1.0 INTRODUCTION

1.1 Purpose of Report

The primary purpose of this report is to describe the Interim Remedial Measures (IRM) completed at the Bush Site in the Village of Cattaraugus, New York (refer to Figure 1) in 2007/2008 pursuant to an approved IRM Work Plan. The IRM was initiated to excavate and dispose off site petroleum impacted soils identified during a 2006 site investigation as part of the Site Investigation/Remedial Alternatives Report (SI/RAR) program at the Bush. This report provides details of the IRM remedial activities and a survey map identifying the boundaries of the site subject to the SI/RAR/IRM program.

In addition to the IRM, as part of the SI/RAR, the final remedy for the site requires a site management plan (SMP) consisting of institutional/engineering controls (IC/EC) for future site development. The SMP was issued final under separate cover in February 2009 (*Site Management Plan, Environmental restoration Program Project for the Bush Site No. E905029, prepared for: Village of Cattaraugus, prepared by; PEI, February 2009*). The SMP provides a description of these controls including ICs for an environmental easement with site classification restrictions and ECs for soils management requirements to mitigate human exposure to slightly impacted site soils during future development.

1.2 Background

1.2.1 Site History and Description

The Bush Site is the location of the former Setter Brothers/Bush Industries property, located at 1 North Main Street in the Town of New Albion, Village of Cattaraugus, Cattaraugus County, New York. Vacant since about 1989, the property consists of approximately 4.43-acres and is currently owned by the Village of Cattaraugus (refer to Figure 2).

Prior to the SI/RAR, the site contained the remnants of a former manufacturing facility including parts of the building shell and building rubble from a partial demolition by a previous owner. As part of the SI/RAR, the remaining shell and building rubble were removed in 2007 to the foundation level. Concrete slab foundations from former buildings covered much of the west end of the Site up to and immediately adjacent Main Street. Prior to Setter Brothers/Bush Industries use of the entire site, historical maps of the property indicated that a Standard Oil facility, an apple evaporator, and gasoline service were formerly associated with portions of the west end of the site adjacent to Main Street. These were located on the site prior to the Bush facility which eventually expanded and took over the entire site. A more detailed history of the site is contained in the SI/RAR report.

1.2.2 Site Investigations

In 2005, the Village of Cattaraugus contracted Panamerican Environmental, Inc. (PEI) and its teaming partner URS Corporation (URS) to conduct the SI and prepare a RAR under the New York State Department of Environmental Protection (DEC) Environmental Restoration Program (ERP -under the 1996 Clean Water/Clean Air Bond Act ECL Article 56 - 6NYCRR 375-4). The goal of the program was to complete focused environmental investigations to accurately assess the potential for contamination, its source, nature and extent, and to develop sufficient data to support the development of long-term remedial alternatives at the site. The final SI/RAR (*Site Investigation and Remedial Action Report, Former Bush industries Site No. E905029, prepared for: Village of Cattaraugus, prepared by: PEI/URS, April 2008*) concluded that petroleum impacted soils existed in the area of the former Standard Oil facility with volatile organic compound (VOC) concentrations that exceeded soil cleanup guidelines (SCGs) established for the site (NYSDEC TAGM 4046 and/or 6 NYCRR Part 375 Restricted Residential Soil Cleanup Guidance Values). To remove this contaminate source, a work plan was completed and approved in August 2007 for an IRM to excavate and dispose off site the impacted soils.

1.2.3 Site Survey

A property/boundary survey was completed in 2005 as part of the SI/RAR program. The property survey was referenced to the New York State Plane Coordinate System West Zone North American Datum of 1983 (NAD83) as a basis of horizontal control and North American Vertical Datum of 1988 (NAVD88) as a basis of vertical control.

A property title research was first completed at the Village and County Clerk's Offices. Once completed, the final exterior boundary was surveyed and monumented with iron pins at the corners where none existed. All of the title information, recovered monuments and new set corner monuments were incorporated onto a final map. The survey map (refer to Figure 2) indicates the boundary lines with all existing buildings (since removed), fences, and other key site features and boundary analysis data.

An environmental easement was established as part of the SMP. A copy of the environmental easement and metes and bounds description is provided in Appendix G.

