December 2023

EXECUTIVE SUMMARY

Brydges Engineering in Environment and Energy (BE3) completed a Phase I Environmental Site Assessment (ESA) for 666, 668, 670, and 680 Amherst Street, 1624, 1628, and 1634 Elmwood Avenue, and 155 Marion Street in Buffalo, New York as listed in this report. The Phase I ESA was completed for SAA EVI MC Family, LLC has been conducted as part of a due diligence review and as an update to a previous Phase I ESA completed by TurnKey Environmental Restoration, LLC in 2019 which covered a larger property than the subset covered in this report. This report has been prepared in accordance with the Phase I Environmental Site Assessment Practice E 1527-21 (ASTM Standard).

The subject properties are located in the City of Buffalo, approximately 1.6 miles east of the Niagara River, less than 0.35 miles north of Scajaquada Creek, and about 1.4 miles northwest of the Buffalo Zoo. The topography is relatively flat and sloping southwest. The subject properties are 600 feet above sea level and are located at latitude 42° 56' 27" N; Longitude -78° 52' 45" W.

The Phase I Environmental Site Assessment was completed to meet the current Practice E 1527-21 (ASTM Standard). This Standard meets the Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) rule requirements. This Phase I ESA meets the EPA AAI rule requirements and the updated aspects of the newly revised 2021 ASTM ESA have been included in this Phase I ESA. The goal of the process established by the ASTM Standard is to identify, to the extent feasible pursuant to the ASTM process recognized environmental conditions relating to the property. The standard defines **Recognized Environmental Conditions (RECs)** as *"the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment."* A **Historical Recognized Environmental Condition (HREC)** is defined as "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations, or other property use limitations)." A **Controlled Recognized Environmental Condition (CREC)** is defined as "a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitations)." The standard also identifies **De Minimis Conditions**, which generally do not present a threat to human health or the environment and would not be the subject of an enforcement action (i.e., not RECs or CRECs). The Non-Scope Considerations portion of the standard defines **Business Environmental Risks (BERs)** as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate.

In addition, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions - ASTM E 2600-10 - was also followed regarding Tier 1 vapor intrusion screening. Tier 1 is an initial screening which primarily includes a database review within certain search radii of the subject property to identify sites where the conditions are such that vapor intrusion may likely be an issue of concern in connection with the property.

The subject properties border one another in a rectangular layout and are collectively 1.69-acres in size. The general property descriptions are as follows:

680 Amherst Street Is an irregularly shaped property spanning 0.85 acres. It is listed as Class 541C (Bowling Alley) and currently contains a vacant structure that occupies the majority of the property and formerly operated as Voelker's bowling alley. The structure contains a basement, bar area, and bowling lanes. The interior of the bowling alley is largely gutted and dilapidated with debris covering much of the floor space. The basement contains above ground storage tanks previously used for fuel oil storage and water heaters. The property abuts Marion Street, 155 Marion Street and 1628 Elmwood Avenue to the north, Elmwood Ave to the west, Amherst Street to the south, and 670 Amherst Street to the east.

1628 Elmwood Avenue is a rectangularly shaped property spanning 0.17 acres. It is listed as class 449C (warehouse) and currently contains a structure on the entirety of the property that is currently a vacant warehouse. The structure was formerly operated by a neon sign making company. The structure is one story and is empty in the interior. The property abuts 1634 Elmwood Avenue to the north, Elmwood Avenue to the east, 1624 Elmwood Avenue and 680 Amherst Street to the south, and the remainder of 680 Amherst Street to the west.

155 Marion Street is a rectangularly shaped property spanning 0.32 acres. It is listed as class 433C (autobody) and currently contains a vacant structure that occupies the western portion of the property formerly operated as an autobody shop. The majority of the site is developed as parking spaces. The structure is one story and contains a hydraulic lift, office space, and a separate garage area. It is mainly empty besides some minor debris and left-over empty storage drums. The property abuts Marion Street to the north, a portion of 680 Amherst Street to the east, 668, 670, and 680 to the south, and a warehouse at 141 Marion Street to the west.

1634 Elmwood Avenue is a rectangularly shaped property spanning 0.08 acres. It is listed as Class 220R (two family residential buildings) and is currently vacant land. Prior to being vacant, there was a residential structure spanning the entirety of the property. The lot currently appears to contain construction and demolition debris. The property abuts Marion Street to the north, Elmwood Ave to the east, 680 Amherst Street and 1624 Elmwood Avenue to the south, the remainder of 680 Amherst Street to the west.

1624 Elmwood Avenue is a rectangularly shaped property spanning 0.03 acres. It is listed as Class 331B (commercial vacant land with minor improvements). The entirety of the property is currently hardscaped and developed as parking. The property had previously been used as a storefront in the 1950's. The property abuts 1628 Elmwood Avenue to the north, Elmwood Avenue to the east, and 680 Amherst Street to the south and west.

670 Amherst Street is a rectangularly shaped property spanning 0.077 acres. It is listed as Class 331B (commercial vacant land with minor improvements). The entirety of the property is hardscaped and developed as parking. The property appears to have been developed as a parking lot since at least 1950. The property abuts 155 Marion Street to the north, 680 Amherst Street to the east, Amherst Street to the south, and 668 Amherst Street to the west.

668 Amherst Street is a rectangularly shaped property spanning 0.0879 acres. It is listed as 330B (vacant commercial). The majority of the property is vacant land and a portion of the northern portion is part of a parking lot that spans onto the adjacent lot. The property previously operated as a storefront from 1916 to 1950 and was then mixed use (i.e., both commercial and residential). The structure on site appeared to have been demolished sometime in 2021.

666 Amherst Street is a rectangularly shaped property spanning 0.084 acres. It is listed as Class 311R – (residential vacant land). The entirety of the property is vacant land and there appears to be construction and demolition debris scattered throughout the property. The property was developed with residential structures as early as 1916. The previous on-site structure appeared to have been demolished sometime in 2021.

A review of historical street directories, aerial photographs, Sanborn maps and information obtained from facility personnel indicate that the 680 Amherst Street subject property was previously composed of 674, 680, 686 and 692 Amherst Street and was consolidated into 680 Amherst Street sometime after 1986. 1628 Elmwood Avenue was also previously divided into 1628 and 1630 Elmwood Avenue and was subsequently combined sometime after 1986. 666, 668, and the eastern portion of 680 Amherst Street (previously addressed as 686 and 692 Amherst Street) as well as 1624, 1628 and 1634 Elmwood Avenue were developed into residential housing as early as 1916. Sometime between 1916 and 1950, the western portion of 680 Amherst Street was redeveloped into a bowling alley attached to a restaurant and apartments and 1628 Elmwood Avenue became an auto repair shop. In addition, 155 Marion Street was developed into a private garage. Between 1950 and 1981, the subject properties were developed into their current layout (i.e., 680 Amherst Street was expanded into a larger bowling alley with the northern portion becoming a parking lot and 1628 Elmwood Avenue became a machine shop).

A Phase I ESA was previously completed by TurnKey Environmental Restoration, LLC in May 2019. The report included the subject properties in this report as well as 1609 Elmwood Avenue and 111 and 141 Marion Street. The RECs found in this report for each property assessed are as follows:

Property 1 (1609 Elmwood Avenue):

- Thorough Dry Cleaners, a presumed dry-cleaning operation, occupied a former building on the southern portion of Property 1 (current asphalt parking lot area) from at least 1935 through at least 1955.

Property 2 (668, 670, 680 Amherst Street, 1624, 1628, and 1634 Elmwood Avenue and 155 Marion Street):

- Current operations include automotive repair with the storage and use of hazardous/regulated materials. Historic operations have included automotive repair and/or a collision shop, a trucking company, an electrical equipment company, tool manufacturing, a machine shop, refrigeration service and laundry/laundromat facilities with the potential for dry cleaning. In addition, a portion of a railroad spur was formerly located on-site.
- Floor drains located within current repair areas and a paint room in Building 5 (155 Marion Street) reportedly discharge into the municipal sanitary sewer system.
- Black staining/spillage was noted to concrete ground surfaces proximate to a floor drain within Building 5 (155 Marion Street).
- Additional black staining was noted to concrete ground surfaces proximate to fuel oil ASTs within the basement of Building 2 (680 Amherst Street). Some of the staining was noted proximate to cracks in the concrete floor. In addition, a floor drain was noted proximate to the staining.
- A petroleum odor was noted within the basement of Building 2 (680 Amherst Street) proximate to the fuel oil ASTs.

- Municipal records indicate installation of presumed USTs at Property 2 in unknown locations. Specifically, one 1,000-gallon gas tank was installed in 1946 and an additional 1,000-gallon tank was installed in 1955. (Municipal records indicate the tanks relate to 155 Marion Street).
- An unknown concrete pit was noted within Building 5 (155 Marion Street). No concerns (staining, odors, etc.) were noted within the concrete pit.

Property 3 (111, 141 Marion Street and 666 Amherst Street):

- Historic operations included coal companies with coal silos and warehousing. A railroad spur bisected Property 3 in at least 1950.
- Municipal records indicate presumed USTs at Property 3. Specifically, one 500-gallon gasoline tank was installed in 1929, one 550-gallon gasoline tanks was installed in 1937, a 2,000-gallon gasoline UST was used in 1954 and one 1,000-gallon UST was removed in 1965.
- Two suspect fill ports and two proximate suspect vent pipes presumed by TurnKey to be associated with two existing USTs were noted east of Building 8 in the current gravel parking lot.
- Two fuel oil ASTs were noted within the basement of Building 8 (141 Marion Street). The presence of miscellaneous debris proximate to the ASTs hindered observations of ground surfaces proximate to the tanks. Two suspect vent pipes and two suspect fill pipes were noted protruding from east wall of Building 8; TurnKey suspects that these vent/fill pipes are associated with the basement ASTs.
- TurnKey observed evidence of fill materials in the area of railroad tracks on-Site at the time of the Site reconnaissance. In addition, the current tenant of Building 7 (111 Marion Street) indicated that this area of the Site contains coal fill materials from former coal storage. Round concrete areas observed by TurnKey on the northwestern portion of the site are believed by Turnkey to be associated with former coal silos.

A subsequent Phase II ESA was also completed by TurnKey in July 2019 to investigate the previously identified RECs. The conclusions are as follows:

- On-Site fill materials (i.e., urban fill containing significant amounts of non-soil debris) identified across the Site would be considered solid waste under current NYSDEC solid waste regulations if removed from the property and would therefore need to be properly disposed of if removed from the Site for geotechnical or other redevelopment purposes.
- The P1SB-4/4W area at Property 1 (1609 Elmwood Avenue) proximate to the former dry cleaner where solvent-like odors and elevated PID readings were identified should be properly addressed via remedial excavation during construction activities. Due to the history of dry cleaning at Property 1 with field evidence of solvent-like impacts identified, if Building 1 is to remain, a Soil Vapor Intrusion Assessment should be completed within Building 1 to assess the potential for impacted breathing air within the building. Installation of an active subslab depressurization (ASD) system would be required to address VOC-impacted air within the existing or future buildings at Property 1.
- NYSDEC regulations require proper removal of the existing UST at Property 2, the two existing USTs at Property 3 and any orphan USTs encountered during the redevelopment project; the USTs and any impacted soil, groundwater or other materials encountered during the work should be removed in accordance with applicable local, state and federal regulations. Based on field

observations (i.e., elevated PID readings, petroleum-like odors and staining) proximate to the tanks at Property 3, the presence of impacted soil should be expected during the tank removal project.

An additional detailed summary of the subject properties is covered in the body of the report.

Phase I ESA tasks included agency interviews, reconnaissance of the properties and general area, and a review of government and historical records.

A review of readily available government agency records was conducted by BE3 using the government records search firm, EDR. Of the subject properties, 155 Marion Street was listed in government environmental databases.

Specific database findings on the subject properties are as follows:

- Phils Auto SVC Auto RPR & SERV – 155 Marion Street – Historic Auto
- Wash M White Laundromat – 1630 Elmwood Avenue (Currently 1628 Elmwood Avenue) – Historic Cleaner
- Dooley EUG F Auto Reor – 1630 Elmwood Avenue (Currently 1628 Elmwood Avenue) – Historic Auto
- Voelker's Bowling Center – 686 Amherst Street (Currently 680 Amherst Street) – UST, NY Spills #0375107

155 Marion Street had an historic auto from at least 2004 to 2020. In addition, the subject property is currently a vacant auto repair shop under the name of Malek's Collision.

The Voelker's Bowling Center UST at 686 Amherst Street, which is now the eastern portion of 680 Amherst Street, was removed in May 2003. During the removal of the 5000-gallon heating oil tank, contamination was discovered and the spill was assigned #0375107. Approximately 160 tons of contaminated soil were removed from the site and samples were taken around the hole from the tank. The results came back below regulatory guidance and the spill was subsequently closed in September 2003.

