Development Project  
431-441 Concord Avenue  
Bronx, New York 10455

May 2025

SITE No. C203177  
NYSDEC REGION 2

## Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate the 431-441 Concord Avenue Development Project site ("site") located at 431-441 Concord Avenue, Bronx County. Please see the map for the site location.

**Draft Investigation Work Plan:** The draft investigation work plan, called a "Remedial Investigation Work Plan," (RIWP) was submitted to NYSDEC under New York's Brownfield Cleanup Program. The investigation will be performed by Concord Developments Housing Development Fund Corporation ("applicant") with oversight by NYSDEC and the New York State Department of Health (NYSDOH).

**How to Comment:** NYSDEC is accepting written comments about the Draft RIWP for 30 days, from **May 21 through June 20, 2025**.

- Access the RIWP and other project documents online through the DECinfo Locator:  
<https://extapps.dec.ny.gov/data/DecDocs/C203177/>
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

**Highlights of the Proposed Site Investigation:** The investigation will define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected.

Previous investigations have detected volatile and semi-volatile organic compounds (VOCs and SVOCs), metals in soil and/or soil vapor on site.

Key components of the investigation work include:

- Drilling and sampling of soil borings to identify possible on-site sources of contamination;
- Collecting soil vapor and outdoor air samples; and
- Installing and sampling ground water wells to monitor impacts from areas of concern both on-site and off-site.

# BROWNFIELD CLEANUP PROGRAM

**Next Steps:** NYSDEC will consider public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to NYSDEC that summarizes the results. NYSDEC will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a proposed cleanup plan, called a "Draft Remedial Action Work Plan" will be developed. The cleanup plan will include an evaluation of the proposed site actions, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

**Site Description:** The 431-441 Concord Avenue Development Project consists of one tax lot (Block 2578, Lot 15) and is located in an urban area of the Mott Haven section of Bronx, New York. The Site is located on the western side of Concord Avenue, between East 145th Street to the north and East 144th Street to the south. The Site comprises approximately 16,750 square feet. There is one single-story auto repair building on the north portion of the Site, with the balance of the lot vacant and covered with vegetation.

The Applicant plans to build a 10-story mixed-use residential building with planned affordable housing.

Additional site details, including environmental and health assessment summaries, are available on

NYSDEC's Environmental Site Remediation Database (by entering the site ID, C203177) at:

<https://extapps.dec.ny.gov/cfm/extapps/derexternal/index.cfm?pageid=3>

**Brownfield Cleanup Program:** New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:
