## **SECTION 3 - WASTE FLUIDS RECOVERED**

Complete this table by reporting <u>volumes</u> of End-of-Life Vehicle (ELV) waste fluids managed at the facility during the reporting period. <u>Qualitative responses (i.e.  $\sqrt{3}$ 's or X's) are not acceptable</u>. Report only fluids generated from dismantling operations (not general car repair, etc.).

|   |  | Fluid                            | Destination Name & Addre      |                       |   |
|---|--|----------------------------------|-------------------------------|-----------------------|---|
| Waste Fluid<br>Recovered                | Used<br>on-site<br>(oil heater,<br>etc.) | Stored<br>on-site at<br>year-end | Sold/<br>Recycled<br>off-site | Disposed<br>off-site* | (Indicate permitted facility or permitted Part 364 transporter accepting waste fluids.) |
| Refrigerant<br>(pounds)                 |  | 30                               |                               |                       |   |
| Used Oil**<br>(gallons)                 | 1700                                     | 200                              |                               |                       | used in shop heating  |
| Diesel Fuel<br>(gallons)                | 5000                                     |                                  |                               |                       | used in yard equipment  |
| Gasoline<br>(gallons)                   | 300                                      |                                  |                               |                       | used in yard equipment  |
| Engine Coolant/<br>Antifreeze (gallons) | 400                                      |                                  |                               |                       | used in yard equipment  |
| Window Washing<br>Fluid (gallons)       | 10                                       |                                  |                               |                       | used in yard equipment  |
| Other (specify)<br>Iydraulic oil        | 200                                      |                                  |                               |                       | used in yard equipment  |

\* Any fluids disposed must undergo a hazardous waste determination and proper handling, storage, and disposal, if hazardous.

\*\* Includes Engine Oil, Transmission Fluid, Axle Fluids, Hydraulic Fluid, Power Steering Fluid, Brake Fluid, etc.

### **SECTION 4 - SCRAP METAL**

Complete this table by reporting the amount of metal received, stored and sent off site, by the facility, during the reporting period.

|                              | Received | Stored On Site | Sent Off Site | Destination  |                               |             |
|------------------------------|----------|----------------|---------------|--|-------------------------------|-------------|
| Material Types               | (tons)   | (tons)         | (tons)        | NYS <u>Planning Unit (</u> or state if<br>other than New York) | To Scrap<br>Metal<br>Processo |             |
| Ferrous Scrap<br>Metal       |          |                | 2294.1365     |  | ₽Yes                          | <b>□</b> No |
| Aluminum<br>Scrap Metal      |          |                | 17.9          |  | €Yes                          | <b>□</b> No |
| Lead Weights                 |          |                |               |  | Yes                           |             |

| Other (specify):<br>Batterey |          |                | 3.578         |  | Yes                           | <b>N</b> o  |
|                              |          |                |               |  | Yes                           |             |

### **SECTION 5 – MERCURY SWITCHES COLLECTED**

Provide the number of mercury-containing devices <u>recovered</u>. Including but not limited to hood & trunk lighting switches (H&TS) and antilock brake assemblies (ABS).

H&TS <u>n/a</u> (Number)

ABS \_\_\_\_\_\_(Number)

Indicate permitted facility or permitted transporter accepting mercury containing devices:

| SECTION 6 – AIR BAGS COLLECTED |  |
|--------------------------------|--|
|--------------------------------|--|

Provide the number of air bags recovered.

 Number of Air Bags Removed:
 n/a
 Number of Air Bags Deployed:
 n/a

Indicate permitted facility or permitted transporter accepting alr bags:

## SECTION 7 - LEAD-ACID BATTERIES COLLECTED

Provide the number of lead-acid batteries recovered and their disposition.

Number of Lead-Acid Batteries collected from ELVs:

400

Indicate permitted facility or permitted transporter accepting lead-acid batteries:

Any materials disposed must undergo a hazardous waste determination and proper handling, storage and disposal, if hazardous.

