Description:
L.D. McCauley, Inc. is a manufacturer of mechanical anti-theft devices. The manufacturing facility is located at 3875 California Road, Orchard Park, New York. The SIC code for this facility is 3499 - Fabricated Metal Products.

This air permit modification is intended to incorporate a new plating line (Process PTG) into the facility's air state facility permit. The new plating line would provide for the decorative chromium electroplating of specialty automotive metal locking lug nuts and fasteners. The parts would be plated with layers of copper and nickel followed by a relatively thin layer of chromium to provide a bright surface with wear and tarnish resistance. The new plating line would consist of a series of process tanks, which include pretreatment, alkaline cleaning, acid dipping, strike plating, and metal electroplating.

FACILITY DESCRIPTION:
L. D. McCauley manufactures specialty automotive locking lug nuts, and fasteners for security devices. The operations used in the manufacturing facility include milling, heat treatment, finishing (e.g., buffing and polishing), and electroplating. The manufacturing processes specified in the permit include the buffing and polishing, heat treatment, and plating. The milling process is an exempt activity. The manufacturing and control equipment associated with

the permitted processes are identified in the permit. The equipment associated with the exempt activities are as follows:

1. Twenty six (26) milling machines;
2. Ten (10) lathes;
3. Seventeen (17) multi spindle screw machines;
4. One (1) 5.3 MMBtu/hr combustion unit;
5. Three (3) 2.4 MMBtu/hr combustion units;
6. Two (2) natural gas emergency generators;
7. Four (4) non-contact water cooling towers; and
8. Five (5) non-vapor phase cleaning equipment.

APPLICABLE REQUIREMENTS

1. 6NYCRR Part 212 - General Process Emissions:
Each permitted and exempt process at the facility is required to limit particulate emissions to less than 0.05 grains per dry standard cubic foot of exhaust gas. In addition, the average opacity from each process is limited to less than 20 percent opacity.

The nickel, chromium and hydrogen chloride emissions are controlled by a packed bed scrubber to reduce emissions of these hazardous air pollutants. In accordance with Table 2 of 6NYCRR Part 212, the control efficiency of the packed bed scrubber satisfies the specified control requirements.

2. 40CFR63 Subpart N - National Emission Standards for Chromium Emissions from Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks:
The decorative chromium electroplating tanks use a wetting agent type fume suppressant as the method of compliance. The bath surface tension is required to be maintained below 40 dynes per centimeter (as measured by a stalagmometer) or below 33 dynes per centimeter (as measured by a tensiometer). The work practice standards, monitoring, recordkeeping, and reporting requirements for the chromium electroplating process are specified in the permit.

In 2014, the facility added a manhole cover mold process called Fibershield. The emission sources associated with the Fibershield process included five closed mold stations, one gasket station, two electric curing ovens and one spray booth. The spray booth is exempt from permitting as per 6 NYCRR Part 228-1.1(b)(9) which states "facility wide use of up to 55 gallons of coatings (or up to 400 pounds of actual VOC usage) on a 12-month rolling total. This exemption is contingent on the owner or operator of the facility maintaining records of such surface coatings, and maintaining compliance with all requirements of section 228-1.3, 'General Requirements', of this Subpart." In 2016, the Fibershield process was discontinued and the five mold stations and one curing oven were removed. The gasket station, one curing oven, and paint booth are still in place to support other activities at the facility.

Wastewater treatment equipment will treat the wastewater generated during the plating operation. The wastewater generated during the plating process contains heavy metals. The treatment system will first neutralize the pH using sodium hydroxide and hydrochloric acid as necessary. Once the pH has been adjusted, a polymer is added that assists in coagulating and settling the metals. Lastly, the wastewater passes through sand filters and the effluent is then sent to a final holding tank before it is discharged. The solids collected during the treatment are stored in a holding tank and then dewatered further by a filter press. The water purged from the sludge after the filter is sent back through the treatment system. The emissions from the

New York State Department of Environmental Conservation
Facility DEC ID: 9146000032

wastewater treatment system are from the pH neutralization tank, the sodium hydroxide storage tank and the hydrochloric acid storage tank. These sources are all vented to a scrubber before being released to the atmosphere.

At the facility, there is one (1) 100 Hp emergency generator that fires on natural gas and was manufactured in November of 2006. The engine is not subject to Subpart JJJJ because it was manufactured prior to January 1, 2008. As such, the engine currently does not have to meet any NSPS or NESHAP engine rules. The EPA may address requirements for the engine through future rulemaking.

At the facility, there is one (1) 196 hp emergency generator that fires on natural gas and was manufactured in June 2014 and installed in September 2014. The engine is certified compliant to NSPS Subpart JJJJ.

This modification includes the installation of a new plating line at the facility which would provide for the decorative chromium electroplating of specialty automotive metal locking lug nuts and fasteners. The parts would be plated with layers of copper and nickel followed by a relatively thin layer of chromium to provide a bright surface with wear and tarnish resistance.

New plating line (Process PTG) would consist of a series of tanks, which include pretreatment, alkaline cleaning, acid dipping, strike plating, and metal electroplating. Plating operations are expected to generate mists due to the evolution of gases on the surface of the submerged part or on anodes or cathodes. Mists are also expected to be generated from surface preparation steps such as alkaline cleaning and acid dipping. The process tanks that require enhanced ventilation for worker comfort and safety would be equipped with exhaust hoods and connected to one of two ventilation systems. Ventilation System #1 will be connected to exhaust hoods for 16 process tanks and six storage tanks associated with nickel and copper plating. This ventilation system is equipped with a high efficiency packed bed fume wet scrubber to reduce mist and particulate emissions. Ventilation System #2 includes exhaust from two process tanks associated with chromium (VI) plating and a chrome evaporator. This ventilation system is equipped with a high-efficiency chrome scrubber with mesh pad to reduce mist and particulate emissions.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator: LISA M CZECHOWICZ
NYSDEC - REGION 9
270 MICHIGAN AVE
BUFFALO, NY 14203-2915

Authorized Signature: _____ Date: ___ / ___ / _____

Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

DEC GENERAL CONDITIONS
****** General Provisions ******
GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 1: Facility Inspection by the Department

Applicable State Requirement: ECL 19-0305

Item 1.1:

The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:

The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

Item 1.3:

A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations

Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:

Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 1-1: Applications for permit renewals, modifications and transfers

Applicable State Requirement: 6 NYCRR 621.11

Item 1-1.1:

The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 1-1.2:

The permittee must submit a renewal application at least 180 days before the expiration of permits for Title V and State Facility Permits.

