s. Bell Aircraft Corporation was located at the site in the early/mid 1950s. In 1958, the building was purchased by Donald Rosen and utilized for G & R Machinery (machine shop) from approximately 1959 through at least the 1990s. The property was owned by Donald Rosen from 1958 through 1990, and by Irving Rosen from 1990 through 2005. The site was purchased by Ontario Equipment Co. in 2005 and R& M Leasing, LLC in 2017. Site Geology and Hydrogeology: The overburden soils encountered at the site consist of approximately 2 to 4 feet of granular and cohesive fill material. Silty clay lies below the fill material. A perched groundwater condition is present at the fill/native interceptor at three to four feet below ground surface. Groundwater was not encountered within the silty clay. The shallow regional groundwater flows in a southwesterly direction toward Scajaquada Creek located approximately 0.35 miles south and toward the Niagara River located approximately 1.25 miles west of the Site.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were polychlorinated biphenyls (PCBs) and lead in soil and chlorinated volatile organic compounds in sub-slab and indoor air. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use and a vapor mitigation system has been installed. Residual contamination in the soil and monitoring of the vapor mitigation system is being managed under a Site Management Plan
Health Problem: Direct contact with contaminants in the soil is unlikely because contaminated soil was excavated and disposed of off-site. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system (systems that ventilate/remove the air beneath the building) has been installed beneath a portion of the on-site building to prevent the indoor air quality from being affected by the contamination in the soil vapor beneath the building. However, additional evaluations are necessary to determine if there is a potential for soil vapor intrusion within

PIERCE ARROW BUSINESS CENTER (Continued) **S120706191**

the remaining portions of the building. Sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 535657
Site Description: Location: The 2.35 acre site consists of two contiguous parcels (155-157 Chandler Street) in the City of Buffalo. The site is bound to the north by Chandler Street, to the west by Manton Place, to the south by Grote Street and to the east by residential properties. The property is located within a mixed industrial, commercial, and residential area. Site Features: The 155 Chandler parcel is improved with one 65,000 square foot building which surrounds a large 22,000 square foot brick and gravel courtyard. The 157 Chandler parcel is a vacant gravel lot. Current Zoning and Land Use: The site properties are currently zoned light industrial and they are vacant. Past Uses of the Site: The site has been used for operations such as machining, gas manufacturing and other manufacturing since the early 1900s. The structure was originally constructed in 1907 and utilized as a factory occupied by Linde Air Products until the early 1950s. Bell Aircraft Corporation was located at the site in the early/mid 1950s. In 1958, the building was purchased by Donald Rosen and utilized for G & R Machinery (machine shop) from approximately 1959 through at least the 1990s. The property was owned by Donald Rosen from 1958 through 1990, and by Irving Rosen from 1990 through 2005. The site was purchased by Ontario Equipment Co. in 2005 and R& M Leasing, LLC in 2017. Site Geology and Hydrogeology: The overburden soils encountered at the site consist of approximately 2 to 4 feet of granular and cohesive fill material. Silty clay lies below the fill

PIERCE ARROW BUSINESS CENTER (Continued) **S120706191**

material. A perched groundwater condition is present at the fill/native interceptor at three to four feet below ground surface. Groundwater was not encountered within the silty clay. The shallow regional groundwater flows in a southwesterly direction toward Scajaquada Creek located approximately 0.35 miles south and toward the Niagara River located approximately 1.25 miles west of the Site.

Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were polychlorinated biphenyls (PCBs) and lead in soil and chlorinated volatile organic compounds in sub-slab and indoor air. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use and a vapor mitigation system has been installed. Residual contamination in the soil and monitoring of the vapor mitigation system is being managed under a Site Management Plan

Health Problem: Direct contact with contaminants in the soil is unlikely because contaminated soil was excavated and disposed of off-site. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system (systems that ventilate/remove the air beneath the building) has been installed beneath a portion of the on-site building to prevent the indoor air quality from being affected by the contamination in the soil vapor beneath the building. However, additional evaluations are necessary to determine if there is a potential for soil vapor intrusion within the remaining portions of the building. Sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 548515
Site Description: Location The site consists of one parcel totaling approximately 0.48 acres of land. The site is bound to the south by Chandler Street, to the west by vacant building and lot, and to the north by railroad line and to the east by a vacant lot used for storage. The property is located within an urban area, utilized for industrial, commercial, and residential purposes. Site Features The site parcel is improved with one 43,000 square foot four story building located on the eastern portion of the site. Historic industrial fill and rubble resulting from the demolition of old buildings, as well as piles of soil/debris are located within the western parking area. Current Zoning and Land Use The building is vacant and inactive. 166 Chandler Street is currently zoned Commercial, other storage, warehouse and distribution facility. Past Uses of the Site The structure was originally constructed in 1907 as dairy machine manufacturer with additions to the building in 1909, 1919, 1927, and 1931. Former usages also included grocery, Linde Air Products, Sponge Air Seat Co., and Barcalo Mfg (furniture manufacturer). Several fires occurred during the 1980s and 1990s that resulted in demolition of western portion of building. The building has been vacant for over 20 years. Site Geology and Hydrogeology Based on the soil borings completed during Phase II investigation, approximately 2 to 7.5 feet of granular and cohesive fill material is present throughout the site. The fill material extended to depths of 6 to 7.5 feet below grade in the vacant lot area. Silty clay was encountered below the fill material at six of the soil boring locations, and extended the full depth drilled. Groundwater was not encountered during the subsurface investigation work; with the exception of a perched condition at one hand auger location. Based on a review of the site topographic conditions as depicted on the USGS 7.5 minute Topographic Quadrangle Map of Buffalo NW, New York, shallow regional groundwater flows is expected to flow in a southwesterly direction toward Scajaquada Creek located approximately 0.40 miles south and toward the Niagara River

166 CHANDLER STREET (Continued) **S121102077**

located approximately 1.25 miles west of the Site.

Env Problem: A Remedial Investigation (RI) was completed in September 2018. The soil/fill and groundwater samples were analyzed for Target Compound List (TCL) volatiles organic compounds (VOCs), semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), pesticides, herbicides, and Target Analyte List (TAL) metals. The levels of contamination found in different media were as follows: Sub-surface Soil/fill: Concentrations of VOCs, PCBs,and pesticides were below the restricted residential soil cleanup objectives (RRSCOs). The levels of PAHs exceeding RRSCOs in exterior samples were up to 40 ppm benzo(a)anthracene (SCO-1 ppm), 33 ppm benzo(a)pyrene (SCO-1 ppm), 37 ppm benzo(b)fluoranthene (SCO-1 ppm), 16 ppm benzo(k)fluoranthene (SCO-3.9 ppm), 32 ppm chrysene (SCO-3.9 ppm), 4.7 ppm dibenzo(a,h)anthracene(SCO-0.5 ppm), and 21 ppm indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Among the metals, 513 ppm Barium (SCO-400 ppm), 6.73 ppm cadmium (SCO- 4.3 ppm) exceeded RRSCOs. 3390 ppm copper (SCO-270 ppm), 524 ppm lead (SCO-400 ppm), and 1.24 ppm mercury (SCO- 0.81 ppm). For interior: The concentrations of VOCs, metals, PCBs,and pesticides were below RRSCOs. The PAHs exceeding RRSCOs were up to 2.8 ppm benzo(a)anthracene (SCO-1 ppm), 2.2 ppm benzo(a)pyrene (SCO-1 ppm), 2.5 ppm benzo(b)fluoranthene (SCO-1 ppm), and 1.2 ppm indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Groundwater: The levels of the following contaminants exceeded Groundwater Quality Standards (GWQS): 6.3 ppb 1,1-dichloroethane (GWQS-5 ppb), 8 ppb cis-1,2-dichloroethene (GWQS-5 ppb), 80 ppb acetone (GWQS-50ppb), 0.1 ppb benzo(a)anthracene (GWQS-0.002 ppb); 0.08 ppb benzo(a)pyrene (GWQS - 0 ppb); 0.14 ppb benzo(b)fluoranthene (GWQS-0.002 ppb); 0.05 ppb benzo(k)fluoranthene (GWQS-0.002 ppb); 0.12 ppb chrysene (GW-0.002 ppb); 0.04 ppb indeno(1,2,3-cd)pyrene (GW- 0.002 ppb), 8.6 ppb Bis(2-ethylhexyl)phthalate (GWQS 5 ppb),and 0.148 ppb Beta-BHC (GWQS-0.04 ppb). GWQS also exceeded for dissolved magnesium and manganese. Off-Site: The levels of PAHs, metals (barium -658 ppm, lead -5230 ppm) and PCBs (1.78 ppm) exceeded RRSCOs in off-site sample along the northern boundary of the site. Post IRM: The level of contamination remaining in soil at the site after IRM activities were as follows: The concentrations of VOCs and metals in post excavation confirmatory samples were below the RRSCOs and for SVOCs, PCBs, pesticides, and herbicides the concentrations were below the Unrestricted SCOs.

Health Problem: Contaminated groundwater at the site is not used for drinking or other purposes as the site is served by a public water supply that obtains its water from a source not affected by site contamination. The site is fenced on three sides and rail spur, on the fourth side, thus restricting public access. Interim remedial measures have reduced the potential for contact with site contaminants in soil. Volatile organic compounds in soil vapor (air spaces within the soil), may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site building is vacant, the inhalation of site-related contamination due to soil vapor intrusion does not represent a current concern. The potential exists for inhalation of site contaminants due to soil vapor intrusion for any re-occupied buildings or future on-site development. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

The levels of contamination found in different media were as follows: Sub-surface Soil/fill: Concentrations of VOCs, PCBs,and pesticides were below the restricted residential soil cleanup objectives (RRSCOs). The levels of PAHs exceeding RRSCOs in exterior samples were up to 40 ppm benzo(a)anthracene (SCO-1 ppm), 33 ppm benzo(a)pyrene (SCO-1 ppm), 37 ppm benzo(b)fluoranthene (SCO-1 ppm), 16 ppm benzo(k)fluoranthene (SCO-3.9 ppm), 32 ppm chrysene (SCO-3.9 ppm), 4.7 ppm dibenzo(a,h)anthracene(SCO-0.5 ppm), and 21 ppm indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Among the metals, 513 ppm Barium (SCO-400 ppm), 6.73 ppm cadmium (SCO- 4.3 ppm) exceeded RRSCOs. 3390 ppm copper (SCO-270 ppm), 524 ppm lead (SCO-400 ppm), and 1.24 ppm mercury (SCO- 0.81 ppm). For interior: The concentrations of VOCs, metals, PCBs,and pesticides were below RRSCOs. The PAHs exceeding RRSCOs were up to 2.8 ppm benzo(a)anthracene (SCO-1 ppm), 2.2 ppm benzo(a)pyrene (SCO-1 ppm), 2.5 ppm benzo(b)fluoranthene (SCO-1 ppm), and 1.2 ppm indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Groundwater: The levels of the following contaminants exceeded Groundwater Quality Standards (GWQS): 6.3 ppb 1,1-dichloroethane (GWQS-5 ppb), 8 ppb cis-1,2-dichloroethene (GWQS-5 ppb), 80 ppb acetone (GWQS-50ppb), 0.1 ppb benzo(a)anthracene (GWQS-0.002 ppb); 0.08 ppb benzo(a)pyrene (GWQS - 0 ppb); 0.14 ppb benzo(b)fluoranthene (GWQS-0.002 ppb); 0.05 ppb benzo(k)fluoranthene (GWQS-0.002 ppb); 0.12 ppb chrysene (GW-0.002 ppb); 0.04 ppb indeno(1,2,3-cd)pyrene (GW- 0.002 ppb), 8.6 ppb Bis(2-ethylhexyl)phthalate (GWQS 5 ppb),and 0.148 ppb Beta-BHC (GWQS-0.04 ppb). GWQS also exceeded for dissolved magnesium and manganese. Off-Site: The levels of PAHs, metals (barium -658 ppm, lead -5230 ppm) and PCBs (1.78 ppm) exceeded RRSCOs in off-site sample along the northern boundary of the site. Post IRM: The level of contamination remaining in soil at the site after IRM activities were as follows: The concentrations of VOCs and metals in post excavation confirmatory samples were below the RRSCOs and for SVOCs, PCBs, pesticides, and herbicides the concentrations were below the Unrestricted SCOs.

Health Problem: Contaminated groundwater at the site is not used for drinking or other purposes as the site is served by a public water supply that obtains its water from a source not affected by site contamination. The site is fenced on three sides and rail spur, on the fourth side,

166 CHANDLER STREET (Continued) **S121102077**

thus restricting public access. Interim remedial measures have reduced the potential for contact with site contaminants in soil. Volatile organic compounds in soil vapor (air spaces within the soil), may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site building is vacant, the inhalation of site-related contamination due to soil vapor intrusion does not represent a current concern. The potential exists for inhalation of site contaminants due to soil vapor intrusion for any re-occupied buildings or future on-site development. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 548515
Site Description: Location The site consists of one parcel totaling approximately 0.48 acres of land. The site is bound to the south by Chandler Street, to the west by vacant building and lot, and to the north by railroad line and to the east by a vacant lot used for storage. The property is located within an urban area, utilized for industrial, commercial, and residential purposes. Site Features The site parcel is improved with one 43,000 square foot four story building located on the eastern portion of the site. Historic industrial fill and rubble resulting from the demolition of old buildings, as well as piles of soil/debris are located within the western parking area. Current Zoning and Land Use The building is vacant and inactive. 166 Chandler

166 CHANDLER STREET (Continued) **S121102077**

Street is currently zoned Commercial, other storage, warehouse and distribution facility. Past Uses of the Site The structure was originally constructed in 1907 as dairy machine manufacturer with additions to the building in 1909, 1919, 1927, and 1931. Former usages also included grocery, Linde Air Products, Sponge Air Seat Co., and Barcalo Mfg (furniture manufacturer). Several fires occurred during the 1980s and 1990s that resulted in demolition of western portion of building. The building has been vacant for over 20 years. Site Geology and Hydrogeology Based on the soil borings completed during Phase II investigation, approximately 2 to 7.5 feet of granular and cohesive fill material is present throughout the site. The fill material extended to depths of 6 to 7.5 feet below grade in the vacant lot area. Silty clay was encountered below the fill material at six of the soil boring locations, and extended the full depth drilled. Groundwater was not encountered during the subsurface investigation work; with the exception of a perched condition at one hand auger location. Based on a review of the site topographic conditions as depicted on the USGS 7.5 minute Topographic Quadrangle Map of Buffalo NW, New York, shallow regional groundwater flows is expected to flow in a southwesterly direction toward Scajaquada Creek located approximately 0.40 miles south and toward the Niagara River located approximately 1.25 miles west of the Site.

