

McKenzie Mountain Wilderness - Baker Mountain

Baker Mountain (2,457 feet) is the most popular hike in the wilderness. The trail extends 0.9 mile and ascends nearly 900 feet from the trailhead to the summit. Overlooks near the summit provide a more than 180 degree view to the east, south and west. It is considered one of the best views in the Adirondacks for the effort that is required.
NOTE: Be aware there are many informal paths that branch of the trail