Item 1-1.3

Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

Condition 3: Applications for permit renewals, modifications and transfers
Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:

The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2:

The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3:

Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

Condition 4: Permit modifications, suspensions or revocations by the Department
Applicable State Requirement: 6 NYCRR 621.13

Item 4.1:

The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

- a) materially false or inaccurate statements in the permit application or supporting papers;
- b) failure by the permittee to comply with any terms or conditions of the permit;
- c) exceeding the scope of the project as described in the permit application;
- d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
- e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**** Facility Level ****

Condition 5: Submission of application for permit modification or renewal-REGION 9 HEADQUARTERS
Applicable State Requirement: 6 NYCRR 621.6 (a)

Item 5.1:

Submission of applications for permit modification or renewal are to be submitted to:

****** Facility Level ******

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS

This section contains terms and conditions which are federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Sealing - 6 NYCRR 200.5

The Commissioner may seal an air contamination source to prevent its operation if compliance with 6 NYCRR Chapter III is not met within the time provided by an order of the Commissioner issued in the case of the violation.

Sealing means labeling or tagging a source to notify any person that operation of the source is prohibited, and also includes physical means of preventing the operation of an air contamination source without resulting in destruction of any equipment associated with such source, and includes, but is not limited to, bolting, chaining or wiring shut control panels, apertures or conduits associated with such source.

No person shall operate any air contamination source sealed by the Commissioner in accordance with this section unless a modification has been made which enables such source to comply with all requirements applicable to such modification.

Unless authorized by the Commissioner, no person shall remove or alter any seal affixed to any contamination source in accordance with this section.

Item B: Acceptable Ambient Air Quality - 6 NYCRR 200.6

Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

Item C: Maintenance of Equipment - 6 NYCRR 200.7

Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications,

required to operate such device effectively.

Item D: Unpermitted Emission Sources - 6 NYCRR 201-1.2

If an existing emission source was subject to the permitting requirements of 6 NYCRR Part 201 at the time of construction or modification, and the owner and/or operator failed to apply for a permit for such emission source then the following provisions apply:

(a) The owner and/or operator must apply for a permit for such emission source or register the facility in accordance with the provisions of Part 201.

(b) The emission source or facility is subject to all regulations that were applicable to it at the time of construction or modification and any subsequent requirements applicable to existing sources or facilities.

Item E: Recycling and Salvage - 6 NYCRR 201-1.7

Where practical, any person who owns or operates an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of 6 NYCRR.

Item F: Prohibition of Reintroduction of Collected Contaminants to the Air - 6 NYCRR 201-1.8

No person shall unnecessarily remove, handle, or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

Item G: Proof of Eligibility for Sources Defined as Exempt Activities - 6 NYCRR 201-3.2 (a)

The owner and/or operator of an emission source or unit that is eligible to be exempt, may be required to certify that it operates within the specific criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

Item H: Proof of Eligibility for Sources Defined as Trivial

Activities - 6 NYCRR 201-3.3 (a)

The owner and/or operator of an emission source or unit that is listed as being trivial in 6 NYCRR Part 201 may be required to certify that it operates within the specific criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

Item I: Required Emission Tests - 6 NYCRR 202-1.1

An acceptable report of measured emissions shall be submitted, as may be required by the Commissioner, to ascertain compliance or noncompliance with any air pollution code, rule, or regulation. Failure to submit a report acceptable to the Commissioner within the time stated shall be sufficient reason for the Commissioner to suspend or deny an operating permit. Notification and acceptable procedures are specified in 6 NYCRR Subpart 202-1.

Item J: Open Fires Prohibitions - 6 NYCRR 215.2

Except as allowed by section 215.3 of 6 NYCRR Part 215, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item K: Permit Exclusion - ECL 19-0305

The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York (NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

Item L: Federally Enforceable Requirements - 40 CFR 70.6 (b)

All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

FEDERAL APPLICABLE REQUIREMENTS
The following conditions are federally enforceable.

Condition 1: Air pollution prohibited
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:6 NYCRR 211.1

Item 1.1:

No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

Condition 1-1: Compliance Demonstration
Effective between the dates of 02/14/2017 and 04/20/2025

Applicable Federal Requirement:6 NYCRR 212-1.6 (a)

Item 1-1.1:

The Compliance Demonstration activity will be performed for the Facility.

Item 1-1.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL
DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

The Compliance Demonstration applies to:

Emission Unit: 1-PLANT Emission Point: 09111

Emission Unit: 1-PLANT Emission Point:
09112

Emission Unit: 1-PLANT Emission Point:
02701

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Emission Unit: 1-PLANT Emission Point:
02702

Emission Unit: 1-PLANT Emission Point:
09104

Emission Unit: 1-PLANT Emission Point: 09109

No facility owner or operator shall cause or allow emissions having an average opacity during any six consecutive minutes of 20 percent or greater from any process emission source or emission point, except for the emission of uncombined water.

Weekly observations of visible emissions will be performed on the applicable stacks when the associated process is in operation. Visible emissions do not include steam plumes.

If any visible emissions are observed, the source owner or operator shall:

- 1.) Verify that the equipment and/or control device causing the visible emissions is operating according to manufacturer's specifications or other site-specific acceptable operating conditions. If the equipment or control device is not operating properly, corrective action shall be taken immediately.
- 2.) If the corrective action taken does not rectify the visible emissions, then conduct an opacity test using a certified opacity reader in accordance with EPA Method 9 (40 CFR 60, Appendix A) and report results.
- 3.) Keep records of monitoring, equipment and process inspections, and all corrective actions.
- 4.) Report the observance of visible emissions above normal and the substance of any corrective action in accordance with the deviation reporting requirements in this permit.

Parameter Monitored: OPACITY
 Upper Permit Limit: 20 percent
 Reference Test Method: Method 9
 Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
 Averaging Method: 6-MINUTE AVERAGE (METHOD 9)
 Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 1-2: Compliance Demonstration
Effective between the dates of 02/14/2017 and 04/20/2025

Applicable Federal Requirement:6 NYCRR 212-2.4 (b)

Item 1-2.1:

The Compliance Demonstration activity will be performed for the facility:
The Compliance Demonstration applies to:

Emission Unit: 1-PLANT Emission Point: 02701

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Emission Unit: 1-PLANT Emission Point: 02702

Emission Unit: 1-PLANT Emission Point: 09104

Emission Unit: 1-PLANT Emission Point: 09109

Emission Unit: 1-PLANT Emission Point: 09111

Emission Unit: 1-PLANT Emission Point: 09112

Regulated Contaminant(s):
CAS No: 0NY075-00-5 PM-10

Item 1-2.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING

Monitoring Description:

The control of particulate emissions released from new and modified process emission sources. Emissions from any process emission source for which an application was received by the department after July 1, 1973 are restricted as follows:
No facility owner or operator shall cause or allow emissions of particulate that exceed 0.050 grains per cubic foot of exhaust gas, expressed at standard conditions on a dry gas basis, except in instances where determination of permissible emission rate using process weight for a specific source category emitting solid particulate is based upon Table 5 and Table 6 of Subdivisions 212-2.5(a) and (b) of this Part.