A review of additional governmental records of surrounding properties within the ASTM radius indicated a total of one hundred and twenty-one (121) database records within the radius completed for the area around the subject properties. The records included: three (3) AST sites; eight (8) NY BROWNFIELDS sites; two (2) DEL SHWS sites; seven (7) EDR Hist Auto sites; six (6) Historic Cleaner sites; two (2) EDR MGP sites; one (1) Engineering Control site; one (1) FUDS site; two (2) NY INST CONTROL sites; fifteen (15) NY LTANKS sites; five (5) NY MANIFEST sites; twenty-four (24) NY SPILLS sites; two (2) PFAS ECHO sites; twelve (12) RCRA NonGen/NLR sites; four (4) RCRA-LQG sites; three (3) RCRA-SQG sites; four (4) RCRA-VSQG sites; two (2) SEMS sites; five (5) NY SHWS sites; two (2) SWF sites; and eleven (11) NY UST sites.

Specific database findings in close proximity to the subject properties are as follows:

- Old Sunoco Station – Amherst Street and Elmwood Avenue – NY Spills # 8905408
- National Fuel Gas – Amherst Street and Elmwood Avenue – NY Spills # 8810090
- Thorough Cleaners – 1611 Elmwood Avenue – Historic Cleaners
- Former Gas Station – 1601-1595 Elmwood Avenue – NY Spills # 2009182
- Obenauer Albert Filling Station – 1601 Elmwood Avenue – Historic Auto
- NYC Park Cleaners CLO CLNRS – 1596 Elmwood Avenue – Historic Cleaners
- Castle Cleaners INC – 1595 Elmwood Avenue - Historic Cleaners

- Good CLNS CLO – 1654 Elmwood Avenue – Historic Cleaners
- Joe's Service Center – 1602 Elmwood Avenue – NY Spills # 200910 and # 2003276, LTANKS, UST, Historic Auto

The adjacent filling station at 1602 Elmwood Avenue has previously operated under the name Joe's Service Center and as a Sunoco Station currently. The site is associated with multiple spills as well as underground storage tanks. There are no spills reported that indicate a substantial amount of petroleum was released to the environment. In addition, the site is located downgradient from the subject properties.

This Phase I ESA assessed the need for a vapor intrusion assessment (VIA) of the subject properties with regard to chemicals of concern (COC) that may migrate as vapors into existing or planned structures on a property. A vapor intrusion screen was performed using EDR's vapor intrusion database report and ASTM radius report as well as a review of the historical documentation. A report was generated for the areas described above (refer to **Appendix E**). The potential for vapor intrusion exists on the subject properties due to on-site historical uses as well as adjacent/nearby historical uses. Although the spill located at 686 Amherst Street has been closed, the potential for vapor intrusion is still deemed to be significant as there is a historic cleaner and a historic auto shop located on the subject property. Additionally, several historic cleaners and auto shops are located adjacent to and upgradient of the subject properties which increases the risk of vapor migration.

Findings Summary (note, these will be repeated in the conclusion section of this report)

This Phase I ESA was completed in December 2023, for 666, 668, 670, and 680 Amherst Street, 1624, 1628, and 1634 Elmwood Avenue, and 155 Marion Street in Buffalo, New York as listed in this report. The Phase I ESA was completed for SA&A EVI MC Family, LLC has been conducted as part of a due diligence review and as an update to a previous Phase I ESA completed by TurnKey Environmental Restoration, LLC in 2019 which covered a larger property than the subset covered in this report. This report has been prepared in accordance with the Phase I Environmental Site Assessment Practice E 1527-21 (ASTM Standard).

A lien search was completed for 680 Amherst Street, and no environmental liens were found. There is no indication based on historical records of the subject properties that would indicate or relate to environmental liens.

Data Gaps

The ASTM standard requires that significant data gaps that affect the ability of the environmental professional to identify RECs be identified and that the sources of information that were consulted to address the data gaps be identified. The following data gaps exist for this Phase I ESA:

- A user questionnaire has not been returned.
- Adjacent properties were not entered.
- A lien and AUL and title search back to 1980 was only completed for the 680 Amherst subject property.

BE3's professional opinion is that these data gaps do not create a significant issue for our conclusions.

Conclusions/ Recommendations

BE3 has performed and completed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E1527-21 for the subject properties located in the City of Buffalo, Erie County, New York. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 and data gaps are identified above in this section.

No CRECs were identified in relation to the subject properties.

The following RECs are associated with the subject properties as follows:

- **REC** – Historic uses as an auto repair shop at 155 Marion Street represents a REC for the subject properties. Municipal records indicate installation of presumed USTs at 155 Marion Street in unknown locations. Specifically, one 1000-gallon gas tank was installed in 1946 and one additional 1,000-gallon tank was installed in 1955.
- **REC** – Historic uses as a former dry cleaners and auto repair shop at 1630 Elmwood Avenue may represent a potential vapor concern.
- **REC** – ASTs in the basement of 680 Amherst used for fuel oil storage as well as staining proximate to floor drains and cracks in the floor could represent a release to the environment.
- **REC** – Suspected USTs adjacent to the subject properties at 141 Marion Street represent a REC for the subject properties due to the unknown status of the tanks and proximity.

The following HREC is associated with the subject properties as follows:

- **HREC** - The Voelker's Bowling Center UST at 686 Amherst Street, which is now the eastern portion of 680 Amherst Street, was removed in May 2003. During the removal of the 5000-gallon heating oil tank, contamination was discovered and the spill was assigned #0375107. Approximately 160 tons of contaminated soil was removed from the site and samples were taken around the hole from the tank. The results came back below regulatory guidance and the spill was subsequently closed in September 2003. Even though the spill appears to have been adequately cleaned, it is still considered an HREC for the subject properties.

The following BERs are associated with the subject properties as follows:

- **BER** – Historic adjacent property uses near the subject properties including dry cleaners located at 1611 Elmwood Avenue and a filling station located at 1602 Elmwood Avenue may represent a potential vapor concern.
- **BER** – On-Site fill material (i.e., urban fill containing significant amounts of non-soil debris) identified in the Phase II ESA by TurnKey in July 2019 across the site is considered a BER for the subject properties.

1.0 INTRODUCTION

1.1 PURPOSE

Brydges Engineering in Environment and Energy (BE3) completed a Phase I Environmental Site Assessment (ESA) for 666, 668, 670, and 680 Amherst Street, 1624, 1628, and 1634 Elmwood Avenue, and 155 Marion Street in Buffalo, New York as listed in this report. The Phase I ESA was completed for SA&A EVI MC Family, LLC has been conducted as part of a due diligence review and as an update to a previous Phase I ESA completed by TurnKey Environmental Restoration, LLC in 2019 which covered a larger property than the subset covered in this report. This report has been prepared in accordance with the Phase I Environmental Site Assessment Practice E 1527-21 (ASTM Standard).

The subject properties are located in the City of Buffalo, approximately 1.6 miles east of the Niagara River, less than 0.35 miles north of Scajaquada Creek, and about 1.4 miles northwest of the Buffalo Zoo. The topography is relatively flat and sloping southwest. The subject properties are 600 feet above sea level and is located at latitude 42° 56' 27" N; Longitude -78° 52' 45" W.

The ASTM standard practice defines a customary process for conducting an ESA on a parcel of commercial land with respect to CERCLA contaminants and petroleum products. Accordingly, the goal of the process is to identify recognized environmental conditions relating to the property through all appropriate inquiries into the current conditions, previous ownership, and activities at the property and adjacent properties. The standard defines specific environmental conditions as follows:

Recognized Environmental Conditions (RECs) are defined in the ASTM Standard as the presence of hazardous substances or petroleum products in, on, or at the subject property; (1) due to any release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Historical Recognized Environmental Condition (HREC) is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to controls. (e.g., activity use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

Controlled Recognized Environmental Condition (CREC) is defined as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls. (e.g., activity and use limitations or other property use limitations).

The standard also identifies a **De Minimis Condition** as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs or CRECs.

The non-scope considerations portion of the standard also defines a **Business Environmental Risk (BER)** as a risk that can have a material environmental or environmentally driven impact on the business

associated with the current or planned use of commercial real estate.

7	1634 Elmwood Avenue	89.21-7-6.1	0.08	Burt Voelker LLC
8	155 Marion Street	89.21-7-5	0.32	Labrador Building Systems INC

Refer to Section 4.3 for a more detailed property description and **Appendix I** for further assessment information on the parcels. See **Appendix A** for location.

1.3 SCOPE OF SERVICES

The scope of services for this ESA was performed in accordance with American Society for Testing and Materials (ASTM) Standards E-1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" that incorporates the EPA All Appropriate Inquiries (AAI) rule and allows the user to qualify for landowner liability protections (LLPs). Specifically, the Phase I ESA included the following for the subject property and adjacent properties, as applicable:

- research of the current land-use within 0.5 mile of the site (see Section 3.0)
- identification of known environmental problems within 1 mile of the site (see Section 3.0)
- a property reconnaissance that included visual observations of site and surrounding area
- research conducted at municipal offices
- acquisition and review of aerial photographs and historic maps and information
- acquisition and review of available local, state and city records and documents
- completion of a vapor encroachment screen

1.4 SIGNIFICANT ASSUMPTIONS

The following items were assumed during the completion of this Phase I ESA:

- Information obtained from third parties is essentially complete and correct, or stipulated otherwise within the report;
- This report relates to assessment of environmental conditions on or affecting the subject parcel or parcels;
- As applicable to a property transaction, an inquiry into the ownership and previous uses of the property will qualify an individual for one of the threshold criteria for satisfying the LLPs (assuming compliance with the other CERCLA elements of defense); in addition, an inquiry should not be construed as not 'all appropriate' because it did not identify a REC associated with the property.

1.5 LIMITING CONDITIONS, DEVIATIONS AND EXCEPTIONS

1.5.1 Limiting Conditions

This report is based on information from field reconnaissance and visual observations of the subject property or parcel and the properties immediately surrounding; as well as interpretation of the available information and documentation reviewed and provided in the appendix. The property and this site assessment are limited to the footprint of the subject parcels. This report is intended for the sole use of SAA EVI MC Family LLC. The scope of services performed in this assessment may not be appropriate to satisfy the needs of other entities associated with the subject property, and any re-use of this document or the findings, conclusions, or recommendations presented, is at the sole risk of the user.

The conclusions set forth in this report are based upon and limited by the government data and other available information. As such and within the scope of the project, the accuracy of all data supplied by government entities and third parties could not always be verified. Therefore, we are not responsible for any conclusion contained in this report that is based on, in whole or in part, upon inaccurate data obtained from third parties.

It should be noted that all surface environmental assessments are inherently limited in the sense that conclusions are drawn, and recommendations developed from information obtained from limited research and site evaluation at a specific time. The passage of time may result in unknown site changes that have not been evaluated, and therefore a change in environmental circumstances at this site and surrounding properties or beneath the surface that may be present but undetectable during this Phase I ESA.

1.5.2 Deviations

As stated in the ASTM standard 1527-21 all appropriate inquiry does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information. One of the purposes for completing the Phase I ESA in accordance with the standard is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing ESAs and the reduction of uncertainty about unknown conditions resulting from additional information.

Professional legal or title insurance services are not provided by completing this document, and no guarantee explicit or implied has been made that the property assessment represents a comprehensive delineation of past site ownership or tenancy, land title or lien records. The work performed in conjunction with this assessment and the data developed are intended as a description of available information at the dates and locations given.

Formal interviews of all state/local governments, occupants, owners, operators, adjacent landowners were not conducted, and all adjacent structures or vacant properties were not observed/surveyed during the site reconnaissance as there were locations of inaccessibility. Based on the extent of the other information covered in this ESA, it is believed that the noted deviations do not impair the user's LLPs.

1.5.3 Exceptions

The only exceptions beyond the standard Phase I ESA scope that were assessed in this report include information provided on radon, mold, asbestos containing materials, lead based paint, handling/disposal of PCB containing equipment and emerging contaminants. Additional considerations beyond the scope of this ASTM practice may be addressed in other documents, such as cultural and historic resources or wetland identification. The quality and quantity of material covered meets or exceeds the practice except where otherwise noted.

1.6 USER RELIANCE

This report is intended for the sole use of SAA EVI MC Family, who can use for reference and rely upon the information, findings, and conclusions contained in this report. Only at the user's request will this report be granted to other parties for reliance.

2.0 USER PROVIDED INFORMATION

If applicable and available to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user must provide information for use in this report. Failure to provide available information could result in a determination that all appropriate inquiry is not complete. The user is defined as the party seeking to use PRACTICE E 1527 to complete an ESA of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

BE3 obtained no background information from SAA EVI INC. BE3 has Freedom of Information Requests (FOIL) in with the City of Buffalo and the NYSDEC. BE3 believes the information obtained during the Phase I ESA together with all the other information assessed for this report qualifies the user for LLPs.