Env Problem: A Remedial Investigation (RI) was completed in September 2018. The soil/fill and groundwater samples were analyzed for Target Compound List (TCL) volatiles organic compounds (VOCs), semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), pesticides, herbicides, and Target Analyte List (TAL) metals. The levels of contamination found in different media were as follows: Sub-surface Soil/fill: Concentrations of VOCs, PCBs,and pesticides were below the restricted residential soil cleanup objectives (RRSCOs). The levels of PAHs exceeding RRSCOs in exterior samples were up to 40 ppm benzo(a)anthracene (SCO-1 ppm), 33 ppm benzo(a)pyrene (SCO-1 ppm), 37 ppm benzo(b)fluoranthene (SCO-1 ppm), 16 ppm benzo(k)fluoranthene (SCO-3.9 ppm), 32 ppm chrysene (SCO-3.9 ppm), 4.7 ppm dibenzo(a,h)anthracene(SCO-0.5 ppm), and 21 ppm indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Among the metals, 513 ppm Barium (SCO-400 ppm), 6.73 ppm cadmium (SCO- 4.3 ppm) exceeded RRSCOs. 3390 ppm copper (SCO-270 ppm), 524 ppm lead (SCO-400 ppm), and 1.24 ppm mercury (SCO- 0.81 ppm). The levels of contamination found in different media were as follows: Sub-surface Soil/fill: Concentrations of VOCs, PCBs,and pesticides were below the restricted residential soil cleanup objectives (RRSCOs). The levels of PAHs exceeding RRSCOs in exterior samples were up to 40 ppm benzo(a)anthracene (SCO-1 ppm), 33 ppm benzo(a)pyrene (SCO-1 ppm), 37 ppm benzo(b)fluoranthene (SCO-1 ppm), 16 ppm benzo(k)fluoranthene (SCO-3.9 ppm), 32 ppm chrysene (SCO-3.9 ppm), 4.7 ppm dibenzo(a,h)anthracene(SCO-0.5 ppm), and 21 ppm indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Among the metals, 513 ppm Barium (SCO-400 ppm), 6.73 ppm cadmium (SCO- 4.3 ppm) exceeded RRSCOs. 3390 ppm copper (SCO-270 ppm), 524 ppm lead (SCO-400 ppm), and 1.24 ppm mercury (SCO- 0.81 ppm). For interior: The concentrations of VOCs, metals, PCBs,and pesticides were below RRSCOs. The PAHs exceeding RRSCOs were up to 2.8 ppm benzo(a)anthracene (SCO-1 ppm), 2.2 ppm benzo(a)pyrene (SCO-1 ppm), 2.5 ppm benzo(b)fluoranthene (SCO-1 ppm), and 1.2 ppm

166 CHANDLER STREET (Continued) **S121102077**

indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Groundwater: The levels of the following contaminants exceeded Groundwater Quality Standards (GWQS): 6.3 ppb 1,1-dichloroethane (GWQS-5 ppb), 8 ppb cis-1,2-dichloroethene (GWQS-5 ppb), 80 ppb acetone (GWQS-50ppb), 0.1 ppb benzo(a)anthracene (GWQS-0.002 ppb); 0.08 ppb benzo(a)pyrene (GWQS - 0 ppb); 0.14 ppb benzo(b)fluoranthene (GWQS-0.002 ppb); 0.05 ppb benzo(k)fluoranthene (GWQS-0.002 ppb); 0.12 ppb chrysene (GW-0.002 ppb); 0.04 ppb indeno(1,2,3-cd)pyrene (GW- 0.002 ppb), 8.6 ppb Bis(2-ethylhexyl)phthalate (GWQS 5 ppb),and 0.148 ppb Beta-BHC (GWQS-0.04 ppb). GWQS also exceeded for dissolved magnesium and manganese. Off-Site: The levels of PAHs, metals (barium -658 ppm, lead -5230 ppm) and PCBs (1.78 ppm) exceeded RRSCOs in off-site sample along the northern boundary of the site. Post IRM: The level of contamination remaining in soil at the site after IRM activities were as follows: The concentrations of VOCs and metals in post excavation confirmatory samples were below the RRSCOs and for SVOCs, PCBs, pesticides, and herbicides the concentrations were below the Unrestricted SCOs.

Health Problem: Contaminated groundwater at the site is not used for drinking or other purposes as the site is served by a public water supply that obtains its water from a source not affected by site contamination. The site is fenced on three sides and rail spur, on the fourth side, thus restricting public access. Interim remedial measures have reduced the potential for contact with site contaminants in soil. Volatile organic compounds in soil vapor (air spaces within the soil), may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site building is vacant, the inhalation of site-related contamination due to soil vapor intrusion does not represent a current concern. The potential exists for inhalation of site contaminants due to soil vapor intrusion for any re-occupied buildings or future on-site development. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Town:	Buffalo (c)
Record Added Date:	05/15/2017
Record Updated Date:	12/07/2018
Update By:	CRSTANIS
Site Description:	Location The site consists of one parcel totaling approximately 0.48 acres of land. The site is bound to the south by Chandler Street, to the west by vacant building and lot, and to the north by railroad line and to the east by a vacant lot used for storage. The property is located within an urban area, utilized for industrial, commercial, and residential purposes. Site Features The site parcel is improved with one 43,000 square foot four story building located on the eastern portion of the site. Historic industrial fill and rubble resulting from the demolition of old buildings, as well as piles of soil/debris are located within the western parking area. Current Zoning and Land Use The building is vacant and inactive. 166 Chandler Street is currently zoned Commercial, other storage, warehouse and distribution facility. Past Uses of the Site The structure was originally constructed in 1907 as dairy machine manufacturer with additions to the building in 1909, 1919, 1927, and 1931. Former usages also included grocery, Linde Air Products, Sponge Air Seat Co., and Barcalo Mfg (furniture manufacturer). Several fires occurred during the 1980s and 1990s that resulted in demolition of western portion of building. The building has been vacant for over 20 years. Site Geology and Hydrogeology Based on the soil borings completed during Phase II investigation, approximately 2 to 7.5 feet of granular and cohesive fill material is present throughout the site. The fill material extended to depths of 6 to 7.5 feet below grade in the vacant lot area. Silty clay was encountered below the fill material at six of the soil boring locations, and extended the full depth drilled. Groundwater was not encountered during the subsurface investigation work; with the exception of a perched condition at one hand auger location. Based on a review of the site topographic conditions as depicted on the USGS 7.5 minute Topographic Quadrangle Map of Buffalo NW, New York, shallow regional groundwater flows is expected to flow in a southwesterly direction toward Scajaquada Creek located approximately 0.40 miles south and toward the Niagara River located approximately 1.25 miles west of the Site.
Env Problem:	A Remedial Investigation (RI) was completed in September 2018. The soil/fill and groundwater samples were analyzed for Target Compound List (TCL) volatiles organic compounds (VOCs), semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), pesticides, herbicides, and Target Analyte List (TAL) metals. The levels of contamination found in different media were as follows: Sub-surface Soil/fill: Concentrations of VOCs, PCBs,and pesticides were below the restricted residential soil cleanup objectives (RRSCOs). The levels of PAHs exceeding RRSCOs in exterior samples were up to 40 ppm benzo(a)anthracene (SCO-1 ppm), 33 ppm benzo(a)pyrene (SCO-1 ppm), 37 ppm benzo(b)fluoranthene (SCO-1 ppm), 16 ppm benzo(k)fluoranthene (SCO-3.9 ppm), 32 ppm chrysene (SCO-3.9 ppm), 4.7 ppm dibenzo(a,h)anthracene(SCO-0.5 ppm), and 21 ppm indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Among the metals, 513 ppm

166 CHANDLER STREET (Continued) **S121102077**

Barium (SCO-400 ppm), 6.73 ppm cadmium (SCO- 4.3 ppm) exceeded RRSCOs. 3390 ppm copper (SCO-270 ppm), 524 ppm lead (SCO-400 ppm), and 1.24 ppm mercury (SCO- 0.81 ppm). For interior: The concentrations of VOCs, metals, PCBs,and pesticides were below RRSCOs. The PAHs exceeding RRSCOs were up to 2.8 ppm benzo(a)anthracene (SCO-1 ppm), 2.2 ppm benzo(a)pyrene (SCO-1 ppm), 2.5 ppm benzo(b)fluoranthene (SCO-1 ppm), and 1.2 ppm indeno(1,2,3-cd)pyrene (SCO-0.5 ppm). Groundwater: The levels of the following contaminants exceeded Groundwater Quality Standards (GWQS): 6.3 ppb 1,1-dichloroethane (GWQS-5 ppb), 8 ppb cis-1,2-dichloroethene (GWQS-5 ppb), 80 ppb acetone (GWQS-50ppb), 0.1 ppb benzo(a)anthracene (GWQS-0.002 ppb); 0.08 ppb benzo(a)pyrene (GWQS - 0 ppb); 0.14 ppb benzo(b)fluoranthene (GWQS-0.002 ppb); 0.05 ppb benzo(k)fluoranthene (GWQS-0.002 ppb); 0.12 ppb chrysene (GW-0.002 ppb); 0.04 ppb indeno(1,2,3-cd)pyrene (GW- 0.002 ppb), 8.6 ppb Bis(2-ethylhexyl)phthalate (GWQS 5 ppb),and 0.148 ppb Beta-BHC (GWQS-0.04 ppb). GWQS also exceeded for dissolved magnesium and manganese. Off-Site: The levels of PAHs, metals (barium -658 ppm, lead -5230 ppm) and PCBs (1.78 ppm) exceeded RRSCOs in off-site sample along the northern boundary of the site. Post IRM: The level of contamination remaining in soil at the site after IRM activities were as follows: The concentrations of VOCs and metals in post excavation confirmatory samples were below the RRSCOs and for SVOCs, PCBs, pesticides, and herbicides the concentrations were below the Unrestricted SCOs.

Health Problem: Contaminated groundwater at the site is not used for drinking or other purposes as the site is served by a public water supply that obtains its water from a source not affected by site contamination. The site is fenced on three sides and rail spur, on the fourth side, thus restricting public access. Interim remedial measures have reduced the potential for contact with site contaminants in soil. Spiller Name: LEON SMITH
Spiller Company: NIAGARA LUBRICANT
Spiller Address: 164 CHANDLER ST
Spiller Company: 999
Contact Name: TOM FITZPATRICK
DEC Memo: "07/13/11 TDJ 6:45AM WENT TO LOCATION WHERE FIRE IN A THREE STORY PETROLEUM PRODUCTION FACILITY WAS BEING FOUGHT. FIREFIGHTERS WERE FIGHTING IT FROM THE EXTERIOR DUE TO THE TANKS, DRUMS AND PETROLEUM PRODUCTS STORED THROUGHOUT AND HOW QUICKLY IT SPREAD. AS THE FIRE PROGRESSED TO ALL FLOORS FOAM WAS BROUGHT ONSITE FROM THE AIRPORT AND AIRFORCE BASE TO SUPPRESS THE FLAMES. A FLOW OF PETROLEUM BEGAN FLOWING ON THE WATER AND FOAM SOLUTION BEHIND THE FACILITY ON THE CSX RAIL LINE ACCESS ROAD. MIKE BETHGE OF CSX CONTACTED OP-TECH TO BRING A CREW TO CONTAIN AND REMOVE OILY WATER FROM THE RAIL LINE DURING THE FIRE. AS WATER/FOAM SOLUTION BEGAN TO FLOW DOWN CHANDLER STREET MIKE DIRECTED OP-TECH TO PLACE BOOMS AND PADS UNDER CSX CONTRACT. 1145AM FIREFIGHTERS BREAK FOR FOOD/WATER AS FIRE CONTINUES TO REKINDLE EVERY CHANCE SUPPRESSANT IS NOT ADDED. HEAVY BLACK SMOKE IN AIR. OILY WATER ON CHANDLER IS BEING CONTAINED BY PADS AND BOOMS BUT RESIDUAL IS REACHING COMBINED BUFFALO SEWER SYSTEM. WASTEWATER REPS. WERE CONTACTED AND STATED THEY COULD TAKE ANY MATERIAL IN FLOW. VAC TRUCK AND FRAC TANK ONSITE COLLECTING PETROLEUM ALONG CSX PROPERTY. APPROX. 3:00 PM SIDE LOADING DOCK COLLAPSED FROM FIRE DAMAGE. FIRE BURNING ON ALL FLOORS. FLOW ON STREET INCREASED WITH ADDITIONAL LADDER TRUCK WATER USE. APPROX 5:00 ROOF COLLAPSE CAUSES BRICK TO FALL ON POWER LINES CAUSING X-FORMER TO COLLAPSE TO STREET SPILLING FLUID. EXTRA PADS AROUND THAT AREA. EXPLOSIONS HEARD INSIDE FROM TANKS OR DRUMS. APPROX. 8:00PM FIRE IS STARTING TO BE CONTAINED. THREE LADDER TRUCKS ADD CONSTANT WATER TO THIRD AND SECOND FLOOR TO STOP HOT SPOTS. WATER INCREASES TO FLOW DOWN ENTIRE STREET TO FIRST SIDE STREET. PADS FLOWING WITH PRESSURE AND BEING CAUGHT IN STORM DRAINS. I BEGAN CLEARING PADS ONCE FLOW WAS DOWN TO MILITARY AVE. APPROX 11:00PM MINIMAL WATER ADDING TO BUILDING. LEFT SITE. 7/14/11 FG ON SITE WITH TDJ. FIRE IS OUT. ATF AND BUFFALO FIRE ARE IN CHARGE OF THE SCENE. SOME WALLS AND ALL WINDOWS OF THE BRICK NIAGARA LUBICANT STRUCTURE ARE DOWN. ONLY THE SUPPORTING STRUCTURE AND THE FLOORS REMAIN. OIL IS PRESENT ON THE STREETS, AND SURROUNDING THE BUILDING AND ALONG THE RAILROAD BEHIND THE BUILDING. FG SPOKE WITH MIKE BETHGE WITH CSX. HE HAS OP TECH ON SITE CONDUCTING A CLEANUP OF THE RUNOFF FROM THE FIRE ONTO THE RAILROAD RIGHT OF WAY. FG TOLD MR. BETHGE THAT HE DID NOT HAVE TO COMPLETE THIS WORK AND THE NYSDEC WOULD COMPLETE IT. HE SAID THE RAILROAD UNDERSTOOD AND WANTED TO COMPLETE THE WORK WITH THEIR CONTRACTORS. WHILE COMPLETING A WALKOVER OF THE SITE WITH TDJ, THE SOLES OF FG'S WORK BOOTS DEGRADED AND WERE COMPLETELY GONE IN AREAS BECAUSE OF THE OIL/PRODUCTS RELEASED FROM THE BUILDING AND ON THE GROUND OUTSIDE THE BUILDING. EPSVT ON SITE FOR THE INSURANCE COMPANIES. THEY WERE OBSERVING THE ACTIVITY ON SITE FOR THEIR CLIENT WHO DID NOT AUTHORIZE THEM TO COMPLETE ANY WORK. FG SPOKE TO LEON SMITH, OWNER AND OPERATOR OF NIAGARA LUBRICANTS. HE SAID HE HASN'T BEEN ALLOWED IN THE BUILDING BECAUSE THE ATF AND BUFFALO FIRE WON'T LET HIM IN. THE SITE IS STILL A CRIME SCENE. AT 2:30 PM, FG & TDJ PARTICIPATED IN AN ONSITE MTG WITH ALL PARTIES INCLUDING ATF, CSX, NYSDEC, LEON SMITH AND HIS INSURANCE COMPANY. MR. SMITH SAID HE WOULD CONDUCT THE CLEANUP AND WANTED TO PUT THE FLUIDS IN THE BASEMENT INTO THE EXISTING TANKS IN THE BASEMENT. THE INSURANCE COMPANIES SAID THEY WOULD HIRE A STRUCTURAL ENGINEER TO DETERMINE IF IT WAS SAFE TO ENTER