Parameter Monitored: PM-10

Upper Permit Limit: 0.050 grains per dscf

Reference Test Method: Method 5

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 2: Emissions from new emission sources and/or modifications Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:6 NYCRR 212.4 (a)

Item 2.1:

No person shall cause or allow emissions that exceed the applicable permissible emission rate as determined from Table 2, Table 3, or Table 4 of 6 NYCRR Part 212 for the environmental rating issued by the commissioner.

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Condition 3: Compliance Demonstration
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:6 NYCRR 212.4 (c)

Item 3.1:

The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):

CAS No: 001310-73-2 SODIUM HYDROXIDE
CAS No: 007440-02-0 NICKEL METAL AND INSOLUBLE

COMPOUNDS

CAS No: 007440-47-3 CHROMIUM
CAS No: 007440-66-6 ZINC
CAS No: 0NY075-00-0 PARTICULATES

Item 3.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL
DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

Emissions of solid particulates from any process source shall not exceed 0.050 grains of particulates per cubic foot of exhaust gas, expressed at standard conditions on a dry gas basis.

Parameter Monitored: PARTICULATES

Upper Permit Limit: 0.05 grains per dscf

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING
DESCRIPTION

Averaging Method: MAXIMUM - NOT TO BE EXCEEDED AT ANY
TIME (INSTANTANEOUS/DISCRETE OR GRAB)

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 4: Compliance Demonstration
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:6 NYCRR 212.6 (a)

Item 4.1:

The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):

CAS No: 0NY075-00-0 PARTICULATES

Item 4.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL
DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

No person will cause or allow emissions having an average opacity during any six consecutive minutes of 20 percent or greater from any process emission source, except only the emission of uncombined water. The Department reserves the right to perform or require the performance of a Method 9 opacity evaluation at any time during facility operation.

Parameter Monitored: OPACITY

Upper Permit Limit: 20 percent

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Averaging Method: 6-MINUTE AVERAGE (METHOD 9)

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 1-3: Compliance Demonstration
Effective between the dates of 02/14/2017 and 04/20/2025

Applicable Federal Requirement: 40CFR 63.340, Subpart N

Item 1-3.1:

The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):

CAS No: 007440-47-3 CHROMIUM

Item 1-3.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

The Compliance Demonstration applies to:

Emission Unit: 1-PLANT

Process: SCR Emission Source: CHROM

Emission Unit: 1-PLANT

Process: PTG Emission Source: TK26C

Emission Unit: 1-PLANT

Process: PTG Emission Source: TK27C

(a) The affected source to which the provisions of this subpart apply is each chromium electroplating or chromium anodizing tank at facilities performing hard chromium electroplating, decorative chromium electroplating, or chromium anodizing.

(b) Owners or operators of affected sources subject to the provisions of this subpart must also comply with the requirements of subpart A of this part, according to the applicability of subpart A of this part to such sources, as identified in Table 1 of this subpart.

(c) Process tanks associated with a chromium electroplating or chromium anodizing process, but in which neither chromium electroplating nor chromium anodizing is taking place, are not subject to the provisions of this subpart. Examples of such tanks include, but are not limited to, rinse tanks, etching tanks, and cleaning tanks. Likewise, tanks that contain a chromium solution, but in which no electrolytic process occurs, are not subject to this subpart. An example of such a tank is a chrome conversion coating tank where no electrical current is applied.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 1-4: Compliance Demonstration
Effective between the dates of 02/14/2017 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(a), Subpart N

Item 1-4.1:

The Compliance Demonstration activity will be performed for the Facility.

Item 1-4.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

The Compliance Demonstration applies to:

Emission Unit: 1-PLANT

Process: SCR Emission Source: CHROM

Emission Unit: 1-PLANT

Process: PTG Emission Source: TK26C

Emission Unit: 1-PLANT

Process: PTG Emission Source: TK27C

(1) At all times, each owner or operator must operate and maintain any affected source subject to the requirements of this subpart, including associated air pollution control equipment and monitoring equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions. The general duty to minimize emissions does not require the owner or operator to make any further efforts to reduce emissions if levels required by this standard have been achieved. Determination of whether such operation and maintenance procedures are being used will be based on information available to the Administrator which may include, but is

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

not limited to, monitoring results, review of operation and maintenance procedures, review of operation and maintenance records, and inspection of the source.

(2) Each owner or operator of an affected source subject to the provisions of this subpart shall comply with these requirements in this section on and after the compliance dates specified in §63.343(a). All affected sources are regulated by applying maximum achievable control technology.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 1-5: Compliance Demonstration
Effective between the dates of 02/14/2017 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(d)(3), Subpart N

Item 1-5.1:

The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 007440-47-3 CHROMIUM

Item 1-5.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

The Compliance Demonstration applies to:
Emission Unit: 1-PLANT
Process: SCR Emission Source: CHROM

Emission Unit: 1-PLANT
Process: PTG Emission Source: TK26C

Emission Unit: 1-PLANT
Process: PTG Emission Source: TK27C

A chemical fume suppressant containing a wetting agent is used at this facility that will not allow the surface tension of the electroplating or anodizing bath contained within the affected tank to exceed 40 dynes/cm (2.8×10^{-3} lbf/ft), as measured by a stalagmometer or 33 dynes/cm (2.3×10^{-3} lbf/ft), as measured by a tensiometer at any time during tank operation, for all existing, new, or reconstructed decorative chromium electroplating tanks using a chromic acid bath and all existing, new, or reconstructed chromium anodizing tanks.

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Parameter Monitored: SURFACE TENSION

Upper Permit Limit: 33 dynes per centimeter

Reference Test Method: USEPA Method 306B

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Averaging Method: MAXIMUM - NOT TO EXCEED STATED VALUE - SEE MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 1-6: Compliance Demonstration
Effective between the dates of 02/14/2017 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(f), Subpart N

Item 1-6.1:

The Compliance Demonstration activity will be performed for the Facility.

