PHASE I ENVIRONMENTAL ASSESSMENT  
WAUKESHA CHERRY-BURRELL PROCESS EQUIPMENT  
LITTLE FALLS, NEW YORK  
DELTA PROJECT NO. S097-016-1.0011

1.0 INTRODUCTION

1.1 Purpose

Delta has been retained by United Dominion Industries (UDI) to conduct a Phase I Environmental Assessment (Phase I) at the Waukesha Cherry-Burrell (Cherry-Burrell) facility located in Little Falls, NY. This assessment was performed in conformance with the scope and limitations of ASTM Standard E1527-97. The purpose of the Phase I is to document current site conditions and determine areas of environmental concern for the site and/or surrounding properties.

1.2 Methodology

The following activities were conducted as part of the Phase I:

a) Site reconnaissance

- interview(s) were conducted with personnel familiar with past and present operations and environmental history of the site;
- visual observations were made at the site for evidence of activities indicating use, treatment, storage, or disposal of hazardous substances or wastes;
- visual review was made of adjacent properties for potential environmental impact on the subject property; and,
- photo-documentation of current site activities and conditions was obtained.

b) Site data review

- aerial photographs were reviewed;
- interviews were conducted with persons knowledgeable of historic site activities;
- a topographic map was reviewed;
- documents provided by Cherry-Burrell were reviewed; and,
- applicable databases provided by EDR, Inc., a private firm that conducts federal and state database searches, were reviewed.

## 2.0 SITE DESCRIPTION

The facility is located at 575 E. Mill Street, as shown in Figures 1 and 2. Cherry-Burrell manufactures metal tanks for use in pharmaceutical and food processing industries.

The facility consists of:

- five buildings which were constructed in various phases from 1915 to 1990 and encompass approximately - 135,000 square feet;
- two 20,000-gallon above-ground storage tanks (ASTs) that contain fuel oil; and
- staff parking areas.

Cherry-Burrell is bordered to the north and east by commercial/light industrial facilities. CSX railroad borders the boiler room to the north. The Mohawk River borders the site to the south and retail/commercial dwellings border the site to the west.

Based on our review of the Little Falls USGS topographic map (Figure 1), surface elevation at the site ranges from approximately 360 to 340 feet above mean sea level with a downward slope towards the south.

The site is currently serviced by municipal drinking water and municipal sanitary sewer and reportedly has been serviced by these utilities since the facility was purchased by Cherry-Burrell in the 1940's.

### 2.1 Site Reconnaissance

Delta representative, Stephen A. Zbur, visited the site on October 23, 1997 to document current site conditions. Mr. Zbur was escorted through the facility by Mr. Greg Santry of Cherry-Burrell. Photographs were taken during the reconnaissance and are presented as Appendix A.

Structures at the facility consist of:

- One 4-story office/small tank process building (the entire fourth floor and 1/3 of the third floor are rented to an outside tenant and used for storing cosmetic material).
- One 7-story vacant building (has been vacant since the late 1970's, prior to this time, finished goods were assembled in this building).
- Old tank shop.

- New tank shop.
- Boiler building.

The location of each building is shown in Figure 2.

Asphalt paved parking areas are present to the east of the four-story office/small tank process building west, of the new tank shop and east of the boiler building.

A discussion of the activities performed in each building is presented below:

#### Office/Small Tank Process Building

This building consists of four floors and was reportedly constructed in 1911. An overview of the activities performed on each floor is discussed below:

- First Floor: The first floor includes receiving, material storage, plasma cutter, hazardous waste storage area, paint storage room, machine shop and one stainless steel AST (for the small tank cleaning area located on the second floor).

A stainless steel plasma cutting area is located in the northcentral portion of the first floor, as illustrated in Figure 2. The plasma cutter is powered by a nitrogen/oxygen gas. Liquid in the plasma cutting apparatus is reused numerous times prior to being containerized and transported off site for disposal as a non-hazardous media.

One 750-gallon stainless steel AST is located in the northeast portion of the first floor. This AST collects wastewater from the small tank cleaning area. Wastewater is pumped directly from the AST to the wastewater treatment system (located in the old tank shop) via above-ground PVC lines. A steel containment berm is present around the perimeter of the AST. This berm, which is bolted to the floor, extends approximately two feet above ground surface and is constructed of scrap steel.

Paints and other products (mineral spirits, lacquer, etc.) are stored in a small concrete room (identified as the paint storage/fire room in Figure 2) in the southeast corner of the first floor. Concrete staining was not observed in this room. A hazardous waste storage area is also located in the southeast portion of this building and consist of a former process tank in which 55-gallon drums are stored. Drums were not observed in the storage area at the time of our reconnaissance.

A machine shop is located in the southern portion of the first floor. Machining activities include press breaks and dimple heads used for the bending and pounding of raw steel products.