BUILDING FIRE (Continued) **U003318611**

THE BUILDING. 7/16/11 FG SITE INSPECTION WITH TDJ. MET KEITH GLENN WITH THE USEPA WHO WAS CALLED ON SCENE BY THE DEPARTMENT. THE ENTIRE AREA WAS INSPECTED. BSA OPENED MANHOLES AND PRODUCT WAS EVIDENT. FROM THE BUILDING HEADING WEST, PRODUCT WAS FOUND IN THE SEWERS AND AN ACTIVE FLOW. AT A MANHOLE UPGRADIENT, NO PRODUCT WAS PRESENT AND A SLUGGISH FLOW. FG REFERRED MR. GLENN TO CSX, LEON SMITH, BSA AND A CURRENT EMPLOYEE. THE CORNELIUS CREEK COMBINED SEWER OVERFLOW AT THE FOOT OF ONTARIO STREET WAS INSPECTED AND A SHEEN WAS PRESENT. THE SEWER ON CHANDLER IS COMBINED AND DURING A HIGH WATER EVENT FLOWS TO THE CORNELIUS CREEK CSO. 7/19/11 FG SITE INSPECTION WITH TDJ. MET KEITH GLENN WITH USEPA, LEON SMITH, OWNER, KEVIN CROSS - ATTORNEY, RANDY RAKOCZINSKI - ENGINEER BARTON & LOGUIDICE HIRED BY MR. SMITH, ARCADIS WAS ALSO ON SITE FOR CSX. MR. GLENN CONFIRMED THAT THE USEPA HAS TAKEN THE OVERSIGHT OF THE ENVIRONMENTAL REMEDIATION OVER AND WILL CONTINUE UNTIL THE WORK IS COMPLETE. BSA AGREED TO INSERT PLUG AT INTERSECTION OF BUIDING BASEMENT LINE AND STREET MAIN LINE. 7/21/11 TDJ MET CARL PELLEGRINO WITH EPA WHO TRANSFERRED LEAD TO KELLI LUCARINA. WALKED SITE WHERE BOOMS AND FENCING HAS BEEN PLACED TO COLLECT RUNNOFF AND SUPPLY SECURITY. LEAKING OF PETROLEUM CONTINUES DOWN WALLS WITH HEAT OF DAY. BUFFALO SEWER CHECKED PLUG PLACED IN LINE TO INSURE SEAL. PLUG IS WORKING AND LINE CAN NOW BE FLUSHED. 7/22/11 TDJ RANDY RACKOCZYNSKI OF B&L CONTACTED ME SAYING OP-TECH IS NO LONGER LEAD CONTRACTOR FOR JOB DUE TO CONFLICT OF INTEREST WITH CSX RAIL CLEANUP. NEW CONTRACTOR WILL BE IN PLACE WITHIN A DAY. 7/25/11 TDJ RANDY (B&L) WAS ONSITE WITH PARAGON, WHO ARE THE COMPANY INVOLVED NOW WITH THE CONTINUED WORK ONSITE. SEWER LINE CLEANING AND SILT FENCE INSTALLATION WAS TO BE COMPLETED. 7/26/11 TDJ RECEIVED WORK PLAN FOR THE NEXT PHASE OF THE BUILDING ENTRY AND MATERIAL REMOVAL. THE DEMOLITION PROJECT WORK PLAN WILL BE SUPPLIED BY THE CONTRACTOR PICKED FOR THE JOB. LINE WAS FLUSHED AND SILT FENCING WAS COMPETED. ALL CONTAMINATED FIREHOSE PLACED INTO ROLLOFF. STREETS CLEANED AND AFFECTED SOILS ALONG SIDE STREET SCRAPED. 8/22/11 TDJ SENT CALL OUT PIN # TO OP-TECH , KEVIN CANNON FOR STREET PAD AND BOOM REMOVAL PERFORMED BEFORE AGREEMENT WITH OWNER AND INSURANCE COMPANY WAS COMPLETE. 8/26/11 TDJ CONTACTED FEDERATED INSURANCE, ROB DOOLEY (404)242-6403 REGARDING PAYMENT OF OP-TECH FOR INITIAL CLEANUP WORK. ROB CLAIMS THAT ALL MONIES FROM THE INSURANCE COMPANY HAVE BEEN EXHAUSTED. WILL LET OP-TECH SUBMIT BILL TO ALBANY FOR PAYMENT AND PUT IN FOR REIMBURSMENT VIA THE AG'S OFFICE. ALSO SPOKE WITH RANDY AT B&L WHO STATED THAT SAFETY KLEEN HAS BEEN ONSITE TWICE TO GIVE QUOTE FOR PETROLEUM REMOVAL. WORK SHOULD BEGIN THE WEEK OF 8/29. 9/12/11 TDJ SPILL CAME ACROSS DURING NIGHT INVOLVING VANDALISM OF FRAC TANK HOLDING WASTE FROM FIRE STORED OFF SITE ON CHANDLER STREET. SPILL WAS MAINLY WATER AND WAS CONTAINED BY OP-TECH. CONTACTED LEON SMITH ABOUT HOLD UP ON DISPOSAL OF TANKS OF WATER/OIL AND CONTAMINATED SOIL. HE STATED THAT CSX IS HOLDING UP DISPOSAL OF MATERIAL TAKEN OFF OF THERE PROPERTY FOR SOME REASON. THEN CONTACTED KEITH GLENN OF EPA WHO KNEW OF THE EVENT AND HAD CONTACTED CSX WHO STATED THAT NIAGARA LUBRICANT IS BEING THE CAUSE OF THE DELAY. KEITH WILL GET INFO WITHIN A FEW DAYS ON EPA'S ABILITY TO CONTROL THE MOVEMENT OF THE MATERIAL AND THE SLOW REMOVAL OF WASTE AT BUILDING AND DEMOLITION. 09/19/11 TDJ WENT TO LOCATION WHERE OP-TECH HAS CLEANED UP AND REMOVED E-TANK CLEAN FILL AND STONE PLACED ON SPILL AREA. CSX WILL BEGIN REMOVING REMAINING ROLLOFF CONTAINERS WITH THE SOIL FROM THE RAILROAD R.O.W AREA. 9/27/11 TDJ WENT TO LOCATION WHERE APOLLO DEMOLITION HAS BEGAN REMOVAL OF SCRAP STEEL FROM LOADING DOCK AREA. CONTAMINATED SOIL, CONCRETE AND PLASTICS WERE PLACED FOR

BUILDING FIRE (Continued) **U003318611**

LANDFILL DISPOSAL. WATER CANNON IS ONSITE TO KEEP MATERIAL WET. ALSO HAVE AIR MONITORING EQUIPMENT IN PLACE BY B&L CONSULTANTS. 9/28/11 TDJ REMOVAL OF STEEL FROM SITE BEGAN. PILE IN LODING DOCK AREA TOTALLY SEGREGATED FOR DISPOSAL. OILY MATERIAL WILL BE LOADED INTO LINED TRUCKS. 9/29/11 TDJ BUILDING DEMOLISION BEGAN EXPOSING MIDDLE OF UPPER AND SECOND FLOOR. MANY 55-GALLON DRUMS WERE SEEN ON SECOND FLOOR. ASKED EXCAVATOR OPERATOR IF DRUMS WERE FULL WHICH HE RESPONDED YES. MATERIAL WILL MOST LIKELY END UP IN BASEMENT FOR PUMPING IF SPILLED. MACHINE BROKE DOWN STOPPING WORK FOR DAY AT 11:00. 9/30/11 TDJ REAR OF BUILDING WAS ALMOST COMPLETELY DOWN. HEAVY RAIN MOST OF DAY KEPT DUST DOWN. SOMETHING PUT INTO SCRAP DUMPSTER LEAKED APPROX. 10 GALLONS OF OIL OUT OF DUMPSTER. PADS AND BOOMS USED TO CLEAN UP. MATERIAL TAKEN OUT AND ROLL OFF CLEANED OUT. INDUSTRIAL SERVICES WILL BE IN MONDAY TO CLEAN TANKS BEFORE SCRAPING. 10/07/11 TDJ WENT TO THE DEMOLITION SITE DURIN WEEK AND WATCH FINAL SECTION OF WALLS COME DOWN TODAY. STEEL HAS BEEN TAKEN AWAY FOR SCRAP AND A PILE OF DEMOLITION MATERIAL IS ALMOST READY TO MOVE OFFSITE. MINIMAL SPILLAGE WAS OBSERVED DURING THE BUILDING COLLAPSE AND WOULD HAVE BEEN CONTAINED IN THE BASEMENT. ONCE DEMO MATERIAL IS REMOVED THE BASEMENT WILL BE PUMPED AGAIN. 10/19/11 TDJ TRUCKS BEGAN REMOVING RUBBLE FROM SITE TO MODERN LANDFILL. MISTY RAIN AND SPRAY CANNON IS KEEPING DUST MINIMIZED. MOST OF STEEL HAS BEEN REMOVED. ALL ROLLOFFS FROM CSX SITE WORK HAVE BEEN DISPOSED OF. 10/24/11 TDJ WAS CONTACTED BY DIANA HARE WHO STATED THAT MODERN LANDFILL HAD STOPPED LOADS BECAUSE TOTAL WEIGHT LIMIT HAD BEEN ACHEIVED FOR PROPOSAL. AN ADDITIONAL APPROX 30 TRUCK LOADS OF THE SAME MATERIAL IS LEFT ONSITE. MODERN WILL DECIDE IF ADDITIONAL ANALYSIS IS REQUIRED FOR THE REMAINING LOADS. 10/27/11 TDJ LOADS OF DEBRIS HAS STOPPED AS COMPLETION OF DEMOLITION IS ALMOST COMPLTETE. SCRAP STEEL HAS A COUPLE LOADS REMAINING. BASEMENT IS BEING SCRAPED AND POWER WASHED. LARGE PILE OF SIDE WALL AND CLEAN DEBRIS IS STAGED NEAR EDGE OF BASEMENT TO POSSIBLY BE USED TO PARTIALLY FILL BASEMENT. SAMPLES HAVE BEEN TAKEN TO ENSURE PETROLEUM IS NOT CONTAINED IN STAGED PILE. BASEMENT IS INTACT AND APEARS TO NOT HAVE LET LIQUIDS RELEASE TO UNDER THE SLAB. 11/15/11 TDJ WENT TO SITE TO SEE BASEMENT HAS BEEN FILLED AND THE SURFACE HAS BEEN LEVELED WITH LARGER STONE. E-TANKS WERE BEING TAKEN AWAY. CARL PELLEGRINO FROM EPA WILL BE ONSITE THIS WEEK TO GIVE FINAL APPROVAL FOR COMPLETION. 11/17/11 TDJ MET CARL PELLEGRINO, USEPA AND BILL DOEBLER, B&L FOR FINAL SITE WALK. CRUSHED BRICK, CONCRETE AND STONE WAS USED AS FINAL COVER FOR THE ENTIRE BUILDING AREA COVERED. ALL CONTAMINATED MATERIAL HAS BEEN DISPOSED AND METAL SCRAP REMOVED. NO SHEEN WAS OBSERVED IN THE COLLECTION POINT USED FOR SITE WATER IN THE REAR OF THE PROPERTY. RECENT HEAVY RAIN FLOWED OVER THE SITE. AWAITING DISPOSAL RECEIPTS INCLUDING CSX WORK FOR ALL OFFSITE DISPOSAL TO CLOSE SITE 04/24/12 TDJ MET CARL PELLIGRINO AND CHERYL GREEN/LIPPES ATTORNEY AT SITE TO DETERMINE IF ANY PRODUCT OR PETROLEUM WASTE WAS LEFT IF TWO BUILDINGS LEFT AT SITE. WE WALKED THROUGH BOTH AND FOUND NO STORED MATERIALS. A FEW LARGE MIXING TANKS WERE PRESENT BUT EMPTY. TALKS HAVE BEGUN FOR POSSIBLE REUSE OF SITE FOR NEW FACILITY BUT NO DETAILS HAVE BEEN PRESENTED. CARL IS GOING TO GIVE FINAL CLOSURE TO EPA INVOLVEMENT AT SITE. 05/21/12 TDJ RECEIVED DISPOSAL RECEIPT FROM SAFETY KLEEN FOR REMOVAL OF OILY WATER, OIL FROM TANKS, AND WASH WATER FROM STEAM CLEANING BASEMENT. 05/30/12 TDJ PUT ALL INFO TOGETHER AND CLOSED OUT FILE. 09/18/12 TDJ MIXUP OF SPILL NUMBERS SHOWS THE PAY PACKAGES BEING PAID THROUGH SPILL# 1104100. THE INFORMATION WAS CHANGED AND PAY PACKAGES WERE PUT BACK ONTO THIS SPILL BUT EDOCS INFO SHOWS IT STILL ON THE 1104100 #. NO FURTHER ACTION FILE CLOSED"

BUILDING FIRE (Continued) **U003318611**

Remarks: "There is a ongoing fire at this location, inside there are several drums of unknown solvents. 0835- Caller reporting a spill of Lube oil to Railroad Ballest. Caller is Edward Cooke. 904-607-2099."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAC 04/09/98: MJS, RNL SITE INSPECT. MET WITH DENNIS RILEY(CHEMIST). ADVISED HIM OF COMPLAINT. FOUND OIL(APPROX 150 GALLONS TOTAL) PUDDLED ON BASEMENT FLOOR IN SEVERAL LOCATIONS. FOUND SEVERAL HUNDRED DRUMS IN BASEMENT, MANY LEAKING WITH SPEEDI DRI SPREAD AROUND THEM. MR RILEY STATED THAT MANY OF THE DRUMS ARE FROM A CLEANUP FROM THE PAST. DRUM LIDS ARE DATED 1993. ALSO FOUND HOPPERS FILLED WITH OIL AND WASTE. MJS ADVISED MR RILEY THAT THERE ARE MANY ISSUES THAT WILL HAVE TO BE DEALT WITH. HE STATED THAT WE SHOULD CONTACT TOM MCLEOD(VP) OR LEON SMITH(PRES). 8/7/01:JFO, SAC INSPECT SITE, MET W/LEON SMITH - PRESIDENT OF NIAGARA LUBRICANT, WENT INTO BASEMENT FOUND DRUMS OF PRODUCT AND HOME HEATING OIL TANKS ON THE FLOOR WHICH ARE APPARENTLY EMPTY, MR. SMITH SAID THEY FABRICATE LUBRICANTS AND THESE DRUMS ARE FILLED WITH OFF-SPEC PRODUCT IN WHICH SMALL AMOUNTS ARE MIXED INTO THE BATCHES WHEN MAKING NEW PRODUCT, THEY REUSE THE DRUMS SHELLS AND PROBABLY GO THROUGH THE OFF SPEC PRODUCT IN 4 TO 6 MONTH CYCLES, MR. SMITH SAID THE NUMBER OF DRUMS HAS BEEN REDUCED FROM A FEW YEARS AGO WHEN MOST OF THE BASEMENT WAS FILLED WITH DRUMS, THE FLOOR IS OIL STAINED AND RESIDUAL SPEEDI-DRY WAS OBSERVED ON THE FLOOR, EQUIPMENT IN THE BASEMENT HAD DRIP PANS UNDERNEATH THAT HAD PRODUCT FILLED IN THEM, MR. SMITH SAID THAT THE BUILDING WAS PART OF QUAKER STATE REFINING AT ONE TIME AND THAT THE FLOOR IS SEALED TO PREVENT SEEPAGE AND THAT THERE ARE NO FLOOR DRAINS IN THE BASEMENT PREVENTING ANY OFF-SITE MIGRATION, SAC DISCUSS SITE W/MARK HANS, DIV OF SOLID AND HAZARDOUS MATERIALS, MR. HANS WILL HAVE SOMEONE FROM HIS DVISION FOLLOW UP, NO FURTHER WORK BY SPILLS."
Remarks:	"CALLER CLAIMS THAT APPROXIMATELY 150 55 GALLON DRUMS OF MOSTLY WASTE OIL HAVE BEEN STORED IN BASEMENT FOR YEARS. MANY ARE LEAKING. ALSO, LEAKING ABOVE GROUND WASTER OIL TANKS. ***(FORMERLY MJS FILE)***"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was JFO 08/07/95: 09/06/95 JFO SITE VISIT MET W/ PHIL HIRTZEL, NO WORK STARTED, WAITING FOR SAMP RESULTS SO SAFETY-CLEAN CAN PUMP OUT TANKS. 08/07/95: JFO TEL/CON WITH KEVIN KEANE, TANKS ARE PUMPED OUT BY SAFETY KLEEN, TANKS WILL BE REMOVED WITHIN 2 WEEKS. MR. KEANE WILL FORWARD COPIES OF DISPOSAL RECEIPTS & SAMP RESULTS FOR WATER & PRODUCT FROM TAN. 08/09/95: JFO SITE VISIT MET WITH MR KEVIN KEANE (V.P.) OF CO. DISCOVERED F. O. LEAKING OUT OF LOADING PLATFORM WALL ONTO RR TRACKS. EXPLAINED CLEANUP OPTIONS AND TANK REMOVAL PROCEDURE SENT LETTER TO MR.KEA. 08/10/95: JFO SENT CLEANUP LETTER. 08/14/95: JFO SITE VISIT MET WITH KEVIN KEANE DISCUSSED REQUIREMENTS LISTED IN CLEANUP LETTER OF 08/10/95. 08/17/95: JFO REC'D LETTER FROM RP, CLEANUP AND TANK CLOSURE UNDERWAY. 09/06/95:JFO SITE VISIT MET WITH PHIL HIRTZEL. INSPECTED TANK FARM REMEDIATION NOT STARTED WAITING SAMP RESULTS SO SAFETY KLEEN CAN PUMP OUT TANKS. 09/21/95 JFO TEL/CON WITH KEVIN KEANE, TANKS ARE PUMPED OUT BY SAFETY KLEEN. TANKS WILL BE REMOVED WITH 3WEEKS. MR KEANE WILL FORWARD WOPIES OF DISPOSAL RECEIPTS AND SAMP RESULTS FOR WATER AND PRODUCT THAT WAS REMOVED FROM TANKS. HE WILL FORWARD NOTIFICATION FOR TANK REMOVALS BEFORE THEY START CLOSURE. 10/02/95 JFO REC'D DISPOSAL RECEIPTS AND SAMP RESULTS FOR WASTE OIL AND OILY WATER. 10/06/95 JFO SITE VISIT MET W/STEVE