2.0 INTERIM REMEDIAL MEASURES

2.1 Remedial Actions

Upon NYSDEC and the Village's approval of the IRM work plan in 2007, construction bid documents were prepared for implementing the IRM. The project was publically advertised and bids were received on November 9, 2007. After bid review, a contract was awarded to the lowest

bidder, Horizon Environmental Services. Construction began on December 5, 2007 and was completed on January 16, 2008 (backfilling to grade). The area and depth of the petroleum impacted soils removed along with confirmation sample locations are provided in Figure 7. The IRM remedial actions consisted of:

- The excavating and stockpiling of the surface concrete slab covering the area of impacted soil;
- The excavation, transportation, and landfill disposal of 3,397 tons of petroleum impacted soils;
- The pumping of groundwater (after testing) encountered during excavation and disposal of this groundwater to the ground downgradient of the excavation;
- The backfilling of the excavation to grade with the stockpiled concrete, an estimated 750 tons of on-site fill, and 3,402 tons of approved imported clean fill.

2.2 Cleanup Levels

The potential area of soil impact was estimated from the results of the SI/RAR prior to the IRM and used in developing the specification for the IRM. Soil cleanup levels were based on NYSDEC Technical Assistance and Guidance Memorandum 4046 (TAGM, revised 1994) soil cleanup guideline levels and Soil Cleanup Objectives (SCOs) as presented in 6 NYCRR Part 375 for “Restricted Residential” cleanup levels. The IRM resulted in all petroleum impacted soils being excavated from the area that had VOC/SVOC concentrations exceeding TAGM 4046 soil cleanup guideline levels and/or Part 375 “Restricted Residential” cleanup levels.

2.3 IRM Construction

2.3.1 Surface Concrete Removal

To gain access to the impacted soils a concrete slab (former building floor) that covered the entire impacted area had to be removed. The concrete varied in thickness. The majority was about 6-8 inches thick and was removed with a backhoe. Thicker concrete areas (1-2 feet), which consisted primarily of old building footers and a subsurface floor slab, were broken up with a larger pavement breaker before removal. All surface concrete sections were inspected for petroleum residue by PEI’s site inspector and DEC representative. Most of the concrete was determined to be “clean” and was stockpiled for reuse as backfill. Some of the sub-floor concrete pieces were visually contaminated and disposed of with the impacted soil.

2.3.2 Impacted Soil Removal

After removal of the concrete surface slab, petroleum impacted soils were removed by using a track excavator. The excavator loaded impacted soils into dump trucks for transport to the

Chautauqua County Landfill (located at 3889 Towerville Road, Jamestown, New York 14701). This landfill is permitted to accept petroleum impacted soils for disposal. Each truck delivering soils from the site to the landfill received a manifest/weight ticket showing the tonnage received at the landfill for disposal and included appropriate signatures, ticket numbers, dates, etc. Copies of all weight tickets/manifests are provided in Appendix B. A total of 3,397 tons of petroleum impacted soil was excavated and disposed of at the landfill.

During excavation activities, PEI's site inspector monitored the excavated soil and excavation using a total organic vapor monitor - photoionization detector (PID) and performed visual and olfactory observations. Soil was screened for the presence of petroleum-based volatile organic compounds (VOC's) as the excavation progressed. Screening was performed in two ways: 1) by placing a representative sample from the excavation walls or floor into a ziplock plastic bag, sealing the bag, and allowing the sample to volatilize for an average of 10 minutes and 2) using the PID directly over soil as it was excavated. The concentration of VOC's were measured and recorded by inserting the tip of the Photoionization Detector (PID) into the sample head-space or over the newly excavated soil.

All soils with visual signs of contamination (discoloring), odors and/or elevated PID readings (VOCs) were removed. When the inspector determined the lateral or vertical extent of the impacted soils had been reached by the means noted above, confirmation samples were collected for laboratory analysis (refer to Section 2.3.4). NYSDEC representatives were on-site during some of the excavation, screening and sample activities and observed the final excavation prior to backfilling.

2.3.3 Groundwater Control

Groundwater and surface water/rain/snow melt that entered the excavation was collected in a sump constructed at the low end of the excavation. In general, the water was observed to be visibly "clean" and free of any extensive sheen. The sump water was sampled and analyzed for petroleum related compounds. No petroleum related compounds were detected. Based on these results and in accordance with NYSDEC approval, the water was pumped from the sump to the ground surface sufficiently down gradient and away from the excavation. The excavation sump water analytical sample results are provided in Appendix A.

