"Contained-In" Determination Request - Kiln Brick (2018)

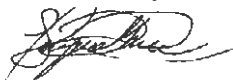

Dear Mr. Knight:

We have completed our review of the data (Sample ID: S071218006) submitted with your July 30, 2018 request, for a "contained-in" determination at the referenced project site.

Concentrations detected for individual VOCs were all significantly less than their current "contained-in" soil action levels and Land Disposal Restriction concentrations. No hazardous constituents exhibited a hazardous waste characteristic by exceeding their TCLP regulatory level. Therefore, approximately 5 Cubic Yards of Kiln Brick and refractory material removed from Kiln #1 at the referenced project site, do not have to be managed as hazardous waste and can be transported off-site as non-hazardous materials to the Permitted Solid Waste Landfill. Please provide the name and address of the facility that will receive it.

Should you have any questions regarding the content of this letter, please do not hesitate to contact me at (518) 402-9611 or email me at henry.wilkie@dec.ny.gov.

Sincerely,

Henry Wilkie
Environmental Engineer 1
Resource Management Section