MOD-PAC CORP (Continued) **S108299346**

ANDERSON AND NICK GEIBEN-CONRTACTOR AND DAVID MYERS CONSULTANTS (LBM) WE AGREED TO SAMP SOIL AROUND TANKS #2 AND #3 IF RESULTS MEET SOIL GUID VALUES TANK WILL BE CLEANED AND FILLED IN PLACE. TANK #1 WILL BE REMOVED FROM THE GROUND. SURFACE AREA ON RR TRACK WILL ALSO BE CLEANED UP. 10/17/95 JFO SITE VISIT MET W/MR GEIBEN 2 TANKS BEING CLEANED AND FILLED IN PLACE. OTHER TANK CUT OPEN AND READY TO BE CLEANED. 10/18/95 JFO SITE VISIT MET W/MR GEIBEN FILLING TANKS TODAY WILL EXCAVATE AROUND OTHER TANK TO SEE EXTENT OF CONTAMINATION. IF CONTAMINATION CAN BE REMOVED, THIS TANK WILL ALSO BE FILLED IN PLACE. ALSO DISCOVERED 4TH TANK 10/31/95 JFO TELCON WITH GEIBEN SAMPLING SOIL AROUND 4TH TANK. ALSO, APPROX 20 YDS OF CONTAM SOIL REMOVED FROM AROUND TANK #1 AND STAGED ON SITE. 12/16/95 JFO MET W/N. GEIBEN HE INFORMED ME THAT SAMP RESULTS INDICATE CONTAM AROUND 4TH TANK (MP-6). 01/30/96 JFO REC'D DISPOSAL RECEIPTS AND SAMP RESULTS FOR 4TH TANK, 8270 RESULTS HIGH 02/20/96 JFO SENT LETTER TO KEVIN KEANE (VP), FURTHER REMED IS REQUIRED. 02/22/96 JFO TEL/CON WITH STEVE ANDERSON (MOD-PAC) ABOUT LETTER, HE WILL CALL LBM FOR REMED PROPOSAL. 05/23/96 JFO ON SITE WITH TODD OVERHOFF OF HAZ-EVAL FOR SAMPLING. SAMPLES TAKEN FROM 4 SIDES OF TANK. ON EAST SIDE OF TANK (SAMPLE D) PRODUCT WAS VISIBLE IN SAMPLE HOLE. ALSO ON SITE WAS SAL CALANDRA. 06/19/96 JFO REC'D RESULTS FOR FOUR SAMPLES (A,B,C&D) A,B,&C ARE HIGH. 06/24/96 JFO TEL/CON WITH MARK HANNA, SUGGESTED REANALIZE SAMPLE A, TCLP FOR POSSIBLE INACTIVE STATUS, OR TCLP ON A,B&C FOR POSSIBLE CLOSURE. HE WILL SPEAK TO THE PEOPLE AT MOD-PAC FOR THEIR DECISION. (OK RNL) 08/13/96 JFO REC'D RESULTS FOR SAMPLE A, RESULTS ARE BELOW STARS MEMO, THE SITE STATUS IS NOW INACTIVE. A LETTER STATING THE SITE IS INACTIVE IS REQUESTED BY MOD-PAC, CC:HEI."

Update By:	CRSTANIS
Site Description:	Location The MOD-PAC Site is a 20.03-acre site located in an urban area. The site is bound by railroad tracks to the south, Elmwood Avenue to the west, and commercial/residential properties to the north. Site Features The site is relatively flat and includes an occupied 500,000 square foot manufacturing facility with vacant land to the southern 1/3 of the property. Various debris and soil piles are present throughout the vacant area. A railroad spur has historically traversed the Site, extending into the facility s courtyard. Current Zoning and Land Use The Site is currently active and zoned for residential, commercial, and industrial use. Past Uses of the Site Until the 1950s the entire site was used for the manufacturing of automobile radiators and after the 1970s has been utilized for various manufacturing purposes including warehousing, box, and product packaging. One NYSDEC Spill was identified within BCP limits listed on 8/9/1995 due to oil water and sludge in vicinity of railroad siding. Four underground storage tanks (USTs) were discovered, one of the tanks was removed and three tanks were closed in place. Confirmatory soil samples identified residual contamination

MOD-PAC CORP. (Continued) **S120706207**

and the spill was given an inactive status in 1996. Site Geology and Hydrogeology The site is underlain by 2-16 feet of miscellaneous fill (soil intermixed with foundry sand, concrete, brick, slag, fly ash, metal, railroad siding, and asphalt) underlain by silt/clay layer. Depth to groundwater is 2 to 9 feet below grade and flows to the southwest.

Env Problem: Nature and Extent of Contamination: Based on the investigations completed to date, the primary contaminants of concern in the soil include semi-volatile organic compounds (SVOCs) and metals and in groundwater limited chlorinated solvents. Soil The contamination at the site is primarily due to fill which varies from 2 to 16 feet below ground surface. SVOCs (PAHs) and metals were encountered in the soil samples collected from the southern, underutilized portion of the Site at concentrations exceeding restricted residential soil cleanup objectives (RRSCO). The concentrations of the PAHs were up to 98.2 ppm of benzo(a)anthracene (RRSCO 1 ppm); 85.6 ppm benzo(a)pyrene (RRSCO 1 ppm); 69 ppm benzo(b)fluoranthene (RRSCO 1 ppm); 3.9 ppm dibenzo(a,h)anthracene (RRSCO - 0.330 ppm); and 29.2 ppm indeno(1,2,3-cd)pyrene (RRSCO 0.5 ppm). The concentrations of the metals were up to 28.4 ppm arsenic (RRSCO 16 ppm); and 348 ppm copper (RRSCO 270 ppm). The soils located in the western, eastern and northern portion currently occupied by the MOD-PAC facility contained SVOCs (PAHs) and metals in the soil samples at concentrations exceeding commercial soil cleanup objectives (CSCO). The concentrations of the PAHs were up to 78 ppm of benzo(a)anthracene (CSCO 5.6 ppm); 60 ppm benzo(a)pyrene (CSCO 1 ppm); 80 ppm benzo(b)fluoranthene (CSCO 5.6 ppm); 11 ppm dibenzo(a,h)anthracene (RRSCO - 0.560 ppm); and 37 ppm indeno(1,2,3-cd)pyrene (CSCO 5.6 ppm). The concentrations of the metals were up to 38 ppm arsenic (CSCO 16 ppm); and 370 ppm copper (CSCO 270 ppm). Groundwater TCE and its associated degradation products were found in the groundwater samples collected from to location in the central areas of the Site, slightly exceeding groundwater standards (GS) of typically 5 ppb, with a maximum concentration of TCE of16 ppb; DEC of 32 ppb and VC of 42 ppb. Chlorinated solvents were not detected in estimated down gradient groundwater sample locations. SVOCs (PAHs) were identified in the groundwater samples exceeding GS (typically 0.002 ppb), with a maximum concentration of benzo(a)anthracene of 40.1 ppb; benzo(b)fluoranthene of 37.2 ppb; benzo(k)fluoranthene of 33.5 ppb; chrysene of 40.1 ppb and ideno(1,2,3-cd)pyrene of 24.6 ppb. The concentration of additional SVOC were up to 46.1 ppb of benzo(a)pyrene (GS 46.1 ppb); 77 ppb fluoranthene (GS 50 ppb); 37.7 ppb phenol (GS 1 ppb); and 82.9 ppb pyrene (GS 50 ppb). Groundwater samples collected from the southern portion of the Site had several metals at concentration exceeding their respective GS including 130 ppb arsenic (GS - 25 ppb); 1,220 ppb barium (GS - 1,000 ppb); 7.4 ppb cadmium (GS - 5 ppb); 190 ppb chromium (GS - 50 ppb); 283 ppb copper (GS - 200 ppb); 216,000 ppb iron (GS - 300 ppb); 956 ppb lead (GS - 25 ppb); 145,000 ppb magnesium (GS - 35,000 ppb); 9,920 ppb manganese (GS 300 ppb); 1.4 ppb mercury (GS 0.7 ppb); 122 ppb nickel (100 ppb); 33,500 ppb sodium (GS 20,000 ppb); 2,680 ppb zinc (GS 2,000 ppb).

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Environmental Interest/Information System
AIR SYNTHETIC MINOR

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"07/13/05 JFO ON SITE MET WITH MIKE CLANCY OF ELMWOOD TANK. THEY HAVE 1 TANK OUT OF THE GROUND. THEY REMOVED CONTAMINATED SOIL AND STAGED ON SITE. THEY WILL BE REMOVING THE OTHER TANK WHEN THIS PART OF THE HOLE IS CLEAN AND SAMPLED. THE TANKS ARE NEXT TO EACH OTHER SO THERE WILL BE ONE PIT. 07/15/05 JFO RECEIVED THE SAMPLE RESULTS FROM THE NORTH AND WEST WALLS AND THE BOTTOM. THE NORTH WALL SLIGHTLY EXCEEDS TAGMS. MORE RESULTS TO FOLLOW. 07/20/05 JFO RECEIVED THE SAMPLE RESULTS FROM THE EAST AND SOUTH WALLS AND THE OTHER BOTTOM SAMPLES. ALSO THEY REMOVED MORE SOIL FROM THE NORTH WALL AND RESAMPLED FOR A CLEAN CLOSURE. ALL SAMPLE RESULTS ARE NOW NON DETECT FOR BOTH SVOC'S AND VOC'S. NEED DISPOSAL RECEIPTS FOR CLEAN CLOSURE. 08/19/05 JFO CALL TO MIKE CLANCY FOR THE DISPOSAL RECEIPTS. HE WILL HAVE THE SECRETARY SEND THEM OUT. 08/24/05 JFO RECEIVED THE DISPOSAL RECEIPTS FOR THE CONTAMINATED SOIL. NO FURTHER ACTION REQUIRED. CLOSED"

FWS WAREHOUSE (Continued) **S106972207**

Remarks: "DURING THE REMOVAL OF A 4000 GALLON DIESEL UST, PETROLEUM CONTAMINATION WAS FOUND. PIN HOLES FOUND ON THE BOTTOM AND SIDES. THEY WILL BE REMOVING A 2000 GALLON TANK ALSO AS PART OF THIS JOB."

Record Upd: 10/03/2007
Updated By: MLDOSTER
Site Description: MarCon Erectors occupies a parcel of property approximately 1.3 acres in size in a mixed residential, commercial, industrial area. The site is a triangular shaped parcel of land with a multi-storied brick, frame and block building and a concrete containment area that had two, horizontal, 10,000 gallon, above ground storage tanks (AST) in saddles and one 25,000 gallon AST which had been cut down to about 18 inches in height. Recent operations of this facility was the re-manufacture of windows. Past uses of the facility included fuel blending operations by a company affiliated with Ashland Petroleum Company (approx. 1915 - 1971) and occupation by a roofing company, B. Hoffman Roofers 1971 to 1980. The site had been abandoned when MarCon purchased the property. The cut down tank contained sludge contaminated with VOCs and PCBs. Sampling of this sludge revealed PCB contamination as high as 16,000 ppm. Sampling of the oil/water in the sludge within the cut off tank revealed PCB contamination as high as 122 ppm. Sampling directly outside of the cracks in the structure revealed PCB contamination as high as 5.8 ppm. Improper removal practices during a sludge removal effort in 1997 has resulted in a RCRA enforcement action against the owner and contractor. An interim remedial measure (IRM) to remove source contamination was completed in early 2001. An environmental assessment was conducted in 2001 to determine soil and groundwater impacts. The assessment found all PCB contamination had been removed but petroleum contamination existed

MARCON ERECTORS INC (Continued) **1001203131**

	both on and off-site. A ROD was issued in March 2002 detailing no further remedial action necessary for the hazardous waste (PCBs). Petroleum contamination remains and is being addressed under the State's Oil Spill Program. Since hazardous waste no longer existed at the site, it was delisted in January 2003.
Env Problem:	A removal action completed in February 2000 mitigated environmental problems that were attributable to the hazardous waste (PCBs). Petroleum impacts are being addressed under the Spills Program. Excavation of petroleum source areas are planned.
Health Problem:	An elementary school, a playground, and a residential area are near the site. All PCB-contaminated sludges and soil have been removed and disposed off-site. The remedial activities at the site have eliminated potential exposure routes. Exposures via drinking water are not expected because public water serves the area.

FINDS:

Registry ID: 110000840127

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Assessment of Health:	An elementary school, a playground, and a residential area are near the site. Although the site is fenced, there is evidence that neighborhood children have entered the site. Trespassers may be exposed to contaminated surface soils and sludge. Exposures via drinking water are not expected because public water serves the area.
Description:	MarCon Erectors occupies a parcel of property approximately 1.3 acres in size in a mixed residential, commercial, industrial area. The site is a triangular shaped parcel of land with a multi-storied brick, frame and block building and a concrete containment area that has two, horizontal, 10,000 gallon, above ground storage tanks (AST) in saddles and one 25,000 gallon AST which has been cut down to about 18 inches in height. Recent operations of this facility was the re-manufacture of windows. Past uses of the facility included fuel blending operations by a company affiliated with Ashland Petroleum Company (approx. 1915 - 1971) and occupation by a roofing company, B. Hoffman Roofers 1971 to 1980. The site had been abandoned when MarCon purchased the property. The cut down tank contains sludge contaminated with VOCs and PCBs. The sludge in the cut off tank was covered with a polyethylene tarp. Sampling of this sludge revealed

MARCON ERECTORS (Continued) **S105973177**

PCB contamination as high as 16,000 ppm. Sampling of the oil/water in the sludge within the cut off tank revealed PCB contamination as high as 122 ppm. There is evidence that the concrete containment structure has been compromised with indications of contamination on the floor and walls of thestructure. Sampling directly outside of the cracks in the structure revealed PCB contamination as high as 5.8 ppm. There is no information on soils beneath the containment area. Additionally there is no information on the groundwater downgradient of the site. Improper removal practices during a sludge removal effort in 1997 has resulted in a RCRA enforcement action against the owner and contractor.

Record Added Date: Not reported
Record Updated Date: Not reported
Env Assessment: The exposed material within the cut-down 25,000 gallon AST has the potential to fill with precipitation and overflow into a compromised concrete containment area. Directly to the south of the site is a heavily used recreation pathway. 625 feet tothe west is a play ground and an elementary school. Residential areas are directly to the north of the site. The potential for continued environmental degradation and human contact remains present as long as the site remains unremediated.

