DER	Division of Environmental Remediation
DMM	Division of Materials Management
ILI	Inactive Landfill Initiative
NYS MCL	New York State maximum contaminant level
NYSDEC	New York State Department of Environmental Conservation
NYSDOH	New York State Department of Health
PFAS	per- and polyfluoroalkyl substances
PFOA	perfluorooctanoic acid
PFOA+PFOS	the sum of perfluorooctanoic acid and perfluorooctanesulfonic acid
PFOS	perfluorooctanesulfonic acid
POET	point-of-entry treatment
ppb	parts per billion
ppt	parts per trillion

# Executive Summary

The Clean Water Infrastructure Act of 2017 included the addition of Title 12 (Mitigation and Remediation of Certain Solid Waste Sites and Drinking Water Contamination) to Article 27 of the Environmental Conservation Law. Title 12 authorized the New York State Department of Environmental Conservation (NYSDEC) to conduct preliminary investigations of sites to assess ongoing or potential impacts to drinking water sources, and to further investigate sites to further define necessary mitigation and remediation, if any. Title 12 also provides authorization to NYSDEC, along with New York State Department of Health (NYSDOH) and individual solid waste site owners/operators, to undertake mitigation and remediation of sites or areas deemed necessary for the protection of a public drinking water supply.

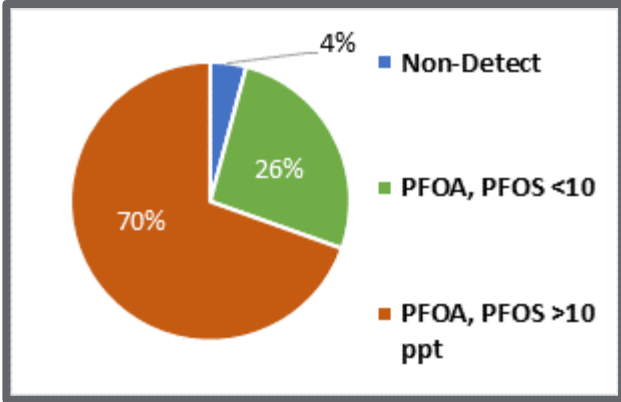

Under Title 12, NYSDEC has focused on inactive solid waste disposal sites, and their potential impact on New York’s drinking water supply with an emphasis on emerging contaminants, including per- and polyfluoroalkyl substances (PFAS) and 1,4-dioxane. Implementation and management of activities conducted under Title 12, referred to as the Inactive Landfill Initiative (ILI) Program, are being conducted by the NYSDEC Division of Materials Management (DMM).

The initial report documenting findings of the ILI Program was finalized in May 2021 ([https://www.dec.ny.gov/docs/materials\\_minerals\\_pdf/inactivelandfills2021.pdf](https://www.dec.ny.gov/docs/materials_minerals_pdf/inactivelandfills2021.pdf)). Per the requirements of Title 12, an annual update to this initial Report is to be prepared. The purpose of this Report is to provide updated findings and results since May 2021.

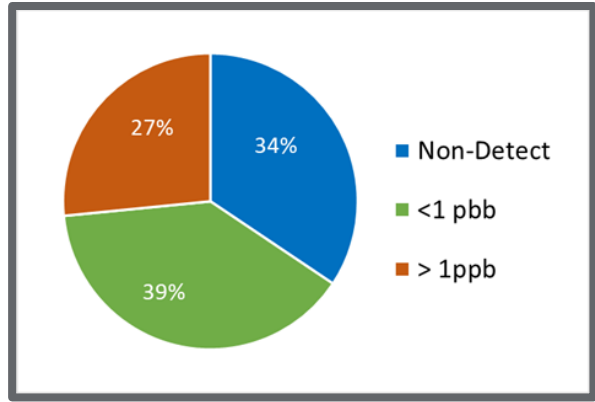

The following Table ES.1 summarizes ongoing and completed activities as of April 30, 2022 under the ILI Program.

<b>Table ES.1: Summary of Ongoing and Completed Activities within the ILI Program</b>	
Inactive Landfills Identified	<b>1,923</b>
Inactive Landfills Inspected & Ranked	<b>1,884*</b>
Groundwater Investigations Identified / Prioritized	<b>895</b>
Groundwater Investigations Completed	<b>385</b>
Groundwater Investigations Being Advanced Under Different Programs (e.g., DER, Post-Closure Permits)	<b>73</b>
Groundwater Investigations Upcoming / In Progress	<b>437</b>
Monitoring Wells Installed	<b>866</b>
Landfill Groundwater Samples Collected for Laboratory Analysis	<b>4,119</b>
Drinking Water Supply Property Owners Canvassed	<b>2,164</b>
Drinking Water Supply Samples Collected for Analysis from Responsive Owners	<b>1,129</b>
* - Remaining 39 landfills are in the process of negotiating access or were recently added	

Overall, the results of the investigation activities have shown that the presence of PFAS compounds in groundwater near inactive landfill facilities is relatively common. Two PFAS compounds of concern for this Program are perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), due to their association with increased cancer risk and other health impacts. Levels of PFOA and/or PFOS in groundwater were found at concentrations exceeding the New York State maximum contaminant levels (NYS MCLs) in drinking water (10 parts per trillion [ppt] for each of PFOA and PFOS) at 70 percent of the 385 landfills investigated as of April 30, 2022 (Figure ES.1).

**Figure ES.1: Maximum PFOA / PFOS Concentrations in Groundwater at Sampled Inactive Landfills**

**Figure ES.2: Maximum 1,4-Dioxane Concentrations in Groundwater at Sampled Inactive Landfills**

Comparatively, the results of the investigation activities conducted under the ILI Program show a less frequent distribution of 1,4-dioxane in groundwater. As shown in the Figure ES.2, 1,4-dioxane was found at levels exceeding the NYS MCL (1 ppb) at 27 percent of the landfills. Comparison of these statistics to those presented in the May 2021 report shows that there continues to be a strong potential association of PFOA/PFOS and 1,4-dioxane with the inactive landfill sites investigated under this Program.

When encountered, landfill sites with concentrations of these emerging contaminants exceeding the NYS MCLs have been prioritized for immediate mitigation of any potential impacts to downgradient sources of drinking water.

The process for conducting sampling at potential receptor points (e.g., private and public drinking water supply wells) was initiated in the vicinity of inactive landfill sites where concentrations in groundwater samples exceeded the NYS MCLs for PFOA, PFOS, and/or 1,4-dioxane.

Table ES.2 presents key statistics pertaining to the potential receptor sampling that has been conducted as of April 30, 2022 under the ILI Program. This table outlines the number of drinking water receptors canvassed for sampling, the number sampled based on responsiveness, and an overview of the analytical results. The NYSDOH reviews water supply results, communicates results to owners, and develops recommendations for further actions for each location. The NYSDEC and NYSDOH act quickly whenever contaminants are found above acceptable levels, and advance appropriate response actions including the installation of point-of-entry treatment (POET) systems, supplying an alternative source of drinking water (such as bottled water) or additional monitoring.

