Schenectady, NY 12306-2014

**RE: Withdrawal of Registration of Tanks 4660 and 4670  
Hazardous Substance Bulk Storage Application  
Norlite LLC, CBS Number 4-000198**

Dear Ms. Kornak:

PW Grosser Consulting (PWGC), on behalf of Norlite LLC, is requesting the withdrawal of the Pre-Work Notification and Hazardous Substance Bulk Storage Application submitted on February 24, 2020. Due to operational considerations, the coolant being used has been switched from ethylene glycol to propylene glycol, an unregulated substance. Therefore, these tanks are not required to be registered with NYSDEC.. Please let PWGC and Norlite know if any other paperwork is required to withdraw the registration of Tanks 4660 and 4670.

Should you have any questions, do not hesitate to call my office at 518-335-3636.

Sincerely,  
**P.W. Grosser Consulting**

Maryann Ashworth, PG, CPESC  
Senior Project Manager