| Number of waste tires stored on-site:                                  | 1600 | as of December 31     |
|--|------|-----------------------|
| Number of used tires available for sale on-site:                       | 250  | as of December 31     |
| Number of used tires sold:   | 380  | during operating year |
| Number of waste tires shipped off-site for recycling, disposal, other: | 2200 | during operating year |
| Indicate name of facility(ies) accepting waste tires:                  |      |                       |
|  |      |                       |
|  |      |                       |
|  |      |                       |

| SECTION | 8 - | WASTE | TIRES | COLLECTED |
|---------|-----|-------|-------|-----------|
| SECTION | 0-  | TASIL | INCO  | COLLECTED |

|                                   | <b>SECTION 9 – SELF INSPECTIONS</b>   | 50                                   |
|-----------------------------------|---|--------------------------------------|
| Number of self                    | -inspections conducted for the year:  | 50                                   |
| Are self-inspec<br>☐ Yes ☑ No     | tion records up-to-date with inspector name, what was inspected, tin            | ne and date of inspection?           |
| At a minimum,<br>☑Yes <b>☐</b> No | are fluid storage areas, vehicles, vehicle storage areas inspected for          | r leaks/spills?                      |
|                                   | SECTION 10 - PROBLEMS   |                                      |
| Were any prob<br>facility procedu | lems encountered during the reporting period (e.g., specific occurrent<br>res)? | ces which have led to changes in     |
| Yes No                            | If yes, attach additional sheets identifying each problem and the mo            | ethods for resolution of the problem |
|                                   | SECTION 11 - CHANGES  |                                      |
|                                   | y changes from approved reports, plans, specifications, and permit c            | conditions?                          |
| Were there an                     |   |                                      |

# **SECTION 12 - COMPLIANCE CERTIFICATION**

As of December 31, 2021:

|  |          |         |       | Date of Return to |
|--|----------|---------|-------|-------------------|
| Waste Management Compliance Checklist  | NA       | Yes     | No    | Compliance        |
| 1. If your facility stores LESS THAN 1,000 tires, check NA. If your facility stores MORE THAN 1,000 tires, do you have a PART 360 permit for tire storage? | ~        |         |       |                   |
| <ol> <li>Is a system in place to control vegetation and prevent it from encroaching onto<br/>fire access lanes or driveways?</li> </ol>                    |          | 2       |       |                   |
| 3. Have you recorded the date of receipt for all end-of-life vehicles received?  |          | ~       |       |                   |
| 4. Are the end-of-life vehicle records available on-site?  |          | ~       |       |                   |
| 5. Have all end-of-life vehicles been inspected, upon arrival, for leaking fluids and<br>unauthorized wastes?  |          | 2       |       |                   |
| 6. Have all observed leaks been remedied or contained?   |          | 2       |       |                   |
| 7. Does your facility have a written Contingency Plan?   |          | 2       |       |                   |
| 8. Are facility personnel trained to implement the Contingency Plan?   |          | ~       |       |                   |
| 9. Does your Contingency Plan include actions to be taken in the event of the follow   | ving?    |         |       |                   |
| 9a. Fire.  |          | ~       |       |                   |
| 9b. Spill or release of vehicle waste fluids.  |          | 2       |       |                   |
| 9c. Unauthorized material received at facility.  |          | ~       |       |                   |
| <ol> <li>Are spills of waste fluids, if any occur, reported to the NYSDEC<br/>Spills Hotline within two hours of detection?</li> </ol>                     |          | 2       |       |                   |
| 11. Are all vehicle residues prevented from migrating from or running off your property?   |          | ~       |       |                   |
| 12. Is dust controlled to prevent interference with facility operations or from leaving facility site?   |          | 2       |       |                   |
| 13. Are vectors (mosquitoes, rats, mice, etc.) controlled to prevent interference with facility operations?  |          | ~       |       |                   |
| 14. Are waste fluids kept from being discharged onto the ground or into surface waters?  |          | ~       |       |                   |
| 15. Is access to your facility controlled by: fences, gates, sign and/or natural barriers<br>(not vehicles)?   |          | ~       |       |                   |
| 15a. Are the access controls working (i.e. controlling access)?  |          | ~       |       |                   |
| 16. Are fluids drained from end-of-life vehicles on a pad constructed of concrete or<br>equivalent material?   |          | ~       |       |                   |
| 17. Are you doing the following with your concrete (or equivalent surface) pad that is draining, crushing, etc.?   | used for | vehicle | disma | ntling, fluid     |
| 17a. Cleaning daily.   |          | ~       |       |                   |
| 17b. Cleaning spills as they occur.  |          | ~       |       |                   |
| 17c. Collecting and properly disposing of absorbent materials.   |          | •       |       |                   |
| Descripted (19/00)   |          |         |       |                   |