Table ES.2: Drinking Water Supply Sampling Summary	
Total Water Supply Sources Solicited	2164
Water Supply Sources Sampled*	1129
PFOA and PFOS Not Detected	679
PFOA and PFOS Less Than 10 ppt	282
PFOA and/or PFOS Greater Than 10 ppt	165
1,4 Dioxane Not Detected	250
1,4-Dioxane Detected, Less Than 1 ppb	203
1,4-Dioxane Greater Than 1 ppb	27
* - Based on results of groundwater investigations at each landfill, both PFOA/PFOS and 1,4 dioxane were not sampled at all locations	

In addition to the 385 sites investigated as of April 30, 2022, 437 additional sites identified for groundwater investigation are in the process of being completed in 2022. In addition, water supply source sampling is being initiated at a minimum of 66 more sites in 2022. An investigation priority list included in this report outlines the prioritization and schedule for additional site investigations to be initiated based on the site ranking and other critical factors.

The results of the inactive landfill groundwater investigations completed as of April 30, 2022 continue to demonstrate that some inactive solid waste disposal sites have impacted drinking water sources. Furthermore, results continue to show that detectable levels of emerging contaminants have been found in some private wells in the vicinity of several of these sites, above existing criteria. At these locations, the NYSDEC initiated immediate response in accordance with recommendations from NYSDOH. Impacted sites identified have been elevated to the Solid Waste Site Mitigation and Remediation Priority List presented within this update. Included in this list are intended additional actions to further assess the impacts to certain drinking water supplies and to establish a plan to remediate and/or mitigate the impacts. Implementation of this plan has been initiated on an expedited basis, to mitigate promptly and efficiently any impacts on drinking water supplies potentially caused by these sites.

Table ES.3 below outlines the anticipated schedule for the initiation of additional groundwater investigations under the ILI Program, based on site ranking described in the May 2021 report.

<b>Table ES.3: Schedule for Initiation of Future Groundwater Investigations Under the ILI Program</b>		
<b>Year</b>	<b>Activity</b>	<b>No. of Sites</b>
Current	• Site field investigations underway	437* sites
	• Conduct mitigation / remediation evaluations for highest priority sites	38+ sites
2023	• Initiate investigations for Sites ranked 43-45	163 sites
	• Conduct mitigation / remediation evaluations for highest priority sites	**
	• Implement mitigation / remediation measures for highest priority sites as warranted	**
2024	• Initiate investigations for Sites ranked 40-42	174 sites
	• Continue mitigation / remediation evaluations for highest priority sites	**
	• Continue implementation of mitigation / remediation measures for highest priority sites as warranted	**
2025	• Initiate investigations for Sites ranked 40-42	155 sites
	• Continue mitigation / remediation evaluations for highest priority sites	**
	• Continue implementation of mitigation / remediation measures for highest priority sites as warranted	**
TBD	Potential future investigation list Sites beyond 2025	505 sites
TBD	Sites not yet inspected/ranked due to access	39 sites
* - Not including 73 sites being advanced under a separate program		
** - Quantity of sites included in these activities will be determined based on future investigation results		

Based on a statistical analysis conducted on the data collected to date in support of the development of this schedule, it is anticipated that the ILI Program will investigate and characterize a large majority of the higher priority sites by 2025. While conducting these investigations, mitigation and/or remediation will continue to be advanced for inactive sites that have the potential to impact drinking water sources. It is also anticipated that the evaluation and implementation of mitigation and/or remediation measures at any identified high priority sites would be conducted on an expedited schedule.

# 1.0 PROGRAM INTRODUCTION

## 1.1 Title 12 Summary

---

The Clean Water Infrastructure Act of 2017 included the addition of Title 12 (Mitigation and Remediation of Certain Solid Waste Sites and Drinking Water Contamination) to Article 27 of the Environmental Conservation Law. Title 12 authorizes the New York State Department of Environmental Conservation (NYSDEC) to conduct preliminary investigations of sites to assess ongoing or potential impacts to drinking water sources, and to further investigate sites to further define necessary mitigation and remediation, if any. Title 12 also provides authorization to NYSDEC, along with New York State Department of Health (NYSDOH) and individual solid waste site owners/operators, to undertake mitigation and remediation of sites or areas deemed necessary for the protection of a public drinking water supply. Consistent with the requirements of Title 12, this annual update report includes the priority list of all known inactive solid waste disposal sites in the state and includes a comprehensive plan designed to mitigate and/or remediate solid waste sites by NYSDEC direct action.

Under Title 12, NYSDEC has focused on inactive solid waste disposal sites, primarily landfills, and their potential impact on New York's drinking water supply with an emphasis on emerging contaminants, including per- and polyfluoroalkyl substances (PFAS) and 1,4-dioxane. These compounds are human-made chemicals that have been widely used in industrial and commercial processes, in commercial and residential products (e.g., firefighting foams, carpeting, waterproof clothing), and are now being found in groundwater and drinking water sources across the United States.

Increased knowledge and awareness of these compounds within the environment, and the potential risks to human health, have resulted in the development of new health advisories and standards by numerous federal and state agencies within the United States. In 2020, MCLs of 10 ppt each for PFOA and PFOS, and 1 ppb for 1,4-dioxane in drinking water were promulgated in New York. The NYS MCL for 1,4-dioxane represented the first drinking water standard for the chemical within the United States.

Implementation and management of activities conducted under Title 12, referred to as the Inactive Landfill Initiative (ILI) Program, are being conducted by the NYSDEC Division of Materials Management.

## 1.2 ILI Program Summary

---

The ILI Program encompasses efforts undertaken by NYSDEC to inventory and evaluate all known inactive landfills within New York state for potential drinking water and/or groundwater impacts. The overall goal of the ILI Program is to identify, mitigate, and remediate any solid waste site causing or contributing to impairments of drinking water quality which may impact public health, and to establish and maintain the Solid Waste Site Mitigation and Remediation Priority List and a comprehensive plan to mitigate and remediate impacted sites. This priority list represents the solid waste sites and inactive landfills that have been shown, through the results of the activities conducted within this ILI Program, to impact drinking water sources.

The initial report documenting findings of the ILI Program was finalized in May 2021 ([https://www.dec.ny.gov/docs/materials\\_minerals\\_pdf/inactivelandfills2021.pdf](https://www.dec.ny.gov/docs/materials_minerals_pdf/inactivelandfills2021.pdf)). Per the requirements of Title 12, an annual update to the May 2021 report is to be prepared, with the purpose of providing updated findings and results.

This Annual Update Report documents the findings and results of the inactive landfill groundwater investigations as of April 30, 2022.

## 1.3 Program Execution

Execution strategy for the ILI Program was described in the May 2021 report. Program activities have continued into 2022, and key metrics and activities completed to date are summarized in Table 1.1 below.

<b>Table 1.1: Summary of Ongoing and Completed Activities within the ILI Program</b>	
Inactive Landfills Identified	<b>1,923</b>
Inactive Landfills Inspected & Ranked	<b>1,884*</b>

Groundwater Investigations Completed	<b>385</b>
Groundwater Investigations Being Advanced Under Different Programs (e.g., DER, Post-Closure Permits)	<b>73</b>
Groundwater Investigations Upcoming / In Progress	<b>437</b>
Monitoring Wells Installed	<b>866</b>
Landfill Groundwater Samples Collected for Laboratory Analysis	<b>4,119</b>
Drinking Water Supply Property Owners Canvassed	<b>2,164</b>
Drinking Water Supply Samples Collected for Analysis from Responsive Owners	<b>1,129</b>
* - Remaining 39 landfills are in the process of negotiating access or were recently added	

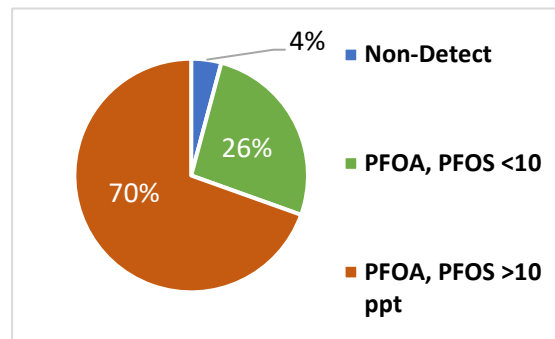

# 2.0 PROGRAM RESULTS / STATUS

As of April 30, 2022, 895 sites were identified for groundwater investigation, of which 385 have been completed. The groundwater investigation results were evaluated for comparison to Class GA Water Quality Criteria, and to the New York State maximum contaminant levels (NYS MCLs) for perfluorooctanoic acid (PFOA), perfluorooctanesulfonic acid (PFOS), and 1,4-dioxane. Detailed discussion of results for groundwater and drinking water sampling are presented herein.

## 2.1 Groundwater Sampling Results

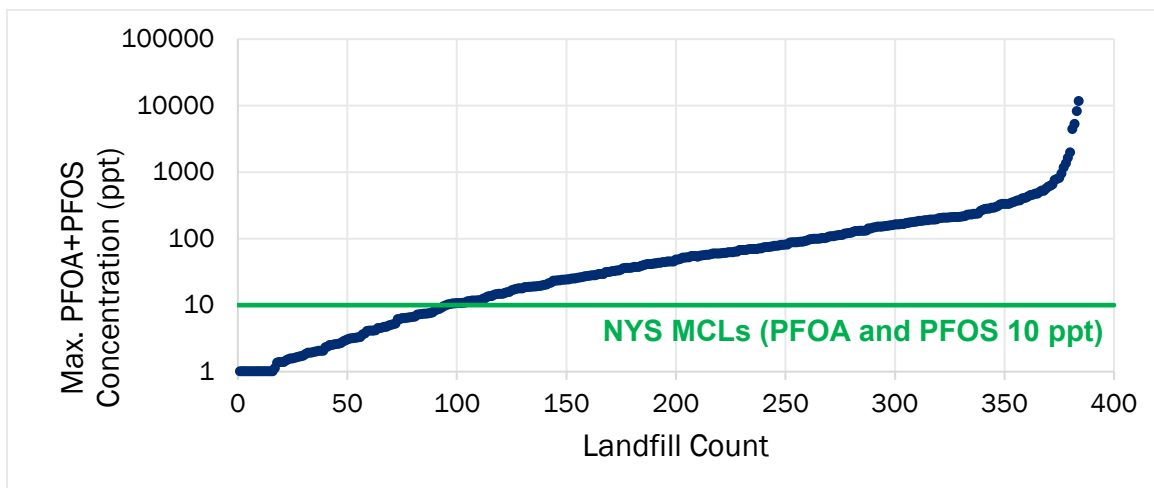

Figure 2.1 presents an updated summary of the findings of the 385 groundwater investigations completed as of April 30, 2022. As shown, maximum levels of PFOA and/or PFOS in groundwater at concentrations exceeding the NYS MCLs (PFOA and/or PFOS greater than [ $>$ ] 10 ppt) were found at 70 percent of the landfills investigated. This represents a slight decrease since the May 2021 report (71 percent).

**Figure 2.1: Maximum PFOA / PFOS Concentrations in Groundwater at Sampled Inactive Landfills**

Figure 2.2 presents the maximum levels of the sum of PFOA and PFOS (PFOA+PFOS) concentrations in groundwater at the landfills investigated in the ILI Program, demonstrating the range of results.

The concentrations shown in Figure 2.2 are for landfill groundwater. The NYS MCLs for drinking water values have been used while groundwater standards for these emerging contaminants are being developed. In addition, attached Figures 2.3 and 2.4 (see end of Section 2) present the PFOA and/or PFOS data on both a state-wide and regional basis.

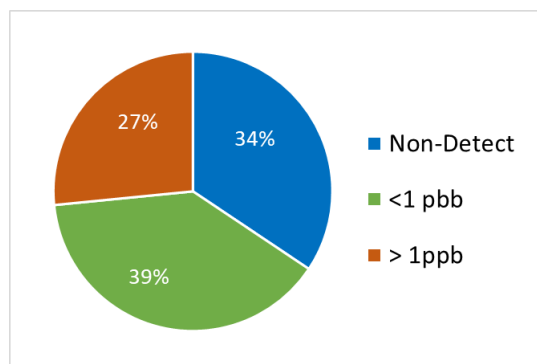

**Figure 2.2: Range of Maximum PFOA + PFOS Concentrations in Groundwater at Sampled Inactive Landfills**

Comparatively, the results of the groundwater investigations conducted at landfills under the ILI Program as of April 30, 2022 continue to show a less-frequent distribution of 1,4-dioxane in groundwater. As shown in Figure 2.5, 1,4-dioxane was not found above the detection limit at approximately 34 percent of the landfills investigated. Overall, 1,4-dioxane was found at levels exceeding the NYS MCL (1 ppb) at 27 percent of the landfills investigated. This represents a slight increase since the May 2021 report (26 percent).

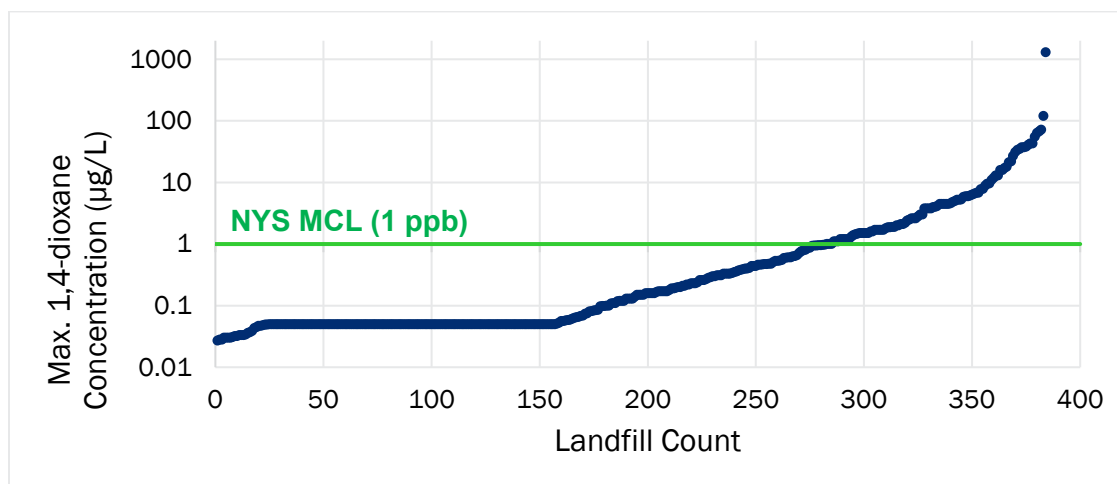

Typical leachate parameters continue to be commonly detected through site groundwater investigations. Additionally, comparison of upgradient to downgradient conditions have continued to indicate that the source of groundwater impacts found are predominately due to the inactive landfills investigated, as opposed to an unidentified background source

Figure 2.6 presents the maximum 1,4-dioxane concentrations at the landfills investigated, demonstrating the range of results. In addition, attached Figures 2.7 and 2.8 (see end of Section 2) show these results presented on a state-wide and regional basis.