SWIS: 1502
Town: Buffalo (c)
Record Added Date: 07/11/2018
Record Updated Date: 09/07/2018
Update By: CRSTANIS
Site Description: Location The site is addressed as 27 and 37 Chandler Street in the City of Buffalo, Erie County, New York and consists of two parcels totaling approximately 1.13 acres of land. The site is bound to the north by Chandler Street, to the south by Grote Street, to the west by residential structures, and to the east by a manufacturing facility. The property is located within an urban area, utilized for industrial, commercial, and residential purposes. Site Features 27 Chandler is three-stories and 20,500 square feet of space while 37 Chandler is 12,350 square feet spread across two stories. The parcels extend to Grote Street. Current Zoning and Land Use 27 Chandler Street is currently vacant and inactive, most recently used for warehousing and storage, as well as used furniture sales until 2017. 37 Chandler Street is currently vacant and inactive, most recently utilized as The Kennel Club for dog training, grooming, and boarding until 2017. 27 and 37 Chandler Street are currently zoned N-1S Secondary Employment Center which addressed mixed-use employment centers. Past Uses of the Site 27 Chandler Constructed in 1902 by Charles Berricks & Sons a brick manufacturing company. By 1916

CHANDLER INCUBATOR (Continued) **S123159085**

the property was inhabited by the Jewett Refrigerator Co. Buffalo Davenport, a furniture manufacturing facility, occupied the property from at least 1930 to 1960. Since that time, various companies occupied the building including Temp-Trol Windows, Inc., Gotta Rest Mattress Co. Inc. (manufacturer), Masters Pattern Co. (industrial patterns), Warren Refining & Chemical Co. (manufacturer), Byam CP Co (paper milk container manufacturers), Acme Steel (warehouse), Atlas Steel Casting Co. (warehouse), Cople Refrigeration & Heating (service repair), Liable Colling & Heating, Inc. as well as other commercial occupants including lawyers office, leather merchandise sales, janitorial supplies sales, and office supplies sales. Most recently, the building was used for warehousing and storage, as well as used furniture sales until 2017. 37 Chandler Constructed in 1902 by the Double Truss Cornice Brake Company. The site was vacant by 1930 and remained vacant until 1935 when Viner & Sons (organ builders) occupied the building, remaining at the site until the early 1940s. Acme Steel and Malleable Iron Works and Buffalo Brake Beam Co. (railroad equipment manufacturing) occupied the property from the mid-1940s into the 1980s. The property was vacant for a few years then occupied by Corr Distributors in the mid-1980s until the mid-2000s. Commercial occupants since that time included Horsefeathers Architectural Antiques and Kennel Club (dog training, grooming, and boarding). The site has been vacant since 2017. Prior remedial measures have not been completed at the site. Hazard Evaluations Inc. completed a limited Phase II investigation in December 2017. The work included completion of 12 soil borings and collection of soil and groundwater samples. Site Geology and Hydrogeology Based on the soil borings completed, approximately 3.5 to 5 feet of granular and cohesive fill material is present throughout the site. Clay and silt was encountered below the fill material and extended the full depth drilled. Spoon refusal was encountered at two boring locations. Groundwater was not encountered during the subsurface investigation work. Based on a review of the site topographic conditions as depicted on the USGS 7.5 minute Topographic Quadrangle Map of Buffalo NW, New York, shallow regional groundwater flows is expected to flow in a southwesterly direction toward Scajaquada Creek located approximately 0.48 miles south and toward the Niagara River located approximately one mile west of the site.

Env Problem: Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Spiller Company:	001
Contact Name:	TAMMY HESSLER
DEC Memo:	"10/8/10 BOB MAY WITH LEHIGH CALLED 484-256-3198. HE SAID THAT THEY WERE BUILDING AN INTERNAL TANK INSIDE THE SINGLE WALL TANK AND THE CONTRACTOR INDICATED THERE WERE PINHOLES. MR. MAY DOESN'T BELIEVE THAT BECAUSE THE UST WAS TIGHT BEFORE THE WORK STARTED. THE NEW TANK IS TIGHT. MR. MAY WILL SEND DOCUMENTATION ON THE INCIDENT. This is a follow up to our phone conversation last Friday 10-08-10. Synergy Environmental is an environmental consultant to the UST owners, Lehigh Gas. The single wall (SW) USTs at this location were upgraded to double wall (DW) USTs by the Petrofuse process. 11/4/10 FG SPOKE TO BOB MAY WHO INDICATED HE WILL PROVIDE AN APPROVED TANK TEST TO THE DEPARTMENT TO CONFIRM THAT THE UST'S ARE TIGHT. Attached is a narrative of the installing of an interstitial space and new interior tank wall inside the SW UST making it a DW UST. The interstitial space has a vacuum induced and the vacuum is monitored for leak detection. After performing the process, the interstitial space was not tight and Petrofuse declared that there were pinholes in the original super product tank wall at a tank rib. The rib location is where Petrofuse had installed a new tank manway and collar. Petrofuse removed a channel section of the new interior tank wall and interstitial space to expose the interior of the original tank wall. Petrofuse installed additional fiberglass layers and resin on the interior of the original tank wall, rebuilt the interstitial space, and new interior tank wall. The tank interstitial space held vacuum after those remedial actions. Attached is an email explaining the Petrofuse findings and remedial repair. Synergy s analysis of this information does not support the claim of pinholes in the original tank wall. The UST system continuously passed monthly 0.2 gph tightness testing prior to the Petrofuse work. Attached are those records. The Petrofuse narrative explains the QA-QC process and inspection of the interior of the original tank wall. There is no concern of pinholes until the completed DW UST interstitial space would not hold vacuum. After review of the information , please contact me with any questions or comments. Synergy requests that you close the spill number based on this information. Robert J. DEC Memo: "06/30/06 JFO TELCON WITH TOM HELLERT WITH GES. THE REPORT IS DUE AT THE END OF JULY. 08/08/06 JFO RECEIVED THE REPORT INDICATING GROUNDWATER CONTAMINATION IN THE AREAS OF SB-2 AND SB-4 & SB-9. THESE BORING WERE HAND AUGERED TO REFUSAL AT A DEPTH OF 4'3 , 4'10 AND 4'8 . 09/13/06 JFO CALL TO TOM HELLERT TO DISCUSS REMEDIATION. HE WANTS A LETTER REQUIRING REMEDIATION. 09/14/06 JFO SENT TREATMENT LTR TO TOM HELLERT AND CC'D DOUG DUGAN OF EXXON/MOBIL. 12/06/06 JFO RECEIVED THE SUBSURFACE INVESTIGATIVE REPORT AND SAMPLE RESULTS FROM SEPT 22, 2006. B-2 AND B-5 EXCEEDED TAGMS FOR VOC'S, 43,348 PPB AND 4,811 PPB. ONLY 1 VOC EXCEEDENCE IN B-5 IS BENZENE 107 PPB. ALSO THERE WAS MTBE DETECTED IN MW-1 AT 13.3 PPB. 03/12/07 JFO REC'D THE SITE MONITORING RPT FOR NOV 22, TO JAN 23. NO SPH WERE DETECTED IN ANY WELL. BTEX CONCENTRATIONS ALSO WERE NOT DETECTED. MTBE CONCENTRATION WAS FOUND IN MW-1 AT 2.2 UG/L AND MW-6 AT 3.04 UG/L. THEY WILL CONTINUE TO MONITOR. 08/09/07 JFO RECEIVED THE MONITORING RPT. FOR JAN 24 TO JUNE 25, 2007. THE RPT INDICATES THAT ANDREW ANDERSON WILL BE THE CONTACT FOR SCIENCE APPLICATIONS INTERNATIONAL CORP WHO HAVE ASSUMED ALL RESPONSIBILITY FOR THE CLEANUP. 09/24/07 JFO CALL TO ANDY ANDERSON. KEVIN ILER IS THE CONTACT FOR ENV RISK SOLUTIONS WHO WILL BE DOING THE REMEDIATION. 09/25/09 JFO CALL TO KEVIN ILER SPOKE WITH RICK BETHEL. HE WILL E-MAIL A WORK PLAN. 09/26/07 JFO CALL FROM CHRIS O'NIELL. THEY WILL BE DOING COMPLETE UPGRADES (REPLACE TANKS & PIPING) AT THIS SITE TENTATIVELY IN 2008. THEY WILL ADDRESS THE IMPACTED SOILS THEN. HE WILL MENTION THIS IN THE MONTHLY MONITORING REPORT. 11/26/07 JFO RECEIVED THE QUARTERLY MONITORING RPT. ALL RESULTS ARE NON-DETECT. MW-1, MW-3, MW-9 NOT SAMPLED. 12/23/08 JFO RECEIVED THE SEPTEMBER 25, 2008 MONITORING REPORT FROM CHRIS O'NEIL WITH SAIC. ALL RESULTS ARE NON DETECT IN WELLS 1,3,5,6,8,10,11,12&13. MW-7 NOT SAMPLED. SB-2 AND SB-4 IN THE NORTHEAST CORNER IS THE PROBLEM. THE REPORT INDICATES THAT THEY WILL EXCAVATE IN THE NORTHWEST CORNER OF THE PROPERTY. 02/03/09 JFO CALL TO CHRIS O'NEIL. CHRIS SAID IT IS A TYPO. HE WILL SEND A NOTE INDICATING THE MISTAKE. 08/31/09 JFO CALL FROM CHRIS ONIELL. THEY WILL BE DIGGING THE 3RD WEEK OF SEPT. 09/17/09 JFO ON SITE MET WITH ANDY SALAWAY WITH SAIC. THEY ARE EXCAVATING DOWN 4' TO THE CONCRETE FLOOR OF A FORMER BUILDING. THERE ARE STRONG PETROLEUM ODORS. A SMALL TANK WAS DISCOVERED IN THE NE CORNER NEAR THE MOBIL SIGN. THEY ARE MAKING ARRANGEMENTS TO HAVE THE TANK PUMPED OUT AND THEY WILL THEN REMOVE IT. I WILL VISIT SITE TOMORROW. 09/18/09 JFO ON SITE THEY ARE REMOVING THE SIGN SO THEY CAN REMOVE THE TANK ON MONDAY. 09/21/09 JFO ON SITE MET WITH ANDY S. THE 1000 GALLON OIL TANK IS OUT OF THE GROUND. SO FAR THEY HAVE DISPOSED OF 198 TONS OF SOIL. ANDY WILL COLLECT SAMPLES FROM THE 4 SIDEWALLS AND UNDER THE TANK. THE REST OF THE EXCAVATION FLOOR IS A CONCRETE SLAB. HE WILL ANALYZE FOR METHODS 8260 AND 8270 STARS. RESULTS AND RECEIPTS TO FOLLOW. 09/22/09 JFO CALL FROM ANDY S. THEY DISCOVERED ANOTHER TANK IN THE SOUTH WALL OF THE EXCAVATION UNDER THE ACTIVE PRODUCT LINES. E P & S WILL BE CALLED TO PUMP OUT THE TANK IF THERE IS ANYTHING IN IT. IT MAY HAVE BEEN CLOSED IN PLACE. JFO CALL FROM CHRIS O'NEILL WITH SAIC. THE TANK HAS BEEN CLOSED IN PLACE WITH A FLOWABLE FILL. THE TANK IS UNDER THE ACTIVE PRODUCT LINES AND CLOSE TO THE DISPENSER AND TANK FARM. THEY WILL DIG OUT AS MUCH AS POSSIBLE WITHOUT DISTURBING THE LINES,

EXXON MOBIL D5G/12929 (Continued) **S108057880**

DISPENSER OR THE TANK FARM. JFO ON SITE MET WITH ANDY S. THE TANK IS APPROX 4000 GALLON. UNABLE TO REMOVE. ANDY WILL COLLECT A SAMPLE FROM BELOW THE TANK AND ANALYZE FOR VOCS AND SVOCS STARS. 12/14/09 JFO CALL TO CHRIS O'NIELL WITH SAIC. THEY ARE NO LONGER WORKING ON THESE SITES. HE GAVE ME THE NAME OF THE NEW CONTACT, MR GREG MARSHALL WITH ERS AT (216)650-5991. JFO CALL TO MR MARSHALL. LEFT A MESSAGE ON HIS V-MAIL TO CALL ME. 01/05/10 JFO CALL TO MR MARSHALL. HE WILL BE IN CONTACT TODAY WITH SAIC RE: THIS SITE AND WILL GET BACK TO ME. 02/17/10 JFO CALL TO JIM BURKE WITH SYNERGY. HE WILL CONTACT WASTE MGMT TO SEE IF THEY CAN RELEASE COPIES OF THE DISPOSAL RECEIPTS. HE IS UNSURE WEATHER HE CAN GET COPIES OF THE CONFIRMATORY SAMPLE RESULTS AT THIS TIME. THERE ARE LEGAL ISSUES BETWEEN SAIC AND SYNERGY. HE WILL GET BACK TO ME. 02/24/10 JFO RECEIVED THE DISPOSAL RECEIPTS. 04/21/10 JFO CALL TO JIM BURKE 484-369-5000 FOR COPIES OF THE ANALYTICAL. HE SAID BOB MAY WITH THE SAME PH# WOULD KNOW MORE ABOUT THE PROBLEMS THEY ARE HAVING GETTING THE ANALYTICAL. JFO LEFT A MESSAGE ON BOB'S V-MAIL. 07/21/10 JFO RECEIVE THE ANALYTICAL FROM THE MONITORING WELLS ON SITE. 07/27/10 JFO DISCUSSED WITH FG AND AGREED THAT THE SITE CAN BE INACTIVE . CONTACT IS TAMMY HESSLER W/SYNERGY ENVIRONMENTAL. TELCON WITH TAMMY H. TO LET HER KNOW. SHE WILL NEED AN INACTIVE LETTER. LETTER SENT, NO FURTHER ACTION REQUIRED AT THIS TIME. CLOSED "

Site Description: Site Location: This approximately 3.5-acre site is located at 373 Hertel Avenue near the intersection of Hertel Avenue and Military Road in a mixed residential and commercial area. The site borders with railroad properties on south and west, residences across the

MORGAN MATERIALS (AKA HERTEL WAREHOUSE) (Continued) **S102403028**

street on the north, and Buffalo Auto Wrecking (junk yard)on the east. Hertel Middle School is located approximately 450 feet east of the site. Site Features: The site consists of approx. 2,500 square feet warehouse building, parking lot and one entrance driveway. The surface of the site is primarily occupied by the concrete pad for the current and former warehouse buildings. The southern portion of the site has a paved access road to the loading docks in the rear of the warehouse. The remainder of the site is undeveloped. Current Zoning and Land Use: The site is currently zoned for Commercial use and is currently used as a commercial warehouse. Past Use of the Site: Since 1963, Morgan Materials, a broker of off-specification and discontinued chemicals, used the warehouse at this property to store chemicals for purpose of resale. In 1997, at the request of NYSDEC, EPA evaluated the site and removed approx. 20,000 drums from the warehouse. In July 2003, a fire destroyed much of the warehouse and cleanup activities removed all fire-related debris down to the floor slab on the main part of the warehouse. The site contamination appears to be due to spillage from the warehouse operations and fire. Site Geology and Hydrogeology: The overburden consists of sand and gravels fill from 10 to 24 ft. below ground surface. Sand and gravel layer thickens towards southeast. This is underlain by red silty clay layer. Perched water table exists in sand and gravel materials. Groundwater flows towards south and southeast.

Env Problem: Site Investigations: During 1999 investigation by Roy F. Weston for EPA, soil samples showed elevated levels of VOCs [16,000 ug/kg acetone at GP-17; 2,700 ug/kg trichloroethene (TCE) at GP-7; 1,400 ug/kg TCE at GP-10; 4,800 ug/kg tetrachloroethene (PCE) at GP-10; 31,000 ug/kg PCE at GP-12; 1,300 ug/kg tetrachloroethane at GP-7]. Soil samples also revealed the presence of wide spread contamination due to moderate levels of metals and PAHs. In 2000, Waste Resource Associates performed an investigation for Morgan Materials in the loading deck area. NYSDEC split soil sample showed 61 ppm PCE. A supplemental investigation by Malcolm Pirnie for Morgan Materials in 2001 also showed up to 88 ppm PCE in unsaturated fill . The investigation also showed 67 ppm VOCs {33 ppm- PCE, 5.8 ppm- TCE, 2.4 ppm - vinyl chloride, 26 ppm- acetone} in groundwater. Groundwater sampling by AFI for Morgan Materials in 2012 showed 22,200 ppb -cis DCE, 1,520 ppb - PCE, 1,220 ppb - TCE, and 4,450 ppb - vinyl chloride in MW-3. Site Characterization by AFI for Morgan Materials in 2013 included installation of two new on-site monitoring wells (MW-8, MW-9)and two off-site wells (MW-11, MW-12), excavation of 8 test pits, sampling of sewer bedding material at two locations, and collection of three on-site surface soil samples. Surface Soil: Manganese and some individual PAHs exceeded commercial SCOs (Mn-32,000 ppm, SCO -10,000 ppm; benzo(a)pyrene (3.3 ppm, SCO 1.0 ppm). Sub-Surface Soil: Several individual PAHs such as benzo(a)pyrene (23.0 ppm, SCO 1.0 ppm), benzo(a)anthracene (24.0 ppm, SCO-5.6 ppm), and benzo(b)fluoranthene (37.0 ppm, SCO-5.6 ppm) exceeded the commercial SCOs. Concentrations of total PAHs were below 500 ppm. Among the metals barium (454 ppm, SCO-400 ppm), copper (390 ppm, SCO-270 ppm), and manganese (32,000 ppm, SCO-10,000 ppm) exceeded commercial SCOs. The PCBs (3.4 ppm, SCO- 1.0 ppm) exceeded commercial SCOs at one location. Sewer bedding sample did not exceed commercial SCOs for VOCs. On-Site Groundwater: The highest levels of chlorinated VOCs were found in MW-7 [(1,1-dichloroethene - 46 ppb (GW Std-5ppb); cis-DCE 35,000 ppb (GW-Std.-5 ppb); PCE -4,900 ppb (GW Std.-5 ppb); TCE -1,600 ppb (GW Std.- 5 ppb); vinyl chloride 4,100 ppb (GW Std.-2

MORGAN MATERIALS (AKA HERTEL WAREHOUSE) (Continued) **S102403028**

ppb)] and highest levels of PAHs were found in MW-6 [benzo(a)anthracene-4.2 ppb (GW Std.-0.002 ppb); benzo(b)fluoranthene 6.5 ppb (GW Std.- 0.002 ppb); benzo(k)fluoranthene 2.1 ppb (GW Std.- 0.002 ppb); chrysene -4.5 ppb (GW Std. 0.002 ppb); indeno (1,2,3-cd)pyrene 2.7 ppb (GW Std. 0.002 ppb). Among the metals only iron and manganese exceeded the groundwater standards. Off-Site Groundwater: One of the downgradient monitoring wells (MW-11) in the junk yard property showed chlorinated VOCs (1,1-dichloroethene - 40 ppb, cis-DCE -13,000 ppb; PCE- 600 ppb; TCE- 980 ppb; vinyl chloride 340 ppb).