- Second Floor: The second floor consists of the Cherry-Burrell office and small tank area. The small tank parts assembly and manufacturing process is located in the south and east portion of the second floor. The process consists of metal bending, grinding, welding and tank assembly. A tank cleaning area is located in the east portion of the small tank process area. Phosphoric acid is mixed with water and soap and used to clean the interior and exterior of the finished tanks. At the time of the site reconnaissance, two 55-gallon drums of phosphoric acid were observed in the cleaning area. The floor in the cleaning area consists of concrete; no spalling or cracks were observed in the floor. Wastewater from the tank cleaning process is directed to a floor drain and is discharged to a 750-gallon stainless steel AST located on the first floor of this building. Wastewater collected in this tank is discharged to the wastewater treatment plant via aboveground PVC piping.
- Third and Fourth Floor: Approximately 1/3 of the third floor and the entire fourth floor are rented to an outside tenant and used for storing cosmetic material (these areas were inaccessible during our site reconnaissance).

A second machine shop is located in the southern portion of the third floor. Cutting oil/coolant and mineral spirits are used as part of the machining process. The coolant and cutting oils associated with each machine are contained in above-ground containment troughs located immediately below the machines. Used coolant and oil is removed from the trough and transferred to a 55-gallon drum and transported off-site for recycling. Noticeable coolant or oil staining was not observed on the concrete floor in this area. Mineral spirits are applied, as needed, to the machines for cleaning and are removed from the machines using cleaning rags.

A raw product/used oil and coolant storage area is also present on the third floor. At the time of our site reconnaissance, approximately fifteen 55-gallon drums, three 30-gallon drums and thirty 5-gallon pails were present in the storage area. No visible evidence of stained concrete was observed in the storage area. Metal containment is present around approximately half of the storage area.

One PCB containing transformer is located adjacent to the raw product storage area. Stained oil was not observed at or around the perimeter of the transformer. There are no known historical releases of oil from the transformer.

#### Seven-Story Vacant Building

This building was constructed in 1921 and has been vacant since the late 1970's. Prior to this time, finished goods were assembled by Cherry-Burrell in this building.

#### Old Tank Shop

The old tank shop building was constructed in 1957 and consists of a one-story metal fabricated structure. Tanks ranging from 1,000-30,000 gallons in capacity are constructed in the old tank shop. The manufacturing activities include: shearing, welding, lining, head spinning and polishing. Mineral spirits are used to clean the tank heads and lubricating oils are used as part of the head spinning process. Oil stains were not observed within the manufacturing area.

An electropolishing process area is located in the northwest portion of the old tank shop building. The process includes spraying or immersing stainless products in a heated phosphoric acid bath. The phosphoric acid is stored in a 750-gallon AST. Upon completion of the electropolishing process, the used bath material is directed towards two floor drains which discharge directly to a collection pit located underneath the concrete floor. The electropolishing process was initiated in the mid-1980's and is utilized on an average of 1-2 times per week. The collection pit, located underneath the electropolishing area, is constructed of concrete and was lined with fiberglass in the early 1990's. Wastewater that accumulates in this collection pit is pumped through above-ground PVC piping to the wastewater treatment system located in the northeast portion of the old tank shop. A steel containment berm is present around the perimeter of the electropolishing area. This berm, which is bolted to the floor, extends approximately two feet above ground surface and is constructed of scrap steel. Minor amounts of concrete spalling were observed within the electropolishing area.

A process wastewater treatment system was installed in 1994 and is located in the northeast portion of the old tank shop. The wastewater treatment system was installed in 1994. Prior to installation and operation of this system, all process wastewater and sludges were disposed of off-site as hazardous waste. This treatment system collects wastewater from the tank cleaning areas associated with the small tank process, new tank shop and electropolishing processes. The wastewater treatment process includes chemical treatment (pH neutralization with sodium hydroxide) and precipitation methods to remove metals and solids. The wastewater treatment system consists of a 7,500-gallon, double walled, steel AST; one 1,000-gallon reactor; one sludge collection tank and associated filters and monitoring devices. Wastewater is discharged to the City of Little Falls sanitary sewer system. The facility has a process wastewater discharge permit from the city.

Solids generated from the wastewater treatment process are containerized in 55-gallon drums and disposed of as a non-hazardous waste by an outside vendor. A steel containment berm is present around the perimeter of the treatment system. This berm, which is bolted to the floor, extends approximately two feet above ground surface and is constructed of scrap steel. Evidence of concrete spalling or cracks was not observed beneath the wastewater treatment area.

#### New Tank Shop

The new tank shop building was constructed in 1990 and consists of a one-story, metal fabricated structure. Tanks ranging in size from 30,000 to 60,000 gallons are constructed in the new tank shop area. The manufacturing processes in this tank shop are similar to those performed in the old tank shop area. A tank wash area is located in the northeast portion of the new tank shop building. Tank wash activities are similar to those described and observed in the small tank process area. One 750-gallon stainless steel AST is located in the new tank shop. This AST collects wastewater from the tank cleaning process. Wastewater collected in this tank is discharged to the wastewater treatment plant via aboveground PVC piping.

A paint booth is located in the west portion of the new tank shop. The paint booth is used for tanks that are constructed of carbon steel. Oil based paints are used in the painting process and the associated used paint thinner and filters are disposed of as a hazardous waste. Used paint was not observed on the floor of the paint booth.