In comparison of these statistics to those presented in the May 2021 report, there continues to be a strong potential correlation of PFOA, PFOS and/or 1,4-dioxane with the inactive landfill sites investigated under this Program. Typical leachate parameters continue to be commonly detected through site groundwater investigations. Additionally, comparison of upgradient to downgradient conditions have continued to indicate that the source of groundwater impacts found are predominately due to the inactive landfills investigated, as opposed to an unidentified background source.

**Figure 2.5: Maximum 1,4-Dioxane Concentrations in Groundwater at Sampled Inactive Landfills**

**Figure 2.6: Range of Maximum 1,4-Dioxane Concentrations in Groundwater at Sampled Inactive Landfills**

## 2.2 Drinking Water Sampling Results

As of April 30, 2022, drinking water sampling was conducted in the vicinity of 159 sites under the ILI Program, which included the canvassing of nearly 2,200 private drinking water supply wells. The key statistics pertaining to the drinking water sampling are presented in Table 2.1. This table outlines the number of private residences canvassed for sampling, the number of residences sampled based on responsiveness, and an overview of the analytical results. Based on the groundwater investigation results as of April 30, 2022, drinking water sampling is being planned for at least an additional 66 sites, which will encompass the canvassing of hundreds of additional private drinking water supply wells.

As of April 30, 2022, 165 of the private drinking water wells sampled under the ILI Program have exceeded the NYS MCLs for PFOA and/or PFOS, and 27 exceeded the NYS MCL for 1,4-dioxane.

Total Water Supply Sources Solicited	2164
Water Supply Sources Sampled*	1129
PFOA and PFOS Not Detected	679
PFOA and PFOS Less Than 10 ppt	282
PFOA and/or PFOS Greater Than 10 ppt	165
1,4 Dioxane Not Detected	250
1,4-Dioxane Detected, Less Than 1 ppb	203
1,4-Dioxane Greater Than 1 ppb	27

\* - Based on results of groundwater investigations at each landfill, both PFOA/PFOS and 1,4 dioxane were not sampled at all locations

## 2.3 Sites Referred to State Superfund Program

Following the receipt of data from site groundwater investigations, the results were reviewed by NYSDEC to determine whether further investigations or actions were warranted, and the most appropriate regulatory mechanisms through which actions should be completed. As of April 30, 2022, pursuant to Environmental Conservation Law section 27-1203(5), it was determined that the elevated levels of PFOA, PFOS and/or 1,4-dioxane found at 32 sites warranted transfer to the NYSDEC Division of Environmental Remediation (DER) for further action. Under this referral, the sites will be evaluated by DER as Class P sites, in consultation with NYSDOH, to determine whether any of these sites pose a significant threat to public health or the environment. The Class P classification is used for sites where preliminary information indicates that a site may have contamination that makes it eligible for consideration for placement on the Registry of Inactive Hazardous Waste Disposal Sites (commonly referred to as the list of State Superfund Sites). Further details pertaining to sites referred are discussed in Section 3 of this report.

## 2.4 Ongoing ILI Activities

### 2.4.1 Remaining Investigation List Sites

As of April 30, 2022, 385 of the 895 sites identified for groundwater investigation have been completed. An additional 437 sites are in various stages of planning and investigation and targeted for completion in 2022. For many of these, investigation plans are being developed, and once access is secured, site investigations will proceed. Results of these groundwater investigations will be used to identify subsequent actions, as warranted, consistent with the procedures described in Section 2 of this report.

### 2.4.2 Remaining Drinking Water Sampling Sites

Of the sites for which a groundwater investigation has been completed as of April 30, 2022, the groundwater analytical results at 275 sites warranted consideration of drinking water sampling. Of those 275 sites, 225 have downgradient potential receptors that have been identified, with the remaining 50 sites having no nearby potential receptors. As of April 30, 2022, drinking water sampling has been performed at 159 of those 225 sites. For the remaining sites, focus lists are either in development or sampling is pending. For

these remaining sites, completion of the drinking water sampling has been prioritized and fast-tracked by NYSDEC and NYSDOH to be completed as rapidly as possible.

### 2.4.3 Completed Investigation List Sites

Following receipt of the analytical results from the drinking water sampling, NYSDOH reviewed and disseminated the data to property owners and conveyed recommendations to NYSDEC. Recommendations generally consisted of:

- 1) no further action required
- 2) periodic resampling/monitoring
- 3) mitigative measures such as a POET system

For drinking water supply locations for which periodic resampling/monitoring was recommended, the resampling is being completed under the ILI Program and will continue in consultation between NYSDEC and NYSDOH. For residential locations for which the installation of POET systems was recommended, DER has been engaged to complete the system installations.

Overall, for completed investigation list sites, site-specific recommendations have been developed based on the analytical results from site groundwater sampling and drinking water sampling (if applicable). The process by which these recommendations are developed and applied is discussed in Section 3.

# 3.0 CONCLUSIONS AND RECOMMENDATIONS

This section summarizes the specific recommendations for the continuation of the ILI Program and further steps that are recommended based on the results received as of April 30, 2022.

## 3.1 Assessment of Overall Potential Risk to Drinking Water Sources

---

The primary objectives of the ILI Program, as outlined in Title 12, are:

- Objective 1: Assess the potential risk that inactive landfills within New York state pose to drinking water resources.
- Objective 2: Develop a priority list of sites requiring remediation and/or mitigation.

Overall, groundwater at landfills containing concentrations of PFOA and/or PFOS exceeding the NYS MCLs was found at 70 percent of the landfills investigated under the ILI Program as of April 30, 2022. The presence of 1,4-dioxane was less frequent, with groundwater containing 1,4-dioxane in exceedance of the NYS MCL at 27 percent of the landfills investigated as of April 30, 2022.

Pertaining to Objective 1, the results of the inactive landfill groundwater investigations completed as of April 30, 2022 have continued to establish that inactive landfills do have the potential to impact drinking water sources, and that detectable levels of emerging contaminants above criteria have been found in a small number of private drinking water wells in the vicinity of these sites. Based on these findings and trends, the ILI Program, including expansion of the site investigations, will continue.

Pertaining to Objective 2, specific recommendations for the sites investigated as of April 30, 2022 and for the initiation of investigations at additional sites are outlined in this section.