Health Problem:	The site is not completely fenced and persons who enter the site could contact contaminants in the soil by walking on the soil, digging or otherwise disturbing the soil. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for the inhalation of site contaminants due to soil vapor intrusion in the on-site building. The potential exists for migration of site-related contaminants to impact indoor air of off-site buildings.

Site Description:	Hertel Warehouse, Inc. (previously known as Morgan Materials) is a broker of off-specification and discontinued chemicals that are purchased for purpose of resale. The site is located in a mixed residential and industrial area. In 1997, at the request of NYSDEC, EPA evaluated the site and removed approx. 20,000 drums from the warehouse. EPA also performed a site investigation by testing soil from 17 boreholes and installing 5 overburden groundwater monitoring wells. The 1999 site investgation report by EPA shows contamination in soil {Tetrachloroethene (31 ppm), Trichloroethene (2.7 ppm), acetone (16 ppm)} and in groundwater { Tetrachloroethene (390 ppb), Trichloroethene (500 ppb), cis-1,2-dichloroethene (540 ppb)}. Contamination of metals and PAHs was also found at the site. In July 2003, a fire destroyed much of the warehouse and cleanup activities removed all fire related debris down to the floor slab on the main part of the warehouse. The supplemental investigation by Malcolm Pirnie in 2001 also showed upto 88 ppm Tetrachloroethene in unsaturated fill . The investigation also showed 67 ppm VOCs {33 ppm- Tetrachloroethene, 5.8 ppm- Trichloroethene, 2.4 ppm - Vinyl Chloride, 26 ppm- acetone} in groundwater. Please refer to site #915210,
Env Problem:	Site Investigations: In 1999, Roy F. Weston conducted a Site Investigation for EPA. The investigation consisted of doing 17 borings and installation of five monitoring wells. Soil samples showed elevated levels of VOCs [16,000 ug/kg acetone at GP-17; 2,700 ug/kg TCE at GP-7; 1,400 ug/kg TCE at GP-10; 4,800 ug/kg PCE at GP-10; 31,000 ug/kg PCE at GP-12; 1,300 ug/kg tetra chloro ethane at GP-7]. Soil samples also revealed the presence of wide spread contamination due to low to moderate levels of metals and PAHs. In 2000, Waste Resource Associates performed investigation in the loading deck area. NYSDEC split soil sample showed 61 ppm PCE. The supplemental investigation by Malcolm Pirnie in 2001 also showed up to 88 ppm Tetrachloroethene in unsaturated fill . The investigation also showed 67 ppm VOCs {33 ppm- Tetrachloroethene, 5.8 ppm- Trichloroethene, 2.4 ppm - Vinyl Chloride, 26 ppm- Acetone} in groundwater. Further investigation to determine the full extent of contamination and subsequent remedial actions is required.

Site Description:	Site Location: This approximately 3.5-acre site is located at 373 Hertel Avenue (aka 357 Hertel Avenue), 0.1 mile southeast of the intersection of Hertel Avenue and Military Road. Site Features: The site consists of a warehouse building, parking lot and one entrance driveway. The surface of the site is primarily occupied by the concrete pad for the current and former warehouse buildings. The southern portion of the site has a paved access road to the loading docks in the rear of the warehouse. The remainder of the site is undeveloped. Current Zoning/Use(s): The site is currently zoned for Commercial use and is currently used as a commercial warehouse.

MORGAN MATERIALS (AKA HERTEL WAREHOUSE) (Continued) **S102403028**

Historical Use(s): Since 1963, Morgan Materials, a broker of off-specification and discontinued chemicals, used the warehouse at this property to store chemicals for purpose of resale. In 1997, at the request of NYSDEC, EPA evaluated the site and removed approx. 20,000 drums from the warehouse. In July 2003, a fire destroyed much of the warehouse and cleanup activities removed all fire-related debris down to the floor slab on the main part of the warehouse. The site contamination appears to be due to spillage from the warehouse operations and fire. Site Geology and Hydrogeology: Bedrock is predominantly limestone, dolomite and shale. Thick veneers of stratified till have been deposited by glacial meltwater which also formed lakes at the ice margins where silts and clays accumulated. Erie County is covered by such lake sediments. The general soil type at the Site is described as Urban Land (Ud). This is indicative of the level to gently sloping land with at least 40 percent of the soil surface covered by asphalt, concrete, buildings, or other impervious structures typical of an urban environment. The soil consists of fill materials extending to depths of approximately four (4) feet below grade (ftbg) in the northwestern portion of the site to approximately 13 ftbg in the southeastern portion of the site. The fill materials include gravel, sand, silty clay and clay. The fill material is underlain by a native stiff silt and clay. The uppermost groundwater bearing unit appears to be situated at or near the interface between the soil and a natural clay layer at approximately 11 ftbg. Groundwater flow is to the southwest toward Scajaquada Creek.

Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Site Description: This site is the former location of the Atlas Steel Castings facility. During its years of operation, typical casting production processes consisted of specialty castings of carbon and low alloy steel, with products ranging in size from one pound to seven tons. Portions of the site were reportedly used for storage and/or disposal of production-related wastes and construction and demolition debris. In 1986 the Atlas Steel Company filed for bankruptcy and abandoned

HARTWELL STREET LANDFILL / ATLAS STEEL (Continued) **S108146359**

	the facility, vaca ting all buildings and leaving behind numerous drums, wood patterns, transformers and other debris. In 1989 the property was purchased by Robe rt Pasquarella and Daniel Mele for back taxes from the City of Buffalo. Since the purchase, many of the onsite buildings/structures have been razed and reportedly all of the onsite debris (drums, transformers, pallets, etc.) has been removed. Investigations conducted at this site include Erie County DEP field inspections in 1979 and 1981, an EPA Site Investigation in 1986, an NYSDEC Phase I Investigation in 1986 and an NYSDEC Phase II Investigation which was completed in February, 1992. None of the inspections and investigations conducted at this site could document the disposal of hazardous waste.
Env Problem:	There are no environmental problems associated with the disposal of hazardous waste at this site.

Site Description: The Outokumpu American Brass (OAB) (formerly Anaconda Brass) site is a 71 acre industrial complex located along west side of Military Road about 1/4 mile north of Hertel Avenue. The site contains several large industrial buildings for metals processing which are surrounded by parking facilities, access roadways, plant equipment, staged materials, and several large open areas that include publicly used recerational fields. The site also has several railroad sidings. The current plant has been in continuous operation since 1907 producing copper and copper alloys. Metal processes used at this site include metal casting, hot and cold rolling, annealing, slitting, milling, pickling and finishing. The site is situated in an industrial corridor in a highly developed commercial/residential/industrial area in City of Buffalo, Erie Co. The western and northern areas are bounded by active rail lines and industrial areas. The southern property boundary along Sayre Ave. is bordered by urban residential housing. The Military Road corridor is bounded by a mix of urban residential, commercial and a public school. An area at the north end of the complex was used for disposal of process wastes including coal ash, nickel and copper bearing slag, baghouse dust, spent refractories, scrap wood, saw dust and metal oxides. A 1979 NYS Hazardous Waste Survey Report completed by OAB indicated wastes generated by the facility included spent oils and previously mentioned process wastes. The survey report indicated that approximately 27,000 tons of metal slag and 21,600 tons of coal ash were disposed in the fill area at the north end of the site from 1930 to 1970. As a result, the NYSDEC placed the site on the Registry and initially identified the site as a Class 2A site, a temporary classification assigned to sites that have inadequate and/or insufficient data on health threats from the on-site wastes. In 1982, the NYSDEC, in conjunction with the US Geologic Survey conducted a limited site investigation confirming metals contamination at the site. In 1986 the NYSDEC conducted a Phase I assessment and hazard

ANACONDA COMPANY/AMERICAN BRASS (Continued) **S109416416**

ranking of the north area fill area. In 1988 the site owner initiated a Preliminary Site Investigation (PSI) of the plant complex and found elevated levels of PCBs, cadmium, lead and arsenic in the soil at various investigation areas (A thru N) around the plant complex. In 1990, as part of a real estate transaction, OAB initiated a Remedial Investigation (RI) to characterize contaminated areas identified in the PSI and verify the absence of contamination in other areas. The investigation revealed that the waste at the north end of the site did not pose a significant threat to human health or the environment. As a result, the NYSDEC reclassified the disposal area in 1994 from a Class 2A site to a Class 3 site (the site does not pose a significant threat). In 1995, a Supplemental RI was conducted. An additional area (Area O) was investigated during the Supplemental RI. The results of the RI and Supplemental RI were used to assess human health impacts from the contaminants on the site (Human Health Risk Assessment - 1995) and evaluate remediation measures (Feasibility Study (FS)-1996). In 1999, OAB initiated additional sampling of soils near adjacent baseball fields (Area J) and Area O for arsenic. The results identified a small area with arsenic at levels above background in Area J. In 1999, OAB submitted a Remedial Action Work Plan (RAWP) for Areas A (7.16 acres), C (0.71 acres), D (1.06 acres), and M (1.11 acres). The RAWP specified covering the respective areas with an asphalt cover system and improving site security measures to minimize human and environmental exposure risks. The remedial action work was completed by 2002. The asphalt covered areas are currently used as parking areas. In addition to the above, a portion of Area C where PCBs were detected in several soil samples at concentrations greater than 1 mg/kg were removed and managed accordingly at an offsite facility. In 2004, OAB entered into a Voluntary Cleanup Program (VCP) agreement with the NYSDEC (VCP Site No. V00314), to address the arsenic contamination found in Area J (7.78 acres) adjacent to plant-owned baseball fields, and implementing overall site management and institutional controls to maintain the integrity and security of the remediated areas (Areas A, C, D and M). A remediation work plan for Area J was submitted in 2004 which included covering a 0.93 acre section of Area J with a vegetated soil cover layer and enclosing the area with security fencing. The institutional controls for the site included filing a deed restriction to restrict future use of the site and conduct periodic inspections. Area J remedial work was completed in December 2005. Following the completion of the specified remediation measures, a Remedial Action Report (RAR) documenting the remediation work at the designated areas subject to the VCP agreement was submitted for Department review. The RAR also included site management controls presented in an Operation, Maintenance and Operation (OMM) Plan and Soil Management Plan (SMP). Compliance with OMM requirements will be certified on a bi-annual basis. The recording of deed restrictions for the remediated areas were filed with the Erie County Clerk in 2007. The RAR was approved in 2007. Upon meeting all obligations of the VCP agreement, The Department issued a release and covenant not to sue in 2007.

Env Problem: Localized surface soils were contaminated with cadmium, lead and arsenic. Perched groundwater is contaminated with lead as well. The perched water table and the secondary water table are separated by a 30 ft. clay layer, and do not appear to be hydraulically connected. As part of the Voluntary Cleanup Program Agreement, an asphalt cover over areas containing lead and cadmium eliminated surface water run-off of contaminants and direct contact concerns. A vegetated soil

ANACONDA COMPANY/AMERICAN BRASS (Continued) **S109416416**

	cover over arsenic contaminated soils eliminated dust potential and direct contact concerns. PCB impacted soils in a discrete area were removed from site and managed accordingly. The site does not currently pose a significant threat to the environment. A DEC approved Operation, Maintenance and Monitoring Plan and a Soil Management Plan specify routine operation, maintenance and monitoring measures for engineering controls at the site and management of soils during invasive activities in the defined remediation areas. A recorded deed restriction limits use and development of the site.
Health Problem:	The site is located in a mixed industrial/residential area in the City of Buffalo. Exposures to contaminated groundwater via drinking water are not expected because the area is served with public water and there are no known private wells to exist nearby. The site is graded and partially covered with coal ash material and cinders. There are baseball fields that are used by a community recreation association on a portion of the site. Surface soils in the ball-field area contain metals at levels generally representative of background conditions. Elevated levels of metals were found in on-site subsurface soils during test pit and soil boring investigations. To prevent potential human exposures to buried contaminants, subsurface soils should not be disturbed.

Site Description: The Outokumpu American Brass (OAB) (formerly Anaconda Brass) site is a 71 acre industrial complex located along west side of Military Road about 1/4 mile north of Hertel Avenue. The site contains several large industrial buildings for metals processing which are surrounded by parking facilities, access roadways, plant equipment, staged materials, and several large open areas that include publicly used recerational fields. The site also has several railroad sidings. The current plant has been in continuous operation since 1907 producing copper and copper alloys. Metal processes used at this site include metal casting, hot and cold rolling, annealing, slitting, milling, pickling and finishing. The site is situated in an industrial corridor in a highly developed commercial/residential/industrial area in City of Buffalo, Erie Co. The western and northern areas are bounded by active rail lines and industrial areas. The southern property boundary along Sayre Ave. is bordered by urban residential housing. The Military Road corridor is bounded by a mix of urban residential, commercial and a public school. An area at the north end of the complex was used for disposal of process wastes including coal ash, nickel and copper bearing slag, baghouse dust, spent refractories, scrap wood, saw dust and metal oxides. A 1979 NYS Hazardous Waste Survey Report completed by OAB indicated wastes generated by the facility included spent oils and previously mentioned process wastes. The survey report indicated that approximately 27,000 tons of metal slag and 21,600 tons of coal ash were disposed in the fill area at the north end of the site from 1930 to 1970. As a result, the NYSDEC placed the site on the Registry and initially identified the site as a Class 2A site, a temporary classification assigned to sites that have inadequate and/or insufficient data on health threats from the on-site wastes. In 1982, the NYSDEC, in conjunction with the US Geologic Survey conducted a limited site investigation confirming metals contamination at the site. In 1986 the NYSDEC conducted a Phase I assessment and hazard ranking of the north area fill area. In 1988 the site owner initiated a Preliminary Site Investigation (PSI) of the plant complex and found elevated levels of PCBs, cadmium, lead and arsenic in the soil at

ANACONDA COMPANY/AMERICAN BRASS (Continued) **S109416416**

various investigation areas (A thru N) around the plant complex. In 1990, as part of a real estate transaction, OAB initiated a Remedial Investigation (RI) to characterize contaminated areas identified in the PSI and verify the absence of contamination in other areas. The investigation revealed that the waste at the north end of the site did not pose a significant threat to human health or the environment. As a result, the NYSDEC reclassified the disposal area in 1994 from a Class 2A site to a Class 3 site (the site does not pose a significant threat). In 1995, a Supplemental RI was conducted. An additional area (Area O) was investigated during the Supplemental RI. The results of the RI and Supplemental RI were used to assess human health impacts from the contaminants on the site (Human Health Risk Assessment - 1995) and evaluate remediation measures (Feasibility Study (FS)-1996). In 1999, OAB initiated additional sampling of soils near adjacent baseball fields (Area J) and Area O for arsenic. The results identified a small area with arsenic at levels above background in Area J. In 1999, OAB submitted a Remedial Action Work Plan (RAWP) for Areas A (7.16 acres), C (0.71 acres), D (1.06 acres), and M (1.11 acres). The RAWP specified covering the respective areas with an asphalt cover system and improving site security measures to minimize human and environmental exposure risks. The remedial action work was completed by 2002. The asphalt covered areas are currently used as parking areas. In addition to the above, a portion of Area C where PCBs were detected in several soil samples at concentrations greater than 1 mg/kg were removed and managed accordingly at an offsite facility. In 2004, OAB entered into a Voluntary Cleanup Program (VCP) agreement with the NYSDEC (VCP Site No. V00314), to address the arsenic contamination found in Area J (7.78 acres) adjacent to plant-owned baseball fields, and implementing overall site management and institutional controls to maintain the integrity and security of the remediated areas (Areas A, C, D and M). A remediation work plan for Area J was submitted in 2004 which included covering a 0.93 acre section of Area J with a vegetated soil cover layer and enclosing the area with security fencing. The institutional controls for the site included filing a deed restriction to restrict future use of the site and conduct periodic inspections. Area J remedial work was completed in December 2005. Following the completion of the specified remediation measures, a Remedial Action Report (RAR) documenting the remediation work at the designated areas subject to the VCP agreement was submitted for Department review. The RAR also included site management controls presented in an Operation, Maintenance and Operation (OMM) Plan and Soil Management Plan (SMP). Compliance with OMM requirements will be certified on a bi-annual basis. The recording of deed restrictions for the remediated areas were filed with the Erie County Clerk in 2007. The RAR was approved in 2007. Upon meeting all obligations of the VCP agreement, The Department issued a release and covenant not to sue in 2007.