2.3.4 Excavation Confirmation Testing

Upon completion of excavation and before backfill placement, confirmation samples were collected from the excavation sidewalls and bottom (refer to Figure 7). Two samples were collected from each sidewall of the excavation (8 total) and four collected from the excavation bottom for a total of 12 samples. All the samples analyzed were non-detect for petroleum related compounds. Based on visual observations, PID results and sample analysis, it was determined that all of the petroleum impacted soils had been removed from the area. Analytical results for the confirmation samples are provided in Appendix A.

2.3.5 Excavation Backfill

The contract technical specifications called for using approximately 1,500 tons of on site stockpiled fill as excavation backfill. This material was previously sampled and analyzed and determined to be acceptable for use as backfill. However, because the IRM was conducted in December/January, some of this material was completely saturated and therefore only a portion was used to backfill the excavation (500 to 700 tons). Additional fill was imported from an acceptable offsite source. The remainder of the saturated fill was spread out on the site for use in the spring to fill in any portions of the area that had settled. Prior to backfilling with soil, the stockpiled surface concrete slabs were placed at the bottom of the excavation upon approval by NYSDEC.

The additional imported backfill came from the NYSDEC permitted DR Smith Gravel Pit in the Town of Persia, County of Cattaraugus, New York. A copy of their mining permit is provided in Appendix C. A composite sample was collected from the source soil prior to transporting any fill to the site. The sample was analyzed for the compounds listed in the NYSDEC DER-10 Imported Fill Requirements. The analysis indicated that the concentrations of detected compounds were significantly below the DER-10 Track 2 - Restricted Residential acceptance levels except for the metal Selenium at 5.9 ppm versus the DER-10 level of 4 ppm. Overall the material was deemed acceptable for site backfill. Sample analytical results for the backfill material are provided in Appendix C.

PEI's site inspector recorded 162 truck loads of material placed in the excavation over a five day period to fill the excavation to grade. An additional three truck loads of fill (63 tons) were placed in March 2008 as part of the site restoration to fill in low areas and complete final grading. The total amount of fill imported to fill the excavation was 3,465 tons.

2.3.6 Site Restoration

At completion of backfilling, disturbed areas were graded for drainage with partial success because of extremely wet conditions due to the mid winter time frame. Final site grading was completed in March of 2008 include filling depressed areas with additional fill (refer to 2.3.5 Excavation Backfill) and grading the IRM area.

Also, in December 2008, the remaining two on-site groundwater monitoring wells (MW-3 and MW-4) that were installed during the SI/RAR were decommissioned by over drilling the casings and grouting the wells. Field well decommissioning forms are provided in Appendix F. Both MW-1 and MW-2 were destroyed/removed during the IRM excavation process.

Photographs of the IRM construction program are provided in Appendix E.

2.4 Changes to Design Documents

The only significant change to the design documents was not being able to use all of the on-site stockpiled soil for fill due to the extremely wet soil conditions (refer to Section 2.3.5 above). This resulted in the importation of additional soil to make up the difference.

3.0 QUANTITIES AND COSTS

A summary table of construction quantities and costs comparing bid/contract quantities/costs to actual completion quantities/costs is provided in Appendix D.

4.0 CERTIFICATIONS

The engineer's and Owner's certifications are provided in Appendix H.

RE: V/O Cattaraugus

Order No.: U0712341

Dear Brian Spangler, Field/Project Mgr.:

Upstate Laboratories, Inc. received 1 sample(s) on 12/19/2007 for the analyses presented in the following report.

All analytical results relate to the samples as received by the laboratory.

All analytical data conforms with standard approved methodologies and quality control. Our quality control narrative will be included should any anomalies occur.

We have included the Chain of Custody Record as part of your report. You may need to reference this form for a more detailed explanation of your samples. Samples will be disposed of approximately one month from final report date.

Should you have any questions regarding these tests, please feel free to give us a call.

Thank you for your patronage.

Sincerely,

UPSTATE LABORATORIES, INC.

AJS (PFF)
Anthony J. Scala
President/CEO

Confidentiality Statement: This report is meant for the use of the intended recipient. It may contain confidential information, which is legally privileged or otherwise protected by law. If you have received this report in error, you are strictly prohibited from reviewing, using, disseminating, distributing or copying the information.

Re: Renewal of NYS DEC Permit No. 9-0472-00051/00001
MLR File No. 90698
NYS Mining Permit No. 9-03017
Town of Persia
County of Cattaraugus

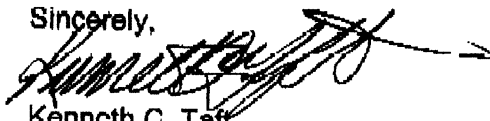

Dear Mr. Smith:

Please be advised that the above noted NYS DEC permit for the mining operation known as the DR Smith Gravel Pit, located in the Town of Persia, is hereby renewed. The new expiration date shall be July 16, 2009.