User provided information is shown in **Appendices B and C.**

2.1 TITLE RECORDS

Land title records were not provided. BE3 did obtain recent ownership information from the City/County Assessor and that information is provided within this report. A Lien and Title Search back to 1980 was provided for the 680 Amherst Street property only from EDR, indicating the current Deed owner as AM-ELM Realty Inc. since 2003.

2.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien search was obtained, AULs such as engineering controls, land use restrictions or institutional controls that are in place at the properties and/or have been filed or recorded in a registry under federal, tribal, state, or local law. No information was provided to BE3 concerning environmental liens or activity and use limitations for the subject property.

2.3 SPECIALIZED KNOWLEDGE

No additional specialized knowledge was indicated. The property user was questioned regarding any knowledge or experience of any environmental lien or AULs encumbering the properties or in connection with the properties or nearby properties. No environmental liens or activity and use limitations were reported for the subject properties. No other information was provided to BE3 which would suggest environmental liens or AUL.

2.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The property user was questioned regarding any knowledge of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the properties. No additional information was provided to BE3 concerning any RECs.

2.5 OTHER USER INFORMATION

This Phase I ESA is being performed for due diligence purposes and to obtain a certain degree of liability protection regarding business environmental risk as contractor for future site development and potential real estate/funding for the subject properties. The user has provided no records pertaining to the subject properties.

3.0 RECORDS REVIEW

A summary of the ASTM record search is provided below and in **Appendix D**. Refer to page 2-16 of the radius reports. A review of readily available government agency records was conducted by BE3 using the government records search firm, EDR. Of the subject properties, 155 Marion Street was not listed in government environmental databases.

Specific database findings on the subject properties are as follows:

- Phils Auto SVC Auto RPR & SERV – 155 Marion Street – Historic Auto
- Wash M White Laundromat – 1630 Elmwood Avenue (Currently 1628 Elmwood Avenue) – Historic Cleaner
- Dooley EUG F Auto Reor – 1630 Elmwood Avenue (Currently 1628 Elmwood Avenue) – Historic Auto
- Voelker's Bowling Center – 686 Amherst Street (Currently 680 Amherst Street) – UST, NY Spills #0375107

155 Marion Street had an historic auto from at least 2004 to 2020. In addition, the subject property is currently an auto repair shop under the name of Malek's Collision.

The Voelker's Bowling Center UST at 686 Amherst Street, which is now the eastern portion of 680 Amherst Street, was removed in May 2003. During the removal of the 5000-gallon heating oil tank, contamination was discovered and the spill was assigned #0375107. Approximately 160 tons of contaminated soil were removed from the site and samples were taken around the hole from the tank. The results came back below regulatory guidance and the spill was subsequently closed in September 2003.

A review of additional governmental records of surrounding properties within the ASTM radius indicated a total of one hundred and twenty-one (121) database records within the radius completed for the area around the subject properties. The records included: three (3) AST sites; eight (8) NY BROWNFIELDS sites; two (2) DEL SHWS sites; seven (7) EDR Hist Auto sites; six (6) Historic Cleaner sites; two (2) EDR MGP sites; one (1) Engineering Control site; one (1) FUDS site; two (2) NY INST CONTROL sites; fifteen (15) NY LTANKS sites; five (5) NY MANIFEST sites; twenty-four (24) NY SPILLS sites; two (2) PFAS ECHO sites; twelve (12) RCRA NonGen/NLR sites; four (4) RCRA-LQG sites; three (3) RCRA-SQG sites; four (4) RCRA-VSQG sites; two (2) SEMS sites; five (5) NY SHWS sites; two (2) SWF sites; and eleven (11) NY UST sites.

Specific database findings in close proximity to the subject properties are as follows:

- Old Sunoco Station – Amherst Street and Elmwood Avenue – NY Spills # 8905408
- National Fuel Gas – Amherst Street and Elmwood Avenue – NY Spills # 8810090
- Thorough Cleaners – 1611 Elmwood Avenue – Historic Cleaners
- Former Gas Station – 1601-1595 Elmwood Avenue – NY Spills # 2009182
- Obenauer Albert Filling Station – 1601 Elmwood Avenue – Historic Auto

- NYC Park Cleaners CLO CLNRS – 1596 Elmwood Avenue – Historic Cleaners
- Castle Cleaners INC – 1595 Elmwood Avenue - Historic Cleaners
- Good CLNS CLO – 1654 Elmwood Avenue – Historic Cleaners
- Joe's Service Center – 1602 Elmwood Avenue – NY Spills # 200910 and # 2003276, LTANKS, UST, Historic Auto

The adjacent filling station at 1602 Elmwood Avenue has previously operated under the name Joe's Service Center and as a Sunoco Station currently. The site is associated with multiple spills as well as underground storage tanks. There are no spills reported that indicate a substantial amount of petroleum was released to the environment. In addition, the site is located downgradient from the subject properties.

It is uncertain whether any impacts to the subsurface environment exist from these on-site or off-site sources, however, many of these sources are upgradient and in close proximity to the subject properties.

3.1 STANDARD REGULATORY/TRIBAL ENVIRONMENTAL RECORDS

A review of readily available government agency records was conducted by BE3 using the government records search firm, EDR.

3.2 ADDITIONAL ENVIRONMENTAL RECORDS

3.2.1 City Offices

BE3 visited or contacted several City offices during the data review for the ESA and information obtained included the following:

1. City Of Buffalo Fire Prevention Office

This office maintains information on USTs and fire code violations.

2. City of Buffalo Permits and Inspections Office

This office maintains information regarding demolition, new builds, and USTs.

3. City of Buffalo Assessors Office

Real property and assessment information was obtained online.

Records from the Buffalo Fire Prevention Office and Building Department pertaining to AST/USTs are reviewed in Section 4.3.3. City of Buffalo Department of Permits and Inspections Services was visited at City Hall. The information received did produce information relevant to environmental conditions on site. Records indicated the placement and use of a 1–1000-gallon steel tank used for gasoline storage located on 155 Marion Street in 1946. No follow up records were found detailing the removal or closure of the tank. Refer to **Appendix E** for copies of the building permits, Fire Department records, and assessment information.

3.2.2 County Offices

County and City GIS was reviewed to obtain some information concerning properties. County Assessment information was reviewed at the following web page: [Erie County NY Interactive Mapping Viewer \(arcgis.com\)](http://eriecountyny.gov/arcgis.com). Information obtained is presented in Section 1.2 and included in **Appendix A**.

3.2.3 New York State Department of Environmental Conservation

NYSDEC records were requested through their FOIL system. No records were obtained as of this writing; however, government and historical database records were obtained from a property due diligence service, which would contain the information available through FOIL. This information is provided in various sections in this report.

3.2.4 Previous Environmental Studies/Historical Data

A Phase I ESA was previously completed by TurnKey Environmental Restoration, LLC in May 2019. The report included the subject properties in this report as well as 1609 Elmwood Avenue and 111 and 141 Marion Street. The RECs found in this report are as follows:

Property 1 (1609 Elmwood Avenue):

- Thorough Dry Cleaners, a presumed dry-cleaning operation, occupied a former building on the southern portion of Property 1 (current asphalt parking lot area) from at least 1935 through at least 1955.

Property 2 (668, 670, 680 Amherst Street, 1624, 1628, and 1634 Elmwood Avenue and 155 Marion Street):

- Current operations include automotive repair with the storage and use of hazardous/regulated materials. Historic operations have included automotive repair and/or a collision shop, a trucking company, an electrical equipment company, tool manufacturing, a machine shop, refrigeration service and laundry/laundromat facilities with the potential for dry cleaning. In addition, a portion of a railroad spur was formerly located on-site.
- Floor drains located within current repair areas and a paint room in Building 5 (155 Marion Street) reportedly discharge into the municipal sanitary sewer system.
- Black staining/spillage was noted to concrete ground surfaces proximate to a floor drain within Building 5 (155 Marion Street).
- Additional black staining was noted to concrete ground surfaces proximate to fuel oil ASTs within the basement of Building 2 (680 Amherst Street). Some of the staining was noted proximate to cracks in the concrete floor. In addition, a floor drain was noted proximate to the staining.
- A petroleum odor was noted within the basement of Building 2 (680 Amherst Street) proximate to the fuel oil ASTs.
- Municipal records indicate installation of presumed USTs at Property 2 in unknown locations. Specifically, one 1,000-gallon gas tank was installed in 1946 and an additional 1,000-gallon tank was installed in 1955. (Municipal records indicate the tanks relate to 155 Marion Street).
- An unknown concrete pit was noted within Building 5 (155 Marion Street). No concerns (staining, odors, etc.) were noted within the concrete pit.

Property 3 (111, 141 Marion Street and 666 Amherst Street):

- Historic operations included coal companies with coal silos and warehousing. A railroad spur bisected Property 3 in at least 1950.
- Municipal records indicate presumed USTs at Property 3. Specifically, one 500-gallon gasoline tank was installed in 1929, one 550-gallon gasoline tanks was installed in 1937, a 2,000-gallon gasoline UST was used in 1954 and one 1,000-gallon UST was removed in 1965.
- Two suspect fill ports and two proximate suspect vent pipes presumed by TurnKey to be associated with two existing USTs were noted east of Building 8 in the current gravel parking lot.
- Two fuel oil ASTs were noted within the basement of Building 8 (141 Marion Street). The presence of miscellaneous debris proximate to the ASTs hindered observations of ground surfaces proximate to the tanks. Two suspect vent pipes and two suspect fill pipes were noted protruding from east wall of Building 8; TurnKey suspects that these vent/fill pipes are associated with the basement ASTs.
- TurnKey observed evidence of fill materials in the area of railroad tracks on-Site at the time of the Site reconnaissance. In addition, the current tenant of Building 7 (111 Marion Street) indicated that this area of the Site contains coal fill materials from former coal storage. Round concrete areas observed by TurnKey on the northwestern portion of the site are believed by Turnkey to be associated with former coal silos

A subsequent Phase II ESA was also completed by TurnKey in July 2019 to investigate the previously identified RECs. The conclusions ESA are as follows:

- On-Site fill materials (i.e., urban fill containing significant amounts of non-soil debris) identified across the Site would be considered solid waste undercurrent NYSDEC solid waste regulations if removed from the property and would therefore need to be properly disposed of if removed from the Site for geotechnical or other redevelopment purposes.
- The P1SB-4/4W area at Property 1 (1609 Elmwood Avenue) proximate to the former dry cleaner where solvent-like odors and elevated PID readings were identified should be properly addressed via remedial excavation during construction activities. Due to the history of dry cleaning at Property 1 with field evidence of solvent-like impacts identified, if Building 1 is to remain, a Soil Vapor Intrusion Assessment should be completed within Building 1 to assess the potential for impacted breathing air within the building. Installation of an active subslab depressurization (ASD) system would be required to address VOC-impacted air within the existing or future buildings at Property 1.
- NYSDEC regulations require proper removal of the existing UST at Property 2, the two existing USTs at Property 3 and any orphan USTs encountered during the redevelopment project; the USTs and any impacted soil, groundwater or other materials encountered during the work should be removed in accordance with applicable local, state and federal regulations. Based on field observations (i.e., elevated PID readings, petroleum-like odors and staining) proximate to the tanks at Property 3, the presence of impacted soil should be expected during the tank removal project.

3.3 PHYSICAL SETTING SOURCES

Current and historical topographic maps that show the area of the subject properties were reviewed and are presented in **Appendix F**. These maps and the additional physical setting sources from the Radius Map Report provide details of geologic, hydrogeologic, hydrologic, and topographic characteristics of the subject properties and surrounding area to assess the impact of potential RECs relating to the subject properties.

3.3.1 Topography and Drainage

Property surface features and drainage were determined through a combination of site reconnaissance, and a review of both aerial photographs and topographic maps. The properties are generally flat and gently sloping southwest. Surface and shallow groundwater flow most likely has been impacted over time by the various developments and fills as well as foundations, street beds, and utility lines. Surface water is directed to low spots and in general surface water and shallow groundwater most likely flows west towards Niagara River, which is about 1.6 miles from the center of the subject properties.

3.3.2 Site Geology and Hydrogeology

Topography. The Site is located within the Lake Erie-Niagara River major drainage basin, which is typified by little topographic relief, except in the immediate vicinity of major drainage ways. In the Lake Erie-Niagara Basin, the major areas of groundwater are within coarser overburden deposits, limestone, and shale bedrock. Although the project area is relatively flat, this topography is by no means natural. The current landscape is a result of nearly two centuries of alteration and development.

Geology. Bedrock beneath the project area is Camillus Shale of the Upper Silurian period. It lies deeply buried beneath glacial deposits and no rock outcroppings are visible on the ground surface. This formation is notable for its chert nodules that were the primary prehistoric lithic resource used in western New York. Relatively flat, the bedrock underlying Erie County tilts to the southwest at approximately 50 ft (15 m) per mile (Owens et al.).

