

Explore!

The best way to enjoy nature is to get outside. As you explore, draw a map. Where is your campsite? Where is your favorite spot?

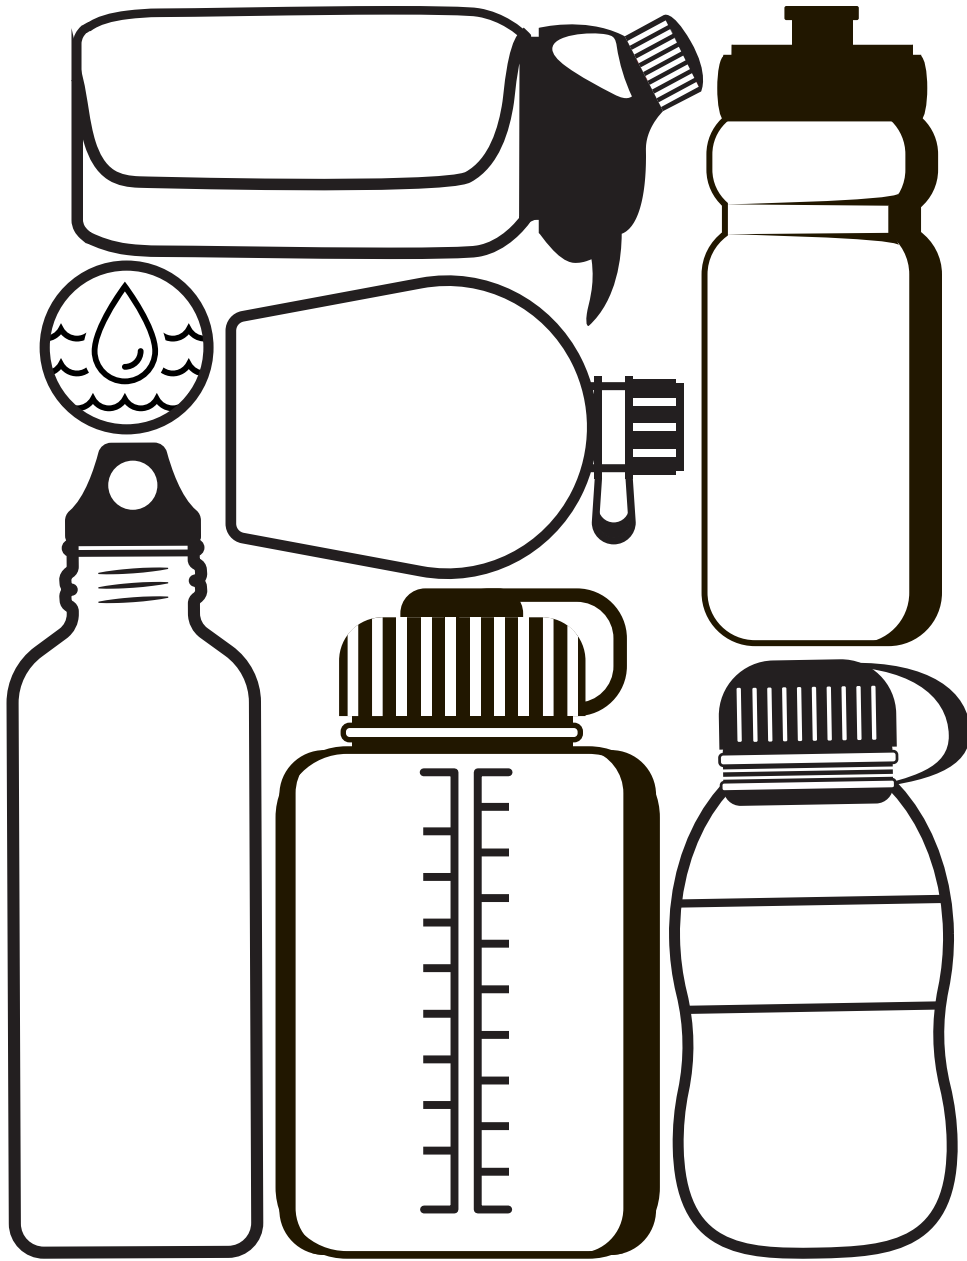

SUSTAINABLE LIVING

Coloring Pages

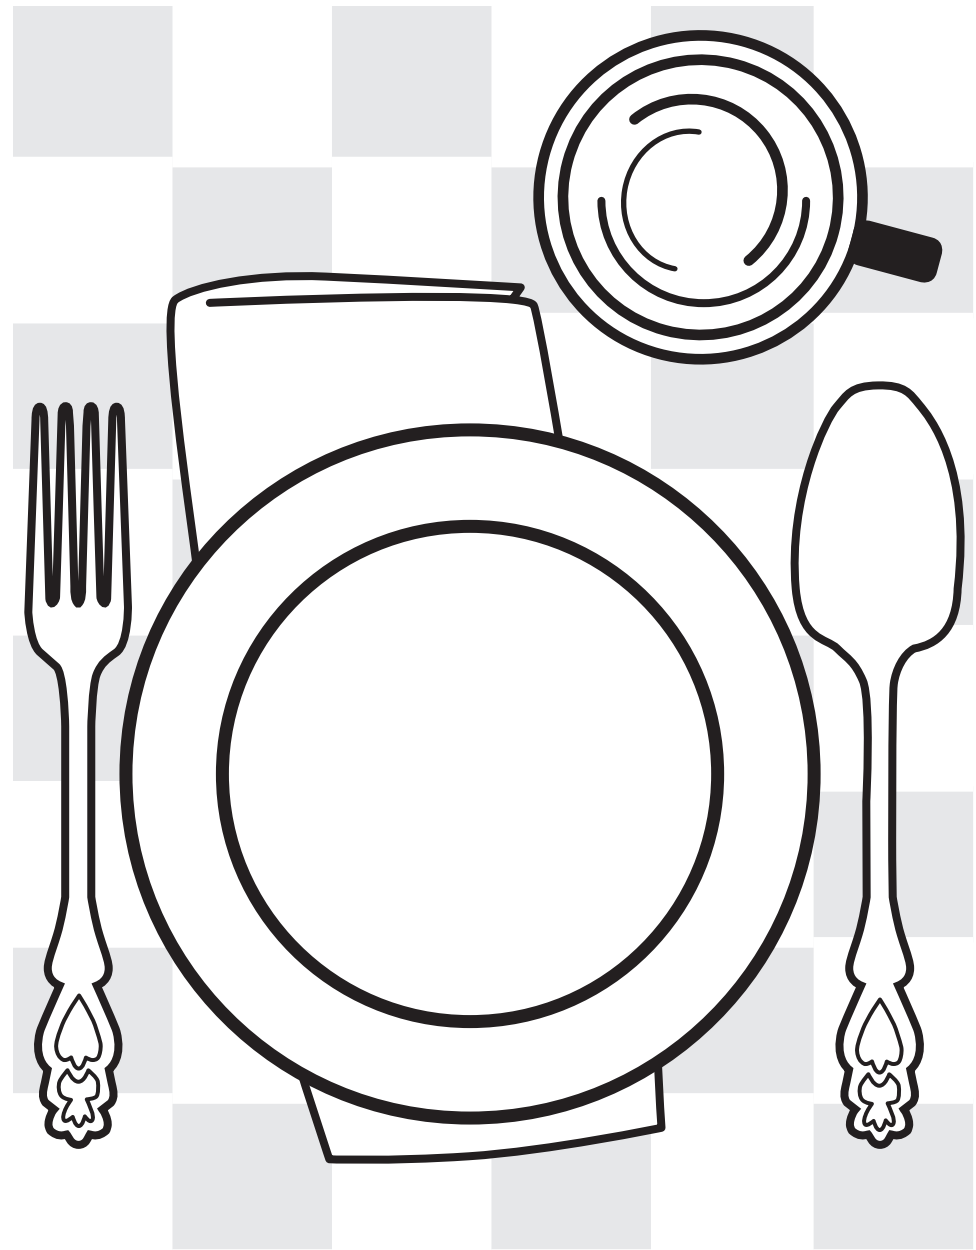

Get moving!

Cars and trucks that use gas (fossil fuels) are using a non-renewable resource (which cannot be replaced). There are many ways to get around your neighborhood besides riding in a car. You can walk, bike, skate, or take a bus or subway. Color all the different ways that you can travel.

Drink up!

People use more than 100 million disposable plastic water bottles every day and only recycle 1 in 5 bottles. Plastic creates pollution. Help the environment by filling up a colorful, REUSABLE bottle. Color the water bottles.

Clean your plate!

Every year, Americans throw away enough single-use kitchenware to circle Earth 300 times. Instead of using paper plates and plastic cups when you go camping, bring reusable plates, cups, spoons, forks, and knives. Design your own reusable picnic set!