Item 1-6.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

The Compliance Demonstration applies to:

Emission Unit: 1-PLANT

Process: SCR Emission Source: CHROM

Emission Unit: 1-PLANT

Process: PTG Emission Source: TK26C

Emission Unit: 1-PLANT

Process: PTG Emission Source:
TK27C

Owner/operator is subject to the following work practice standards:

- 1) The owner/operator shall operate and maintain any affected source in a manner consistent with good air pollution control practices at all times (including during startups, shutdowns, and malfunctions). Malfunctions shall be corrected as soon as practicable. Operation and maintenance requirements established under section 112 of the Act are enforceable independent of emissions limitations or other requirements in relevant standards.
- 2) Determination of whether the operation and maintenance procedures are acceptable will be based on information available to the Administrator which may include, but is not limited to, monitoring results; review of the

operation and maintenance plan, procedures, and records; and inspection of the source. Based on the results of this determination, the Administrator may require that the operation and maintenance plan be revised. Revisions may be required if it is found that the plan does not 1) address a malfunction that has occurred, 2) provide for the operation of the affected source, the air pollution control techniques, or the control system and process monitoring equipment during a malfunction in a manner consistent with good air pollution control practices, or 3) provide adequate procedures for correcting malfunctioning process equipment, air pollution control techniques, or monitoring equipment as quickly as practicable.

3) Owner/operator shall prepare an operation and maintenance (O/M) plan to be implemented no later than the compliance date. The plan shall be incorporated by reference into the source's title V permit, if and when a title V permit is required. The plan shall include the information found in 40 CFR 63.342(f)(3)(i)(A) through (F).

If the O/M plan fails to address an event that meets the characteristics of a malfunction at the time the plan is initially developed, the owner/operator shall revise the O/M plan within 45 days to include procedures for operating and maintaining the process equipment, add-on air pollution control device, or monitoring equipment during similar malfunctions, and a program for corrective actions for such events.

If actions taken by the owner/operator during periods of malfunction are inconsistent with the O/M plan, the actions taken shall be recorded and reported by phone within 2 working days after commencing actions inconsistent with the plan. This report shall be followed by a letter within 7 working days after the end of the event.

The owner/operator shall keep the written O/M plan on record to be available for inspection, upon request, by the Administrator until the source is no longer subject to Subpart N. In addition, if the O/M plan is revised, previous versions shall be kept available for inspection for a period of 5 years.

Condition 1-7: Compliance Demonstration

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Effective between the dates of 02/14/2017 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(f)(3), Subpart N

Item 1-7.1:

The Compliance Demonstration activity will be performed for the Facility.

Item 1-7.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

The Compliance Demonstration applies to:

Emission Unit: 1-PLANT

Process: SCR Emission Source: CHROM

Emission Unit: 1-PLANT

Process: PTG Emission Source: TK26C

Emission Unit: 1-PLANT

Process: PTG Emission Source: TK27C

The owner or operator of an affected source shall prepare an operation and maintenance plan to be implemented no later than the compliance date. L D McCauley LLC submitted an acceptable Operation and Maintenance Plan to the Department on January 30, 2017.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 1-8: Compliance Demonstration

Effective between the dates of 02/14/2017 and 04/20/2025

Applicable Federal Requirement:40CFR 63.343(c)(5), Subpart N

Item 1-8.1:

The Compliance Demonstration activity will be performed for the Facility.

Item 1-8.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

(i) In lieu of establishing the maximum surface tension during the performance test, the owner or operator may accept 40 dynes/cm, as measured by a stalagmometer, or 33 dynes/cm, as measured by a tensiometer, as the maximum surface tension value that corresponds to compliance with the applicable emission limitation. However, the owner or

operator is exempt from conducting a performance test only if the criteria of paragraph (b)(1) of this section are met. For this facility, the criteria of paragraph (b)(1) of this section have been met. The owner or operator has accepted 40 dynes/cm, as measured by a stalagmometer, or 33 dynes/cm, as measured by a tensiometer, as the maximum surface tension value that corresponds to compliance with the applicable emission limitation. Therefore, the surface tension shall be monitored according to the following schedule:

(A) The surface tension shall be measured once every 4 hours during operation of the tank with a stalagmometer or a tensiometer as specified in Method 306B, appendix A of this part.

(B) The time between monitoring can be increased if there have been no exceedances. The surface tension shall be measured once every 4 hours of tank operation for the first 40 hours of tank operation after the compliance date. Once there are no exceedances during 40 hours of tank operation, surface tension measurement may be conducted once every 8 hours of tank operation. Once there are no exceedances during 40 hours of tank operation, surface tension measurement may be conducted once every 40 hours of tank operation on an ongoing basis, until an exceedance occurs. The minimum frequency of monitoring allowed by this subpart is once every 40 hours of tank operation.

(C) Once an exceedance occurs as indicated through surface tension monitoring, the original monitoring schedule of once every 4 hours must be resumed. A subsequent decrease in frequency shall follow the schedule laid out in paragraph (c)(5)(ii)(B) of this section. For example, if an owner or operator had been monitoring an affected source once every 40 hours and an exceedance occurs, subsequent monitoring would take place once every 4 hours of tank operation. Once an exceedance does not occur for 40 hours of tank operation, monitoring can occur once every 8 hours of tank operation. Once an exceedance does not occur for 40 hours of tank operation on this schedule, monitoring can occur once every 40 hours of tank operation.

(iii) Once a bath solution is drained from the affected tank and a new solution added, the original monitoring schedule of once every 4 hours must be resumed, with a decrease in monitoring frequency allowed following the procedures of paragraphs (c)(5)(ii) (B) and (C) of this section.

The owner or operator of an affected source subject to the provisions of this subpart shall maintain the following records for such source:

(1) Inspection records for the add-on air pollution control device, if such a device is used, and monitoring equipment, to document that the inspection and maintenance required by the work practice standards of §63.342(f) and Table 1 of §63.342 have taken place. The record can take the form of a checklist and should identify the device inspected, the date of inspection, a brief description of the working condition of the device during the inspection, and any actions taken to correct deficiencies found during the inspection.

(2) Records of all maintenance performed on the affected source, the add-on air pollution control device, and monitoring equipment, except routine housekeeping practices;

(3) Records of the occurrence, duration, and cause (if known) of each malfunction of process, add-on air pollution control, and monitoring equipment;

(4) Records of actions taken during periods of malfunction to minimize emissions in accordance with §63.342(a)(1), including corrective actions to restore malfunctioning process and air pollution control and monitoring equipment to its normal or usual manner of operation;

(5) Other records, which may take the form of checklists, necessary to demonstrate consistency with the provisions of the operation and maintenance plan required by §63.342(f)(3);

(6) Test reports documenting results of all performance tests;

(7) All measurements as may be necessary to determine the conditions of performance tests, including measurements necessary to determine compliance with the special compliance procedures of §63.344(e);

(8) Records of monitoring data required by §63.343(c) that are used to demonstrate compliance with the standard including the date and time the data are collected;

(9) The specific identification (i.e., the date and time of commencement and completion) of each period of excess emissions, as indicated by monitoring data, that occurs during malfunction of the process, add-on air pollution control, or monitoring equipment;

(10) The specific identification (i.e., the date and time of commencement and completion) of each period of excess emissions, as indicated by monitoring data, that occurs during periods other than malfunction of the process, add-on air pollution control, or monitoring equipment;

(11) The total process operating time of the affected source during the reporting period;

(12) Records of the actual cumulative rectifier capacity of hard chromium electroplating tanks at a facility expended during each month of the reporting period, and the total capacity expended to date for a reporting period, if the owner or operator is using the actual cumulative rectifier capacity to determine facility size in accordance with §63.342(c)(2);

(13) For sources using fume suppressants to comply with the standards, records of the date and time that fume suppressants are added to the electroplating or anodizing bath and records of the fume suppressant manufacturer and product name;

(14) For sources complying with §63.342(e), records of the bath components purchased, with the wetting agent clearly identified as a bath constituent contained in one of the components;

(15) Any information demonstrating whether a source is meeting the requirements for a waiver of recordkeeping or reporting requirements, if the source has been granted a waiver under §63.10(f); and

(16) All documentation supporting the notifications and reports required by §63.9, §63.10, and §63.347.