## 3.2 Solid Waste Site Mitigation and Remediation Priority Recommendations

---

Based on the results from groundwater and subsequent drinking water sampling that has been conducted at sites completed to date, site-specific recommendations for additional steps (e.g., further investigation, monitoring, remediation/mitigation) have been developed for each site. These recommendations are summarized in the attached Table A.1. As of April 30, 2022, recommendations have been developed for 319 sites. Recommendations for an additional 66 sites were pending completion by the end of 2022 of the potential receptor sampling, and 437 sites were pending completion of the initial groundwater investigation. The Solid Waste Site Mitigation and Remediation Priority List will be regularly updated to reflect the completion of additional investigation list sites (groundwater investigations and downgradient potential receptor sampling) and to reflect any subsequent mitigation and/or remediation actions taken.

Overall, these sites fall into one of four priority groups with respect to PFOA, PFOS, and/or 1,4-dioxane. Detailed discussion of these Groups was provided in the May 2021 Report, and can be summarized as follows:

- Group 1 - Landfills with exceedances of criteria both in on-site groundwater and in downgradient drinking water sampling

Group 2 - Landfills with exceedances of criteria in on-site groundwater but no exceedances of criteria in downgradient drinking water sampling

Group 3 - Landfills with exceedances of criteria in on-site groundwater but no potential downgradient receptors present

Group 4 - Landfills determined to have no further actions required at this time

Specific recommendations have been made for landfill sites where groundwater and/or drinking water investigations have been completed. These recommendations are presented graphically in Figure 3.1. Recommendations for specific sites are included in the attached Table A.1.

### 3.3 Mitigation and Remediation Planning

As described in Section 2.4, specific actions are being taken immediately at water supply sources when warranted. To date, these actions have included mitigation measures (e.g., POET system installation), continued monitoring, or no further action, and are being implemented on an ongoing basis.

As sites are added to the Mitigation and Remediation Priority List, they are being evaluated to determine what mitigation and/or remediation steps are warranted and effective for the observed impacts. These evaluations have initially been focused on sites in Priority Group 1, where impacts to public or private drinking water supplies have been observed. For these sites, a detailed multi-step assessment is conducted, including additional site investigation activities to further define the nature and extent of groundwater impacts, and engineering evaluations to identify the best mitigation and/or remediation option for the site. For sites within Priority Group 1 which have been referred to the State Superfund Program, site evaluations will be conducted by DER under the guidance of the New York State Superfund Program. For the remaining sites in Priority Group 1, site evaluations are anticipated to be conducted under the direction of NYSDEC Division of Materials Management. As future site investigations identify additional sites to be included in Priority Group 1, detailed site evaluations will be initiated for these sites as well. Additionally, these evaluations are anticipated to extend to lower priority groups in the future.

### 3.4 Budget Allocation

Under the initial provisions of Title 12, a total of twenty five million dollars allocated for the implementation of the ILI program, for the purposes of establishing the Program and conducting site investigations. Table 3.1 below summarizes the approximate budget spend, by New York State fiscal year, through the end of the 2021-22 fiscal year. Table 3.1 also summarizes the completion of groundwater investigation sites by year, as measured by the completion of groundwater data validation. This site completion status does not account for ensuing drinking water sampling that may have been required, or other ongoing activities.

	2017-18	2018-19	2019-20	2020-21	2021-22	Total through FY 2021-22*
Budget Spent	\$1,820,000	\$4,240,000	\$4,440,000	\$5,240,000	\$5,140,000	<b>\$20,880,000</b>
Sites Completed	24	73	70	109	79	<b>355</b>
* - Total sites completed does not account for 30 sites completed to date in FY 2022-23						

Under revisions to Title 12 finalized in April 2022, the allocation allowance for the ILI program was raised to fifty million dollars for the continuance of site investigations and associated activities. Under this increased funding allocation, and based on historical spending trends (estimated at five million per year) which are anticipated to continue, it is estimated that the ILI program will continue through the 2027-28 fiscal year.

### 3.5 Future ILI Activities and Schedule

Based on the results of the investigations completed as of April 30, 2022, as presented within this update, investigations will continue and will be expanded to include additional sites.

Table A.2 (attached) identifies the Solid Waste Site Investigation Priority List which outlines the prioritization of additional site investigations, by year, based primarily on the site ranking. A summary of recommended investigation sites, by year, is provided below in Table 3.1. The initiation of additional investigations annually is outlined, according to the ranking ranges presented for each year.

