

MALONE FLOOD DAMAGE REDUCTION PROJECT

*Department of
Environmental Conservation*

Region 5 Counties: *Clinton, Essex,
Franklin, Fulton, Hamilton, Saratoga,
Warren, Washington*

Operated and Maintained by: The Town of Malone

PROJECT LOCATION

The project is located on the Salmon River providing flood protection to the Village and Town of Malone, New York, in northern Franklin County.

PROJECT DESCRIPTION

The project extends from upstream of the Willow Street Bridge to the Cady Road Bridge, and consisted of clearing and snagging along the bed and banks of the Salmon River for the passage of ice flows and to reduce the threat of ice and debris jams. Isolated shoals were removed, and deeper channels were provided at some locations to concentrate flows and retard production of ice in the channel. Work was completed October 30, 1959.

AUTHORIZATION

Clearing and snagging for flood control in the Salmon River, Malone, New York, was authorized by Office of Chief of Engineers, in September 1957, under Public Law No. 780 – 83rd Congress, Second Session, called the “1954 Flood Control Act.”

PROTECTION PROVIDED

The project was designed to reduce the threat of flooding in the Town and Village of Malone resulting from ice and debris jams in the Salmon River.

CONSTRUCTION

Clearing and snagging of the project area began November 3rd, 1958, with rented tractor and dragline equipment under the supervision and direction of Corps of Engineers personnel. Work was completed October 30th, 1959, at a cost of approximately \$45,000.
