Dear Mr. Sowers:

This letter is the eighteenth progress report as required by the Voluntary Cleanup Agreement (VCA) between Coopervision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ Negotiations continue with NYSDEC to finalize clean up criteria and remaining details of the Revised Remediation Work Plan, which was submitted to NYSDEC in July 2000.
- ☐ Revisions to the Site Investigation Report, requested by NYSDEC in a letter dated 19 September 2000 were continued.

Results of Sampling to Date: No new sampling was completed or required during October.

Reports and Deliverables: No reports or other materials were submitted or were required to be submitted during the last month.

Upcoming Schedule: Upcoming activities for the next month include finalizing the Revised Remediation Work Plan, completing and submitting the revised Investigation Report, and initiating the public comment period. Haley & Aldrich will provided support to NYSDEC as may be needed to initiate the public comment period on the plan upon approval.

Please do not hesitate to call if you have any questions or comments.

REGION 8

Dear Mr. Sowers:

This letter is the fifteenth progress report as required by the Voluntary Cleanup Agreement (VCA) between Coopervision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ A REVISED Remediation Work Plan was submitted to NYSDEC in July for review. A second set of comments was received from NYSDEC. The Work Plan is currently being revised for re-submittal.

Results of Sampling to Date: No new sampling was completed during the last month.

Reports and Deliverables: No reports or other materials were submitted or were required to be submitted during the last month, with the exception of the revised Remediation Work Plan.

Upcoming Schedule: Upcoming activities for August include finalizing the Revised Remediation Work Plan as soon as possible. Support will also be provided to NYSDEC as may be needed to initiate the public comment period on the plan upon approval. Implementation of the remediation work is expected to require approximately two weeks of fieldwork, which must be completed to allow parking lot resurfacing by Coopervision in September.

Please do not hesitate to call if you have any questions or comments.

DER/HAZ. WASTE REMED
REGION 8

Dear Mr. Sowers:

This letter is the eighth progress report as required by the Voluntary Cleanup Agreement (VCA) between American Siepmann Corporation and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place in the past month:

- ☐ A electromagnetic (EM) survey was completed by Geomatrix of Buffalo, New York within the City of Rochester Easement, located on the western side of the property, to locate the City of Rochester water lines.
- ☐ A Work Plan Addendum for the additional work anticipated on the east and southwest sides of the property was submitted to NYSDEC on 23 June 2000.

Results of Sampling to Date: Geomatrix completed an EM survey within the City of Rochester Easement on 16 June 2000. The survey was completed to locate the City of Rochester water lines so that additional subsurface work can be completed within the vicinity of the water lines. Results of the survey have already been provided to NYSDEC in the 23 June Work Plan Addendum submittal. These results were also provided to the Rochester Water Authority.

Upon NYSDEC approval of the Work Plan Addendum, Haley & Aldrich will forward a copy of the Work Plan to the City of Rochester Water Authority. At that time, we understand the water authority will approve drilling activities within the Easement.

Reports and Deliverables: A copy of the EM survey image was forwarded to NYSDEC along with the Work Plan Addendum.

Dear Mr. Sowers:

This letter is the fourteenth progress report as required by the Voluntary Cleanup Agreement (VCA) between Coopervision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ A Remediation Work Plan was submitted to NYSDEC in June for review.

Results of Sampling to Date: No new sampling was completed during the last month.

Reports and Deliverables: No reports or other materials were submitted or were required to be submitted during the last month, with the exception of the draft Remediation Work Plan.

Upcoming Schedule: Upcoming activities for July include addressing any comments that NYSDEC may have to the Remediation Work Plan, and working toward approval by or during the week of 24 July. Support will also be provided to NYSDEC as may be needed to initiate the public comment period on the plan upon approval. Implementation of the remediation work is expected to require approximately two weeks of fieldwork, which must be completed to allow parking lot resurfacing by Coopervision before the end of September.

Please do not hesitate to call if you have any questions or comments.