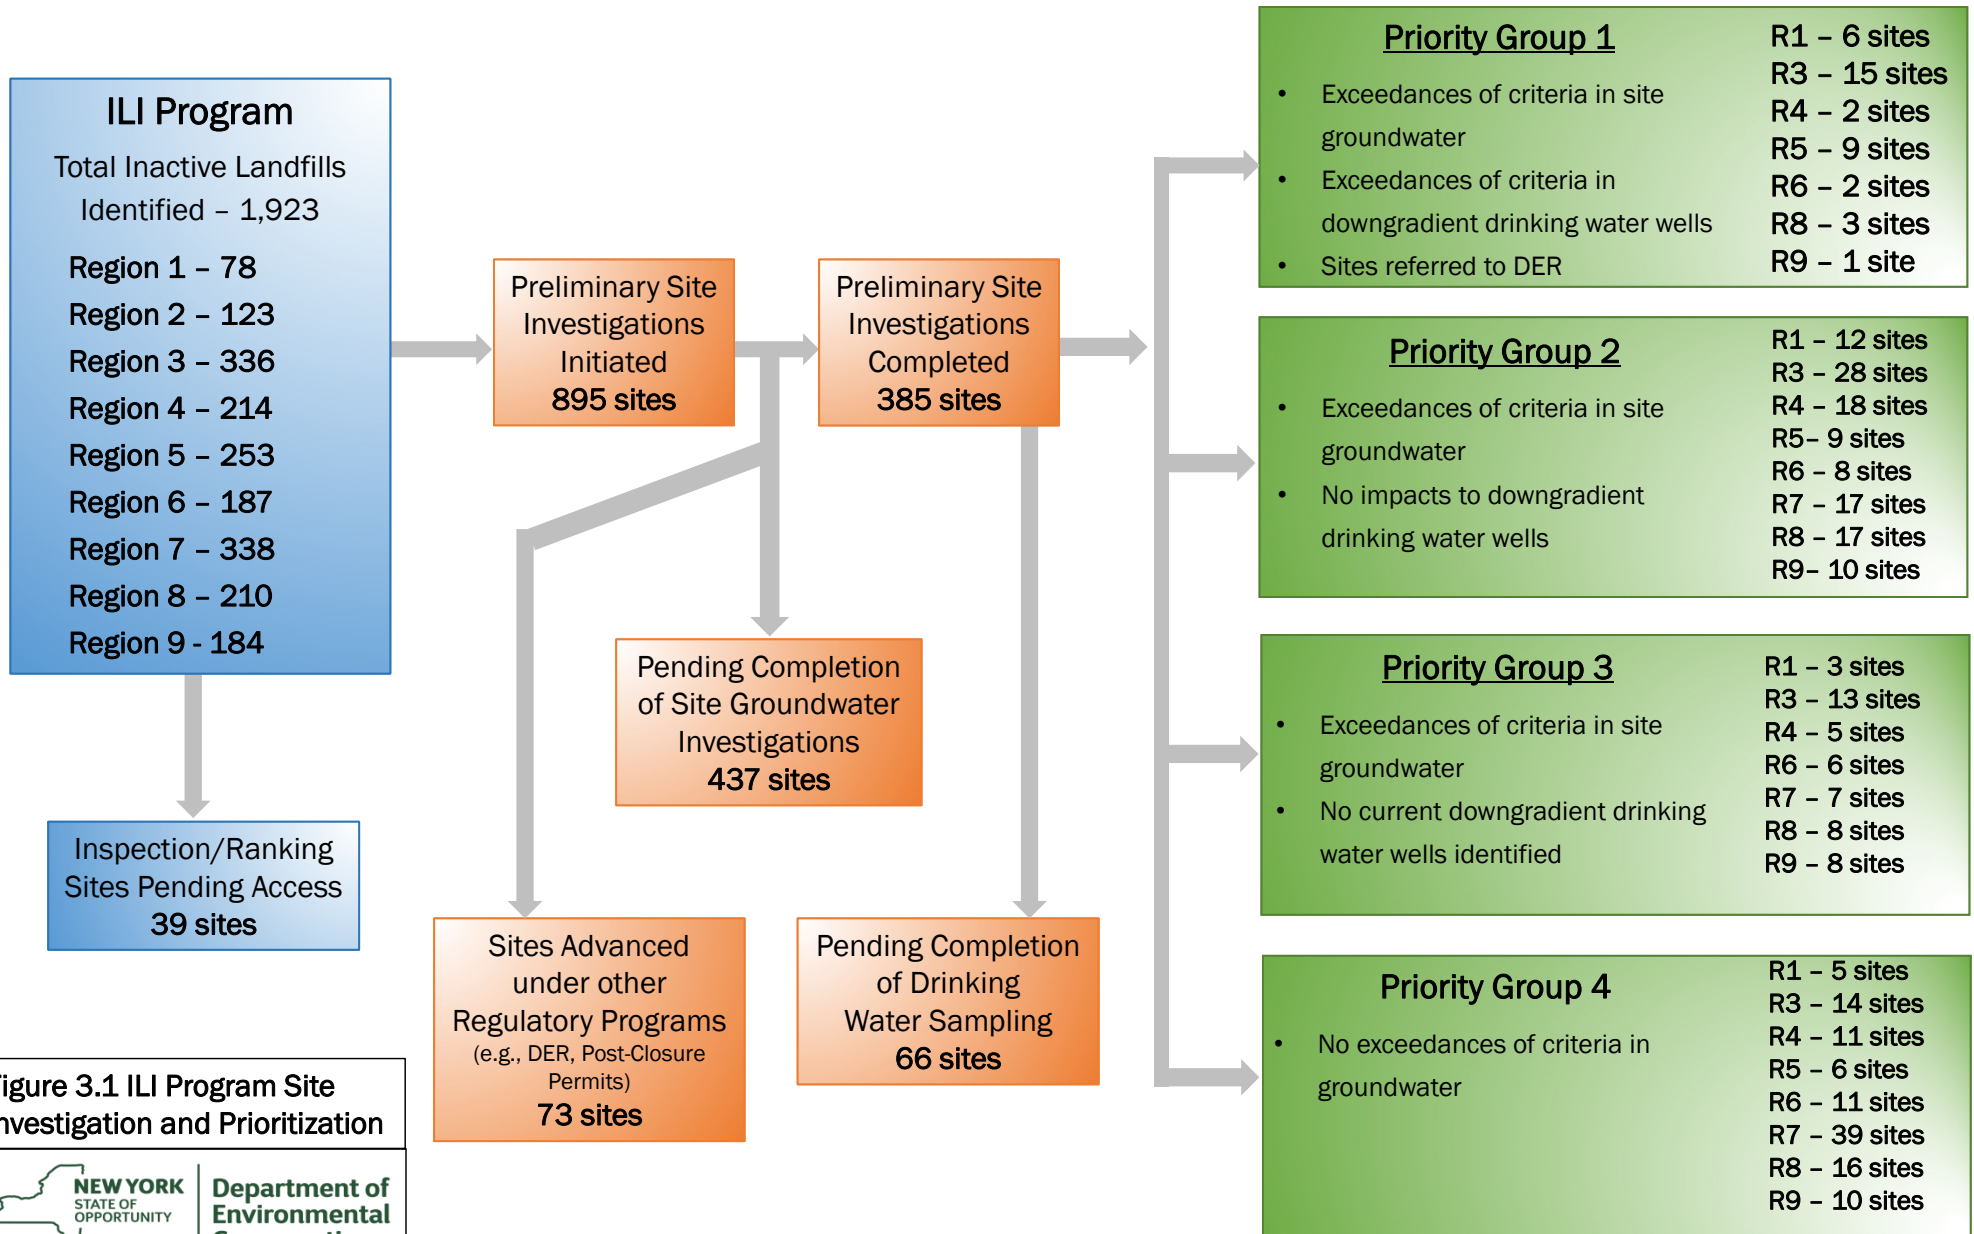

### 3.6 Future Reporting

As required in Title 12, this Comprehensive Mitigation and Remediation Plan will be updated annually. The next update will be in 2023, and will include the following:

- An updated Solid Waste Site Mitigation and Remediation Priority List, including updates based on further characterization, mitigation, and/or remediation activities, and additional sites identified from investigations initiated following the submittal of this report
- Updated statistical analyses to further assess the potential risk to drinking water resources
- Updated recommendations for further investigations and other activities associated with the ILI Program

Table 3.2: Schedule for Initiation of Future Groundwater Investigations Under the ILI Program		
Year	Activity	No. of Sites
Current	• Site field investigations underway	437* sites
	• Conduct mitigation / remediation evaluations for highest priority sites	38+ sites
2023	• Initiate investigations for Sites ranked 43-45	163 sites
	• Conduct mitigation / remediation evaluations for highest priority sites	**
	• Implement mitigation / remediation measures for highest priority sites as warranted	**
2024	• Initiate investigations for Sites ranked 40-42	174 sites
	• Continue mitigation / remediation evaluations for highest priority sites	**
	• Continue implementation of mitigation / remediation measures for highest priority sites as warranted	**
2025	• Initiate investigations for Sites ranked 40-42	155 sites
	• Continue mitigation / remediation evaluations for highest priority sites	**
	• Continue implementation of mitigation / remediation measures for highest priority sites as warranted	**
TBD	Potential future investigation list Sites beyond 2025	505 sites
TBD	Sites not yet inspected/ranked due to access	39 sites
* - Not including 73 sites being advanced under a separate program		
** - Quantity of sites included in these activities will be determined based on future investigation results