|   |            | 18       |         | Date of Return to |
|---|------------|----------|---------|-------------------|
| Waste Management Compliance Checklist   | NA         | Yes      | No      | Compliance        |
| 18. Have the following wastes been drained, removed, deployed, collected and/or stor<br>practices, prior to vehicle crushing or shredding?                | red follow | ving be  | st mana | gement            |
| 18a. Fluids (including engine oil, transmission fluid, transaxle fluid, front and rear axle fluid, brake fluid, power steering fluid, coolant, and fuel). |            | 2        |         |                   |
| 18b. Lead acid batteries.   |            | ~        |         |                   |
| 18c. Mercury switches or other mercury containing devices, if any.  |            | ~        |         |                   |
| 18d. Refrigerants, if any.  |            | ~        |         |                   |
| 18e. Air bags.  | ~          |          |         |                   |
| 18f. PCB capacitors, if any.  | ~          |          |         |                   |
| 19. Are fluids stored separately & in containers that are compatible with their contents?   |            | 2        |         |                   |
| 20. Are fluids stored in closed containers?   |            | 2        |         |                   |
| 21. Are containers which contain waste fluids in good condition and not visibly<br>leaking?   |            | 2        |         |                   |
| 22. Are containers clearly and legibly labeled to describe their contents?  |            | ~        |         |                   |
| 23. Are containers stored on a bermed pad constructed of concrete or equivalent material?   |            | 4        |         |                   |
| 24. Are lead-acid batteries stored upright and off the ground?  |            | ~        |         |                   |
| 25. Are lead-acid batteries covered to protect them from<br>precipitation?  |            | ~        |         |                   |
| 26. Are all lead-acid batteries sent for recycling within one-year of receipt?  |            | 2        |         |                   |
| 27. Are <u>leaking</u> lead-acid batteries, if any are encountered, stored in leak-proof containers separated from intact batteries?                      |            | 2        |         |                   |
| 27a. Are provisions in place to absorb any acid leakage?  |            | ~        |         |                   |
| 28. Are mercury switches and other mercury containing devices stored in appropriate, labeled containers and then sent for recycling?                      |            | 2        |         |                   |
| 29. Are PCB capacitors, if any are encountered, removed and stored in appropriate, labeled containers for recycling or disposal?                          | ~          |          |         |                   |
| 30. Is used oil stored in accordance with local building codes, local fire codes, and the NYS Uniform Fire Prevention & Building Code?                    |            |          |         |                   |
| 31. If sent off-site, is used oil transported via a permitted hauler?   |            |          |         |                   |
| 32. If you do not burn used oil onsite check NA for 32a., 32b., 32c. If you do, then ans  | wer 32a    | ., 32b., | 32c:    |                   |
| 32a. Is used oil burned in a used oil space heating unit, with a maximum<br>capacity of 0.5 million BTU's per hour or less?                               |            | 2        |         |                   |
| 32b. Do on-site space heaters burn only used oil that is generated on-site or received from household do-it-yourself generators?                          | ~          |          |         |                   |
| 32c. Are combustion gases from used oil space heaters vented to the outside ambient air?  |            | ~        |         |                   |

|   |    |     |    | Date of Return to |
|---|----|-----|----|-------------------|
| Waste Management Compliance Checklist   | NA | Yes | No | Compliance        |
| 33. Is waste oil kept from being mixed with brake cleaner, carb cleaner, antifreeze, solvents, gasoline, or degreasers?   |    | ~   |    |                   |
| 34. Are sludges from sumps and oil/water separators stored in covered, closed and labeled containers?   |    | 2   |    |                   |
| 35. Are sludges properly recycled or disposed?  |    | 2   |    |                   |
| 36. Are used oil filters properly drained, crushed or dismantled?   |    | ~   |    |                   |
| 37. Are drained oil filters properly recycled or disposed?  |    | ~   |    |                   |
| 38. If your facility does not require an SPDES Multi-Sector General Permit (MSGP)<br>for Stormwater Discharge, check NA for 38a, 38b, 38c. If your facility requires<br>an SPDES MSGP answer 38a, 38b, 38c:   |    |     |    |                   |
| 38a. If required by the SPDES MSGP, has a Stormwater Pollution Prevention<br>Plan been prepared for this facility?  |    |     |    |                   |
| 38b. Is the information provided in the facility's original Notice of Intent or<br>Termination submission for the SPDES MSGP still accurate and up to<br>date?  | •  |     |    |                   |
| 38c. Has the facility's Annual Certification Report for the SPDES MSGP been<br>submitted within the previous year?  | V  |     |    |                   |
| 39. If your facility does not handle cleaning solvents, degreasers, battery acids or<br>non-vehicle wastes write NA. If these materials are handled at your facility, what is<br>the maximum amount of this material that your facility generates in any calendar<br>month? |    | 1   | 50 | pounds<br>gallons |
