Re: **Liberty Street Non-Owned Former Manufactured Gas Plant (MGP) Site**
Troy, NY
Annual Groundwater Monitoring Report
NYSDEC Site # V000482

Dear Mr. Deyette:

Attached for your information is the annual Groundwater Monitoring Report detailing the groundwater monitoring activities conducted in 2020 at the National Grid Troy (Liberty Street) Site. Site activities were conducted in accordance with the NYSDEC-approved Site Management Plan dated April 2015.

Groundwater and Environmental Services, Inc., (GES), the OM&M contractor for National Grid, conducts all long-term OM&M activities at the site. Quarterly site inspections were conducted in March, June, September, and December of 2020. The site is generally in good shape and in compliance.

Annual groundwater sampling was completed on September 3, 2020. During the September 2020 site inspection and groundwater sampling event, it was observed that monitoring well B/MW-202(06) had been destroyed, presumably during municipal construction activities.

Please contact me at 315-428-5652 if you have any questions.

Sincerely,

for SPS

1 Introduction

1.1 Overview

Groundwater & Environmental Services, Inc. (GES) has prepared this 2020 Groundwater Monitoring Report (covering January 1, 2020 – December 31, 2020) for the Troy (Liberty Street) Site, Troy, New York**.** The groundwater monitoring activities described in this letter were completed as part of the annual inspection and groundwater sampling/monitoring event, in accordance to the Site Management Plan (SMP) dated April 2015.

The following activities conducted during this reporting period are summarized below:

- Quarterly site inspections.
- Annual groundwater elevation data.
- Annual groundwater sampling, analysis and data validation. Water samples are submitted to Pace Analytical Services, LLC (Pace) for laboratory analysis of benzene, toluene, ethylbenzene, and total xylenes (BTEX) via United States Environmental Protection Agency (EPA) Method 8260C, and polycyclic aromatic hydrocarbons (PAHs) via EPA Method 8270D.
- Any site maintenance that comes about as a result of the quarterly inspections.

1.2 Site Description

The Troy-Liberty Street former MGP Site is located in an urban residential/light commercial area in Troy's "Little Italy" neighborhood, and is approximately 1.016 acres. The Site is bordered to the east by Fifth Avenue, to the south of Washington Street, to the west by Hill Street, and to the north by Liberty Street. The Site Location is presented on **Figure 1**, and the current Site Map is presented on **Figure 2**. The Site is mainly comprised of an asphalt parking lot, with two (2) small bocce courts at the south end. The courts are constructed on top of the existing asphalt surface. It is bordered by a metal fence with brick pillars on the western side and a chain link fence on the northern side. The Site has gates which can be locked but it is common to find them unlocked.

2 Quarterly Site Inspections and Groundwater Monitoring Activities

2.1 Quarterly Site Inspections

GES conducted quarterly site inspections during this reporting period on March 5, June 18, September 3, and 16, 2020.

In general, the Site is in good condition and in compliance. The exterior cover system is intact. No visible saw cutting, holes from burrowing animals, or evidence of any other intrusive activities were noted in 2020. The groundwater monitoring wells are secured and operable, with the exception of B/MW-202(06) which was discovered to have been destroyed by the City of Troy during the September 2020 site inspection.

Attachment A includes the Quarterly Site Inspection Forms.

2.2 Groundwater Well Gauging

Groundwater level measurements are collected at the Site to accomplish the following:

- To determine the general groundwater flow direction on site.

Annual gauging field data is presented in **Table 3**. In general, site groundwater flows from east to west/northwest, consistent with past groundwater elevation data.

2.3 Groundwater Well Sampling and Analysis

Groundwater samples were collected from five (5) monitoring wells {B/MW-101(05), B/MW-102(05), B/MW-104(05), B/MW-203(06), and B/MW-404(11)}, on September 3, 2020. The wells were purged using a peristaltic pump. Field Measurements of pH, conductivity, turbidity, dissolved oxygen, temperature, total dissolved solids and oxidation-reduction potential were recorded using a Horiba U-52 water quality meter during sample collection. Samples were collected once field parameters stabilized. Field monitoring data and the chain-of-custody record are included in **Appendix B**.

