RE: RCRA 6 NYCRR Part 373 Hazardous Waste Permit  
Permit ID: 4-0103-00016/00016 (RCRA ID: NYD080469935)

Dear Mr. Knight,

The New York State Department of Environmental Conservation (Department) has identified a number of errors in the RCRA 6 NYCRR Part 373 Hazardous Waste Permit (renewed on January 1, 2016) which are either inconsistencies or items which conflict with the established regulations in 6 NYCRR Part 373. The Department is hereby providing Norlite with this notice of intent to modify Norlite's Part 373 Permit pursuant to 6 NYCRR 373-1.7(c)(1)(i) and 6 NYCRR 373-1.7(c)(1)(ii). Below is a list of the changes being made:

1. Attachment A, which is currently "RESERVED", is being modified to include the completed and signed Part A Application included in Norlite's permit renewal application in Section 1 – Site ID Form. The Table of Contents in the Permit is also being updated accordingly.
2. Under Condition F of Schedule 1 of Module I (Routine Reporting), the referenced requirement for "Copies of Hazardous Waste Manifests to NYSDEC" is being changed to "6 NYCRR 373-2.5(b)(1)(i)(b)(5)".
3. Under Condition F of Schedule 1 of Module I (Routine Reporting), the reporting due date for "Tank System Assessment Report" is being changed to "Within 30 days of inspection" to agree with Exhibit D, Condition C.3.
4. The contact information for submissions to Department staff under Condition B of Exhibit A in Schedule 1 of Module I is now updated. See pages A-2 and A-3 attached to this letter.
5. In Module IV Condition K.4, the reference to Condition B of Exhibit D in Schedule 1 of Module I is incorrect, and the reference to 6 NYCRR 373-2.10(d)(4)(iii) is not applicable to Norlite for the purposes of secondary containment integrity assessment of tanks. Module IV Condition K.4 is now corrected to incorporate the Department's standard language and conditions for Module IV.

Department of  
Environmental  
Conservation

In an enclosure to this letter, the Department has included the specific pages that are being added or replaced in the Permit. The added and modified Permit pages include the first page of the Table of Contents; all of Attachment A; Schedule 1 of Module I pages S1-12, S1-13, A-2, and A-3; and Module IV pages IV-6 and IV-7. Please add/replace these pages in your copy of the permit. As a requirement of this modification, please also record these changes in Attachment D permit modification log (and the changes from previous modifications on 2/29/16 and 4/1/16 which have yet to be recorded) as required by Module I Condition D.2.a and D.3, and submit a copy to the Department within 15 days of this letter.

This letter and the enclosed pages are to be considered an official amendment to Norlite's Part 373 Permit and, as such, are to be incorporated therein. This official amendment will become effective on June 17, 2016, unless Norlite submits a written statement within 15 days of this letter's receipt in accordance with 6 NYCRR Part 621.13(d) of the regulations.

Under 6 NYCRR Part 373-1.7(e), Norlite is required to notify all persons on the facility mailing list of this modification. Please provide this office with a copy of your notification for our records.

If you have any questions, please contact either David Lates at (518) 402-9814 or me at (518) 357-2452.

Sincerely,

Nancy Baker

**9. Description of Hazardous Wastes - Enter Information in the Sections on Form Page 5**

- A. EPA HAZARDOUS WASTE NUMBER** – Enter the four-digit number from 40 CFR, Part 261 Subpart D of each listed hazardous waste you will handle. For hazardous wastes which are not listed in 40 CFR, Part 261 Subpart D, enter the four-digit number(s) from 40 CFR Part 261, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.
- B. ESTIMATED ANNUAL QUANTITY** – For each listed waste entered in Item 9.A, estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in Item 9.A, estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.
- C. UNIT OF MEASURE** – For each quantity entered in Item 9.B, enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
POUNDS	P	KILOGRAMS	K
TONS	T	METRIC TONS	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure, taking into account the appropriate density or specific gravity of the waste.

**D. PROCESSES****1. PROCESS CODES:**

**For listed hazardous waste:** For each listed hazardous waste entered in Item 9.A, select the code(s) from the list of process codes contained in Items 7.A and 8.A on page 3 to indicate all the processes that will be used to store, treat, and/or dispose of all listed hazardous wastes.

**For non-listed waste:** For each characteristic or toxic contaminant entered in Item 9.A, select the code(s) from the list of process codes contained in Items 7.A and 8.A on page 3 to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

**NOTE: THREE SPACES ARE PROVIDED FOR ENTERING PROCESS CODES. IF MORE ARE NEEDED:**

- Enter the first two as described above.
- Enter "000" in the extreme right box of Item 9.D(1).
- Use additional sheet, enter line number from previous sheet, and enter additional code(s) in Item 9.E.

- 2. PROCESS DESCRIPTION:** If code is not listed for a process that will be used, describe the process in Item 9.D(2) or in Item 9.E(2).

**NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER** – Hazardous wastes that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

- Select one of the EPA Hazardous Waste Numbers and enter it in Item 9.A. On the same line complete Items 9.B, 9.C, and 9.D by estimating the total annual quantity of the waste and describing all the processes to be used to store, treat, and/or dispose of the waste.
- In Item 9.A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In Item 9.D.2 on that line enter "included with above" and make no other entries on that line.
- Repeat step 2 for each EPA Hazardous Waste Number that can be used to describe the hazardous waste.

**EXAMPLE FOR COMPLETING Item 9** (shown in line numbers X-1, X-2, X-3, and X-4 below) – A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operations. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.

shall be required to occur within five (5) calendar years of its most recent assessment.

- b. Each tank system assessment must entail an inspection of all visible tank system components including but not necessarily limited to the tank exterior, tank supports, piping, pumps, valves and any overfill prevention controls (tank system secondary containment must be inspected in accordance with **Condition E and K.4** of this Module). The tank system assessment also requires a visual inspection of the tank's interior for any tank(s) identified in **Schedule 1 of Module I** as requiring such additional assessment. Any tank(s) requiring an internal inspection must be completely emptied and cleaned to expose all internal tank surfaces for examination by the engineer/inspector. The engineer/inspector must identify and record all observed cracks, leaks, corrosion, interior coating defects (where applicable) and any other areas of deterioration that could affect the integrity of the tank system. For steel tanks, the engineer/inspector must also obtain ultrasonic thickness measurements of all accessible tank surfaces to determine the integrity of the tank shell.
  - c. After each assessment, the engineer/inspector must report to the Permittee as specified in the schedule provided in **Schedule 1 of Module I** of this Permit any and all tank system defects identified during the assessment along with repair recommendations. The Permittee must repair all identified defects in accordance with the engineer's/inspector's recommendations and have the engineer/inspector verify the adequacy of the repairs. Any tank system that is found to be leaking or unfit for use by the engineer/inspector must be immediately removed from service and must not be returned to service until the Permittee obtains a certification of major repairs in accordance with 6 NYCRR 373-2.10(g) and this Permit.
  - d. The engineer/inspector must prepare a detailed report for all tank systems that are assessed. For each tank system, the report must include a description of observations made during the visual inspection, the result of any ultrasonic thickness measurements taken of the tank shell and the engineer's/inspector's evaluation of these measurements, a description of any defects identified, and an evaluation of all repairs made by the Permittee. The annual report must also include a statement from the engineer/inspector which certifies that all repairs were made in accordance with the engineer's/inspector's recommendations and that all in-service tank systems assessed are capable of handling hazardous wastes without release for the intended life of the system. This report must be submitted to the Department within 90 days of the assessment, unless the Department approves an extension of no greater than 30 days or as otherwise specified in **Schedule 1 of Module I**.
4. Independent Assessment of Tank Systems Secondary Containment
- a. For the tank systems authorized by this Permit with secondary containment designed in accordance with 6 NYCRR 373 2.10(d)(4)(i) or (ii), independent assessments must be conducted triennially for indoor containment areas not exposed to the

weather and annually for all other containment areas, unless otherwise specified in **Schedule 1 of Module I**. The assessment must identify any deficiencies in each containment area, including but not limited to cracks, gaps or defects in the impermeable surface coatings or other defects that would inhibit the ability of the containment system to contain leaks or overflows in accordance with the requirements of 6 NYCRR 373 2.10(d). The assessment must be performed by an independent, qualified Professional Engineer licensed in New York State or a qualified inspector working under the Professional Engineer. Any equipment and miscellaneous debris must be removed from the containment system so that all surfaces are completely exposed for inspection. Any defects identified during the assessment must be documented by the engineer/inspector in an assessment report. Once any defects have been repaired, the secondary containment area(s) must be re-inspected by the engineer/inspector to evaluate the adequacy of the repairs and to confirm that the secondary containment area(s) meets the requirements of 6 NYCRR 373 2.10(d) and **Condition C of this Module**. The assessment report must document the results of such re-inspections and confirm that the secondary containment area(s) meets the cited requirements. Copies of each assessment report must be retained by the Permittee in accordance with 6 NYCRR 373 1.6(a)(10) and made available for review upon Department request. The Permittee may also be required to submit the assessment report to the Department if so specified in **Schedule 1 of Module I**.

- b. For the tank systems authorized by this Permit with secondary containment designed in accordance with 6 NYCRR 373-2.10(d)(4)(iii), assessments must be conducted in accordance with the schedule and conditions specified in **Exhibit D in Schedule 1 of Module I**.
5. Precautions in Flammable & Oxidizer Waste Storage Areas: Machinery and equipment must not be permitted in flammable and oxidizer waste storage areas or any process area where a flammable atmosphere may exist unless it has been fitted with appropriate safeguard devices approved by Underwriters Laboratories (UL) to render the machinery/equipment intrinsically safe. Only non-sparking tools shall be used in these storage areas.
