

PERMIT Under the Environmental Conservation Law (ECL)

IDENTIFICATION INFORMATION

Permit Type: Air State Facility
Permit ID: 1-4736-03683/00004

Effective Date: 04/01/2005 Expiration Date: No expiration date

Permit Issued To: BIDE A WEE HOME ASSOCIATION

118 OLD COUNTRY RD WESTHAMPTON, NY 11977

Contact: FRANK PIZZOLO

BIDE-A-WEE HOME ASSOCIATION

3300 BELTAGH AVE WANTAGH, NY 11793

(516) 785-4079

Facility: BIDE A WEE

118 OLD COUNTRY RD WESTHAMPTON, NY 11977

Description:

Project Description:

NATURE OF THE BUSINESS AT THE FACILITY:

The owner/ operator of Bide-A-Wee Home Association facility will maintain and operate one animal cremation retort.

(Primary SIC) - 7261

TYPE OF EQUIPMENT AND OPERATION OF THE FACILITY:

The crematory will consist of one dual chamber animal crematory equipped with propane gas fired ignition/cremation burner (rated at 500,000 Btu/hr) in the primary chamber and an afterburner (rated at 1 MM Btu/hr) in the secondary chamber. This unit is manufactured by B & L CREMATION SYSTEMS, INC., Largo, FL. The unit model number is MODEL BLP-500/150.

AIR PERMIT APPLICABILITY:

The facility will be permitted under the New York State regulations 6NYCRR Part 201-5 (State Facility Permits) and Part 219-4 (Incinerators, Crematories), and will be subjected to the Part 201-1.4 (Unavoidable Noncompliance and Violations) and Part 211.2 (General Prohibition).

OCCURRENCE OF CAPPING:

None.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator:	ROGER EVANS DIVISION OF ENVIRONMENTAL PERMITS SUNY CAMPUS, LOOP ROAD, BUILDING 40 STONY BROOK, NY 11790-2356
Authorized Signature:	Date: / /

Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees, and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

DEC GENERAL CONDITIONS **** General Provisions **** GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 1: Facility Inspection by the Department

Applicable State Requirement: ECL 19-0305

Item 1.1:

The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:

The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

Item 1 3.

A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations
Applicable State Requirement: ECL 3-0301.2(m)

Item 2.1:

Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for Permit Renewals and Modifications
Applicable State Requirement: 6NYCRR 621.13

Item 3.1:

The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2:

The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3:

Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual

transfer of ownership.

Condition 4: Permit Modifications, Suspensions and Revocations by the Department

Applicable State Requirement: 6NYCRR 621.14

Item 4.1:

The Department reserves the right to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

- a) materially false or inaccurate statements in the permit application or supporting papers;
- b) failure by the permittee to comply with any terms or conditions of the permit;
- c) exceeding the scope of the project as described in the permit application;
- d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
- e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**** Facility Level ****

Condition 5: Submission of Applications for Permit Modification or Renewal-REGION 1

HEADOUARTERS

Applicable State Requirement: 6NYCRR 621.5(a)

Item 5.1:

Submission of applications for permit modification or renewal are to be submitted to:

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS

This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Public Access to Recordkeeping for Facilities With State Facility Permits - 6NYCRR Part 201-1.10(a)

Where emission source owners and/or operators keep records pursuant to compliance with the operational flexibility requirements of 6 NYCRR Subpart 201-5.4(b)(1), and/or the emission capping requirements of 6 NYCRR Subparts 201-7.2(d), 201-7.3(f), 201-7.3(g), 201-7.3(h)(5), 201-7.3(i) and 201-7.3(j), the Department will make such records available to the public upon request in accordance with 6 NYCRR Part 616 - Public Access to Records. Emission source owners and/or operators must submit the records required to comply with the request within sixty working days of written notification by the Department of receipt of the request.

Item B: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5

Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or

Air Pollution Control Permit Conditions Pa of 12 FINAL

law.

STATE ONLY APPLICABLE REQUIREMENTS

The following conditions are state only enforceable.