Env Problem: Localized surface soils were contaminated with cadmium, lead and arsenic. Perched groundwater is contaminated with lead as well. The perched water table and the secondary water table are separated by a 30 ft. clay layer, and do not appear to be hydraulically connected. As part of the Voluntary Cleanup Program Agreement, an asphalt cover over areas containing lead and cadmium eliminated surface water run-off of contaminants and direct contact concerns. A vegetated soil cover over arsenic contaminated soils eliminated dust potential and direct contact concerns. PCB impacted soils in a discrete area were removed from site and managed accordingly. The site does not

ANACONDA COMPANY/AMERICAN BRASS (Continued) **S109416416**

	currently pose a significant threat to the environment. A DEC approved Operation, Maintenance and Monitoring Plan and a Soil Management Plan specify routine operation, maintenance and monitoring measures for engineering controls at the site and management of soils during invasive activities in the defined remediation areas. A recorded deed restriction limits use and development of the site.
Health Problem:	The site is located in a mixed industrial/residential area in the City of Buffalo. Exposures to contaminated groundwater via drinking water are not expected because the area is served with public water and there are no known private wells to exist nearby. The site is graded and partially covered with coal ash material and cinders. There are baseball fields that are used by a community recreation association on a portion of the site. Surface soils in the ball-field area contain metals at levels generally representative of background conditions. Elevated levels of metals were found in on-site subsurface soils during test pit and soil boring investigations. To prevent potential human exposures to buried contaminants, subsurface soils should not be disturbed.

Site Code: 58443
Site Description: The Outokumpu American Brass (OAB) (formerly Anaconda Brass) site is a 71 acre industrial complex located along west side of Military Road about 1/4 mile north of Hertel Avenue. The site contains several large industrial buildings for metals processing which are surrounded by parking facilities, access roadways, plant equipment, staged materials, and several large open areas that include publicly used recerational fields. The site also has several railroad sidings. The current plant has been in continuous operation since 1907 producing copper and copper alloys. Metal processes used at this site include metal casting, hot and cold rolling, annealing, slitting, milling, pickling and finishing. The site is situated in an industrial corridor in a highly developed commercial/residential/industrial area in City of Buffalo, Erie Co. The western and northern areas are bounded by active rail lines and industrial areas. The southern property boundary along Sayre Ave. is bordered by urban residential housing. The Military Road corridor is bounded by a mix of urban residential, commercial and a public school. An area at the north end of the complex was used for disposal of process wastes including coal ash, nickel and copper bearing slag, baghouse dust, spent refractories, scrap wood, saw dust and metal oxides. A 1979 NYS Hazardous Waste Survey Report completed by OAB indicated wastes generated by the facility included spent oils and previously mentioned process wastes. The survey report indicated that approximately 27,000 tons of metal slag and 21,600 tons of coal ash were disposed in the fill area at the north end of the site from 1930 to 1970. As a result, the NYSDEC placed the site on the Registry and initially identified the site as a Class 2A site, a temporary classification assigned to sites that have inadequate and/or insufficient data on health threats from the on-site wastes. In 1982, the NYSDEC, in conjunction with the US Geologic Survey conducted a limited site investigation confirming metals contamination at the site. In 1986 the NYSDEC conducted a Phase I assessment and hazard ranking of the north area fill area. In 1988 the site owner initiated a Preliminary Site Investigation (PSI) of the plant complex and found elevated levels of PCBs, cadmium, lead and arsenic in the soil at various investigation areas (A thru N) around the plant complex. In 1990, as part of a real estate transaction, OAB initiated a Remedial Investigation (RI) to characterize contaminated areas identified in the PSI and verify the absence of contamination in other areas. The investigation revealed that the waste at the north end of the site did not pose a significant threat to human health or the environment. As a result, the NYSDEC reclassified the disposal area in 1994 from a

ANACONDA COMPANY/AMERICAN BRASS (Continued) **S109416416**

Class 2A site to a Class 3 site (the site does not pose a significant threat). In 1995, a Supplemental RI was conducted. An additional area (Area O) was investigated during the Supplemental RI. The results of the RI and Supplemental RI were used to assess human health impacts from the contaminants on the site (Human Health Risk Assessment - 1995) and evaluate remediation measures (Feasibility Study (FS)-1996). In 1999, OAB initiated additional sampling of soils near adjacent baseball fields (Area J) and Area O for arsenic. The results identified a small area with arsenic at levels above background in Area J. In 1999, OAB submitted a Remedial Action Work Plan (RAWP) for Areas A (7.16 acres), C (0.71 acres), D (1.06 acres), and M (1.11 acres). The RAWP specified covering the respective areas with an asphalt cover system and improving site security measures to minimize human and environmental exposure risks. The remedial action work was completed by 2002. The asphalt covered areas are currently used as parking areas. In addition to the above, a portion of Area C where PCBs were detected in several soil samples at concentrations greater than 1 mg/kg were removed and managed accordingly at an offsite facility. In 2004, OAB entered into a Voluntary Cleanup Program (VCP) agreement with the NYSDEC (VCP Site No. V00314), to address the arsenic contamination found in Area J (7.78 acres) adjacent to plant-owned baseball fields, and implementing overall site management and institutional controls to maintain the integrity and security of the remediated areas (Areas A, C, D and M). A remediation work plan for Area J was submitted in 2004 which included covering a 0.93 acre section of Area J with a vegetated soil cover layer and enclosing the area with security fencing. The institutional controls for the site included filing a deed restriction to restrict future use of the site and conduct periodic inspections. Area J remedial work was completed in December 2005. Following the completion of the specified remediation measures, a Remedial Action Report (RAR) documenting the remediation work at the designated areas subject to the VCP agreement was submitted for Department review. The RAR also included site management controls presented in an Operation, Maintenance and Operation (OMM) Plan and Soil Management Plan (SMP). Compliance with OMM requirements will be certified on a bi-annual basis. The recording of deed restrictions for the remediated areas were filed with the Erie County Clerk in 2007. The RAR was approved in 2007. Upon meeting all obligations of the VCP agreement, The Department issued a release and covenant not to sue in 2007.

Env Problem: Localized surface soils were contaminated with cadmium, lead and arsenic. Perched groundwater is contaminated with lead as well. The perched water table and the secondary water table are separated by a 30 ft. clay layer, and do not appear to be hydraulically connected. As part of the Voluntary Cleanup Program Agreement, an asphalt cover over areas containing lead and cadmium eliminated surface water run-off of contaminants and direct contact concerns. A vegetated soil cover over arsenic contaminated soils eliminated dust potential and direct contact concerns. PCB impacted soils in a discrete area were removed from site and managed accordingly. The site does not currently pose a significant threat to the environment. A DEC approved Operation, Maintenance and Monitoring Plan and a Soil Management Plan specify routine operation, maintenance and monitoring measures for engineering controls at the site and management of soils during invasive activities in the defined remediation areas. A recorded deed restriction limits use and development of the site.

Health Problem: The site is located in a mixed industrial/residential area in the

ANACONDA COMPANY/AMERICAN BRASS (Continued) **S109416416**

City of Buffalo. Exposures to contaminated groundwater via drinking water are not expected because the area is served with public water and there are no known private wells to exist nearby. The site is graded and partially covered with coal ash material and cinders. There are baseball fields that are used by a community recreation association on a portion of the site. Surface soils in the ball-field area contain metals at levels generally representative of background conditions. Elevated levels of metals were found in on-site subsurface soils during test pit and soil boring investigations. To prevent potential human exposures to buried contaminants, subsurface soils should not be disturbed.

ANACONDA COMPANY/AMERICAN BRASS (Continued) **S109416416**

from the contaminants on the site (Human Health Risk Assessment - 1995) and evaluate remediation measures (Feasibility Study (FS)-1996). In 1999, OAB initiated additional sampling of soils near adjacent baseball fields (Area J) and Area O for arsenic. The results identified a small area with arsenic at levels above background in Area J. In 1999, OAB submitted a Remedial Action Work Plan (RAWP) for Areas A (7.16 acres), C (0.71 acres), D (1.06 acres), and M (1.11 acres). The RAWP specified covering the respective areas with an asphalt cover system and improving site security measures to minimize human and environmental exposure risks. The remedial action work was completed by 2002. The asphalt covered areas are currently used as parking areas. In addition to the above, a portion of Area C where PCBs were detected in several soil samples at concentrations greater than 1 mg/kg were removed and managed accordingly at an offsite facility. In 2004, OAB entered into a Voluntary Cleanup Program (VCP) agreement with the NYSDEC (VCP Site No. V00314), to address the arsenic contamination found in Area J (7.78 acres) adjacent to plant-owned baseball fields, and implementing overall site management and institutional controls to maintain the integrity and security of the remediated areas (Areas A, C, D and M). A remediation work plan for Area J was submitted in 2004 which included covering a 0.93 acre section of Area J with a vegetated soil cover layer and enclosing the area with security fencing. The institutional controls for the site included filing a deed restriction to restrict future use of the site and conduct periodic inspections. Area J remedial work was completed in December 2005. Following the completion of the specified remediation measures, a Remedial Action Report (RAR) documenting the remediation work at the designated areas subject to the VCP agreement was submitted for Department review. The RAR also included site management controls presented in an Operation, Maintenance and Operation (OMM) Plan and Soil Management Plan (SMP). Compliance with OMM requirements will be certified on a bi-annual basis. The recording of deed restrictions for the remediated areas were filed with the Erie County Clerk in 2007. The RAR was approved in 2007. Upon meeting all obligations of the VCP agreement, The Department issued a release and covenant not to sue in 2007.

Env Problem: Localized surface soils were contaminated with cadmium, lead and arsenic. Perched groundwater is contaminated with lead as well. The perched water table and the secondary water table are separated by a 30 ft. clay layer, and do not appear to be hydraulically connected. As part of the Voluntary Cleanup Program Agreement, an asphalt cover over areas containing lead and cadmium eliminated surface water run-off of contaminants and direct contact concerns. A vegetated soil cover over arsenic contaminated soils eliminated dust potential and direct contact concerns. PCB impacted soils in a discrete area were removed from site and managed accordingly. The site does not currently pose a significant threat to the environment. A DEC approved Operation, Maintenance and Monitoring Plan and a Soil Management Plan specify routine operation, maintenance and monitoring measures for engineering controls at the site and management of soils during invasive activities in the defined remediation areas. A recorded deed restriction limits use and development of the site.

Health Problem: The site is located in a mixed industrial/residential area in the City of Buffalo. Exposures to contaminated groundwater via drinking water are not expected because the area is served with public water and there are no known private wells to exist nearby. The site is graded and partially covered with coal ash material and cinders.

ANACONDA COMPANY/AMERICAN BRASS (Continued) **S109416416**

There are baseball fields that are used by a community recreation association on a portion of the site. Surface soils in the ball-field area contain metals at levels generally representative of background conditions. Elevated levels of metals were found in on-site subsurface soils during test pit and soil boring investigations. To prevent potential human exposures to buried contaminants, subsurface soils should not be disturbed.

Site Description: Location: The Iroquois Gas/Westwood Pharmaceuticals Terrestrial Site (915141A) encompasses approximately 8.8 acres at 100 Forest Avenue in the City of Buffalo, Erie County. The site is bordered by a City of Buffalo impound lot to the north, Dart Street and a mix of industrial and residential properties to the east, Bradley Street and a mix of vacant industrial and residential properties to the south, and Scajaquada Creek and industrial properties to the west. Scajaquada Creek has been impacted by site contaminants, and is listed as the NFG - Iroquois Gas/Westwood Pharmaceuticals Riparian Site (915141B). Site Features: The topography of the site and the surrounding area is relatively flat, but slopes steeply toward Scajaquada Creek to the west. Most surface water runoff is toward on-site drainage ditches and storm sewers, although some surface water flows directly to Scajaquada Creek during precipitation events. Current Use and Zoning: The site is zoned for industrial use and is currently leased to a trucking firm. Surrounding properties include a mix of commercial, light and heavy industrial, and residential parcels. Past Use of the Site: The site operated as a manufactured gas plant from approximately 1897 through 1955. Iroquois Gas (now National Fuel Gas) owned and operated the plant from 1925 through 1955, and continued to store gas on site until 1972. Iroquois Gas removed and/or demolished some of the on-site structures in 1968, and buried waste materials such as heavy tars, sludges, coal, coke, and demolition debris. In 1972, Westwood Pharmaceutical (now Bristol-Myers Squibb Company, Inc.) purchased the property and demolished the remaining on-site structures. A 100,000 square foot warehouse (Building 6; Figure 2) was constructed on the southern portion of the site. In 1985, a second 100,000 square foot warehouse (Building 9; Figure 2) was constructed immediately north of Building 6. During the 1985 construction phase, soil and groundwater contaminated with polynuclear aromatic hydrocarbons (PAHs), benzene, toluene, ethylbenzene and xylene (BTEX) were encountered. Between 1986 and 1988, several monitoring wells were installed and groundwater samples were analyzed. Based upon these results, the Department listed the site in the Registry of Inactive Hazardous Waste Disposal Sites in 1989. Remedial History: A Remedial Investigation/Feasibility Study (RI/FS) was completed in 1993 by Westwood Pharmaceuticals to define the nature and extent of contamination resulting from historic site activities, and to provide potential remedial alternatives for the site. In March 1994 a Record of Decision (ROD) was issued by the Department for both the terrestrial and riparian portions of the site. The remedy for the terrestrial portion of the site consisted of (1) the installation of a clay cap to contain the source area

IROQUOIS GAS/WESTWOOD PHARM. TERRESTRIAL (Continued) **S118950587**

contaminants; (2) the installation of a sheet pile wall along Scajaquada Creek; (3) the installation of groundwater/NAPL extraction wells for gradient control; (5) groundwater and NAPL treatment; and (6) long-term groundwater monitoring and maintenance of the extraction and treatment systems. Site Remediation: In 1995 a Consent Decree was issued by Federal Court that required Westwood to implement the approved remedy for the terrestrial portion of the site. The remediation began in 1996 and was completed in 1997. The sheet pile wall was installed by National Fuel Gas in 1996. The groundwater extraction and treatment system became operational in 1997 and has operated continuously since that time. Site Management: Long-term operation, maintenance and monitoring (Site Management) of the site remedial systems are on-going. Site Management activities include inspections, system maintenance, hydraulic monitoring and groundwater quality monitoring. Periodic Review Reports are submitted to the NYSDEC semi-annually, with an Institutional Control/Engineering Control certification submitted annually. As a result of these submittals, it was determined that the remedy is not performing as designed. The Department required that the RP initiate a Corrective Measures study to evaluate the current remedial system and propose alternatives. The results of this study were approved via the Department's issuance of a Explanation of Significant Differance on November 7, 2014. The Company prepared a design for the construction of an interceptor trench system to replace the existing collection well system on site. Installation began in 2017. Site Geology and Hydrogeology: The geology of the site includes 4 to 32 feet of fill material consisting of silt, clay, gravel, ash, slag, clinker, construction debris, bricks and wood chips, overlying native soil consisting of impermeable silty clay. Depth to groundwater in the fill material is variable, ranging from 3 to 19 feet below ground surface. Groundwater in this zone flows west toward Scajaquada Creek.