#### Boiler Building

The boiler building is located immediately north of East Mill Street, as illustrated in Figure 2. This one-story structure was constructed in approximately 1948 and consists of block and brick. One fuel operated boiler and two ASTs containing water softening chemicals are present within the boiler building. Numerous trenches and floor drains are present within the boiler building. Water that accumulates in these trenches discharges directly to the sanitary sewer.

Fuel oil is contained in two 20,000-gallon ASTs. These ASTs were installed in 1965. The area directly beneath the ASTs is comprised of concrete and secondary containment is present around the perimeter of the tanks. Fuel oil is discharged from the ASTs via above-ground piping to the boiler building. Noticeable stains were not observed around the fuel pipe or beneath the ASTs or associated piping.

#### 2.2 Asbestos Containing Materials

An asbestos survey was performed by Lozier Environmental in 1994 and removal of friable asbestos material (within the boiler building and other various parts of the facility) was performed by Lozier in 1995. A draft

asbestos management plan has also been prepared by Lozier. This plan details procedures for managing asbestos in place at the facility.

### 2.3 Hazardous Waste Generation

The facility is currently a small quantity generator of hazardous waste. Waste streams include paint filters and used paint thinner generated as part of the painting process.

### 2.4 Surrounding Land Use Survey

The site is bordered to the north by commercial/light industrial facilities including: Sunbelt Industries (retail distributor of abrasives), Vincent Manufacturing (distributor of mattresses and beds) and Castle Trucking (storage company of boxes and cardboard for the cosmetic industry). CSX railroad borders the boiler room to the north. The facility is bordered by Burrows Paper Company (pulp and paper mill) to the east, the Mohawk River to the south and retail/commercial dwellings to the west.

## 3.0 RECORDS REVIEW

### 3.1 Aerial Photographs

Aerial photographs were reviewed for the years 1960, 1970, 1978, 1981 and 1990. Copies of these photographs are presented as Appendix B, with the exception of the 1978 aerial photograph which is presented as Figure 3. The 1978 photograph was obtained from the Herkimer County Tax Assessor's office. All other aerial photographs were obtained from the United States Department of Agriculture office located in Herkimer, New York.

The site conditions in each aerial photograph are similar to those present during site reconnaissance with the exception of the new tank shop building (which was constructed by Cherry-Burrell in 1990). Structures in each photograph appear consistent with those identified during the site reconnaissance.

### 3.2 Database Search

Delta retained EDR to conduct environmental database searches on the Federal and State levels. The search was conducted to identify facilities of potential environmental concern located within one mile of the subject area. The listed properties and a summary of the databases in which they were reported are outlined in the following sections. A complete list of searched databases is referenced in Appendix C.

### 3.2.1 Federal Databases

The following Federal databases were search for facilities of potential environmental concern within a one mile radius of the site:

**CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System.

Contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

**ERNS:** Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

**NPL:** National Priority List

**DELISTED NPL:** NPL Deletions.

**RCRIS:** Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**CORRACTS:** Corrective Action Report. Identifies hazardous waste handlers with RCRA corrective action activity.

**BRS:** Biennial Reporting System. A national system administered by the EPA that collects data on the generation and management of hazardous waste.

**CONSENT:** Superfund (CERCLA) Consent Decrees. Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites.

**FINDS:** Facility Index System. Contains both facility information and "pointers" to other sources that contain more detail.

**HMIRS:** Hazardous Materials Information Reporting System. HMIRS contains hazardous material spill incidents reported to DOT.

**MLTS:** Material Licensing Tracking System. Maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements.

**NPL LIENS:** Federal Superfund Liens

**PADS:** PCB Activity Database System. Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

**RAATS:** RCRA Administrative Action Tracking System. Contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA.

**ROD:** Records Of Decision. Documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

**TRIS:** Toxic Chemical Release Inventory System. Identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

**TSCA:** Toxic Substances Control Act. Identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list.

### 3.2.2 State Databases

The following State databases were search for facilities of potential environmental within a one mile radius of the site:

**LUST:** List of Confirmed Releases of leaking Underground Storage Tanks.

**SHWS:** Hazardous Sites Cleanup Act Site Lists & Site Descriptions. State hazardous waste site records are the states' equivalent to CERCLIS.

**SWF/LF:** Solid Waste Facility Inventory/Transfer Stations. Contain an inventory of solid waste disposal facilities or landfills in a particular state.

**UST:** Listing of New York Regulated Underground Storage Tanks

**AST:** Listing of New York Regulated Above-ground Storage Tanks

**NY SPILLS:** Data collected on spills reported to NYSDEC. Includes spills active as of April 1, 1986, as well as spills occurring since this date.

**AFS (Airs Facility System):** Facilities which are monitored or permitted for air emission under the Clean Air Act.

### 3.2.3 Database Findings

Cherry-Burrell was identified on four databases and the following information was reported:

- **FINDS** - Reports the subject site is monitored or permitted for air emissions under the Clean Air Act.
- **RCRIS** - Lists the subject property as a small and large quantity generator of characteristic and listed hazardous waste. No violations have been reported. A complete description of each waste classification can be found in Appendix C.