(c) All records shall be maintained for a period of 5 years in accordance with §63.10(b)(1).

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

(1) Except as provided for in paragraph (2) of this subdivision, the owner or operator of any emission source subject to this Subpart must maintain and, upon request, provide the department with a certification from the coating supplier/manufacture which lists the parameters used to determine the actual VOC content of each as applied coating used at the facility. In addition, purchase, usage and/or production records of the coating material, including solvents, must be maintained in a format acceptable to the department and, upon request, these records must be submitted to the department within 90 days of receiving the request. Any facility required to perform the overall removal efficiency calculation set forth in Equation 2 of section 228-1.5(c) of this Subpart, must maintain records to verify the parameters used in the

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

calculation. A facility owner or operator must maintain a record that identifies each air cleaning device that has an overall removal efficiency of at least 90 percent. Any additional information required to determine compliance with this Part must be provided to the department in a format acceptable to the department. All records required by this paragraph must be maintained at the facility for a period of five years.

(2) Owners and operators of emission sources not subject to this Subpart as set forth in section 228-1.1(b)(9) or (13) of this Subpart, or those sources that are using coatings not subject to specific requirements of this Subpart as set forth in paragraph (e)(2) of this section, or section 228-1.4(b)(5)(iii)(e), (i) or (iv) of this Subpart, must maintain records on an as used basis. The records must include the relevant regulatory citation of each exemption and quantity of coating used. If the exemption criteria are based on VOC usage, the records must contain calculations and supplier/manufacturer material data sheets for verification of VOC usage. All records required by this paragraph must be maintained at the facility for a period of five years.

Condition 8: Compliance Demonstration
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:6 NYCRR 228-1.3 (d)

Item 8.1:

The Compliance Demonstration activity will be performed for:

Emission Unit: 1-PLANT

Item 8.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

Within the work area(s) associated with a coating line, the owner or operator of a facility subject to this Subpart must:

(1) use closed, non-leaking containers to store or dispose of cloth or other absorbent applicators impregnated with VOC solvents that are used for surface preparation, cleanup or coating removal;

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

(2) store in closed, non-leaking containers spent or fresh VOC solvents to be used for surface preparation, cleanup or coating removal;

(3) not use VOC solvents to cleanup spray equipment unless equipment is used to collect the cleaning compounds and to minimize VOC evaporation;

(4) not use open containers to store or dispense surface coatings and/or inks unless production, sampling, maintenance or inspection procedures require operational access. This provision does not apply to the actual device or equipment designed for the purpose of applying a coating material to a substrate. These devices may include, but are not limited to: spray guns, flow coaters, dip tanks, rollers, knife coaters, and extrusion coaters;

(5) not use open containers to store or dispose of spent surface coatings, or spent VOC solvents;

(6) minimize spills during the handling and transfer of coatings and VOC solvents; and

(7) clean hand held spray guns by one of the following:

(i) an enclosed spray gun cleaning system that is kept closed when not in use;

(ii) non-atomized discharge of VOC solvent into a paint waste container that is kept closed when not in use;

(iii) disassembling and cleaning of the spray gun in a vat that is kept closed when not in use; or

(iv) atomized spray into a paint waste container that is fitted with a device designed to capture atomized VOC solvent emissions.

DESCRIPTION

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 15: Part 63 General Provisions requirements

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.340(b), Subpart N

Item 15.1:

This Condition applies to Emission Unit: 1-PLANT Emission Point: 09104
Process: SCR

Item 15.2:

Owners or operators of affected sources subject to 40CFR63 Subpart N must also comply with the requirements of Subpart A of Part 63, according to the applicability of Subpart A to such sources, as identified in Table 1 of Subpart N. Subpart A is the General Provisions for the NESHAP for Source Categories regulations. The General Provisions contain requirements for performance testing, monitoring, notification, recordkeeping, reporting, and control devices that may apply to the source.

Condition 16: Compliance Demonstration

Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.340(e), Subpart N

Item 16.1:

The Compliance Demonstration activity will be performed for:

Emission Unit: 1-PLANT Emission Point: 09104
Process: SCR

Regulated Contaminant(s):
CAS No: 007440-47-3 CHROMIUM

Item 16.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

The Administrator has determined, pursuant to the criteria under section 502(a) of the Act, that an owner or operator of the following types of operations that are not by themselves major sources and that are not located at major sources, as defined under 40CFR70.2, is permanently exempt from title V permitting requirements for that operation:

- (i) Any decorative chromium electroplating operation or chromium anodizing operation that uses fume suppressants as an emission reduction technology; and
- (ii) Any decorative chromium electroplating operation that uses a trivalent chromium bath that incorporates a wetting agent as a bath ingredient.

L.D. McCauley operates a decorative chromium electroplating tank using fume suppressants as the

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

emission control technology. L. D. McCauley is not a major source of emissions. As such, under current operating conditions, L.D. McCauley qualifies for the exemption and is permanently exempt from Title V permitting requirements.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 17: Compliance timeframe
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(a), Subpart N

Item 17.1:

This Condition applies to Emission Unit: 1-PLANT Emission Point: 09104
Process: SCR

Item 17.2:

Each owner or operator of an affected source subject to the provisions of 40CFR63 Subpart N shall comply with the requirements of Subpart N on and after the compliance dates specified in 40CFR63.343(a). All affected sources are regulated by applying maximum achievable control technology.