Solid Waste Site Mitigation and Remediation Priority List**

<b>Priority Group 2: Exceedance in Landfill Groundwater Samples, No Exceedances to Downgradient Drinking Water Supplies</b>				
<b>Facility Name</b>	<b>Region</b>	<b>Town</b>	<b>County</b>	<b>Site Specific Recommendations</b>
Catskill Illegal C&D Landfill	4	Catskill	Greene	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Columbia Corporation (Chatham)	4	Chatham	Columbia	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Copake SLF (T)	4	Copake	Columbia	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Delaware County Landfill	4	Walton	Delaware	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Delhi SLF	4	Delhi	Delaware	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Duanesburg SLF (T)	4	Duanesburg	Schenectady	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Durham Greenville Landfill	4	Durham	Greene	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Glenville SLF (T)	4	Glenville	Schenectady	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Gilboa SLF (T)	4	Gilboa	Schoharie	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Hunter SLF (T)	4	Tannersville	Greene	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
New Lebanon SLF (T)	4	New Lebanon	Columbia	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Old Greene County Landfill	4	Cairo	Greene	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Otego SLF (T)	4	Oneonta	Otsego	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Richard Wade Inc. LCD	4	Leeds	Greene	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Rotterdam C&D (T)	4	Rotterdam	Schenectady	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Rotterdam Town Landfill	4	Rotterdam	Schenectady	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Stephentown SLF (T)	4	Stephentown	Rensselaer	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Windham SLF (T)	4	Hensonville	Greene	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Austro Brothers Landfill	5	Middle Grove	Saratoga	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Cambridge LF	5	Caroga	Fulton	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Ciba-Geigy (Hercules)	5	Queensbury	Warren	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Clifton Park LF	5	Clifton Park	Saratoga	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Dodgie's Land Clearing Debris Landfill	5	Oppenheim	Fulton	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Greenfield LF	5	Greenfield	Saratoga	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
McLaughlin C&D Landfill	5	Queensbury	Warren	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Northville SLF	5	Northville	Fulton	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Ticonderoga Landfill - Shanahan Rd.	5	Ticonderoga	Essex	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Adams Village SLF	6	Adams	Jefferson	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Camden (T)	6	Camden	Oneida	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Cranberry Lake SLF	6	Cranberry Lake	St. Lawrence	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Madrid SLF (T)	6	Madrid	St. Lawrence	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Morristown SLF	6	Morristown	St. Lawrence	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Potsdam (T) Landfill	6	Potsdam	St. Lawrence	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Theresa (T)	6	Theresa	Jefferson	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Watertown SLF City	6	Watertown	Jefferson	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Brandywine Lot 134 Dump	7	Binghamton	Broome	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Candor SLF (Six Town Landfill)	7	Candor	Tioga	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Co Dist 3 SLF (County RD No. 3)	7	North Norwich	Chenango	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Conquest (T)	7	Conquest	Cayuga	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Cuyler SLF (T)	7	Truxton	Cortland	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation

**Table A.1  
NYSDEC Inactive Landfill Initiative  
Solid Waste Site Mitigation and Remediation Priority List**

<b>Priority Group 2: Exceedance in Landfill Groundwater Samples, No Exceedances to Downgradient Drinking Water Supplies</b>				
<b>Facility Name</b>	<b>Region</b>	<b>Town</b>	<b>County</b>	<b>Site Specific Recommendations</b>
Dellapenna Dump #1	7	Johnson City	Broome	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Earlville SLF	7	Earlville	Chenango	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Fabius SLF	7	Fabius	Onondaga	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
McGraw Dump	7	Solon	Cortland	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Mirabito Property	7	Fulton	Oswego	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Old (V) Bainbridge Dump (Old Bainbridge Village Dump)	7	Bainbridge	Chenango	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Otselic LF-RT 26	7	Otselic	Chenango	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Summerhill (T)	7	Moravia	Cayuga	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Town of Enfield/Waterburg Rd	7	Enfield	Tompkins	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Town of Groton Site	7	Freeville	Tompkins	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Town of Ulysses	7	Trumansburg	Tompkins	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Village of Dryden	7	Dryden	Tompkins	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Arcadia Landfill	8	Arcadia	Wayne	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Cedar Street Dump	8	Batavia	Genesee	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Dix (Town) Joint Landfill	8	Montour Falls	Schuyler	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Gloria Drive LF	8	Penfield	Monroe	Per available information, the surrounding area is serviced by public water. The county owns the only focus list parcel and it is unoccupied. No further action is required at this time.
Henry's Landfill	8	Hartsville	Steuben	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
L.L. Huff	8	Spencerport	Monroe	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Lodi SLF (T)	8	Lodi	Seneca	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Palmyra Trolley Line Dumpsite	8	Palmyra	Wayne	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Phelps (V) Transfer	8	Phelps	Ontario	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Rush Industry Landfill	8	Rush	Monroe	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
S. Bristol (T) Rural Transfer C&D	8	South Bristol	Ontario	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
S. Bristol (T) Rural Transfer MSW	8	South Bristol	Ontario	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Spencerport Village Dump	8	Spencerport	Monroe	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Steuben County (Wayland) Landfill	8	Wayland	Steuben	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Superior Disposal C&D	8	Interlaken	Seneca	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
WAYNE LF (T)	8	Wayne	Steuben	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Yates Co. #1 SLF	8	Middlesex	Yates	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Clarksville Landfill	9	Clarksville	Allegany	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Coldspring LF (T)	9	Coldspring	Cattaraugus	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Day Farm Landfill	9	Bolivar	Allegany	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Dinsbier Road Landfill	9	Mayville	Chautauqua	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Formso Landfill	9	Perry	Wyoming	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
George Stephen Landfill	9	Olean	Cattaraugus	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Great Valley Landfill	9	Great Valley	Cattaraugus	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Ischua Landfill (City of Olean)	9	Olean	Cattaraugus	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Machias Landfill	9	Machias	Cattaraugus	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation
Town of Hanover Sanitary	9	Hanover	Chautauqua	• Follow-up drinking water supply monitoring if recommended by NYSDOH • Evaluate source monitoring and/or mitigation