- AST - Reports the subject property has two 20,000-gallon capacity ASTs in-service. These ASTs contain fuel oil. One 660-gallon fuel oil AST was reportedly removed and closed in February 1993.

The database search revealed the following facilities within a 1/4 mile radius of the site:

Little Falls City School Dist. (located at 770 East Main Street): Listed as a small quantity generator of hazardous waste on the RCRIS database. No violations are reported. Also listed on the UST database and reported to have two active and two closed USTs - one 3,000-gallon UST containing fuel oil (closed before April 1, 1991), one active 2,000-gallon UST containing diesel, one 2,000-gallon UST containing fuel oil (closed August 1991) and one active 500-gallon UST containing unleaded gasoline

Little Falls T.S. (located at 525 East Mill Street): Listed as on the SWF/LF database and reported to be a municipal solid waste facility or landfill site containing residential waste. A permit to operate the facility expired in 1988 and the facility is not included on the SHWS.

The database search revealed the following facilities within a 1/2 mile radius of the site:

Little Falls Eve. Times: Listed on the LUST database. A spill from a 550-gallon fuel oil UST was reported on December 18, 1996 due to tank failure. Cleanup was ceased on January 6, 1997.

Stewart's Ice Cream Co.: Listed on the LUST database. A spill from five 2,000-gallon USTs was reported on December 15, 1992 due to tank failure. Cleanup was ceased on September 26, 1994.

The Herkimer Co. Jail: Listed on the LUST database. A spill was reported on November 18, 1988 due to a tank test failure.

Bonfare #110: List on the LUST database. A spill was reported on March 12, 1993 due to tank test failure. Cleanup was ceased on March 27, 1993.

Lynch Residence: Listed on the LUST database. A spill was reported on March 8, 1994 due to a tank overfill.

Stewart's Store #171: Listed on the LUST database. A spill was reported on March 6, 1991 due to a tank test failure. Cleanup was ceased on March 20, 1991.

Mill Street Lumber: Listed on the LUST database. A spill was reported on May 2, 1992 due to a gas leak from a pickup truck. Cleanup was ceased on February 23, 1995.

### 3.2.4 Unplottable Sites

Twenty-three additional sites are located on Federal and State databases and listed in the EDR Orphan Summary. These sites were unplottable on the radius map due to incomplete address information. Through the use of internet directories, telephone books and maps, Delta attempted to find the specific location for each site.

Two sites were determined to be within one mile of the target property. Information regarding these sites is as follows:

Redco Foods Distribution Ctr.: Listed on the UST database.

Farber's Collision Service: Listed on the UST database.

Nine sites were determined to be potentially located with one mile of the site. Information regarding these sites is as follows:

Salisbury SLE: Listed on the SWF/LF database.

ADE Sanitation T.S.: Listed on the SWF/LF database.

Ohio T.S.: Listed on the SWF/LF database.

Waste Management T.S.: Listed on the SWF/LF database.

Little Falls SLE: Listed on the SWF/LF database.

Conrail Little Falls Yard: Listed as a small quantity generator of hazardous waste on the RCRIS database.

NYSDOT Bridge Bin 4038920: Listed as a large quantity generator of hazardous waste on the RCRIS database.

NYS Canal Corp./ Lock 18: Listed on the UST database.

All other sites listed on the orphan summary were determined to be outside the applicable search radii (greater than one mile from the subject property).

### 3.2.5 Specific Site Searches

Based on the findings of the surrounding land use survey and site visit discussed in Section 2.4, a specific site database search was requested for Burrows Paper Corporation located at 730 East Mill Street (approximately 180 feet west of the subject site) and Sunbelt Industries located at 540 West Mill Street (adjacent to the site). The EDR Site Report revealed the following information:

#### Burrows Paper Corp.

The site was identified on four databases and the following information was reported:

- RCRIS - large quantity generator of characteristic and listed hazardous waste.
- FINDS - hazardous waste generator, transporter, treatment, storage or disposal facility and also as a facility with active water discharge permits.
- AST - reported to have four ASTs - two in-service 275-gallon ASTs containing used oil and two closed or removed 6,770-gallon ASTs containing fuel oil.
- LOCAL (NY SPILLS) - Two reported spills. The first spill was reported on August 22, 1990 due to human error. Four drums of unknown material fell from a truck skid and the contents were spilled into the storm sewer. Cleanup ceased August 22, 1990. The second spill was reported on February 1, 1991 due to equipment failure of a portion of the wastewater treatment plant. Cleanup ceased on February 1, 1991.
- AFS - Facility is monitored or permitted for air emissions under the Clean Air Act.

#### Sunbelt Industries

No additional information was available from EDR regarding this site.

### 3.3 Well Information

According to the EDR report, the Federal database lists three water wells located within two miles of the subject property. Two of these wells are used for domestic water supply and one is used for livestock water supply. The State database lists one water well within two miles of the subject property. This well is used for domestic water supply to the Sunset View Mobile Home Park. A public water supply was identified within 1/2 mile west of the subject property. This water supply is operated by the City of Little Falls and is located at Moreland Park.