All permit conditions remain as written.

If you have any questions, please call Paul Giachetti or myself at 716-372-0645.

Sincerely,

Kenneth C. Taft
Deputy Regional Permit Administrator
Region 9 - Allegany

**DESCRIPTION OF
ENVIRONMENTAL EASEMENT AREA
FOR BUSH SITE NUMBER E905029
VILLAGE OF CATTARAUGUS**

ALL THAT TRACT OR PARCEL OF LAND, situate in the Town of New Albion, Village of Cattaraugus, and State of New York, distinguished as being part of Lot No. 23, Township 4, Range 8 of the Holland Land Company's Survey and being more particularly described as follows:

Beginning at the southeasterly corner of lands owned by the Village of Cattaraugus and described in Liber 960 at Page 1062, said point of beginning also described as being the intersection of the easterly right of way of Main Street (State Rte. 353) and the northerly right of way of a parcel of land owned by the County of Cattaraugus Industrial Development Agency as described in Liber 890 of Deeds, at Page 201;

Thence northerly, along the easterly right of way of Main Street, a distance of 264.00 feet to the southwest corner of lands appropriated by the State of New York and filed under Map 11 Parcel 12, and located in the Cattaraugus County Clerk's Office at Liber 488 of Deeds at Page 175,

Thence easterly, at a right angle to the aforementioned easterly right of way of Main Street, a distance of 6.00 feet to the southeast corner of said appropriation;

Thence northerly, along the easterly line of said appropriation, a distance of 71.00 feet to the northeast corner of said appropriation, and the northwesterly corner of said Village of Cattaraugus parcel, said corner also being on the property division line between said Village of Cattaraugus parcel on the south, and a parcel reputedly owned by the Bank of Cattaraugus, under Liber 1025 of Deeds at Page 1040, on the north;

Thence easterly, along the northerly property line of said Village of Cattaraugus parcel a distance of 148.67 feet to a point, said point also described as the southeasterly corner of said parcel of land owned by the Bank of Cattaraugus and described in Liber 1025 at Page 1040;

Thence northerly, along the westerly boundary line of said Village of Cattaraugus parcel a distance of approximately 27 feet to a point where the top slope intersects with said westerly property line;

Thence East-Southeasterly, through the lands of said Village of Cattaraugus parcel, along the said top of slope, a distance of approximately 475 feet to the westerly property line of lands owned by said County of Cattaraugus Industrial Development Agency, and the easterly property line of said Village of Cattaraugus parcel;

Thence southerly, along the aforesaid property division line, an approximate distance of 15 feet to a point;

Thence westerly, along the southerly property line of said Village of Cattaraugus parcel, and the northerly property line of said County of Cattaraugus Industrial Development Agency, a distance of 129.00 feet to a point;

Thence southerly, at a right angle to the aforementioned property line, and along said property division line, a distance of 15.49 feet to a point;

Thence westerly, along said property division line, at an interior angle of 90°-28'-16" with the aforementioned property line, a distance of 278.11 feet to an angle point thereon;

Thence southwesterly, along said property division line, a distance of 105.19 feet to an angle point thereon;

Thence continuing southwesterly, along said property division line, a distance of 132.00 feet to the point or place of beginning, said easement area to contain \pm 2.78 acres of land.

Easement description is based upon a field survey completed by URS Corporation in August 2005 (Job # 11174250), and revised in March 2008 to show the location of the Easement Area.

Alexander B. Grannis
Commissioner

SENT BY OVER-NIGHT DELIVERY

December 24, 2008

Frederick F. Weyand
Weyand & Weyand, LLP
113 West Main Street
Gowanda, New York 14070

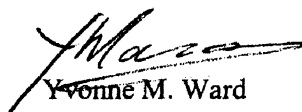

Re: State Assistance Contract No.: C302749/Site No.: E 905029
Village of Cattaraugus
1 North Main Street,
Cattaraugus County, NY

Dear Attorney Weyand:

Enclosed please find an originally-executed Environmental Easement covering the above - referenced property, which was accepted December 22, 2008, by Commissioner Grannis. Please have your client record and index this easement & survey in the office of the Cattaraugus County Clerk's Office, in the manner prescribed by New York State Real Property Law Article 9 and Environmental Conservation Law Article 71, Title 36. A TP 584.2 form is provided with this letter. Once this Environmental Easement is recorded, the local municipality will need to be notified.

