Re: Periodic Review Report  
Former Bellport Gas Station  
NYSDEC Site No. E152194

Dear Xiaoyu Chen:

The New York State Department of Environmental Conservation (NYSDEC) and the New York State Department of Health (NYSDOH) have reviewed the March 2026 Periodic Review Report (PRR) and IC/EC Certification for reporting period of January 31, 2025 to January 31, 2026, submitted by P.W. Grosser Consulting, Engineer and Hydrogeologist D.P.C.(PWGC) on behalf of the Suffolk County Department of Health Services (SCDHS) for the above-referenced site. Based on our review, the PRR is approved with the following conditions.

1. Sampling of all monitoring wells for volatile organic compounds (VOCs) via U.S. EPA Method 8260 is required prior to considering a request well decommissioning.
2. Emerging contaminant sampling, including PFAS compounds and 1,4-dioxane, is also required for wells MW-14 (upgradient), MW-11 (downgradient), and MW-9 (most impacted).

The frequency of periodic reviews for this site is one (1) year; therefore, your next PRR is due on March 3, 2027. You will receive a reminder letter and updated certification form 45 days prior to the due date. The next PRR, including the signed certification form, is still due on the date specified above regardless of receipt of the reminder notice.

If you should have any questions, please contact me at 631-380-3346 or via e-mail at [chris.george@dec.ny.gov](mailto:chris.george@dec.ny.gov).

Sincerely,

A handwritten signature in black ink, appearing to read "Chris George". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Chris George  
Assistant Engineer