### 3.4 Radon Findings

Twenty-nine sites are reported to have been tested for radon within the ASTM search radius. Living area readings indicated 83% of these sites showed activity of <4 picocuries per liter (pCi/l) and 15% showed activity of 4-20 pCi/l. Basement readings revealed 52% of the sites showed activity <4 pCi/l, 38% showed activity between 4-20 pCi/l and 10% showed activity above 20 pCi/l. The action level by which EPA generally recommends further investigation or testing is >4.0 pCi/l.

### 3.5 Flood Plain Information

A Flood Insurance Rate Map (FIRM) effective April 4, 1983 for Little Falls, NY was reviewed. The FIRM designates the subject property as Zone A7. This designation indicates the site is within the limits of the 100-year flood zone. The FIRM is included as Appendix D.

### 3.6 Wetlands Information

A New York State Freshwater Wetlands Map of Herkimer County (Map #36 of 46) was obtained for the subject area. Review of this map shows the subject property is not designated as a wetland. The nearest wetland area is located approximately 1.5 miles southeast of the site. The wetland map is included as Appendix E.

### 3.7 City Directory Review

Review of City Directories for the years 1947, 1960, 1968, 1977, 1985, 1992 and 1995 indicate that Cherry-Burrell has operated at 561 through 571 East Mill Street since 1947. Various other businesses have occupied the proximate parcels including Sunbelt Industries, Vincent Manufacturing Companies and Jim Bonnell Trucking (Castle Industries) located at 540, 560 and 576 East Mill Street, respectively. These businesses are listed at their present locations in the 1985 and subsequent directories. A copy of the City Directories reviewed is included as Appendix F.

### 3.8 Sanborn Fire Insurance Map Review

Sanborn fire insurance maps were obtained for the City of Little Falls for the years 1884, 1891, 1897, 1900, 1906, 1911, 1918, 1928, 1948 and 1959. Copies of Sanborn maps reviewed are included as Appendix G. Review of the Sanborn maps indicate that Cherry-Burrell has operated at its current location since 1948. A brief review of each map is as follows:

1884: The site is occupied by a tannery facility and a meat packing house. Numerous one to three residential and commercial buildings are present on the site. These structures include an ice house, refrigerator building, cattle sheds, smoke house, slaughter house, tanning pits, leach pits and various storage facilities. Three kettles are present on the site of the packing house. Proximate properties include residential dwellings, lumber, hide and bark storage to the north and a knitting mill to the west. The Mohawk River is located immediately south of the site and an unnamed tributary runs along the northern portion of the property.

1891: Structures on the site are similar to those shown on the 1884 map. Additional leach pits, a beam house and a bark mill are now present at the tannery facility. The lumber yard to the north identified in the 1884 map is no longer present.

1897: Structures on the site are similar to those shown on the 1891 map. The cattle shed at the central portion of the site has been replaced by a two-story machine shop and boiler room. A coal yard is present north of the site, across East Mill St.

1900: Structures on the site are similar to those shown in 1897. The machine shop and boiler house are now vacant. A four-story box shop is present near the southwest portion of the site.

1906: Structures on the subject site and proximate sites are similar to those shown in 1900. The vacant building (former machine shop) has been replaced by a warehouse. A 15,000-gallon capacity sprinkler tank and plunger pump are indicated on the southeast side of the property, adjacent to the Mohawk River.

1911: The tannery buildings have been expanded. The sprinkler tank has been replaced with a 24,000-gallon capacity water tank. A three-story concrete building has been constructed across East Mill street and a bridge is shown connecting the original tannery building to this new structure. The unnamed tributary is no longer shown at the site.

1918: Residential dwellings on the northwest portion of the site have been replaced by a two-story office building, shipping warehouse and auto facility. Additional buildings are present at the tannery site including a seven-story concrete facility.

1928: Many of the tannery buildings have been replaced by a four-story concrete building which extends to the former warehouse located at the central portion of the site. Residential dwellings are no longer present on the site.

1948: The site is listed as being operated by Cherry-Burrell Corp. All structures present at the former packing company have been replaced by a parking lot. A boiler house is located north of the site (across East Mill St.) adjacent to the coal yard. A coal hopper is present behind (north) of the boiler house. The machine shop to the north of the seven-story tannery facility is no longer present.

1959. A three-story concrete building has been constructed at the location of the former parking lot. The coal yard is no longer present north of the site.

### 3.9 Chain of Title Review

A 50-year chain of title is not a requirement of ASTM E1527-97; therefore, a title was not procured for this assessment. Review of the 1997 tax map at the Herkimer County Assessor's office indicates that 11 parcels comprise the current Cherry-Burrell site (as illustrated in Figure 3) and are owned by the Carton Filler Acquisition.

## 4.0 FINDINGS

Delta has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527. This assessment revealed evidence of environmental conditions in connection with the property. Based upon the results of the Phase I Environmental Assessment, Delta provides the following findings:

- Electropolishing Collection Pit: The concrete pit collects acidic wastewater from the electropolishing process. This pit was lined with fiberglass in the early 1990's. The potential for historical releases from this pit has not been established.
- Fuel Oil ASTs: The fuel oil ASTs were installed in 1965 and secondary containment was installed in the early 1990's. The potential for releases associated with historical handling of petroleum products has not been evaluated.
- Burrow Paper Corp.: Review of the database indicated the potential presence of a landfill and previous spills at Burrows Paper Corp. (located approximately 500 feet east of the Cherry-Burrell property).
- Asbestos: ACM has been identified at the site. A draft asbestos management plan has been prepared which details procedures for managing asbestos in place at the facility.

## 5.0 LIMITATIONS TO ENVIRONMENTAL ASSESSMENTS

The findings contained in this report represent our professional opinions. These opinions were arrived at in accordance with currently accepted industry practices and hydrological and engineering practices at this time and location are subject to the current industry standard. Other than this, there are no warranties implied or intended.

### 5.1 Site Data Review

Delta obtained, reviewed, and evaluated information available from the client, and local, state, and federal offices. Delta's conclusions, opinions, and recommendations are based, in part, on this information. Delta's services did not include the verification of the authenticity of this information.

### 5.2 Site Reconnaissance

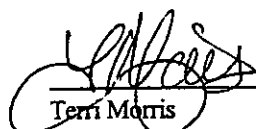

Delta performed a limited site reconnaissance to document current conditions. Delta focused on property areas deemed more likely to exhibit hazardous materials and conditions while others may have received limited attention or had been inaccessible at the time of our reconnaissance.

### 5.3 Interpretation of Results

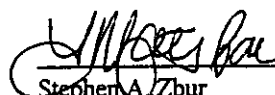

Delta's report is based upon the information provided to Delta and Delta's observations made during the site reconnaissance. Given the inherent limitations of environmental assessment work, Delta does not guarantee that the site is free of hazardous or potentially hazardous materials or conditions.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-97. Search distances are per ASTM standard or custom distances requested by the user.

The address of the subject property for which the search was intended is:

575 E. MILL STREET  
LITTLE FALLS, NY 13365

No mapped sites were found in EDR's search of available ( "reasonably ascertainable " ) government records either on the subject property or within the ASTM E 1527-97 search radius around the subject property for the following Databases:

NPL:..... National Priority List  
Delisted NPL:..... NPL Deletions  
RCRIS-TSD:..... Resource Conservation and Recovery Information System  
SHWS:..... Inactive Hazardous Waste Disposal Sites in New York State  
CERCLIS:..... Comprehensive Environmental Response, Compensation, and Liability Information System  
CERC-NFRAP:..... Comprehensive Environmental Response, Compensation, and Liability Information System  
CORRACTS:..... Corrective Action Report  
RAATS:..... RCRA Administrative Action Tracking System  
HMIRS:..... Hazardous Materials Information Reporting System  
PADS:..... PCB Activity Database System  
ERNS:..... Emergency Response Notification System  
TRIS:..... Toxic Chemical Release Inventory System  
NPL Lien:..... Federal Superfund Liens  
TSCA:..... Toxic Substances Control Act  
MLTS:..... Material Licensing Tracking System  
NY Spills:..... Spills Information Database  
ROD:..... Records Of Decision  
CONSENT:..... Superfund (CERCLA) Consent Decrees  
Coal Gas:..... Former Manufactured gas (Coal Gas) Sites.

Unmapped (orphan) sites are not considered in the foregoing analysis.

### Search Results:

Search results for the subject property and the search radius, are listed below:

### Subject Property:

The subject property was identified in the following government records. For more information on this property see page 9 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
CHERRY BURRELL 575 E MILL ST LITTLE FALLS, NY 13365	RCRIS-SQG FINDS	NYD070860887

## EXECUTIVE SUMMARY

### Surrounding Properties:

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the subject property includes a tolerance of -10 feet. Sites with an elevation equal to or higher than the subject property have been differentiated below from sites with an elevation lower than the subject property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

**SWF/LF:** The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data comes from the list.

A review of the SWF/LF list, as provided by EDR, and dated 12/31/1996 has revealed that there is 1 SWF/LF site within approximately 0.5 Miles of the subject property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
LITTLE FALLS T.S.	525 E MILL ST	1/8 - 1/4 W	5	15

**LUST:** The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data comes from the Department of Environmental Conservation's Spills Information Database.

A review of the LUST list, as provided by EDR, and dated 12/31/1996 has revealed that there are 7 LUST sites within approximately 0.5 Miles of the subject property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
LITTLE FALLS EVE. TIMES	347 S 2ND ST	1/4 - 1/2 WNW	6	16
STEWART'S ICE CREAM CO.	14 E ALBANY ST	1/4 - 1/2 W	7	17
OLD HERKIMER CO. JAIL	MAIN / CHURCH ST	1/4 - 1/2 WNW	B8	17
BONFARE #110	4 N ANN ST	1/4 - 1/2 WNW	B9	18

STEWART'S STORE #171	22 N ANN ST	1/4 - 1/2 WNW	11	19
MILL STREET LUMBER	55 W MILL ST	1/4 - 1/2 W	12	20

**UST:** The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data comes from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS, CBS, MOSF) Database.

