

Debar Mountain Wild Forest - Debar Mountain Trail

Debar Mountain Trail extends 3.7 miles and ascends 1,725 feet from the trailhead within Meacham Lake Campground to the summit of the mountain (3,305 feet). The trail ascends only 170 feet in the first 1.9 miles and ascends 755 feet in the next 1.3 miles. The last portion of the trail is steep, climbing 800 feet in the 0.5 mile to the summit. A lean-to is located along the trail just before the last steep section to the summit. Views at the top are limited by the trees growing on the summit but include the High Peaks to the south. When the campground is open, hikers are required to pay a day-use fee.
