

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

Get site information faster and share it easily;

Receive information about all sites in a chosen county - read what you want, delete the rest;

It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Niagara St Market Update: Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (DEC) to investigate the Niagara Street Market site (“site”) located at 710 Niagara Street, Niagara Falls, Niagara County. Please see the map for the **Site Location**. Documents related to the cleanup of this site can be found at the locations identified below under **Where to Find Information**.

Draft Investigation Work Plan

The draft investigation work plan, called a “Remedial Investigation Work Plan,” was submitted to DEC under New York’s Brownfield Cleanup Program. The investigation will be performed with oversight by DEC and the New York State Department of Health (DOH).

How to Comment

DEC is accepting written comments about the draft investigation work plan for 30 days, from **June 6, 2013 through July 5, 2013**. The proposed plan is available for review at the locations identified below under **Where to Find Information**. Please submit comments to the DEC project manager listed under Project Related Questions in the **Who to Contact** area below.

Highlights of the Proposed Site Investigation

The investigation will define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected.

Next Steps

DEC will consider public comments, revise the plan as necessary, and approve the work plan. DOH must concur with the plan. The approved work plan will be made available to the public (see **Where to Find Information** below). After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to the DEC that summarizes the results. DEC will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a cleanup plan, called a “Remedial Work Plan” will be developed and a Decision Document will be proposed. The cleanup plan will include an evaluation of the proposed

site remedy, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. DEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period. DEC will keep the public informed throughout the investigation and cleanup of the site.

Background

Location: The subject property is a combination of three adjacent parcels which together total approximately 0.3 acres. Located in the City of Niagara Falls on the northwest corner of 8th Street and Niagara Street, the property is just west of the intersection of John Daily Blvd. and Niagara Street.

Site Features: The property contains a one-story masonry building.

Current Zoning/Use: Current and intended use is commercial.

Historic Uses: The one-story masonry building formerly functioned as a gasoline service station and vehicle repair facility.

Geology & Hydrogeology: The site appears to have shallow bedrock ranging from 3-5 feet below ground surface. A few borings showed deeper bedrock from 10.5 near the pump island and 9.0 feet adjacent to the UST area. Fill consisting of silty clay, gravel and sand with some clayey-silt. Textured lake sediment underlain by glacial till in some locations was found above the bedrock. The bedrock is described as hard dolostone.

Additional site details, including environmental and health assessment summaries, are available on DEC's website at <http://www.dec.ny.gov/chemical/91582.html> and <http://www.dec.ny.gov/cfm/external/haz/details.cfm?pageid=3&progno=C932159>

Brownfield Cleanup Program

New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses include recreation, housing, business or other uses. A brownfield is any real property that is difficult to reuse or redevelop because of the presence or potential presence of contamination. For more information about the BCP, visit: <http://www.dec.ny.gov/chemical/8450.html>.

Where to Find Information

Public interest in this project is valued and appreciated. Project documents are available at the following locations as well as online at: <http://www.dec.ny.gov/chemical/91582.html> to help the public stay informed.