Condition 1: Contaminant List

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable State ReqECL 19-0301

Item 1.1:

Emissions of the following contaminants are subject to contaminant specific requirements in this permit(emission limits, control requirements or compliance monitoring conditions).

CAS No: 0NY075-00-0 Name: PARTICULATES

Condition 2: Unavoidable noncompliance and violations

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable State Requirement: 6NYCRR 201-1.4

Item 2.1:

At the discretion of the commissioner a violation of any applicable emission standard for necessary scheduled equipment maintenance, start-up/shutdown conditions and malfunctions or upsets may be excused if such violations are unavoidable. The following actions and recordkeeping and reporting requirements must be adhered to in such circumstances.

- (a) The facility owner and/or operator shall compile and maintain records of all equipment maintenance or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the commissioner's representative when requested to do so in writing or when so required by a condition of a permit issued for the corresponding air contamination source except where conditions elsewhere in this permit which contain more stringent reporting and notification provisions for an applicable requirement, in which case they supercede those stated here. Such reports shall describe why the violation was unavoidable and shall include the time, frequency and duration of the maintenance and/or start-up/shutdown activities and the identification of air contaminants, and the estimated emission rates. If a facility owner and/or operator is subject to continuous stack monitoring and quarterly reporting requirements, he need not submit reports for equipment maintenance or start-up/shutdown for the facility to the commissioner's representative.
 - (b) In the event that emissions of air contaminants in excess of any emission standard in 6 NYCRR Chapter III Subchapter A occur due to a malfunction, the facility owner and/or operator shall report such malfunction by telephone to the commissioner's representative as soon as possible during normal working hours, but in any event not later than two working days after becoming aware that the malfunction

occurred. Within 30 days thereafter, when requested in writing by the commissioner's representative, the facility owner and/or operator shall submit a written report to the commissioner's representative describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates. These reporting requirements are superceded by conditions elsewhere in this permit which contain reporting and notification provisions for applicable requirements more stringent than those above.

- The Department may also require the owner and/or operator to include in reports described (c) under (a) and (b) above an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions depending on the deviation of the malfunction and the air contaminants emitted.
 - (d) In the event of maintenance, start-up/shutdown or malfunction conditions which result in emissions exceeding any applicable emission standard, the facility owner and/or operator shall take appropriate action to prevent emissions which will result in contravention of any applicable ambient air quality standard. Reasonably available control technology, as determined by the commissioner,. shall be applied during any maintenance, start-up/shutdown or malfunction condition subject to this paragraph.
 - In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets.

Condition 3: Emission Unit Definition

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable State R6NYCRR 201-5

Item 3.1:

The facility is authorized to perform regulated processes under this permit for:

Emission1-BL500

Emission Unit Description:

The Emission Unit will consist of one dual chamber animal crematory equipped with propane gas fired ignition/cremation burner (rated at 0.5 MMBtu/hr) in the primary chamber and an afterburner (rated at 1.0 MMBtu/hr) in the secondary chamber. This unit is manufactured by B & L CREMATION SYSTEMS, INC., Largo, FL. The unit model number is BLP-500/150.

Building(s): **CREMATOR**

Condition 4: Air pollution prohibited

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable State Requirement: 6NYCRR 211.2

Item 4.1:

Air Pollution Control Permit Conditions

5 o FINAL

Page

No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

**** Emission Unit Level ****

Condition 5: Emission Point Definition By Emission Unit

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable State Requirement: 6NYCRR 201-5

Item 5.1:

The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 1-BL500

Emission Pc00001

Height (ft.): 20 Diameter (in.): 18

NYTNYTME (km.): 694.9 Building: CREMATOR

Condition 6: Process Definition By Emission Unit

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable State R6NYCRR 201-5

Item 6.1:

This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-BL500

Process: BL1 Source Classification Code: 3-15-021-01

Process Description:

Operation of one B & L CREMATION SYSTEMS animal crematories fired at a maximum of 1.5MM BTU/HR at a maximum loading of 150 pounds per hour.