JUN 12 2000

DER/HAZ. WASTE REMED
REGION 8

Dear Mr. Sowers:

This letter is the thirteenth progress report as required by the Voluntary Cleanup Agreement (VCA) between Coopervision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ A draft Remediation Work Plan is being completed and is expected to be submitted to NYSDEC during the week of 12 June 2000.
- ☐ Groundwater results from the April 2000 sampling event were received and reviewed by Haley & Aldrich.

Results of Sampling to Date: The groundwater results from the April 2000 sampling event (see data in Attached Table) indicated that CVOC concentrations in all of the sampled wells (OWD-302D, OWS-302S, OWS-302D, OWD-302S and MW-401) decreased with the exception of OWS-302S where the concentration increased, and OWD-302S which was not previously sampled due to insufficient water volumes.

In addition to laboratory VOC analyses, Haley & Aldrich collected groundwater parameters needed for HRC injection design for several of the site wells (all those sampled for VOCs as well as the OW303 cluster, MW-205, MW-202, MW-201, OW-304 and MW-403). A table of the measured parameters is attached.

Reports and Deliverables: No reports or other materials were submitted or were required to be submitted during the last month.

Upcoming Schedule: Upcoming activities for June include submitting the draft Remediation Work Plan to NYSDEC. *Please note that Coopervision needs to carry out parking lot re-paving in September 2000 thus the remedial construction (HRC injection) needs to be completed by the end of August 2000 to maintain facility operations.*

Please do not hesitate to call if you have any questions or comments.

Sincerely yours,

TABLE 6
GROUNDWATER ANALYTICAL RESULTS

~400ppb Total Chlorinated

~400ppb Total Chlorinated

NOTES:

1. Results expressed in milligrams per liter (ppm).
2. "E" - indicates compounds whose concentrations exceed the calibration range.
3. "*" - indicates that Guidance values were used when a Standard Value was not listed.
4. Groundwater samples collected by Haley and Aldrich on date shown, unless indicated sampled by NYSDEC.
5. Groundwater samples analyzed at Columbia Analytical Services, Rochester, New York
6. "*" - indicates dilution was performed on this sample due to sample exceedence of calibration range.
7. A sample for well #3020W-D-S was not submitted due to lack of sufficient water.
8. "NA" - indicates sample was not analyzed for that compound.
9. "*" - indicates samples that were collected by NYS Department of Environmental Conservation and analyzed by Columbia Analytical Services, Rochester, New York.
10. "J" - indicates an estimated value. The flag is used either when estimating a concentration for tentatively identified compounds where a 1:1 response is assumed, or when the mass spectral data indicate the presence of a compound that meets the identification criteria but the result is less than the sample quantitation limit but greater than zero.
11. "D" - indicates all compounds identified in an analysis at a secondary dilution factor.
12. "B" - indicates compound was found in the associated blank as well as in the sample.
13. "NS" - indicates no Standard Value was listed for compound in the Division of Water Technical and Operational Guidance Series.
14. "NR" - indicates dilution not reported.
15. Results in bold and italics indicate result greater than T.O.G.S. Standard Values.
16. "-" indicates sample was undiluted to determine if Vinyl Chloride was present. No Vinyl Chloride was detected.

Attention: Frank Sowers

Subject: CooperVision, Inc. - 12th Monthly Status Report
711 North Road
Scottsville, New York

Dear Mr. Sowers:

This letter is the twelfth progress report as required by the Voluntary Cleanup Agreement (VCA) between CooperVision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ A meeting was held on 13 April 2000 with NYSDEC and other related agencies to discuss comments from the agencies on the VCA Investigation report submitted in February 2000.
- ☐ In response to a comment made by NYSDEC on the VCA Investigation report regarding whether or not the base of the plume had been intercepted with MW-401, groundwater at several of the site wells (the OW302 cluster and MW-401) was re-sampled and submitted for laboratory analyses. The samples were submitted for VOC analyses with the exception of MW-205, which was submitted for metals analyses.
- ☐ In addition to groundwater sampling, several groundwater parameters were collected at the wells that were sampled as well as several other wells around the site. The parameters included Eh, pH, conductivity, DO, and temperature. These parameters were collected in conjunction with pre-remediation design.
- ☐ Revisions were made to the VCA Investigation Report and a Revised report was submitted on 5 May 2000.
- ☐ The remediation design work plan is currently in progress. A work plan is expected to be submitted to NYSDEC by 17 May 2000.