A review of the UST list, as provided by EDR, and dated 12/31/1996 has revealed that there is 1 UST site within approximately 0.25 Miles of the subject property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<i>LITTLE FALLS CITY SCHOOL DIST</i>	<i>770 E MAIN ST</i>	<i>1/8 - 1/4 N</i>	<i>4</i>	<i>11</i>

## EXECUTIVE SUMMARY

RCRIS: The Resource Conservation and Recovery Act database includes selected information on sites that generate, store, treat, or dispose of hazardous waste as defined by the Act. The source of this database is the U.S. EPA.

A review of the RCRIS-SQG list, as provided by EDR, and dated 04/01/1997 has revealed that there is 1 RCRIS-SQG site within approximately 0.25 Miles of the subject property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

## GEOCHECK VERSION 2.1 ADDENDUM FEDERAL DATABASE WELL INFORMATION

Well Closest to Target Property (Eastern Quadrant)

### BASIC WELL DATA

Site ID:	430136074494201	Distance from TP:	1 - 2 Miles
Site Type:	Single well, other than collector or Ranney type		
Year Constructed:	1950	County:	Herkimer
Altitude:	425.00 ft.	State:	New York
Well Depth:	83.00 ft.	Topographic Setting:	Hillside (slope)
Depth to Water Table:	35.00 ft.	Prim. Use of Site:	Withdrawal of water
Date Measured:	Not Reported	Prim. Use of Water:	Domestic

### LITHOLOGIC DATA

Geologic Age ID (Era/System/Series):	Cenozoic-Quaternary-Pleistocene
Principal Lithology of Unit:	Sand
Further Description:	Not Reported

### WATER LEVEL VARIABILITY

Not Reported

# GEOCHECK VERSION 2.1

## FEDERAL DATABASE WELL INFORMATION

Well Closest to Target Property (Southern Quadrant)

### BASIC WELL DATA

Site ID:	430121074510801	Distance from TP:	1 - 2 Miles
Site Type:	Single well, other than collector or Ranney type		
Year Constructed:	1964	County:	Herkimer
Altitude:	867.00 ft.	State:	New York
Well Depth:	267.00 ft.	Topographic Setting:	Hilltop
Depth to Water Table:	142.00 ft.	Prim. Use of Site:	Withdrawal of water
Date Measured:	Not Reported	Prim. Use of Water:	Stock

### LITHOLOGIC DATA

Geologic Age ID (Era/System/Series):	Ordovician-Lower
Principal Lithology of Unit:	Limestone
Further Description:	Not Reported

### WATER LEVEL VARIABILITY

Not Reported

Well currently has or has had major violation(s): No

## EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D007	CHROMIUM
D011	SILVER
D018	BENZENE
D035	METHYL ETHYL KETONE
D039	TETRACHLOROETHYLENE
D040	TRICHLOROETHYLENE
F001	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

## FEDERAL ASTM RECORDS:

**CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA/NTIS

Telephone: 703-413-0223

**CERCLIS:** CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/30/97

Date Made Active at EDR: 06/30/97

Database Release Frequency: Monthly

Date of Data Arrival at EDR: 05/19/97

Elapsed ASTM days: 42

Date of Last EDR Contact: 08/22/97

**ERNS:** Emergency Response Notification System

Source: EPA/NTIS

Telephone: 202-260-2342

**ERNS:** Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/01/97

Date Made Active at EDR: 10/09/97

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 08/29/97

Elapsed ASTM days: 41

Date of Last EDR Contact: 08/26/97

**NPL:** National Priority List

Source: EPA

Telephone: 703-603-8852

**NPL:** National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC).

Date of Government Version: 04/01/97

Date Made Active at EDR: 05/29/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 04/21/97

Elapsed ASTM days: 38

Date of Last EDR Contact: 07/01/97

**RCRIS:** Resource Conservation and Recovery Information System

Source: EPA/NTIS

Telephone: 800-424-9346

**RCRIS:** Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Date of Government Version: 04/01/97

Date Made Active at EDR: 06/30/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 04/25/97

Elapsed ASTM days: 66

Date of Last EDR Contact: 08/04/97

**CORRACTS:** Corrective Action Report

Source: EPA

Telephone: 800-424-9346

**CORRACTS:** CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/01/96

Date Made Active at EDR: 03/03/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 12/30/96

Elapsed ASTM days: 63

Date of Last EDR Contact: 07/07/97

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## FEDERAL NON-ASTM RECORDS:

### BRS: Biennial Reporting System

Source: EPA/NTIS

Telephone: 800-424-9346

BRS: The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/93

Database Release Frequency: Biennially

Date of Last EDR Contact: 08/04/97

Date of Next Scheduled EDR Contact: 09/22/97

### CONSENT: Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices

Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: Varies

Database Release Frequency: Varies

Date of Last EDR Contact: Varies

Date of Next Scheduled EDR Contact: N/A

### FINDS: Facility Index System

Source: EPA/NTIS

Telephone: 703-908-2493

FINDS: Facility Index System. FINDS contains both facility information and "pointers" to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 09/30/95