Env Problem: Installation of a groundwater/non-aqueous phase liquid (NAPL) collection and treatment system, along with a sheet pile wall adjacent to Scajaquada Creek and capping of the site, was designed to prevent the off-site migration of contaminated groundwater and NAPL from the site to the creek. In September 2011, National Fuel Gas notified the Department that NAPL was seeping through a lift hole in the sheet pile wall along the creek. The lift hole was subsequently patched with hydraulic cement. Follow-up inspections of the sheet pile wall revealed that groundwater flows through other lift holes during wet weather conditions. These seeps have been sampled and found to contain elevated concentrations of benzene, ethylbenzene, isopropylbenzene, toluene and total xylenes. The presence of seeps in the sheet pile wall indicates that during wet weather conditions the groundwater extraction system does not capture all contaminated groundwater as it moves toward Scajaquada Creek.

Health Problem: Exposures via drinking water are not expected because homes in the area are served by public water and no known private wells exist in the immediate area. The entire site has been capped or paved and on-site access is restricted by fencing and 24-hour security which eliminates the potential for direct contact exposures to on-site contaminants.

Assessment of Health:	A NYSDEC preliminary investigation documented contamination of subsurface soils in the fill area, surface soils in the oil spill area, and surface water and sediments in Scajaquada Creek. Contaminants detected include polycyclic aromatic hydrocarbons, PCBs, phenolics, volatile organics and heavy metals. A petition to delist approximately a 3 acre portion of the site for the construction of a store and associated parking lot was submitted to NYSDEC and approved. A soil removal action was completed in the oil spill area thereby removing the potential for direct contact with contaminants in the surface soils. The area along the north bank of the Scajaquada Creek has been proposed for a public walkway/bicycle path. Sampling of this area for PCBs has not shown any health concern.
Description:	The site was used to dispose foundry sand, slag, lubricants, hydraulic oil, paper and wood. The sediment samples taken from the Scajaquada Creek adjacent to the site during July of 1982 did not show any contamination. Inspections by DEC during 1985 indicated spills of waste oil at the site. About 100 barrels containing oil were stored on the ground and many of them were leaking. Later, Pratt & Letchworth removed all the barrels from the site. A Phase I Investigation was completed in 1987. A Phase II Investigation for this site was completed in 1989. A Consent Order (CO) for an Interim Remedial Measure (IRM) / Site Investigation was signed in August 1992. The area contaminated with PCBs was excavated and the contaminated soils were disposed off site in early 1994. The current owners have placed a new fill cover over most of the site. The Site Investigation was completed in 1993 and the report was submitted in January of 1995. The PCB contaminated area has been cleaned up below the selected clean up level of 1 ppm. The site investigation outside of the IRM area did not show PCBs above the clean up levels. No known

PRATT & LETCHWORTH (Continued) **S108061182**

hazardous wastes remain on site. A "No Further Action" Record of Decision (ROD) was signed in early 1995.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

ENV RES DECL: Environmental Restrictive Declarations
The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution.

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Financial Assurance 2: Financial Assurance Information Listing
A listing of financial assurance information for hazardous waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 12/29/2017

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/11/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

East Map:	5937939 BUFFALO NE, NY
Version Date:	2013

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

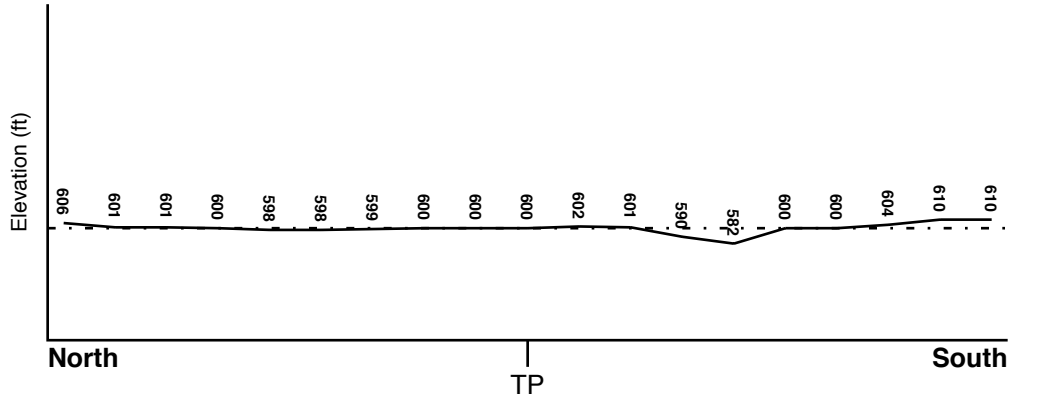
TOPOGRAPHIC INFORMATION

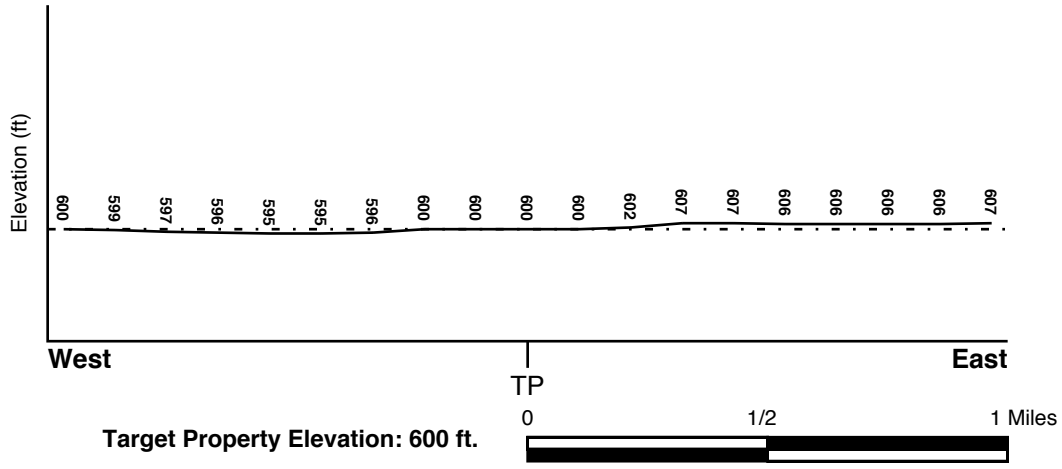
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 600 ft.

0 1/2 1 Miles

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
36029C0185G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3602300015B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BUFFALO NW	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
5	1/2 - 1 Mile East	E
1G	1/2 - 1 Mile East	E

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

RE: PUBLIC RECORDS REQUEST of 5/1/2019, Reference # W051773-050119

Dear Mr. Nick Suraci,
I write in response to your Freedom of Information Law (FOIL) request seeking:
We are performing a phase I ESA and would like tor review any and all information on the following properties: 111 Marion Street, Buffalo, NY, 141 Marion Street, Buffalo, NY, and 155 Marion Street, Buffalo, NY.

A diligent search of the files maintained by DEC produced no responsive records.

If I can be of further assistance, please contact me at 716 851-7220 and reference FOIL W051773-050119, or simply reply to this email.

Sincerely,
Region 9 FOIL Coordinator

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TurnKey Environmental Restoration, LLC. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1925 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

INTRODUCTION

Per your request, LCS, along with a tank removal and excavating contractor, removed one single-walled steel approximate 5,000-gallon #2 fuel oil underground storage tank (UST). In addition, LCS excavated and disposed of fuel oil-impacted soils. The UST was located along the northern outside wall of the bowling center building. The work commenced on May 27, 2002 and was completed on June 19, 2003. This report summarizes the work completed.

Based on evidence of impacted soil, the (New York State Department of Environmental Conservation (NYSDEC) was notified and spill number 0375107 was assigned to the site. Mr. John Otto of the NYSDEC was assigned as the spill engineer for the site.

PROPERTY DESCRIPTION

The subject property is located at 686 Amherst Street, Buffalo, New York. The property is approximately 0.9 acres improved by one structure, which measures approximately 29,800 square feet. The subject property is currently utilized as a bowling center. A site location map is presented in Figure 1 in Appendix A. A site investigation map showing the work area is presented in Figure 2 in Appendix A.

PROJECT BACKGROUND

LCS completed a Phase I Environmental Site Assessment report dated December 13, 2002. That investigation identified the presence of at least one UST along the northern portion of the subject structure as indicated by a vent pipe protruding from the ground along the northern exterior wall of the subject structure.

At your request, LCS completed a work proposal dated April 16, 2003 to remove the UST and impacted soils.

WORK DESCRIPTION

Prior to completion of the UST closure, the NYSDEC was notified by LCS. LCS supervised the removal and cleaning of the UST in accordance with 6 NYCRR Part 613.9 (b) *Closure of Petroleum Bulk Storage tanks permanently out-of-service.*

Generally, the following tasks were completed to remove the UST and soils.

UST Removal/Excavation

The UST was removed and impacted soils were removed from one excavation on the subject property. Refer to Figure 2- Site Investigation Map for relative locations of the UST and associated excavation. The UST was removed in the following manner.

Tank Removal

The asphalt cover and surficial soil were removed from above the tank. It was noted that the tank contained approximately 4,700-gallons of fuel oil and water. The liquid contents were removed via a vacuum-truck. The tank was subsequently assessed for explosive vapors and then removed from the ground. LCS confirmed that the UST was approximately 5,000-gallons in volume and determined the tank was a Sti-P3 certified UST constructed of carbon steel. The tank was noted in poor condition with several visible holes. The ancillary piping was also removed.

The tank, along with the associated piping, was cleaned on-site of liquid and sludge prior to off-site disposal at a metal recycling facility. See Appendix C for the disposal receipt. (Disposal documentation for the sludge will be provided once received by LCS.) Any minimal liquid or scale remaining was placed with the impacted soil for off-site disposal.

Soil Excavation

Upon removal of the UST, the tank excavation was inspected for impacted soils. Based on visual observations and field screening with a photoionization detector (PID), it was determined that apparent fuel oil-impacted soils were present within the excavation. As such, fuel oil-impacted soil was removed and placed on and covered with 10-mil high density polyethylene (HDPE) plastic to prevent the soil from the elements while awaiting off-site disposal.

The excavation was continued to remove impacted soils. After removal of suspected impacted soils, initial confirmatory soil samples were taken from the bottom and sidewalls of the excavation, the results of which were forwarded to the NYSDEC for their review. (See Confirmatory Soil Sampling, below, for additional information on collection and testing procedures.) Upon review of the analytical soil sample results, the NYSDEC required no additional excavation or testing. The excavation backfilled with crusher run stone and pea gravel.

The excavation was approximately 15 feet wide, 30 feet long and 18 feet deep. The excavation was limited in an easterly direction due to the proximity to the building foundation. Approximately 117 tons of fuel oil impacted soils were removed from the excavation (Refer to Appendix C for disposal receipts).

Confirmatory Sampling

Once it appeared that accessible impacted soil had been removed, individual composite soil samples were collected from the sidewalls and bottom of the excavation. These samples were submitted to a New York State Department of Health (NYSDOH)-approved laboratory for analysis for Spill Technology and Remediation Series (STARS) list volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) via the United States Environmental Protection Agency (USEPA) Methods 8260 STARS List plus 10 Tentatively Identified Compounds (TICs) and 8270 STARS List plus 15 TICs, respectively. The analytical methods chosen were those typically required by the NYSDEC for petroleum storage facilities.

Confirmatory Soil Sampling Results

The results of the analytical testing completed indicated that there were no VOC or SVOC analytes in exceedance of applicable NYSDEC guidelines as set forth within the *Technical and Administrative Guidance Memorandum (TAGM) 4046 (August 2001)* in any of the confirmatory soil samples. The complete analytical report is located in Appendix B.

CONCLUSION

One single-walled steel approximate 5,000-gallon UST and ancillary piping was removed from the above-referenced property in general compliance with 6 NYCRR Part 613.9 (b) *Closure of Petroleum Bulk Storage tanks permanently out-of-service.* Approximately 117 tons of impacted soil were excavated, characterized and transported off-site for disposal in an approved solid waste facility. All tanks and ancilliary piping were cleaned and disposed of off-site. Upon completion of the initial excavations, one bottom sample and four sidewall samples were tested for each excavation. The NYSDEC required no additional soil removal or confirmatory sampling from the excavation. The excavation was backfilled.

The tank disposal receipt, tank contents transportation and disposal documentation and soil disposal records are included in Appendix C. It is recommended that this documentation be maintained for future reference, if necessary.

RECOMMENDATIONS

It is recommended that this report be submitted to the NYSDEC and the NYSDEC be requested to re-classify the subject site spill to "closed" based on the limited impact remaining. At your request, LCS will forward a copy of this report to the NYSDEC.

Respectfully submitted,

METHODOLOGIES

The specific methodologies employed in obtaining the analytical data reported are indicated on each of the result forms. The method numbers shown refer to the following U.S. Environmental Protection Agency Reference:

Methods for Chemical Analysis of Water and Wastes. EPA 600/4-79-020, March 1979, Revised 1983, U.S. Environmental Monitoring and Support Laboratory, Cincinnati, Ohio 45268.

Federal Register, 40 CFR Part 136: Guidelines Establishing Test Procedures for the Analysis of Pollutants Under the Clean Water Act. Revised July 1992.

Test Methods for Evaluating Solid Waste: Physical/Chemical Methods. Third Edition, Revised December 1996, U.S. EPA SW-846.

Annual Book of ASTM Standards, Volume II. ASTM, 100 Harbor Drive, West Conshohocken, PA 19428-2959.

Standard Methods for the Examination of Water and Wastewater. (20th Edition). American Public Health Association, 1105 18th Street, NW, Washington, D.C. 20036.

DETECTION LIMIT DEFINITIONS

MDL = Method Detection Limit. When reported, the MDL is the minimium concentration that can be measured and reported with 99 percent confidence that the concentration is greater than zero.

MQL = Method Quantitation Limit. The MQL is the minimium concentration that can be reliably reported. The MQL is equal to the concentration of the lowest standard used for the initial calibration of the instrument.

Reporting Limit = A reporting limit is the minimium concentration that can be measured and reported for analyses where the initial calibration is not applicable. The reporting limit is based on the specifics of the analysis procedure.

ORGANIC DATA QUALIFIERS

U - Indicates compound was analyzed for but not detected at the stated MQL or Reporting Limit. If the MDL has been reported, U indicates that the compound was not detected at the MDL.

J - Indicates an estimated value. This flag is used to qualify the following: when estimating a concentration for tentatively identified compounds where a 1:1 response is assumed; a compound is detected in the sample but the result is less than the method quantitation limit but greater than the statistically calculated laboratory method detection limit; the result for a compound is estimated due to the analysis of a sample beyond the USEPA defined holding time; the result for a compound is estimated due to a quality control sample result that is outside the laboratory quality control recovery limits.

C - This flag applies to pesticide results where the identification has been confirmed by GC/MS.

B - This flag is used when the analyte is found in the associated blank as well as the sample.

E - This flag identifies all compounds whose concentrations exceed the calibration range of the GC/MS instrument of that specific analysis.

D - This flag identifies all compounds identified in an analysis at a secondary dilution factor.

G - Matrix spike recovery is greater than the expected upper limit of analytical performance.

L - Matrix spike recovery is less than the expected lower limit of analytical performance.

 # - Indicates that a surrogate recovery was found to be outside the expected limits of analytical performance.

$ - Indicates that the surrogate compound was diluted out. The sample had to be diluted to obtain analytical results and a recovery could not be calculated.

(%) - Indicates that the compound is a surrogate and that the value reported for this compound is in percent recovery. The quality control recovery limits are indicated in the detection limit or QC limits column.

Mr. Douglas Reid
LCS
13 E. Mohawk
Buffalo, New York 14203

Dear Mr. Reid:

Spill Number 0375107
Voelker's Bowling Center
686 Amherst Street
Buffalo, Erie County

We have reviewed the analytical results for the excavation samples. The results are below our soil guidance values. No further work will be required; the site is closed.

If you have any questions, please call me at (716) 851-7220.

Sincerely,

John F. Otto 8/27/03