Condition 18: Compliance Demonstration
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(b)(2), Subpart N

Item 18.1:

The Compliance Demonstration activity will be performed for:

Emission Unit: 1-PLANT Emission Point: 09104
Process: SCR

Regulated Contaminant(s):
CAS No: 007440-47-3 CHROMIUM

Item 18.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

If an owner or operator is controlling a group of tanks with a common add-on air pollution control device, the emission limitations of paragraphs (c), (d), and (e) of this section apply whenever any one affected source is operated. L.D. McCauley utilizes a packed bed scrubber to control emissions from a group of tanks used for chromium, nickel, and zinc plating. However, the add-on

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

control device is not the method used to comply with this chromium standard. The chromium tanks are controlled by utilizing a chemical fume suppressant containing a wetting agent, as indicated in paragraph (d)(2). As such, this section does not apply under current operating conditions. L.D. McCauley will be required to comply with this section when the chemical fume suppressant is no longer used and the chromium emissions are controlled only by the packed bed scrubber.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 19: Compliance Demonstration
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(d)(3), Subpart N

Item 19.1:

The Compliance Demonstration activity will be performed for:

Emission Unit: 1-PLANT
Process: SCR

Emission Point: 09104

Item 19.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

An owner or operator using a chemical fume suppressant containing a wetting agent must not allow the surface tension of the electroplating or anodizing bath contained within the affected tank to exceed 40 dynes/cm as measured by a stalagmometer at any time during tank operation. A compliance report shall be completed annually and retained on-site. This report shall be made available to the Administrator upon request.

Parameter Monitored: SURFACE TENSION

Upper Permit Limit: 40 dynes per centimeter

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Averaging Method: MAXIMUM - NOT TO EXCEED STATED VALUE - SEE MONITORING DESCRIPTION

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 20: Applicability of work practice standards
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(f)(1), Subpart N

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Item 20.1:

This Condition applies to Emission Unit: 1-PLANT Emission Point: 09104
Process: SCR

Item 20.2:

The work practice standards of 40CFR63.342 address operation and maintenance practices. All owners or operators subject to the standards in section 63.342(c) and 63.342(d) are subject to these work practice standards.

At all times, including periods of startup, shutdown, and malfunction, owners or operators shall operate and maintain any affected source, including associated air pollution control devices and monitoring equipment, in a manner consistent with good air pollution control practices, consistent with the operation and maintenance plan required by paragraph (f)(3) of section 63.342.

Malfunctions shall be corrected as soon as practicable after their occurrence in accordance with the operation and maintenance plan required by paragraph (f)(3) of section 63.342.

Operation and maintenance requirements established pursuant to section 112 of the Act are enforceable independent of emission limitations or other requirements in relevant standards.

Condition 21: Acceptable work practices
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.342(f)(2), Subpart N

Item 21.1:

This Condition applies to Emission Unit: 1-PLANT Emission Point: 09104
Process: SCR

Item 21.2:

The work practice standards of Section 63.342 address operation and maintenance practices. All owners or operators subject to the standards in paragraph (c) and (d) of section 63.342 are subject to these work practices.

Determination of whether acceptable operation and maintenance procedures are being used will be based on information available to the Administrator, which may include, but is not limited to, monitoring results; review of the operation and maintenance plan, procedures, and records; and inspection of the source.

Based on the results of a determination made under 63.342(f)(2)(i), the Administrator may require that an owner or operator of an affected source make changes to the operation and maintenance plan required by 63.342(f)(3) for that source. Revisions may be required if the Administrator finds that the plan:

- (A) Does not address a malfunction that has occurred;
- (B) Fails to provide for the operation of the affected source, the air pollution control system and process monitoring equipment during a malfunction in a manner consistent with good air pollution control practices; or

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

reports may be submitted on electronic media.

Condition 24: Notification of compliance status
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.347(e)(1), Subpart N

Item 24.1:

This Condition applies to Emission Unit: 1-PLANT Emission Point: 09104
Process: SCR

Item 24.2:

A notification of compliance status is required each time that an affected source becomes subject to the requirements of 40CFR 63 Subpart N.

Condition 25: Compliance Demonstration
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable Federal Requirement:40CFR 63.347(h)(1), Subpart N

Item 25.1:

The Compliance Demonstration activity will be performed for:

Emission Unit: 1-PLANT Emission Point: 09104
Process: SCR

Regulated Contaminant(s):
CAS No: 007440-47-3 CHROMIUM

Item 25.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

The owner or operator of an affected source that is located at an area source site shall prepare a summary report to document the ongoing compliance status of the affected source. The report shall be completed annually on a calendar year basis and retained on site except as provided in 40CFR63.347(h)(2). The reports shall be made available to the Administrator upon request. The report shall be completed annually except as provided in paragraph 40CFR63.347(h)(2).

The report must contain the following information:

- (1) The company name and address of the affected source;
- (2) An identification of the operating parameter that is monitored for compliance determination, as required by 40CFR63.343(c);

- (3) The relevant emission limitation for the affected source, and the operating parameter value, or range of values, that correspond to compliance with this emission limitation as specified in the notification of compliance status required by paragraph (e) of section 63.347;
- (4) The beginning and ending dates of the reporting period;
- (5) A description of the type of process performed in the affected source;
- (6) The total operating time of the affected source during the reporting period;
- (7) A summary of operating parameter values, including the total duration of excess emissions expressed as a percent of the total source operating time during the reporting period, and a breakdown of the total duration of excess emissions during the reporting period into those that are due to process upsets, control equipment malfunctions, other known causes, and unknown causes;
- (8) A certification by a responsible official, as defined in 40CFR63.2, that the work practice standards in 40CFR63.342(f) were followed in accordance with the operation and maintenance plan for the source;
- (9) If the operation and maintenance plan required by 40CFR63.342(f)(3) was not followed, an explanation of the reasons for not following the provisions, an assessment of whether any excess emission and/or parameter monitoring exceedances are believed to have occurred, and a copy of the report(s) required by 40CFR63.342(f)(3)(iv) documenting that the operation and maintenance plan was not followed;
- (10) A description of any changes in monitoring, processes, or controls since the last reporting period;
- (11) The name, title, and signature of the responsible official who is certifying the accuracy of the report; and
- (12) The date of the report.

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency, as defined by subpart 201-2, constitutes an affirmative defense to penalties sought in an enforcement action brought by the Department for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An emergency occurred and that the facility owner or operator can identify the cause(s) of the emergency;

(2) The equipment at the permitted facility causing the emergency was at the time being properly operated and maintained;

(3) During the period of the emergency the facility owner or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and

(4) The facility owner or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item B: Public Access to Recordkeeping for Facilities With State Facility Permits - 6 NYCRR 201-1.10 (a)

Where facility owners and/or operators keep records pursuant to compliance with the requirements of 6 NYCRR Subpart 201-5.4, and/or the emission capping requirements of 6 NYCRR Subpart 201-7, the Department will make such records available to the public upon request in accordance with 6 NYCRR Part 616 - Public Access to Records.

Facility owners and/or operators must submit the records required to comply with the request within sixty working days of written notification by the Department.

Item C: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5

Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

STATE ONLY APPLICABLE REQUIREMENTS

The following conditions are state only enforceable.