REGIONS

Dear Mr. Sowers:

This letter is the eleventh progress report as required by the Voluntary Cleanup Agreement (VCA) between CooperVision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ Response has been provided to phone conversations and requests of NYSDEC regarding the CooperVision Site Investigation Report which was submitted in February 2000. Requests were related to data that NYSDEC would like included in a revised version of the report. The requested data was provided to NYSDEC (see Reports and Deliverables below).

Results of Sampling to Date: No new sampling was required within the last month.

Reports and Deliverables: As a result of phone conversations with NYSDEC, two data tables were delivered to NYSDEC within the last month; an updated VOC in groundwater concentration table that included certain NYSDEC split results from the October 1999 sampling event and a table summarizing metals in groundwater that had been discussed but not tabulated in the Site Investigation Report submitted in February 2000.

Upcoming Schedule: Upcoming activities for April include a meeting with NYSDEC on 13 April 2000 to review anticipated remediation plans.

Please do not hesitate to call if you have any questions or comments.

REGION 8

Dear Mr. Sowers:

This letter is the ninth progress report as required by the Voluntary Cleanup Agreement (VCA) between Coopervision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ The Site Investigation Report was submitted to NYSDEC, CooperVision, its counsel, and the other parties named in the signed VCA.

Results of Sampling to Date: No new sampling was required within the last month.

Reports and Deliverables: The last monthly report was submitted during February. The Site Investigation Report was also submitted in February. No other correspondences were made or required during the month of February 2000.

Upcoming Schedule: Upcoming activities for March include NYSDEC review of the Site Investigation report and scheduling a meeting with NYSDEC to review anticipated remediation plans. NYSDEC indicated to Haley & Aldrich that the proposed meeting will likely not take place until the first or second week of April due to NYSDEC end-of-fiscal year workload in their office.

Please do not hesitate to call if you have any questions or comments.

DERHAZ WASTE REMED
REGION 8

Dear Mr. Sowers:

This letter is the ninth progress report as required by the Voluntary Cleanup Agreement (VCA) between CooperVision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ The draft Site Investigation Report was submitted to CooperVision and its counsel for review.
- ☐ Data validation has been completed and the Data Usability Summary Report (DUSR) is completed. The DUSR was included in the draft Site Investigation Report.

Results of Sampling to Date: No new sampling was completed within the last month.

Haley & Aldrich received the treatability study status information for the microcosm study from Applied Power Concepts (APC- the facility completing the study). Overall, results to date indicate that the CooperVision site is suitable for a field application of HRC. The results of the study have included initial treatment for TCE (up to 25 ppm) and TCA (up to 250 ppm). Results will be summarized in the Site Investigation Report anticipated to be submitted to the agency next week.

Reports and Deliverables: The last monthly report was submitted during January. No other correspondences were made during the month of January 1999.

Upcoming Schedule: Scheduled activities for February include submitting the Site Investigation report.

RECEIVED

JAN 11 2000

Dear Mr. Sowers:

DER/HAZ. WASTE REMED
REGION 8

This letter is the eighth progress report as required by the Voluntary Cleanup Agreement (VCA) between Coopervision, Inc. and the New York State DEC. The project status update is intended to meet the requirements of Section II of the VCA.

Activities Performed During Past Month: The following actions have taken place since the previous progress report was submitted.

- ☐ The newly installed groundwater monitoring wells, as well as the three Labella monitoring wells were surveyed.
- ☐ New groundwater contours using the newly installed wells were completed for the Site.
- ☐ Data validation has been started and the Data Usability Summary Report (DUSR) is being completed.
- ☐ Completion of the investigation report has continued.

Results of Sampling to Date: No new sampling was completed within the last month. As of the date of distribution of the monthly report, there is no new sampling data that requires distribution. Water level monitoring data has been reduced to graphic form now that the new well elevations are known, and groundwater contour plans are attached for two seasonal periods. Note that flow direction remains the same as reported in the past.

Reports and Deliverables: The last monthly report was submitted during December. No other correspondences were made during the month of December 1999.