Deceased animal remains will be manually placed into the primary chamber of the crematory. The door of the crematory will then be closed. After a preheat of the afterburner chambers by auxiliary burners, initial and supplementary combustion will be provided by a propane gas fired burner located in the primary chamber of the crematory. Once the material combustion is initiated, the

Air Pollution Control Permit Conditions

Page 6 of 12 FINAL

rate of the combustion will be controlled by limiting both the combustion air and fuel supplied to the primary chamber through the primary burner. The gas mixture generated by this process will flow into the secondary chamber where more air will be admitted to insure further oxidation of the gases. The auxiliary burner will be installed in the secondary chamber of the crematory to facilitate complete combustion of all gaseous materials entering this chamber.

Once the cremation process is complete, the remains will be removed from the primary chamber of the crematory.

Emission Source/Control: BL500 - Incinerator

Design Capacity: 150 pounds per hour

Waste Feed Method: MANUAL DIRECT FEED

Waste Type: CREMATORY WASTE (INCLUDING HUMAN

AND/OR ANIMAL BODY PARTS AND ASSOCIATED ANIMAL BEDDING) ONLY

Condition 8: Compliance Demonstration

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable State Requirement: 6NYCRR 219-4.3

Item 8.1:

The Compliance Demonstration activity will be performed for:

Emission Unit: 1-BL500 Emission Point: 00001 Process: BL1 Emission Source: BL500

Regulated Contaminant(s):

CAS No: 0NY075-00-0 PARTICULATES

Item 8.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING Monitoring Description:

Particulate emission limit for new and modified crematories and for incineration of associated bedding. The permittee must initially demonstrate compliance with the standards in this Subpart by onsite testing.

Parameter Monitored: PARTICULATES
Upper Permit Limit: 0.08 grains per 100 dry standard cubic ft (corrected to 7% O2)

Reference Test Method: EPA Method 5

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING

DESCRIPTION

Averaging Method: ARITHMETIC MEAN

Reporting Requirements: ONCE / BATCH OR MONITORING OCCURRENCE

Condition 9: This section describes design requirements for crematories

and pathological incinerators.

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable State Requirement: 6NYCRR 219-4.4

Item 9.1:

This Condition applies to Emission Unit: 1-BL500 Emission Point: 00001

Process: BL1 Emission Source: BL500

Item 9.2:

- (a) Furnace design must provide for a residence time for combustion gas of at least one second at no less than 1800F. For a multichamber incinerator, these parameters must be met after the primary combustion chamber and the primary combustion chamber temperature must be maintained at no less than 1400F.
- (b) Auxiliary burners must be designed to provide combustion chamber temperatures as described in subdivision (a) of this section by means of automatic modulating controls.
- (c) Mechanically fed crematories must incorporate an air lock system to prevent opening the crematory to the room environment. The volume of the loading system must be designed so as to prevent overcharging to assure complete combustion of the charge.

Condition 10: Compliance Demonstration

Effective between the dates of 04/01/2005 and Permit Expiration Date

Applicable St6NYCRR 219-4.5(a)

Item 10.1:

The Compliance Demonstration activity will be performed for:

Emission Unit: 1-BL500 Emission Point: 00001 Process: BL1 Emission Source: BL500

Regulated Contaminant(s): CAS No:PARTICULATES

Item 10.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Air Pollution Control Permit Conditions
Pa of 12 FINAL

Monitoring Description:

The Owner/Operator will install and maintain a Visible Emissions Alarm (VEA) manufactured Optomonitor, Inc. on the stack. This alarm is designed to alert the operator when the opacity spikes occur between 5 and 10

percent.

If the opacity exceeds the permit limit based on 6-minute average, a Method 9 analysis of the affected emission point shall be conducted by the operator. Any exceedance over 10 percent (based on 6-minute average) must be recorded according to Method 9 and notified to the Regional Air Pollution Control Engineer within two working days of the exceedance including any corrective action implemented.

The VEA will receive annual tune-up, inspection and calibration and record of such maintenance will be kept at the facility for five years.