Condition 29: Contaminant List
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable State Requirement:ECL 19-0301

Item 29.1:

Emissions of the following contaminants are subject to contaminant specific requirements in this permit(emission limits, control requirements or compliance monitoring conditions).

CAS No: 001310-73-2
Name: SODIUM HYDROXIDE

CAS No: 007440-02-0
Name: NICKEL METAL AND INSOLUBLE COMPOUNDS

CAS No: 007440-47-3
Name: CHROMIUM

CAS No: 007440-66-6

Name: ZINC

CAS No: 007647-01-0

Name: HYDROGEN CHLORIDE

CAS No: 0NY075-00-0

Name: PARTICULATES

CAS No: 0NY075-00-5

Name: PM-10

Condition 30: Malfunctions and start-up/shutdown activities
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable State Requirement:6 NYCRR 201-1.4

Item 30.1:

(a) The facility owner or operator shall take all necessary and appropriate actions to prevent the emission of air pollutants that result in contravention of any applicable emission standard during periods of start-up, shutdown, or malfunction.

(b) The facility owner or operator shall compile and maintain records of all equipment malfunctions, maintenance, or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the department when requested to do so, or when so required by a condition of a permit issued for the corresponding air contamination source. Such reports shall state whether any violations occurred and, if so, whether they were unavoidable, include the time, frequency and duration of the maintenance and/or start-up/shutdown activities, and an estimate of the emission rates of any air contaminants released. Such records shall be maintained for a period of at least five years and made available for review to department representatives upon request. Facility owners or operators subject to continuous stack monitoring and quarterly reporting requirements need not submit additional reports for equipment maintenance or start-up/shutdown activities for the facility to the department.

(c) In the event that emissions of air contaminants in excess of any emission standard in this Subchapter occur due to a malfunction, the facility owner or operator shall compile and maintain records of the malfunction and notify the department as soon as possible during normal working hours, but not later than two working days after becoming aware that the malfunction occurred. When requested by the department, the facility owner or operator shall submit a written report to the department describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates.

(d) The department may also require the owner or operator to include, in reports described under Subdivisions (b) and (c) of this Section, an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions.

(e) A violation of any applicable emission standard resulting from start-up, shutdown, or malfunction conditions at a permitted or registered facility may not be subject to an enforcement action by the department and/or penalty if the department determines, in its sole discretion, that such a violation was unavoidable. The actions and recordkeeping and reporting requirements listed above must be adhered to in such circumstances.

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Condition 31: Emission Unit Definition
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable State Requirement:6 NYCRR Subpart 201-5

Item 31.1(From Mod 1):

The facility is authorized to perform regulated processes under this permit for:

Emission Unit: 1-PLANT

Emission Unit Description:

This emission unit comprises the entire facility. The processes include polishing (HAR), buffing (TOP), plating/packed scrubbers (SCR and NEW) and the new plating line (PTG).

Building(s): Main

Condition 32: Renewal deadlines for state facility permits
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable State Requirement:6 NYCRR 201-5.2 (c)

Item 32.1:

The owner or operator of a facility having an issued state facility permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the date of permit expiration for permit renewal purposes.

Condition 33: Compliance Demonstration
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable State Requirement:6 NYCRR 201-5.3 (c)

Item 33.1:

The Compliance Demonstration activity will be performed for the Facility.

Item 33.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

Any reports or submissions required by this permit shall be submitted to the Regional Air Pollution Control Engineer (RAPCE) at the following address:

Division of Air Resources
NYS Dept. of Environmental Conservation
Region 9
270 Michigan Ave.
Buffalo, NY 14203

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 34: Visible Emissions Limited
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable State Requirement:6 NYCRR 211.2

Item 34.1:

Except as permitted by a specific part of this Subchapter and for open fires for which a restricted burning permit has been issued, no person shall cause or allow any air contamination source to emit any material having an opacity equal to or greater than 20 percent (six minute average) except for one continuous six-minute period per hour of not more than 57 percent opacity.

****** Emission Unit Level ******

Condition 35: Emission Point Definition By Emission Unit
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable State Requirement:6 NYCRR Subpart 201-5

Item 35.1(From Mod 1):

The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 1-PLANT

Emission Point: 02701
Height (ft.): 30 Diameter (in.): 17
NYTMN (km.): 4743.4 NYTME (km.): 190.7

Emission Point: 02702
Height (ft.): 32 Diameter (in.): 16
NYTMN (km.): 4743.4 NYTME (km.): 190.7

Emission Point: 09104
Height (ft.): 32 Length (in.): 47 Width (in.): 62
NYTMN (km.): 4743.4 NYTME (km.): 190.7

Emission Point: 09109
Height (ft.): 39 Diameter (in.): 42
NYTMN (km.): 4743.4 NYTME (km.): 190.7

Emission Point: 09111
Height (ft.): 37 Diameter (in.): 64
NYTMN (km.): 4743.4 NYTME (km.): 190.7

Emission Point: 09112
Height (ft.): 37 Diameter (in.): 32
NYTMN (km.): 4743.4 NYTME (km.): 190.7

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Emission Point: GASK1
Height (ft.): 20 Diameter (in.): 18
NYTMN (km.): 4743.4 NYTME (km.): 190.7

Emission Point: OVEN1
Height (ft.): 20 Diameter (in.): 8
NYTMN (km.): 4743.4 NYTME (km.): 190.7

Condition 36: Process Definition By Emission Unit
Effective between the dates of 04/21/2015 and 04/20/2025

Applicable State Requirement:6 NYCRR Subpart 201-5

Item 36.1(From Mod 1):

This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-PLANT
Process: PTG
Process Description:

The plating line (Process PTG) includes plating of hexavalent chromium, nickel, and copper. The pollutants emitted from the process include metals (chromium, nickel, and copper), potassium hydroxide, triethanolamine, hydrochloric acid, sulfuric acid, nitric acid, and sodium hydroxide. Ventilation System #1 (Emission Point 09111) includes exhaust from 16 process tanks associated with nickel and copper plating. Tank exhaust is directed to a high efficiency packed bed wet scrubber (SCRB1) to reduce mist and particulate emissions. The tanks connected to this system include: two cleaning tanks (TK002, TK003), two rinse tanks (TK004, TK034) one acid tank (TK007), one nickel strike tank (TK010), one copper electroplating tank (TK014); one activator tank (TK017), four nickel electroplating tanks (TK020, TK021, TK022, TK23A), and two rack strip tank (TK039, TK041). A fume suppressant wetting agent (FMSPR) is used to reduce liquid surface tension in TK010, TK014, TK020, TK021, TK022, and TK23A. Two process tanks (TK23B and TK29A) will remain inactive until the process is modified to allow for trivalent chromium plating. Six exempt storage tanks are also connected to Ventilation System #1. Ventilation System #2 (Emission Point 09112) includes exhaust from sources associated with hexavalent chromium plating, including an activator tank (TK26C), a decorative hexavalent chromium electroplating tank (TK27C), and a chrome evaporator (CHREV). Exhaust is directed to a chrome scrubber with mist eliminator (SCRB2) to reduce mist and particulate emissions. A fume suppressant wetting agent (FMSPR) is used to reduce liquid surface tension in TK26C and TK27C.