Database Release Frequency: Quarterly

Date of Last EDR Contact: 08/22/97

Date of Next Scheduled EDR Contact: 11/04/97

### HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4526

HMIRS: Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/96

Database Release Frequency: Annually

Date of Last EDR Contact: 07/28/97

Date of Next Scheduled EDR Contact: 10/27/97

### MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission

Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/15/97

Database Release Frequency: Quarterly

Date of Last EDR Contact: 07/14/97

Date of Next Scheduled EDR Contact: 10/13/97

### NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 205-564-4267

NPL LIENS: Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/91

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 08/25/97

Date of Next Scheduled EDR Contact: 11/24/97

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PAIS: PCB Activity Database System

Source: EPA

Telephone: 202-260-3936

PAIS: PCB Activity Database. PAIS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 01/27/97

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 08/19/97

Date of Next Scheduled EDR Contact: 11/17/97

### RAATS: RCRA Administrative Action Tracking System

Source: EPA

Telephone: 202-564-4104

RAATS: RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 07/01/97

Date of Next Scheduled EDR Contact: 09/15/97

### ROD: Records Of Decision

Source: NTIS

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 03/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 09/03/97

Date of Next Scheduled EDR Contact: 12/01/97

### TRIS: Toxic Chemical Release Inventory System

Source: EPA/NTIS

Telephone: 202-260-1531

TRIS: Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/92

Database Release Frequency: Annually

Date of Last EDR Contact: 07/02/97

Date of Next Scheduled EDR Contact: 09/29/97

### TSCA: Toxic Substances Control Act

Source: EPA/NTIS

Telephone: 202-260-1444

TSCA: Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. USEPA has no current plan to update and/or re-issue this database.

Date of Government Version: 01/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 06/16/97

Date of Next Scheduled EDR Contact: 09/15/97

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## STATE OF NEW YORK ASTM RECORDS:

### LUST: Spills Information Database

Source: Department of Environmental Conservation  
Telephone: 518-457-2462

LUST: Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 12/31/96  
Date Made Active at EDR: 04/21/97  
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 02/12/97  
Elapsed ASTM days: 68  
Date of Last EDR Contact: 07/28/97

### SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Source: Department of Environmental Conservation  
Telephone: 518-457-0747

SHWS: State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/30/96  
Date Made Active at EDR: 06/06/96  
Database Release Frequency: Annually

Date of Data Arrival at EDR: 05/06/96  
Elapsed ASTM days: 31  
Date of Last EDR Contact: 08/11/97

### SWF/LF: Facility Register

Source: Department of Environmental Conservation  
Telephone: 518-457-2051

SWF/LF: Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/96  
Date Made Active at EDR: 04/21/97  
Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 02/20/97  
Elapsed ASTM days: 60  
Date of Last EDR Contact: 08/11/97

### UST: Petroleum Bulk Storage (PBS, CBS, MOSF) Database (UST)

Source: Department of Environmental Conservation  
Telephone: 518-457-4351

UST: Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 12/31/96  
Date Made Active at EDR: 04/07/97  
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 02/18/97  
Elapsed ASTM days: 48  
Date of Last EDR Contact: 08/04/97

## STATE OF NEW YORK NON-ASTM RECORDS:

### AST: Petroleum Bulk Storage (AST)

Source: Department of Environmental Conservation  
Telephone: 518-457-4351

AST: Registered Aboveground Storage Tanks.

Date of Government Version: 09/30/96  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 08/04/97  
Date of Next Scheduled EDR Contact: 11/03/97

### SPILLS: Spills Information Database

Source: Department of Environmental Conservation  
Telephone: 518-457-2462

SPILLS: Data collected on spills reported to NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

Date of Government Version: 12/31/96  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 07/28/97  
Date of Next Scheduled EDR Contact: 10/27/97

## Historical and Other Database(s)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

**Former Manufactured Gas (Coal Gas) Sites:** The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

## Disclaimer Provided by Real Property Scan, Inc.

This report does not constitute a legal opinion.

## DELISTED NPL: Delisted NPL Sites

Source: EPA  
Telephone: 703-603-8769

**DELISTED NPL:** The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## NFRAP: No Further Remedial Action Planned

Source: EPA/NTIS  
Telephone: 703-413-0223

**NFRAP:** As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

## FRDS: Federal Reporting Data System

Source: EPA/Office of Drinking Water  
Telephone: 202-260-2805

**FRDS** provides information regarding public water supplies and their compliance with monitoring requirements, maximum contaminant levels (MCL's), and other requirements of the Safe Drinking Water Act of 1986.

**Area Radon Information:** The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**Oil/Gas Pipelines/Electrical Transmission Lines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

**USGS Water Wells:** In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1994 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**Epicenters:** World earthquake epicenters, Richter 5 or greater

## TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

## Section 1: Facility Summary ..... Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

## Section 2: Facility Detail Reports ..... Page 4

All available detailed information from databases where sites are identified.

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D018	BENZENE
D039	TETRACHLOROETHYLENE
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