Soils. The United States Department of Agriculture (USDA) Erie County soil map was reviewed to identify soils. The map of this area identified the predominant soil types pertinent to the subject properties to be Urban land (Ud) and Urban Land-Odesa complex, 0 to 3 percent slopes (Ut). Urban land soils are typically identified as highly developed for commercial, industrial, or residential use, and much of the ground surface is covered by impervious features (e.g., buildings, streets, and paved parking lots). Usually disturbed from construction activities, soils in this category are typically dominantly nearly level, disturbed, and range from well-drained to poorly drained. Urban land areas are areas in which 80 percent or more of the soil is covered by asphalt, concrete, buildings, or other impervious structures including parking lots, shopping and business centers, and industrial parks.

3.3.3 Hydrology and Waterbodies

Various agencies are involved with wetlands and surface water bodies at the federal and State levels, such as FEMA, NYSDEC, and US Fish and Wildlife. In general, vegetation and saturated soil are observed as critical items for sensitive areas, including the presence of hydric soils that are defined as soils saturated or flooded at least one week during the growing season that develop anaerobic conditions. For the subject properties, no surface water bodies, or overt wetland areas are located within the property area.

3.4 HISTORICAL USE INFORMATION

Several sources were used to develop a historical use profile for the properties discussed in this report, and included:

- Aerial photographs
- Fire insurance or Sanborn maps
- Recorded land title records
- USGS topographical maps
- Local street directories
- Building
- department records and
- Land/zoning use records
- Other sources from the NYSDEC or additional city departments

3.4.1 General Current Characteristics

The subject properties border one another in a rectangular layout and are collectively 1.69-acres in size. The general property descriptions are as follows:

680 Amherst Street Is an irregularly shaped parcel spanning 0.852 acres. It is listed as a Class 541 C and currently contains a vacant structure that occupies the majority of the property and formerly operated as a bowling alley. The structure contains a basement, bar area, and bowling lanes. The interior of the bowling alley is largely gutted and falling apart with debris covering much of the floor space. The basement contains storage tanks and water heaters. The property abuts Marion Street, the 155 Marion Street subject property and the 1628 subject property to the north, Elmwood Ave to the west, Amherst Street to the south, and the 670 Amherst Street subject property to the east.

1628 Elmwood Avenue Is a rectangularly shaped property spanning 0.166 acres. It is listed as class 449 C and currently contains a structure on the entirety of the property that is currently vacant warehouse. The structure was formerly used by a neon sign making company. The structure is one story and is empty on the interior. The property abuts the 1634 Elmwood Avenue subject property to the north, Elmwood Avenue to the east, the 1624 Elmwood Avenue and 680 Amherst Street subject properties to the south, and the remainder of the 680 Amherst Street subject property to the west.

155 Marion Street Is a rectangularly shaped property spanning 0.318 acres. It is listed as class 433 C and currently contains a vacant structure that occupies the western portion of the property formerly operated as an autobody. The majority of the site is developed as parking spaces. The structure is one story and contains a hydraulic lift, office space, and separate garage area. It is mainly empty besides some minor debris and left over drums. The property abuts Marion Street to the north, a portion of the 680 Amherst Street subject property to the east, the 668, 670, and 680 subject properties to the south, and a warehouse at 141 Marion Street to the west.

1634 Elmwood Avenue is a rectangularly shaped property spanning 0.075 acres. It is listed as Class 220 R – two family residential buildings and is currently vacant land. Prior to being vacant land, there was a residential structure on the entirety of the property. The lot currently appears to contain construction and demolition debris. The property abuts Marion Street to the north, Elmwood Ave to the east, the 680 Amherst Street and 1624 Elmwood Avenue subject properties to the south, and the remainder of the 680 Amherst Street subject property to the west.

1624 Elmwood Avenue is a rectangularly shaped property spanning 0.033 acres. It is listed as Class 331 B – Commercial vacant land with minor improvements. The entirety of the property is currently hardscaped and used as a parking spaces. The property had previously been used as a storefront in the 1950's. The property abuts the 1628 Elmwood Avenue subject property to the north, Elmwood Avenue to the east, and the 680 Amherst Street subject property to the south and west.

670 Amherst Street is a rectangularly shaped property spanning 0.077 acres. It is listed as Class 331 B – Commercial vacant land with minor improvements. The entirety of the property is hardscaped and used as parking spaces. The property appears to have been developed as a parking lot since at least 1950. The property abuts the 155 Marion Street subject property to the north, the 680 Amherst Street subject property to the east, Amherst Street to the south, and the 668 Amherst Street subject property to the west.

668 Amherst Street is a rectangularly shaped property spanning 0.0879 acres. It is listed as 330 B – vacant commercial. The majority of the property is vacant land, while a portion of the north side is part of a parking lot. The property previously operated as a storefront from 1916 to 1950 and was then mixed use as both commercial and residential. The structure on site appeared to have been demolished sometime in 2021.

666 Amherst Street is a rectangularly shaped property spanning 0.084 acres. It is listed as Class 311 R – Residential vacant land. The entirety of the property is vacant land and there appears to be construction and demolition debris scattered throughout the site. The property was developed with residential structures as early as 1916. The structure on site appeared to have been demolished sometime in 2021.

3.4.2 Subject Property Use Summary

A review of historical street directories, aerial photographs, Sanborn maps and information obtained from facility personnel indicate the subject properties were commercial and residential.

The 666 Amherst Street address has historically been used for residential buildings since at least 1916. The property appears to have been demolished sometime between 2021 and 2022 and is now vacant land.

The 668 Amherst Street address has historically been mixed residential and commercial use. The property operated as a store from at least 1916 to sometime between 1950 to 1981 before becoming a residential dwelling. The property appears to have been demolished sometime between 2021 and 2022 and is now vacant land.

The 670 Amherst Street address has historically had no more development than small personal vehicle garages since at least 1916 before becoming a paved parking lot sometime between 1951 and 1966. The property currently remains a paved parking lot.

The 680 Amherst Street address was historically divided into 674, 680, 686, and 692 Amherst Street. The eastern portion of the property was developed as early as 1938 as a bowling alley attached to a restaurant and apartments. Sometime between 1950 and 1981 the bowling alley was expanded across the entire southern portion of the property and while the northern portion was paved into a parking lot. The apartments were demolished and the restaurant remained on the eastern portion of the property. The property remains this way currently.

The 1624 Elmwood Avenue address has historically been used as a store as early as 1916. The property was demolished around 1975 and currently remains vacant.

The 1628 Elmwood Avenue address has historically been known as 1626, 1630, and 1632 Elmwood Avenue. The property has historically had commercial operations such as a boarding & rest business, auto repair, and machine shop. The property is currently a vacant commercial building.

The 1634 Elmwood Avenue address has historic uses as a saloon and storefront. The property was demolished sometime between 2021 and 2022 and currently remains as a vacant lot.

The 155 Marion Street address appears to have been developed around 1950. It was first developed into a private garage and remained that way until at least 1986. In 2004 it became an auto service company under the name of Phils Auto service that operated from 2004 to the 2014. The property is currently still an auto repair shop under the name of Malek's Collision.

3.4.3 Adjacent Property Use

Historically, the surrounding properties have been mixed use commercial and residential. Properties to the north have been mostly residential dwellings with scattered commercial buildings throughout. Some of the commercial uses include machine shops, contractor yards, a power company, pipe supply, and cleaners. Southern adjacent properties were predominately residential besides a gas station directly across the street from the subject properties. The properties to the east have had several uses including hotels, auto repair shops, a drug store, and residential dwellings. The western properties were used as a coal company, a warehouse, a drug store, and residential dwellings.

3.4.4 Aerial Photographs

BE3 obtained a series of Aerial Photograph maps of the general area from EDR including ones from 1938, 1951, 1959, 1962, 1966, 1970, 1978, 1983, 1985, 1995, 2008, 2011, 2015, and 2019.

A review of aerial photography is as follows:

1938 – 666, 668, and 670 Amherst Street appear to be developed with residential housing. 1634, 1628, and 1624 Elmwood Avenue as well as the eastern portion of 680 Amherst Street appear to be developed as well. 155 Marion Street and the remaining area of 680 Amherst Street appear to be vacant.

1951 - 2019 – The properties are developed completely. The surrounding area appears to be mostly residential with some commercial/industrial buildings to the north, northeast and southwest.

The aerial photographs are contained in **Appendix G**.

3.4.5 Sanborn Maps

Information from the Sanborn maps was used in previous sections.

3.4.6 Property Title, and Lien Information

Current/Recent Title and tax assessor information was reviewed online at the County and City web site. An environmental lien search was completed by EDR for only the subject property at 680 Amherst Street and title was reviewed back to 1980. No environmental liens were identified on the subject property; however, a deed was found. The County website identified the current owner as AM-ELM Realty Inc.

Additional title information and chain of title/ownership is provided in **Appendix I**.

3.4.7 USGS Topographical Maps

BE3 obtained a series of historic topographic maps of the general area from EDR including ones from 1894, 1901, 1946, 1948, 1949, 1950, 1965, 2013, 2016, and 2019. These maps indicated that topography slopes south-southwest toward the Niagara River.

3.4.8 Local Street Directories & Historical Use

Historic Street directories for the subject properties and adjacent properties were reviewed for the years 1925, 1930, 1935, 1940, 1946, 1950, 1955, 1960, 1964, 1970, 1975, 1980, 1985, 1992, 1995, 2000, 2001, 2005, 2008, 2010, 2014, 2017 and 2020. Information regarding ownership is as follows:

155 Marion Street is a 0.32-acre rectangularly shaped property. It is currently being used as an auto repair shop with an asphalt parking lot.

- 1950-1992: Yanik Bros Trucking Co
- 1995: American Paper Corp & DSTRBTRS
- 2000: Malek's Collision and Auto Body rpr
- 2005-2014: Phils Auto Service & Malek's Collison
- 2014-present: Malek's Collision

666 Amherst Street is 0.08-acre rectangularly shaped property. It is currently a vacant lot with a portion of it being used as an asphalt parking lot.

- 1925-2020: Various residential owners

668 Amherst Street is a 0.09-acre rectangularly shaped property. It is currently a vacant lot.

- 1925-2020: Various residential owners

670 Amherst Street is a 0.08-acre rectangularly shaped property. It is currently being used as an asphalt parking lot.

- 1925: Jackson Geo asst Lighthouse Service

680 Amherst Street is a 0.85-acre irregularly shaped property. It is currently the Voelker's bowling alley as well as an asphalt parking lot on the northern portion of the property.

- 1946: Vacant

1624 Elmwood Avenue is a 0.03-acre rectangularly shaped property. It is currently an asphalt parking lot.

- 1925-1930: Kaczmarek Thaddeus Restaurant
- 1935: Vacant Store
- 1940: Refrigeration Service Co
- 1950-1960: Residential owner
- 1960-1975: Michaels Dental Laboratory

1628 Elmwood Avenue is 0.17-acre rectangularly shaped property. It is currently a vacant commercial building.

- 1930: 28 Behrens Albert Rest
- 1995-2020: NAS Quick Sign and Paul Strada Ice Carving

1634 Elmwood Avenue is a 0.08-acre rectangularly shaped property. It is currently a vacant lot.

- 1925-1940: Jos Soft Drinks
- 1955-1964: Sams Barber Shop
- 1985-1992: Iseman Enterprises Research
- 1992-2017: Various Residential Owners

3.4.9 Building Department and Land/Zoning Records

Building permits were obtained through EDR. No environmentally relevant permits were identified for the subject properties.

4.0 SITE RECONNAISSANCE

4.1 OBJECTIVES, OBSERVATIONS, AND METHODOLOGY

A site reconnaissance was conducted to inspect physical features and make general observations regarding the subject properties and vicinity with respect to the likelihood of identifying REC's. The following tasks were completed:

- visual inspection of the properties and surrounding property was conducted to identify potential environmental impacts existing on the properties or from adjacent areas;
- various property features were photographed as the accessible portions of the site were systematically walked to obtain as close to 100% coverage as possible;
- visual surface observations were made to identify any evidence of spills, such as stained soil/concrete or vegetative stress;

The results of the reconnaissance are summarized below to provide a representation of subject properties uses and conditions at the time of the site visit. Any limitations that existed during the reconnaissance such as physical obstructions were documented. A photographic record of the site visit is included in **Appendix K**.

4.2 GENERAL SITE SETTING

The subject properties are located in the City of Buffalo, approximately 1.6 miles east of the Niagara River, less than 0.35 miles north of Scajaquada Creek, and about 1.4 miles northwest of the Buffalo Zoo. The topography is relatively flat and sloping southwest. The subject properties are 600 feet above sea level and is located at latitude 42° 56' 27" N; Longitude -78° 52' 45" W.

4.3 SUMMARY OF EXTERIOR AND INTERIOR OBSERVATIONS

680 Amherst Street contains one structure and parking spaces. The structure is one story and contains a basement that houses the majority of the utilities for the building. The interior of the structure is largely gutted and has large amounts of debris scattered throughout. The structure is a former bowling alley and

contains two separate rooms with bowling lanes as well as a bar situated in the front of the building.

1628 Elmwood Avenue contains one structure that occupies the entire property. The structure is completely empty besides minor amounts of debris scattered throughout. There are multiple different partitioned rooms within the building including a bathroom.

155 Marion Street contains one structure as well as parking spaces that occupy the majority of the property. The structure was a former auto shop and has many items from that operation left over. These items include a hydraulic lift and 55-gallon drums.

666 and 668 Amherst Street are currently vacant lots that were previously developed as residential structures before being demolished in 2021. Both lots contain some C & D debris. 668 Amherst Street has a portion of a parking lot on the northern side of the property.

670 Amherst Street and 1624 Elmwood Avenue are currently developed as parking lots.

1634 Elmwood Avenue is currently a vacant lot with C & D debris scattered throughout the property.

Refer to **Appendix K** for further detail.

4.3.1 Treatment, Storage, or Disposal Facilities (TSDF)

The properties are not associated with a TSDF and no areas characteristic of the same were observed. The properties have never been identified as a TSDF.

4.3.2 Hazardous Waste/Substances/Drums/Containers

BE3 did not observe hazardous waste or substances associated with the subject properties. Household hazardous waste is assumed to exist in the occupied apartments.

4.3.3 Aboveground/Underground Chemical/Petroleum Storage Tanks (AST/UST)

Two ASTs used for fuel oil storage were observed in the basement of 680 Amherst Street. Staining was observed proximate to floor drains and cracks in the ground.

4.3.4 PCB Containing Equipment

There is little potential for PCB containing equipment on the subject properties. Multiple transformers were noted along the properties boundaries located on perimeter utility poles.

4.3.5 Stains, Spills, Stressed Vegetation

Floor staining was noted in 155 Marion Street, 680 Amherst Street, and 1628 Elmwood Avenue.

4.3.6 Landfills/Dumping Activities/Solid Waste/Wastewater

No dumping was observed during the site visit.

4.3.7 Pits, Sumps, and Wells

Sump pumps were noted in the basement.

4.3.8 Ponds and Lagoons

No ponds or lagoons are associated with the subject properties.

4.3.9 Coastal Areas

The subject properties are not associated with a coastal area.

4.3.10 Odors and Vapor Intrusion Assessment

Odor was not noted on the subject properties. A vapor encroachment screen is addressed in Section 4.4.

4.3.11 Potable Water Supply

Potable water supply is from the City of Buffalo Department of Water and Water Supply.

4.3.12 Sewage Disposal System

Sewage is assumed to run to municipal combined sewer system.

4.3.13 Heating/Cooling

Heating and cooling systems are commonly forced air and gas or electric water heaters. These systems vary across the subject properties.

4.4 VAPOR ENCROACHMENT SCREEN

Vapor intrusion is an indoor air quality issue that develops when volatile chemicals from impacted soil or groundwater evaporate into the air of overlying buildings. This is very similar to the process through which naturally occurring radon gas seeps into structures and buildings. Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions - ASTM E 2600-10 is the guideline used to assess the need for a vapor intrusion assessment (VIA) of a property. The goal of a VIA is to identify whether a vapor intrusion condition (VIC) exists or is likely to exist on the property (i.e., presence or likely presence of a COC in indoor air from the vapor of a contaminated soil or groundwater at a concentration that presents or may present an unacceptable health risk to occupants). This should not include de minimis conditions that are trace concentrations or do not normally represent an unacceptable risk and that generally would not be subject to enforcement actions.

Specific database findings for 155 Marion Street are as follows:

- Phils Auto SVC Auto RPR & SERV – 155 Marion Street – Historic Auto

A review of additional governmental records of surrounding properties within the ASTM radius indicated a total of one hundred and twenty-one (121) database records within the radius completed for the area around the subject properties. The records included: three (3) ASTs; eight (8) NY BROWNFIELDS sites; two (2) DEL SHWS sites; seven (7) EDR Hist Auto sites; six (6) Historic Cleaner sites; two (2) EDR MGP sites; one (1) Engi Control site; one (1) FUDS site; two (2) NY INST CONTROL sites; fifteen (15) NY LTANKS; five (5) NY MANIFEST sites; twenty-four (24) NY SPILLS; two (2) PFAS ECHO sites; twelve (12) RCRA NonGen/NLR sites; four (4) RCRA-LQG sites; three (3) RCRA-SQG sites; four (4) RCRA-VSQG sites; two (2) SEMS sites; five NY SHWS sites; two (2) SWF sites; and eleven (11) NY USTs.

Specific database findings on the subject properties are as follows:

- Wash M White Laundromat – 1630 Elmwood Avenue – Historic Cleaner
- Dooley EUG F Auto Reor – 1630 Elmwood Avenue – Historic Auto
- Voelker's Bowling Center – 686 Amherst Street – UST

Specific database findings in close proximity to the subject properties are as follows:

- Old Sunoco Station – Amherst Street and Elmwood Avenue – NY Spills # 8905408
- National Fuel Gas – Amherst Street and Elmwood Avenue – NY Spills # 8810090
- Thorough Cleaners – 1611 Elmwood Avenue – Historic Cleaners
- Former Gas Station – 1601-1595 Elmwood Avenue – NY Spills # 2009182
- Obenauer Albert Filling Station – 1601 Elmwood Avenue – Historic Auto
- NYC Park Cleaners CLO CLNRS – 1596 Elmwood Avenue – Historic Cleaners
- Castle Cleaners INC – 1595 Elmwood Avenue - Historic Cleaners
- Good CLNS CLO – 1654 Elmwood Avenue – Historic Cleaners
- Joe's Service Center – 1602 Elmwood Avenue – NY Spills # 200910 and # 2003276, LTANKS, UST, Historic Auto

It is uncertain whether any impacts to the subsurface environment exist from these off-site sources, however, many of these sources are upgradient and in close proximity to the subject properties.

5.0 INTERVIEWS CONDUCTED

5.1 OWNER

The owner was present during the site walk and provided limited knowledge on the site. The owner mentioned a previous Phase I & II ESA that had been done on the subject properties. BE3 could not find records detailing these reports and has not received them as of writing this.

5.2 SITE MANAGER

The site manager was not interviewed.

5.3 OCCUPANTS

The occupants were not interviewed.

5.4 LOCAL GOVERNMENT OFFICIALS

No interviews were conducted, however, a FOIL request was made to the City of Buffalo and to the NYSDEC Region 9 office. As of this writing information has only been received from the City of Buffalo. Additional information will be amended to this report as appropriate and as further obtained from DEC personnel.

5.5 OTHERS/ADJACENT PROPERTY OWNERS

The owners and owner's representatives of adjacent properties were not contacted.

6.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Findings Summary

This Phase I ESA was completed in December 2023, for 666, 668, 670, and 680 Amherst Street, 1624, 1628, and 1634 Elmwood Avenue, and 155 Marion Street in Buffalo, New York as listed in this report. The Phase I ESA was completed for SA&A EVI MC Family, LLC has been conducted as part of a due diligence review and as an update to a previous Phase I ESA completed by TurnKey Environmental Restoration, LLC in 2019 which covered a larger property than the subset covered in this report. This report has been prepared in accordance with the Phase I Environmental Site Assessment Practice E 1527-21 (ASTM Standard).

A lien search was completed for 680 Amherst Street, and no environmental liens were found. There is no indication based on historical records of the subject properties that would indicate or relate to environmental liens.

Data Gaps

The ASTM standard requires that significant data gaps that affect the ability of the environmental professional to identify RECs be identified and that the sources of information that were consulted to address the data gaps be identified. The following data gaps exist for this Phase I ESA:

- A user questionnaire has not been returned.
- Adjacent properties were not entered.
- A lien and AUL and title search back to 1980 was only completed for the 680 Amherst subject property.

BE3's professional opinion is that these data gaps do not create a significant issue for our conclusions.

Conclusions/ Recommendations

BE3 has performed and completed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E1527-21 for the subject properties located in the City of Buffalo, Erie County, New York. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 and data gaps are identified above in this section.

No CRECs were identified in relation to the subject properties.

The following RECs are associated with the subject properties as follows:

- **REC** – Historic and current uses as an auto repair shop at 155 Marion Street represents a REC for the subject properties. Municipal records indicate installation of presumed USTs at 155 Marion Street in unknown locations. Specifically, one 1000-gallon gas tank was installed in 1946 and one additional 1,000-gallon tank was installed in 1955.
- **REC** – Historic uses as a former dry cleaners and auto repair shop at 1630 Elmwood Avenue may represent a potential vapor concern.
- **REC** – ASTs in the basement of 680 Amherst used for fuel oil storage as well as staining proximate to floor drains and cracks in the floor could represent a release to the environment.
- **REC** – Suspected USTs adjacent to the subject properties at 141 Marion Street represent a REC for the subject properties due to the unknown status of the tanks and proximity.

The following HREC is associated with the subject properties as follows:

- **HREC** - The Voelker's Bowling Center UST at 686 Amherst Street, which is now the eastern portion of 680 Amherst Street, was removed in May 2003. During the removal of the 5000-gallon heating oil tank, contamination was discovered and the spill was assigned #0375107. Approximately 160 tons of contaminated soil was removed from the site and samples were taken around the hole from the tank. The results came back below regulatory guidance and the spill was subsequently closed in September 2003. Even though the spill appears to have been adequately cleaned, it is still considered an HREC for the subject properties.

The following BERs are associated with the subject properties as follows:

- **BER** – Historic adjacent property uses near the subject properties including dry cleaners located at 1611 Elmwood Avenue and a filling station located at 1602 Elmwood Avenue may represent a potential vapor concern.
- **BER** – On-Site fill material (i.e., urban fill containing significant amounts of non-soil debris) identified in the Phase II ESA by TurnKey in July 2019 across the stie is considered a BER for the subject properties.

7.0 NON-SCOPE SERVICES

7.1 Radon

Radon is a naturally occurring radioactive gas that is a daughter product within the uranium-238 decay chain and has been associated with an increased risk of developing lung cancer. It is colorless, odorless, and tasteless and can be found in high concentrations in soils and rock in the subsurface. Radon can migrate through small fractures into structures through floors and walls, drains, sump pipes and pores. The concentrations that occur within structures are dependent upon source quantity, radioactive decay, and ventilation.

Surveys across the US indicate that as many as 21 percent of homes may exceed the maximum radon level suggested by the U.S. Environmental Protection Agency (EPA). Exposure levels can be quite variable depending on the amount of time spent in the home and the percentage of that time spent in the high-radon areas. Outdoor concentrations of radon gas tend to be minimal. Radon exposure is typically measured in picocuries per liter (pCi/L). The EPA and NYSDOH strongly recommend that property owners take remedial action if the levels recorded are higher than 4 pCi/L.

The subject properties are located within the City of Buffalo, Erie County, New York. Typical radon levels for the city can be found at source: www.health.state.ny.us/nysdoh/radon/towns.htm

7.2 Mold

Mold can germinate and colonize when a food source (drywall, wood, insulation, paper, etc.) is present accompanied by ideal temperatures and moisture content. Structural leaks often lead to accelerated mold growth, and the odor commonly associated with mold is from microbial volatile organic compounds (mVOCs). Some mold produces various mycotoxins that are considered toxic and may have negative health effects on humans.

No mold was observed during the site reconnaissance.

7.3 Asbestos Containing Material/Lead-Based Paint

Asbestos is a naturally occurring material fiber that was once widely used in building materials and products for its thermal insulating properties and fire resistance. EPA defines asbestos-containing material (ACM) as material that contains more than 1% asbestos.

Lead is a soft, bluish metallic element that has been used in a variety of products. According to EPA, paint manufacturers frequently used lead as a primary ingredient in many oil-based interior and exterior house paints through the 1940s and generally decreased its use in the 1950s and 1960s as latex paints became more widespread. The federal Department of Housing and Urban Development (HUD) estimated that 75% of the houses built in the United States before 1978 contain some lead-based paint. Lead from paint, chips, and dust can pose health hazards if not properly managed.

No asbestos containing material or lead based paint were observed during site reconnaissance.

7.4 Emerging Contaminants

Per- and polyfluoroalkyl substances (PFAS) are contaminants used in many products and have been linked to health issues. New York State has been developing drinking water standards, also called maximum contaminant levels (MCLs) to address these contaminants, starting with the two most common PFAS: perfluorooctanoic acid (PFOA) and perfluorooctane sulfonate (PFOS). Public drinking water with PFOA or PFOS above the MCLs must be treated to reduce the levels below the MCL. Common products containing PFAS include paint and varnish, pesticides and insulation of electrical wires.

No materials indicative of PFAS were observed on the subject properties.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in 312.10 of 40CFR312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the target property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Jason Brydges, P.E.

Date: 12/23

In accordance with the ASTM Standard, A Phase I Environmental Assessment must be performed by an environmental professional meeting certain minimal requirements. BE3 credentials far exceed these minimum credentials. Resumes for individuals that developed this Phase I Environmental Assessment are provided in **Appendix M**.