Emission Source/Control: FMSPR - Control
Control Type: CHEMICAL FUME SUPPRESSANT - WETTING
AGENT FOR REDUCING SURFACE TENSION

Emission Source/Control: SCRB1 - Control
Control Type: WET SCRUBBER

Emission Source/Control: SCRB2 - Control
Control Type: GAS SCRUBBER (GENERAL, NOT CLASSIFIED)

Emission Source/Control: CHREV - Process

Emission Source/Control: TK002 - Process

Emission Source/Control: TK003 - Process

Emission Source/Control: TK004 - Process

Emission Source/Control: TK007 - Process

Emission Source/Control: TK010 - Process

Emission Source/Control: TK014 - Process

Emission Source/Control: TK017 - Process

Emission Source/Control: TK020 - Process

Emission Source/Control: TK021 - Process

Emission Source/Control: TK022 - Process

Emission Source/Control: TK034 - Process

Emission Source/Control: TK039 - Process

Emission Source/Control: TK041 - Process

Emission Source/Control: TK23A - Process

Emission Source/Control: TK23B - Process

Emission Source/Control: TK26C - Process

Emission Source/Control: TK27C - Process

Emission Source/Control: TK29A - Process

Item 36.2(From Mod 0):

This permit authorizes the following regulated processes for the cited Emission Unit:

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Emission Unit: 1-PLANT

Process: FBS

Process Description:

Fibershield (FBS) manhole cover mold process. The FBS emission sources include five (5) closed mold stations, one (1) gasket station and two (2) curing ovens.

Emission Source/Control: GASK1 - Process

Emission Source/Control: OVEN1 - Process

Item 36.3(From Mod 0):

This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-PLANT

Process: HAR

Process Description:

Emissions from the process identified as HAR, include particles from polishing and buffing of metal parts. The particulate emissions are controlled by a fabric filter identified as 02701 and exhausted through an emission point identified as 02701. The buffing machine associated with the process is identified as BUFF1.

Emission Source/Control: 02701 - Control

Control Type: FABRIC FILTER

Emission Source/Control: BUFF1 - Process

Item 36.4(From Mod 0):

This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-PLANT

Process: NEW

Process Description:

Plating operations including zinc and nickel metals. Emissions from these plating tanks are exhausted through a packed bed scrubber identified as 09109. The exhaust from the scrubber is vented through emission point 09109. The pollutants emitted from this process are heavy metals (zinc and nickel), sodium hydroxide and hydrochloric acid. New wastewater treatment equipment will treat the wastewater generated during the plating operation.

Emission Source/Control: 09109 - Control

Control Type: GAS SCRUBBER (GENERAL, NOT CLASSIFIED)

Emission Source/Control: ZNCNI - Process

Item 36.5(From Mod 0):

This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-PLANT

Process: SCR

Process Description:

Plating operations including zinc, nickel, and chromium metals. Emissions from these plating tanks are exhausted through a packed bed scrubber identified as 09104. The exhaust from the scrubber is vented through emission point 09104. The pollutants emitted from this process are heavy metals (zinc, nickel, chromium), sodium hydroxide and hydrochloric acid. The process equipment associated with this process include two chromium electroplating tanks (CHROM, BLCHR), one chrome evaporator (EVAP1), surface tension fume suppressant used with three nickel tanks and two chromium electroplating tanks (SUPPR), three nickel tanks (NICK1, NICK2, NICK3), one zinc tank (ZINC1), one zinc/nickel tank which is 90% zinc/10% nickel alloy (ZNCNI), a zinc acid tank (ACID1), a nickel chromium acid tank (ACID2), a zinc cleaner tank (WASH1), and two nickel chromium cleaners (WASH2, WASH3).

Emission Source/Control: 09104 - Control
Control Type: GAS SCRUBBER (GENERAL, NOT CLASSIFIED)

Emission Source/Control: SUPPR - Control
Control Type: CHEMICAL FUME SUPPRESSANT - WETTING
AGENT FOR REDUCING SURFACE TENSION

Emission Source/Control: ACID1 - Process

Emission Source/Control: ACID2 - Process

Emission Source/Control: BLCHR - Process

Emission Source/Control: CHROM - Process

Emission Source/Control: EVAP1 - Process

Emission Source/Control: NICK1 - Process

Emission Source/Control: NICK2 - Process

Emission Source/Control: NICK3 - Process

Emission Source/Control: WASH1 - Process

Emission Source/Control: WASH2 - Process

Emission Source/Control: WASH3 - Process

Emission Source/Control: ZINC1 - Process

Emission Source/Control: ZNCNI - Process

Item 36.6(From Mod 0):

This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-PLANT

Process: TOP

Process Description:

Emissions from the process identified as TOP, include particles from polishing and buffing of metal parts. The particulate emissions are controlled by a fabric filter identified as 02702. The exhaust from the fabric filter is vented through emission point 02702. The buffing processing equipment is identified as BUFF2.

Emission Source/Control: 02702 - Control

Control Type: FABRIC FILTER

Emission Source/Control: BUFF2 - Process

Condition 1-15: Compliance Demonstration
Effective between the dates of 02/14/2017 and 04/20/2025

Applicable State Requirement:6 NYCRR 212-2.1 (a)

Item 1-15.1:

The Compliance Demonstration activity will be performed for:

Emission Unit: 1-PLANT

Process: PTG

Item 1-15.2:

Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

For an air contaminant listed in Section 212-2.2 Table 2 – High Toxicity Air Contaminant List, of this Part, the facility owner or operator shall demonstrate compliance with the air cleaning requirements for the HTAC as specified in Subdivision 212-2.3(b), Table 4 – Degree of Air Cleaning Required for Non-Criteria Air Contaminants.

For an HTAC assigned an Environmental Rating of A and has an Emission Rate Potential (ERP) of less than 0.1 pound per hour and annual mass emissions of a persistent and bioaccumulative compound less than the PB Trigger, the owner or operator is required to meet the short term and annual guideline concentration at the fence line of the facility.

New York State Department of Environmental Conservation

Permit ID: 9-1460-00032/00015

Facility DEC ID: 9146000032

Monitoring Frequency: ONCE DURING THE TERM OF THE PERMIT

Averaging Method: ANNUAL TOTAL

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY
