Dear Mr. Ryan:

**Subject: Addendum to Work Plan for Sub-Slab Vapor and Indoor Air Investigation  
Addition of Three Residences near the Former Taylor Instruments Site;  
7 Lynchford Park B, 15 Lynchford Park B, 195 Danforth Street; March 10, 2010  
Former Taylor Instruments Site, Site #V00144-8  
City of Rochester, Monroe County**

The New York State Department of Environmental Conservation (NYSDEC) and the New York State Department of Health (NYSDOH) have completed their review of the above-referenced Addendum to Work Plan for Sub-Slab Vapor and Indoor Air Investigation dated March 10, 2010 (the Work Plan Addendum) and prepared by MACTEC Engineering and Consulting, Inc (MACTEC) for the former Taylor Instruments site. Based upon the information and representations made in the Work Plan Addendum, the Work Plan Addendum is hereby approved.

Please contact me at 585-226-5357 if you have any questions and please notify me at least 10-days prior to the start of field activities.

Sincerely,

Frank Sowers, P.E.  
Environmental Engineer 2

MACTEC Project Number 3031052006/12**

Dear Mr. Sowers:

On behalf of ABB, Inc. MACTEC Engineering and Consulting, Inc. (MACTEC) has prepared this letter to serve as an addendum to MACTEC's *Work Plan for Sub-Slab Vapor and Indoor Air Investigation*, dated December 23, 2009; adding three residences to the subject investigation. The request to add these residences to the investigation was made to MACTEC by Ms. Katherine Comerford of the New York State Department of Health on March 4, 2010. The other modifications contained in your letter dated January 7, 2010 will also be applied to the investigation of these additional residences.

Field activities will be scheduled contingent on the granting of access by the property owners and residential tenants but are targeted to take place on or about March 29, 30, 31. Efforts are underway for ABB to secure permission for access. I will provide further confirmation of the schedule once the access agreements are obtained, or if DOH's offer of assistance in obtaining access will be necessary.

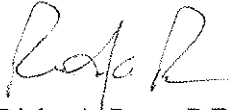

Following completion of the field activities and validation of final analytical results, MACTEC will prepare a comprehensive report of the results and associated recommendations for the five residences sampled in early February, as well as for the additional residences to be sampled in the near future.

Mr. Frank Sowers, P.E.