Five (5) aqueous field samples, a field duplicate, and trip blank were analyzed for TCL VOCs, and TCL SVOCs. The samples were analyzed by Pace in accordance with the NYSDEC Analytical Services Protocol. Analytical results are summarized in **Table 4**. The Analytical Lab Report and Data Usability Summary Report are presented in **Appendix C.**

B/MW-101(05) had detections of naphthalene below the AWQS. B/MW-203(06) had exceedances of BTEX, acenaphthene, benzo(a)anthracene, chrysene, and naphthalene. Monitoring well B/MW-203(06) also had detections below the standards in acenaphthylene, anthracene, fluoranthene, fluorene, phenanthrene, and pyrene. There were no detections of TCL VOCs or TCL SVOCs observed in the groundwater samples of B/MW-102(05), B/MW-104(05), and B/MW-404(11).

2.4 Waste Disposal

Purged groundwater and decontamination fluids were containerized in a 55-gallong steel drum and were properly disposed of by Capitol Environmental on behalf of National Grid.

3 Conclusions and Recommendations

3.1 Conclusions

Based on the results of the past year's activities, the following conclusions were made:

- Quarterly site inspections demonstrate that the site is in good condition and in compliance.
- Groundwater beneath the Site appears to flow in a general east to west/northwest direction.
- The groundwater samples collected in September 2020 had exceedances of BTEX, acenaphthene, benzo(a)anthracene, chrysene, and naphthalene. There were no detections of TCL VOCs or TCL SVOCs observed in three of the five groundwater samples.

3.2 Recommendations

It is recommended that all groundwater monitoring activities continue, with the next report due in January 2022.

COVID-19 Daily Symptom Check - Visitors

Name Allison Jordan Date: 9/3/20

Company name: GES

Contact phone number: 716-912-4604

National Grid location visited: Troy Liberty St

Please reply NO to any symptoms that you believe to be related to seasonal allergies, chronic health conditions or other known causes.

Any NEW ONSET of the following symptoms within the past 14 days?	**Yes**	**No**
Have you been experiencing any cough, shortness of breath, or difficulty breathing?	☐	☒
Have you been experiencing any chills, felt feverish, or had a fever of 100.3 or greater?	☐	☒
Have you been experiencing any (generalized) muscle pain/aches, fatigue, or headaches?	☐	☒
Have you been experiencing any sore throat, runny/stuffy nose, or recent loss of taste or smell?	☐	☒
Have you been experiencing nausea, vomiting, or diarrhea?	☐	☒

In the past 14 days, have you:	**Yes**	**No**
Tested positive for COVID-19?	☐	☒
Been in close or proximate contact (less than 6 feet for more than 15 minutes) with anyone who has tested positive for COVID-19 or who has or had symptoms of COVID-19?	☐	☒
Been directed to quarantine or isolate by the any Department of Health or a healthcare provider?	☐	☒

For those entering Rhode Island today (check no if not applicable):		
Have you traveled (for Non-Work Related purposes) from a location that is currently under a government mandated stay at home order in the past 14 days?	☐	☐

If you answer "Yes" to any of the questions, please leave the work location, contact your employer and notify National Grid's Employee Services at (888) 483-2123 (to trigger contact tracing for National Grid employees you were in contact with). If you feel that you have symptoms related to COVID-19 please contact your healthcare provider.

Thank you for completing the National Grid COVID-19 Symptom Check for visitors.

RE: Data Usability Summary Report for National Grid- Troy Liberty Street St- Site Data Package: 30380911

Groundwater & Environmental Services, Inc. (GES) reviewed one data package (Laboratory Project No.: 30380911) from Pace Analytical Services, LLC in Greensburg PA., for the analysis of samples collected on September 3, 2020 from monitoring wells located at the National Grid: Troy Liberty Street Site. Six aqueous samples and a field duplicate were analyzed for BTEX and PAHs. Methodologies utilized are those of USEPA SW846 methods 8260C and 8270D with additional QC requirements of the NYSDEC ASP.

The data packages submitted contain full deliverables for validation, but this usability report is generated from review of the summary form information, with full validation review of sample raw data, and limited review of associated QC raw data. The reported summary forms have been reviewed for application of validation qualifiers, using guidance from the National Grid generic QAPP, USEPA Region 2 validation SOPs, the USEP A National Functional Guidelines for Data Review, and professional judgment, as affects the usability of the data. The following items were reviewed:

- Laboratory Narrative Discussion
- Custody Documentation
- Holding Times
- Surrogate Recoveries
- Matrix Spike Recoveries/Duplicate (M S / M S D) Correlations
- Field Duplicate Correlations
- Laboratory Control Sample (LCS)
- Preparation/Calibration Blanks
- Instrument MDLs
- Sample Quantitation and Identification

The items listed above which show deficiencies are discussed within the text of this narrative.

All of the other items are determined to be acceptable for the DUSR level review.

Groundwater & Environmental Services, Inc.

708 North Main Street, Suite 201
Blacksburg, VA 24060

T. 800.662.5067

Table 1. Laboratory – Field Cross Reference

Lab Sample ID	Client Sample ID	Matrix	Collected
30380911001	B/MW-101 (05)-0920	Water	09/03/20 09:55
30380911002	B/MW-102 (05)-0920	Water	09/03/20 11:35
30380911003	B/MW-104 (05)-0920	Water	09/03/20 10:45
30380911004	B/MW-203 (06)-0920	Water	09/03/20 10:10
30380911005	B/MW-203 (06)-MS-0920	Water	09/03/20 10:10
30380911006	B/MW-203(06)-MSD-0920	Water	09/03/20 10:10
30380911007	B/MW-404 (11)-0920	Water	09/03/20 10:50
30380911008	FIELD DUP-0920	Water	09/03/20 00:01
30380911009	TRIP BLANK	Water	09/03/20 11:50

In summary, sample results are usable as reported.

The laboratory case narratives and sample identification summary forms are attached to this text, and should be reviewed in conjunction with this report.

BTEX and TCL Volatiles by EPA 8260C/NYSDEC ASP

Sample holding times are met. Surrogate and recoveries are within required limits. Laboratory control sample recoveries are within laboratory-provided criteria. The MS/MSD recoveries and relative percent differenced (RPD) reported within laboratory-provided criteria. The blind field duplicate correlations associated with M/MW-101(5)-0920 were not calculated, as only naphthalene reported above RL in the original sample, and there were no other detections. Per EPA guidance, precision can only be calculated using concentrations that are at least 2 times the RL. No analyte reported concentrations that were above these guidelines.

PAHs by EPA8270D/NYSDEC ASP

Sample holding times are met. Surrogate and recoveries are within required limits. Laboratory control sample recoveries are within laboratory-provided criteria. The MS/MSD recoveries and relative percent differenced (RPD) reported within laboratory-provided criteria. The blind field

duplicate correlations associated with M/MW-101(5)-0920 were not calculated as there were no detections.

Data Package Completeness

The NYSDEC Category B deliverables was included in the laboratory data package, all information required for validation of the data is present.

Please do not hesitate to contact me if you have comments or questions regarding this report.

PROJECT NARRATIVE

Project: National Grid Troy Liberty Str
Pace Project No.: 30380911

Method: **EPA 8270D by SIM**
Description: 8270D PAH SIM Reduced Volume
Client: Groundwater & Environmental Services, Inc. (Syracuse)
Date: September 14, 2020

General Information:
8 samples were analyzed for EPA 8270D by SIM by Pace Analytical Services Greensburg. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Sample Preparation:
The samples were prepared in accordance with EPA 3510C with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

PROJECT NARRATIVE

Project: National Grid Troy Liberty Str
Pace Project No.: 30380911

Method: **EPA 8260C**
Description: 8260C MSV
Client: Groundwater & Environmental Services, Inc. (Syracuse)
Date: September 14, 2020

General Information:
9 samples were analyzed for EPA 8260C by Pace Analytical Services Greensburg. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.