**Table A.1

## Table A.2

### NYSDEC Inactive Landfill Initiative Solid Waste Site Investigation Priority List

**Table A.2**  
**NYSDEC Inactive Landfill Initiative**  
**Solid Waste Site Investigation Priority List**

Landfill	Region	County	Ranked Score	Status / Recommendation
Ilion Landfill	6	Herkimer	84	GW Sampling Completed, No Residential Sampling (See Table A.1)
Mt Ivy Swamp (AKA Quaker Road)	3	Rockland	80	Residential Sampling Completed and/or Site Referred to DER
Delhi SLF	4	Delaware	80	Residential Sampling Completed and/or Site Referred to DER
Hoosick Falls Landfill	4	Rensselaer	80	Site Being Addressed by DER - NFA under ILI Program
Westchester Co. Airport LF	3	Westchester	79	Residential Sampling Completed and/or Site Referred to DER
Petersburg SLF (T)	4	Rensselaer	78	Site Being Addressed by DER - NFA under ILI Program
Northville SLF	5	Fulton	78	Residential Sampling Completed and/or Site Referred to DER
Westhampton Transfer Station (Westhampton Landfill)	1	Suffolk	77	Residential Sampling Completed and/or Site Referred to DER
Pat Campbell	3	Orange	77	GW Sampling Completed, No Residential Sampling (See Table A.1)
Charlton Dump (Suites Landfill)	5	Saratoga	77	Site-Specific Work Plan in Development
Carroll (T) Landfill	9	Chautauqua	77	Site Being Addressed by DER - NFA under ILI Program
Chemung County Area 3 Sanitary Landfill	8	Chemung	76	Requirement for PFAS Sampling Submitted to Property Owner
Prato	3	Putnam	75	NYSDEC Enforcement Case Site
Town of Ramapo Landfill	3	Rockland	75	Requirement for PFAS Sampling Submitted to Property Owner
Suffolk Airport C & D Site	1	Suffolk	74	Site-Specific Work Plan in Development
Cortese	3	Sullivan	74	Requirement for PFAS Sampling Submitted to Property Owner
Fair Street	3	Putnam	74	Residential Sampling Completed and/or Site Referred to DER
Fishkill Landfill East Site	3	Dutchess	74	Residential Sampling Completed and/or Site Referred to DER
William G. Lyons	4	Schenectady	74	Site-Specific Work Plan in Development
Rock C&D Landfill	5	Saratoga	74	Residential Sampling Completed and/or Site Referred to DER
Potsdam (T) Landfill	6	St. Lawrence	74	Residential Sampling Completed and/or Site Referred to DER
GARDEN PLOT DUMP	7	Broome	74	GW Sampling Completed, No Residential Sampling (See Table A.1)
Chemung County Area 2 C&D Landfill	8	Chemung	74	Requirement for PFAS Sampling Submitted to Property Owner
Barnes	3	Sullivan	73	Residential Sampling Completed and/or Site Referred to DER
Pawling	3	Dutchess	73	Residential Sampling Completed and/or Site Referred to DER
Southeast Landfill	3	Putnam	73	Residential Sampling Completed and/or Site Referred to DER
Sudakow Dump	6	Herkimer	73	Field Work Pending Access Agreement
Allied Chemical Waste Beds 9-15	7	Onondaga	73	NYSDEC Conducting EC Sampling
Former Walton Landfill	4	Delaware	72	Residential Sampling Completed and/or Site Referred to DER
Roxbury SLF (Lower)	4	Delaware	72	GW Sampling Completed, No Residential Sampling (See Table A.1)
Sacandaga Road Landfill	4	Schenectady	72	Field Work Pending Access Agreement
Greenfield LF	5	Saratoga	72	Residential Sampling Completed and/or Site Referred to DER
Geneva City Landfill - Gambee Rd	8	Ontario	72	GW Sampling Completed, No Residential Sampling (See Table A.1)
Bullpath Demo. SLF (Bull Path Landfill)	1	Suffolk	71	Residential Sampling Completed and/or Site Referred to DER
Mayer	3	Orange	71	Requirement for PFAS Sampling Submitted to Property Owner
Prisco C&D Landfill	3	Putnam	71	Residential Sampling Completed and/or Site Referred to DER
Veteran's Park	3	Orange	71	GW Sampling Completed, No Residential Sampling (See Table A.1)
Columbia Corporation (Chatham)	4	Columbia	71	Residential Sampling Completed and/or Site Referred to DER
Stamford SLF	4	Delaware	71	GW Sampling Completed, Scheduling Residential Sampling
City of Ithaca Dump	7	Tompkins	71	GW Sampling Completed, No Residential Sampling (See Table A.1)
Endicott & Johnson Site - Boland Park	7	Broome	71	GW Sampling Completed, No Residential Sampling (See Table A.1)
Otego SLF (T)	4	Otsego	70	Residential Sampling Completed and/or Site Referred to DER
Old Champlain (T) Landfill	5	Clinton	70	GW Sampling Completed, No Residential Sampling (See Table A.1)
Lyle's Pit	6	Herkimer	70	Field Work Pending Access Agreement
Utica City Dump	6	Oneida	70	GW Sampling Completed, No Residential Sampling (See Table A.1)
Morabito / VIP Industries (VID Industries)	1	Suffolk	69	Residential Sampling Completed and/or Site Referred to DER
61 Sandy Street	3	Putnam	69	Field Work Pending Access Agreement
Tuxedo	3	Orange	69	Requirement for PFAS Sampling Submitted to Property Owner
Armstrong Cork: South LF	7	Oswego	69	GW Sampling Completed, No Residential Sampling (See Table A.1)
OLD BEDOSKY DUMP	7	Broome	69	Field Work Pending Access Agreement
CEDAR STREET DUMP	8	Genesee	69	GW Sampling Completed, No Residential Sampling (See Table A.1)
Shore Park	3	Westchester	68	GW Sampling Completed, Scheduling Residential Sampling
Galway Rt 147	5	Saratoga	68	GW Sampling Completed, No Residential Sampling (See Table A.1)
Little Falls Landfill	6	Herkimer	68	GW Sampling Completed, No Residential Sampling (See Table A.1)
Lorraine Hardfill (T)	6	Jefferson	68	GW Sampling Completed, No Residential Sampling (See Table A.1)
Chemung County Area 5 Sanitary Landfill	8	Chemung	68	Requirement for PFAS Sampling Submitted to Property Owner
Elmira City of land clearing debris landfill	8	Chemung	68	Groundwater Sampling Completed, Developing Focus List
LaGrange	3	Dutchess	67	Residential Sampling Completed and/or Site Referred to DER
Royal Carting Service	3	Dutchess	67	Residential Sampling Completed and/or Site Referred to DER
Sessler	3	Dutchess	67	GW Sampling Completed, Scheduling Residential Sampling
Stewart Air National Guard	3	Orange	67	Site Being Addressed by DER - NFA under ILI Program
Cairo SLF	4	Greene	67	GW Sampling Completed, No Residential Sampling (See Table A.1)
Old Greene County Landfill	4	Greene	67	Residential Sampling Completed and/or Site Referred to DER
Windham SLF (T)	4	Greene	67	Residential Sampling Completed and/or Site Referred to DER
Al Rose C&D Landfill	5	Saratoga	67	Residential Sampling Completed and/or Site Referred to DER
Plattsburgh SLF (T)	5	Clinton	67	Residential Sampling Completed and/or Site Referred to DER
City of Utica	6	Oneida	67	Site-Specific Work Plan in Development
Rodman Hardfill Dump (T)	6	Jefferson	67	GW Sampling Completed, No Residential Sampling (See Table A.1)
MOSES AND SON DUMP	7	Broome	67	Site-Specific Work Plan Drafted, Pending RMME Approval
Tidd C&D Landfill	7	Tompkins	67	Site-Specific Work Plan Drafted, Pending RMME Approval
Town of Ulysses	7	Tompkins	67	Residential Sampling Completed and/or Site Referred to DER
L.L. Huff	8	Monroe	67	Residential Sampling Completed and/or Site Referred to DER
George Stephen Landfill	9	Cattaraugus	67	Residential Sampling Completed and/or Site Referred to DER
Fishkill/East Fishkill Joint Landfill	3	Dutchess	66	GW Sampling Completed, No Residential Sampling (See Table A.1)

**Table A.2**  
**NYSDEC Inactive Landfill Initiative**
