The NYS Department of Environmental Conservation (DEC) is encouraging stakeholder participation to provide a collaborative effort in the development of a comprehensive set of revisions to the entire series of pesticides regulations contained in Parts 320 through 329. This will facilitate compliance with revisions to the Federal Certification of Pesticide Applicators rule that was finalized by US Environmental Protection Agency (EPA), effective March 6, 2017. All states are required to submit their new certification and training plans, incorporating these revisions, to EPA by March 6, 2020.

Feel free to contact the DEC at pestregs@dec.ny.gov if you have any general questions regarding this process. When providing your suggestions, please note which topic area(s) that are referenced.

Topic Areas:

- Certification & Training,
- Business Registrations & Commercial Permits
- Pesticide Use
- Minimum Risk Pesticides
- Aquatics (Email: AQPestregs@dec.ny.gov)

Please note that there will be additional opportunities to express your comments or concerns regarding these revisions as we move forward with our process.