Custom Soil Resource Report for **Erie County, New York**

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/>) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (<https://offices.sc.egov.usda.gov/locator/app?agency=nrcs>) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Erie County, New York
Survey Area Data: Version 22, Sep 10, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jul 4, 2020—Jul 10, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI

Ut	Urban land-Odessa complex, 0 to 3 percent slopes	40.3	54.3%
Uu	Urban land-Schoharie complex, 0 to 3 percent slopes	4.9	6.6%
Totals for Area of Interest		74.2	100.0%

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The

Custom Soil Resource Report

delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Erie County, New York

Ud—Urban land

Map Unit Setting

National map unit symbol: 9rq4
Mean annual precipitation: 36 to 48 inches
Mean annual air temperature: 45 to 50 degrees F
Frost-free period: 115 to 195 days
Farmland classification: Not prime farmland

Map Unit Composition

Urban land: 80 percent
Minor components: 20 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

EDR Environmental Lien and AUL Search 1980

The EDR Environmental Lien and AUL Search 1980 report provides results from a search of available land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel number and/or legal description
- search for ownership information filed between 1980 and the most current publicly available date
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for environmental encumbering instrument(s) filed between 1980 and the most current publicly available date
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Property Archives, LLC researched and compiled the land title information contained in this EDR Environmental Lien and AUL Search 1980 report on behalf of EDR.

Correcting Deed

THIS INDENTURE,

Made this 4th day of December, Two Thousand Three

BETWEEN

AM-ELM REALTY, INC.,
A corporation organized under the laws of the State of New York
on October 10, 1967 and dissolved under the same on March 14, 1989
686 Amherst Street
Buffalo, New York 14207

Grantor(s), and

AM-ELM REALTY, INC formerly known as
MARK GLENN REALTY, INC.,
A corporation organized under the laws of
the State of New York,
686 Amherst Street
Buffalo, New York 14207

Grantee(s)

WITNESSETH, that the Grantor(s), in consideration of One & No More (\$1 & No More) Dollars lawful money of the United States, paid by the Grantee(s), does hereby remuse and release and forever Quit-Claim unto the Grantee(s), its successors and assigns forever

ALL THAT TRACT OR PARCEL OF LAND, situate in the City of Buffalo, County of Erie and State of New York, being part of Lot No 83, Township 11, Range 8 of the Holland Land Company's Survey, bounded and described as follows

BEGINNING at a point in the westerly line of Elmwood Avenue, formerly McPherson Street, distant one hundred twenty-six and eighteen hundredths (126 18) feet north of the intersection of the westerly line of Elmwood Avenue with the north line of Amherst Street, thence westerly parallel with Amherst Street, one hundred twelve and three tenths (112 3) feet, thence northerly at right angles thirty-one (31) feet, thence easterly parallel with Marion Street, one hundred twelve and three-tenths (112 3) feet, more or less, to the west line of Elmwood Avenue, thence southerly along the said west line of Elmwood Avenue, thirty-one and sixteen hundredths (31 16) feet to the place of beginning

EXCEPTING THEREFROM the following described premises

BEGINNING at a point in the westerly line of Elmwood Avenue (formerly McPherson Street) distant one hundred twenty-six and eighteen hundredths (126 18) feet north of the intersection of the westerly line of Elmwood Avenue with the northerly line of Amherst Street thence westerly, parallel with Amherst Street, about forty-five (45) feet to the east line of concrete building now located on premises above described, thence northerly along the east line of said concrete building about thirty-one (31) feet to the north line of premises conveyed by deed recorded in Erie County Clerk's Office in Liber 3795 of Deeds at Page 597, thence easterly parallel with Marion Street along the northerly line of said last described premises about forty-seven (47) feet to the west line of Elmwood Avenue, thence southerly along the west line of Elmwood Avenue thirty-one and sixteen hundredths (31 16) feet to the point of beginning

This deed is given solely to correct and clear title to the above-described property which should have been conveyed to Mark Glenn Realty, Inc., the grantee herein under a previous name by deed recorded in the Erie County Clerk's Office in Liber 9808 of Deeds at page 424.

SUBJECT TO easements, restrictions and rights of way of record now in effect, if any

TOGETHER with the appurtenances and all the estate and rights of the Grantor(s) in and to the said premises

TO HAVE AND TO HOLD, the above granted premises unto the said Grantee(s), heirs, successors and assigns forever

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

680 AMHERST STREET
BUFFALO, NY 14207

COORDINATES

Latitude (North):	42.9409070 - 42° 56' 27.26"
Longitude (West):	78.8791760 - 78° 52' 45.03"
Universal Transverse Mercator:	Zone 17
UTM X (Meters):	673038.2
UTM Y (Meters):	4756220.0
Elevation:	600 ft. above sea level

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Version Date:	2019
East Map:	14122104 BUFFALO NE, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
36029C0185G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
3602300015B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BUFFALO NW	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
5	1/2 - 1 Mile East	E
1G	1/2 - 1 Mile East	E

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Silurian
Series:	Upper Silurian (Cayugan)
Code:	S3 (<i>decoded above as Era, System & Series</i>)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of BE3 on Jun 01, 2023.

TARGET PROPERTY

680 Amherst Street
Buffalo, NY 14207

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

TARGET PROPERTY FINDINGS

TARGET PROPERTY DETAIL

**680 Amherst Street
Buffalo, NY 14207**

680 AMHERST ST

Date: **3/30/2021**
Permit Type:
Description: ***** 680 AMHERST AKA 686 AMHERST *** DEMOLISH TO GRADE A 2-STORY
COMMERCIAL BUILDING FUTURE LAND USE VACANT. ***MAJOR SITE PLAN
APPROVAL REQ***2/2/23 - judge order**

Permit Description: **Demolition Application**
Work Class:
Proposed Use:
Permit Number: DEMO21-9532852
Status: Approvals and Reviews
Valuation: \$1.00
Contractor Company:
Contractor Name: HANNAH DEMOLITION INC

Date: **9/15/2009**
Permit Type: **REPAIR**
Description: **tear off / reroof to commercial (Voelker's Bowling alley),**

Permit Description: **RENOVATIONS TO EXISTING BLDG**
Work Class:
Proposed Use:
Permit Number: 144055
Status: Open
Valuation: \$19,131.00
Contractor Company:
Contractor Name: MURRAY ROOFING CO. INC.(LTC)

TARGET PROPERTY FINDINGS

Date: **5/12/2003**
Permit Type: **TANKS**
Description: **excavate. remove and backfill 5000 gallon fuel oil tank. no str chgs to a 2 sty, masonry bowling alleys. 3 copies of the survey signed off by fire prevention.**

Permit Description: **STORAGE TANK PLACE/REMOVE PERM**
Work Class:
Proposed Use:
Permit Number: 53428
Status: O
Valuation: \$4,000.00
Contractor Company:
Contractor Name: K & T PUMP & TANK INC FFL/GNC

Date: **4/1/2003**
Permit Type: **REPAIR**
Description: **siding and trim. no str chgs.**
Permit Description: **RENOVATIONS TO EXISTING BLDG**
Work Class:
Proposed Use:
Permit Number: 52010
Status: C
Valuation: \$6,000.00
Contractor Company:
Contractor Name: NICHTERASSOCIATES

ADJOINING PROPERTY FINDINGS

ADJOINING PROPERTY DETAIL

The following Adjoining Property addresses were researched for this report. Detailed findings are provided for each address.

AMHERST ST

632 AMHERST ST

Date: **5/17/2022**
Permit Type:
Description: **Install 6 outlets - Dog Days, Inc., (716) 886-3647**

Permit Description: **Electrical (No Plans)**
Work Class:
Proposed Use: B - Business (Offices, Professional Services, etc.)
Permit Number: ELEC22-9553550
Status: Inspections
Valuation: \$4,100.00
Contractor Company:
Contractor Name: Mike Murphy

Date: **4/9/2018**
Permit Type:
Description: **NEW CONCRETE DRIVEWAY IN SAME FOOTPRINT AS EXISTING AT RIGHT OF BUILDING AND NEW CONCRETE PAD (AT LOCATION OF EXISTING) IN FENCED IN DOG AREA AT "DOG DAYS OF BUFFALO".**

Permit Description: **Repair Permit (No Plans)**
Work Class:
Proposed Use:
Permit Number: REP18-9449350
Status: Inspections
Valuation: \$4,600.00
Contractor Company:
Contractor Name: BELINDAADAMSON

ADJOINING PROPERTY FINDINGS

Date: **8/11/2017**
Permit Type:
Description: **Install electrical service to garage. Install electrical outlets, switch, and lights in garage.**

Permit Description: **Electrical (No Plans)**
Work Class:
Proposed Use: Commercial Property
Permit Number: ELEC17-9435790
Status: Inspections
Valuation: \$2,000.00
Contractor Company:
Contractor Name: MICHAEL MURPHY

Date: **8/7/2017**
Permit Type:
Description: **RUNNING GAS AND WATER LINES FROM HOUSE TO GARAGE**

Permit Description: **Plumbing (No Plans)**
Work Class:
Proposed Use:
Permit Number: PLUM17-9435501
Status: Closed
Valuation: \$6,195.00
Contractor Company:
Contractor Name: FRANK DIMARIA

ADJOINING PROPERTY FINDINGS

Date: **6/26/2017**
Permit Type:
Description: **GARAGE REPAIR: Roof tear off & replacement, new garage door, 2 new entry doors, new replacement window.**
Interior Garage: eventual insulation and drywall.

Permit Description: **Repair Permit (No Plans)**
Work Class:
Proposed Use: Commercial Property
Permit Number: REP17-9433836
Status: Closed
Valuation: \$5,000.00
Contractor Company:
Contractor Name: Robert Belstadt

Date: **12/18/2012**
Permit Type:
Description: **I am putting in a new garage door, siding, and gutters on the detached garage., REPAIR/REPLACEMENT WINDOWS**

Permit Description: **RENOVATIONS TO EXISTING BLDG**
Work Class:
Proposed Use:
Permit Number: 189642
Status: Issued
Valuation: \$4,000.00
Contractor Company:
Contractor Name:

ADJOINING PROPERTY FINDINGS

Date: 9/17/2009

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumeric designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by BE3 were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by BE3 were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1925 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

DEC Memo: "5/3/22 FG site inspection. CANorris on site to install sumps and found petroleum contamination. From: Kolaga, John T. Sent: Tuesday, May 3, 2022 3:30 PM To: Gallego, Francine (DEC) Subject: 1602 Elmwood Avenue, Buffalo, NY/Joe's Service Center Ms. Gallego: Wanted to provide you with a short update. C.A. Norris and his crew completed their excavation of impacted soils within the pump island areas on-site today. In addition, Sentinel Technologies was present on the site this afternoon to take confirmatory samples in each of the 3 excavated areas. Mr. Norris advises that he will shortly be placing gravel into each of the excavations and commencing the installation of containment sumps and new fuel dispensers thereafter. Mr. Norris hopes to be able to restore the station so that Joe s Service Center may resume operations next week. I expect to be back in touch with you once we have received the analytical results from the confirmatory sampling in the next few weeks and have had an opportunity to review and consider the results. Thank you for your consideration. John Kolaga JohnT. Kolaga 716.854.3400 ext. 239 5/23/22 From: Kolaga, John T. Sent: Monday, May 23, 2022 11:02 AM To: Gallego, Francine (DEC) Subject: Joe's Service/1602 Elmwood Avenue, Buffalo, NY (Spill 2200910) Dear Ms. Gallego: I wanted to send you this quick email to let you know that s I ve spoken to Jack Fisher of Sentinel Technologies about his confirmatory sampling done at Joe s Service about a week ago. As you will recall, Joe s Service is an independently owned and operated gas station which currently sells Sunoco products and which has been operating since the 1950s/1960s. Mr. Fisher reports as follows: Although there were a number of constituents detected in confirmatory samples taken in the area of the removed pump islands locations above CP-51 levels (primarily at the pump island located in the most north-westerly location), Mr. Fisher reports that, of all of the samples taken, only one constituent was detected above the 6 NYCRR 375-6.8(b) unrestricted residential SCO level in one of the samples taken. This was 1,2,4-trimethybenzene in one sample at 70 ppm (which is over the 47 ppm unrestricted residential standard in 6 NYCRR 375-6.8(b)). This is below the commercial SCO of 190 ppm. Based on my conversations with Mr. Fisher last week, I hope to get you Sentinel s full report later this week. I will keep you posted. John Kolaga 6/14/22 From: Kolaga, John T. Sent: Tuesday, June 14, 2022 11:24 AM To: Gallego, Francine (DEC) Subject: RE: Joe's Service/1602 Elmwood Avenue, Buffalo, NY (Spill 2200910) Francine: Further update. I ve emailed with Jack Fisher of Sentinel Technologies and Chuck Norris of C.A. Norris a number of times since my email below and advise as follows: I am told the Sentinel Technologies report on the work done at Joe s Service is nearly complete. The hold-up at this point is the inclusion of soil disposal information, which disposal I understand is going to occur late this week/early next week after some remaining work on the cathodic protection

MAP FINDINGS

JOES SERVICE, 1602 ELMWOOD AVE, BUFFALO, NY 142073016 (Continued)

system. Realistically, it appears that we will get you the final Sentinel report by next Friday or thereabouts. John Kolaga 716.854.3400 ext. 239 From: Kolaga, John T. Sent: Thursday, July 7, 2022 5:10 PM To: Gallego, Francine (DEC) Subject: RE: Joe's Service/1602 Elmwood Avenue, Buffalo, NY (Spill 2200910) Francine: A further update: I understand that, on Tuesday, July 5th, the soil was finally removed from the site by the contractor, the anodes to the cathodic system tested, and the concrete work completed. I spoke to Sentinel Technologies today and they advise that promptly upon receipt of the disposal receipts, they will finalize and send me their report (with exhibits) for conveyance to you. I expect that will happen next week. John Kolaga 716.854.3400 ext. 239 7/27/22 From: Kolaga, John T. Sent: Tuesday, July 26, 2022 10:41 AM To: Gallego, Francine (DEC) Cc: Jack Fisher ; Chuck Norris Subject: Joe's Service Remediation Report/NYSDEC Spill Nos. 2110658 and 2200910 Ms. Gallego: On behalf of my client, I now submit Sentinel Technologies Report for the remediation of Joe s Service at 1602 Elmwood Avenue, Buffalo, New York to the NYSDEC for review. As you may know, Joe s Service has been a privately owned and continuously operated vehicle service/repair facility with petroleum storage and dispensing facilities since the 1950s, or more than 60 years, at the corner of Elmwood Avenue and Amherst Street. The confirmatory samples recently taken by Sentinel Technologies noted several constituents at Dispensing Island 1 and 2 above CP-51 standards; however, only one constituent (1, 2, 4 Trimethylbenzene) was found above the restricted residential standards in Part 375-6.8(b). There were zero (0) constituents found above the restricted commercial standards in Part 375-6.8(b). Based on all of the above, we respectfully request that the NYSDEC designate the above as inactive and close the spills. Thank you very much for your consideration. John Kolaga FG review of the report does not agree that the site could be made inactive at this time. Additional investigation into the extent of the contamination is necessary based on the level of contamination discovered at island 1. A workplan was requested from John Kolaga for the subsurface investigation to be submitted by 8/15/22. 7/27/22 FG spoke with John Kolaga. He said he will provide a subsurface investigation. He said there is a potential purchaser of the property who may want to develop under the BCP. 8/15/22 The attorney representing the rp was out with covid last week and requested an extension to respond until 8/22/22. 8/17/22 From: Gallego, Francine (DEC) Sent: Thursday, August 18, 2022 8:26 AM To: 'Kolaga, John T.' Cc: Jack Fisher Subject: RE: Joe's Service Proposed Work Plan/Spill No. 2200910 John, Thank you for the submission of the work plan for spill 2200910. I have the following comments: There was no map with the proposed boring locations. The depth of the borings should be at least 12 ftbgs or until the limit of contamination is identified vertically which may or may not be at the 12 ftbgs level. I do not want to limit the analytical to 4 locations. I think it should be a field decision with the flexibility to allow for additional analytical if necessary. Please provide an updated workplan with the requested changes and let me know if you have any questions. Thank you, Francine 716-870-9928 8/23/22 Sentinel is not available until oct/nov so John Kolaga is looking for another consultant to answer the Dept's questions and to begin the site work. 9/20/22 The workplan

Subject: RE: Work Plan Joes Service Hi Francine Geoprobe work is scheduled for this Wednesday (10/5) at 9 AM. Thanks, Jeffrey A. Wittlinger, P.E., BCEE President 11/3/22 The supplemental Phase II was submitted: From: Kolaga, John T. Sent: Thursday, November 3, 2022 11:54 AM To: Gallego, Francine (DEC) Cc: 'Jeffrey A. Wittlinger' Subject: Supplemental Phase II Environmental Site Assessment/Joe's Service, 1602 Elmwood Avenue, Buffalo, NY (NYSDEC Spill 2200910) Ms. Gallego: Attached please find Leader Consulting Services Supplemental Phase II Environmental Site

MAP FINDINGS

JOES SERVICE, 1602 ELMWOOD AVE, BUFFALO, NY 142073016 (Continued)

Assessment for Joe s Service, 1602 Elmwood Avenue, Buffalo, New York related to NYSDEC Spill 2200910. At the Department s request, this report was prepared as a follow up to Sentinel s 2022 Phase II Environmental Site Assessment after Sentinel found residual levels of soil contamination in the vicinity of pump island number 1 above CP-51 levels. Based on our conversations, we understand that the purpose of this work was to delineate the extent of these residual contaminants. As we have the discussed, my client is a sole proprietor of a retail gas station/auto repair facility where new pump islands were installed earlier this year. To the best of our knowledge, the site has been a retail gas station/auto repair facility since the 1950s. As the attached report indicates, low levels of residual petroleum were identified a short distance immediately to the north, south, east and west of pump island number 1. The extent of those residuals was delineated to the east, west and south of pump island number 1. The limits of soils impacted by residual constituents above CP-51 levels could not be identified to the north because of the presence of utility obstructions. The levels found there were, in Leader s opinion, in near proximity to the northern limits of the impacted soils. Based on these data, Leader and I request that the site receive an inactive status designation and that Spill 200910 be closed. Thank you for your consideration. John Kolaga John T. Kolaga Partner 1600 Liberty Building - Buffalo, New York 14202 - 716.854.3400 ext. 239 7 borings were advanced. Soil samples were collected from each boring for the TCL VOC list of analytes SB1 no results were above CP51 levels SB2 exceed CP51 levels for 1,2,4 Trimethylbenzene 60.9 ppm, Ethylbenzene 19.8 ppm, Isopropylbenzene 3.68 ppm, m,p Xylene 15.2 ppm SB2A no results were above CP51 levels SB3 exceed CP51 levels for Benzene .099 ppm, m,p Xylene 15.1 ppm SB3A no results were above CP 51 levels SB4 exceed CP51 levels for 124Trimethylbenzene 141 ppm, 135Trimethylbenzene 43 ppm, Ethylbenzene 12.6 ppm, Isoproylbenzene 3.38 ppm, m,pXylene 53.8 pm, naphthalene 21.4 ppm, nButylbenzene 18.2 ppm, nPropylbenzene 17 ppm, oXylene 5.86ppm SB4a exceed CP51 levels for 124Trimethylbenzene 25.3 ppm, Ethylbenzene 4.47 ppm, m,pXylene 15.2 ppm. Petroleum contamination is limited to the area around Pump Island 1. The areas are inaccessible due to the operating station and the sidewalk and street. No additional work is required at this time. The site is inactive."

Remarks: "CLEANUP PENDING"

DEC Memo:	"07/27/20 CMM called Mark Kubiniec from Joe's Service Center. Gas at dispenser appears to be pumping slower than normal. Mark shut down dispenser and scheduled contractor to conduct a line test. No active leak and/or significant losses noticed in 10 day reconciliation reports. Will await pressure test results. 07/28/20 CMM call from Mark Kubiniec from Joe's. Line test failed and contractor identified weeping at shear valve. Repaired problem and line testing passed. Minor amount of gas leaked to pea gravel under dispenser (no containment sump) while shear valve was weeping. Replaced small amount of impacted pea gravel. Will await pictures and line test report for review. 03/05/21 CMM received and reviewed line test results from Mark Kubiniec of Joe's Service Center. Leak Detection Systems performed test on 7/28/20 and line test passed. No further action required. 03/08/21 CMM spill closed."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: "2/3/21 Benchmark provided the phase II: The site work was completed in 2019. Based on the scope of services described in this report and subject to the limitations described herein, Terracon concludes the following. ? Based on field screening and laboratory analytical results of borings B-3 and B-4, the site has been impacted by petroleum contamination. VOCs were detected in the soil above applicable SCOs in the vicinity of the former gasoline station. Based on PID readings, visual and olfactory observations of the soils from the remaining borings, it appears the contamination is limited to the northwest corner of the property. It is unknown if contamination is present beneath the existing building. ? Based on the laboratory analytical results of the groundwater sampled from MW-1 and MW-2, dissolved VOCs are above applicable MCLs. 8.0 RECOMMENDATIONS Based on the findings of the LSI, Terracon recommends the following: ? Terracon recommends the client engage in a conversation with the current owner notifying them of the obligation to report releases to the NYSDEC and the findings of this assessment be disclosed to the NYSDEC for their consideration and to assist in determining options for further action. Petroleum spills, under Navigation Law Article 12, 17 NYCRR 32.3 and 32.4, must be reported to the NYSDEC Hotline (1-800-457-7362) by the owner or person in actual or constructive control unless that person has adequate assurance that such a notice has already been given. ? Based on the results of this LSI, sufficient information has been collected to warrant the professional opinion that remediation will be likely required due to the exceedances of applicable SCOs and MCLs. However, based on the results of this LSI, further delineation is needed to better determine the vertical and horizontal extent of the petroleum contamination to determine the appropriate remedial approach for spill closure. ? Terracon recommends that further investigation and remediation be performed with the oversight of the NYSDEC in pursuit of a No Further Action determination from the NYSDEC s Spills Program. ? Based on the limited access (due to existing building structures) to perform investigatory borings and the plans for future development at the site, Terracon recommends considering preparation of a Soil Fill Management Plan (SFMP). The SFMP would be utilized during construction and development of the site as guidance for handling contamination, if encountered. Benchmark plans the following: We are being hired by the developer to remediate the property who will be developing the site and building a Well Now facility. During our phone conversation NYSDEC assigned Spill # 2009182 to the property. I will put together a work plan describing the remediation work Eric Warren Project Manager Remediation/Construction Group ewarren@bm-tk.com Benchmark Environmental Engineering & Science, PLLC TurnKey Environmental Restoration, LLC www.benchmarkturnkey.com 2558 Hamburg Turnpike, Suite 300, Buffalo, NY 14218 Mobile: (716) 462-0490, Office: (716) 856-0599, Facsimile: (716) 856-0583 2/16/21 Benchmark submitted the work plan and phase I. Benchmark plans to remove all of the

petroleum impacted soil and dispose of it. A report of findings will be provided once all the work is done. 3/9/21 From: Eric Warren Sent: Tuesday, March 09, 2021 1:40 PM To: Gallego, Francine (DEC) Cc: Mike A. Lesakowski Subject: RE: 1601 Elmwood Ave Work Plan HI Francine we are going to the site tomorrow to obtain the waste characterization samples. We are looking to start the remediation in about two weeks, I will keep you updated on that schedule. In the meantime please let me know if you have any questions. Sincerely, Eric Warren Project Manager Remediation/Construction Group ewarren@bm-tk.com Benchmark Environmental Engineering & Science, PLLC TurnKey Environmental Restoration, LLC www.benchmarkturnkey.com 2558 Hamburg Turnpike, Suite 300, Buffalo, NY 14218 Mobile: (716) 462-0490, Office: (716) 856-0599, Facsimile: (716) 856-0583 3/18/21 just an update on our project at 1601 Elmwood Ave, Buffalo. The demolition contractor is in the process of demolishing the onsite buildings. These pictures below are taken showing the corner area of the site that we will be remediating. We will be excavating the areas between the basement walls and the gas line (which is pretty much where the temporary fence is). Because there is a basement, when the floor is busted out we will be checking and sampling that soil to make sure the contamination didn't travel under the floor and we will act accordingly. We plan to be onsite to start the remediation next Tuesday or Wednesday. I will let you know for sure when I know. Thanks and let me know if you have any questions in the meantime. Eric Warren Project Manager Remediation/Construction Group ewarren@bm-tk.com Benchmark Environmental Engineering & Science, PLLC TurnKey Environmental Restoration, LLC www.benchmarkturnkey.com 2558 Hamburg Turnpike, Suite 300, Buffalo, NY 14218 Mobile: (716) 462-0490, Office: (716) 856-0599, Facsimile: (716) 856-0583 3/22/21 we will be onsite tomorrow morning to start this project. As the day goes on I will get a feel on the progress so I can touch base with you tomorrow afternoon to let you know how we are doing and when you would like to stop out. Let me know if you have any questions in the meantime. Thanks, Eric Warren Project Manager Remediation/Construction Group ewarren@bm-tk.com Benchmark Environmental Engineering & Science, PLLC TurnKey Environmental Restoration, LLC www.benchmarkturnkey.com 2558 Hamburg Turnpike, Suite 300, Buffalo, NY 14218 Mobile: (716) 462-0490, Office: (716) 856-0599, Facsimile: (716) 856-0583 3/22/21 FG site inspection. Excavation completed. Closure report will be provided. the current property owner is: 1597 Elmwood Buffalo, LLC. 1777 East Henrietta Rd. Bldg A, Suite 100 Rochester, NY 14623 Office # 585-867-4750 Eric Warren Project Manager Remediation/Construction Group ewarren@bm-tk.com Benchmark Environmental Engineering & Science, PLLC TurnKey Environmental Restoration, LLC www.benchmarkturnkey.com 2558 Hamburg Turnpike, Suite 300, Buffalo, NY 14218 Mobile: (716) 462-0490, Office: (716) 856-0599, Facsimile: (716) 856-0583 6/17/21 Turnkey/Benchmark provided the closure report: A total of approximately 596.40 tons of petroleum-impacted soil/fill was excavated from the area of the Site that was associated with the former filling station and transported off-site for disposal at TTC, as further detailed below: o Petroleum-impacted soil (503.44 tons) was removed from the former gasoline filling station area until post-excavation confirmatory samples were below applicable SCOs

MAP FINDINGS

FORMER GAS STATION, 1601 - 1595 ELMWOOD AVE, BUFFALO, NY (Continued)

or until limits of utilities were encountered. o Petroleum-impacted soil (92.96 tons) surrounding the natural gas line was removed until area was outside of the property line. Based on the remedial work completed, as no exceedances of CP-51 SCLs were identified in confirmatory post-excavation soil samples (with exception of the Bottom New Gas Line Sample with slight exceedances that is just beyond the property line), All disposal receipts were provided. Due to the minor exceedance of the CP51 guidance levels the site is made inactive with no further work required."

Remarks: "Phase II investigation showed petroleum contamination in the soils above guidance levels. Benchmark will submit the Phase II report for the Dept review."

Attached you will find a Petroleum Bulk Storage Application and instructions for completing the Petroleum Bulk Storage application. Please fill out the application in its entirety and be sure to submit the application, deed, and registration fee together. In addition, I have a few questions: 1) What is the installation date of the UST? You may not know the exact date but we do need you to get as close as possible. 2) If you are the current owner, how long have you owned the property? Let me know if you have any questions or concerns. Sincerely, Patrick T. Diez Environmental Program Specialist 1, Division of Environmental Remediation 1/14/21 FG emailed Mr. Decarlo for an update on the status of the site. From: Diez, Patrick T (DEC) Sent: Thursday, January 14, 2021 7:52 AM To: Gallego, Francine (DEC) Subject: RE: 315 Grote St, Buffalo Yes Francine, on 11/19/20 we received an application to register the tank as out of service. Once it has been closed/removed we still need an application to update the status of the tank. The PBS # is 9-601881. AND OBSERVED STRONG PETROLEUM ODORS AND REMOVED ABOUT 1/2 DUMP TRUCK OF CONTAMINATED SOIL...ALSO, THE WATER IN THE EXCAVATION HAD A SHEEN ON IT...I TOLD THE RON FRENCH THAT DEC WILL HAVE TO INVESTIGATE THE PETROLEUM PROBLEM AND I WILL HIRE OUR CONTRACTOR...IN THE MEANTIME,THEY WILL BACKFILL THE EXCAVATION AND STOP WORK UNTIL WE FIND THE SOURCE/RP...HIRED NATURE'S WAY TO INVESTIGATE AND REMEDIATE... 4/3/2002: RJJ AT SITE WITH NATURE'S WAY AT 0900...THEY WILL GEO-PROBE THE AREA ALL AROUND THE FIRE HYDRANT TO SEE HOW FAR THE CONTAMINATION TRAVELED AND KEEP ME INFORMED. 4/4/2002: RECEIVED THE BORING LOG MAP AND OVM TABLE ON THE SITE...IT SHOWS THAT MOST OF THE CONTAMINATION IS WHERE THE WATER DEPT. DUG THEIR EXCAVATION AND A SMALL AMOUNT IS UNDER THE SIDEWALK...I WILL DISCUSS THIS WITH THE WATER DEPT. AND NATURE'S WAY. 4/5/2002: AFTER DISCUSSING THIS WITH BOTH BUFFALO WATER DEPT. AND NATURE'S WAY,WE WILL HAVE NATURE'S WAY EXCAVATE THE CONTAMINATED SOIL UNDER THE SIDEWALK AND THEN BUFFALO WATER WILL BACKFILL THE EXCAVATION AFTER THEY REPAIR THE FIRE HYDRANT,THEN NATURE'S WAY WILL REPAIR THE SIDEWALK. 4/19/2002: RECEIVED THE ANALYTICAL REPORT FROM NATURE'S WAY FOR THE LANDFILL CHARACTERIZATION...IT INDICATES THAT GASOLINE

MAP FINDINGS

325 GROTE STREET, 325 GROTE STREET, BUFFALO, NY (Continued)

WAS DETECTED, AND HAD A NEGATIVE FLASHPOINT. 4/25/2002: RECEIVED A PAYMENT PACKAGE FROM LOSIER LABS
 FOR THE AMOUNT OF \$181.13 FOR THE LANDFILL CHARACTERIZATION TESTS...AND ALSO RECEIVED A PAYMENT
 PACKAGE FROM NATURE'S WAY FOR THE AMOUNT OF \$1,202.69 FOR THE GEO-PROBE INVESTIGATION. 5/8/2002:
 RJJ AT SITE AT 0900...NATURE'S WAY AND THE BUFFALO WATER DEPT., ARE AT THE SITE EXCAVATING THE AREA
 AND THE CONTAMINATED SOIL...AFTER ALL THE SOIL IS REMOVED, THE WATER DEPT. WILL REPAIR THE FIRE
 HYDRANT, THEN BACKFILL...NATURE'S WAY WILL DIG TO CLEAN AND TAKE WALL/FLOOR SAMPLES, THEN RETURN TO
 REPAIR THE SIDEWALK...RJJ AT SITE AT 1400...THE WATER DEPT. HAS INSTALLED THE NEW FIRE HYDRANT AND
 NATURE'S WAY IS BACKFILLING THE EXCAVATION...THEY WILL RETURN TOMORROW TO START REBUILDING THE
 SIDEWALK. 5/15/2002: NATURE'S WAY HAS STARTED TO REBUILD THE SIDEWALK AND WILL CONTINUE TOMORROW.
 5/16/2002: RJJ AT SITE AT 1300...NATURE'S WAY HAS POURED THE CONCRETE IN THE SIDEWALK AND WILL
 SPREAD ASPHALT BINDER ON THE SHOULDER. 5/28/2002: RECEIVED THE ANALYTICAL RESULTS FROM LOZIER LABS
 ON THE CONFIRMATORY WALL/FLOOR SAMPLES IN THE EXCAVATION...ALL THE RESULTS ARE BELOW OUR 'STARS'
 GUIDANCE VALUES. 5/29/2002: RECEIVED A PAYMENT PACKAGE FROM NATURE'S WAY FOR THE AMOUNT OF
 \$7,202.01 FOR ALL THE WORK AT THE SITE INCLUDING THE DISPOSAL OF THE CONTAMINATED SOIL. 6/11/2002:
 RECEIVED A PAYMENT PACKAGE FROM LOZIER LABS FOR THE AMOUNT OF \$896.80 FOR THE CONFIRMATORY SAMPLING
 IN THE EXCAVATION...AFTER THIS PAPERWORK COMES BACK, I WILL BE ABLE TO CLOSE OUT THIS SPILL.
 6/12/2002: ALL THE PAPERWORK IS NOW IN, AND THE SPILL HAS BEEN CLEANED UP AND PROPERLY DISPOSED
 OF...NO FURTHER ACTION NEEDED...SPILL CLOSED OUT. 7/10/2002: RECEIVED A PAYMENT PACKAGE FROM
 NATURE'S WAY FOR THE AMOUNT OF \$243.45 FOR WORK WHICH WAS NOT PREVIOUSLY BILLED."

Remarks:

"CALLER SAID THAT CITY EXCAVATED SOIL THAT MAYBE PETROLEUM CONTAMINATED. IS STAGING MATERIAL ON PLASTIC AND IS COVERING. WOULD LIKE
 SOMEONE FROM SPILLS TO VISIT SITE AND ADVISE CITY WHAT TO DO."

Record Updated Date: 02/01/2023
Update By: AECAPRIO
Site Description: "Location: The 0.746-acre site is located in an urban area at 293 Grote Street in the City of Buffalo, Erie County. The site is bordered by Grote Street to the north, residential houses on Marion Street to the south, a 1-story commercial building and associated parking lot to the west and a commercial property with multiple structures to the east. Site Features: The site is currently undergoing redevelopment. The existing 2-story, approximately 17,500 square-foot (sqft), brick building with an exterior courtyard is being renovated into apartments. There is also approximately 0.3-acre gravel parking lot on the site. Zoning and Land Use: The current zoning for the site is N-1S, defined as mixed-use development clusters defined by large-footprint structures. The redevelopment plan for the site is restricted residential, consistent with the City of Buffalo zoning assigned to the site. The properties immediately

MAP FINDINGS

293 GROTE STREET, 293 GROTE STREET, BUFFALO, NY 14207 (Continued)

south are zoned residential. Past Use of the Site: The past uses of the site have included residential, an auto repair facility, various manufacturing industries, and a machine shop. The most recent occupant was Buerk Tool & Machine which operated at the site until 2019. Site Geology and Hydrogeology: The site is located within the Lake Erie-Niagara River major drainage basin, which is typified by little topographic relief that slopes westward towards Lake Erie and the Niagara River. According to the United States Department of Agriculture (USDA) Web soil survey, site soils are characterized as Urban Land (Ud). Soils associated with the Urban Land are characterized as miscellaneous areas in which 80% or more of the soil surface is covered by asphalt, concrete, buildings, or other impervious structures. Previous investigations identified the site geology as fill material in the upper 1 to 4 feet below ground surface (fbgs), consisting of black fines intermingled with gray clay and man-made constituents (brick, cinders, ash, metal cuttings). Native clay soils were encountered below the fill material. The depth to bedrock in the vicinity of the site is greater than 40 fbgs. Regional groundwater flows westerly towards the Niagara River, which flows north. However, local groundwater flow may be influenced by subsurface features, such as excavations, utilities, and localized fill-conditions. "

Env Problem: "Remediation at the site is complete. Prior to remediation the contaminants of concern on the site were semi-volatile organic compounds (SVOCs) and metals, including arsenic and lead, in soil and SVOCs in groundwater. Remedial actions conducted at the site have achieved soil cleanup objectives (SCOs) for restricted-residential use. Residual contamination in soil and groundwater is being managed under a Site Management Plan. "

Health Problem: "The site is partially fenced and mostly covered by a building, asphalt and concrete. Persons who enter the site could contact contaminants in the soil by walking on the site, digging or otherwise disturbing the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of

MAP FINDINGS

293 GROTE STREET, 293 GROTE STREET, BUFFALO, NY 14207 (Continued)

radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Sampling indicates that soil vapor intrusion is not a concern on- or off-site."

Appendix M

Environmental Professional Qualifications

Jason M. Brydges, P.E., MBA

Environmental Engineer

Education

MBA Marketing, Management, and Negotiations SUNY at Buffalo 2005
MS Environmental Engineering and Science Clemson University 1998
BS Environmental Engineering Sciences University of Florida 1995

Mr. Brydges, who will serve as the ESA project manager and primary point of contact, has worked in the environmental engineering field for over 20 years performing a wide variety of environmental assessment, design, and remediation projects. He has been involved with or managed most of the firm's Brownfield projects and is advanced on tax credit/remedial option analysis for site specific needs. Throughout his career, Mr. Brydges has led project teams with increasing levels of responsibility. An overview of projects he has been involved with includes health physics applications; radioactive and hazardous materials remediation; contaminated media sampling design; waste transportation, storage, and disposal consulting; decontamination and decommissioning (D&D) operations design; contaminated site closure engineering; landfill and cover design and permitting; and groundwater, soils, and facility remediation design. As mentioned, he has managed several successful brownfield projects from application through certificate of completion and post remedial monitoring. Mr. Brydges has managed the environmental and civil site work services for dozens of ground mount solar arrays and other energy related projects.

Areas of Expertise

Brownfield Program Site Assessment and Remediation
Environmental Remediation
Radioactive, Solid, and Hazardous Waste Management
Health Physics
Stormwater, Erosion and Sediment Control Design and Installation
Business Development and Marketing
Facility Decontamination and Decommissioning (D&D)

Selected Registration / Certification / Specialized Training

2016: 40-hour HAZWOPER refresher
2015: NYSDEC Erosion and Sediment Control
2015: NCEES Record Completed
2014: 30-hour OSHA Construction Industry
2013: FEMA Training Certification
2013: NYSDOH Asbestos Project Designer Certification
2013: NYSDOT Enhancement Program & Federal Aid Highway Reimbursement Program
2012: Arsenic - Health and Remediation Applications
2012: Hazardous Materials Management
2011: Building Demolition and Environmental Remediation Planning and Execution
2010: AHA Heartsaver First Aid Program Certification
2009: New York State Stormwater Management Certification
2009: Construction Administration for Design Professionals
2002: Professional Engineer, New York, 079402
2001: Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM)
1998: 40-hour HAZWOPER – initial/original course