Please return a copy of the recorded easement marked by the recorder with the date and location of recording, a certified copy of the municipal notice along with the final title insurance policy to my attention. Please feel free to contact me if you need further assistance with this matter.

Very truly yours,

Yvonne M. Ward

Easement Attorney

Enclosure: Environmental Easement
TP.584.2

cc: (w/o enclosures)

**Real Estate Transfer Tax Return
For Public Utility Companies'
and Governmental Agencies'
Easements and Licenses**

This form may only be used by public utility companies regulated by the Public Service Commission and governmental agencies for the recording of easements and licenses where the consideration for the grant of such easement or license is \$500.00 or less.

**ENVIRONMENTAL EASEMENT GRANTED PURSUANT TO ARTICLE 71, TITLE 36
OF THE NEW YORK STATE ENVIRONMENTAL CONSERVATION LAW**

THIS INDENTURE made this 22nd day of December, 2008, between Owner(s) Village of Cattaraugus, having an office at 14 Main Street, Cattaraugus, NY 14719 (the "Grantor"), and The People of the State of New York (the "Grantee."), acting through their Commissioner of the Department of Environmental Conservation (the "Commissioner", or "NYSDEC" or "Department" as the context requires) with its headquarters located at 625 Broadway, Albany, New York 12233,

WHEREAS, the Legislature of the State of New York has declared that it is in the public interest to encourage the remediation of abandoned and likely contaminated properties ("sites") that threaten the health and vitality of the communities they burden while at the same time ensuring the protection of public health and the environment; and

WHEREAS, the Legislature of the State of New York has declared that it is in the public interest to establish within the Department a statutory environmental remediation program that includes the use of environmental easements as an enforceable means of ensuring the performance of operation, maintenance, and/or monitoring requirements and of ensuring the potential restriction of future uses of the land, when an environmental remediation project leaves residual contamination at levels that have been determined to be safe for a specific use, but not all uses, or which includes engineered structures that must be maintained or protected against damage to perform properly and be effective, or which requires groundwater use or soil management restrictions; and

WHEREAS, the Legislature of the State of New York has declared that environmental easement shall mean an interest in real property, created under and subject to the provisions of Article 71, Title 36 of the New York State Environmental Conservation Law ("ECL") which contains a use restriction and/or a prohibition on the use of land in a manner inconsistent with engineering controls which are intended to ensure the long term effectiveness of a site remedial program or eliminate potential exposure pathways to hazardous waste or petroleum; and

WHEREAS, Grantor, is the owner of real property located at the address of 1 North Main Street in the Village of Cattaraugus, Cattaraugus County, New York known and designated on the tax map of the County Clerk of Cattaraugus as tax map parcel number, Section 35.081 Block 1 Lot 16 located in Lot 23, Township 4, Range 8 of the Holland Land Company Survey, being the same as that property conveyed to Grantor by Deed on November 15, 1996, and recorded in the Land Records of the Cattaraugus County Clerk at Liber 960, Page 1062 of Deeds, comprised of approximately 2.78 acres, and hereinafter more fully described in Schedule "A" Property Description attached hereto and made a part hereof (the "Controlled Property"); and

WHEREAS, the Commissioner does hereby acknowledge that the Department accepts this Environmental Easement in order to ensure the protection of human health and the environment and to achieve the requirements for remediation established at this Controlled Property until such time as this Environmental Easement is extinguished pursuant to ECL Article 71, Title 36; and

NOW THEREFORE, in consideration of the covenants and mutual promises contained herein

and the terms and conditions of or **State Assistance Contract Number C 302749**. Grantor grants, conveys and releases to Grantee a permanent Environmental Easement pursuant to Article 71, Title 36 of the ECL in, on, over, under, and upon the Controlled Property as more fully described herein ("Environmental Easement").

1. **Purposes.** Grantor and Grantee acknowledge that the Purposes of this Environmental Easement are: to convey to Grantee real property rights and interests that will run with the land in perpetuity in order to provide an effective and enforceable means of encouraging the reuse and redevelopment of this Controlled Property at a level that has been determined to be safe for a specific use while ensuring the performance of operation, maintenance, and/or monitoring requirements; and to ensure the potential restriction of future uses of the land that are inconsistent with the above-stated purpose.

2. **Institutional and Engineering Controls.** The following controls apply to the use of the Controlled Property, run with the land are binding on the Grantor and the Grantor's successors and assigns, and are enforceable in law or equity against any owner of the Controlled Property, any lessees, and any person using the Controlled Property:

A. The Controlled Property may be used for industrial use with the contingency remedies of commercial and restricted residential use as long as the following long-term engineering controls are employed and the land use restrictions specified below are adhered to:

The Engineering Controls are as follows:

- 1) If the contingency remedy is commercial use, a one-foot thick soil cover of clean soil underlain by an indicator such as a geotextile liner or orange plastic snow fence will be placed to demarcate the cover soil from the subsurface soil for vegetated areas. The top six inches of soil would be of sufficient quality to support vegetation. Clean soil would constitute soil that meets the Division of Environmental Remediation's criteria for backfill (DER-10) or 6 NYCRR Part 375. Non-vegetated areas (buildings, roadways, parking lots, etc.) would be covered by a paving system or concrete at least 6 inches thick.
- 2) For restricted residential use, a two-foot thick cover will be required with the same details as for commercial use.
- 3) Adherence to the Soil Management Plan as provided in the Site Management Plan Section 2.1.3 and Appendix A.
- 4) Compliance with all elements of the Site Management Plan;

The Controlled property has a series of Institutional Controls in the form of Site restrictions. Adherence to these Institutional Controls is required under the Environmental Easement. Site restrictions that apply to the Controlled Property are:

- 1) Restricting the use of groundwater as a source of potable or process water, without necessary water quality treatment as determined by NYSDOH; and

- 2) The Grantor and its successors and assigns must provide a periodic certification of institutional and engineering controls, every three (3) years, prepared and submitted by a professional engineer or such other expert acceptable to the Department, until the Department notifies the property owner in writing that this certification is no longer needed. This submittal would: (a) contain certification that the institutional controls and engineering controls put in place are still in place and are either unchanged from the previous certification or are compliant with Department-approved modifications; (b) allow the Department access to the site; and (c) state that nothing has occurred that would impair the ability of the control to protect public health or the environment, or constitute a violation or failure to comply with the site management plan unless otherwise approved by the Department.

B. Grantor shall provide all persons who acquire any interest in the Controlled-Property a true and complete copy of the Site Management Plan that the Department has approved for the Controlled-Property and all Department-Approved amendments to that Site Management Plan.

The Grantor hereby acknowledges receipt of a copy of the NYSDEC-approved Site Management Plan, dated October 2008 (SMP). The SMP describes obligations that the Grantor assumes on behalf of Grantor, its successors and assigns. The Grantor's assumption of the obligations contained in the SMP which may include sampling, monitoring, and/or operating a treatment system on the Controlled Property, and providing certified reports to the NYSDEC, is and remains a fundamental element of the Department's determination that the Controlled Property is safe for a specific use, but not all uses. Upon notice of not less than thirty (30) days the Department in exercise of its discretion and consistent with applicable law may revise the SMP. The notice shall be a final agency determination. The Grantor and all successors and assigns, assume the burden of complying with the SMP and obtaining an up-to-date version of the SMP from:

Regional Remediation Engineer: or
Region 9
NYS DEC
270 Michigan Avenue
Buffalo, NY 14203-2999

Site Control Section
Division of Environmental Remediation
NYS DEC
625 Broadway
Albany, NY 12233

C. The Controlled Property may not be used for a higher level of use such as unrestricted or residential use and the above-stated engineering controls may not be discontinued without an amendment or extinguishment of this Environmental Easement.

D. Grantor covenants and agrees that until such time as the Environmental Easement is extinguished in accordance with the requirements of Article 71, Title 36 of the ECL, the property deed and all subsequent instruments of conveyance relating to the Controlled Property shall state in at least fifteen-point bold-faced type:

**This property is subject to an environmental easement
held by the New York State Department of
Environmental Conservation pursuant of Title 36 to
Article 71 of the Environmental Conservation Law.**

E. Grantor covenants and agrees that this Environmental Easement shall be incorporated in full or by reference in any leases, licenses, or other instruments granting a right to use the Controlled Property.

F. Grantor covenants and agrees that it shall annually, or such time as NYSDEC may allow, submit to NYSDEC a written statement by an expert the NYSDEC may find acceptable certifying under penalty of perjury that the controls employed at the Controlled Property are unchanged from the previous certification or that any changes to the controls employed at the Controlled Property were approved by the NYSDEC, and that nothing has occurred that would impair the ability of such control to protect the public health and environment or constitute a violation or failure to comply with any Site Management Plan for such controls and giving access to such Controlled Property to evaluate continued maintenance of such controls.

3. Right to Enter and Inspect. Grantee, its agents, employees, or other representatives of the State may enter and inspect the Controlled Property in a reasonable manner and at reasonable times to assure compliance with the above-stated restrictions.

4. Reserved Grantor's Rights. Grantor reserves for itself, its assigns, representatives, and successors in interest with respect to the Property, all rights as fee owner of the Controlled Property, including:

1. Use of the Controlled Property for all purposes not inconsistent with, or limited by the terms of this Environmental Easement;

2. The right to give, sell, assign, or otherwise transfer the underlying fee interest to the Controlled Property by operation of law, by deed, or by indenture, subject and subordinate to this Environmental Easement;

5. Enforcement

A. This environmental easement is enforceable in law or equity in perpetuity by Grantor, Grantee, or any affected local government, as defined in ECL Section 71-3603, against the owner of the Property, any lessees, and any person using the land. Enforcement shall not be defeated because of any subsequent adverse possession, laches, estoppel, or waiver. It is not a defense in any action to enforce this environmental easement that: it is not appurtenant to an interest in real property; it is not of a character that has been recognized traditionally at common law; it imposes

a negative burden; it imposes affirmative obligations upon the owner of any interest in the burdened property; the benefit does not touch or concern real property; there is no privity of estate or of contract; or it imposes an unreasonable restraint on alienation.

B. If any person intentionally violates this environmental easement, the Grantee may revoke the Certificate of Completion provided under ECL Article 27, Title 14, or Article 56, Title 5 with respect to the Controlled Property.

C. Grantee shall notify Grantor of a breach or suspected breach of any of the terms of this Environmental Easement. Such notice shall set forth how Grantor can cure such breach or suspected breach and give Grantor a reasonable amount of time from the date of receipt of notice in which to cure. At the expiration of such period of time to cure, or any extensions granted by Grantee, the Grantee shall notify Grantor of any failure to adequately cure the breach or suspected breach. Grantor shall then have a reasonable amount of time from receipt of such notice to cure. At the expiration of said second period, Grantee may commence any proceedings and take any other appropriate action reasonably necessary to remedy any breach of this Environmental Easement in accordance with applicable law to require compliance with the terms of this Environmental Easement.

D. The failure of Grantee to enforce any of the terms contained herein shall not be deemed a waiver of any such term nor bar its enforcement rights in the event of a subsequent breach of or noncompliance with any of the terms of this Environmental easement.

6. Notice. Whenever notice to the State (other than the annual certification) or approval from the State is required, the Party providing such notice or seeking such approval shall identify the Controlled Property by referencing the following information: County, NYSDEC Site Number, NYSDEC Contract or Order Number, and the County tax map number or the Liber and Page or computerized system identification number.

Parties shall address correspondence to: Site # E905029 Contract # C302749
Environmental Easement Attorney
Office of General Counsel
NYSDEC
625 Broadway
Albany New York 12233-5500

Such correspondence shall be delivered by hand, or by registered mail or by Certified mail and return receipt requested. The Parties may provide for other means of receiving and communicating notices and responses to requests for approval.

7. Recordation. Grantor shall record this instrument, within thirty (30) days of execution of this instrument by the Commissioner or her/his authorized representative in the office of the recording officer for the county or counties where the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

8. Amendment. This environmental easement may be amended only by an amendment executed by the Commissioner of the New York State Department of Environmental Conservation and filed with the office of the recording officer for the county or counties where

Environmental Easement/Page 5 of 10

County: CATTARAUGUS Site No: E 905029 Contract/Order No: C 302749

the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

9. Extinguishment. This environmental easement may be extinguished only by a release by the Commissioner of the New York State Department of Environmental Conservation and filed with the office of the recording officer for the county or counties where the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

10. Joint Obligation. If there are two or more parties identified as Grantor herein, the obligations imposed by this instrument upon them shall be joint and several.

IN WITNESS WHEREOF, Grantor has caused this instrument to be signed in its name.

ALL THAT TRACT OR PARCEL OF LAND, situate in the Town of New Albion, Village of Cattaraugus, and State of New York, distinguished as being part of Lot No. 23, Township 4, Range 8 of the Holland Land Company's Survey and being more particularly described as follows:

Beginning at the southeasterly corner of lands owned by the Village of Cattaraugus and described in Liber 960 at Page 1062, said point of beginning also described as being the intersection of the easterly right of way of Main Street (State Rte. 353) and the northerly right of way of a parcel of land owned by the County of Cattaraugus Industrial Development Agency as described in Liber 890 of Deeds, at Page 201;

Thence northerly, along the easterly right of way of Main Street, a distance of 264.00 feet to the southwest corner of lands appropriated by the State of New York and filed under Map 11 Parcel 12, and located in the Cattaraugus County Clerk's Office at Liber 488 of Deeds at Page 175,

Thence easterly, at a right angle to the aforementioned easterly right of way of Main Street, a distance of 6.00 feet to the southeast corner of said appropriation;

Thence northerly, along the easterly line of said appropriation, a distance of 71.00 feet to the northeast corner of said appropriation, and the northwesterly corner of said Village of Cattaraugus parcel, said corner also being on the property division line between said Village of Cattaraugus parcel on the south, and a parcel reputedly owned by the Bank of Cattaraugus, under Liber 1025 of Deeds at Page 1040, on the north;

Thence easterly, along the northerly property line of said Village of Cattaraugus parcel a distance of 148.67 feet to a point, said point also described as the southeasterly corner of said parcel of land owned by the Bank of Cattaraugus and described in Liber 1025 at Page 1040;

Thence northerly, along the westerly boundary line of said Village of Cattaraugus parcel a distance of approximately 27 feet to a point where the top slope intersects with said westerly property line;

Thence East-Southeasterly, through the lands of said Village of Cattaraugus parcel, along the said top of slope, a distance of approximately 475 feet to the westerly property line of lands owned by said County of Cattaraugus Industrial Development Agency, and the easterly property line of said Village of Cattaraugus parcel;

Thence southerly, along the aforesaid property division line, an approximate distance of 15 feet to a point;

Thence westerly, along the southerly property line of said Village of Cattaraugus parcel, and the northerly property line of said County of Cattaraugus Industrial Development Agency, a distance of 129.00 feet to a point;

Thence southerly, at a right angle to the aforementioned property line, and along said property division line, a distance of 15.49 feet to a point;

Thence westerly, along said property division line, at an interior angle of 90°-28'-16" with the aforementioned property line, a distance of 278.11 feet to an angle point thereon;

Thence southwesterly, along said property division line, a distance of 105.19 feet to an angle point thereon;

Thence continuing southwesterly, along said property division line, a distance of 132.00 feet to the point or place of beginning, said easement area to contain \pm 2.78 acres of land.

Easement description is based upon a field survey completed by URS Corporation in August 2005 (Job # 11174250), and revised in March 2008 to show the location of the Easement Area.

APPENDIX H

CERTIFICATIONS

ENGINEER CERTIFICATION

FINAL ENGINEERING REPORT (FER) FEBRUARY 2009
BUSH INDUSTRIES SITE NO. E905029
VILLAGE OF CATTARAUGUS, NEW YORK

I certify that the Remedial Design was implemented and that all construction activities were completed in substantial conformance with the NYSDEC approved Remedial Design and were personally witnessed by me or a person under my direct supervision.

John B. Berry P.E.

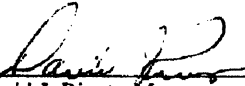

CERTIFICATIONS

FINAL ENGINEERING REPORT (FER)
BUSH INDUSTRIES SITE NO. E905029
VILLAGE OF CATTARAUGUS, NEW YORK

Pursuant to Environmental Conservation Law 27-1419 for the Brownfield Cleanup Program (BCP) and 6 NYCRR 375 for ERP State Assistance Contracts, the following certifications are provided by the Village of Cattaraugus (applicant) related to the remediation of the Bush Industries Site No. E905029:

- The data submitted to the NYSDEC demonstrates that the remediation requirements set forth in the remedial work plan and any other relevant provisions of ECL 27-1419 have been or will be achieved in accordance with the time frames, if any, established in the work plan.
- Any use restrictions, institutional controls, engineering controls and/or any operation and maintenance requirements applicable to the site are contained in an environmental easement created and recorded pursuant to ECL 71-3605 and that any affected local governments, as defined in ECL 71-3603, have been notified that such easement has been recorded.
- A Site Management Plan has been submitted by the applicant for the continual and proper operation, maintenance, and monitoring of any engineering controls employed at the site including the proper maintenance of any remaining monitoring wells, and that such plan has been approved by the NYSDEC.
- Any financial assurance mechanisms required by the NYSDEC pursuant to ECL 27-1419 have been executed.
